UNIVERSITY INFORMATION

ADMINISTRATION

The governing board of Emporia State University is the Kansas State Board of Regents. It consists of nine members appointed by the Governor. The board elects its own chairperson. The Board of Regents appoints the President of the university, who is charged by statute with the general management of the university.

BOARD OF REGENTS

Shane Bangerter, Dodge City
Ann Brandau-Murguia, Kansas City
Bill Feuerborn, Garnett
Mark Hutton, Andover
Dennis A. Mullin, Manhattan
Dave Murfin, Wichita
Allen Schmidt, Hays
Daniel J. Thomas, Mission Hills
Helen Van Etten, Topeka

OFFICERS OF THE UNIVERSITY

Dr. Allison D. Garrett, President
Dr. David Cordle, Provost/Vice President for Academic Affairs
Ms. Diana E. Kuhlmann, Vice President for
Administration & Finance
Dr. James E. Williams, Vice President for Student Affairs
Mr. Shane Shivly, Foundation President, Vice President for
University Advancement

THE MISSION OF EMPORIA STATE UNIVERSITY

Preparing students for lifelong learning, rewarding careers, and adaptive leadership.

THE VISION STATEMENT OF EMPORIA STATE UNIVERSITY

Changing lives for the common good.

THE CORE VALUES OF EMPORIA STATE UNIVERSITY

The university has four core values: excellence, respect, responsibility, and service.

With excellence, the university values intellectual challenges, problem solving, and creative and critical thinking.

With respect, the university values integrity, collaboration, diversity, freedom of thought, freedom of inquiry, and freedom of expression.

With responsibility, the university values accountability and stewardship of the institution, the environment, human resources, and personal well-being.

With service, the university values engagement in *leadership* and *community* that positively impacts our global society.

EQUAL EMPLOYMENT OPPORTUNITY, EQUAL EDUCATIONAL OPPORTUNITY AND NON-DISCRIMINATION POLICY

Emporia State University values and welcomes the benefits of diversity, and pledges to current and prospective students, faculty, staff, administrators, and the public that we expect and demand the worth and dignity of all people be recognized without regard to any classification that might preclude a person from consideration as an individual. The University regards

inappropriate behavior, unfair treatment or harassment of any individual to be inconsistent with its goals of providing an atmosphere in which students, faculty, staff and administrators may safely learn, work and live.

Emporia State University is committed to equal employment opportunity, equal educational opportunity, and non-discrimination in the operations and administration of all university programs and services. All decisions with reference to employment (including, but not limited to, selection, discipline, promotion, or termination) and all decisions with reference to student status (including, but not limited to, admission, academic achievements, or discipline) will be made without regard to age, race, color, religion, gender, marital status, national origin, handicap or disability, status as a Vietnam Era Veteran, sexual orientation, or any other factors which cannot lawfully be considered, to the extent specified by applicable federal and state laws.

Students who feel they have been discriminated against on the basis of any item set forth in the Equal Employment Opportunity, Equal Educational Opportunity and Non-Discrimination Policy should contact the Dean of Students - Student Affairs at 620-341-5267, 260 Memorial Union, or the Affirmative Action Officer at 620-341-5379, 211 Plumb Hall. Staff, faculty, or members of the public should contact the Affirmative Action Officer.

POSITION STATEMENT ON DIVERSITY

In pursuit of diversity and the extension of opportunity, Emporia State University seeks to enroll students from all regions of the state, the nation, and the world; from urban and rural communities; from non-traditional and traditional age groups; from those with or without disabilities; from all religious backgrounds, and from all racial and ethnic cultures. Similarly, it seeks faculty women and men from a variety of high-quality institutions, representing complementary and contrasting views within the respective disciplines as well as between disciplines, and constituting a cultural diversity which reflects the world community and provides a wide range of role models for the students. The university seeks to create an atmosphere on campus, which recognizes and celebrates both the similarities and differences among all parts of the university community.

AFFIRMATION OF VALUES

Emporia State University is an equal opportunity institution of higher education where individuals of diverse backgrounds and beliefs come to learn and work together professionally and respectfully. As a university, we seek to create and uphold high intellectual standards within a learning community, to make those intellectual standards accessible to all who engage in the learning process, and to foster a curiosity about life and society that will lead to informed and involved citizenship in all of its forms. Learning requires critical thinking about the production of knowledge and the various beliefs that people may hold, as well as opportunities to test and actively engage with new ideas. As an institution of higher education in a pluralistic society, Emporia State University (ESU) is committed to helping students, faculty, staff, and administrators acquire those skills necessary to enable them to think critically, to question intelligently, and to analyze complex and diverse ideas in order to become thoughtful, educated world citizens.

ESU has a commitment to a positive, quality environment that nurtures academic and personal excellence in learning and teaching. Students, faculty, staff, and administrators share a responsibility for sustaining an environment that is conducive to learning, teaching, and personal growth. ESU sets high intellectual standards, offers stimulating and challenging courses, and provides quality activities and interactions within the university community.

ESU has a commitment to recognize the value of diversity and the respect for individual ideas, opinions, and experiences. Students, faculty, staff, and administrators provide opportunities within and outside the classroom that foster contact with and respect for diverse groups of people and increased appreciation for pluralistic ideas and experiences. We value and welcome the benefits of diversity. Therefore, we expect and demand that the worth and dignity of all people be recognized without regard to any classification that might preclude a person from consideration as an individual.

ESU has a commitment to academic and personal integrity. Students, faculty, staff, and administrators set the highest standards of personal integrity and thus will not resort to cheating, plagiarism, and/or the use of unauthorized materials. In addition, the university strives to foster an environment of objectivity, fairness, and impartiality.

ESU has a commitment to open expression of ideas. In any institution of higher learning it is inevitable that people will hold a multitude of perspectives on a wide range of ideas. Discussions at Emporia State University occur in a challenging, but physically safe, non-threatening environment without fear of retribution. Students, faculty, staff, and administrators value and strive to engage in constructive listening, principled dialogue, and respectful disagreement in all forms of communication.

ESU has a commitment to a collegial and shared governance. Students, faculty, staff, and administrators work together in a collegial manner to solve problems to benefit the university community in accordance with governance structure, policy, and procedures. This principle of collegial and shared governance requires mutual respect and civility, but does not exclude beneficial and constructive criticism. The principles of collegiality are also manifested concretely in a commitment to mutual respect for the purpose of strengthening all academic programs and collective endeavors. This commitment is essential as we mentor and support all our colleagues in their individual and collective endeavors of teaching, learning, scholarly activity, and service.

INTERFERENCE WITH CONDUCT OF INSTITUTION

Actions by faculty, staff, students or visitors which unnecessarily and unreasonably obstruct or interfere with the teaching, research or learning functions or other normal and necessary activities of a Regents institution, or which create an imminent threat of danger to persons or property, may constitute grounds for suspension, dismissal or termination, or permanent exclusion from the campus. (1986, Board of Regents)

HISTORY

The university was founded on February 15, 1863 when the Kansas Legislature passed the enabling act to establish the Kansas State Normal School. The school's first graduating class consisted of two women in 1867, the year the first permanent building was completed.

In February, 1923, the name of the school was changed to the Kansas State Teachers College. In July, 1974, the name was changed to Emporia Kansas State College. On April 21, 1977, the college became Emporia State University. The Kansas Board of Regents is the governing body for ESU.

Since 1863 more than 150,000 students have studied at ESU and have gone on to careers in business and industry, education, the professional fields and many other areas throughout the world.

STATISTICS

The faculty at Emporia State University consists of 253 full-time teaching faculty qualified in their respective fields. Eighty-one percent of these faculty have terminal degrees and all have considerable teaching experience. The faculty are organized into 19 teaching areas which are grouped into four major colleges/schools, i.e., the School of Business; The Teachers College; the College of Liberal Arts and Sciences; and the School of Library and Information Management. Ninety-three counties in Kansas are represented among the student body, as well as 48 other states and 37 foreign countries.

ACCREDITATION

The American Art Therapy Association, the Commission on Accreditation of Allied Health Education Programs, American Chemical Society, American Library Association, the Association to Advance Collegiate Schools of Business-International, the Council on Rehabilitation Education, Inc., the Kansas State Department of Education, the National Association of Schools of Music, the National Council for Accreditation of Teacher Education, Accreditation Commission for Education in Nursing, the Council for Accreditation of Counseling & Related Educational Programs, the National Association of Schools of Art and Design, the National Association of School Psychologists, the Higher Learning Commission, the American College of Sports Medicine, and the Commission on Accreditation of Athletic Training Education all have recognized ESU as being accredited for its various programs of instruction.

The colleges, schools, departments, and support areas also hold membership in numerous organizations and associations state- and nation-wide.

CAMPUS AND COMMUNITY

The roots of Emporia State University reach back to February 1863 when the Kansas Legislature passed the enabling act to establish the Kansas State Normal School. The first graduation took place in 1867 which was also the year of the completion of the first permanent building on campus. The first two graduates of KSN were women.

In February 1923, the name of the school was changed to the Kansas State Teachers College. In July 1974, the name was again changed to Emporia Kansas State College and the last change took place on April 21, 1977 when the college became Emporia State University.

Emporia State University is one of six universities governed by the Kansas Board of Regents.

ESU comprises four colleges: The Teachers College, The School of Business, College of Liberal Arts and Sciences, and School of Library and Information Management. The Teachers College has been nationally recognized as one of top four model teacher preparation programs in the U.S. The latest recognition came from Secretary of the U.S. Department of Education Arne Duncan citing ESU's teacher education program as an example of how to "create great teachers."

The ESU School of Business is accredited by the Association to Advance Collegiate Schools of Business-International the premier accrediting agency for undergraduate and graduate programs in business. The AACSB seal is a mark of excellence borne by the highest echelon of business schools in the U.S. and worldwide. Only 15% of all business schools worldwide have been accredited by the association. The ESU School of Business is also home to and manages the Kansas Business Hall of Fame.

The College of Liberal Arts and Sciences is central to the fulfillment of the mission of the university. The arts and sciences disciplines are the foundations of academic tradition. Presenting an opportunity for testing the limits of the human mind: to create; to dream to discover self, the world and society; to explore ideas and to develop patterns of life-long learning.

The School of Library and Information Management offers a Master of Science in Information (MS), and a Ph.D. – Library and Information Management, all accredited by the American Library Association.

As is tradition at Emporia State, student-athletes are regularly commended for academic excellence, excellent sportsmanship and commitment to the community. ESU has 15 exciting NCAA Division II teams.

The Emporia State men's track and field team placed 15th in the national at the NCAA indoor Championships. Football running back Landon Nault was named a First-Team Google Could Academic All-American. Emporia State was the only MIAA school to have both baseball and softball teams advance to the NCAA Tournament after both played in their respective MIAA tournament championship games. The ESU football team secured its fourth-straight winning season and won the second-annual Corsicana Bowl championship in Corsicana, Texas.

The 320 rooms and public spaces in the four residence halls that make up the Towers Complex were recently renovated and updated to meet the needs of today's technologically connected students.

ESU's newest residence hall, Schallenkamp Hall, opened in fall 2019. A major feature of the building is its learning commons and other community spaces in the building. With proximity to ESU's fine and performing arts academic buildings, the learning commons include two music practice rooms, an art studio, a large collaboration space, and other study areas immediately inside the building's entrance. In addition, each wing have commons areas to support residents.

The Student Recreation and Fitness Center features a 28,000 square feet multipurpose gym area with a three-lane jog/walk track. The free weight and multipurpose exercise areas are equipped with a large variety of exercise equipment. The 3,000 square feet fitness room is used for group fitness classes. The center features two 70-inch big screen televisions, a pool table, table tennis, and foosball tables.

Other indoor recreational facilities include a 25-meter swimming pool and a therapeutic pool. Outdoor facilities include softball fields, tennis courts, a 400 meter track, two small lakes and multipurpose green areas designed for activities such as soccer, flag football, rugby, ultimate Frisbee and disc golf.

The Emporia State University Memorial Union was the first Memorial Union dedicated to the veterans who served their country and made the ultimate sacrifice built west of the Mississippi. The Union, frequently referred to as the student's living room underwent a \$23 million addition and renovation completed in 2012.

Emporia State University is located in the heart of the beautiful and scenic Flint Hills and along Interstate-35 halfway between Kansas City and Wichita, Kansas. ESU proudly takes its place as a community a leader both in geographic location at the head of Commercial Street and through student, faculty and staff involvement in civic organizations. Emporia is a historic but progressive city of about 25,000 people in the eastern third of Kansas, which claims roughly half of the state's total population of 2,904,021. Emporia has a diverse commercial variety of businesses, eating establishments, manufacturing, health and transportation services. .

For more information about the Emporia community please see the Emporia Area Chamber of Commerce and Visitor's Bureau at <http://www.emporiakschamber.org>

VISITOR PARKING AND TRAFFIC REGULATIONS

Visitors are always welcome on campus, but are requested to observe all posted regulations and to display a current visitor parking permit. Campus visitors may obtain a "visitor's" permit at the Police and Safety Office which is located near the northeast side of the football stadium.

Campus parking regulations provide facilities for the maximum benefit of the greatest number. With the exception of vehicles operated by disabled members of the student body, faculty and staff, and campus service vehicles appropriately marked, parking on campus is considered a privilege. A violation of any provision of ESU's traffic and parking regulations is considered to constitute an offense and is subject to penalty. The motor vehicle laws of the State of Kansas and the City of Emporia apply on the ESU campus. The speed limit is 15 mph, unless otherwise indicated. In the event of an accident occurring on ESU property involving a motor vehicle, the ESU Police Department must be notified immediately. All vehicles, including bicycles, are restricted to the use of designated roadways. Sidewalks shall not be used by any vehicles, except to walk bicycles to the bicycle racks, and except when necessary for authorized service vehicles.

Skateboards, roller skates, in-line skates, etc., are prohibited on all areas of the ESU campus. This includes sidewalks, streets, buildings, and walkways.

For a copy of ESU Traffic and Parking Regulations or for further information, contact the Parking Department at 620/341-6043.

ADMISSIONS

ESU welcomes applications from all individuals who are interested in pursuing their post-secondary education in a major area offered at ESU.

Prospective students are encouraged to visit the campus to take a tour and gain additional information from your Admission Counselor. The Office of Undergraduate Admissions is open most weekdays (except on legal holidays) from 8:00 a.m. to 5:00 p.m. Campus visits are offered weekdays and during special events. Please call 620-341-5465 or email go2esu@emporia.edu to make an appointment.

New students may begin their study during the fall semester (August), the spring semester (January), or the summer session. All admissions materials should be submitted as early as possible to the admissions office. An application fee is required by the Kansas Board of Regents and must accompany the application form.

A student who has been admitted will receive an admissions letter indicating the conditions of the student's admission. Upon admission, all students will receive information concerning orientation, advisement, enrollment, and housing. Please direct all questions and requests for information to:

REQUIREMENTS FOR ADMISSION AS AN UNDERGRADUATE

FIRST YEAR STUDENTS

Kansas High School Graduates

Students who graduate from an accredited Kansas high school and are applying for admissions after the 2015 summer session must meet the following requirements:

1. ACT composite of 21 or higher.
- OR** 2. Rank in the top third of the graduating class.
- AND** 3. A grade point average of 2.00 on a 4.00 scale in the recommended core curriculum courses.

The core curriculum courses are four units of English, three units of math, three units of social studies, and three units of natural sciences. Students will be considered for provisional admission or admission by exception if they do not meet the criteria above.

Admission to all state educational institutions will remain open for each Kansas resident who is 21 years of age or older and who has graduated from an accredited Kansas high school. For further information, contact the Office of Undergraduate Admissions.

Out-of-State High School Graduates

Students who graduate from an accredited high school and are applying for admissions after the 2015 summer session must meet the following requirements:

1. ACT composite of 21 or higher.
- OR** 2. Rank in the top third of the graduating class.
- AND** 3. A grade point average of 2.50 on a 4.00 scale in the recommended core curriculum courses.

The core curriculum courses are four units of English, three units of math, three units of social studies, and three units of natural sciences. Students will be considered for provisional admission or admission by exception if they do not meet the criteria above.

Non-Traditional Students

Kansas High School Graduates

Students who are younger than 21 and have graduated from an accredited Kansas high school before 2015 and are applying for admissions after the 2015 summer session must meet the following requirements:

1. ACT composite of 21 or higher.
- OR** 2. Rank in the top third of the graduating class.
- AND** 3. A grade point average of 2.0 on a 4.00 scale in the recommended core curriculum courses.

The core curriculum courses are four units of English, three units of math, three units of social studies, and three units of natural sciences. Students will be considered for admission by exception if they do not meet the criteria above.

Admission to all state educational institutions will remain open for each Kansas resident who is 21 years of age or older and who has graduated from an accredited Kansas high school. For further information, contact the ESU Office of Undergraduate Admissions.

Out of State Non-Traditional students

Students who are younger than 21 and have graduated from an accredited Kansas high school before 2015 and are applying for admissions after the 2015 summer session must meet the following requirements:

1. ACT composite of 21 or higher.
- OR** 2. Rank in the top third of the graduating class.
- OR** 3. A grade point average of 2.5 on a 4.00 scale in the recommended core curriculum courses.

The core curriculum courses are four units of English, three units of math, three units of social studies, and three units of natural sciences. Students will be considered for admission by exception if they do not meet the criteria above.

Admission by Exception

Students whose academic performance falls outside the qualified admission standards may still apply and be considered for admission. Emporia State will accept by exception up to 10% of the first year students from among students who do not meet qualified admission standards. All applications will be considered until the 10% window is filled.

TRANSFER STUDENTS

As defined by the Board of Regents, students who have completed at least 24 hours of transferable course work after they have completed high school will be subject to the transfer admissions requirements. Students who do not have 24 or more hours of transferable course work will follow both the Transfer Admissions requirements and the First Year Student Requirements

Transfer Admission Requirement

To be considered for unconditional admission, students are required to have a 2.00 cumulative grade point average (based on all transferrable college work).

Admission Materials Required

Application for undergraduate admission

1. This application may be obtained from the ESU admissions office or online at www.emporia.edu/admissions.
2. \$30 application fee.
3. Complete and official transcripts of all college work taken. Faxed transcripts are not considered official, however,

transcripts may be hand-delivered by the student to the Office of Undergraduate Admissions if the transcript is stamped official, signed by a school official, and has been placed in a sealed envelope with the flap signed by a school official. These transcripts must show grades for all courses recorded, submitted from each college attended, and sent directly from the registrar of the previous college to the ESU admissions office. Students are encouraged to seek early admission which may necessitate the submission of an incomplete transcript. Students must have a complete application file before pre-enrollment begins for their second semester at Emporia State, or holds will be placed until the file is complete. Students may contact the Admissions Office at any time with questions.

Equal Opportunity

In considering all applications for admission, the university adheres to the "Equal Employment Opportunity, Equal Educational Opportunity and Non-Discrimination Policy." The university reserves the right to deny admission to persons who it has reason to believe could infringe upon the health and safety of other members of the campus community.

SPECIAL UNDERGRADUATE STUDENTS

The special undergraduate student classification is for individuals without bachelor degrees who take a few college courses without the intention of counting the credits toward a degree at Emporia State. A special undergraduate student may not normally enroll in more than ten credit hours in one semester or summer session. Exceptions to this policy may be granted by the university registrar. If, after time, the student is admitted to undergraduate study, the application of all credit earned while enrolled as a special undergraduate student toward fulfilling degree requirements will be determined after the student becomes a candidate for a particular degree.

Persons most frequently seeking the special undergraduate student classification include the following:

1. Those wishing to take a few courses only for the sake of enjoyment or personal improvement.
2. Students who are enrolled in another college (the parent institution) and wish to earn credit at Emporia State to be counted at the parent institution.
3. Persons enrolling in workshops, seminars, summer camps and summer institutes. Field-based course are excluded.

Students who have been required to withdraw from the university may not be classified as special undergraduate students. If you wish to attend ESU as a special undergraduate student, you should complete the special undergraduate student application for admission form that can be obtained from the Admissions Office. The requirements for other admission materials such as ACT scores or college transcripts are waived for special undergraduate students. Financial aid is not available for special undergraduate students.

CONCURRENT UNDERGRADUATE STUDENTS

Students who are enrolled in high school and wish to take courses as a part-time student may not normally enroll in more than nine credit hours in one semester or summer session.

The application of all credit earned while enrolled as a concurrent undergraduate student toward fulfilling degree requirements will be determined after the student has been admitted to the university and becomes a candidate for a particular degree.

Persons wishing to enroll as concurrent undergraduate students may obtain a concurrent undergraduate student application form from the ESU Admissions Office. Financial aid is not available for concurrent students.

TRANSFER AND ARTICULATION AGREEMENT

A student who completes an Associate of Arts or Associate of Science degree based on a baccalaureate oriented sequence at a state and regionally accredited Kansas public community college and whose program of studies has met the requirements of the Kansas Public Community College-Kansas Regents Transfer Agreement and Articulation Guide will be accepted with junior standing and will have satisfied general education requirements of all Regents universities.

You can find the articulation agreements at the Registrar's web site <<http://www.emporia.edu/regist/com/artic.htm>>. Printed copies are available from the ESU Office of Admissions or from your community college counseling center.

The following points of clarification have been developed regarding this transfer agreement:

1. This agreement applies to Associate of Arts and Associate of Science degree transfers from state and regionally accredited public community colleges in Kansas. The agreement does not include transfers from non-accredited community colleges or any other colleges.
2. Transfer students accepted for admission at Kansas Regents universities with the Associate of Arts or Associate of Science degree will automatically be given junior standing with the understanding that:
 - a. Each receiving institution has the right to determine admission standards to the various majors in their institutions.
 - b. Transfer students are subject to the same institutional assessment policies and procedures as resident students of the receiving institution.
3. General education is defined as follows:

General education provides students with facility in the use of the English Language and a broad intellectual experience in the major fields of knowledge. It insures that each graduate will have experienced some of the content, method and system of values of the various disciplines which enable humanity to understand itself and its environment at a level of abstraction beyond that found in secondary school studies. Although the following distribution of courses does not correspond to the general education requirements at any Kansas Regents institution, it will be accepted as having satisfied the general education requirements of all Kansas Regents institutions.

A minimum of 45 credit hours of general education with distribution in the following fields will be required. General education hours totaling less than 45 will be accepted, but transfer students must complete the remainder of this requirement before graduation from the receiving institution, which may require an additional semester(s).

12 hours of Basic Skills courses, including:

- 6 hours of English Composition
- 3 hours of Speech Communication
- 3 hours of college level Mathematics (statistics will be required of transfer students where university curriculum requires)

12 hours of Humanities courses from at least three of the following disciplines:

Art*	Theatre*	Philosophy
Music	History	Literature

*Performance courses are excluded.

12 hours of Social and Behavioral Science courses from at least three of the following disciplines:

Sociology	Geography	Political Science
Psychology	Economics	Anthropology

9 hours of Natural and Physical Science courses from at least two disciplines (lecture with lab).

Transcripts of students fulfilling the requirements of this agreement will be appropriately coded by the sending institution.

enrollment program for international students. Many campus and community social and educational activities are sponsored by this office to promote international spirit and a sharing of activities among all university students and the local community.

The OIE also issues U.S. exchange visitor and immigration forms. Students must register with the OIE at the beginning of each semester and keep up to date all information regarding changes of address, student status, and employment. All requests for extensions of stay, work permits, immigration certificates and money exchange letters must be submitted through this office.

The OIE staff is available to talk with students interested in studying abroad. Information about international exchanges is available on the website.

Please direct specific questions or requests to this office. Phone: 620/341-5374; fax: 620/341-5918; email: oisa@emporia.edu; web address: <http://www.emporia.edu/oie/>

INTERNATIONAL STUDENT APPLICATION / ADMISSION PROCEDURE

The following information must be submitted to the OIE at least three months prior to the beginning of the semester for which an international student wishes to be considered for admission:

1. Emporia State University international student application, which is found online <https://www.emporia.edu/oie/apply-to-esu/>.
2. Transcripts and related documents.
 - a. All transcripts and certificates of degrees including high school and college or university must be sent.
 - b. All transcripts and certificates must either be originals or certified by a notary public to be true copies of the originals.
 - c. Each transcript must have the official school seal affixed and bear the signature of the proper school official.
 - d. Each transcript must list all the courses that the student has taken and show all grades or scores that the student received in each course.
 - e. Transfer students and graduate students must submit a separate transcript from each college or university attended.
 - f. Students may be required to provide, at their expense, evaluation of credentials from foreign institutions.
3. A financial statement indicating that the student has adequate funds for the period of stay or sufficient funds for at least one year of study in the U.S.A.
4. International student applicants whose language is not English must take a recognized English proficiency test and have the scores sent directly to ESU from the testing service. Upon arrival, all international undergraduate students who do not have the required English proficiency test scores will be required to take an English proficiency examination. Placement into intensive English courses and/or academic courses will be dependent upon the Emporia State University proficiency scores.
5. Graduate students must provide additional application documents as specified by their desired programs.
6. With the application, each prospective undergraduate student must submit a \$60.00 application/processing fee. Graduate applicants must submit \$85.00 application/processing fee. Make checks or money orders payable to "Emporia State University."
7. A photocopy of the information page on passport. This copy must show the student's picture and name.

1. Other associate degrees and certificates may be awarded for programs which have been requirements different from baccalaureate-oriented sequences or a primary objective other than transfer. Students in such programs wishing to transfer to Kansas Regents universities are to be considered outside of the terms of this agreement. Students attempting to transfer into Technology, Engineering and Architecture programs are considered outside this agreement. It is recommended that 2+2 and 2+3 arrangements be developed for the above programs of study. Acceptance of course credit for transfer from such programs will be determined by the receiving institution on the programs on the basis of application of the courses to the baccalaureate program in the major field of the student.
5. Each institution will define its own graduation requirements.
6. Foreign language requirements are viewed as graduation requirements and not as general education requirements for purposes of this agreement.
7. A transfer student may be required to take first year or sophomore courses to meet particular requirements or course prerequisites of a given major or minor.
8. Transfer students preparing for teacher certification must meet the general education requirements as outlined by the State Board of Education. Teacher certification requirements have been incorporated into the degree requirements of Kansas Regents universities.
9. The spirit of the Agreement indicates that transfer students are to be judged academically in the same way as non-transfer students.

HORNET CONNECTION

Undergraduate students who have never attended Emporia State University are required to attend Hornet Connection. The event includes academic advising, class selection and enrollment, and fee payment. An \$80 fee per student is required. Additional information can be obtained from the Admission Office.

INTERNATIONAL STUDENT ADVISEMENT

The Office of International Education (OIE) is responsible for the Intensive English Program, Study Abroad, counseling and advising of international students, the processing of all undergraduate and graduate international student admissions correspondence, reviewing and evaluating foreign credentials, and coordinating an orientation and

8. Students will be asked to complete a medical history form at the time of enrollment. International students are required to have health insurance. This may be purchased during enrollment at ESU. A tuberculin skin test is required and is available at the ESU Student Health Center. Students must provide written proof (immunization record or statement from your doctor) of having had two MMR immunizations and a current Tetanus booster (within the last 10 years). This documentation must show the date and type of inoculation received.

The application, required transcripts and forms including the application/processing fee must be sent directly to: Office of International Education, Emporia State University, Campus Box 4041, 1 Kellogg Circle, Emporia, KS 66801-5415.

ENGLISH PROFICIENCY TESTING & PLACEMENT REQUIREMENTS FOR INTERNATIONAL STUDENTS

Emporia State University has defined standards as English proficiency, which non-native speakers of English must meet. The university offers an Intensive English Program (IEP) designed to meet the needs of international students in preparing for academic study. For all international students whose native language is not English, the following information is pertinent.

All international undergraduate students who have been accepted for admission but who have not submitted at the time of application the required English proficiency test scores will be required to take a diagnostic test of English proficiency upon arriving to Emporia State University. The test is administered prior to the beginning of each semester. The results of this English proficiency test will be used to determine the student's placement in intensive English and/or other academic courses. If the scores on all parts of this exam are satisfactory, new students may enroll full time in academic courses. However, new students who are deficient in any skill area must enroll in an intensive English program (IEP) course. Courses offered through the IEP are credit-bearing courses.

Students will take IEP courses sequentially and must satisfy the requirements of one level before admission to the next. If initially placed in an intermediate level course, students will, upon satisfactory completion of the course, move to the advanced level; if initially placed in an advanced level course, students will, upon satisfactory completion of the course, move to the advanced level; if initially placed in an advanced level course, students will, upon satisfactory completion, be exempt from IEP placement in that skill area.

Emporia State University English Proficiency Requirements

All international students admitted to Emporia State University must demonstrate English proficiency prior to being eligible to take academic courses. Emporia State University defines English proficiency as meeting the minimum required English language ability standards to be exempt from the ESU Intensive English Program Placement Test. There are several ways to demonstrate English proficiency:

- 1) Submitting accepted test scores prior to the posted deadline:
 - Internet-based (iBT) TOEFL score of 72 or higher with no individual sub-score below 15.
 - IELTS score of 6.0 or higher (Overall Band Score) with no individual sub-score below 5.5.
 - Duolingo scores of 45 or higher.
 - PTE score of 49 or above.

- 2) Providing documentation of citizenship (passport) of the following countries: Australia, Belize, Canada (except Quebec), Ghana, Ireland, Liberia, New Zealand, Nigeria, United Kingdom (England, Wales, Scotland, Northern Ireland), and the Caribbean Commonwealth.
- 3) Having completed a degree (Associate, Bachelor, or Master) in the U.S.A. or one of the other countries listed above.
- 4) Having completed four years of Cambridge International Examination (CIE) curriculum and/or having completed two years of AS and/or A level CIE curriculum.
- 5) Achieving a score of 500 or higher in SAT Evidence Based Reading and Writing.

Students that do not demonstrate English proficiency based on the above requirements will be tested for their ability in English during International student orientation program and subsequent diagnostic tests. Based on the results of these tests, students may be placed in Intensive English courses or be eligible to enroll in academic courses.

Graduate students with TOEFL score between 550 and 574 (iBT 79-89) or IELTS 6.0-6.5 must take the graduate level IEP course IE 075, Communication Skills for International Students. Students enrolling in this course may be subject to placement in Intensive English Program (IEP) Intermediate or Advanced Writing. If the diagnostic test taken in IE 075 shows a student needs instruction at the developmental level, they will be placed in the appropriate IEP writing course and must meet the IEP requirements for advancement and/or exemption.

A graduate student with an iBT TOEFL of 90 and all subscores of minimum 20 is exempted from taking IE 075. Similarly, IELTS score of 6.5 or above and minimum subscore of 6.5 on each part of the IELTS exam, or a scores of 60+ on the Duolingo English Test is exempted from IE 075.

English Proficiency Scores Deadlines:

Official English Proficiency scores must be received in the Office of International Education before the following dates in order to exempt a student from the IEP Placement Test.

Fall: August 1 Spring: December 1 Summer: May 1

UNIVERSITY SCHOLARSHIPS

Through the generosity of Emporia State University alumni, faculty, staff and friends, scholarships are available to full-time incoming first year, and transfer students. View eligibility requirements at: <https://www.emporia.edu/admissions/scholarships/>.

In addition, Emporia State University offers academic department, talent and athletic awards. Information is available at www.emporia.edu/finaid/scholarships/.

FINANCIAL AID

Phone: 620/341-5457 or 1-800-896-0567

E-mail: finaid@emporia.edu

Web: <https://www.emporia.edu/finaid>

ATHLETIC GRANTS

Recipients of athletic grants are selected by respective coaches. For additional information, please contact the athletic department at 620/341-5354.

PROGRAMS AVAILABLE

A variety of financial programs are available to assist students in obtaining their educational goals at ESU. They include grants, scholarships, work programs and loans. Completion of the Free Application for Federal Student Aid (FAFSA) is required for all federal programs.

You can apply online at www.fafsa.gov. Complete this application to determine eligibility for federal funding. Paper applications upon request.

GRANTS

Pell and Supplemental Grants

These grants are based on financial need as determined by the federal need analysis (FAFSA). Federal Pell and Federal Supplemental Educational Opportunity Grant (FSEOG) are the two major grants at ESU.

Kansas Comprehensive Grants

To be considered for this grant, you must show need through the federal need analysis (FAFSA) and be an undergraduate full-time Kansas resident. **Your FAFSA must be submitted by April 1st in order to be considered for this grant for the upcoming academic year.**

Residents of Kansas should visit this site to review eligibility for other grants offered through the Kansas Board of Regents: https://kansasregents.org/students/student_financial_aid

TEACH Grant

Certain teaching fields may be eligible for this program. Visit: <https://www.emporia.edu/finaid/undergraduates/grants.html#TEACH> or contact the Office of Financial Aid and Scholarships for more information.

STUDENT EMPLOYMENT

On-Campus Employment

To be eligible for employment, students must maintain satisfactory academic progress. Federal Work-Study (FWS) employment, regular employment, and career-related work programs are available. For FWS employment, you must demonstrate need as determined by the federal need analysis (FAFSA). Summer employment under the FWS program is available. All summer student employees are subject to the same general academic and federal financial aid requirements.

Off-Campus Student Employment

Career Services provides a clearinghouse for employment so any person or firm wishing to employ students or spouses of students may list openings. Students should contact prospective employers directly for these off-campus job opportunities.

Available on and off campus positions are posted online at the following website: www.emporia.edu/career/hornetjob.htm.

STUDENT LOANS

Students who attend Emporia State may be eligible for direct loans (subsidized/unsubsidized). Federal Direct subsidized loans require a student to have financial need (determined by the FAFSA). The unsubsidized Federal Direct Loan is not based on need. Completion of the FAFSA is required for both types of loans.

During periods of enrollment, full-time students may apply for a loan of up to \$250 through the Cashiers Office, 104 Plumb Hall.

MILITARY BENEFITS

Veterans and veteran's spouse/dependents who are eligible for education benefits can find more information at www.emporia.edu/finaid/veterans/.

SATISFACTORY ACADEMIC PROGRESS

Students who receive financial aid must make satisfactory academic progress toward degree completion. Financial Aid Offices are required to follow policies set for by the Department of Education regarding satisfactory academic progress. Please read the Satisfactory Academic Progress policy located at <https://www.emporia.edu/finaid/forms/> under publications.

STUDENT RIGHT-TO-KNOW BILL

Persistence and Graduation Rates

Approximately 70% of ESU's first-time, full-time first year students return for the second year of study. Approximately 42% graduate within six years following matriculation. For more information pertaining to persistence and graduation rates by gender and ethnicity (and category of sport for students receiving athletic-related financial aid), please contact the Office of Institutional Effectiveness, 620/341-6849.

Campus Crime Statistics

For information concerning campus crime statistics and institutional policies concerning campus security, alcohol and drug use, crime prevention, the reporting of crimes, sexual assault, and other matters, please contact the Office of Student Affairs 620/341-5267. You can also access this information on the web at <http://www.emporia.edu/right2know/>.

HOUSING

The Department of Residential Life assists all students with obtaining on-campus housing and on-campus meal plans. Current rates and information regarding the variety of housing options may be found at <http://www.emporia.edu/reslife>. To learn more about campus housing, students may visit the Residential Life office, located in 308 South Morse Hall, call **(620) 341-5264** or e-mail reslife@emporia.edu.

Fall 2019 offers unique excitement when ESU's brand new residence hall, Schallenkamp Hall, opens to residents in August 2019. Schallenkamp's opening, combined with the Towers Complex four buildings, offers students a variety of physical spaces to connect to ESU and build relationships. Additionally, ESU Residential Life staff work with residents to create inclusive communities and engaging programs that enliven our vision of "Building a home of connection, belonging, and legacy."

Emporia State University has a residency requirement in place for new, full-time students who have either graduated from high school within the previous academic year or are NOT 19 years of age before the first day of fall classes. Students can request to waive the residency requirement by submitting a residency requirement waiver to the Residential Life office. More information about the residency requirement and waiver request process can be found at <http://www.emporia.edu/reslife/info/waiverforms.html>.

To promote a welcoming environment to all ESU students, our office is dedicated to the principles of universal design. These principles encompass all aspects of the academic environment by ensuring that facilities, programs, activities, materials, and equipment are accessible and usable by all students.

FOOD SERVICE

Food service information, including costs, meal plans, and dining options is available at:

<https://emporia.sodexomyway.com/?index.html>.

Student Accessibility and Support Services (SASS)

Emporia State University (ESU) values diverse experiences and perspectives and believes in accessibility for everyone who engages within ESU. The University makes its offerings accessible to faculty, students, staff and visitors with disabilities in accordance with applicable state and federal laws including, but not limited to, Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act Amendments Act (ADAAA). ESU affirms its commitment to providing access to its programs, services, and facilities for individuals with disabilities. This commitment includes access to information technology (IT) we purchase, create, and use, such as websites, software, hardware, and media. ESU prides itself on the ability to serve a wide spectrum of individuals with disabilities to include, but are not limited to blind/low vision, deaf/hearing impaired, psychological and physical disabilities. The Office of Student Accessibility & Support Services (SASS) is responsible for ensuring that students with documented disabilities are provided the tools, appropriate accommodations, and support from the University to fully participate in all aspects of campus life.

FEE INFORMATION

FEE SCHEDULE

The following fee schedule is for the 2018-2019 academic year and outlines the costs per semester and per summer session for both resident and nonresident students. Other expenses and costs to the student attending ESU, as well as definitions of Nonresident Status and the Procedure for Appeal, are also included in the following pages.

NOTE: ALL FEES ARE SUBJECT TO CHANGE BY ACTION OF THE KANSAS BOARD OF REGENTS.

A student's official transcript may be held and/or permission to re-enroll denied for failure to pay any indebtedness or return any property to the university. Students may be required to pay collection agency and attorney fees and all other charges necessary for the collection, as allowed by law, of any amount not paid when due.

UNDERGRADUATE FEES –2018-2019**

1. Undergraduate students enrolled in *10 or more* credit hours per semester are assessed a total fee of *\$3,229.08 for the resident student* and *\$10,187.28 for the nonresident student*. This total fee includes the following:

	Resident	Non-Resident
Tuition	\$2,577.15	\$9,535.35
Educational Opportunity Fund	5.00	5.00
Student Health	76.24	76.24
Student Union Operating	50.35	50.35
Student Union Improvement	183.00	183.00
Student Union Refurbishing	15.00	15.00
Student Counseling	11.33	11.33
Recreational Services/Phys. Educ. Bldg.	29.98	29.98
Recreational Facility	29.00	29.00

Quivera	0.10	0.10
Visual Arts Board	<u>0.20</u>	<u>0.20</u>
TOTAL PER SEMESTER	\$338.69	\$887.43

A \$10.00 per credit hour technology fee will be assessed to all students.

2. Graduate assistants who work 20 hours a week and are enrolled in six or more hours of graduate credit per semester maybe eligible for fee reductions. The amount is determined annually.

SUMMER SESSION FEES**

Undergraduate students enrolled during the summer session are assessed a fee of *\$250.79 per credit hour for the resident student* and *\$714.67 per credit hour for the nonresident student*. A \$10.00 per credit hour technology fee will be assessed to all students.

Graduate students enrolled during the summer session are assessed a fee of *\$338.89 per credit hour for the resident student* and *\$887.43 per credit hour for the nonresident student*. A \$10.00 per credit hour technology fee will be assessed to all students.

NONRESIDENT CLASSIFICATION FOR FEE PURPOSES.

NONRESIDENT STATUS

A nonresident student is defined by the laws of the State of Kansas as follows: "Persons enrolling in universities and colleges under the State Board of Regents who, if adults, have not been, or if minors, whose parents have not been residents of the state of Kansas for one year prior to enrollment for any term or session in a college or university are nonresidents for fee purposes. Notwithstanding the

foregoing provision of this section, the State Board of Regents may adopt rules and regulations authorizing the following to pay an amount equal to resident fees: (1) employees of the university or college and their dependents, (2) persons in the military and their dependents, (3) other classes of persons having special domestic relation circumstances, (4) persons who have lost their resident status within six months of their enrollment, and (5) persons and their dependents who were recruited or transferred to full-time employment in Kansas.” Application forms can be found at <http://www.emporia.edu/regist/forms/>.

PROCEDURE FOR APPEAL

The registrar determines the residence status of all students for fee purposes. A student may appeal the registrar’s decision to the university’s appellate committee by serving written notice of such appeal to the registrar within thirty (30) days after the opening of the term or semester. A standard appeal form is provided by the Office of the Registrar for this purpose. Additional information concerning the law and its interpretation will also be provided by the Office of the Registrar upon request.

NEARR PROGRAM FEES—2018-2019**

Involves the states of Nebraska, Colorado, Oklahoma, Missouri and Texas.

1. NEARR undergraduate students enrolled in *10 or more* credit hours per semester are assessed a total fee of \$4,517.58. This total fee includes the following.

Undergrad

Tuition	\$3,865.65
Educational Opportunity Fund	5.00
Student Health	76.24

SUMMER SESSION FEES**

NEARR Undergraduate students enrolled during the summer session are assessed a fee of \$336.69 per credit hour.

NEARR Graduate students enrolled during the summer session are assessed a fee of \$468.85 per credit hour.

A \$10.00 per credit hour technology fee will be assessed to all students.

**Fees for Academic Year 2019-2020 have not yet been established.

CORKY PLUS TUITION**

Students are residents of Buchanan, Cass, Clay, Jackson and Platte counties in Missouri are eligible for the same tuition as Kansas in-state students. See the resident rate listed above. Students who are residents of Cleveland, Cherokee, Creek, Kay, Lincoln, Logan, Muskogee, Noble, Nowata, Oklahoma, Okfuskee, Okmulgee, Osage, Pawnee, Payne, Pottawatomie, Rogers, Tulsa, Wagoner and Washington counties in Oklahoma are eligible for the same tuition as Kansas in-state students. See the resident rates listed above.

JUMP START/EHS CONCURRENT TUITION**

Students concurrently enrolled in a Kansas High School will pay \$100 per credit hour plus any course fee for courses offered to these students.

SCHOOL OF LIBRARY AND INFORMATION MANAGEMENT

All non-resident students will pay the non-resident rates per credit hour plus an area fee per credit hour when taking classes taught out of state face to face. Kansas residents will pay resident rates per credit hour plus an area fee per credit hour.

Resident Graduate credit	\$338.89 per credit hour
Nonresident Graduate credit	\$668.53 per credit hour

A \$10.00 per credit hour technology fee will be assessed to all students.

DISTANCE EDUCATION FEES**

Resident Undergraduate credit	\$252.76 per credit hour
Resident Graduate credit	\$340.86 per credit hour
Nonresident Undergraduate credit	\$338.66 per credit hour
Nonresident Graduate credit	\$470.82 per credit hour

A \$10.00 per credit hour technology fee will be assessed to all students.

Distance education undergraduate student's enrolled in *10 or more* on campus credit hours and are charged the maximum flat rate fee will not be assessed additional tuition and fees for distanced education courses.

Note: An exception or waiver would be allowed for out-of-state residents who are employed in Kansas. Verification will be by application through the Office of the Registrar.

Distance Education Electronic Media Fees for Telenet, Internet and ITV

<i>(Undergraduate and Graduate)</i>	
Per Course	\$42.00

Distance Education Equipment Use Fee Off-campus

Appropriate tuition fee plus off-campus equipment fee (per credit hour)	\$20.00
---	---------

Distance Education Site Facility

Students will be assessed a site facility fee not to exceed \$30.00 per credit hour.

EMPORIA STATE UNIVERSITY –KANSAS CITY

Public educational entities governed/coordinated by the Kansas Board of Regents or under the auspices of the State Department of Education, may be allowed to use the Emporia State University-Kansas City facility on a space available basis by charging individuals the ESU-KC fee equated to a credit hour basis. The revenue will be remitted from this collection to ESU.

WORKSHOP AND SHORT COURSE FEES

Fees for workshops and short courses are assessed and collected as announced in official university publications. Please refer to www.emporia.edu or contact the Controller's Office for payment deadlines.

GRADUATE TEACHING ASSISTANTS AND GRADUATE RESEARCH ASSISTANTS

Applicable tuition up to 12 credit hours is waived for graduate teaching and graduate research assistants if working 20 hours per week. Students will be responsible for fees that apply to the courses including campus activity fees, area fees, technology fees and course fees. In the event that a student cancels the graduate assistantship, the student must repay the tuition waiver based upon the number of days remaining in the semester.

CONTRACTS AND COMPENSATORY CHARGES

This schedule does not limit the charges which may be collected under arrangements with other governmental or private agencies, except that such arrangements may not provide for lesser charges. Tuition or other charges to more nearly cover the actual cost of instruction are specifically authorized. No tuition is charged students enrolled in programs for which the entire cost is financed by governmental or private agencies. Students taking such courses on campus must pay all required campus privilege fees.

KANSAS TEACHER OF THE YEAR TUITION WAIVER

Tuition will be waived for up to 9 hours annually for any past or present Kansas Teacher of the Year. To be eligible, a person must be a past or present recipient of the award under the program administered by the Kansas Department of Education and be employed as a teacher in an education institution accredited by the Kansas Department of Education.

FEE WAIVER FOR PERSONS AGE 60 OR OVER

Residents of Kansas who are 60 years of age or over may take courses at the university without paying the regular fee. Some courses may have special fees. The special fees will be paid if the special fees cover the direct cost of supplies and materials. A course taken free cannot be counted toward a degree. The person will be considered an auditor in the class, and admission to the class will be by permission of the instructor and only if space is available. Interested individuals should consult with the Registrar or the Director or Admissions.

AUDITOR, VISITOR, OR NON-CREDIT COURSE FEE

The fee assessed for auditors, visitors, or non-credit courses is the same as the regular fee.

INTENSIVE ENGLISH PROGRAM FEES****Fall 2018/Spring 2019**

	IEP Fees	CP Fees	Total

Four Courses	2,700.00	631.84	3,331.84

A \$10.00 per credit hour technology fee will be assessed to all students.

DEPARTMENTAL FEES**

All departmental charges for specific goods and services (may include but will not be limited to mediated instructional costs, building use, special equipment) not explicitly identified herein will be priced at an amount that approximates actual cost. Appropriate campus administrative procedures are to be followed for approval and collection of these charges.

TESTING COST-RECOVERY FEE

Testing fees will be assessed at a rate that includes the direct cost recovery of the test plus an administration fee of up to \$25.00 per test. Appropriate campus administrative procedures are to be followed for approval and collection of these fees.

SPONSORSHIP OF STUDENT TEACHING FEE

Student teaching fee of \$200.00 will be charged each semester for those students enrolled in Professional Development School (PDS) studies.

STUDENT IDENTIFICATION CARD FEE**

Original or Replacement Card \$18.00
The holder of a university ID card is responsible for all university property obtained with that card. If the ID card is lost, report

immediately to the University Police and Safety Office. If a card is found, it should be taken to the University Police and Safety Office.

SPECIAL FEES**

Please refer to www.emporia.edu or contact the Controller's Office for a complete list of fees.

WITHHOLDING OF STUDENT INFORMATION

When necessary, the University may withhold the academic official transcript of students for the nonpayment of tuition and fees, loans, other charges and for failure to return university property.

COLLECTION POLICY

A student's official transcript may be held and/or permission to re-enroll denied for failure to pay any indebtedness or return any property to the University. Students may be required to pay collection agency and attorney fees and all other charges necessary for the collection, as allowed by law, of any amount not paid when due.

PAYMENT OF FEES

It is Emporia State University policy that students must pay all charges in full by the due date. If a student does not expect to have their balance paid in full by this date, they must enter into a payment plan.

Please note: Financial aid must be authorized AND disbursed to be considered a payment on an account. If a payment has been made on a student's account, the student must officially withdraw from the University within the refund period to be eligible for a refund and/or be relieved of their financial obligation to Emporia State University.

Cash, checks, and certain bank credit cards are accepted by the University for payment of fees and room and board. Additional information is available from Cashiering Services.

No students shall be permitted to enroll for any semester if there is an outstanding balance from a prior session. Students with outstanding debts to the University, whether financial or material, will have their official transcripts and/or enrollment withheld. (For further explanation, see "Holds on Student Records" in the Enrollment and Academic Information section of this catalog.)

It is important students review the billing statements they receive as well as check their on-line student account frequently. These resources provide valuable and continuously updated information concerning student account balances.

In addition to the previously mentioned fees, students may be required to purchase textbooks, supplies, parking permits, and identification cards.

For information pertaining to student loans, employment, scholarships, and grants, please refer to the "Financial Aid" section of this catalog.

For further information on fee payment policies and procedures, please visit www.emporia.edu/busaff.

FEE PAYMENT PROCESS

An electronic billing statement will be sent to each pre-enrolled student via the student's emporia.edu account. Students enrolled after the billing statement date will NOT receive an electronic billing statement and must make arrangements for fee payment. THE STUDENT'S FEE PAYMENT MAY NOT BE PROCESSED UNTIL HOLDS ARE RESOLVED. Please CHECK **Buzz** In for holds.

Any excess funds that become available will be deposited to the student's bank account and will be available prior to the first day of class provided all appropriate forms have been completed and processed.

Payment is due at 5:00 p.m. central time on the 5th day of class. Payment plans may be granted for any unpaid balance. A student must contact Student Accounts in Plumb Hall, Room 103P or by phone 620-31-5340 for payment plans and to avoid account holds. Administrative fees are assessed for this option.

IMPORTANT FEE PAYMENT DATES

5th Day of Class

- All students must be paid in full
- \$50 administrative fee charged to students who have an account balance. Students must enter into a Payment Plan Agreement to avoid account holds.

10th Day of Class

- Last day for tuition refund

NON-MILITARY REFUND POLICY

Students should inquire with the Office of Cashiering Services about refund amounts. The refund period depends on how long the class lasts. No refund is available once the refund period is past.

If the class duration is 12 or more weeks, the official drop must be completed by the 10th day of class.

For short term classes taught in less than the regular semester, the 100% refund period will follow the policy on dropping a class. The official drop period shall be determined by the Registrar's Office. For dates of refunds for the term and/or part of term classes you may contact Cashiering Services.

Refunds are processed in the order they are received and may take three to four weeks, depending on the level of activity in the Business Office at any particular time during the refund period. The official date the class was dropped will be the date posted on the student's record. This drop may be made in person or via the Web. If a class is dropped after the above refund dates, no refund issued. **Note:** Students attending Emporia State and receiving assistance through Title IV Student Financial Aid Programs may be eligible for a pro-rated refund. Inquire in Cashiering Services for additional information. This refund policy is based on official withdrawal through the Registrar's Office. Tuition refunds may require repayments to Emporia State University or Federal Financial Aid Programs based upon financial aid requirements.

MILITARY REFUND POLICY

Students serving in the military services who are called to active duty during an academic term are entitled to receive a full refund for tuition and fees. Students who are drafted and must report for active duty during an academic term are entitled to receive a full refund of tuition and fees. All refunds are subjected to presentation of official documentation. Students who volunteer for military service will be subject to the University's non-military refund policy. Room and board charges will be prorated to the extent that services have been provided.

STUDENT AFFAIRS

GUIDING PRINCIPLES:

- Foster the development of individual identity and purpose
- Support academic endeavors by creating learning laboratories and experiential learning opportunities
- Enhance career readiness through the development of transferable skills
- Recognize that each staff member has an opportunity to be an educator
- Collaborate for the benefit of all
- Nurture life-long learning
- Allocate resources strategically
- Diagnose, intervene, and assess for improvement

ALCOHOL & DRUG ABUSE PREVENTION

The Alcohol and Drug Abuse Prevention (ADAP) Program seeks to support students, faculty, and staff in creating and maintaining a campus environment that encourages and supports healthy lifestyles. Services include consultations, referrals, and presentations. Our resource center, located in 250 Southeast Morse Hall, has both print and non-print materials available.

Our evidenced based individual programming meets the requirements for Alcohol and Drug Information School required by the courts. Please contact the Alcohol & Drug Abuse Prevention office at 620/341-5222 or visit our website at www.emporia.edu/student-wellness/counseling-services/adap.

ASSOCIATED STUDENT GOVERNMENT

Associated Student Government (ASG) is the voice for Emporia State students in relation to campus governance and student needs or concerns. ASG also recognizes student organizations and provides funding for organizational activities.

For further information, call 620/341-5481 or visit the following website: www.emporia.edu/getinvolved/asm

BIOFEEDBACK CENTER

The Biofeedback Center trains students to improve resiliency to stress. With practice, the relaxation response replaces the stress response in anxiety-producing situations like tests, social situations, public speaking, performances, and job interviews. Individual and group presentations are available. For more information visit our website at www.emporia.edu/student-wellness/counseling-services/biofeedback or call 620/341-5222.

CENTER FOR STUDENT INVOLVEMENT

The Center for Student Involvement is located on the first level of the Memorial Union. Emporia State has over 130 Recognized Student Organizations, including honorary, academic, service, religious, recreation, special interest, and Greek-letter organizations. Information about current organizations, how to join or start a new organization, and information about how to get involved at Emporia State can be found online at www.emporia.edu/getinvolved. For more information, call the Center for Student Involvement at 620/341-5481.

COMMUNITY HORNETS

Community Hornets is dedicated to connecting Emporia State University students, faculty and staff to service projects in the city of Emporia and surrounding communities. Through its service programs, Community Hornets is committed to engaging campus

life in the opportunity and reward of volunteerism at the local, regional, and national levels. To find out about upcoming community service opportunities, visit our website at www.emporia.edu/communityhorns.

CORKY'S CUPBOARD FOOD PANTRY

The mission of Corky's Cupboard is to foster a healthy university community by providing temporary food assistance in an effort to alleviate hunger. The pantry, located in Memorial Union Room 147, is in the back (south end) of the Center for Student Involvement. The pantry, open during the fall and spring semester, provides a variety of non-perishable food items such as canned fruits, vegetables, proteins, snacks, soups, meals and mixes, and grains and starches such as rice, noodles and pasta. Visit the Corky's Cupboard website at www.emporia.edu/getinvolved/communityhorns/corks-cupboard for up-to-date information including dates and hours of operation.

COUNSELING SERVICES

Counseling Services offers individual, couples, and group counseling to all students at Emporia State University for a variety of mental health topics including anxiety, depression, relationship problems, eating disorders, etc. Counseling helps students learn skills to enhance their academic, social, and personal lives.

Services are provided to students by licensed mental health providers (counselors, social workers, etc.) and by supervised interns. Confidentiality is maintained in accordance with ethical standards and state and federal regulations.

Staff are also available for programs and classroom presentations on mental health topics. Appointments can be scheduled by calling 620/341-5222 or for more information, visit our website at www.emporia.edu/student-wellness/counseling-services.

DEMONSTRATIONS OF DISSENT AND PROTEST

Individuals wishing to demonstrate regarding concerns should confer with the Dean of Students, where procedural policy for such events and their accompanying responsibilities will be explained.

Students or student organizations who wish to express themselves publicly on issues may use Union Square between Plumb Hall and the Memorial Union. Arrangements for such use can be made with the Union Services Office located in the Memorial Union, 620/341-5443. More information can be found at www.emporia.edu/studentlife/documents/student-handbook.pdf.

DINING SERVICES

For student meal plan information, contact the University ID Office, located in the Memorial Union. Students living off-campus may purchase off-campus meal plans for use in the Hornet Express, Starbucks, Slice of Life and the Hornet's Nest. More detailed information may be found in the Student Handbook or can be obtained by calling the University ID Office, 620/341-5859.

DIVERSITY AND INCLUSION

The Office of Diversity, Equity and Inclusion offers a wide-range of different opportunities and resources that pertain to diversity, multiculturalism, academic improvement, civic and campus leadership, community involvement and service, diversity awareness and pride, and personal growth in order to improve and enhance the college experience.

The Office of Diversity, Equity & Inclusion helps coordinate and sponsor numerous programs and events throughout the school year to promote our mission statement. The office supports multicultural student organizations and university departments to provide opportunities for diversity and cultural awareness and advancement.

The Office of Diversity, Equity & Inclusion provides the resources and supports a network for all recognized multicultural student organizations on our campus to keep them updated with what is happening throughout campus and the Emporia community. The office also promotes these organizations to those students who may be interested in getting involved on campus throughout the school year.

FRATERNITY AND SORORITY LIFE

Fraternities and sororities are the premier values-based leadership organizations at Emporia State University. Our fraternity and sorority members are committed to the values and principles of their individual organizations and the Fraternity & Sorority Life values of leadership, scholarship, citizenship, stewardship and friendship.

To learn more about Fraternity & Sorority Life, visit the Center for Student Involvement on the first level of the Memorial Union or visit us online at www.emporia.edu/getinvolved/greek.

MEMORIAL STUDENT UNION

The Memorial Union is the student center on campus. A wide range of services including dining, bookstore, student government, Fraternity and Sorority Life, entertainment programming, student organizations, meeting and banquet rooms, multicultural programs and services, University ID/Ticketing Office, post office, ATM, and recreation can be found in the Union. The Memorial Union operates with the guidance of a board of directors whose members are students, faculty, and staff of ESU. More information can be found at www.emporia.edu/union.

MEMORIAL UNION BOOKSTORE

Order your textbooks by visiting our website <http://emporia.bncollege.com/> and clicking on the textbook tab and inserting your class schedule. Textbook orders will be available for pick up at the bookstore located in the Memorial Union or shipped via UPS to your home address.

Complete information about the bookstore and textbooks can be found at <http://emporia.bncollege.com/>.

RECREATION SERVICES

The Recreation Services Department is dedicated to providing the campus community with opportunities to explore recreational interests and to engage in fitness and wellness activities. The Student Recreation and Fitness Center provides a friendly environment for a diversified population to recreate, exercise, and socialize through a variety of programs including intramural sports, sport clubs, special events and activities, and informal recreation. Personal training services are also offered to assist the campus community in achieving fitness goals.

For more information visit our Recreation Services website at www.emporia.edu/recsport or contact the department at 620/341-6778.

RESIDENTIAL LIFE (See Housing)

SEXUAL ASSAULT PREVENTION PROGRAM

Sexual Assault Education was created to enhance student's awareness and understanding of the factors which contribute to sexual assault, to help students examine their attitudes and beliefs about sexual assault, and to advocate for and support primary and secondary victims of sexual assault.

Crisis and long-term counseling for primary or secondary victims of sexual assault is available in the Counseling Center. Call 620/341-5222 for an appointment or come to 250 Southeast Morse Hall. Students can also receive counseling from the SOS Crisis Helpline, 620/342-1870, or the Mental Health Center of East Central Kansas, 620/343-2211.

STUDENT CODE OF CONDUCT

In accordance of the Affirmation of Values, the Student Code of Conduct is a statement of behavioral expectations that apply to all Emporia State University Students.

Student Conduct Process:

The purpose of the student conduct process is to maintain the behavioral standards set by the campus community, and to provide all students with an administrative adjudication process in which responsibility is decided in a fair and impartial manner.

Informal conferences and other student conduct proceedings at educational institutions do not follow the same procedures used in courtrooms. The University does not employ lawyers to "prosecute" students. University student conduct proceedings do not follow rules of evidence like a civil or criminal trial. Instead, charges are investigated and resolved in an atmosphere of candor, truthfulness, and civility.

The Student Conduct Officer strives to:

- regard each student as an individual, deserving individual attention, consideration, and respect.
- consider the facts fully and carefully before resolving any alleged violation.
- speak candidly and honestly to each student.
- hold each student accountable for a standard of behavior that protects the campus community and promotes student development.
- ensure standards of courtesy and integrity, which prevent educational disruption, and promote a productive learning environment.
- recognize human fallibility, and consider the stresses associated with college life while demonstrating compassion and empathy throughout the student conduct process.
- contribute to the educational mission of the University.
- provide a fair and efficient process for enforcement of the Student Code of Conduct.

For more information, contact the Dean of Students Office at 620/341-5269.

STUDENT HEALTH SERVICES

In addition to treatment of illness and minor injury, as part of the Student Wellness Center, Health Service staff emphasizes wellness through education and outreach. Services are partially funded by student fees, which makes medical services on campus very affordable. See www.emporia.edu/shc/ for more information.

STUDENT HEALTH INSURANCE

The Kansas Board of Regents offers health insurance at economical rates to students within the Regents system. The insurance carrier is *United Healthcare Student Resources*. **For more information about coverage, rates or open enrollment, please call 1-888-344-6104 or visit their website at www.uhcsr.com.**

STUDENT IDENTIFICATION CARDS

The Hornet Card is a student's official university identification card. The Hornet Card grants access to the following university products and services: library access, building access, meal plan access, on-campus declining balance, recreation center, and sporting/cultural event access.

Students are responsible for all university property obtained with their Hornet Card. If the Hornet Card is lost, report it immediately to the University ID Office. If a card is found, it also may be returned to the ID Office. Students must provide proof of current enrollment to obtain a Hornet Card. The Hornet Card costs \$18 and can be obtained in the ID Office, located in the Memorial Union. The office is open Monday through Friday from 8:00 a.m. to 5:00 p.m. Students who have questions concerning the Hornet Card, may call 620/341-5859.

THRIVE PROGRAM

The Healthy Relationship & Interpersonal Violence Education (THRIVE) program is committed to creating and promoting a safe environment for the Emporia State University community through educational initiatives and outreach. THRIVE seeks to reduce sexual violence and empower individuals to engage in healthy relationships. More information can be found at <http://www.emporia.edu/student-wellness/counseling-services/thrive/>.

TITLE IX COMPLAINT REPORTING

Title IX complaint reporting is handled through the Title IX Coordinator. For information please contact the Title IX Coordinator at (620) 341-5188 or report@emporia.edu.

TRADPLUS: NON-TRADITIONAL STUDENT SERVICES

The Center for Student Involvement provides resources and support to TradPlus (non-traditional) and veteran students through the TradPlus Student Services program. To be considered a TradPlus (non-traditional) student, individuals generally meet at least one of the following criteria.

- Over the age of 24
- Married
- Parent
- Have been out of school for 2 or more years
- In the military or a veteran

Visit www.emporia.edu/tradplus to learn more about resources available and to connect with the TradPlus Student Support Coordinator.

UNION ACTIVITIES COUNCIL

The Union Activities Council (UAC) of Emporia State University is the student organization responsible for providing a wide range of programs for the campus community. The six

committees of UAC select, plan, promote and implement activities such as movies, concerts, comedians, lectures, and presentations by prominent speakers. Membership in UAC is open to all interested students. The Union Activities Council is housed in the Center for Student Involvement, first level of the Memorial Union. More information can be found at www.emporia.edu/getinvolved/uac.

UNION SERVICES

The Union Services Office staff provides all the services needed to schedule meetings, conferences, luncheons, and banquets in the Memorial Union. This office also schedules all of the ESU performance facilities and classrooms for non-academic functions. In order to use university facilities, all meetings and events must be scheduled through this office. To use these services call 620/341-5443 or stop by the office. Union Services is located in room 110 of the Memorial Union.

VETERANS EDUCATIONAL SERVICES

The university is approved by the Kansas Commission on Veterans Affairs and operates under a contract whereby veterans and their dependents may obtain the benefits of educational assistance when eligible. Information regarding benefits is available in the Office of Financial Aid, Scholarships & Veterans Services located in Plumb Hall, Room 103 or by calling 620/341-5457.

The Kansas Commission on Veterans Affairs has notified Emporia State University that any dependent of a prisoner of war, a person missing in action, or a dependent of a person who died as a result of a service connected disability suffered during the Vietnam Conflict, may be eligible for a waiver of tuition and fees. Please see www.emporia.edu/finaid/veterans.

VOTER REGISTRATION

Emporia State University is committed to the fundamental right to vote for all students who are eligible. The Office of Student Accessibility and Support Services serves as the voter registration site on campus. Voter registration materials can be obtained in the office in English and Spanish. The office can be reached by phone at 341-6637 or e-mail at disabser@emporia.edu.

When registering to vote in the state of Kansas, students are registering for national, state, and local election participation. If the student's permanent address is in a county other than Lyon County, the student can either continue their voter registration in their home county or register in Lyon County. Applications for advance voting ballots are also available. Voter registration forms can be obtained online <https://sos.kansas.gov/elections/registration-voting/>. Students can check their registration status and find their polling place on the Kansas Voter View <https://myvoteinfo.voteks.org/> website.

Requests for accommodation should be directed to the Office of Student Accessibility and Support Services. Questions about voter eligibility and the voting process should be directed to the County Clerk's Office in the Lyon County Courthouse.

ENROLLMENT AND ACADEMIC INFORMATION

This section includes procedures, regulations, and information the student will need to enroll and attend Emporia State University.

ESU ASSIGNED E-MAIL ADDRESS

An ESU e-mail address is assigned to each ESU student. Each ESU student is also allocated storage space for files or academic web pages. This storage space is available via student lab computers or the web. For further assistance, please contact the Help Desk at 620/341-5555, or toll-free from outside the Emporia area at 877/341-5555.

ADDRESS AND TELEPHONE NUMBER

Students are required to provide the university with their mailing, emergency, and permanent addresses and their telephone number(s) at the time of registration. If, after registration, there are changes, students are required to report such changes promptly to the Office of the Registrar or make the change themselves via **Buzz In**.

It is to the advantage of students that complete, up-to-date address and telephone number information be on record at all times.

HORNET 365

Hornet 365 is ESU's platform for digital services including file storage, websites, software downloads, ESU news, and access to online services. Hornet 365 offers you numerous ways to enrich your student life. Services include: adding and dropping classes, online transcripts and grades, financial aid and account information, record updates, and much more! Information can be accessed by going to Hornet 365 (hornet.emporia.edu) and clicking on the Student tile.

DIRECTORY INFORMATION

ESU designates the following items as directory information: a student's name, a student's address(es), a student's phone number(s), a student's email address(es), a student's major field(s) of study, a student's classification (first year, sophomore), a student's enrollment status (full-time, part-time, undergraduate, graduate), a student's dates of attendance, a student's past and present participation in officially recognized activities and sports, including the weight and height of members of athletic teams, a student's degree(s) conferred and date(s) conferred, and a student's award(s), honor(s), and scholarship(s) received, photograph, and the most recent educational agency or institution attended. Directory information can include a student ID number only when the ID alone cannot be used to gain access to education records. Directory information shall not include a student's Social Security Number. Directory information may be released without the student's consent; however, eligible students may request that directory information not be made public. The student's notice to withhold directory information must be made to the Office of the Registrar and is good for 1 academic year.

EDUCATIONAL RECORDS

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review their educational records within 45 days of the day the Registrar receives a request for access.
2. The right to request an amendment of their educational record that they believe are inaccurate or misleading.
3. The right to consent to disclosures of personally identifiable information contained in the student's educational records, except to the extent that FERPA authorizes disclosure without consent.
4. The right to file a complaint with the U.S. Department of education concerning alleged failures by Emporia State University to comply with the requirements of FERPA.

For additional information see Section 4H.02 of the University Policy Manual. A copy may be obtained in the Registration Office.

SOCIAL SECURITY NUMBER

Each entering student is asked to provide the university with a social security number. While students may choose not to provide this information as a condition of being admitted, but all students must provide the information upon enrollment. **No student may receive financial aid from any federal funded program, state payroll or institutional funds unless the social security number is on file. The university may be required to provide a student's social security number to the Kansas Division of Accounts and Reports for use in detection of fraudulent or illegal claims against state monies in accordance with the general authority of K.S.A. 75-3728b. Additionally, failure to provide this information could result in a fine being imposed on the institution by the IRS. All fines can be passed on to the students.** For additional information see Section 3G of the University Policy Manual.

LOAD

The normal load for an undergraduate student is 15 or 16 hours of credit per semester. A student who has demonstrated superior achievement by high marks in college may exceed this load; however, **any load in excess of 18 hours** is an overload and must be approved by the student's advisor and the department chair of their major and a Request for Approval of Overload form must be completed and submitted to the Registrar's Office. The normal load for summer is one hour of credit per week.

You may not enroll in a combination of resident, extension, correspondence, or work at another college in excess of the normal load.

FULL-TIME STATUS

Full-time undergraduate load is 12 hours in the fall and spring semesters and 9 hours in the summer session for financial aid and enrollment verification purposes.

Full-time graduate load is 9 hours in the fall, spring and summer semesters for enrollment verification and Financial Aid purposes.

Full-time graduate accelerated load is 6 hours in the fall, spring and summer semesters for enrollment verification and Financial Aid purposes.

See the fee schedule for enrollment status for fee purposes and the Graduate Catalog for other graduate enrollment information.

CLASSIFICATION

An undergraduate student is considered a sophomore upon completion of 30 semester hours; a junior upon completion of 60 semester hours; and a senior upon completion of 90 semester hours. These must be hours which are counted toward the degree

COURSE NUMBERING

A student is advised to select classes appropriate to their classification; however, any course may be taken within the limits imposed by other regulations of the departments, colleges, schools, or the university. Please consult with your academic advisor.

Course Levels

000-099 No credit courses. (Hours may not be included in the 120-hour requirement for a degree.)

100-299 Lower division, undergraduate. Designed as first-year and sophomore courses.

300-499 Upper division, undergraduate. Designed as junior and senior courses.

500-699 Upper division, undergraduate. Primarily for juniors and seniors, with enrollment of less than 50% Graduate I students.

700-799 Graduate and upper division. For Graduate I students primarily, with enrollment of less than 50% undergraduate students.

800-899 Designed primarily for Graduate I* students. 900-999 Designed primarily for Graduate II* students.

(Courses numbered 800 and above are for graduate students only.)

Definitions

***Graduate I:** Courses and thesis for master's students who will ordinarily have accumulated from one through 30 graduate hours and students enrolled in professional schools (law, veterinary medicine, M.D., architecture, etc.).

***Graduate II:** Courses for specialists and doctoral students who will ordinarily have completed more than 30 hours of graduate work.

STUDENT ADVISING CENTER

The Student Advising Center (SAC) is the "go to" location for all first-year and undecided/exploratory undergraduate students. The academic advisors represent each undergraduate department at the University.

Advisors:

- Assist students in navigating their first year at ESU
- Guide students through University policies and procedures
- Assist students with dropping/adding classes
- Answer questions about general education and degree requirements
- Provide holistic advising regarding the undergraduate experience
- Help undeclared students with the process of choosing a major
- Provide support and programming for struggling students

Students who have chosen a major and are making satisfactory progress are typically assigned an advisor within the appropriate academic department beginning their second year. Undeclared students continue to be advised by the Advising Center until a major is selected.

The Student Advising Center hours are 8:00 a.m.- 5:00 p.m., Monday through Friday. The center is located in 106 Plumb Hall. For more information, please call (620-341-5421) or email (sac@emporia.edu).

BUSINESS ADVISING CENTER

All students pursuing a degree in business are advised in the BizHornet Center, 207 Cremer Hall, except for first-year students who are advised in the Student Advising Center. The center is open from 8:00 a.m. to 5:00 p.m., Monday through Friday. For more information, please call 620/341-5523.

ELEMENTARY ADVISING CENTER

The Elementary Advising Center is located in 225 Visser Hall. Advisors will work with sophomore, junior, and senior Elementary Education students to assist with long-range planning, enrollment, drop-add, and other program/career planning issues. You may contact the Elementary Advising Center during office hours as posted, you may e-mail elemadvi@emporia.edu, or you may call 620/341-5770.

ENROLLMENT PROCEDURES

Registration is coordinated by the Registrar's Office. It is strongly recommended that students enroll early to improve their chances of getting the schedule of classes desired.

Currently enrolled students are encouraged to advance enroll for the next semester or summer session. Advance enrollment for the fall semester begins in March and continues through the tenth day of classes. Advance enrollment for the spring semester begins in October and continues through the tenth day of classes. Enrollment for the summer sessions begins in March and is continuous through all of the summer sessions. Special days are set aside during the summer to allow new students to enroll for the fall semester.

Students wishing to take responsibility for their own educational plan, which includes students selecting appropriate courses to fit their educational plans, must contact an advisor each semester to enable their online **Buzzin** registration.

A schedule of classes is available online. Registration consists primarily of three steps:

- 1. Advisement** -- Academic advisors are provided to assist students in developing plans to achieve their educational goals. Students are ultimately responsible for ensuring that their plans satisfy university and program requirements for their degrees.
- 2. Enrollment** -- Students may enroll any time during the continuous enrollment period each semester/term either with their advisor or through **Buzzin** using the PIN provided by their advisor. Enrollment begins in March for Fall and Summer and in October for Spring.
- 3. Fee Payment** -- Students must pay their fees or make special arrangements through Business Affairs prior to the first class meeting. For further information, please refer to "Direct Fee Payment Process" in the FEE INFORMATION section of this catalog.

Changes in a student's class schedule can be made during the continuous enrollment period. Instructions for drop/add are available in the class schedule.

Students with outstanding debts to the university, whether financial or material, may be prevented from enrolling until the matter is resolved.

HOLDS ON STUDENT RECORDS

The university has the authority to withhold permission to enroll; obtain transcripts; receive services, materials, food or merchandise; or any combination of these, from any person owing a debt to the university. A debt is defined as an unpaid financial obligation and/or any other unfulfilled obligation of a student or former student, however incurred, arising while the debtor was a student. A hold is a method of implementing these restrictions.

Students may view their holds by:

1. Logging in to **Buzzin**
2. Select Academic Life Tab
3. Select Student Records from the Student Self Service Links box
4. Select View Your Holds

Students may clear their debts and have restrictions removed by taking the following appropriate action:

1. Pay* the full amount of a financial deb.
2. Return material or equipment to the appropriate department.
3. Pay* in full the value of any lost material and/or equipment.
4. Satisfy any other claims by completing the specific action as required by the department or agency.

When all debts have been satisfied, the appropriate office will remove the hold.

*For immediate release of a hold, payment should be by cash or money order. No personal checks.

POLICY ON LATE ENROLLING / ADDING CLASSES

The following enrollment policies help to ensure that students have opportunities to make alternative decisions about classes.

1. Students choosing to add classes that are scheduled to meet two or three times per week for a full semester may do so during the first five working days of the semester by obtaining their advisor's approval. In order to enroll/add during the sixth through the tenth working day of the semester, the instructor's signature is also required. No classes may be enrolled in or added after the tenth day of classes in the fall and spring semesters.
2. Students choosing to add classes that are scheduled to meet weekly may do so before the third class meeting by obtaining the instructor's signature.
3. Classes that are scheduled as block* classes may be added before the end of the second class meeting by obtaining the advisor's approval. To add block classes before the end of the third class period, the student must also obtain the instructor's signature. (**Block classes meet for the first 8 weeks of the 16 week semester or the last 8 weeks of the semester.*)
4. Students may enroll for weekend intensive courses prior to the beginning of class through advance registration procedures, or on site. To add weekend intensive classes after the class has begun, the instructor's signature is required.
5. Summer school classes may be added before the second class meeting with advisor's approval. After the second class meeting, the advisor's and instructor's signatures are both required to enroll/add the class.
6. Classes whose meeting times and places are arranged by the instructor may be enrolled/added at anytime during the semester with the approval of the advisor and instructor. No classes may be enrolled in or added after completion of the semester or summer session. Enrollment must be for the current or future semesters.

These procedures apply to all courses taken from Emporia State University, whether they are offered on campus, in off-campus locations, or via mediated instruction. Procedures apply to both graduate and undergraduate classes.

Students who have exceptional circumstances may petition for a variance to these deadlines. Further information is available in the Registrar's Office.

POLICY ON DROPPING CLASSES

The official DROP period shall consist of the first 10 class days of each semester. No record of classes that are dropped during the drop period shall appear on the transcript.

For classes taught in less than the regular semester, the official drop period shall be determined by the Registrar's Office on a class-by-class basis.

WITHDRAWALS

If you wish to withdraw from one or more, but not all courses, you should seek the counsel of your advisor and obtain the properly signed forms, which will be processed by the Office of the Registrar. If you wish to withdraw from **all** courses, contact the Office of the Registrar for more information.

WITHDRAWAL POLICY

If a student elects to withdraw from one or more classes after the official drop period and through the tenth week of a regular semester, the grade of "W" will be recorded on the transcript regardless of the student's academic standing in that class. Students must have their advisor sign the withdrawal form.

After the tenth week of the regular semester the student may not withdraw from class nor may the instructor assign the grade of "W." In extreme cases, the student may appeal to the Office of the Provost, or the designee, to receive a grade of "W" after the tenth week.

Classes taught in less than the regular semester will follow a similar pattern. If a student elects to withdraw from one of these shorter classes after the official drop period and before 5/8 of the class periods have been completed, the grade of "W" will be recorded on the transcript. After 5/8 of the class periods have been completed, the student may not withdraw nor may the instructor assign the grade of "W." In extreme cases, the student may appeal to the Office of the Associate Provost for Enrollment Management to withdraw with the grade of "W" after 5/8 of the class periods have been completed.

FACULTY INITIATED STUDENT WITHDRAWAL

If a student's absences from class or disruptive behavior become detrimental to the student's progress or that of the other students in the class, the faculty member shall attempt to contact the student in writing about withdrawing from the class and shall seek the aid of Office of the Provost to help insure contacting the student.

WITHDRAWAL OF NURSING STUDENTS

The Emporia State University Department of Nursing (EDN) reserves the right to remove a nursing student from a practicum experience at any time because of (a) a critical incident involving the student, (b) violation of student conduct policies, or (c) persistent problematic student behavior(s) or performance.

Refer to current EDN Student Handbook for specific information regarding the EDN withdrawal policy.

SUMMER WITHDRAWAL POLICY

For a summer class that meets for a duration of less than three weeks, the student has up to the last day scheduled for the class to submit a withdrawal form with the Registration Office. If the student does not file this form prior to this last day, the instructor of the class shall assign the student an appropriate grade for the course in which the student enrolled and the student remains enrolled.

EXCESSIVE WITHDRAWALS

Excessive grades of "W" (withdrawal) can cause prospective employers to question the quality of the student's academic performance. Students should make every effort to adjust study and workloads, consult with advisors, and otherwise avoid the accumulation of an excessive number of "W" grades.

CLASS ATTENDANCE

ABSENCES -- When a student has been absent or desires to be absent from class for any reason, it is their responsibility to consult with the instructor concerning the reason for the absence. The instructor, in turn, has the prerogative of requiring the student to make up, in some appropriate and reasonable way, the work missed during the absence. Faculty members who take students on school-sponsored trips will attempt to plan the trip to minimize the number of classes which the students must miss.

When sickness or other emergencies make it impossible to contact the instructor directly concerning absences, contact the Office of the Dean of Students.

EFFECT ON GRADES -- Regular class attendance is crucial to the development of a student's knowledge and skills. For online classes, "attendance" will be defined by the course instructor. If excessive absences (lack of attendance) impair the development of such knowledge and skills, or diminish a student's role or cumulative achievement in a class, the instructor has the right to reflect this judgment in the student's grades. An instructor who reserves the right to make such a judgment must specify in the course syllabus the manner in which lack of attendance will affect grades.

When a student expects to be absent or has been absent from class for any reason, the student is responsible for consulting with the instructor. FSB 15012

ACADEMIC APPEALS -- Students who believe they have been dealt with unfairly concerning academic progress (such as course grades or absences), will have access to an academic appeal. The appeal must be initiated within one semester after the semester in which the issue occurs. The purpose of this policy is to ensure that due process is observed. For further information, refer to the Student Handbook available in the Office of Student Affairs.

TYPES OF UNDERGRADUATE CREDIT OFFERED

AUDIT ENROLLMENT

Students may audit courses if special arrangements are made with the Registrar and the instructor during the first ten days of the semester. For courses which meet less than a full semester or start late, the student must initiate an audit enrollment by no later than the third class meeting.

The same fees shall be paid for audit enrollments as for credit enrollments. Students so enrolled will receive a grade of "V" which cannot be used to satisfy course or hour requirements toward a degree. The student will receive a grade of "VN" when the conditions of the audit were not satisfied. Additional information is available in the Registration Office.

Residents of Kansas who are 60 years of age or over may audit courses at no cost with the permission of the instructor on a space available basis.

RESIDENT CREDIT

All course work taken through ESU, regardless of the delivery method or location of instruction, is considered to be Resident Credit.

TRANSFER CREDIT

Degree candidates and transfer students may take work at other regionally accredited two-year and four-year colleges and have it transferred to ESU. This should be done by requesting that the previous college send an official transcript of the work taken to the Office of the Registrar at ESU. Faxed transcripts are not considered official.

Only the passing grades are accepted for credit. All grades, including failing grades, are used in determining the student's grade point average with the exception of the grades of P (pass) and S (satisfactory).

Students who transfer from two-year colleges must take at least 60 hours of work at a four-year college, 30 of which must be at ESU, to receive a bachelor's degree.

Please see "*Transfer and Articulation Agreement*" in the ADMISSIONS section of this catalog.

Students who transfer work to ESU should read the resident requirements carefully and make sure that their pattern of courses will meet the ESU degree requirements. Students may enroll for resident work at another college while enrolled at ESU as long as the total academic load does not exceed the equivalent of one semester hour of credit per week for the term.

Students who transferred in "F" or "D" grades for courses whose equivalents at ESU are not comparable in credit hours, may select one of the following options:

1. The student may choose to let the remaining hour(s) of poor grade stand as is.
2. The student may choose to take an additional course to improve the grade in those remaining hour(s).

Please refer to ESU's *Course Repeat Grade Policy* located elsewhere in this catalog.

UPPER-LEVEL TRANSFER COURSES

ESU will accept lower division courses (those numbered below 300) in transfer from other colleges or universities as the equivalent for our upper division courses. A course from a 2-year institution may transfer in as an upper-level course equivalent, but it will not count toward the 45 hour upper-level course requirement. A course from a 4-year institution which transfers equivalent to an ESU upper level course will count towards the 45-hour upper-level course requirement. FSB15003

PRIOR APPROVAL

Students who wish to take course work at another institution during a summer or non-term must complete a prior approval form and obtain the required signatures to ensure that such course work is transferable to ESU. Prior approval forms are available in the Registration Office.

SENIORS TAKING COURSES FOR GRADUATE CREDIT

Students who are classified as seniors and in the last two terms immediately preceding their graduation may take up to 12 hours of course work for graduate credit. Students must complete the Senior Request for Graduate Credit card and complete an application for graduate study in the Graduate School, 313 Plumb Hall. The

completed Senior Request for Graduate Credit card, with all requested signatures, must be presented to Registration at the time of enrollment in the course(s). For more information, you may call 620/341-5403 or e-mail gradinfo@emporia.edu.

INDEPENDENT STUDY CREDIT

Students with special interests or abilities, may be permitted to do individual research, investigative study or creative work in certain areas. Independent study may be undertaken in two or more areas if the approved project includes subject matter in more than one field. In this event, the project must have the approval of the chairs of the departments concerned.

CREDIT FOR PRIOR LEARNING

CREDIT BY EXAMINATION

The purpose of credit by examination is to allow an exceptional student to design a college curriculum that better suits their needs. By allowing the student to obtain credit for previously acquired knowledge, the university provides a mechanism by which a student can either decrease the time needed to complete a degree or provide time for additional courses, perhaps to complete a second major. To this end, an enrolled student or a prospective student who subsequently enrolls shall be permitted to earn University credits or advanced standing beyond entry-level courses by examination.

The examination credit may be used in one of two ways. 1) To complete the requirements for a degree in a shorter period in that it shall count toward the total number of hours needed for graduation. 2) To enrich the student's college program by allowing time for more advanced courses or for courses in additional areas. The grade of P shall be used to indicate courses completed by examination.

Examinations for credit are similar to final examinations given in the courses. They are given at times scheduled by the various academic departments; therefore, it is the student's responsibility to arrange the day and hour when the examination will be given. Credit by examination cannot be granted after the student has completed a course that duplicates the course sought or has completed courses that may be considered in advance of the course requested.

A list of courses for which credit by examination is possible may be obtained from the Registrar's Office.

CREDIT BY CLEP EXAMINATIONS

Certain CLEP general and subject examinations are accepted by the university as a means of earning credits for general education or university-wide degree requirements.

Students are urged to secure current policy statements on the use of CLEP credit from the Office of the Registrar before taking these examinations.

A list of the CEEB Advanced Placement Examinations which may be accepted at Emporia State University can be obtained from the Office of the Registrar, or on the web at: <http://www.emporia.edu/regist/com/>

Earning credit in general education by means of CLEP examinations does not automatically satisfy requirements in majors or teaching fields. The use of CLEP examinations for these purposes is determined by the individual department. Students are encouraged to consult with department chairs on the use of these examinations.

CREDIT GRANTED BY THE ADVANCED PLACEMENT PROGRAM

The College Entrance Examination Board (CEEB), in conjunction with the Educational Testing Service (ETS) of Princeton, New Jersey, conducts a nation-wide advanced placement program. In this program, many high schools offer college-level courses to students. A nation-wide program of examinations covering these courses is administered by the CEEB. The graded examinations and relevant data for each student are sent to the college or university selected by the students. Such examinations must be taken prior to the beginning of the student's first year in college.

A list of the CEEB Advanced Placement Examinations which may be accepted at Emporia State University can be obtained from the Office of the Registrar, or on the web at: <http://www.emporia.edu/regist/com/>

Additional information regarding specific CEEB policies at ESU may be obtained in the Office of the Registrar or your admissions counselor.

INTERNATIONAL BACCALAUREATE

Emporia State University awards credit or advanced standing placement for Higher-Level Pass only. Credit is not granted for the Subsidiary Pass or Diploma Program. Additional information is available from the Office of the Registrar.

CREDIT FOR MILITARY SERVICE

Students who have previously served in the U.S. armed forces may be allowed one credit per six months of active duty for a maximum of eight credits. Credit may also be allowed for certain service schools completed. The equivalent of one semester of college work is the maximum of credit allowed for military service. Students who desire to receive military credit should submit a DD214 form or its equivalent to the Office of the Registrar.

The university will accept college level correspondence credit taken through the United States Armed Forces Institute in accordance with the same regulations that govern students taking correspondence work through the correspondence study center at the University of Kansas

LIFE EXPERIENCE CREDIT

ESU provides ample means to obtain credit for knowledge gained in other than formal course work. These means permit a high degree of quality control. Among them are: credit by examination and/or advanced placement as determined by CLEP tests, CEEB tests, or department-developed tests; military service credit, and independent study or research problems credit. Life experience credit will not be granted at ESU. There are adequate test-out procedures to accommodate students with knowledge gained from life experience.

GRADES, CREDITS AND STUDENT RECORDS (TRANSCRIPTS)

DEFINITION OF A CREDIT HOUR

One on-campus class credit is defined as 1 class hour (50 minutes) of classroom or direct faculty instruction per week and a minimum of 2 class hours of out-of-class student work each week for a minimum of 15 weeks. Courses with shorter or longer duration would have the number of class hours per week adjusted so as to be equivalent to the work done in 15 weeks.

One distance learning credit is defined as an equivalent amount of instruction and student work leading to equivalent learning outcomes, as required for an on-campus class as defined above.

One laboratory credit is defined as a minimum of 2 class hours of work each week in a laboratory under the supervision of a lab supervisor or instructor and an expectation of 1 class hour of additional out-of-class student work each week.

This policy notes that formal instruction may take place in a variety of modes. Other venues for student learning would generally use the definition of 4 class hours per week as equivalent to 1 class credit. These other venues might include field experiences, music ensembles, studio experiences, and practicum experiences. At least some of these class hours would be under the direct supervision of an instructor, who ultimately assigns a grade for the experience. FSB 15008

GRADES AND GRADE POINTS

Grades are assigned the following meaning: A (Superior), B (Good), C (Average), D (Poor), F (Failure), XF (Failure-Academic Dishonesty), AW (Administrative Withdrawal), W (Withdrawal), I (Incomplete), IP (In Progress), N (No Credit), P (Passing), S (Satisfactory), U (Unsatisfactory), and V (Visitor or Audit). Grade points will be computed on the following scale which features an equal number of optional plus and minus grades: A=4.0, A-=3.7, B+=3.3, B=3.0, B-=2.7, C+=2.3, C=2.0, D=1.0, F=0, and XF=0. GPA grades will be assigned at the discretion of faculty in the manner that best reflects student work and which is most appropriate for a given course. FSB 98012

The "S" grade indicates completion of a course, but the hours do not count toward the number of hours required for the degree. The "V" grade indicates the student has successfully audited the course. A "VN" means all conditions of the audit were not met. Courses which have been audited cannot be used to satisfy course or hour requirements toward a degree. A "Y" means the instructor did not turn in the grade. "IP" indicates work for the class is still in progress. These grade extensions are used in certain graduate or undergraduate classes identified by the college/school as requiring graduate work that extends beyond one semester, such as thesis, research, etc. (See the *In Progress Grade Policy* located elsewhere in this catalog.)

PASS-NO CREDIT GRADING

Certain courses may be taken on a pass or no credit basis. Information can be obtained in the Office of the Registrar.

PASS-NO CREDIT OPTION

The basic purpose of the pass-no credit option is to encourage students to elect interesting courses of a broadening nature from which they might otherwise be dissuaded through fear of mediocre performance and consequent jeopardy to grade point average.

The student electing the pass-no credit option will receive credit hours toward graduation and the grade of "P" if they successfully complete the course with a grade of "D" or above. If the student fails to successfully complete the course, the course will appear on the student's transcript with the grade designation of "N" and zero hours credit earned toward graduation. Credit hours of "P" and "N" are not to be computed in the student's GPA.

Any undergraduate student may elect any course on a pass-no credit basis with the following exceptions:

1. Courses taught in the area in which the student is seeking a major, minor, or teaching field, or courses used for a Bachelor of Integrated Studies degree contract.
2. Courses, including general education courses, used to satisfy requirements in the student's particular curriculum. The student may elect the pass-no credit option in a course taken to satisfy a general education requirement provided such course is of a higher level than the course or courses specifically required or recommended to satisfy such requirement, and provided such option is approved by the student's advisor.
3. Courses specifically excluded by departments from the pass-no credit option.

Students who are "undecided" or who change majors, minors, or teaching fields, and who have previously taken courses on a pass-no credit basis in such majors, minors, or teaching fields may petition the appropriate department to allow such courses to be used in answering major, minor, or teaching field requirements. Students should recognize that such approval will not be automatically granted, and might not be granted at all. In any case, no department shall allow any student to count more than two courses of pass-no credit work toward satisfying major, minor, or teaching field requirements.

A student is limited to 25 percent of their total hours credit toward graduation in pass-no credit courses.

The process for recording a pass-no credit course is as follows:

1. The student must declare their intention to enroll in a course for pass or no credit prior to enrolling or by the 10th day of classes. If for a workshop, short course, or summer term, the declaration must be made at time of enrollment. This is done by completing the appropriate form in the Registration Office.
2. Instructors will not be informed which students are enrolled under this option.
3. The instructors will file a grade report in the regular manner. The Registration Office will convert the grade to "P" or "N" and the instructor will be notified as to which students have received pass-no credit grades.

In order to avoid confusion, the terms "pass" and "no credit" shall be applied to this program only, and not to any other.

EXTENDED USE OF PASS-NO CREDIT DESIGNATION

The use of the pass-no credit grade for certain course areas, both undergraduate and graduate, is permitted providing that:

1. The department initiates such request.
2. Such request is considered as a curricular modification and received approval through the established curricular modification procedure.
3. In such designated courses, no student may be awarded a letter grade.

Examples of courses eligible for consideration under this policy include the following:

- Seminars
- Independent Study
- Research Projects
- Research Problems
- Thesis

Such courses do not lend themselves to the regular grading system.

INCOMPLETE GRADE POLICY

The grade "I" (incomplete) is given only for personal emergencies which are verifiable and when the student has done passing work in the course. The student has the responsibility to take the initiative in completing the work and the student is expected to make up the "incomplete" as soon as possible during the following semester.

Except for graduate research, thesis, or the equivalent, all incomplete work must be finished by the end of the following full semester (summer sessions are not considered a full semester for purposes of this deadline). During the initial extension period, a student may submit a written petition for an extension of one additional semester during which an incomplete grade may be removed. In the most exceptional cases, the faculty member with the written approval of the department chair, may grant the request for an extension. An extension beyond two semesters will require the approval of the dean of the school or college in which the course was offered. (The granting of an extension will not be routine.) Individual instructors may establish earlier deadlines for completion of the work. Students who do not complete the unfinished work by the established deadline will have the grade of "F" entered on the transcript and will be required to re-enroll to earn credit in the course.

IN PROGRESS "IP" GRADE POLICY

In Progress "IP" grade extensions are used in graduate and undergraduate classes identified by the college/school as requiring graduate or undergraduate work that extends beyond one semester. "IP" grades may be extended each semester at the discretion of the faculty member in charge. A final course grade must be submitted for the course(s) by the end of the semester the student graduates. Upon the graduate student's completion of a non-thesis degree program, any thesis credit hours for which a grade has not been received will be transformed from "IP" to "W" grades. FSB 03007

COURSE REPEAT GRADE POLICY

The cumulative GPA calculation procedure for repeated course work is as follows:

All grades will remain on the student's transcript, but only the last grade will be used in determining grade point averages, and only the course hours in one course may apply toward the degree. This policy applies regardless of where the course was originally taken, or repeated.

(Definition of Terms: Repeated coursework is coursework with the same course number, title and credit hours, or coursework which the department chair offering that course determines is the equivalent course.) FSB 06022

MIDTERM GRADES

It is the instructor's duty to inform students of their academic performance in class. Each instructor by the end of the 8th week of each regular semester, evaluate undergraduate students' progress and make midterm grades available to undergraduate students and

their academic advisors via the software designated by the university. For undergraduate classes taught in less than a full regular semester, the instructor shall make the evaluation available to the student in time to allow the student to withdraw before completion of 5/8 of the course. An instructor teaching a graduate-level course has the option of evaluating graduate students by the end of the 8th week of each regular semester. The instructor who is teaching a graduate-level course has the option to provide midterm grades via the university-designated software.

Midterm grade reports are not mailed out. To view their grades students should go to the ESU homepage www.emporia.edu and log in to **Buzz In**. Select the Academic Life tab and then select Student Records from the Student Self Service Links box. FSB 15013

FINAL GRADE REPORTS

The Office of the Registrar is responsible for recording and reporting student grades. Grades are not mailed out. To view their grades students should go to the ESU homepage www.emporia.edu and log in to **BuzzIn**. Select the Academic Life tab and then select Student Records from the Student Self Service Links box.

STUDENT RECORD (TRANSCRIPT) POLICY

Emporia State University will issue copies of the academic record of a student upon the request of the student or other persons authorized, in writing, to examine the record of the student. There is a charge for this service.

Partial transcripts are not issued. Each transcript includes the complete academic record at Emporia State University and work accepted from other colleges.

Official transcripts of credit earned at other institutions which have been presented for admission or evaluation of credit and have become a part of the student's permanent record in this office are not reissued nor copies duplicated for distribution. Transcripts from other institutions are obtained from the original institution(s). This also applies to high school transcripts.

Transfer credit is entered on the Emporia State University transcript only if the student is seeking a degree at ESU.

UNDERGRADUATE SCHOLASTIC STANDING CONDITIONS

GOOD SCHOLASTIC STANDING

To graduate, students must have an overall grade point average of at least 2.00 (transfer work included) and a grade point average of at least 2.00 overall for all work taken at Emporia State University. A student is in good standing

Classification at End of the Semester	Following Credits Toward Degree at End of the Semester	Minimum Cumulative GPA at End of the Semester
First-year	under 30	1.8
Sophomores	30-59	2.0
Juniors	60-89	2.0
Seniors	90 or more	2.0

PLACED ON PROBATION

When the cumulative GPA falls below these levels the student will be placed on scholastic probation after attempting a minimum of 12 semester hours. This indicates serious deficiency in the student's progress toward a degree.

CONTINUED ON PROBATION

A student who is placed on probation and achieves a 2.00 GPA the following semester will be continued on probation if the required CGPA is not achieved.

REMOVED FROM PROBATION

If the required CGPA for good scholastic standing is met, the student will be removed from probation.

REQUIRED WITHDRAWAL

If the student fails to achieve a minimum 2.00 GPA the following semester and fails to achieve the required CGPA, they will be required to withdraw from the University. Students may petition for immediate reinstatement in person or in writing. If the appropriate committee then denies a request for reinstatement, the student is not eligible for enrollment for the next term in any department on campus.

READMITTANCE AFTER REQUIRED WITHDRAWAL

If a student is required to withdraw for academic reasons from Emporia State University and if the required withdrawal is not the student's 3rd from an institution of higher learning, the student may petition for reinstatement only in accordance with the following procedure. If a student is required to withdraw for the 3rd time from an institution of higher learning that student may not reapply until after one spring or fall semester has passed from the date of their required withdrawal.

1. The student shall apply in writing to the chair of the department in which they intend to major upon being readmitted. The chair of the department shall institute a reinstatement committee from among the faculty to consider the request and reach a decision. For students without a declared major, the student shall apply in writing to the Director of the Student Advising Center and the director shall institute a committee to consider the student's request.
2. The reinstatement committee shall forward its decision for or against reinstatement (clearly noting its reasons) to the Registrar. The Registrar shall notify the student of the committee's decision.
3. If the request for reinstatement is denied, the applicant shall not be permitted to enroll in any class or course for the next term in any department. The student can reapply after one spring or fall semester has passed from the date of denial. If the student chooses to reapply, the application will follow the above procedure. FSB 84026

HONORS AND RECOGNITION OF OUTSTANDING SCHOLARSHIP

Emporia State University recognizes and encourages outstanding scholarship at all levels. The departments, schools, and colleges accord such recognition through a variety of national honor societies and organizations and in other manners appropriate to their activities. The individual departments, schools, and colleges should be contacted for information concerning their particular recognition programs.

In addition to the above, Emporia State University presents the following university-wide honors and scholarships recognition activities:

GRADUATION WITH HONORS

Provisional recognition at the time of the graduation ceremony shall be based on the CGPA through the next-to-the-last semester at Emporia State University. The recognition does not become final until all grades have been recorded. Only the CGPA shall be used to determine the following levels of recognition at graduation. All hours counted toward the baccalaureate degree shall be counted in the calculation of the CGPA for purposes of recognizing achievement at graduation. A student must have completed at least 45 hours at ESU by the time the degree is conferred to receive this recognition.

Summa cum laude - Students with a CGPA equal to or higher than 3.90 shall have the designation "summa cum laude" entered on the diploma and the transcript.

Magna cum laude - Students with a CGPA less than 3.90 but equal to or greater than 3.70 shall have the designation "magna cum laude" entered on the diploma and the transcript.

Cum laude - Students with a CGPA less than 3.70 but equal to or greater than 3.50 shall have the designation "cum laude" entered on the diploma and the transcript.

SEMESTER HONOR ROLL

The semester honor roll has the following characteristics and requirements:

1. To qualify for the Semester Honor Roll, undergraduate and second bachelor students must earn a minimum 3.80 semester grade point average in at least 12 graded hours. The Semester Honor Roll is determined in Spring and Fall terms only.
2. Only letter grades of A, B, C, D, or F have an impact on grade point average.
3. The words "Honor Roll" will appear on the student's semester grade report and on the semester academic record. The Office of the Registrar is responsible for determining who is included in the honor roll.

SCHOLARSHIPS AND FELLOWSHIPS

Emporia State University encourages its students to compete for various national and international scholarships and fellowships such as Rhodes, Fulbright, etc., and it provides a system to assist, nurture, and support such competition.

HONORS COLLEGE

The Honors College at Emporia State University provides you with an extraordinary experience, one that will enrich and transform your life. If you're a student who wants to get the most out of your education, if college means more to you than simply earning credits and getting a credential, if you are passionate about learning and want to be around people who share your passion, and, if you want to work with others to make communities in Kansas and beyond more vibrant places, the Honors College is for you.

Mission Statement:

The Honors College at Emporia State University will prepare students to be agents of change for the common good in their respective communities.

Vision Statement:

The Honors College at Emporia State University aspires to be recognized as a significant catalyst for the improvement of communities in Kansas and beyond.

Honors College Components:

1. Civic Leadership Training: Faculty at ESU and at the Kansas Leadership Center will provide training to students that will enable them to join with others in addressing the challenges of the day.
2. Community Engagement: Students will engage with a variety of Kansas communities to address adaptive issues and engage in civic leadership and service learning. Students may eventually engage communities beyond Kansas to provide knowledge and perspective useful for enriching both Kansas communities and their personal lives.
3. Relationship Building: Students will have the opportunity to learn with their fellow students in a relationship-rich environment. Research shows this practice enhances student academic performance, improves retention, and creates strong nurturing relationships that can last a life-time
4. Enhanced Curriculum: Traditional honors courses and honors contract courses will be offered. These courses will provide a rich and broad educational experience to students that will assist them in achieving their academic potentials.
5. Mentoring: Students will experience, peer, faculty and community mentoring as they complete undergraduate research, scholarship, creative, and leadership activities.
6. Living and Learning Spaces: A modern, technologically enhanced space will be provided to students that will facilitate academic achievement and social cohesion. First year students will also have the opportunity to live in an Honors College residential facility.
7. Scholarships: Students will be provided annual, renewable scholarships contingent on satisfactory progress in meeting Honors College requirements and the availability of funds.

Membership Requirements

Incoming first-year students must have a cumulative high school grade point average of 3.5 or higher, or, an ACT score of 26 or higher.

Transfer students must have a cumulative grade point average of 3.5 or higher from the community college, college or university from which they are transferring.

Honors Curriculum

Traditional honors courses lay a foundation for the Honors College curriculum, while honors contract courses expand and enhance offerings, allowing students flexibility in their choices. Through an agreement with the professor, students may take any class at an honors level. Contact the Honors College office if you have questions about this option. The combination of traditional and honors contract courses provides an enriching and broad educational experience.

Honors College students will have the opportunity to participate in civic leadership training through a collaboration with the Kansas Leadership Center in Wichita. Students will also engage in a community setting to address adaptive issues and be directly involved in civic leadership and service learning.

Participation and Recognition For Graduation With Honors

Requirements

CW 111 Honors Seminar I, 3 credit hours

CW 311 Honors Seminar II, 1 credit hour

Civic Leadership Training Experience at Kansas Leadership Center

Four (4) honors courses (student may select from general education upper level, or contract courses)

CW 510 Community Engagement Practicum (or CW 499 Honors Thesis), 3-6 credit hours*

Two elective activities from the following options:

- a) Study abroad or other approved university-related travel
- b) Mentored research, scholarship or creative activity
- b) Qualified presentation at professional meetings
- c) Other special project or activity as approved by the Dean of the Honors College

Maintain a high level of activity in the Honors College including attendance at the meetings, programs and special events. A Final GPA of at least a 3.5 is required for graduation with honors.

See the Honors College Progression Policies (www.emporia.edu/honors/students/progression) for specific GPA and other requirements to maintain Honors College membership throughout enrollment.

Transfer students who have an associate degree or have at least 60 hours of course work at the time of matriculation to Emporia State University will need to consult with the Dean of the Honors College to develop a modified honors curriculum plan.

**Contact the Dean of the Honors College for more information regarding the Community Engagement Practicum or Honors Thesis.*

SPECIAL HELP OPPORTUNITIES

TEACHERS COLLEGE LEARNING CENTER

The Teachers College Learning Center is available to elementary and secondary education students. The instruction is individualized, focusing on improving academic performance including core skills needed as a classroom teacher. Study materials are available to assist students in preparing for competency exams (Praxis Core Exams – Math, Reading & Writing; Praxis Curriculum, Instruction, and Assessment; Praxis Principles of Learning and Teaching: Grades K-6 [PLT]).

The Center is staffed by a teacher education faculty member and undergraduate student assistants. Students are encouraged to visit the Center for academic assistance in required Education courses, to work on learning skills for program entry competencies in Elementary Education, or enroll in EL 100, Special Topics in Reading.

The Center, located in Visser Hall, room 222, is open on Wednesdays 9:00 a.m. to 6:45 p.m., Thursdays and Fridays from 9:00 a.m. to 4:00 p.m. on days classes are in session. The Center is closed on the first Friday of each month. Summer hours are posted in May. For further information, please call 620-341-5495 or email nepp@emporia.edu.

MATHEMATICS LABORATORY

The Mathematics Lab, located in BL 190 (Brighton Learning Center), offers tutoring to students having difficulty in mathematics classes. Lab assistants have upper-level mathematics ability or are skilled in helping remedial level math students. The Math Lab is open Monday through Thursday from 9:00 a.m. to 9:00 p.m. and Friday from 9:00 a.m. to 5:00 p.m. during fall and spring semesters. There is no charge for these services and no appointment is necessary.

Students having additional questions about the labs may call Robert Kornowski at 620-341-6764 or e-mail rkornows@emporia.edu

WRITING CENTER

All students, staff, and faculty can find writing support for all their writing projects the Writing Center, located in 209C in the WAW Library. Trained undergraduate, graduate, and faculty writing partners are available to collaborate with writers at any stage of the writing process, from prewriting/invention strategies, to content development and organization, to polishing final copies. We strive to help make better writers, not better papers.

The Writing Center is open M-TH, 10am-8pm Sunday 3-8pm. Distance students can make a Zoom appointment with one of our writing partners at <https://www.emporia.edu/writinglab/arranging-a-zoom-session-for-distance-students>

In addition, all ESU students have access to a Writing Center course in Canvas, where more information regarding Writing Center services can be found. Also on the Canvas shell are links and lessons to help with common writing projects, like literature reviews and annotated bibs. For additional information, email us, visit the Writing Center's website at <http://www.emporia.edu/writinglab/> and follow us on Twitter @ESU_Write.

ACADEMIC CENTER FOR EXCELLENCE AND SUCCESS (ACES)

ACES is ESU's primary resource for academic success. It is designed to offer an array of dynamic services to boost all ESU students' abilities to complete their undergraduate degree. Services include:

- Tutoring (peer-to-peer individual, small group, embedded, review sessions, etc.) for introductory to advanced-level courses.
- Mobile, interactive academic and personal development workshops.
- Specialized coaching for students wanting to enhance their academic success.
- Leadership opportunities for students wanting to enhance the academic success of other ESU students and gain skills that can carry over into their chosen career (mentoring, tutoring, facilitating of meaningful programming, etc.).
- Writing Center (WC) for students needing assistance with writing assignments and projects.

The Center also exists to serve as a recourse to faculty members, extending learning beyond the classroom. It is located on the 2nd floor of WAW Library. For more information, contact us at (620) 341-5033 or aces@emporia.edu. You may also follow us on Twitter and Facebook @AcesEsu.

TRIO STUDENT SUPPORT SERVICES

Student Support Services (SSS) is a federally funded grant program for eligible ESU students to enhance their educational opportunities.

SSS offers classes, tutoring services for many general education and upper-level courses, instruction in academic skills, and counseling in several areas: academic, personal, and career planning and preparation. Assistance is also available in applying for financial aid and for graduate school.

For more information, call 620-341-5097. You may visit our website at www.emporia.edu/trio/studentssupportservices.

TRIO McNAIR SCHOLARS PROGRAM

The McNair Scholars Program is a federally funded grant program that provides eligible students with effective preparation for doctoral study.

McNair offers opportunities for undergraduate research and other scholarly activities under the guidance of faculty mentors, seminars, academic counseling, and individual assistance with securing admission to and financial support for graduate programs.

For more information, call 620-341-5097. You may visit our website at www.emporia.edu/trio/mcnair.

FINAL EXAMINATIONS

The final examination is the responsibility of the instructor and is considered a part of the evaluation procedure used by the instructor in teaching the course. If given, final examinations shall be scheduled at the time designated by the official final examination schedule as published in the class schedule each semester.

Students with more than three examinations scheduled for the same day and who have not been able to resolve this situation among their instructors, will have the option of appealing to the associate provost to have one of the final examinations moved to a different

day. This appeal to the provost should be initiated by December 1 for the fall semester and May 1 for the spring semester. It is recommended that no examinations or tests be given the week preceding the final examination period.

Instructors who feel they are sufficiently able to ascertain the student's competency by various evaluation means during the course of a semester may (a) make the final examination optional for the entire class or (b) make the final examination optional for individual students.

In those courses in which final examinations are optional, the instructor will inform students of their standing in the class with respect to grade level before the final examination period.

Refer to the appropriate semester class schedule for specific information.

STUDENT EVALUATION OF FACULTY

It is the policy of ESU that every faculty member shall be evaluated by their students in a manner consistent with a procedure established in the department.

Refer to the University Policy Manual at:

<https://www.emporia.edu/acadaff/policy-manual-links>

USE OF RECORDING INSTRUMENTS IN CLASS

Students may use recording instruments in class with the permission of the instructor.

ACADEMIC RECORD REVIEW (ACADEMIC BANKRUPTCY)

An undergraduate student who in the past accumulated a poor academic record at Emporia State University or any other 2 or 4 year accredited institution and either chose not to return to school or was required to withdraw, may desire, after a period of months or years, to return to an academic pursuit. The purpose of this policy is to provide a reasonable means by which such a student can resume work toward a college degree without having to be severely burdened by their past record.

The Vice President for Academic Affairs, or an officer he designates, shall be responsible for establishing an academic record review committee for each academic year.

The function of this committee shall be to approve or disapprove the exclusion from the computation of their grade-point average certain F and/or D grades earned by an undergraduate student who returns, re-enrolls, or is reinstated to probationary status after a 12 month absence from an accredited institution and who petitions the committee in writing for a review of their case. Using such criteria as the student's maturity, purposefulness, and reasonableness in accounting for their past academic difficulties, the committee may, after reviewing the student's case, provide for the exclusion of up to 20 semester hours of certain F and/or D grades from the computation of the student's grade-point average.

Grades earned in courses required for the student's chosen major and in any other courses specifically required for their degree program may not be excluded from the computation of the grade-point average.

The exclusion of grades shall not become effective until the student has completed at least 15 semester hours of work beyond what they had taken at the time of re-enrollment or reinstatement and has earned for this additional work an overall GPA of at least

2.0. The student may petition the committee before they take the additional work or after they have completed it. The student need not be enrolled to file a petition.

The granting of the exclusion of certain grades from the computation of their grade point average may occur only once in a student's undergraduate academic career at ESU. Grades which have been excluded from the computation of a student's grade-point average shall be so designated on their transcript by an appropriate means. When a course has been excluded from the computation of the grade-point average, it shall not be counted for graduation.

Applications are available from the Provost's Office.

PROCEDURE TO DECLARE MAJOR/MINOR

At the time you apply for admission, you may declare your degree, major, teaching field, and/or minor, program objectives. If there are changes in these objectives, such changes must be made a matter of record by filling out a "Request to Change College Record" form with your advisor. The form is available in departmental offices and filed with the Registration Office.

APPLICATION FOR DEGREE/CONTRACT

An application for a degree is made when a student has earned 80 hours. Students should complete/submit the Intent to Graduate which is found on your Academic Life Tab in **BuzzIn** under Student Records. The completed form becomes the official agreement between the University and the student regarding the work to be completed for a major, minor, double major, and second teaching field. **The Intent to Graduate is submitted approximately 15 months prior to the expected date of graduation.**

INITIAL KANSAS TEACHING LICENSES

Licenses to teach in Kansas are issued by the State Department of Education based on the recommendation of the designated licensing official in The Teachers College at Emporia State University. The education licensure officer verifies the completion of an approved teacher education program, conferment of a baccalaureate degree, attainment of a minimum cumulative grade point average of 2.5 on a 4.0 scale, achievement of a minimum score on the Principles of Learning and Teaching test, and a minimum score for the teaching fields test(s). All applicants for an initial license must submit a valid fingerprint card and a \$50 fee to the Kansas State Department of Education for a background check.

The application for an initial teaching license may be obtained by accessing: <https://www.ksde.org/Agency/Division-of-Learning-Services/Teacher-Licensure-and-Accreditation/Licensure/License-Application/Initial-License-for-Kansas-Graduates>. Should an applicant require a paper copy of the application, one may be obtained in the Education Licensing Office located in Room 208, Visser Hall, or via e-mail at abalwin@emporia.edu.

The State of Kansas may not issue a teaching license to any applicant who has been convicted of a felony or who has had a teaching license revoked in another state. The Kansas State Department of Education requires a processing fee for an initial Kansas teaching license.

DISTANCE EDUCATION

Distance Education is the organizational and managerial support system for extending ESU's resources beyond its campus to those who want to further their education. Distance Education provides educational opportunities for students in alternate formats, through conventional on-site instruction at off-campus sites, and via mediated delivery systems such as the Internet, web-conferencing, IP Video, lecture-capture, podcasting, and various other connective video formats. Students may pursue undergraduate and graduate degrees, seek professional development, or meet certification/recertification requirements through such courses. If you have questions or need additional information, please call 1-877-332-4249 or 620/341-5385 or e-mail distance@emporia.edu. You may also visit our web site at <http://www.emporia.edu/distance/>.

State Authorization for Distance Education

Emporia State University is a member of the National Council for State Authorization Reciprocity Agreements (NC-SARA). For complete information on distance education and State Authorizations please go to: <http://www.emporia.edu/distance/state-authorization/>

UNDERGRADUATE DEGREES

Emporia State University offers the following undergraduate degrees to serve the needs of the people of Kansas:

Bachelor of Arts
Bachelor of Fine Arts
Bachelor of Interdisciplinary Studies
Bachelor of Music
Bachelor of Science
Bachelor of Science in Business
Bachelor of Science in Education
Bachelor of Science in Nursing

MINIMUM REQUIREMENTS FOR ALL BACHELOR DEGREES

What are the minimum requirements a student must satisfy to earn a bachelor's degree from ESU?

1. Earn at least 120 semester hours of credit in courses numbered 100 and above. (See below.) Students should check their specific degree/major for minimum requirements.
2. Among those 120 hours, have at least 45 hours of course work numbered 300 or above. (**Changed from 40 to 45 hours effective for students matriculating for Fall 2003.**)
3. Complete at least one major program of study, or its accepted equivalent. (See below.)
4. Fulfill minimum residency requirements for course work in the major and/or minor fields. (See below.)
5. Fulfill minimum residency requirements for all course work completed. (See below.)
6. Fulfill minimum grade-point requirements for course work taken in the major field **and** have an overall grade point average of 2.0, with an overall grade point average of 2.0 in all work taken at ESU. (See below.)
7. Complete at least 60 hours of course work at a four-year college or university.
8. Pass all competency examinations required in the field of study. (See below.)
9. Complete the general education program required for the degree. (See GENERAL EDUCATION section.)

TOTAL HOURS REQUIRED

No fewer than 120 semester hours of credit in courses numbered 100 and above, including at least 45 in courses numbered 300 or above, must be completed for all baccalaureate degrees. Of the total required semester hours, up to but no more than eight hours of physical activity courses may be included.

Credit earned in physical activity courses, when a part of the major and when entered on the student's major contract, may count toward the baccalaureate degree even though the total may exceed the limit of eight hours.

Students should check their specific degree/major for minimum requirements.

MAJOR

One major is required for all bachelor's degrees except the Bachelor of Science in Education and the Bachelor of Integrated Studies. See the descriptions of these degrees for options in lieu of the major.

At the beginning of the student's first year the degree candidate may, and not later than the beginning of the junior year must select a major/teaching field. At that time the student should arrange a personal conference with an academic advisor for the planning of a complete schedule of courses to be taken in that area.

MINOR

A minor or a series of supporting courses may be required by the student's major area or school/college. Students in other programs may elect to complete an organized minor program of studies.

MAXIMUM CORRESPONDENCE AND EXTENSION WORK

Not more than one-fourth of the total requirements for any degree except the Bachelor of Integrated Studies may be satisfied through correspondence study or extension classes or both.

MINIMUM RESIDENT WORK IN MAJOR AND MINOR

In addition to credits that may have been earned elsewhere, a student must earn at least four hours in their major or teaching field and two hours in their minor, if required, in residence at this university. Departments may require additional resident work.

MINIMUM RESIDENT REQUIREMENT

A student may meet the resident requirement for any baccalaureate degree by earning thirty of the final forty-five hours in residence, of which six of the final twelve hours must be in residence.

GRADE REQUIREMENTS

A student must have a grade point average of at least 2.00 in all work entered on their record. This includes all credits earned at other colleges as well as credits earned at this university. In the computation of the total semester hours, no course will be counted more than once and the grade used in the computation will be the last grade earned in a course that a student has repeated. (See regulations on repeating.)

A student must also have a grade point average of at least 2.00 in the work taken at ESU. The ESU GPA reflects the GPA for courses taken only at Emporia State University. Transfer courses do not impact the student's ESU GPA but are calculated and reflected in the student's cumulative GPA.

Higher grade point averages may be required for admission to or completion of certain programs offered by the university.

CREDIT FROM FOUR-YEAR INSTITUTION

A student must complete at least 60 hours at a four-year college or university.

SECOND BACHELOR'S DEGREE

A student may earn the same degree from ESU more than once, provided that each degree has a different major. A student who has never attended ESU should apply for a second bachelor's degree by contacting the Admissions Office. A student who has previously attended ESU may apply for a second bachelor's degree by contacting the Degree Analysis office. The application process includes providing official transcripts from all institutions previously attended. Students may be required to provide, at their expense, evaluation of credentials from foreign institutions. (The following regulations apply whether the second degree is conferred at the same time as the first or at a later time.)

Total Hours Required: A minimum of 30 semester hours of upper division, resident credit must be earned at ESU. These 30 hours are considered to be beyond the hours required for the first bachelor's degree.

Grade Point Average: A minimum grade point average of 2.0 must be maintained for the additional work required for the second bachelor's degree. This 2.0 is required in all work completed elsewhere as well as all work completed at ESU. A higher grade point average may be required in some programs.

Physical Activity Credits: A maximum of eight hours of physical activity credit in both the first and subsequent bachelor's degrees may be counted toward requirements for these degrees. Exceptions to this maximum are allowed if the physical activity credits are a required part of a major, minor, or teaching field.

Basic Skills: If they are not already satisfied in the first bachelor's degree, the recipient of the second bachelor's degree from ESU must satisfy the requirements as prescribed by the university and/or the school/college offering the major or teaching field.

Other Degree Requirements: To earn the second bachelor's degree, the student must have completed all program requirements as prescribed by the university, the academic school/college, and the department of the major or teaching field. The general education program completed for the first ESU bachelor's degree will satisfy the general education program for the second bachelor's degree. However, if the second bachelor's degree has unique general education requirements not met by the first degree, the student would need to complete them.

For students holding a non-ESU bachelor's degree, the Director of General Education will evaluate the student's transcript after the student has submitted a formal application and has had a transcript evaluation performed by the Registrar's office. The Director of General Education will determine if the general education courses taken for the earlier degree meet the overall content, level, and nature of ESU's General Education Program for the second degree. In the event that the transcript does not indicate that these criteria for general education have been met, the Director of General Education will specify courses that must be completed in order to satisfy the General Education Program for the second bachelor's degree. In addition, if the second bachelor's degree also has unique general education requirements not met while pursuing the first degree, the student would need to complete them. Please contact the Director of General Education by calling 620/341-5278.

Additional Degrees: The student wishing to earn additional degrees beyond the second bachelor's degree must conform to the above requirements for each such degree.

BACHELOR OF ARTS

The degree Bachelor of Arts is a liberal arts degree designed to serve the student who needs a program of study that incorporates breadth of education experience, emphasis on the traditional liberal arts disciplines, and a major in one or more appropriate fields. Programs of study leading to the Bachelor of Arts degree are developed by the appropriate departments as terminal liberal arts programs or as the appropriate preparation for certain graduate and professional studies. The requirements for the degree Bachelor of Arts are as follows:

1. The student must complete at least 120 semester hours of credit in courses numbered 100 or above. These may include eight hours maximum of physical activity credit unless additional work is required in the major.
2. The student must complete the core curriculum of the general education program and stated degree requirements.
3. The student must complete a maximum 40-hour program of study prescribed by the major department and also a second program of study with a minimum of 12 hours.
4. The student must complete such additional free and unrestricted electives as needed to total 120 hours for the degree. These may include additional credits in the programs of study described above.
5. The student must complete at least 45 hours of course work numbered 300 or above.

Majors For The Bachelor of Arts Degree

For specific requirements of the major chosen, see the appropriate departmental section of this catalog, check out the departmental site on the web (see address above), or contact the specific department offering the major you have selected. The major is to be selected from the following fields or departments:

Art	Mathematics
Biology	Modern Language
Chemistry	Music
Communication	Physics
Crime & Delinquency Studies	Political Science
Earth Science	Psychology
English	Sociology
History	Theatre

BACHELOR OF FINE ARTS

Programs of study leading to the degree Bachelor of Fine Arts are developed by the appropriate departments to prepare the student for employment or for entry into those graduate and professional schools that require intense preparation. The requirements for the degree Bachelor of Fine Arts are as follows:

1. The student must complete at least 120 semester hours of credit in courses numbered 100 or above.
2. The student must complete the general education program.
3. The student must complete a program of study prescribed by the major department that may also include work in related or supporting fields and restricted electives. The student may not be required to complete more than 70 semester hours in that program unless additional work is required by licensing, certifying, or other outside agencies, or unless it is an interdisciplinary program approved by the existing curriculum review process.
4. The student must complete such additional free and unrestricted electives as needed to total 120 semester hours for the degree.
5. The student must complete at least 45 hours of course work numbered 300 or above.

Majors For The Bachelor of Fine Arts Degree

For specific requirements of the major, see the appropriate departmental section of this catalog and/or contact the particular department offering the major you have selected. The major is to be selected from the following fields:

Art Theatre

BACHELOR OF INTERDISCIPLINARY STUDIES

NOTE: The BID degree can be pursued and completed online as well as on campus.

Each BID student, with input from the BID advisor, will develop a unique and personalized program of study. Students must fulfill the following requirements:

1. Complete a minimum of 36 hours for the BID program. The specific academic areas of emphasis for this coursework will be specified through consultation with the BID advisor. Courses to be taken as part of the degree must be consistent with these areas of emphasis, and should be part of a plan developed by the student working with the advisor.
2. Complete ID 302, Introduction to Interdisciplinary Studies (3 credit hours), and ID 490, BID capstone (3 credit hours).
3. Of the remaining 30 hours, students must complete at least 18 after declaring the BID as their program of study.
4. Only 6 credit hours applied to the BID program of study can be at the 200 level. The remaining 30 hours must be at 300 or above.
5. Earn a minimum grade of C in each course included in the program of study.
6. Earn a minimum GPA of 2.5 in the program of study coursework

In addition, students must complete university graduation requirements, including: the general education program for the Bachelor of Science degree; 45 credit hours of upper-division coursework; a 2.0 overall GPA; 120 credit hours of total coursework.

Students should contact the Department of Interdisciplinary Studies, 433 South Morse Hall, 620-341-5583 or dis@emporia.edu with questions or for additional information about the program.

BACHELOR OF MUSIC

Concentration in Music Performance

The degree Bachelor of Music, with concentration in performance, is recommended for students interested in professional music performance, composition, music teaching, or as a preparation for graduate studies in music. The degree may be elected upon the recommendation of the music faculty after the student has demonstrated ability in an area of performance by successfully completing a 30 minute performance jury at the end of the second semester of study.

1. The student must complete at least 120 semester hours of credit in courses numbered 100 or above. These may include eight hours maximum of physical activity credit unless additional work is required in the major.

2. The student must complete the general education program.
3. Music courses: The music courses total a minimum of 74 hours.
4. All degree candidates must successfully perform full junior and senior recitals in public; these must be previewed and approved by a faculty committee. Further, the candidate must complete at least one semester at the 500 level in the major instrument or voice.
5. The student must attend a prescribed number of concerts and recitals for each semester.
6. The student must complete required and elective music courses.

See the "Music" section of this catalog for additional information

Concentration in Music Education

1. The student must complete at least 120 semester hours of credit in courses numbered 100 or above. These may include eight hours maximum of physical activity credit unless additional work is required in the major or teaching field.
2. The student must complete the general education program.
3. Music courses: The plan (instrumental or vocal emphasis), totals a minimum of 60 semester hours in music.
4. The student seeking teacher licensure must have an overall grade point average of 2.75 in core general education courses, pass CORE competency examinations in reading (156 minimum), writing (162 minimum), and mathematics (150 minimum) with a minimum grade of "C" on selected courses before they can be formally admitted to the teacher education program and student teaching.
5. The candidate must perform a 30 minute minimum senior recital in public prior to student teaching; the recital must be previewed and approved by a faculty committee. The candidate must also complete at least one semester at the 500 level in the major instrument or voice.
6. The student must attend a prescribed number of concerts and recitals each semester prior to student teaching.

See the "Music" section of this catalog for additional information.

BACHELOR OF SCIENCE

Programs of study leading to the degree Bachelor of Science are developed by the appropriate department to prepare students for employment or for entry into those graduate and professional schools which require intense preparation. The requirements for the degree Bachelor of Science are as follows:

1. The student must complete at least 120 semester hours of credit in courses numbered 100 or above. These may include eight hours maximum of physical activity credit unless additional work is required in the major. The student must check their specific degree/major for minimum requirements.
2. The student must complete the general education program.
3. The student must complete a program of study prescribed by the major department that may also include work in related or supporting fields and restricted electives. The student may not be required to complete more than 70 semester hours in that program unless additional work is required by licensing, certifying, or other outside agencies, or unless it is an interdisciplinary program approved by the existing curriculum review process.
4. The student must complete such additional free and unrestricted electives as needed to total 120 semester hours for the degree.

Majors For The Bachelor of Science Degree

For specific requirements of the major chosen, see the appropriate departmental section of this catalog, check out the departmental site on the web (see address above), or contact the specific department offering the major you have selected. The major is to be selected from the following fields or departments.

Art	Health & Human Performance
Athletic Training	History
Biology	Mathematics
Biochem. & Molecular Bio	Physics
Chemistry	Political Science
Communication	Psychology
Computer Science	Rehab & Disabilities Studies
Crime & Delinquency Studies	Sociology
Earth Science	Sport Leadership & Recreation
Economics	

BACHELOR OF SCIENCE IN BUSINESS

The program of study leading to the Bachelor of Science in Business degree is designed to meet specific needs and interests of students. To provide adequate preparation for employment in business, the following academic majors are offered:

- Accounting
- Business Administration
 - Accounting Services
 - E-Commerce
 - Entrepreneurship
 - Financial Services Concentration
 - Human Resource Management
 - International Business Concentration
 - Marketing Communication
 - Sales Management
- Business Data Analytics
- Information Systems
- Management
- Marketing

General Requirements for the **Bachelor of Science in Business** degree are as follows:

1. A student earning a Bachelor of Science in Business degree must have a major. A major consists of approximately 60 hours of business courses. An outline for suggested sequences of courses and specific requirements may be obtained from the Business Advising Center or the office of the chair.
2. The student must complete the university's general education program (48-53 hours). Additional non-business courses must be completed to bring the total non-business component to at least 50 percent (usually 62 credit hours) of the 120 credit hours required for the degree program. These hours may include up to nine credit hours of economics and up to six credit hours of statistics or quantitative courses even though these courses may be offered through the School of Business.
3. The student must complete at least 120 semester hours of credit in courses numbered 100 or above. The 120 semester hours must include at least 45 hours of course work numbered 300 or above.
4. The student must complete **from Emporia State University** at least 50 percent of the business credit hours required for the degree. At least 15 of these credit hours must be in the student's major.
5. The student must meet the admission requirements and be admitted to the School of Business. (See School of Business admission requirements in the School of Business section.)

For students entering any college for the first time as a full-time student in the Fall of 2008 and thereafter, a minimum 2.35 cumulative grade-point average is required.

6. For students admitted to the School of Business in the fall of 2008 and thereafter, a minimum cumulative grade-point average of 2.35 is required in the business core curriculum.

Students who wish to teach business subjects should follow the degree program for a Bachelor of Science in Education with a teaching field in business.

For additional information, please see the following website:
<http://www.emporia.edu/business/>.

BACHELOR OF SCIENCE IN EDUCATION

The degree Bachelor of Science in Education is particularly designed for those students who plan to teach on the early childhood, elementary, middle, or secondary school levels. Satisfactory completion of this degree and fulfillment of state teacher licensure standards entitle one to a recommendation from the university for a teaching license in one's area(s) of specialization.

A student may pursue one or more license programs under the degree Bachelor of Science in Education. These programs are described more fully in the "The Teachers College" section of this catalog or on the web at the following address:
<http://www.emporia.edu/teach/>.

NOTE: License to teach in Kansas secondary or elementary schools may also be earned by pursuing a post-baccalaureate licensure program subsequent to completion of a baccalaureate degree. Information may be obtained by contacting the chair of the Department of School Leadership/Middle and Secondary Teacher Education or the Department of Elementary Education, Early Childhood and Special Education in The Teachers College.

BACHELOR OF SCIENCE IN NURSING

The Department of Nursing, a department in the College of Liberal Arts and Sciences, offers a four-year baccalaureate program that prepares graduates with the knowledge, skills, and attitudes to function as professional nurses. Students completing the 120 credit hour program receive the Bachelor of Science in Nursing degree and are eligible to take the nursing national licensure examination (NCLEX-RN).

For further information, please refer to the Department of Nursing section of this catalog.

OTHER PROGRAMS

Pre-professional programs and cooperative degree programs available at ESU are described in the following pages.

PRE-ENGINEERING

Students choosing to follow the two-year pre-engineering curriculum will take introductory science, mathematics, and general education courses considered equivalent to the first two years of work at any engineering school.

Depending upon the student's background and the field of engineering, the student normally will be able to complete sixty-to-seventy credit hours at Emporia State University that will apply toward the engineering degree.

A student who has not completed high school algebra or trigonometry, both prerequisites for pre-engineering courses, may take remedial work at ESU with a minimum of delay in the program.

The program of studies to be followed depends upon the engineering field which the student chooses as well as the engineering school which the student plans to attend. These factors will be addressed by the student and an engineering advisor during the first semester of attendance.

DUAL-DEGREE PROGRAMS IN ENGINEERING

Emporia State University has cooperative dual-degree arrangements with both the University of Kansas and Kansas State University by which degrees may be earned from both ESU and either KU or KSU in a five-year program. The student may earn a BS degree with a major in earth science, physics, chemistry, or mathematics from ESU, and the BS in engineering in the engineering fields listed below. Details of these programs are available from the Departments of Physical Sciences, Department of Mathematics and Economics, or the Student Advising Center.

Kansas State University

- Agricultural/Biological Engineering
- Chemical Engineering
- Civil Engineering Electrical/Computer Engineering
- Industrial/Manufacturing Systems Engineering
- Mechanical/Nuclear Engineering

University of Kansas

- Chemical Engineering
- Civil Engineering
- Electrical/Computer Engineering
- Engineering Physics
- Mechanical Engineering
- Petroleum Engineering

Students in the dual-degree program will normally spend three years (including a summer) on campus at ESU, during which time they will fulfill all of the general education and major requirements. Engineering courses taken at either KSU or KU during the fourth year will transfer back to ESU, and the appropriate chemistry, earth science, physics, or mathematics degree will be awarded by ESU at the completion of this year. The student will continue in residence at KSU or KU, and at the end of the fifth year will be eligible for the BS in engineering if all requirements have been met.

The courses taken by students in the dual-degree program during the first two years are normally the same as those taken by the pre-engineering student, so students may postpone until the end of the sophomore year the decision to transfer or to remain at ESU in the dual-degree program.

PRE-AGRICULTURE

Students desiring a degree in agriculture may do one or two years of work at ESU. The different curricula in agriculture vary considerably, but basic science, mathematics, and general education courses may usually be transferred without loss of credit.

PRE-VETERINARY MEDICINE

Most ESU students interested in veterinary medicine plan to take their four years of training at Kansas State University. A pre-veterinary student at ESU can complete all academic requirements necessary for entry into the professional program at Kansas State University.

PRE-LAW

Pre-law is a flexible course of study. There is no specific pre-law curriculum. Students instead take courses as recommended by the pre-law advisor and insofar as they cultivate what the law school admissions council describes as essential background skills and insights: comprehension and expression in words, critical understanding of human institutions, knowledge of the values with which the law deals, and creative power in thinking. In other words, students should choose majors and courses that develop effective means of oral and written communication; convey knowledge about society, its problems and institutions, especially those concerned with economic and political systems; feature careful examination of personal and social values systems; and develop critical thinking skills.

Kansas has two accredited schools of law, Washburn University School of Law and the University of Kansas School of Law. As with other accredited law schools, Washburn and the University of Kansas require a baccalaureate degree for admission. Students must also take the Law School Admission Test (LSAT) and subscribe to the law school data assembly service (LSDAS). Most students take the LSAT during their senior year, although some take it in their junior year. A special undergraduate course, PO 480 Introduction to Law, is available for students who expect to enter law school. Further information regarding pre-law, law schools, and the LSAT may be obtained from the pre-law advisor, Dr. Phil Kelly (pkelly@emporia.edu). Please consult the pre-law information found on the Department of Social Sciences webpage, www.emporia.edu/socsci/divis.htm.

PRE-DENTAL

The ESU program emphasizes the minimum requirements of the University of Missouri-Kansas City, which admits some Kansas residents as in-state students. These requirements are similar to those of Creighton University, Omaha, and other dental schools which also accept Kansas residents.

Pre-dental students are expected to acquire a strong science background. Most dental students have a bachelor's degree. Taking introductory courses in business and jewelry making is also strongly encouraged. More information is available at www.ADEA.org.

PRE-MEDICAL

Entrance requirements for U.S. medical schools are deliberately flexible and great latitude is permitted in choice of undergraduate major, provided the applicant has received adequate grounding in the sciences basic to medicine. The typical pre-medical student at Emporia State University takes the following semester courses to meet medical school entrance requirements in the basic sciences: Chemistry I, Chemistry II, Organic Chemistry I and II, College Physics I and II, Basic Calculus or Descriptive Statistics, Principles of Biology, Anatomy and Physiology, and Vertebrate Structure and Development. ESU pre-medical students have majored in a range of disciplines, including biology, chemistry, psychology, mathematics, modern languages, physics, and music.

Two important criteria for admission to medical school are a high grade point average and an above-average score on the nationally administered Medical College Admission Test (MCAT), which is usually taken in the spring of the student's junior year.

Departmental pre-medical advisors supervise the advisement of pre-medical students on the ESU campus, and the incoming student should contact a member of this committee for more details.

An excellent guide for pre-medical students, Medical School Admission Requirements, is published annually by the Association of American Medical Colleges (2450 N. Street, N.W., Washington, D.C. 20037-1126, ATTENTION: Membership and Publication Orders), or at the AAMC web address, www.aamc.org.

PRE-OPTOMETRY

There are seventeen four-year optometry colleges in the United States that permit practitioners to measure and correct visual defects by prescribing eye glasses, contact lenses, or visual therapy. The ESU program reflects the minimum admissions requirements for Northeastern State University College of Optometry, University of Missouri, St. Louis College of Optometry, and the Southern College of Optometry, Memphis. These requirements are similar to those of other optometry schools as well. All of the optometry schools admit a few exceptional students after two to three years of pre-professional study at the college level, but most students should plan to complete the bachelor's degree, preferably in the biological or physical sciences. All optometry schools require introductory course work in biology, chemistry, physics, English, and mathematics.

Additional requirements often include courses in psychology, microbiology, statistics, and the social sciences. Because of the variability in other course requirements among the optometry schools, students are advised to contact the ESU pre-optometry advisor and to obtain catalogs from the specific schools of interest. Excellent information for pre-optometry students is available at www.opted.org.

PRE-OSTEOPATHIC MEDICINE

Course requirements for admission to schools of osteopathic medicine are virtually identical to those for medical schools. The professional curricula of osteopathic medicine are likewise very similar to those of medical schools. The student interested in osteopathy is therefore referred to the pre-medical section of the catalog.

PRE-PHARMACY

The pre-pharmacy program is a two-year curriculum required by schools of pharmacy, including the University of Kansas, for admission to their professional programs. An additional three or four years of study at a school of pharmacy is required to become a registered pharmacist. Many of the required pre-pharmacy courses are in chemistry and biology. These must be started at the first enrollment if the student expects to complete the program in two years. A minimum grade point average of 2.5 is necessary in order to enter pharmacy school; those accepted typically have much higher GPAs. The student should consult a pre-pharmacy advisor in the Departments of Physical Sciences before the first enrollment, or as early as possible.

PRE-PHYSICAL THERAPY

The physical therapy professional (clinical) training programs at KUMC and WSU are both Doctor of Physical Therapy degree programs. A student interested in applying to these programs should pursue requirements for a degree at ESU as well as pre-physical therapy course requirements. For the BS degree, the student must select a major.

PROGRAMS IN ALLIED HEALTH FIELDS

In most of the health-related professions, specialized pre-professional training is required before a student can be admitted to the professional curriculum of choice. Emporia State University has a well-established history of providing health-related pre-professional training. The pre-professional programs vary in length from one year to full four-year curricula leading to bachelor's degrees. The allied health programs at ESU fulfill requirements of the professional schools, and allow the student a high degree of flexibility if individual interests change and some other field is chosen.

In each of the areas a specific plan of study has been developed and the courses a student can expect to take are listed in the following pages. In every case the plan is fully acceptable by accredited professional schools as fulfilling pre-professional requirements.

One additional health-related program, art therapy, differs from all the other programs in that it is a professional program at the master's degree level that is offered by ESU.

Most of these programs (and health-related programs in general) require at least a year of English composition, a year of biology, chemistry through organic chemistry, and some college physics. Most students who intend to prepare for a health-related profession should therefore elect English Composition I, Principles of Biology, and Chemistry I in their first semester at ESU.

OTHER HEALTH-RELATED PROGRAMS

Many students with interests in allied health fields will desire to pursue plans not listed in the previous section. Possible examples of such fields include recreational therapy, radiologic technology, respiratory therapy, and the newly emerging field of physician's assistant. In most cases, the required pre-professional courses are already being taught at ESU and an appropriate course of studies can be readily arranged. Knowledge of current requirements of the professional programs is assured by a committee staffed by faculty from chemistry; biological sciences; and health, physical education, and recreation. The interested student should contact any one of the above units for advisement and assistance in the development of their academic program

STUDY ABROAD

Opportunities for international academic exchange and education are available to all ESU students. Study abroad equips students with crucial skills for living and working in a globally interdependent and culturally diverse world. Various departments on campus offer short-term or summer study abroad programs for credit. As a member institution of the International Student Exchange Program (ISEP), ESU arranges affordable semester or academic year exchanges in over 30 countries in Africa, Asia, Canada, Europe, Latin America, and the South Pacific. In addition, reciprocal agreements with universities in China, Estonia, Finland, France, Korea, Latvia, and Paraguay enable ESU students to participate in direct exchanges with our partner institutions. For more information about international education opportunities at ESU, please contact the Office of International Education, lower level of the Memorial Union, call 620/341-5374, or see our website at the following address: <http://www.emporia.edu/oie>.

Interested persons seeking specific information about ESU procedures for Study Abroad programs **ISEP (I and II)** and the **Direct Exchange Program**, may contact the Study Abroad Coordinator in the Office of International Education. In addition, the Office of Student Financial Aid should be contacted for instructions and applications for aid which must be completed on a timely basis. Also, see *International Student Advisement* in the Admissions section of this catalog.

GENERAL EDUCATION

The Mission of the General Education program is:

....to enhance major programs of study through broadly shared educational experiences and academic preparation to become knowledgeable, civic-minded, culturally competent, lifelong learners, and adaptive leaders in a diverse global society.

GOVERNANCE:

The overall General Education Program is the responsibility of the Dean of The College of Liberal Arts and Sciences and their designated Director of General Education. ESU's Council on General Education, which is composed of faculty, students and administrators, assists the Director and has responsibility for approving, monitoring, and reviewing all policies, procedures, and curricula pertaining to general education. Faculty in the arts and sciences play a key role in the definition and delivery of the General Education Program.

GENERAL INFORMATION

The General Education Program at Emporia State University has six foundational goals with outcomes under each goal. These goals and outcomes represent what ESU considers to be the foundation of a well-rounded educational experience essential for student success as they complete their educations, prepare for careers, and engage as involved citizens. Each course in the General Education Program is aligned with at least one of these outcomes and provides an educational experience that will satisfy the outcome with which that course is aligned. These goals and outcomes, as well as the courses aligned with them, satisfy requirements of the Kansas Board of Regents (Foresight 20/20), the Kansas State Board of Education, and other accrediting bodies.

Students must complete the General Education Program outlined below. Students whose first enrollment occurred prior to the fall of 2009 may have the option of satisfying the requirements of the General Education Program that were in force when they enrolled provided that the requirements of "Reasonable Continuity" have been satisfied. Such students should check with their academic advisor, Registration Office Personnel, or the Director of General Education for a final determination of this issue.

Students must study these general education requirements carefully and consult with their academic advisor to ensure that they are completing the appropriate requirements as some degree programs require specific courses in the Program. Such program requirements are presented below. When appropriate, students in consultation with their academic advisors, can petition the Director of General Education for the substitution of specific courses requirements, or, in extraordinary circumstances, for exemption from specific course requirements.

GENERAL EDUCATION REQUIREMENTS

Students whose first enrollment in an accredited college or university occurred in the Fall 2009 or later must complete the general education curriculum outlined below in order to graduate from Emporia State University.

The General Education CORE requirements are common to all students regardless of major. However, there are some requirements unique to specific majors and degrees.

The list below clarifies the CORE requirements and denotes any variations as determined by major or degree requirements. Some majors or programs may require a minimum grade for specific General Education courses. Students should contact their academic advisors and consult the applicable university catalog for details.

See also the **General Education Prerequisites, General Education Approved Substitutions, and General Education Honors Courses** sections at the end of this document.

GENERAL EDUCATION GOALS

1. Acquire proficiency in core skills necessary for academic success.

A. Demonstrate effective communication skills in writing.

Complete **both** courses:

EG 101 Composition I 3 hrs.

EG 102 Composition II 3 hrs.

(Must have a "C" or better in each)

B. Demonstrate effective communication skills in speaking and listening.

Complete **one** course:

SP 100 Interpersonal Communication 3 hrs.

SP 101 Public Speaking 3 hrs.

Major/Degree Requirements

Business, Elementary/Secondary Education, and Nursing Majors must select:

SP 101 Public Speaking 3 hrs.

C. Demonstrate effective skills in quantitative and mathematical reasoning.

Complete **one** course:

MA 110 College Algebra 3 hrs.

MA 111 College Algebra with Review 5 hrs.

MA 156 Principles of Mathematics 3 hrs.

MA 160 Precalculus 4 hrs.

MA 161 Calculus I 5 hrs.

MA 165 Basic Calculus 5 hrs.

Major/Degree Requirements

Business majors must complete one of the following:

MA 110 College Algebra 3 hrs.

MA 111 College Algebra with Review 5 hrs.

MA 160 Precalculus 4 hrs.

MA 161 Calculus I 5 hrs.

MA 165 Basic Calculus 5 hrs.

Education majors must select one of the following:

MA 110 College Algebra 3 hrs.

MA 111 College Algebra with Review 5 hrs.

MA 160 Precalculus 4 hrs.

MA 161 Calculus I 5 hrs.

MA 165 Basic Calculus 5 hrs.

D. Demonstrate effective skills in Information Technology and/or Information Literacy Skills.

Complete one course:

AR 305	Introduction to Digital Design	3 hrs.
IS 110/113	Intro to Micro Computer App/Lab	0/3 hrs
UL 100	Research Skills, Information & Technology	3 hrs.
	An approved technology course in the discipline	2-3 hrs.

Major/Degree Requirements

Art majors (Bachelor of Arts, Bachelor of Fine Arts and Bachelor of Science) must take AR 305.

Business majors must take IS 113.

Elementary Education majors must take IT 325 Instructional Technology for Educators.

Secondary Education majors must take IT 360 Instructional Technology for Secondary Educators.

Nursing Majors must take NU 386 Introduction to Evidence Based Practical Health Informatics.

2. Demonstrate knowledge of concepts and principles in a wide range of academic disciplines including:

A. The Creative Arts

Select one course from any of the following three areas:

- 1. Art**

AR 101	Basic Drawing	3 hrs.
AR 105	Art Appreciation	2 hrs.
- 2. Music**

MU 226	Music Appreciation	2 hrs.
MU 326	Focus on Fifteen Classical Music Composers	3 hrs.
- 3. Theater**

TH 105	Theatre Appreciation	2 hrs.
--------	----------------------	--------

Major/Degree Requirements

Music Education majors must take 2 hours of Applied Music (MU 250-271)

Bachelor of Arts, Bachelor of Fine Arts, and Bachelor of Music majors choose two courses, one course from two different areas.

All Art majors choose AR 101 and one course from one of the other two areas.

It is recommended that Elementary majors take AR 105.

B. Humanities

Select two courses from those listed below:

- 1. History**

HI 101	World Cultures to 1500	3 hrs.
HI 102	Modern World Civilizations	3 hrs.
HI 111	U.S. History to 1877	3 hrs.
HI 112	U.S. History since 1877	3 hrs.
HI 302	Introduction to History	3 hrs.

2. Literature/Mass Media

EG 207	Literary Perspectives	3 hrs.
JO 200	Mass Communications	3 hrs.

3. Philosophy

PI 225	Introduction to Philosophy	3 hrs.
PI 301	Ethics	3 hrs.
PI 325	Social and Political Philosophy	3 hrs.

4. History of a Discipline

AR 225	Art History: Prehistoric to Renaissance	3 hrs.
AR 235	Art History: Renaissance to Modern	3 hrs.
MU328	Music History: Class Greece to Baroque	3 hrs.
MU329	Music History: Class Period to 21 st	3 hrs.

Major/Degree Requirements

All Art majors choose AR 225 and one additional course.

Music Education Majors:

MU 328	Music History: Class Greece to Baroque	3 hrs.
MU 329	Music History: Class Period to 21 st	3 hrs.

Elementary and Secondary Education majors choose one history course and one course from any of the other three areas.

Nursing majors choose either PI 225 or PI 301 and one history course.

C. The Life Sciences

Complete both courses:

GB 100	General Biology	3 hrs.
GB 101	General Biology Laboratory	1 hrs.

Major/Degree Requirements

Biology Majors

GB 140/141	Principles of Biology/Lab	3/1 hrs.
------------	---------------------------	----------

Elementary Education Majors

Complete both courses:

GB 100	General Biology	3 hrs.
GB 303	Field and Lab Biology	3 hrs.

Music Education Majors:

GB 100	General Biology	3 hrs.
--------	-----------------	--------

D. The Physical Sciences

Select one course and one lab from the following:

CH 110/111	Introduction to Chemistry/Lab	4/1 hrs.
CH 123/124	Chemistry I/Lab	3/2 hrs.
ES 110/111	Introduction to Earth Science/Lab	4/1 hrs.
PH 110/111	Introduction to Space Science/Lab	4/1 hrs.
PH 140/141	College Physics/Lab	3/2 hrs.
PH 190/191/192	Physics I/Lab	3/1/1 hrs.

Major/Degree Requirements

Elementary Education Majors

PS 115	Our Physical World	5 hrs.
--------	--------------------	--------

Music Education Majors:

Select one Physical Science lecture course	3-4 hrs.
--	----------

Nursing Majors

CH 120/121	General Chemistry/Lab	3/2 hrs.
------------	-----------------------	----------

E. Social and Behavioral Sciences

Select **two** courses, one each from any two of the following six areas:

1. Entrepreneurship

BU 260 Intro to Entrepreneurship 3 hrs.

2. Economics

EC 101 Basic Economics 3 hrs.
BC 103 Principles of Economics I 3 hrs.

3. Political Science

PO 100 Intro to Gov and Political Science 3 hrs.
PO 121 American National Government 3 hrs.
PO 322 State and Local Gov and Politics 3 hrs.

4. Psychology

PY 100 Introductory Psychology 3 hrs.

5. Rehabilitation

RE 290 Introduction to Rehabilitation Programs 3 hrs.

6. Sociology

SO 101 Introduction to Sociology 3 hrs.
SO 202 Social Problems 3 hrs.

Major/Degree Requirements**All Education Majors (BSE)**

PY 100 Introductory Psychology 3 hrs.
PY 211 Developmental Psychology for the Education Major 3 hrs.

Business Majors

BC 103 Economics I 3 hrs.
Select one other course from one of the other areas 3 hrs.

Crime and Delinquency Studies Majors

SO 101 Introduction to Sociology 3 hrs.
Select one other course from one of the other areas 3 hrs.

Nursing Majors

PY 100 Introductory Psychology 3 hrs.
Select one of the Sociology courses 3 hrs.

3. Demonstrate knowledge of similarities and differences among the world's cultures, past and present.

- A. Critically examine the characteristics of one's own culture and other cultures.
B. Critically examine how one's own culture and other cultures shape one's attitudes and opinions.
C. Demonstrate knowledge of the importance of tolerance and respect towards people of diverse cultures.

Select **two** courses, one from any two of the following seven areas:

1. Anthropology

AN 210 Contemporary Cultures 3 hrs.

2. Ethnic and Gender Studies

ID 301 Issues in Ethnic and Gender Studies 3 hrs.

3. Geography

GE 101 World Regional Geography 3 hrs.
GE 454 Cultural Geography 3 hrs.

4. Music

MU 324 World Music 3 hrs.

5. Political Science

PO 330 International Relations 3 hrs.

6. Modern Languages

AB 110 Arabic Lang and Culture I 5 hrs.
AB 210 Arabic Lang and Culture II 5 hrs.

AS 110 Chinese Lang and Culture I 5 hrs.
AS 210 Chinese and Lang and Culture II 5 hrs.
FR 110 French Lang and Culture I 5 hrs.
FR 210 French Lang and Culture II 5 hrs.
GR 110 German Lang and Culture I 5 hrs.
GR 210 German Lang and Culture II 5 hrs.
SA 110 Spanish Lang and Culture I 5 hrs.
SA 210 Spanish Lang and Culture II 5 hrs.
One Advanced Level (200 or above)
Modern Language Course 3/4 hrs.

Major/Degree Requirements**Bachelor of Arts**

Ten (10) hours of one Modern Language (plus one (1) additional 3 hour course from one of the other areas). To meet this requirement, students will demonstrate proficiency at the 210: Language and Culture II level. Proficiency will be demonstrated by successfully completing a Modern Languages and Literatures course numbered 210 or above, for a minimum of three and a maximum of ten hours of language courses. International students for whom English is not their native language may meet the language requirement upon successful completion of EG 102: Comp II.

Elementary Education Majors

SD 550 Survey of Exceptionality 3 hrs.
Choose either AN 210 or ID 301 3 hrs.

Music Education Majors

MU 324 World Music 3 hrs.
SD 550 Survey of Exceptionality 3 hrs.

Nursing Majors

NU 308 Foundations of Professional Nursing 3 hrs.
NU 492 Nursing Leadership 3 hrs.

Secondary Education Majors

SD 550 Survey of Exceptionality 3 hrs.
Select one course from one area 3 hrs.

Sociology Majors

AN 210 Contemporary Cultures 3 hrs.
Select one course from one of the other areas. 3 hrs.

4. Demonstrate knowledge and skills necessary for promoting personal and social well-being.

- A. Demonstrate the ability to gather, analyze, and use information to make decisions that promote personal and social well-being.

Select **two** courses from those listed below:

1. Business

BU 241 Personal Finance 3 hrs.
BU 393 Ethical Decision-Making in Organizations 3 hrs.

2. Health and Well-Being

HL150 Critical Issues and Decisions in Health 3 hrs.
PE 100 Active Living 1 hr.

3. Sociology

SO 261 Intimate Relationships 3 hrs.

4. Honors

CW 111 Honors Seminar I 3 hrs.

Major/Degree Requirements**Business Majors**

BU 393 Ethical Decision-Making in Organizations	3 hrs.
Select one other course from this area	1-3 hrs.

Business Education Majors

BU 241 Personal Finance	3 hrs.
HL 150 Critical Issues and Decisions in Health	3 hrs.

Music Education Majors

HL 150 Critical Issues and Decisions in Health	3 hrs.
--	--------

Elementary/Secondary Education Majors

HL 150 Critical Issues and Decisions in Health	3 hrs.
Select one other course from this area	1-3 hrs.

Nursing Majors

CW 152 Introduction to Health Care Careers	3 hrs.
Select one other course from this area	1-3 hrs.

- B. Demonstrate awareness of operations of civic and societal institutions.
- C. Identify issues that inform and affect civic and societal institutions.

Courses aligned with these outcomes (6B and 6C) are found in the Social and Behavior Science area.

Consequently, these objectives will be met as students complete the Social and Behavior Science requirement.

5. **Be able to think critically and analytically about an issue, an idea, or a problem.**
- A. **Identify and define an issue, an idea, or a problem.**
- B. **Gather, analyze, and evaluate relevant and reliable information from diverse perspectives.**
- C. **Formulate and support a well-reasoned argument, perspective or conclusion.**

A wide variety of courses in the General Education Program assist students in developing critical thinking skills. Students will acquire these skills as they complete the General Education Program without the need to select a specific course.

6. **Be able to make connections among the ideas and perspectives of multiple disciplines.**
- A. Explore and compare complex ideas for multiple disciplines.
- B. Apply knowledge from the perspective of multiple disciplines.

A wide variety of courses in the General Education Program assist students in making connections from one discipline to another. Students will learn to make these connections as they complete the General Education Program without the need to select a specific course.

GENERAL EDUCATION PREREQUISITES**Writing...**

Students whose test scores indicate a need for strengthening basic writing skills are required to take EG 001. Basic Writing (3 hours) before enrolling in EG 101.

Mathematics...

Students whose test scores indicate a need for strengthening basic computational or algebraic skills are required to take MA 097 Beginning & Intermediate Algebra (4 hours).

Developmental Classes - if needed . . .

EG 001 Basic Writing
MA 097 Beginning & Intermediate Algebra
EL 072 Improvement in Reading Skills

GENERAL EDUCATION APPROVED SUBSTITUTIONS

(These substitutions apply only to students who were elementary education majors when they took the specified general education courses in fine arts, physical science, and life science, but have since changed their major.)

Creative Arts:

Basic Music (MU 124) substitutes for Music Appreciation (MU 226).

Physical Science:

Our Physical World (PS 115) substitutes for the five-hour physical science requirement (lecture and lab).

Life Science:

Field and Lab Biology (GB 303) substitutes for Biology Laboratory (GB 101).

GENERAL EDUCATION ADVANCED COURSES

Creative Arts: TH381 Survey of Dramatic Literature or TH 382 Modern Drama, may be substituted for TH 105 Theatre Appreciation.

Literature and Ideas: GR 365, SA 365, FR 419, EG 220, EG 221, EG 230, EG 231, EG 240, EG 241, EG 350, EG 355, and EG 360 may be substituted for EG 207.

Mathematics: Education majors may take MA 161 Calculus I, to satisfy the mathematics requirement. Grades of "C" require evaluation by the Mathematics Department. Students pursuing other majors may take either MA 160 Precalculus; MA 161 Calculus I; or MA 165 Basic Calculus.

Physical Science: Students may take either CH 123/124 Chemistry I/Lab, PH 140/141 College Physics/Lab, or PH 190/191/192 Physics I/Lab/Recitation to satisfy this requirement.

Social and Behavioral Science: Students may take *either* BC 103 Economics I, *or* BC 104 Economics II, in place of EC 101 Basic Economics.

Writing: Students with ACT scores of 24 or above in both English and Reading may take EG 103 and EG 104 Honors Composition I and II, to satisfy the writing requirement. (Students eligible for this course may choose EG 101 Composition I, and EG 102 Composition II, instead.)

TEST OUTS AND CREDIT BY EXAMINATION

Information on advanced placement and certain general education courses is available at the following address:

<http://www.emporia.edu/regist/analyst/crexam.htm>

GENERAL EDUCATION HONORS COURSES

Honors students are encouraged to consider taking the following "Honors" classes as part of their general education experience.

BC 103	*Z	Principles of Economics I
BC 104	*Z	Principles of Economics II
BU 393	*Z	Ethical Decision-Making in Organizations

PLACEMENT AND GRADUATION

CAREER SERVICES

Career Services is committed to the positive career development of all students at Emporia State University. From undeclared students to graduating seniors, Career Services provides diverse services to help students find career success.

Services include part-time and full-time job listings, career counseling, internships, professional development workshops, resume reviews, career fairs, on-campus interviews, job search strategies and mock interviews.

Students are encouraged to visit with professional career counselors early in their academic program for career exploration and testing. Sophomores and juniors should pursue internships in their major field of study. Graduating seniors should utilize Career Services 6-8 months prior to graduation and research job opportunities in Hire-a-Hornet or VAULT. For students seeking part-time employment, on- or off-campus, visit the Career Services website for an electronic listing of part-time jobs.

Career Services is located at 050 Memorial Union, Lower Level. For more information, call 620/341-5407, or visit the website at www.emporia.edu/careerservices.

INTERNSHIPS

Students planning to enter the work force should complement their academic preparation with a range of other experiences such as study abroad, community service, undergraduate research experiences, participation in student organizations, and internships. An internship is a carefully monitored, structured, and supervised work experience that enables a student to gain practical, "real-world" exposure to a particular career or professional field. An internship can be any type of work or service experience related to one's major or career interest in which there are intentional learning outcomes and active reflection on what is being learned throughout the experience. Because employers prefer to hire graduates with hands-on experience in their majors, participating in an internship offers a unique opportunity to learn about the next steps to take on a career path. Internships may occur at businesses, government agencies, educational institutions, social service agencies, non-profit organizations, and other workplaces.

For more information about internships, visit the Career Services website at www.emporia.edu/careerservices.

GRADUATION INSTRUCTIONS

All degree candidates will receive detailed instructions about one month prior to graduation. The instructions contain all information pertinent to graduation. **Please see the following website:** <http://www.emporia.edu/commencement>.

APPAREL AND ANNOUNCEMENTS

The Memorial Union Bookstore can be contacted at 620/341-5214 for information about purchasing apparel and announcements.

ATTENDANCE AT COMMENCEMENT

All graduates are encouraged to take part in commencement exercises. All participants are required to arrive on time for line-up and remain to the end of the commencement ceremony. Students completing a degree in December and who cannot attend the December ceremony, must obtain permission from the commencement committee chair to participate in the previous May commencement. They will normally participate in the following May commencement.

GRADUATION FEES

Each candidate for a degree is assessed a fee to defray expenses incidental to graduation. Please refer to the FEE INFORMATION section of this catalog for the amount of fees assessed. *These fees are subject to change by administrative action. The paid fee covers a period of eleven months.*

GRADUATE STUDY

The Graduate School coordinates admission activities for all graduate students. It offers programs of study leading to the degrees, Master of Science (MS), Master of Arts (MA), Master of Accountancy (MACC), Master of Education (MED), Master of Library Science (MLS), Master of Music (MM), Master of Business Administration (MBA), Specialist in Education (EdS), and Doctor of Philosophy (PhD) in Library and Information Management. Certificate programs in Archives, Autistic Spectrum Disorders, eLearning/Online Teaching, Elementary Literacy, **Elementary STEM**, English, Geospatial Analysis, History, Informatics, Information Technology, Technology & Scientific Literacy, International Student Music Performance, Leadership & Administration in Information Organizations, Math, Music Performance, Public History, Psychology of Learning, Secondary Literacy, Teaching with Technology, TESOL, and Youth Services are also offered. The policies governing all graduate programs are administered by the Graduate School.

Graduate programs are governed by the university's Graduate Council. Membership on the Graduate Council consists of a representative from the 14 graduate academic departments and two graduate student representatives.

In addition to administering graduate education at ESU, this office has the responsibility for research and grant activities of the institution. Further information about the Graduate School, its programs, and its activities may be obtained by writing or visiting the office or viewing the graduate web page at <http://www.emporia.edu/grad/>.

Numerous graduate teaching, research, and administrative assistantships are offered each year. Interested students can complete an online assistantship application located on the graduate web page at the following address: <http://www.emporia.edu/grad/graduateassistants/index.html>.

THE ALUMNI ASSOCIATION

The Emporia State University Alumni Association traces its history back to 1880 as the official organization of graduates and former students of Emporia State University, Emporia Kansas State College, Kansas State Teachers College and Kansas State Normal. Following their graduation/attendance at Emporia State, students automatically become lifetime members of the Alumni Association. At the present time, there are over 65,000 alumni on file, and these alumni may be found in all 50 states, each of the American protectorates, and in over 100 foreign countries.

According to the constitution of the Alumni Association, the primary purpose of the organization shall be to promote the welfare of Emporia State University and to establish a mutually beneficial relationship between the university and its alumni. The Alumni Association publishes *Spotlight*, a magazine for alumni and friends of Emporia State University, two times a year; the association sponsors and helps coordinate reunions; organizes alumni gatherings throughout the state and nation; coordinates Homecoming activities; supports and actively supplements the University efforts in both student recruitment and legislative advocacy programs; partners with career services to build relationships with employers; sponsors programs for undergraduates, including Senior Week and the Ambassador program; honors graduates who have distinguished themselves professionally and individuals who have served the university in a unique manner; recognizes multi-generational families of Hornets; and provides many other alumni activities, programs, and services.

Policies, programs, and services of the Alumni Association are determined by volunteer board of directors who are elected annually and serve three-year terms.

For extensive information, please see the following website www.emporia.edu/alumni or contact the alumni relations staff at 620/341-5440.

EMPORIA STATE UNIVERSITY FOUNDATION, INC.

Emporia State University Foundation, Inc., founded in 1952, is an independent, nonprofit 501(c) (3) organization in support of Emporia State University. Its mission is to raise philanthropic awareness and investment in ESU.

The purpose of the Foundation is to raise, invest, account for, allocate and steward private gifts benefiting the university. The Foundation coordinates and directs all major fundraising initiatives on behalf of ESU and currently manages assets exceeding \$74.4 million.

Contributions, primarily designated by donors, may be tax deductible as allowed by law and are used for scholarships, faculty programs, athletics and other needs. ESU Foundation, Inc. is governed by a volunteer board of trustees who provide oversight, leadership and counsel.

For more information on the Foundation, please visit this website: <https://www.emporia.edu/foundation/>

SERVICES, SPECIAL PROGRAMS, AND FACILITIES

THE CENTER FOR ECONOMIC EDUCATION

The mission of the ESU Center for Economic Education is to deliver high-quality teacher-training programs, which facilitate knowledge of essential economic concepts, personal finance concepts, and economic reasoning ability of kindergarten through senior high school students.

The center is fortunate to have an extensive and diverse array of partner organizations donating their facilities along with their leaders and key individuals in delivering economic education workshops; these partners have included the Federal Reserve Banks of Kansas City and St. Louis and virtually every major employer in Topeka and Emporia along with many others. The center is part of the network of the Council on Economic Education (CEE), which has affiliation standards the ESU center has met or exceeded since the inception of these standards.

As part of this network, the center offers courses, workshops, and other teacher-training activities through the Department of Mathematics and Economics in the College of Liberal Arts and Sciences at ESU. Some of these courses are offered online in an exclusive partnership arrangement with the Federal Reserve Bank of St. Louis at a heavily discounted rate for tuition and fees. In addition, the ESU center is supported by the Kansas Council on Economic Education (KCEE), which frequently funds partial tuition scholarships for K-12 teachers taking other economic education courses.

Contact information: Rob Catlett 620/341-5678
or e-mail catletr@emporia.edu

CENTER FOR INSURANCE EDUCATION

The Center of Insurance Education, 126 Cremer Hall, offers current insurance materials and information, educational opportunities, and research projects to further the knowledge and understanding of insurance principles and practices.

For more information call 620/341-5657 or see the website at <http://www.emporia.edu/business/cie>.

KANSAS BUSINESS HALL OF FAME

The Kansas Business Hall of Fame recognizes Kansans who have distinguished themselves through significant accomplishments in business, leadership roles, philanthropy, and contributions to society. New inductees are announced each year at the annual meeting of Team Kansas each June.

The Hall of Fame website is:
www.emporia.edu/business/community/kbhf/

KANSAS SMALL BUSINESS DEVELOPMENT CENTER

The Kansas Small Business Development Center, located in the ESU School of Business, offers free, confidential advising services to existing and potential small business owners and entrepreneurs. The KSBDC also sponsors low-cost training programs, maintains and shares helpful business resources, and provides referrals to other small business service providers. If you have questions, or are interested in KSBDC services, please call 620-341-5308 or e-mail ksbdc@emporia.edu. www.emporia.edu/sbdc/

JONES INSTITUTE FOR EDUCATIONAL EXCELLENCE

The Jones Institute for Educational Excellence (JIEE), located in the lower level of the Earl Center, is a department within The Teachers College. The Institute contributes to the goals and mission of the college by providing the following services to school districts, state agencies, and other educational groups:

- providing Reading Recovery training to school personnel
- assisting with the National Teacher Certification process
- directing a summer Future Teacher Academy for high school students
- providing professional development through National Writing Project
- hosting education conferences and workshops
- conducting educational research of pertinence to schools and other educational groups
- assisting with the writing of local, state, and federal grant proposals
- assisting with the development of educational policy
- providing consultant services in curriculum development, staff development activities, surveys, and long-range planning and evaluation activities
- providing assistance with the comprehensive planning and implementation of in-service education
- promoting university/private sector partnerships

If you have questions or need additional information, please call 620/341-5372 or toll free at 1-877-378-5433. The JIEE website is <http://www.emporia.edu/jones/>.

INFORMATION TECHNOLOGY

Information Technology (IT), located in Cremer Hall, provides a comprehensive digital environment to support the mission of the University. This includes a network backbone that links all academic departments and administrative offices; a collection of resources that support meritorious intellectual pursuits; and a range of computing and telecommunications facilities and services that support academics, central administration, institutional research, data communication, information management, and other major phases and important aspects of university life.

IT is divided into several key areas: Administrative Solutions, Data Management & Analytics, Help Desk, Infrastructure, Information Security, Learning Technologies, Web & Digital Strategies, and the Office of the CIO.

Administrative Solutions supports the business processes of the university. This includes supporting reporting and integration services for a wide variety of internal and external entities, maintaining financial, human resources and payroll information for university departments as well as providing financial aid, enrollment and grade information for students and faculty. This information is contained within the Ellucian Banner system. Hornet365 is ESU's web portal, serving as a single point of entry for the university's information assets. Tiles on Hornet365 access Banner 9 for employees and gives students access to class and course information, account and financial aid information, and student email. The Administrative Solutions team is also responsible for building and maintaining the ESU app for mobile devices, which provides this information on a mobile platform. In addition, data integrations with over fifty auxiliary systems, both external and internal to ESU, are developed and supported.

At Emporia State University, Data Management and Analytics (DMA) provides a culture of data-informed decision-making through data sharing, data management, and data security. The DMA team facilitates a transparent model and understanding of available data across divisions allowing campus data modelers, financial analysts, data scientists, and data management specialists' access to complex data to answer key questions, promote student success outcomes, and conduct deeper levels of analysis of enrollment, academic, and financial trends. DMA provides ad hoc reports, data extracts, data visualization, and analytics to campus offices on demand. Requests for such information are submitted via a data request vehicle and logged within a report inventory within the DMA department. The DMA team works closely with departments to verify data needs and provide complete and accurate results.

The IT Help Desk offers a variety of user support services and is the first point of contact for troubleshooting technology-related problems. These services include desktop, mobile, and smart classroom support, and support for other technologies. The Help Desk is also the main point of contact for students' technology needs and assistance, including virus and malware clean-up and software installation. The IT Help Desk is located in Cremer Hall, and may be reached by calling 620-341-5555 or sending an email to helpdesk@emporia.edu.

Infrastructure is a multi-focus team dedicated to hardware, software and communications systems supporting the mission of the university. They provide strategic planning, design and installation of ESU's voice, wireless and data networks, working in tandem with university departments, external network service providers, and internal and external architectural and construction teams to deliver an integrated, reliable communications network. Services include authentication and identity management, file and print services, directory services, email and messaging, collaboration services, server infrastructure, endpoint support, computer labs, storage area networks, disaster recovery, digital signage, web services and IT marketing communications. A variety of cloud-based services are offered to students, staff and faculty with the core philosophy of being able to work from anywhere, anytime, and from most internet-connected devices. Sky, ESU's on-premises cloud platform, includes SkyLab, which is an online virtual computer lab designed to provide students access to the same software and services, regardless of where they are geographically located. Similarly, SkyPrint is a service that allows students to upload their documents from their personal computer to the cloud, and then release and print the job from any of 15 printers conveniently located across campus. The team provides Office 365 email and file storage support then management of G-Suite for student email.

Information Security provides solutions and services to protect student and employee information, supports Infrastructure by securing and auditing key systems, and maintains campus information security policies in alignment with state and federal policies and regulations. The Information Security team monitors alerts from a number of systems that detect signs of compromise, system vulnerabilities, and abuse of protected information and provides timely remediation services. Because our users are often directly targeted by malicious actors, Information Security offers awareness programs and training so that our user campus community is empowered to protect themselves and campus from these types of attacks. User defense is further reinforced with antivirus software, provided both to campus and personal devices. Physical security is supported through the use and administration of card activated door access and video monitoring systems.

Learning Technologies provides support for the campus Learning Management System called Canvas. This group also provides support for web conferencing, lecture capture, Learning Spaces, video streaming, professional development, MakerLab functions, and more. Learning Technologies offers certain video production services that support video production, including a One Button Studio and other related services. Videos can be uploaded to a streaming media portal. The Learning Technologies group provides instructional support, course design, research and grant support, class presentations, workshops and training to all ESU faculty.

The Web & Digital Strategies team, in partnership with Marketing & Media Relations manages the ESU web presence and overall digital strategy. This includes the ESU website, Hornet Sites, digital signage, collaboration services, Office 365, Adobe, and IT promotional services. Hornet 365, the University portal and digital platform, offers a full suite of services including Office 365, email, file storage, Microsoft Office and collaboration capabilities. Hornet TV is a visual communication platform that provides promotional services, communications, daily Hornet Announcements, wayfinding, 24 x7 live streams, and more across digital signage, mobile, and web platform.

The Office of the Chief Information Officer (CIO) is charged with Strategic leadership of information and digital technology across Emporia State University. The Office of the CIO serves as a catalyst, and thought leader, in working with the campus community to leverage technology to advance and support the mission and goals of the university. The Office of the CIO is responsible for directing the operations of the Information Technology (IT) department, including budget and project portfolio management for technology related projects on campus, encouraging technical innovation and the development of a robust and dependable technology infrastructure, and representing the University with key local and national affiliations, such as EDUCAUSE, Regents IT Council, the Midwest Higher Education Compact, Emporia Main Street and KanREN. The Office of the CIO also supports an IT governance structure for setting campus-wide priorities for IT services, resources, facilities, and campus technology expenditures in support of ESU's mission and goals.

ATHLETIC PROGRAM

The Department of Intercollegiate Athletics has a three-fold purpose: education, recreation and promotion. As an educational enterprise its objectives are (1) to provide positive experiences for growth for student-athletes, coaches and administrators of athletics,

(2) to provide competitive and educational opportunities for students with advanced physical skills, and (3) to provide events that are instrumental in educating participants and observers in the moral and ethical values inherent in athletics.

E-State's 15-sport intercollegiate program for men and women is affiliated with the National Collegiate Athletic Association (NCAA) and the Mid-America Intercollegiate Athletics Association (MIAA).

Intercollegiate athletics is designed to satisfy the needs and desires of men and women students who enjoy representing the university in competition with students of other institutions. The university offers an opportunity for men to participate in football, basketball, baseball, track and field, cross country and tennis. Women compete in cross country, tennis, volleyball, softball, basketball, track and field, and soccer.

Emporia State was the host of the 1995 NCAA Division II Outdoor Track and Field Championship, the 1996 NCAA Division II Softball Championship, the 1998 NCAA Division II Cross Country National Championship, the 1999 NCAA Division II Outdoor Track and Field Championship, and the 2006 NCAA Division II Outdoor Track and Field Championship.

In addition to intercollegiate athletics, there is an opportunity for all students to participate in a variety of sports clubs. Furthermore, students are invited and encouraged to participate in activities sponsored by Recreational Sports. Activities include intramural competition, free play, and games and sports of low organization.

If you have questions or need additional information, please call 620/341-5354, send an e-mail to esusports@emporia.edu, or visit our website <http://www.emporia.edu/athletics/index.html>.

NORMAN R. EPPINK AND GILSON ART GALLERIES

The Norman R. Eppink Gallery and the Gilson Memorial Gallery are located on the first floor of King Hall. The Eppink Gallery primarily exhibits well-known artists from across the nation, whose work complements the programs taught in the Emporia State University Department of Art. The Gilson Memorial Gallery features exhibitions by graduating seniors, as well as the annual departmental faculty and student shows. Gallery hours are from 10:00 a.m. until 3:00 p.m., weekdays during the regular school session. For more information, please contact the Art Department, 11 King Hall, or call 620/341- 5246.

THE EDUCATIONAL THEATRE COMPANY

Students in the Educational Theatre Company, operating under the sponsorship of the Department of Communication and Theatre, serve as an academic resource pool in performing dramatic presentations of plays, poetry, stories, novels, non-fiction, and original scripts before classes in all academic areas of the university, as well as in the community. Please contact the department office, 201 King Hall, or call 620/341-5256.

THE UNIVERSITY THEATRE

A wide variety of plays and musicals for the campus and the community are offered in the university's different theatre facilities. ESU Theatre produces most of its productions on the stage of the Karl C. Bruder Theatre located in King Hall. Usually, four productions are presented during the academic year. The Bruder Theatre is also the home for the popular Emporia Summer Theatre season of four plays and musicals during June and July each year. In the fall, ESU produces the Homecoming Scholarship Musical, which is often staged in Albert Taylor Hall located in Plumb Hall. The Ronald Q. Frederickson Theatre, located in Roosevelt Hall, is an intimate black-box theatre. Please contact the department office, 201 King Hall, or call 620/341-5256.

MUSICAL CONCERTS AND PRODUCTIONS

The Department of Music provides an expansive schedule of concerts, recitals, master classes, and lectures open to the campus and community. These include performances by students, faculty, department ensembles and by regional and international performers. Brief descriptions of these follow. Please contact the department office, 105 Beach Hall, or call 620/341-5431.

THE ORCHESTRA provides opportunities to study and perform orchestral repertoire ranging from music for strings to works for full symphony orchestra. The orchestra frequently joins forces with the A Cappella Choir and the Opera Theater.

THE OPERA THEATRE involves the study and performance of appropriate excerpts from opera repertoire. One major opera is staged each year.

THE MARCHING HORNETS is a highly energized ensemble comprising drum line, marching corps, flag corps, and the popular Stingers Dance Team. This ensemble provides pre-game and half-time musical entertainment for all Hornet football games.

THE WIND ENSEMBLE is the primary large instrumental group. It is very active in on-campus performances as well as guest appearances and tours. Repertoire ranges from large-scale symphonic band works to chamber pieces.

THE ESU COMMUNITY CHORUS, a choral organization of approximately one hundred voices, presents at least two performances each year. Major works, such as Handel's *Messiah* and the Vivaldi Gloria, are performed regularly.

THE JAZZ ENSEMBLE performs a wide range of music from combo to big band features outstanding soloists each year. Past performers have been Doc Severinsen, Lou Marini, Marvin Stamm, Stan Kenton, and Arnie Lawrence. The group regularly performs at the Kansas Music Educators Association conference in Wichita and periodically tours to venues around the United States and abroad.

A CAPPELLA CHOIR -- A premier ensemble of auditioned singers, the Emporia State University A Cappella Choir is sought after as a performing ensemble. Invitations for this chorus have gained it concerts throughout the U.S. In 1978, it was one of three college choirs to be invited to St. Moritz, Switzerland, to perform with the Prague Symphony Orchestra and, in 1982, it toured Italy and sang as the demonstration choir for famed Parisian conductor Marcel Couraud. In 2000, its European Tour included Denmark, and England/Scotland/France for the 2003 tour.

PERCUSSION ENSEMBLE -- Members of this instrumental organization perform an extensive variety of percussion ensemble repertoire. The Percussion Ensemble performs regularly at KMEA conferences.

OTHER MUSICAL ORGANIZATIONS include brass and woodwind quintets, clarinet choir, flute choir, saxophone ensemble, madrigal singers, and other chamber music organizations frequently heard in recital. In addition, music sponsors many guest lecturers, clinicians, conductors, and soloists with various groups throughout the year. State music festivals, in which some 3,000 students participate, are held on campus in the spring.

Occasionally, the university invites a composer to "live-in" on the campus for a few days for the purpose of working with students; past visiting lecturers have been Vincent Persichetti, William Schuman, Norman Dello Joio, Randall Thompson, Leonard Stein, Clifton Williams, Paul Creston, Jean Berger, Robert Russell Bennet, and Morton Subotnik.

Frequently, luminaries active in American jazz spend several days in extensive rehearsal with our jazz workshops and in lecturing to the student body; among them have been Stan Kenton, Dee Barton, Kim Richmond, Count Basie, and Clark Terry.

JOHNSTON GEOLOGY MUSEUM

The Department of Physical Sciences maintains a teaching, research, and public display of geological specimens, predominately from Kansas, in room 106 of Cram Science Hall. The museum, which was rededicated in October of 1998 and named the Johnston Geology Museum, contains the Hamilton Quarry Fossil Assemblage, the Tri-State Mining Display, the Hawkins and Calkins Native American Artifact Collections, and a western Kansas fossil mosasaur, among other items. The museum is open Monday through Friday from 8:00 a.m. to 5:00 p.m. For more information call 620/341-5330 or see www.emporia.edu/earthsci/museum/museum.htm.

SCHMIDT MUSEUM OF NATURAL HISTORY

The College of Liberal Arts and Sciences maintains for teaching, research, and public display, comprehensive collections of extant vertebrates collected throughout the state of Kansas. These are housed in Breukelman Science Hall room 43. A research collection of bird and mammal skins from various parts of the world is maintained in the bird-mammal range and is used primarily by advanced students, visiting scientists, and faculty. The museum is open during normal school hours, Monday through Friday from 8:00 a.m. to 8:00 p.m. Please call 620/341-5311 or visit www.emporia.edu/smnh for more information.

THE PETERSON PLANETARIUM

The Peterson Planetarium, located in room 31 of Cram Science Hall, is a 35 seat instructional and service facility managed by the Department of Physical Sciences. The planetarium was upgraded to a digital full dome projection system in 2012 and contains a state-of-the-art Spitz System 512 projector.

The planetarium, is capable of displaying many astronomical concepts or principles: daily and annual motion of celestial objects, astronomical coordinate systems, and stellar and constellation identification. The planetarium also offers a number of full dome shows that cover a wide range of topics from space science to biology and mathematics. See the web site, www.emporia.edu/physci/planetarium/ for more information and check for scheduled programs or to request a show. A number of free public presentations of general interest are planned for each academic year. There is also a suggested donation for special-request private group programs. Schools are encouraged to schedule free showings.

UNIVERSITY LIBRARIES AND ARCHIVES

The University Libraries and Archives develops its collections and services to meet the curriculum and research needs of the students and faculty. The library owns books, government documents, periodicals, DVD's, videotapes, CD's and other materials for course instruction, research and recreation.

Computers and laptops are available for students to access the online catalog, the Internet, and other electronic resources. Many of these resources can also be accessed off campus. Wireless access is available in the library for students who wish to work from their own personal laptops.

The library offers a relaxed, quiet atmosphere in which to study and read. The library also has the Circleview Coffee Shop which serves hot and cold are available.

University Archives houses the institutional history of ESU since its founding in 1863. Other collections in the archives include the prestigious William Allen White Papers, the May Masee Collection of children's publishing materials, and the Walter M.

Andersen Collection of historical photography. The Archives' online catalog is available at <http://www.emporia.edu/libs/archives/>. Although the Archives is currently closed to the public pending a renovation, all materials in its vast holdings are made available through research service by contacting 620-341-6431 or archives@emporia.edu. The May Masee Gallery (308B White Library) is open by appointment.

The staff of the University Libraries and Archives is always ready to assist you in person, by telephone, or electronically. Please call 620/341-5207 or toll free at 877/613-7323, e-mail libref01@emporia.edu or consult our web page at <http://library.emporia.edu>.

THE WILLIAM ALLEN WHITE CHILDREN'S BOOK AWARDS PROGRAM

The William Allen White Children's Book Awards Program was founded in 1952 by Ruth Garver Gagliardo to honor the memory of one of the state's most distinguished citizens. The major purposes of the awards are to encourage the children of Kansas to read notable books and to aid in the development of a lifetime habit of reading quality literature. Since its establishment, more than 6 million votes have been cast by children of Kansas. The program is partially supported by donor gifts.

UNIVERSITY PUBLICATIONS

THE BEST OF EMPORIA STATE is an anthology of the year's best undergraduate essays published each April by the College of Liberal Arts and Sciences. Begun in 1975, *The Best of ESU* consists of essays submitted by undergraduates to a panel of faculty judges from across campus.

THE BULLETIN, a twice-weekly newspaper, is edited by students, and supported by student fees. The paper is free to ESU students.

THE CORK BOARD, sponsored by The Bulletin, is an announcement format for Recognized Student Organizations' activities which appear in The Bulletin. Entries can be submitted to The Bulletin office on the third floor of the Memorial Union by noon on Wednesdays and Fridays.

E-NEWS IS GOOD NEWS is a quarterly newsletter sent by the President of the ESU Foundation to donors of \$2500 or more to update them on University Advancement and Foundation activities.

FLINT HILLS REVIEW is a national literary journal published annually. *Flint Hills Review* showcases writing by Kansas and Midwestern writers, while also publishing non-regional work of distinction by new and established writers. The journal is edited by students enrolled in EG 588, Seminar in Literary Magazine, a course offered each spring by the Creative Writing Program in the Department of English, Modern Languages, and Journalism.

HERITAGE OF THE GREAT PLAINS is a refereed journal published semiannually by the Center for Great Plains Studies and distributed on a subscription basis.

HONOR ROLL OF DONORS is the Emporia State University Foundation, Inc.'s Annual Report which provides financial data and acknowledges alumni and friends for their contributions to ESU.

HORNET NEWS UPDATE, an electronic newsletter of the Alumni Association, is e-mailed twice a month and provides news about ESU to alumni and friends. The newsletter is provided free to subscribers.

KANSAS SCIENCE TEACHER is an electronic journal published annually by the Science and Mathematics Education Center (SMEC). It is dedicated to the improvement of science and mathematics teaching and the promotion of interest in science and mathematics. The KST includes Lab Notes and Math Musings which provides reviews of science and mathematics materials of interest to K-12 teachers of these subjects and publicizes materials that can be found in the Center. *The current edition and archives are available on-line from a link on the SMEC homepage at www.emporia.edu/scimath.*

THE KANSAS SCHOOL NATURALIST, published by the Department of Biological Sciences, is sent to elementary and high school teachers of general science and biology and to anyone else who requests it to help present science and nature effectively. The first issue was published in October 1954.

QUIVIRA is an annual publication edited by members of the Quivira student literary organization. The journal publishes creative writing and art by ESU students. The club and journal are sponsored by the ESU Creative Writing Program in the Department of English, Modern Languages, and Journalism.

ROUNDTABLE is a newsletter published in May, October, December and February by the Public Affairs and Marketing Office. The newsletter, which is published online, includes faculty and staff accomplishments and campus news. Paper copies are available upon request.

SPOTLIGHT, the magazine for alumni and friends of the university, is published twice a year by the ESU Alumni Association and the ESU Foundation.

THE SUNFLOWER is the yearbook published annually by university students. The book is paid for through student fees and is available to all students at no cost. The Sunflower celebrated its centennial issue in 1999.

THE TEACHERS COLLEGE NEWSLETTER is published three times per year by The Teachers College and the Jones Institute for Educational Excellence. The newsletters are distributed to all Teachers College alumni, focuses on Teachers College faculty, students, and programs and is available online from The Teachers College Web site.

TEACHING HISTORY: A JOURNAL OF METHODS is published by the Department of Social Sciences semiannually to share methods for teaching history to educators who subscribe nationwide and internationally. The first issue was published in 1976. More information can be found at www.emporia.edu/~teaching-history/

THE VIEWBOOK is published annually by the Admissions Office and is distributed to all prospective students.

MASTER TEACHER AWARD

The Kansas Master Teacher Award Program endowed by Bank of America was established by the university in 1953 as a means of annually recognizing seven teachers who have served the profession long and well and who typify the good qualities of the vast corps of earnest and conscientious teachers. Candidates for the awards are typically recommended by local teacher associations and school faculties; self-nominations are also acceptable. A committee reviews all nominations and selects seven teachers to receive the awards. This committee is composed of two Kansas Master Teachers, who serve in the Black Endowed chair position, and representatives from educational organizations such as the Kansas Association of School Boards, Kansas State Board of Education, Kansas Congress of Parents and Teachers, American Association of University Women, Kansas-National Education Association, Kansas Association of Colleges for Teacher Education, Association of Teacher Education Kansas, Student- National Education Association, United School Administrators of Kansas.

ATHLETICS HALL OF HONOR

The Athletics Hall of Honor, located in the Physical Education Building, provides recognition of Emporia State University students, faculty, and friends for athletic achievement, coaching, athletic training, or related areas. An exhibit honoring achievements of over seventy individuals is included in the Hall of Honor.

THE NATIONAL TEACHERS HALL OF FAME

The National Teachers Hall of Fame was founded by university and community officials in 1989 as a tribute to our nation's most important profession-- teaching. The Hall of Fame is committed to drawing the public's attention to exceptional teachers through a museum, and recognition program, which recognizes five of the nation's most outstanding PreK-12 educators each year.

The NTHF is the only facility of its kind dedicated to recognizing career teachers, to preserving and promoting education, and to serving our country by inspiring others to enter the teaching profession. The Hall of Fame has been endorsed by many major professional education organizations. Located on the Emporia State University Campus in Visser Hall, Room 114, the Hall of Fame Museum includes a gallery of honored teachers, a Wall of Fame, a miniature display of classrooms through the centuries, and other glimpses of our educational heritage. The Hall of Fame is open Monday through Friday, 9 a.m. to 5 p.m. and by appointment (closed holidays).

A national selection committee representing endorsing educational organizations, NTHF membership, and corporate America consider nominations from a pool of certified public or non-public teachers, active or retired, who have at least 20 years of full-time experience teaching in grades PreK-12 and a minimum of a bachelors degree. Individuals may obtain a nomination form by visiting the Hall of Fame web site, www.nthf.org, or contacting the office at 620-341-5660.

The National Memorial to Fallen Educators, located at 18th and Merchant, is a project of The NTHF to honor educators who have lost their lives "in the line of duty." An informational kiosk shares the stories of the 129 memorialized educators. Legislation passed both houses of Congress and the President signed the legislation in April, 2018, making this the only national memorial in the state of Kansas.

FACILITIES

ALBERT TAYLOR HALL, named for the fifth president of the university, was constructed as a north wing of Plumb Hall. It is the largest auditorium on the campus, seating 1,277, and provides ample stage and orchestra facilities.

FRANK A. BEACH MUSIC HALL, named in honor of the chair of music (from 1908 until his death in 1935), contains Heath Auditorium with a seating capacity of 370 which is used for concerts and recitals. This facility also houses two organ studios, rehearsal rooms, and classrooms, as well as private studios and practice rooms for individual students. A \$6.6 million renovation and construction of a 20,000-square-foot addition to the north of the original building was completed and dedicated on April 1, 2000 as the **Shepherd Music Center** in honor of R. Hershel and Augusta Shepherd.

BRIGHTON LECTURE HALL, named in honor of Hubert Brighton, former secretary of the Kansas Board of Regents, is an instructional facility contiguous to the Science Hall Complex. The original building was dedicated in 1961. A renovation of Brighton Lecture Hall in 2002 replaced the auditorium with a Math Computer Classroom and a 100-seat lecture hall. These rooms, along with two seminar rooms, comprise this facility.

BUTCHER EDUCATION CENTER was originally named Butcher Children's School in honor of Thomas W. Butcher. Thomas Butcher was a former President of KSTC from 1913 to 1943. The school provided elementary educational classes for children until 2003. The building was extensively remodeled in 2004 and now houses the Center for Early Childhood Education (CECE). The CECE is nationally accredited by the National Association for the Education of Young Children and associated with ESU's Early Childhood program. The Sociology and Anthropology department of the College of Liberal Arts and Sciences is located in north end the Butcher Education Center.

CORA MILLER HALL, located 10 blocks west of ESU's main campus and on the grounds of Newman Regional Health, houses the Newman Division of Nursing. The building was named in honor of Miss Cora A. Miller, R.N., who was the first superintendent of the hospital when it opened in 1922 and who directed the education and practice of the nurses and student nurses. The W.S. and E.C. Jones Nursing Skills Laboratory, the Frances Stout Auditorium, classrooms, faculty offices, two computer laboratories, and the Newman Division of Nursing Library are located in Cora Miller Hall.

CREMER HALL was named for R.C. Cremer, a former dean of business administration, who served the university from 1925 to 1965. Completed in 1964, it houses the School of Business and the Kansas Business Hall of Fame. This building contains fully equipped laboratories and other specialized rooms. The Emporia State Printing Services and Technology and Computing Services are also located here.

THE EARL CENTER has been the home of the Department of Counselor Education since March 1999. Located at 1601 State Street, just two blocks west of the main campus, the Earl Center was dedicated in October 2000 in honor of Emporian Earl Sauder, whose family donated the building to ESU. In addition to offices and classroom space, the Earl Center is the home of the state-of-the-art Counselor Clinic, which provides training for students and service to members of the community. The Earl Center also houses the Jones Institute for Educational Excellence.

THE HUTCHINSON FAMILY PAVILION is a three-tiered complex on the west side of Welch Stadium dedicated in 1997 that gives ESU one of most the state-of-the-art facilities on the NCAA Division II level. The First Floor NationsBank Theatre Box provides indoor seating for all events held at the complex. The Sauder Family President's Box has four luxury boxes, which allow the University to host special guests. The Emporia State Bank Media Center provides work facilities for print and electronic media as well as events staff.

KING HALL, formerly the Humanities Building, was renamed for former President John E. King in the summer of 1981. It was occupied in 1966 and provides facilities for art, speech, and theatre. The Karl C. Bruder Theatre, seating 402, and the Norman R. Eppink Art Gallery and Gilson Memorial Gallery, are features of the building.

THE MEMORIAL UNION stands as a memorial to Emporia State students who died in service to their country and honors all who served. It is the eighth student union building in the U.S. The Union is the heart of campus life for its students outside the classroom. The Center for Student Involvement and the M.U. Bookstore are major elements in the state-of-the-art building. The Hornet Nest residential dining hall and conveniently located retail food venues are part of the Union. The building hosts the ESU Admissions Office, Career Services, and the Office of International Education. Features include the elegant KSTC Colonial Ballroom and the grand Webb Hall which anchor an array of meeting rooms for campus and community use. In 2012, an \$18.5 million renovation was completed in the Memorial Union's 90th year.

THE ABIGAIL MORSE RESIDENCE HALL is a coeducational residential facility overlooking Lake Wooster. It is named for a former dean of women, Abigail Morse.

Take a step back in time with a visit to the **ONE ROOM RURAL SCHOOL**, which is located on the northwest corner of the ESU campus near 18th Avenue and Merchant Street. This classic, cut-stone one-room rural school house is typical of those that filled Kansas at the turn of the century. Donated by Mr. and Mrs. Harvey Kruse in 1966, the 93-year-old building was moved from a site that is now Marion Reservoir in Marion County. The refurbished bell was donated by the Wichita School System. ESU was established as Kansas State Normal School, the state's first public school for training teachers. With its collection of early school furnishings, books, and equipment, the one-room school preserves part of the educational heritage of Kansas. Admission is free, however, advance arrangements are required. Dr. Bill Samuelson, professor of education, presents a program about the history of the school dressed in 19th century fashion. Please call Dr. Samuelson, 341-5773 for an appointment.

THE PHYSICAL EDUCATION BUILDING, completed in 1973, includes five instructional gymnasiums, six handball courts, an Olympic-size pool, an adaptive pool, and specialized rooms for combative activities. Also included are areas for dancing, physical therapy, weight conditioning, human performance study, and adaptive physical activity, as well as classrooms and offices

THE PRESIDENT'S RESIDENCE – A new University House is being designed and construction is anticipated in the fall of 2019.

PRESTON B. PLUMB MEMORIAL HALL is an administration and classroom building. Located in the heart of the campus, the building was named for Preston B. Plumb, who was one of Emporia's founders and a United States Senator from Kansas. Extensive renovation was completed in 1993.

ROOSEVELT HALL was originally constructed as a laboratory high school, Roosevelt High School. The College of Liberal Arts and Sciences inhabited the building in 1970 when Roosevelt's 90 students were slowly phased into the Emporia school system. The building was renamed Roosevelt Hall in 1996 in memory of Roosevelt High School and its alumni, who inhabited the building from 1953-70. The building has been converted for general classroom use and the offices for the Department of Modern Languages and Literatures, and the Department of Communication and Theatre. In 2002, the former gymnasium was renovated into two spaces: The Ronald Q. Frederickson Theatre, an intimate black box theatre with flexible seating configuration that seats around 120, and the Inez Friesen Rehearsal Studio, used for theatre rehearsals and performance classes.

THE SAUDER ALUMNI CENTER was constructed in 1991 as a tribute to the more than 47,000 Emporia State University alumni. The building was funded completely by private donations, including a major gift to name the building from Earl Sauder, an Emporia businessman, to honor his wife. The Sauder Alumni Center houses the University Advancement offices, including the ESU Foundation and the Alumni Association. It also is the location for major alumni functions and reunions on campus. The Sauder Alumni Center is located at 1500 Highland Street.

THE SCIENCE HALL COMPLEX includes S. Winston Cram Hall, built in 1959, and John W. Breukelman Hall, which was completed in 1968. These facilities were named for retired department chairs. The Department of Biological Sciences, Department of Mathematics and Economics, and Departments of Physical Sciences also are located in this complex. The Schmidt Natural History Museum is housed in the basement area of Breukelman Hall, the Johnston Geology Museum is located on the first floor of Cram Hall, and the Peterson Planetarium is in the basement of Cram Hall.

STORMONT MAINTENANCE CENTER houses shops, an automobile servicing area, storage, and office space for the university facilities department of the university. The building was named for Riley Stormont, who served as superintendent of the Physical Plant from 1954 through 1972.

STUDENT RECREATION CENTER opened in February of 2002. The 45,000-square-foot center features a 28,000-square-foot open recreation area with a three-lane jog/walk track around its exterior. The free weight and multipurpose exercise areas are equipped with state of the art cardiovascular, variable resistance, and free weight equipment. The cardiovascular exercise area is utilized to provide activities such as cardio kickboxing, hip-hop dance, body sculpting, and fat burning and toning. The commons area provides a social area with tables and chairs, two 70-inch big screen televisions suspended from the ceiling, and a state of the art sound system. The university also has an Olympic-sized swimming pool, racquetball courts, and locker rooms located in the nearby Physical Education Building. Outdoor facilities include softball fields, tennis courts, track, multipurpose green areas, par exercise course, King and Wilson lakes, soccer fields, flag football fields, and a rugby field.

TRUSLER SPORTS COMPLEX, located northeast of the Emporia State University campus with easy access to I-35 and Burlingame Road, is a comprehensive sports facility with three softball fields and a baseball diamond arranged in a quad configuration. In the center is a multipurpose building housing offices, concession stand, press boxes, restrooms, and storage. The baseball diamond is named in honor of former President Robert E. Glennen. The softball diamonds are named in honor of three Trusler Board Members, Joe Cannon, Tom Thomas, and Mike Turnbull. The Trusler Foundation donated more than \$700,000 toward completion of the complex. Trusler was the site of the 1996 NCAA Division II Women's Softball Championships. The Hanna Clubhouse was constructed in 2006 and houses the varsity baseball and softball locker rooms on the ground level. The upper level provides a viewing area and offices.

TOWERS RESIDENTIAL COMPLEX was built in three stages during the period from 1959 to 1971. The first and second units are known as Singular-Trusler Hall, named in honor of a former registration officer and a former faculty member. The area provides space for 800 residents, two to a room. The newest unit is designed to be coeducational and may accommodate families during summer terms or workshops. Social, recreational, and study facilities are provided throughout. North and South Tower renovations were completed in 2007 to replace mechanical and electrical systems. Remodeling provided newly designed student rooms, lounges and common spaces, and restrooms/shower facilities.

VISSER HALL, named for former President John E. Visser, was completed in 1979. It provides classrooms, offices, and laboratories for The Teachers College and facilities for Information Technology. In 1995, the atrium was named in honor of former Teachers College Dean Jack Skillett. Visser Hall also houses the National Teachers Hall of Fame.

WELCH STADIUM, named in honor of Francis G. "Fran" Welch, long-time coach and athletic director at ESU, is located just north of Lake Wooster. Approximately 7,000 spectators can be accommodated in the stadium. The stadium has a new three-story, state-of-the-art pavilion, which includes a press facility, private suites, and indoor theatre seating. The stadium is the home of the ESU football team, the spring commencement, the state high school football championships, and numerous other events. (Also see the Zola Witten Track.)

WILLIAM ALLEN WHITE LIBRARY, completed in 1951 and named in memory of William Allen White, noted author and editor of the Emporia Gazette, houses the main library collections and library services of the university. Also contained in the building are the offices, classrooms, and library of the School of Library and Information Management and the Mary White Room (children's library). Books, original manuscripts, and personal belongings of Mr. White are located on the ground floor, along with other special collections. The May Masee Collection, which includes manuscripts, books, and original art work illustrating creative publishing for children, is located on the third floor. An addition, completed in 1970, doubled the size of the library.

THE ZOLA WITTEN TRACK in Welch Stadium, site of the 1995 and 1999 NCAA Division II Track and Field Championships, is the result of a \$350,000 renovation project completed in the fall of 1993. The track is named in honor of the mother of former ESU professor, Dr. Gerald Witten (BSE '56, MS '58). Witten donated \$50,000 to the renovation campaign and served on the steering committee for the project. The facility is open to the public during regular hours (except during varsity practices, physical education classes, or meets) for recreational use. The track features an all-weather polyurethane surface, eight lanes, and is handicap-accessible. Regulations and restrictions regarding track usage are posted near the entrance on the northeast corner of the stadium.

The **COUGHLEN NATURAL AREA**, consists of 44 acres of tall-grass prairie located nine miles southwest of Emporia along the Kansas Turnpike. Undisturbed prairie, old fields in various stages of succession, a spring, a stream, and a small impoundment makes this a useful area for class field trips and for student research.

READING WOODS, acquired by the university in 1971, is the western most penetration of a segment of the eastern deciduous forest biome in Kansas; it is located about 15 miles northeast of Emporia (2 miles west and 1 2 mile north of Reading). Because of its unique plant and animal life, ecology and geology, it is kept as a preserve in a relatively undisturbed state. University use of this land is limited to class and research studies by faculty members and students through approval by the Department of Biological Sciences.

THE F.B. AND RENA G. ROSS NATURAL HISTORY RESERVATION is a 200-acre outdoor classroom-laboratory located approximately 14 miles northwest of the university campus. The area was deeded to the university in 1961 by Mr. and Mrs. Felix B. Ross of Emporia. Primary functions of the reservation are to provide an area for education and research in the sciences and to preserve, in a natural state, a segment of the tall grass prairie community. In addition to the 200 acres deeded to the state, the Ross's have made available on a lease basis, adjoining tracts totaling 840 acres. The reservation contains a variety of habitat types among which are virgin tall grass prairie, woods, old fields in various stages of succession, a prairie stream, a small lake, and a large pond. Physical facilities include two large classroom-laboratory buildings, a shelter house, small experimental ponds, a weather station, many animal enclosures, a 40-foot observation tower, and wildlife feed patches. In addition to the classes regularly scheduled at the reservation, numerous undergraduate and graduate research projects are in progress in the area; each spring and summer hundreds of elementary and secondary students, scouts, and adult groups take guided nature tours along the reservation nature trail.

WILSON PARK, is located on land northeast of the main campus buildings. The grounds are used, according to the wishes of the donors, for recreational purposes. This 4 3/4 acre tract was donated in 1937 by Dr. Clyde Wilson and his children, in memory of Dr. Wilson's wife, Laura Kreamer Wilson.

SCHOOL OF BUSINESS

Ed Bashaw, Dean

Marc Fusaro, Associate Dean

<http://www.emporia.edu/business>

The School of Business consists of the following departments:

**Accounting, Information Systems, and Finance
Business Administration**

E-Mail: bizhornet@emporia.edu

This section of the catalog includes school and departmental information, explanations of the various degrees and programs.

COMPOSITION AND ORGANIZATION

The school is composed of two departments. Each department is under the direct supervision of the chair. All questions concerning any phase of department policies, procedures, or programs should be directed to the chair. The chair involves faculty and students in the planning and operation of the department. Advisory committees composed of distinguished alumni, successful business persons, and friends of the university are also utilized in the continuous improvement of procedures, equipment, and programs in the school.

School of Business Facilities encompass all five floors of Cremer Hall. Instructional programs include the use of the latest computer equipment and software in the Richel Business Computer Laboratory, the Thomas Learning Space (CH 416), and the computing classroom (CH 320).

Student organizations and groups include: Beta Alpha Psi- a national honor society for accounting, finance, and information systems majors; Beta Gamma Sigma – a national honor society for business students at AACSB-International accredited institutions; Marketing Club; Information Systems Club; and Phi Beta Lambda.

PROGRAMS

The School of Business offers undergraduate and graduate programs of study which lead to the degrees outlined below. A description of these programs, along with requirements for each, can be found in the course sections of this catalog. The School's Bachelor of Science in Business, Master of Accountancy, Master of Science in Information Technology, and Master of Business Administration degrees are accredited by AACSB International.

Only students who are pursuing a Bachelor of Science in Business degree or a Bachelor of Science in Education, Business Education Teaching Field, are permitted to take more than 30 credit hours of business courses. This limitation applies to a non- business degree student even though the student is pursuing a minor in the School of Business. For more information, students should visit with their advisor.

Baccalaureate Level Programs

Bachelor of Science in Business with majors in:

Accounting

Business Administration

Accounting Services (Concentration)

E-Commerce (Concentration)

Entrepreneurship (Concentration)

Financial Services (Concentration)

Human Resource Management (Concentration)

International Business (Concentration)

Marketing Communication (Concentration)

Sales Management (Concentration)

Business Data Analytics

Information Systems

Management

Marketing

Bachelor of Science in Education (Secondary)

Business Education teaching field

Bachelor of Science in Computer Science

BACHELOR OF SCIENCE IN BUSINESS

In the School of Business, theories acquired in the classroom are tested via internships, computer-based business decision simulations, case studies, seminars, and discussions with business practitioners, faculty, and students.

These sections outline each of the majors offered for the Bachelor of Science in Business along with the available minors and concentrations. Each major requires 24 hours of coursework for that major, except for the accounting major which requires 23 hours. Required courses and available electives are available in the appropriate major section.

Degree Pattern for All Majors:

General Education	48-53 hours
Business Core Requirements	42 hours
Major Requirements	24 hours
Electives	<u>As needed</u> 120 hours

General Requirements for the **Bachelor of Science in Business** degree are as follows:

1. A student earning a Bachelor of Science in Business degree must have a major. A major consists of approximately 60 hours of business courses. An outline for suggested sequences of courses and specific requirements may be obtained from the BizHornet Center or the office of the chair.
2. The student must complete the university's general education program (48-53 hours).
3. The student must complete at least 120 semester hours of credit in courses numbered 100 or above. The 120 semester hours must include at least 45 hours of course work numbered 300 or above.
4. The student must complete **from Emporia State University** at least 50 percent of the business credit hours required for the degree. At least 15 of these credit hours must be in the student's major.
5. The student must meet the admission requirements and be admitted to the School of Business. (See School of Business admission requirements in the School of Business section.)
6. For students entering any college for the first time as a full-time student in the Fall of 2008 and thereafter, a minimum 2.35 cumulative grade-point average is required.
7. For students admitted to the School of Business in the fall of 2008 and thereafter a minimum cumulative grade-point average of 2.35 is required in the business core curriculum.

Admission to the School of Business

Admission to the School of Business is required before enrolling in courses numbered 300 or above in the Bachelor of Science in Business disciplines (AC, BC, BU, FI, IS, MG, and MK) for students pursuing a Bachelor of Science in Business or a Bachelor of Science in Education, Business Education Teaching Field. If a student is placed on academic probation or in required withdrawal status, the student's admission to the School of Business will be rescinded.

Admission Requirements:

1. Cumulative grade-point average of 2.35, effective for students entering ESU, another four-year institution, or a community college for the first time as a full-time student in the Fall of 2008 and thereafter.

2. Completion of 51 hours.

3. Completion of the following courses:

AC 223	Financial Accounting
BC 103	Principles of Economics I
BU 102*	Business Dynamics
EG 101	Composition I
EG 102	Composition II
IS 113	Intro to Microcomputer Applications
MA 110	College Algebra

*Based on a transcript review students may have BU 102 waived by the Chair. Transfer students who have BU 102 waived must take an additional 3 credit hours of 300 level business electives.

4. It is strongly recommended that the following courses be completed prior to admission to the School of Business.

BC 104	Principles of Economics II
IS 213	Management Information Systems
SP 101	Public Speaking

If these courses are not completed prior to admission, the student must enroll in these courses the first semester after admission and every semester thereafter (including summer semesters) until these courses are successfully completed.

Business Majors Online

The School of Business offers a major in business administration in the Bachelor of Science in Business degree program fully online. Students may complete all required courses without coming to Emporia. These students must meet all Emporia State University requirements. Distance students have access to placement services, advising, financial aid, and other university services.

Business Core

The common business core curriculum includes 15 courses (43 credit hours) and is required for all majors in the Bachelor of Science in Business degree. The business core curriculum is as follows:

Business Core Requirements (43 hours):

AC 223	Financial Accounting	3 hours
AC 233	Managerial Accounting	3 hours
BC 104	Principles of Economics II	3 hours
BU 102	Business Dynamics	3 hours
BU 202	Business Communication	3 hours
BU 255	Business Statistics	3 hours
BU 302	Business Professionalism***	1 hours
BU 353*	Principles of Business Law	3 hours
FI 301*	Financial Management	3 hours
IS 213	Mgmt Information Systems Concepts	3 hours
IS 253	Introduction to Decision Analysis	3 hours
MG 301*	Principles of Management	3 hours
MG 423*	Operations Management	3 hours
MG 473*	Strategic Management	3 hours
MK 301*	Principles of Marketing	3 hours

*Course requires a minimum of a "C" grade to fulfill BSB and major/minor program requirements.

**Concurrent enrollment required in BU 099-Major Field Test in Business (No Credit).

***In the case that the requirements for a major in the business program has a professionalism course, that course shall be substituted for BU 302.

Courses Offered by the School of Business

Prerequisite courses must be completed prior to enrollment in all business courses. Students other than those meeting the school's admission requirements, must have achieved junior status (60 credit hours) prior to enrolling in classes numbered 300 and above in the School of Business.

Double Counting of Hours

Business majors may count no more than six (6) hours of non-core, upper-level business courses on two different majors. Business majors may count no more than three (3) hours of non-core, upper-level business course on a minor/concentration which is in addition to a major. Double counting of a course is allowed on either a second major or a minor/concentration but not both.

Transfer Students

Each student who receives a Bachelor of Science in Business degree must complete from Emporia State University at least 50 percent of the business credit hours required for the degree. At least 15 of these credit hours must be in the student's major.

Any transfer student receiving a minor in the school must include a minimum of 9 credit hours of upper-level courses in the minor area from Emporia State.

The following general policy applies to the acceptance of credits earned at accredited community colleges toward majors and minors offered by the school.

Students entering a community college and subsequently transferring into the School of Business will be allowed to transfer the equivalent of the following courses toward a School of Business major or minor:

AC 223	Financial Accounting	3 hours
AC 233	Managerial Accounting	3 hours
BU 255	Business Statistics	3 hours
BC 103	Principles of Economics I	3 hours
BC 104	Principles of Economics II	3 hours
IS 113	Intro to Microcomputer Applications	3 hours
IS 213	Mgmt Information Systems Concepts	3 hours
IS 253	Introduction to Decision Analysis	3 hours
MA 110	College Algebra	3 hours
SP 101	Public Speaking	3 hours

Other Courses Numbered 100-299 at ESU

Courses from community colleges similar to other business courses numbered from 100-299 at ESU may be accepted as equivalent courses, pending a review of course information from the community college.

Courses Numbered 300-499 at ESU

Up to 6 credit hours of business courses from community colleges similar to courses numbered from 300-499 at ESU **may** be accepted as equivalent to ESU business courses, upon successful completion of a validating procedure. Validation can be accomplished by earning a passing score on an examination prepared and graded by ESU faculty from the appropriate subject matter. Upon validation, appropriate documentation will be placed in the student's advisement folder with a copy to remain in the department office. Degree Analysis will be notified that the validated course is to be accepted as equivalent to an ESU course. If validation of these courses is not achieved, the courses will be acceptable for elective credit at ESU.

Courses Numbered 500 and above at ESU

Courses numbered 500 and above in ESU's School of Business are senior and graduate-level courses and are not equated to community college courses.

Concurrent Enrollment – Transient Students

Students actively enrolled at ESU are discouraged from taking courses concurrently at other institutions. Any ESU student desiring to take business courses as a “transient student” from another college or university must have the course approved in **advance** on an officially signed “Prior Approval Form”. Students will not be allowed to enroll in overloads through schedules at more than one institution without the normal overload approval process being completed. Courses taken as a transient student not approved in advance will be accepted only as elective credit.

BACHELOR OF SCIENCE IN EDUCATION

Business Teaching Field

See detailed information about this program in the Bachelor of Science in Education section.

BACHELOR OF SCIENCE COMPUTER SCIENCE

This program is designed for students who desire a major in computer science based on a sound foundation in mathematics. The Computer Science major is designed to prepare the student for graduate work as well as career opportunities in industry, education, business, and government. See detailed information about this program in the Bachelor of Science Computer Science section. A minor in Computer Science is also available.

MINORS IN THE SCHOOL OF BUSINESS

A student may complete a minor in accounting, data security, information systems, management, marketing, entrepreneurship, integrated marketing communications or general business. The general business minor is available for non-business majors only. A minor must include a minimum of 9 credit hours in upper-level courses from Emporia State in the minor area.

Students other than those pursuing a Bachelor of Science in Business or a Bachelor of Science in Education (secondary) with a Business teaching field are restricted to no more than 30 hours of business courses. This limitation applies to a non-business degree student even though the student is pursuing a minor in the School of Business. For more information, students should visit with an academic advisor in the BizHornet Center (CH 128), or by calling 620/341-5523.

See the general education requirements in the General Education section of this catalog.

MASTER LEVEL PROGRAMS

Master of Accountancy

The Master of Accountancy program is offered to prepare students for the 150-hour requirement to sit for the CPA exam in Kansas as well as other states. The program is designed for careers in professional accounting in the areas of government, management, and public accounting. For students with an undergraduate background in accounting, the degree typically involves 30 graduate hours. Classes are offered fully online and program has been designed so students can complete the program in one year, see: www.emporia.edu/business/programs/master-of-accountancy/

Master of Business Administration

The Master of Business Administration (MBA) degree provides advanced education in business administration to those seeking advancement to middle and upper managerial and executive positions. For students who have an undergraduate background in business, the degree usually involves 33 graduate hours. Concentrations in accounting, marketing, and information systems are available as options for MBA students. The accounting concentration within the MBA is available to assist accounting majors in meeting the 150 credit-hour CPA examination requirement and the MBA requirements at the same time. The information systems concentration prepares graduates for positions requiring significant information systems knowledge. The marketing concentration prepares graduate for higher level marketing roles in business.

The School has been authorized to offer the MBA on campus and the MBA and concentrations online. For more information about the MBA see: www.emporia.edu/business/programs/mba.

Master of Science in Information Technology

The 36 hour MSIT program includes 24 hours of required courses covering broad technological areas, such as database management, cloud computing, electronic commerce, and enterprise architecture. The MSIT master program is a STEM program and organized in such a manner so that students will be exposed to all areas of information technology. The degree is aimed at providing a comprehensive perspective of the technology profession, and as such, will prepare students for the technological challenges in today's industries.

INTERNSHIP PROGRAMS

An internship involves the student in a business position for one or more academic terms. The work is directly related to the student's major course of study. The student intern may receive a salary from the employing firm or organization and academic credit. The internship provides an opportunity to apply the theory, practice, and strategies acquired in course work and to gain first-hand knowledge of business practices.

CONSULTING SERVICES

The school will make every effort to provide personnel for workshops, institutes, conferences and other consulting services to educational, business, industry, community and social organizations in our region of Kansas. Requests for such services may be made to the Center for Business and Economic Activity or dean of the School of Business.

OUTREACH ACTIVITIES

The School of Business houses a number of centers that provide outreach services to the public. These centers are:

Center for Business and Economic Development

The Center for Business and Economic Development provides regional economic reports, research, technical assistance, and workforce development services using faculty, staff, students, and community resources to support and develop entrepreneurship, family businesses, and small- and medium-sized business (SMEs) as well as other organizations in the extended community of the University. The Center also coordinates activities related to government grants, foundations, and other philanthropic entities and activities. See the Center website:

www.emporia.edu/business/community/cbed/

Small Business Development Center

The Small Business Development Center (SBDC) offers free, confidential advising services to existing and potential small business owners. The SBDC also sponsors low-cost training programs, maintains a resource library, and provides referrals to other small business service providers. www.emporia.edu/sbdc/

Kansas Business Hall of Fame

The Kansas Business Hall of Fame recognizes Kansans who have distinguished themselves through significant accomplishments in business, leadership roles, philanthropy, and contributions to society. Our purpose is to preserve the rich business history of Kansas and to educate the people of Kansas about business History. New inductees are announced each year at the annual meeting of Team Kansas each June. The Hall of Fame website is www.ksbhf.org

Koch Center for Leadership and Ethics

The Koch Center for Leadership and Ethics humanizes business education by introducing students and the public to principled entrepreneurship and the moral free enterprise system necessary to support it. The Center promotes the principles of individual liberty and diversity, the rule of law, and economic freedom at Emporia State University and within the surrounding community. The Center educates students and the public about:

- The necessary conditions for principled entrepreneurship to function;
- The moral and ethical nature of mutually beneficial commerce;
- The inherently social nature of business; and
- The vital relationship between principled entrepreneurship and dignified human flourishing.

SCHOLARSHIPS

Many individuals, businesses and organizations have provided endowed scholarship funds for School of Business students.

DEPARTMENT OF ACCOUNTING, INFORMATION SYSTEMS, AND FINANCE

Liz Diers, Chair

Faculty:

Professors:

M. George Durler
John Rich

Associate Professors:

Larry Falcetto
Daniel Haskin
Tanja Steigner

Assistant Professors:

Juan Chavarria
Liz Diers
Lidan Fan
Javier Flores
Geethalakshmi Shivanapura Lakshmikanth
Daehyun Moon
M. Sajedur Rahman
William Senn
Douglass Smith
Lei Wen
Qiancheng (James) Zheng

BACHELOR OF SCIENCE IN BUSINESS

MAJORS

ACCOUNTING

The accounting program is designed to prepare students for careers in public, private or governmental accounting. An accounting internship program is an optional experience available to majors as well.

<http://www.emporia.edu/business/programs/accounting/>

Accounting Courses Required (23 hours):

AC 302 Prof Dev & Ldrshp for Acctng Majors	1 hour
AC 304 Intermediate Accounting I	4 hours
AC 313 Intermediate Accounting II	3 hours
AC 333 Cost Accounting	3 hours
AC 353 Accounting Information Systems	3 hours
AC 413 Auditing	3 hours
AC 423 Federal Income Tax Accounting	3 hours
AC 563 Advanced Financial Accounting	3 hours

Suggested Electives:

AC 523 Income Taxation of Corporations and Other Entities	3 hours
AC 533 Government and Not-For-Profit Accounting	3 hours
BU 573 Law of Commerce	3 hours

Once enrolled at Emporia State University, any accounting courses transferred in to fulfill accounting major requirements must be from an AACSB-International accredited institution and be approved in advance by the department chair.

BUSINESS DATA ANALYTICS

The Bachelor of Science in Business Data Analytics (BDA) is an application-based program that will provide students with a broad education in business analytics including data acquisition, data management, data transformation, data analysis, and data presentation. The ubiquitousness of data demands for highly-skilled and technical personnel who can conceive ways to analyze data to support competitive business decisions. The BDA is designed to meet the rapidly growing industry needs for such highly skilled data analysts. In this program, students learn to deal with the growing amount of data from a variety of disciplines and transform into usable information for the use in business decision-making. The program provides conceptual and hands-on training in database concepts, data mining, data query, data processing, statistical analysis, and forecasting. Students gain valuable skills in data management technologies and data analyzing techniques for descriptive, prescriptive, and predictive analytics involving high volumes of structured and unstructured data. In addition, students learn to deal with big data sets originating in a variety of disciplines which require specialized techniques to store, manage and transform big data into usable information for making timely business decisions.

Required Courses (18 hours):

IS 333 Business Computer Systems Analysis	3 hours
IS 413 Database Concepts	3 hours
IS 453 Business Intelligence	3 hours
IS 504 Data Mining	3 hours
IS 514 Big Data Analytics	3 hours
IS 534 Data-driven Decision Making	3 hours

Select 2 courses from the following (6 hours):

IS 343 Web-Based Business Applications	3 hours
IS 393 Advanced Web-Based Applications	3 hours
IS 433 Operating Systems Concepts	3 hours
IS 473 Telecommunications & Networking	3 hours
IS 524 Cloud Computing	3 hours
CS 564 Network Defense and Countermeasures	3 hours
CS 355 UNIX	3 hours
CS 565 Computer Forensics	3 hours

INFORMATION SYSTEMS

The information systems major is designed to prepare students for careers in business and industry where utilization of information systems is a major function. This program has a solid foundation in the business curriculum and emphasizes computer systems and programming. www.emporia.edu/business/programs/is/

A. Required IS Courses (18 hours):

IS 333 Business Computer Systems Analysis	3 hours
IS 343 Adv. Web-Based Business Applications	3 hours
IS 413 Data Base Concepts	3 hours
IS 453 Business Intelligence	3 hours
IS 473 Telecommunications and Networking Applications	3 hours
IS 493 Information Systems Design & Project Management	3 hours

B. Select 2 courses from the following (6 hours):

IS 373	Principles of Electronic Commerce	3 hours
IS 393	Advanced Web-Based Applications	3 hours
IS 423	Modern Language Programming	3 hours
IS 463	Enterprise Systems	3 hours

MINORS

Students other than those pursuing a Bachelor of Science in Business or a Bachelor of Science in Education (secondary) with a teaching field in Business Education are restricted to no more than 30 hours of business courses. This limitation applies to a non-business degree student even though the student is pursuing a minor in the School of Business. For more information, students should visit with their advisor.

ACCOUNTING MINOR

The accounting minor is awarded to students majoring in some area other than accounting who complete the 16 hours required.

Required Courses (13 hours):

AC 223	Financial Accounting	3 hours
AC 233	Managerial Accounting	3 hours
AC 304	Intermediate Accounting I	4 hours
AC 333	Cost Accounting	3 hours

At least one of the following courses (3 hours):

AC 313	Intermediate Accounting II	3 hours
AC 353	Accounting Information Systems	3 hours
AC 423	Federal Income Tax Accounting I	3 hours

Note: Any transfer student receiving this minor must have at least 9 credit hours of upper-level accounting courses at ESU.

DATA SECURITY MINOR

The data security minor equips students with a hands-on experience preparing them for a career in cybersecurity. The degree provides a comprehensive coverage of the field, ranging from hacking and defense techniques, through management of information security, to compliance with laws and regulations. The data security minor is available to all students who complete the 18 hours required

Required Courses (18 hours):

IS 253	Introduction to Decision Analysis (IS 113)	3 hours
OR		
CS 260	Programming & Problem Solving (MA 110 or CS 220)	3 hours
CS 355	UNIX (CS 220)	3 hours
IS 473	Telecommunications and Networking (IS 213)	3 hours
CS 564	Network Defense and Countermeasures	3 hours
CS 565	Computer Forensics	3 hours
CS 569	Data Security Practicum	<u>3 hours</u>
		18 hours

INFORMATION SYSTEMS MINOR

The information systems (IS) minor is awarded to students majoring in some area other than IS who complete the 15 hours required.

Required Courses (9 hours):

IS 113	Intro to Microcomputer Applications	3 hours
IS 213	Mgmt Information Systems Concepts	3 hours
IS 333	Business Computer Systems Analysis	3 hours

Select 2 courses from the following (6 hours):

IS 343	Web-Based Business Applications	3 hours
IS 373	Principles of Electronic Commerce	3 hours
IS 393	Advanced Web-Based Applications	3 hours
IS 413	Data Base Concepts	3 hours
IS 453	Business Intelligence	3 hours
IS 463	Enterprise Systems	3 hours
IS 473	Telecom and Networking Applications	3 hours

Note: Any transfer student receiving this minor must have at least 9 credit hours of upper-level IS courses at ESU.

**BACHELOR OF SCIENCE
COMPUTER SCIENCE**

This program is designed for students who desire a major in computer science based on a sound foundation in mathematics. It is designed to prepare the student for graduate work as well as career opportunities in industry, education, business, and government.

See the general education requirements in the General Education section of this catalog.

Computer Science Core (33 hours):

CS 260	Programming & Problem Solving	3 hours
CS 340	Algorithms & Data Structures I	3 hours
CS 341	Principles of Computer Organization	3 hours
CS 360	Programming & Problem Solving II	3 hours
CS 444	Database Organization OR	
IS 413	Database Concepts	3 hours
CS 433	Operating Systems	3 hours
CS 501	Advanced Computer Programming	3 hours
CS 552	Computer Science Capstone	3 hours
CS 561	System Programming	3 hours
IS 333	System Analysis & Design	3 hours
IS 473	Telecommunication and Networking	3 hours

Mathematics (14 hours):

MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
MA 380	Probability and Statistics	3 hours
MA 542	Discrete Structures	3 hours

*CS 220 *Introduction to Computer Science* is recommended as General Education course for CS Majors.

NOTE: MA 161- Calculus I is an option in the General Education hours. If MA 161 is not completed as part of General Education, it must be completed as part of the Computer Science Core increasing the required hours from 41 to 46. A student not sufficiently prepared for MA 161 may be required to take MA 110 and MA 112 first.

Electives (18 hours):**Data Analytics and Artificial Intelligence**

IS 504	Data Mining	3 hours
IS 514	Big Data Analytics	3 hours
IS 524	Cloud Computing	3 hours
IS 534	Data-driven Decision Making	3 hours
CS 523	Artificial Intelligence	3 hours

Computer Security

CS 564	Network Defense and Countermeasures	3 hours
CS 565	Computer Forensics	3 hours
CS 569	Data Security Practicum	3 hours

Advanced Programming

IS 343	Web-based Business Applications	3 hours
IS 393	Advanced Web-based Applications	3 hours
CS 575	Compiler Design	3 hours
CS 576	File Structures	3 hours

Additional Electives

CS 386	Internship in CS	3 hours
CS 480	Independent Study Computer Science	3 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 335	Differential Equations I	3 hours
MA 363	Calculus III	3 hours
MA 425	Abstract Algebra	3 hours
MA 532	Mathematical Statistics I	3 hours

COMPUTER SCIENCE MINOR

A minor in computer science consists of 21 semester hours. Eighteen of these hours are specified, and the remaining 3 hours are selected from an approved list of computer science electives.

Required Courses (18 hours):

CS 260	Programming & Problem Solving	3 hours
CS 340	Algorithms & Data Structures I	3 hours
CS 341	Principles of Computer Organization	3 hours
CS 561	System Programming	3 hours
IS 333	Business Computer Systems Analysis	3 hours
IS 413	Database Concepts	3 hours

Select one Computer Science elective (3 hours):

CS 315	Java Programming	3 hours
CS 355	UNIX	3 hours
CS 501	Advanced Computer Programming	3 hours
CS 523	Artificial Intelligence	3 hours
MA 542	Discrete Structures	3 hours
CS 552	Principles of Software Engineering	3 hours
CS 557	Operating Systems	3 hours
CS 570	Theory of Computation	3 hours

Total Hours **21 hours**

CS 220 Introduction to Computer Science is recommended as General Education course for CS majors.

See Course Listing for course descriptions.

DEPARTMENT OF BUSINESS ADMINISTRATION

BACHELOR OF SCIENCE IN BUSINESS

MAJORS

BUSINESS ADMINISTRATION

The business administration major provides the student with a broad preparation in business including accounting, business law, e-commerce, economics, entrepreneurship, finance, information systems, international business, management, marketing, marketing communications, quantitative methods and sales management. This major produces a business generalist with the flexibility to qualify for entry-level employment in corporations, small businesses, non-profit institutions, and government.

<http://www.emporia.edu/business/programs/busadmin/major.html>

For the Business Administration major, the student, with the active advice and consent of an advisor, selects a tentative list of courses to meet the 24-credit-hour requirement to create a coherent academic program.

REQUIRED COURSES - choose one from each of the four (4) areas. (12 hours)

- | | | | |
|----|--------|-------------------------------------|---------|
| 1. | MG 343 | Supervisory Management | 3 hours |
| | MG 443 | Organizational Behavior | 3 hours |
| | MK 462 | Integrated Marketing Communications | 3 hours |
| 2. | BC 450 | Concepts of International Economics | 3 hours |
| | FI 433 | Concepts in International Finance | 3 hours |
| 3. | BU 543 | Advanced Business Communications | 3 hours |

- | | | | |
|----|--------|------------------------------------|---------|
| 4. | BU 528 | Internship in Business | 3 hours |
| | MG 410 | Internship in Management | 3 hours |
| | MK 410 | Internship in Marketing | 3 hours |
| | IS 453 | Business Intelligence | 3 hours |
| | MG 520 | Business Simulation | 3 hours |
| | MG 553 | Entrepreneurial Management | 3 hours |
| | MK 510 | Marketing Analytics | 3 hours |
| | | Qualifying Study Abroad Experience | 3 hours |

REQUIRED ELECTIVES – choose Option A or Option B (12 hours)

OPTION A: With the advice and consent of the advisor, select one course (300 and above) from four of the seven business disciplines-(AC, BC, BU, FI, IS, MG, MK).

OPTION B: Select one of the Business Administration Concentrations

Accounting Services	E-Commerce
Entrepreneurship	Financial Services
Human Resource Management	International Business
Marketing Communications	Sales Management

*No course can be counted more than once in the 24 credit hours required for the Business Administration Major.

MANAGEMENT

The management program draws knowledge from the areas of general business, information systems and economics. Students are exposed to the foundations of supervision, personnel and human resource management, operations, organizational behavior, small business management and international issues. Students qualify for entry-level positions in general management, human resource management and various other fields, in both profit and non-profit organizations and government agencies.

Management Major Requirements (24 hours):*

- | | | |
|---------|---------------------------|---------|
| MG 433* | International Management | 3 hours |
| MG 443* | Organizational Behavior | 3 hours |
| MG 444* | Human Resource Management | 3 hours |

Other Business Courses:

Select a minimum of 15 hours from the following:

- | | | |
|---------|------------------------------------|---------|
| BE 540* | Electronic Communications | 3 hours |
| BU 573* | Law of Commerce | 3 hours |
| BU 540* | Business & Society | 3 hours |
| FI 303* | Personal Financial Planning | 3 hours |
| FI 313* | Personal Investing | 3 hours |
| IS 453* | Business Intelligence | 3 hours |
| MG 305* | Special Topics in Management | 3 hours |
| MG 343* | Supervisory Management | 3 hours |
| MG 370* | Small Business Management | 3 hours |
| MG 459* | Compensation and Benefits | 3 hours |
| MG 505* | Special Topics in Management | 3 hours |
| MG 520* | Business Simulation | 3 hours |
| MG 553* | Entrepreneurial Management | 3 hours |
| MK 451* | Consumer Behavior | 3 hours |
| MK 462* | Integrated Marketing Communication | 3 hours |
| MK 521* | Services Marketing | 3 hours |
| | Other Management Related Courses | 3 hours |

*All management major program courses must be completed with a minimum of a “C” grade to fulfill management major requirements.

MARKETING

The marketing major combines a business foundation with specific preparation for a career in marketing. With the selection of electives, students can prepare for an entry-level position in such areas as advertising, marketing research, physical distribution, merchandising, international marketing, marketing management, and sales.

Marketing Major Requirements (24 hours):

Required Courses:

MK 451*	Consumer Behavior	3 hours
MK 453*	Marketing Research	3 hours
MK 462*	Integrated Marketing Communication	3 hours
MK 464*	Marketing Management	3 hours
MK 530*	Electronic Marketing	3 hours

Other Business Courses:

Select a minimum of 9 hours from the following:

MK 430*	Retail Management	3 hours
MK 433*	International Marketing	3 hours
MK 455*	Personal Selling	3 hours
MK 460*	Sales Management	3 hours
MK 510*	Marketing Analytics	3 hours
MK 521*	Services Marketing	3 hours
MG 370*	Small Business Management	3 hours
FI 303*	Personal Financial Planning	3 hours
IS 373*	Principles of Electronic Commerce	3 hours
BC 450*	Concepts of International Economics	3 hours
	Other related business or non-business courses*	3 hours
	(EC 305, EC 306, SP 332, SP 305, PY 333)	

*All marketing major program courses must be completed with a minimum of "C" grade to fulfill marketing program requirements.

MINORS

Students other than those pursuing a Bachelor of Science in Business or a Bachelor of Science in Education (secondary) with a teaching field in Business Education are restricted to no more than 30 hours of business courses. This limitation applies to a nonbusiness degree student even though the student is pursuing a minor in the School of Business. For more information, students should visit with their advisor.

BUSINESS MINOR

A general minor in business is available to all students with a major outside the School of Business. Students may elect a business minor to complement their major field of study and increase employment opportunities. This minor consists of a minimum of 18 credit hours of which at least one-half must be in upper-level courses and be completed at Emporia State University.

Required Courses (12 hours):

AC 223*	Financial Accounting	3 hours
BU 353*	Principles of Business Law	3 hours
MG 301*	Principles of Management	3 hours
MK 301*	Principles of Marketing	3 hours

Electives (6 hours): Students should choose 6 hours of Business electives from the following business courses in consultation with an advisor in the Business Advising Center.

AC 233*	Managerial Accounting	3 hours
BU 255*	Business Statistics	3 hours
BU 202*	Business Communication	3 hours

IS 113*	Intro to Microcomputer Applications	3 hours
IS 213*	Management Information Systems	3 hours
FI 301*	Financial Management	3 hours
MG 423*	Operations Management	3 hours

*Requires a minimum grade of a "C".

ENTREPRENEURSHIP MINOR

The entrepreneurship minor will provide students who wish to start and own their own business enterprise the opportunity to be educated and is open to all students on campus. Therefore, it will provide business and entrepreneurship education to both business students and non-business students.

Required Courses (12 hours):

MG 301*	Principles of Management	3 hours
MK 301*	Principles of Marketing	3 hours
MG 370*	Small Business Management	3 hours
MG 553*	Entrepreneurial Management	3 hours

Select 2 courses from the following (6 hours)

AC 223*	Financial Accounting	3 hours
AC 333*	Cost Accounting	3 hours
AC 423*	Federal Income Tax Accounting I	3 hours
BU 353*	Principles of Business Law	3 hours
BU 530*	Business, Law, and Sustainability	3 hours
BU 540*	Business & Society	3 hours
IS 343*	Web-based Business Applications	3 hours
IS 373*	Principles of Electronic Commerce	3 hours
FI 301*	Principles of Finance	3 hours
MG 443*	Organizational Behavior	3 hours
MK 451*	Consumer Behavior	3 hours
MK 455*	Personal Selling	3 hours
MK 462*	Integrated Marketing Communication	3 hours
MK 505*	Special Topics in Marketing	3 hours
MK 521*	Services Marketing	3 hours
MK 530*	Electronic Marketing	3 hours

*Requires a minimum grade of a "C".

INTEGRATED MARKETING COMMUNICATION MINOR

The integrated marketing communication minor is awarded to students majoring in some area other than marketing who complete the 18 hours required.

Required Courses (9 hours):

BE 303*	Multimedia Applications for Business	3 hours
MK 301*	Principles of Marketing	3 hours
MK 462*	Integrated Marketing Communication	3 hours

Select 3 courses from the following:

SP 305*	Principles of PR	3 hours
SP 405*	Case & Campaign	3 hours
SP 355	PR Writing	3 hours

(Substitutions of the above communication courses are possible)

AR 102*	2-Dimensional Design	3 hours
AR 240*	Graphic Design Processes	3 hours
AR 340*	Graphic Design Systems	3 hours

*Requires a minimum grade of "C".

MANAGEMENT MINOR

The management minor is awarded to students majoring in some area other than management who complete the 15 hours required.

Required Courses (15 hours):

MG 301*	Principles of Management	3 hours
MG 433*	International Management	3 hours
MG 443*	Organizational Behavior	3 hours
MG 444*	Human Resource Management	<u>3 hours</u>
		12 hours

Select one MG course from the following (3 hours):

MG 343*	Supervisory Management	3 hours
MG 370*	Small Business Management	3 hours
MG 505*	Special Topics in Management	3 hours
MG 553*	Entrepreneurial Management	3 hours

*Requires a minimum grade of a "C".

MARKETING MINOR

The marketing minor is awarded to students majoring in some area other than marketing who complete the 15 hours required.

Required Courses (6 hours):

MK 301*	Principles of Marketing	3 hours
MK 451*	Consumer Behavior	3 hours

Select 3 courses from the following (9 hours):

MK 430*	Retail Management	3 hours
MK 433*	International Marketing	3 hours
MK 453*	Marketing Research	3 hours
MK 455*	Personal Selling	3 hours
MK 460*	Sales Management	3 hours
MK 462*	Integrated Marketing Communication	3 hours
MK 464*	Marketing Management	3 hours
MK 505*	Special Topics in Marketing	3 hours
MK 510*	Marketing Analytics	3 hours
MK 521*	Services Marketing	3 hours
MK 530*	Electronic Marketing	3 hours
BE 303*	Multi-Media Applications	3 hours

*Requires a minimum grade of a "C".

CONCENTRATIONS

The Business Administration major requires 24 credit hours. Twelve of these hours are in "required courses". The other twelve hours are "required electives." Business Administration majors have two options for meeting the twelve hours of "required elective courses". Option A is to complete one three-hour (300 or above) course from four of the seven business disciplines (AC, BC, BU, FI, IS, MG or MK). Option B is to complete one of the eight, twelve-hour concentrations. The International Business Concentration requires 10 hours of foreign language in addition to the 12 hours of business courses. ***All courses on the Concentrations require a minimum grade of "C".**

NOTE: If a concentration selected requires one or more courses that duplicate other requirements, students will need to select an additional business course(s) to fulfill BSB requirements for graduation

Accounting Services Concentration

Required Courses (13 hours):

AC 304 *	Intermediate Accounting I	4 hours
AC 333 *	Cost Accounting	3 hours
AC 353 *	Accounting Information Systems	3 hours
AC 423 *	Federal Income Tax Accounting I	3 hours

E-Commerce Concentration

Required Courses (12 hours):

IS 343 *	Web-Based Business Applications	3 hours
IS 373 *	Principles of Electronic Commerce	3 hours
MK 530 *	Electronic Marketing	3 hours

Choose one of the following (3 hours):

IS 333 *	Business Computer Systems Analysis	3 hours
IS 453 *	Business Intelligence	3 hours

Entrepreneurship Concentration

Required Courses (12 hours):

BU 540 *	Business and Society	3 hours
MG 370 *	Small Business Management	3 hours
MG 553 *	Entrepreneurial Management	3 hours
MK 530 *	Electronic Marketing	3 hours

Financial Services Concentration

Required Courses (12 hours):

Four Finance courses (300 or above) are required including:

FI 448 *	Financial Institutions	3 hours
FI 449 *	Investment Analysis	3 hours
FI ____ *		3 hours
FI ____ *		3 hours

Human Resource Management Concentration

Required Courses (12 hours):

MG 444 *	Human Resource Management	3 hours
PY 440 *	Psychological Testing	3 hours

Plus two courses from the following (6 hours):

BE 583 *	Training and Development	3 hours
PY 432 *	Introduction to Industrial/Organization Psychology	3 hours
MG 459 *	Compensation and Benefits	3 hours

International Business Concentration

Required Business Courses (12 hours) plus Foreign Language Requirement (8-10 hours)

Business Courses (12 hours):

BU 550 *	Principles of Int'l Business Law	3 hours
FI 433 *	Concepts in International Finance	3 hours
MG 433 *	International Management	3 hours
MK 433 *	International Marketing	3 hours

Foreign Language Requirement 10 hours

If 5 hours of foreign language are used to meet the General Education Multicultural requirement, students should:

Select ONE course from the following (3 hours):

HI 300	Topics in World History	3 hours
PO 425	Politics of the Developing Areas	3 hours
PO 427	Government & Politics of Latin America	3 hours
SP 350	Intercultural Communications	3 hours

Marketing Communications Concentration**Required Courses (12 hours):**

BE 303 * Multimedia Applications for Business	3 hours
MK 455 * Personal Selling	3 hours
MK 462 * Integrated Marketing Communication	3 hours
SP 305 * Principles of Public Relations	3 hours

Sales Management Concentration**Required Courses (12 hours):**

MK 451 * Consumer Behavior	3 hours
MK 455 * Personal Selling	3 hours
MK 460 * Sales Management	3 hours
SP 332 * Theories of Persuasion	3 hours

Professional Education Requirements (36/38 hours):

See the professional education and prerequisite course requirements in the Department of School Leadership/Middle & Secondary Teacher Education section for information regarding admission to teacher education and for professional education requirements, including GPA requirements. To enter Phase II in business education and to be a certified teacher, students are required to have a minimum grade of "B" (3.0) in each of the methods of teaching courses in business education prior to student teaching.

Electives (0-6 hours)

See Course Listing for course descriptions.

**BACHELOR OF SCIENCE IN EDUCATION
BUSINESS TEACHING FIELD**

This program is designed to prepare business and computer teachers. Membership in Pi Omega Pi National Honor Society is available to Business Education majors who meet membership requirements. The following areas of concentration are available for students interested in business and computer teaching careers at the junior-high, middle school, secondary, or post-secondary levels.

Business Teaching Field

The business teaching field is designed to promote specialization in teaching business and computer subjects on the junior high and secondary levels. Students are prepared to teach accounting, office procedures, computer studies, keyboarding, desktop publishing, entrepreneurship, business law, and general business.

Degree Pattern for Business Education Majors:

General Education Requirements	52-56 hours
Business Courses	30 hours
Professional Education	36-38 hours
Electives	<u>As needed</u>
	120 hours

*IS113 Introduction to Microcomputer Applications (3 hours) and BU241 Personal Finance (3 hours) are required General Education courses for Business Education Majors.

Business Education Core Requirements (15 hours):

AC 223 Accounting for Operating Activities	3 hours
BU 301 Leadership Communications	3 hours
BU 353 Principles of Business Law	3 hours
MG 301 Principles of Management	3 hours
MK 301 Principles of Marketing	3 hours

Business Education Major Required Courses (15 hours):

BE 344 Office Systems Applications	3 hours
BE 573* Business Curriculum & Teaching Methods	3 hours
IS 213 Management Info Systems Concepts	3 hours
IS 373 Principles of Electronic Commerce	3 hours
MG 370 Small Business Management	<u>3 hours</u>
	30 hours

*Minimum grade of "B" required to enter Phase II.

COLLEGE OF LIBERAL ARTS AND SCIENCES

R. Brent Thomas, Dean

<http://www.emporia.edu/las/>

The College of Liberal Arts and Sciences consists of the following departments and centers:

Department of Art
Department of Biological Sciences
Department of Communication and Theatre Arts
Department of English, Modern Languages, and Journalism
Department of Interdisciplinary Studies
Department of Mathematics and Economics
Department of Music
Department of Nursing
Department of Physical Sciences
Department of Social Sciences
Department of Sociology, Anthropology and Crime & Delinquency Studies
Center for Economic Education
Center for Great Plains Studies
Newman Nursing Library
Science and Mathematics Education Center

Each department is composed of faculty responsible for one or more curricula. Several programs are interdisciplinary in nature; faculty from various departments cooperate in curriculum, instruction, and scholarship/research. Pre-medicine and other health-related programs (pre-dentistry, pre-osteopathy, pre-pharmacy, pre-nursing, pre-medical technology, etc.), pre-law, and pre-engineering are all such interdisciplinary programs. Information about the College of Liberal Arts and Sciences or any of its programs and activities may be obtained from the office of the dean, Butcher Education Center 001, <http://www.emporia.edu/las/>, or by calling 620/341-5278.

This section of the catalog includes college and departmental information, explanations of the various degrees and programs available, and descriptions of the courses offered.

LIBERAL ARTS AND SCIENCES MISSION STATEMENT

The College of Liberal Arts and Sciences is the intellectual foundation of Emporia State University. The faculty members of the college endeavor to educate students to be leaders and active citizens in increasingly diverse local, national, and international communities. By applying the principles and academic values of the liberal arts and sciences, the faculty members prepare their students to meet aesthetic, social, political, and environmental issues that face all humanity.

The College of Liberal Arts and Sciences aspires to be a community of teacher-scholars who value collaboration and interaction across traditional academic boundaries. It is committed to exceptional teaching, scholarship, and service. It endeavors to educate its students to be lifelong learners who will advance and Sciences faculty members are models of academic and pedagogical excellence, helping prepare students for their personal, professional and *academic futures*.

With the aim of helping students become thoughtful world citizens, the College of Liberal Arts and Sciences provides a wide range of undergraduate and graduate courses of study, professional programs, and specialized centers. The college faculty endeavors to promote intellectual curiosity and to encourage students to attain a contemporary, global perspective on the arts, human cultures, the sciences, and the natural environment. The faculty encourages students to explore the social and political issues faced by all individuals, and to appreciate the contributions of diverse ethnic and cultural groups throughout history.

The College of Liberal Arts and Sciences seeks to accomplish these goals in a student-centered environment by emphasizing a personalized education and successful careers. The college is committed to continuing a tradition of providing students with opportunities to work side by side with outstanding faculty members both in and beyond the classroom. In the College of Liberal Arts and Sciences, students have significant opportunities for involvement in co-curricular activities and for international experiences and study. The college's many opportunities for growth, involvement, and leadership enhance its faculty's excellent classroom instruction.

The College of Liberal Arts and Sciences dedicates itself to achieving prominence among liberal arts and sciences colleges in comprehensive universities as the premier college of its type in the region. To that end, the college challenges its students, faculty, and staff to reach their full potential as lifelong learners, teachers, and scholars.

THE CENTER FOR ECONOMIC EDUCATION

The mission of the ESU Center for Economic Education is to deliver high-quality teacher-training programs, which facilitate knowledge of essential economic concepts, personal finance concepts, and economic reasoning ability of kindergarten through senior high school students.

The center is fortunate to have an extensive and diverse array of partner organizations donating their facilities along with their leaders and key individuals in delivering economic education workshops; these partners have included the Federal Reserve Banks of Kansas City and St. Louis and virtually every major employer in Topeka and Emporia along with many others. The center is part of the network of the Council on Economic Education (CEE), which has affiliation standards the ESU center has met or exceeded since the inception of these standards.

As part of this network, the center offers courses, workshops, and other teacher-training activities through the Department of Mathematics and Economics in the College of Liberal Arts and Sciences at ESU. Some of these courses are offered online in an exclusive partnership arrangement with the Federal Reserve Bank of St. Louis at a heavily discounted rate for tuition and fees. In addition, the ESU center is supported by the Kansas Council on Economic Education (KCEE), which frequently funds partial tuition scholarships for K-12 teachers taking other economic education courses.

CENTER FOR GREAT PLAINS STUDIES

The Great Plains of North America is one of the world's most important grassland regions. The vast distances, meld of grass and sky, and cycles of nature nourish a distinct regional character and vision. Indeed, the Great Plains has strongly influenced American history and society, as well as large portions of the rest of the world. Americans and those from other lands alike think of this nation largely in terms of its Great Plains heritage.

Situated in the tallgrass country, near trails traversed by Indian peoples since the era of prehistory, in the place where the cowboy and cattle culture flourished, and where an agricultural frontier boomed, ESU has always seen the study of the grasslands as a primary responsibility to Kansas and the region. The responsibility became an exclusive one for ESU in 1977, when the Kansas Board of Regents approved the creation of the Center for Great Plains Studies. ESU is one of the few universities in the United States with extensive academic programs, teacher outreach, public service activities, and research projects designed to inform, interest, and promote appreciation of North America's sprawling and colorful midcontinental grasslands.

Academic fields throughout the campus offer courses in cooperation with the Center. A combination of these courses can be used to obtain the Great Plains academic emphasis, which is recorded on the student's transcript. An undergraduate in any baccalaureate degree program is eligible to elect the Great Plains concentration along with any major, minor, or teaching field. Use of the region's natural environment and institutions as an academic laboratory and presentation of original subjects by the faculty are strong features of the curriculum.

Subjects are best understood by explaining their parts and then studying how they relate to a whole. The natural sciences, fine arts, humanities, and behavioral and social sciences join in the curriculum for a broad and complementary study of the Great Plains. The way humans adapted to life on the Great Plains serves as an illustration of how the curriculum is designed. Course in geography, biology, and earth science describe aspects of the physical environment that necessitated new ways of living. Fields like history, anthropology, and sociology examine the many human adjustments. Literature, music, and art are among the academic disciplines that consider how people perceived and felt about their environment and expressed the culture it fostered.

Faculty members from art to zoology teach courses in the Great Plains curriculum. They examine the common and uncommon features of the region and explain the reasons for its special human texture and spirit, relating the Plains to the broader American society and the world as a whole.

GREAT PLAINS CONCENTRATION REQUIREMENTS

1. Minimum of 15 semester hours.
2. At least two of the following categories must be represented: Fine Arts; Humanities, Social and Behavioral Sciences; Natural Sciences; College Wide.
3. Specific courses that may be applied to the emphasis are listed in the Great Plains section of the class schedule each semester. Examples of the Great Plains courses in each category are these:

Humanities:

HI 112	United States History Since 1877 (designated section)	3 hours
EG 207	Introduction to Literature (designated section)	3 hours

Social and Behavioral Sciences:

AN 101	Introduction to Anthropology	3 hours
--------	------------------------------	---------

Natural Sciences:

ES 110/111	Intro to Earth Science/Lab	5 hours
EB 259	Great Plains Environment	3 hours

THE SCIENCE AND MATHEMATICS EDUCATION CENTER

Overview of the Center

The ESU Science and Mathematics Education Center (SMEC), located in Science Hall Room 177, contains more than 8,500 items available for checkout. Most SMEC materials can be searched using the Kellogg on-line catalog of the ESU William Allen White Library.

The major types of activities conducted by the Science and Mathematics Education Center include dissemination of curriculum materials, hand-on outreach activities, staff development, curriculum consultation, research within school districts, state-wide research, and science and mathematics curriculum development.

Mission and Goals

The general mission of the Science and Mathematics Education Center is the improvement of pre-service and in-service preparation of teachers in the sciences and math

1. To maintain a comprehensive repository of up-to-date K-12 science and mathematics curriculum materials, including activity resource books, children's literature, videos, computer software, manipulatives, textbooks, lab books, journals, catalogs, kits, and other science and mathematics teacher materials.
2. To assist in the coordination of programs and courses leading to teacher licensure in biological, physical, and mathematical sciences, and teacher education, including elementary, middle school, and secondary levels of science and mathematics teaching.
3. To sponsor and direct staff development projects, workshops, and special courses in science and mathematics education for K-12 teachers from area school districts.
4. To coordinate the efforts of ESU professors in the Departments of Biological Sciences; Physical Sciences; and Mathematics, Computer Science, and Economics; and the Teachers College who regularly serve as consultants and resource persons to the classroom teachers and administrators of state, regional and national educational organizations.
5. To coordinate proposals (and their writing) submitted by the University to outside agencies for funding of special projects for enrichment of K-12 science and mathematics teaching.
6. To maintain an ongoing research program in science and mathematics education with the primary purpose of gathering data concerning the needs and direction of pre-college science and mathematics education programs in Kansas.
7. To serve as a regular meeting place for the advisory committee, department faculty meetings, committee meetings, and executive committee meetings of statewide mathematics and science teacher organizations.

History

Emporia State University has a tradition that is deeply rooted in teacher education. Founded as Kansas State Normal School in 1863, the teacher education tradition endured from 1923 to 1974 as Kansas State Teachers College. The teacher preparation mission remains strongly rooted at Emporia State University.

Out of a long-standing tradition of excellence in the preparation of teachers of science and mathematics at Emporia State University, the Science and Mathematics Education Center was formally established in the mid-1970s by a committee formed from the College of Liberal Arts and Sciences with representatives from the Teachers College.

During the academic year 1976-77, the Department of Biological Sciences made space available for the Center from a converted laboratory, Science Hall room 177. The collection was started with K-12 science and mathematics curriculum materials. All current materials are available for use by university students and faculty as well as teachers from area school districts.

Gradual expansion of the Center's mission led to the establishment of a half-time director's position in 1981. During the 1990-1 academic year, the Center's name was changed to the Science and Mathematics Education Center to better reflect the mission of the Center. The Director of the Center is assisted by an advisory committee consisting of representatives of the Departments of Biological Sciences; Mathematics, Computer Science, and Economics; Physical Sciences; and the Teachers College. In 2005-6, the director's position became full-time.

The Kansas Science Teacher, an annual publication serving science and mathematics teachers, was begun in 1984. It continues (as an e-journal) as a means of publishing original articles that address the goals of improving science and mathematics teaching K-12, and bringing hands-on experiences to existing science and mathematics curricula. The current edition and archives will be available on-line beginning Fall 2007 from a link on the SMEC homepage at www.emporia.edu/scimath/

NEWMAN NURSING LIBRARY

The Nursing Library is located on the second floor of Cora Miller Hall, the building housing the Department of Nursing, 1127 Chestnut Street. The Library contains a concentrated collection of nursing and healthcare books, journals, indexes, videos and computer software supplementing the holdings of ESU's William Allen White Library. Collection information is available through ESU's online Kellogg Catalog. The Nursing Library also serves the staff at Newman Regional Health and other Emporia area healthcare professionals. The library staff is available for consultation on research projects and health-related searches. Call 620/343-6800, Ext. 5650, for reference questions or hours.

DEPARTMENT OF ART

Professor Roberta Eichenberg, Chair

Professors: Patrick Martin, Eric Conrad, James Ehlers, Roberta Eichenberg. **Associate Professors:** Derek Wilkinson.

Assistant Professors: John Decker, Stephanie Lanter, Morgan Ford Willingham.

<http://www.emporia.edu/art/>

The Department of Art offers the student an opportunity to select from a variety of programs. These are designed to help prepare a student for a career in studio art, in the engraving arts, in graphic design, in teaching art in elementary or secondary schools, in art therapy, or in other fields of art.

A major in art can lead to one of the following degrees:

Bachelor of Arts
 Bachelor of Fine Arts
 Bachelor of Science
 Bachelor of Science in Education

Students in art are encouraged to design the most intensive art program possible. This is especially important for students with future plans for studying art on the graduate level.

As part of general education for the BA, BFA, BS, and BSE, art majors are required to complete AR 101, Basic Drawing and AR 225, Art History: Prehistoric to Renaissance. The BA, BFA, and BS art majors are additionally required to take AR 305, Introduction to Digital Design, as part of general education.

Students must earn a minimum grade of "C" in all art courses (AR) and a minimum cumulative grade point average of 2.5 in all art courses (AR) required for the BA, BS, and BFA, Art Major. At least 45 hours in courses numbered 300 or above must be completed for the degree.

To obtain a BA, BFA, BS, or BSE, all art majors are additionally required to satisfactorily complete AR 095, First Year Experience; AR 098, Mid-Program Portfolio Review; and 8 semesters of 099, Art Forum.

NOTE: Art faculty may retain examples of class work produced by each student during their undergraduate study. Also, certain classes have supply fees to cover the cost of expendable materials.

BACHELOR OF ARTS

ART MAJOR

This degree is designed to provide a broad liberal arts education in art. Such a degree can help prepare students to enter careers in art which demand experience in many areas.

For the basic structure of this degree, "Bachelor of Arts" in this catalog.

See the core curriculum general education requirements in the General Education section of this catalog.

Art Major Requirements:

42 hours of art courses (AR) and at least 12 hours in another program of study.

AR 102	Two-Dimensional Design	3 hours
AR 103	Three-Dimensional Design	3 hours
AR 235	Art History: Renaissance to Modern	3 hours
AR 322	Life Drawing	3 hours
AR 345	20th Century Art History: 1880-1945	3 hours
	OR	
AR 355	Art Since 1945	3 hours
AR 501	Advanced Drawing	3 hours

Approved Art Electives, 300 level or above	14 hours
Other Approved Art Electives	10 hours

Free and unrestricted electives: (may include art.)	8 hours
--	---------

Multicultural Experience Requirement: The degree plan for the BA requires the student to take 10 hours of one foreign language to satisfy the Multicultural Experience Requirement. (Test out by established means is possible.)

Second field (minimum of 12 credit hours): Program to be established by the department administering the chosen second field discipline. The second field may be Art History.

BACHELOR OF FINE ARTS

ART MAJOR

This degree is designed to prepare students to work professionally in an art field or to study at the advanced level at a graduate or professional school.

See the core curriculum general education requirements in the General Education section of this catalog.

Art Major Requirements (51 hours):

AR 102	Two-Dimensional Design	3 hours
AR 103	Three-Dimensional Design	3 hours
AR 235	Art History: Renaissance to Modern	3 hours
AR 322	Life Drawing	3 hours
AR 323	Sculpture I	3 hours
AR 345	20 th Century Art History: 1880-1945	3 hours
	OR	
AR 355	Art Since 1945	3 hours

Choose 4 courses from below (12 hours):

AR 302	Glass Forming I	3 hours
AR 309	Engraving I	3 hours
AR 310	Painting I	3 hours
AR 313	Printmaking I	3 hours
AR 314	Introduction to Handbuilding with Clay	3 hours
	OR	
AR 316	Introduction to Wheelthrowing	3 hours
AR 315	B&W Photography	3 hours
AR 501	Advanced Drawing	3 hours

Art History Elective	3 hours
-----------------------------	---------

REQUIRED ART ELECTIVES 18 hours

Choose Option A or Option B

Option A:

Select 18 credit hours of Art Electives.

**Graphic Design Concentration only requires 15 credit hours of Art Electives.*

Option B:

Select a second area of Concentration in art.

In addition to the 51 hours required above, students interested in ceramics, engraving, graphic design, glass forming, painting, photography, printmaking, or sculpture complete coursework focused on one of these concentrations as outlined below.

CERAMICS CONCENTRATION**Additional Requirements (18 hours):**

AR 333	Sculpture II	3 hours
AR 316	Introduction to Wheelthrowing	3 hours
AR 496	Projects in Ceramics	6 hours
AR 595	Advanced Studio (Ceramics)	5 hours
AR 599	Senior Exhibition	1 hour

ENGRAVING ARTS CONCENTRATION**Additional Requirements (18 hours):**

AR 309	Engraving I	3 hours
AR 329	Engraving II	3 hours
AR 409	Projects in Engraving	6 hours
AR 595	Advanced Studio (Engraving)	5 hours
AR 599	Senior Exhibition	1 hour

GLASS FORMING CONCENTRATION**Additional Requirements (18 hours):**

AR 302	Glass Forming I	3 hours
AR 312	Glass Forming II	3 hours
AR 412	Projects in Glass Forming	9 hours
AR 595	Advanced Studio (Glass)	2 hours
AR 599	Senior Exhibition	1 hour

GRAPHIC DESIGN CONCENTRATION**Additional Requirements (21 hours):**

AR 240	Graphic Design Processes	3 hours
AR 340	Type & Design	3 hours
AR 341	Web Design	3 hours
AR 440	Advanced Typography	3 hours
AR 441	Art Direction I	3 hours
AR 540	Art Direction II	3 hours
AR 490	Internship in Graphic Design	3 hours

PAINTING CONCENTRATION**Additional Requirements (18 hours):**

AR 330	Painting II	3 hours
AR 411	Painting III	3 hours
AR 491	Projects in Painting	6 hours
AR 501	Advanced Drawing I	3 hours
AR 595	Advanced Studio (Painting)	2 hours
AR 599	Senior Exhibition	1 hour

PHOTOGRAPHY CONCENTRATION**Additional Requirements (18 hours):**

AR 315	B&W Photography	3 hours
AR 317	Digital Photography & Lighting	3 hours
AR 320	Contemporary Trends in Photography	3 hours
AR 350	Alternative Photographic Processes	3 hours
AR 450	Projects in Photography	3 hours
AR 595	Advanced Studio (Photography)	2 hours
AR 599	Senior Exhibition	1 hour

PRINTMAKING CONCENTRATION**Additional Requirements (18 hours):**

AR 326	Printmaking II	3 hours
AR 497	Projects in Printmaking	9 hours
AR 501	Advanced Drawing	3 hours
AR 595	Advanced Studio (Printmaking)	2 hours
AR 599	Senior Exhibition	1 hour

SCULPTURE CONCENTRATION**Additional Requirements (18 hours):**

AR 333	Sculpture II	3 hours
AR 493	Projects in Sculpture	12 hours
AR 595	Advanced Studio (Sculpture)	2 hours
AR 599	Senior Exhibition	1 hour

BACHELOR OF SCIENCE**ART MAJOR**

This degree is designed to provide students a broad exposure to studio arts as well as course work in related fields. Many students who elect this degree program enter some field of business related to the arts or the field of art therapy.

See the core curriculum general education requirements in the general education section of this catalog.

Art Major Requirements:**45 hours of art courses (AR) and 24 hours of approved courses in a related field**

AR 102	Two-Dimensional Design	3 hours
AR 103	Three-Dimensional Design	3 hours
AR 322	Life Drawing	3 hours
AR 235	Art History: Renaissance to Modern	3 hours
AR 323	Sculpture I	3 hours
AR 313	Printmaking I	3 hours
AR 310	Painting I	3 hours
AR 314	Introduction to Handbuilding with Clay	3 hours
OR		
AR 316	Introduction to Wheelthrowing	3 hours
AR 501	Advanced Drawing	3 hours
Approved Art Electives, 300 level or above		18 hours
Related Field		24 hours

ART THERAPY PREPARATION:

While no undergraduate degree or minor in art therapy is available, students interested in pursuing the MS in Art Therapy should complete the BS in Art and the courses listed below.

See the core curriculum general education requirements in the general education section of this catalogue.

Art Requirements (42 hours):

AR 102	Two-Dimensional Design	3 hours
AR 103	Three-Dimensional Design	3 hours
AR 235	Art History: Renaissance to Modern	3 hours
AR 310	Painting I	3 hours
AR 313	Printmaking I	3 hours
AR 314	Introduction to Handbuilding with Clay	3 hours
OR		
AR 316	Introduction to Wheelthrowing	3 hours
AR 322	Life Drawing	3 hours
AR 323	Sculpture I	3 hours
AR 360	Child Art Methods	2 or 3 hours
OR		
AR 361	Theory and Practice in Art Education	2 or 3 hours

AR 501 Advanced Drawing 3 hours
 Approved Art Electives, 300 level or above 12 or 13 hours*
**12 hours if AR 361 Theory and Practice in Art Education is taken, or 13 hours if AR 360 Child Art Methods is taken.*

Art Therapy Preparation (24 hours):

PY 100 Introductory Psychology 3 hours
 PY 212 Developmental Psychology 3 hours
 PY 303 Introduction to Art Therapy 3 hours
 PY 427 Abnormal Psychology 3 hours
 PY 626 Theories of Personality 3 hours
 Approved Psychology Electives* 9 hours

**PY 300 Descriptive Research Methods and Statistics in Psychology is strongly recommended to enhance preparation for the Art Therapy Master's program at ESU.*

BACHELOR OF SCIENCE IN EDUCATION ART TEACHING FIELD

This degree program prepares students to teach PreK-12 art. The program assumes that nurturing qualified art teachers includes the specialized preparation to develop visual art skill and that the art educator must be a competent active artist.

Satisfactory completion of the requirements for this degree entitles the graduate to a license to teach PreK-12 art, issued by the Kansas State Department of Public Instruction.

Requirements for admission to teacher education and recommendation for a teaching certificate are outlined under the degree Bachelor of Science in Education-Secondary Education Major. Students must successfully complete all Professional Education requirements.

Students must also complete all General Education requirements, as outlined in this catalog.

The student must earn a minimum grade of "C" in all art courses (AR), and must earn a minimum grade point average of 2.5 in all art courses (AR) required for the Bachelor of Science in Education, Art Teaching Field. In addition, a 2.75 overall GPA is required for admission to the professional education program.

CORE Examinations in reading (156), writing (162), and mathematics (150) must be passed to be admitted to Phase I of Teacher Education. Principles of Learning Test: Students must pass the PLT for state licensure.

Basic Art Requirements (27 hours):

AR 102 Two-Dimensional Design 3 hours
 AR 103 Three-Dimensional Design 3 hours
 AR 235 Art History: Renaissance to Modern 3 hours
 AR 305 Intro to Digital Design 3 hours
 AR 310 Painting I 3 hours
 AR 314 Introduction to Handbuilding with Clay
 OR 3 hours
 AR 316 Introduction to Wheelthrowing
 AR 315 B & W Photography 3 hours
 AR 323 Sculpture I 3 hours
 AR 345 20th Century Art History
 OR 3 hours
 AR 355 Art Since 1945

Art Education Requirements (10 hours):

AR 360 Child Art Methods 2 hours
 AR 361 Theory and Practice in Art Education 3 hours
 AR 460 Professional Development in Art
 Education 2 hours
 AR 560 Contemporary Issues in Art Education 3 hours

Studio Emphasis* (6 hours)

Students are to take two consecutive courses from one of the following areas: (*Art Requirements listed above do not count towards the 6 hour studio emphasis)

Ceramics	Painting
Engraving Arts	Photography
Glass Forming	Sculpture
Graphic Design	

Recommended Art Elective (not required for this degree):

AR 322 Life Drawing 3 hours

ART MINOR

This 18 hour program of studies offered by the Department of Art is designed to enhance a baccalaureate degree program, preparing students to work professionally in a field that may benefit from expanded study in the visual arts. Students may complete course work focused on a concentrated subject area. The student must earn a minimum grade of "C" in all art courses (AR).

In addition to the following courses, all art minors are required to complete the course AR 225, Art History: Prehistoric to Renaissance, as part of the general education requirements.

Basic Art Requirement (12 hours):

AR 101	Basic Drawing	3 hours
AR 102	Two-Dimensional Design	3 hours
AR 103	Three-Dimensional Design	3 hours
AR 235	Art History: Renaissance to Modern	3 hours

Approved Art Electives

6 hours

NOTE: This minor does not constitute a teaching concentration. The minor in art is an enrichment program for students desiring recognition of accomplishments in the visual arts without the commitment required for a major in art.

ART HISTORY MINOR

This 18 hour program of studies offered by the Department of Art is designed to enhance a baccalaureate degree program, preparing students to work professionally in a field that may benefit from expanded study in the visual arts.

The student must earn a minimum grade of "C" in all art courses (AR).

In addition to the following courses, all art minors are required to complete the course AR 225, Art History: Prehistoric to Renaissance, as part of the general education requirements.

Basic Art Requirements (12 hours):

AR 101	Basic Drawing	3 hours
AR 102	Two-Dimensional Design	
OR		
AR 103	Three-Dimensional Design	3 hours
AR 235	Art History: Renaissance to Modern	3 hours
AR 345	20 th Century Art History	
OR		
AR 355	Art Since 1945	3 hours

Approved Art History Electives 300 or above

6 hours

See Course Listing for course descriptions.

DEPARTMENT OF BIOLOGICAL SCIENCES

Tim Burnett, Chair, Associate Professor
(Immunology-Cell Biology)

Professors: Melissa Bailey (Physiology-Toxicology), Scott S. Crupper (Microbiology-Molecular Biology), William E. Jensen (Wildlife Biology), Lynnette C. Sievert (Comparative Animal Physiology), Marshall D. Sundberg (Plant Anatomy-Morphology-Development).

Associate Professors: Brenda Koerner (Ecology- Biology Education).

Assistant Professors: Stephen Fields (Microbiology-Molecular Biology), Zachary Klein (Ichthyology-Aquatic Biology), David McKenzie (Ecology), Alexis Powell (Ecology-Wildlife Biology-Phylogenetics), Darren Rebar (Entomology)

<http://www.emporia.edu/biosci/>

The Department of Biological Sciences offers programs and courses designed to prepare students for a variety of occupations associated with biology teaching, wildlife management, environmental assessment, health-related careers, research laboratories, and graduate education. In addition, the department supports the liberal education of all students of the university by offering courses designed to increase their awareness and understanding of biological concepts and breakthroughs, which affect their everyday lives now and in the future.

The following degrees are offered:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Science in Education

The department offers a minor in biology and specific advising tracks for in agriculture; dentistry; medical technology; chiropractic medicine, physician assistant, medicine, optometry; physical therapy; wildlife and fisheries and veterinary medicine.

For all programs students must complete at least 120 hours of coursework including all required courses for the general education and the program of study. Students must also have a minimum grade-point average of 2.2 across all biology courses for which they have earned.

The department also offers a master's degree in biology. For more information see the Graduate Office web site, <http://emporia.edu/grad/>.

BACHELOR OF ARTS BIOLOGY MAJOR

The Bachelor of Arts major in biology is for students desiring a broad, liberal education. Students seeking this degree are typically preparing for an interdisciplinary professional career which requires exposure and training in the life sciences (e.g. scientific

sales/marketing, scientific writing or science policy). It is not appropriate for students desiring to do advanced studies in biology or to be employed as a professional biologist, unless they are willing to take as electives additional hours in biology beyond those required for this degree.

Biology Requirements (30 hours):

GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425-426	General Genetics & Lab	4 hours
EB 480	Principles of Ecology	3 hours
EB 481	Field Ecology	2 hours
GB 480	Senior Experience in Biology	1 hour

Physical Science Cognate Course Requirements (10 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab	5 hours

Required Second Program of Study:

15 to 30 hours in a second program of study in another discipline.

BACHELOR OF SCIENCE BIOCHEMISTRY and MOLECULAR BIOLOGY MAJOR

This interdisciplinary BMB major provides a curriculum designed to prepare students to pursue additional graduate study or employment in fields such as biotechnology, bioengineering, or biomedical research. It also represents an excellent choice of major for preparation for a health-related professional programs such as medical school.

In addition to the requirements shown below, students must complete the University-wide general education and graduation requirements. Program wide, students must complete a minimum of 20 hours of upper level (>300) courses in Chemistry and a minimum of 20 hours of upper level (>300) courses in Biology.

Required Courses (39-44 hours)

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
GB 425	General Genetics	3 hours
MC 540-541	Cell Biology & Lab	5 hours
CH 572-575	Organic Chemistry I/II & Labs	10 hours
OR		
CH 370-371	General Organic Chemistry & Lab	5 hours
CH 660	Biochemistry I	3 hours
CH 661	Biochemistry Lab	2 hours
CH 662	Biochemistry II	3 hours

Research (2-6 hours chosen from courses listed below)

MC 409	UG Research in Mole/Cell Biology	2 hours
(can be repeated for a maximum of 6 hours.)		
CH 479	Undergraduate Research Chemistry	2 hours
(can be repeated for a maximum of 6 hours)		
MC 765	Adv. Cellular/Molecular Biology Lab	2 hours
CH 765	Adv. Biochemistry Lab	2 hours

Seminar or Capstone (1 hour, choose one class based on where research hours were earned)

GB 470	Biology Undergraduate Seminar	1 hour
CH 480	Capstone report and seminar	1 hour

Required Associate Courses (15 hours):

PH 140-141	College Physics I & Lab	5 hours
PH 343-344	College Physics II & Lab	5 hours
MA 165	Basic Calculus	5 hours

OR

MA 161	Calculus I	5 hours
--------	------------	---------

NOTE: Physics I (PH 190/191/192) and Physics II (PH 393/394/395) may be substituted for College Physics.

Restricted Electives (18-27 hours)

Choose courses from the following pre-approved lists or advisor-approved substitutions. Program wide, students must complete a minimum of 20 hours of upper level (>300) courses in Chemistry and a minimum of 20 hours of upper level (>300) courses in Biology. Other science courses may be used as electives if arranged by the faculty advisor and student.

Pre-approved courses:

CH 376-377	Quantitative Analysis & Lab	5 hours
CH 525	Descriptive Inorganic	3 hours
CH 620	Elements of Physical Chemistry	3 hours
CH 720	Physical Chemistry I	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 776	Topics in Biochemistry	1-3 hours
MC 316	General Microbiology	3 hours
MC 317	Microbiology Lab	1 hour
MC 459	Special Topics in Microbial & Cellular Biology	1-3 hours
MC 520	Molecular Genetics	3 hours
MC 549	Immunology	3 hours
MC 550	Immunology Lab	2 hours
MC 562	Pathogenic Microbiology	3 hours
MC 563	Pathogenic Microbiology Lab	2 hours
MC 760	Cancer Biology	3 hours
ZO 362	Human Anatomy & Physiology	3 hours
ZO 363	Human Anatomy & Physiology Lab	2 hours

**BACHELOR OF SCIENCE
BIOLOGY MAJOR**

The Bachelor of Science in Biology is designed for students desiring considerable specialization in biology. The degree offers programs with several areas of concentration and students are required to select the one that best meets their career and academic goals. Students are encouraged to consult with an advisor before selecting an area of concentration.

The concentrations are listed below:

- General Biology
- Botany
- Ecology & Biodiversity
- Healthcare
- Microbial and Cellular Biology
- Physiology
- Zoology

**BACHELOR OF SCIENCE
BIOLOGY MAJOR****GENERAL BIOLOGY CONCENTRATION**

This program is appropriate for students seeking a broad exposure to all areas of biological sciences. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog.

Biology requirements (45 hours):

GB 140-141	Principles of Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animal & Lab	4 hours

ZO 570	Mammalian Physiology	3 hours
--------	----------------------	---------

OR

BO 750-751	Plant Anatomy & Physiology & Lab	4 hours
------------	----------------------------------	---------

MC 316-317	Microbiology & Lab	4 hours
------------	--------------------	---------

EB 480	Principles of Ecology	3 hours
--------	-----------------------	---------

EB 481	Field Ecology	2 hours
--------	---------------	---------

GB 425-426	General Genetics & Lab	4 hours
------------	------------------------	---------

GB 480	Senior Experience in Biology	1 hour
--------	------------------------------	--------

Upper division electives in biology		15-16 hours
-------------------------------------	--	-------------

Physical Science Requirements (20 hours):

CH 123-124	Chemistry I & Lab	5 hours
------------	-------------------	---------

CH 126-127	Chemistry II & Lab	5 hours
------------	--------------------	---------

CH 370-371	General Organic Chemistry & Lab	5 hours
------------	---------------------------------	---------

PH 140-141	College Physics I & Lab	5 hours
------------	-------------------------	---------

Math or Statistics Requirement:

MA 165	Basic Calculus	5 hours
--------	----------------	---------

OR

MA 161	Calculus I	5 hours
--------	------------	---------

OR

PY 520	Statistics I	3 hours
--------	--------------	---------

OR

MA 352	Introduction to Biostatistics	3 hours
--------	-------------------------------	---------

**BACHELOR OF SCIENCE
BIOLOGY MAJOR****BOTANY CONCENTRATION**

This program is appropriate for students seeking specific training in botany and plant science. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog.

Biology Requirements (45 hours):

GB 140-141	Principles of Biology & Lab	4 hours
------------	-----------------------------	---------

BO 212-213	Biology of Plants & Lab	4 hours
------------	-------------------------	---------

ZO 214-215	Biology of Animals & Lab	4 hours
------------	--------------------------	---------

MC 316-317	Microbiology & Lab	4 hours
------------	--------------------	---------

GB 425	General Genetics	3 hours
--------	------------------	---------

EB 480	Principles of Ecology	3 hours
--------	-----------------------	---------

EB 481	Field Ecology	2 hours
--------	---------------	---------

GB 539	Soil Science & Lab	4 hours
--------	--------------------	---------

BO 542-543	Plant Taxonomy & Lab	4 hours
------------	----------------------	---------

BO 750-751	Plant Anatomy & Physiology & Lab	4 hours
------------	----------------------------------	---------

GB 480	Senior Experience in Biology	1 hour
--------	------------------------------	--------

Upper division electives in biology (see below)		8 hours
---	--	---------

Physical Science & Math Requirements (23-25 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab	5 hours
PH 140-141	College Physics I & Lab	5 hours
MA 165	Basic Calculus	5 hours
	OR	
MA 161	Calculus I	5 hours
	OR	
PY 520	Statistics I	3 hours
	OR	
MA 352	Introduction to Biostatistics	3 hours

Electives (8 hours):

All elective hours in biology must be taken from the following list of courses.

GB 426	General Genetics Lab	1 hour
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
MC 703-704	Mycology & Lab	4 hours
BO 409	Botany Project	1-3 hours
BO 430	Economic Botany	3 hours
BO 552-553	Plant Kingdom & Lab	4 hours
GB 725	Evolution	3 hours
EB 351	Introduction to Geospatial Analysis	3 hours

BACHELOR OF SCIENCE**BIOLOGY MAJOR****ECOLOGY & BIODIVERSITY CONCENTRATION**

This program is appropriate for students seeking a specialized program of study in ecology and organismal biology. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog.

Requirements:**A. Biology Core (23 hours):**

GB 140-141	Principles of Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425	General Genetics	3 hours
EB 480	Principles of Ecology	3 hours
GB 480	Senior Experience in Biology	1 hour

B. Concentration Courses (29 hours):

EB 481	Field Ecology ^A	2 hours
EB 409	Ecology & Biodiversity Project ^{B,C}	2 hours
BO 542-543	Plant Taxonomy & Lab	4 hours

One Upper division animal survey course:

ZO 556-557	Natural History of Vertebrates & Lab	4 hours
	OR	
ZO 546-547	Invertebrate Zoology & Lab	4 hours

Upper division electives in biology (must cover each of three sub-areas: D, E, F)** 17 hours

C. Physical Science & Statistics Requirements (18 hours):

Two chemistry with lab courses		10 hours
CH 123-124	Chemistry I & Lab	
CH 126-127	Chemistry II & Lab	
	OR	
CH 370-371	General Organic Chemistry & Lab ^D	
One course in statistics		3 hours
GB 750	Research Design & Analysis	
	OR	
MA 352	Introduction to Biostatistics	

One course in physics-with lab (5 hours)

PH 140-141	College Physics I & Lab	5 hours
------------	-------------------------	---------

****Upper Division Electives as required above:****D. Aquatic Ecology Electives:**

GB 510-511	Aquatic Biology & Lab ^A	4 hours
EB 496	Stream Ecology & Lab ^E	4 hours
ZO 472-473	Ichthyology & Lab ^A	4 hours

E. Terrestrial Ecology Electives:

GB 539	Soil Science & Lab ^A	4 hours
ZO 440-441	Entomology & Lab ^E	4 hours
ZO 459	Herpetology & Lab	4 hours
ZO 480-481	Ornithology & Lab ^A	4 hours
ZO 490-491	Mammalogy & Lab ^A	4 hours

F. Applied Ecology Electives:

BO 750-751	Plant Anatomy & Physiology & Lab	4 hours
EB 351	Introduction to Geospatial Analysis	3 hours
EB 474-475	Fisheries Management & Lab ^E	4 hours
EB 536-537	Wildlife Populations and Conservation & Lab ^E	4 hours
EB 538	Natural Resource Policies	2 hours
ZO 530-531	Animal Behavior & Lab ^A	4 hours
ZO 762	Environmental Physiology ^F	3 hours

G. Other Approved Electives:

ZO 556-557	Natural History of Vertebrates & Lab	4 hours
ZO 546-547	Invertebrate Zoology & Lab	4 hours
BO 552-553	Plant Kingdom & Lab	4 hours
GB 725	Evolution	3 hours
Or other upper division courses approved by the advisor		

^AEB 480 (Principles of Ecology) required as a co-requisite or prerequisite.

^BShould enroll in junior year or no later than beginning of senior year. Supervisor approval required.

^CEB 481 (Field Ecology) required as prerequisite.

^DCH 126-127 (Chemistry II & Lab) required as a prerequisite.

^EEB 480 (Principles of Ecology) required as a prerequisite.

^FCH 370-371 (General Organic Chemistry & Lab) required as a prerequisite.

BACHELOR OF SCIENCE**BIOLOGY MAJOR****HEALTHCARE CONCENTRATION**

This program of study is most appropriate for students wishing to prepare for careers in the health-related professions (e.g. medicine, dentistry, optometry, medical technology, pharmacy, physical therapy, physician's assistant or veterinary medicine). These programs will require post-baccalaureate training at another institution. The Healthcare Concentration will provide the necessary pre-requisites for acceptance into these schools. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog

Biology Requirements (44 hours)

GB 140-141	Principles of Biology & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425-426	General Genetics & Lab	4 hours
ZO 362-363	Human Anatomy & Physiology +Lab	5 hours
GB 325	Bioscientific Terminology	1 hour
GB 385	Nutrition	3 hours
GB 480	Senior Experience in Biology	1 hour

18 additional hours selected from the courses listed below:

MC 350-351	Molecular & Cellular Biology & Lab	4 hours
MC 549	Immunology	3 hours
MC 562-563	Pathogenic Microbiology & Lab	5 hours
ZO 364	Human Pathophysiology	3 hours
ZO 515-516	Vertebrate Structure & Development & Lab	5 hours
ZO 570	Mammalian Physiology	3 hours
PE 360	Physiology of Exercise	3 hours
PE 362	Kinesiology	3 hours
CH 560	Fundamentals of Biochemistry	3 hours
GB 386	Internship: Biological Sciences	1-3 hours

Physical Science and Math Requirements (15-20 hours)

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab	5 hours
OR		
CH 572-575	Organic Chemistry I/II & Labs	10 hours
PH 140-141	College Physics I & Lab	5 hours
PH 343-344	College Physics II & Lab	5 hours
MA 352	Introduction to Biostatistics	3 hours

BACHELOR OF SCIENCE**BIOLOGY MAJOR****MICROBIAL AND CELLULAR BIOLOGY CONCENTRATION**

This program is appropriate for students seeking a specialized program of study in microbiology and/or cellular biology. It is appropriate for students seeking employment or post baccalaureate training in biological or clinical laboratories. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog.

Biology Requirements (46 hours):

GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours

ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425-426	General Genetics & Lab	4 hours
EB 480	Principles of Ecology	3 hours
MC 540-541	Cell Biology & Lab	5 hours
MC 549-550	Immunology & Lab	5 hours
MC 562-563	Pathogenic Microbiology & Lab	5 hours
GB 480	Senior Experience in Biology	1 hour
Approved upper-level electives in biology or chemistry		3 hours

Physical Science Requirements (20 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab	5 hours
PH 140-141	College Physics I & Lab	5 hours

Math or Statistics Requirement:

MA 165	Basic Calculus	5 hours
OR		
MA 161	Calculus I	5 hours
OR		
PY 520	Statistics I	3 hours
OR		
MA 352	Introduction to Biostatistics	3 hours

BACHELOR OF SCIENCE**BIOLOGY MAJOR****PHYSIOLOGY CONCENTRATION**

This program is appropriate for students seeking a specialized program of study in physiology. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog.

Biology Requirements (45 hours):

GB 140-141	Principles of Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animal & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425	General Genetics	3 hours
EB 480	Principles of Ecology	3 hours
BO 750-751	Plant Anatomy & Physiology & Lab	4 hours
ZO 570	Mammalian Physiology	3 hours
ZO 717	Comparative Animal Physiology	3 hours
GB 480	Senior Experience in Biology	1 hour
Upper division electives in biology		6 hours

6 additional hours from the courses listed below:

MC 350-351	Molecular & Cellular Biology & Lab	4 hours
ZO 409	Zoology Projects: Physiology	1-3 hours
ZO 459	Special Topics in Zoology: Physiology	1-3 hours
ZO 520	Neurobiology	3 hours
ZO 565-566	Histology & Lab	4 hours
ZO 760	Endocrinology	3 hours
ZO 762	Environmental Physiology	3 hours

Physical Science & Math Requirements (23-30 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours

CH 370-371	General Organic Chemistry & Lab	5 hours
OR		
CH 572/575	Organic Chemistry I & II	9-10 hours
PH 140-141	College Physics I & Lab	5 hours
MA 165	Basic Calculus	5 hours
OR		
MA 161	Calculus I	5 hours
OR		
PY 520	Statistics I	3 hours

Recommended Courses:

CH 560-561	Biochemistry & Lab	5 hours
CH 572-573	Organic Chemistry I & Lab	5 hours
CH 574-575	Organic Chemistry II & Lab	5 hours
PH 343-344	College Physics II & Lab	5 hours
ZO 515-516	Vertebrate Structure & Development & Lab	4-5 hours

BACHELOR OF SCIENCE BIOLOGY MAJOR

ZOOLOGY CONCENTRATION

This program is appropriate for students seeking a specialized program of study in zoology. The Zoology concentration emphasizes laboratory work including courses in physiology and organic chemistry. Students interested in fisheries and wildlife conservation should consider the Ecology and Biodiversity concentration. In addition to the courses listed here, students must complete all University-wide graduation requirements. See the core curriculum general education requirements in the General Education section of this catalog.

Biology Requirements (45 hours):

GB 140-141	Principles of Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425-426	General Genetics & Lab	4 hours
EB 480	Principles of Ecology	3 hours
EB 481	Field Ecology	2 hours
ZO 556-557	Natural History of Vertebrates & Lab	4 hours
GB 480	Senior Experience in Biology	1 hour
An invertebrate zoology course (ZO 440-441 or ZO 546-547)		4 hours
Upper division anatomy or physiology course (e.g., ZO 515-516 or ZO 570 or ZO 717 or ZO 760 or ZO 762)		3-5 hours
Upper division electives in biology		6-8 hours

Physical Science & Math Requirements (23-25 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab	5 hours
PH 140-141	College Physics I & Lab	5 hours
MA 165	Basic Calculus	5 hours
OR		
MA 161	Calculus I	5 hours
OR		
PY 520	Statistics I	3 hours
OR		
GB 750	Research Design & Analysis	3 hours

BACHELOR OF SCIENCE IN EDUCATION BIOLOGY TEACHING FIELD

The BSE degree is a teaching degree available to students desiring licensure to teach biology at the secondary level. There are two options available in this degree: Option A provides preparation for teaching biology as a second field; Option B provides for more intensive preparation for teaching biology as a major field. The student is advised by the biology education advisor of biology, who assists the student through a professional education curriculum.

In addition to the biology and cognate requirements listed here students must complete the University general education curriculum and be admitted into the professional phases of the program. For requirements necessary to be admitted into the professional phases, see the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

OPTION A - Two Teaching Fields

Completion of this program will allow the student to become licensed to teach biology in the secondary schools if the student has another teaching field in some discipline other than biology. Under the two-field option, the total number of credit hours to meet degree requirements of both teaching fields may exceed 120 hours.

Biology Requirements (38 hours):

GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
ZO 362-363	Human Anatomy & Physiology & Lab	5 hours
EB 480	Principles of Ecology	3 hours
EB 481	Field Ecology	2 hours
GB 425-426	General Genetics & Lab	4 hours
GB 584	Biology Education	3 hours
GB 480	Senior Experience in Biology	1 hour

Physical Science Requirements (5 hours):

CH 123-124	Chemistry I & Lab	5 hours
------------	-------------------	---------

OPTION B - One Teaching Field**Biology Requirements (47 hours):**

GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
ZO 362-363	Human Anatomy & Physiology & Lab	5 hours
GB 425-426	General Genetics & Lab	4 hours
EB 480	Principles of Ecology	3 hours
EB 481	Field Ecology	2 hours
GB 584	Biology Education	3 hours
GB 480	Senior Experience in Biology	1 hour
Approved Biology Electives		9 hours

Physical Sciences Requirements (5 hours):

CH 123-124	Chemistry I & Lab	5 hours
------------	-------------------	---------

BACHELOR OF SCIENCE IN EDUCATION SCIENCE TEACHING FIELD, GRADES 5-8

This program of courses is for middle school science endorsement. It is designed for pre-service and in-service teachers with other middle or secondary level teaching fields. This program closely parallels a similar program for elementary education pre-service and in-service teachers.

Life Science Requirements (12 hours):

GB 140-141	Principles of Biology & Lab	4 hours
OR		
GB 100-101	General Biology & Lab	
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & lab	4 hours

Physical Science Requirements (15 hours):

CH 123-124	Chemistry & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
PH 140-141	College Physics I & Lab	5 hours
PH 343-344	College Physics II & Lab	5 hours

Earth Science Requirements (8-10 hours):

ES 110-111	Introduction to Earth Science & Lab	5 hours
One of the following:		
ES 319	Meteorology	3 hours
GO 325	Earth History	3 hours
GO 326	Plate Tectonics	3 hours
PH 110-111	Introduction to Space Science	5 hours

All candidates will complete the following:

PS 516	Teaching Physical Sciences in Middle/High School	3 hours
OR		
GB 584	Biology Education	

All pre-service candidates will demonstrate instructional technology competence and should arrange to do part of their student teaching at the middle-school level.

MINOR IN BIOLOGY

The biology minor is not intended to provide students with an in-depth acquaintance with the biological sciences. It satisfies the minor program for the non-teaching major in a bachelor of science program and the second program for the student pursuing the degree Bachelor of Arts who desires a second program of study of less than 30 hours.

Minor/Second Program Requirements (20 hours):

GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
OR		
MC 316-317	Microbiology & Lab	
BO 212-213	Biology of Plants & Lab	4 hours
OR		
ZO 214-215	Biology of Animals & Lab	4 hours
	Upper division electives in biology	8 hours

PRE-PROFESIONAL PROGRAMS OF STUDY

The Department of Biological Sciences offers suggested curricula to allow students to meet the entrance requirements for professional schools. None of these are degree programs, rather they are recommended programs of study to fulfill the pre-requisites of professional schools. Students wishing to pursue these programs must fulfill the requirements of an appropriate concentration area to receive a B.S. degree in Biology. It is imperative that students work closely with an academic advisor within the department.

PRE-MEDICAL TECHNOLOGY or CLINICAL LABORATORY SCIENCE

Students interested in careers in medical technology or clinical laboratory science are advised to pursue the Bachelor of Science in Biology with a concentration in Microbial and Cellular Biology or Healthcare. After completing the requirements for this degree the student must apply for admission to an AMA accredited School for clinical training. If the clinical training is obtained from a degree-granting institution, a second Bachelor's degree may be awarded by that institution. Students interested in this program should discuss opportunities and requirements with the Pre-Medical Technology advisor, Department of Biological Sciences.

PRE-AGRICULTURE

This program of study prepares students for fields such as animal science, horticulture, agronomy, applied entomology, vocational agriculture education, and resource management. Courses are generally acceptable for transfer to Kansas State University or other schools offering degrees in agriculture. Employment opportunities are available in agri-business, research, management, and production agriculture.

PRE-MEDICINE AND PRE-OSTEOPATHIC MEDICINE

Pre-medical students are advised to select a major that best matches their interests and fulfills the entrance requirements for medical school. A major in Biochemistry and Molecular Biology or a major in Biology with a concentration in Healthcare are recommended programs. In addition to a strong GPA in the program of study, students must score well on the nationally administered Medical College Admissions Test.

The curriculum presented here is based on entrance requirements for regional medical and osteopathic schools. Students applying to a particular institution may find that the school of their choice requires fewer physical science and mathematics courses.

PRE-DENTISTRY

Pre-dentistry students are advised to select a major in Biology with the Healthcare concentration and work closely with the pre-dentistry advisor to fulfill the pre-requisites necessary to be admitted into a dental school. The specific curriculum will be dependent upon the schools of dentistry to which the students may wish to apply. Requirements for the various schools may be obtained from the advisor. In addition to a strong GPA, students must score well on the Dental Admittance Test (DAT). It is desirable that the pre-dental student receive as broad and liberal a college education as possible while meeting the pre-dental science requirements. For this reason, it is recommended that the student enroll in additional humanities, social science, and behavioral science courses. A course in jewelry-making is also encouraged.

PRE-OPTOMETRY

Outstanding students may be considered for admission to optometry school after three years of college work. All students must contact the optometry school of their choice before applying to have the latest prerequisites.

Most optometry schools recommend a major in one of the sciences. A major in Biochemistry and Molecular Biology or a major in Biology with a concentration in Healthcare are recommended. Courses in business, psychology, and sociology are encouraged electives.

Students, in consultation with their advisor, should clearly define the total requirements for admission to a specific optometry school. These include transcripts, interviews, the Optometry College Admissions Test, etc.

PRE-PHYSICAL THERAPY

The physical therapy professional (clinical) training programs at KUMC and WSU are both Doctor of Physical Therapy degree programs. A student must have a bachelor's degree for admission. Therefore, a student interested in applying to these programs should pursue requirements for a degree at ESU as well as pre-physical therapy course requirements. Students are encouraged to choose a major in Biology with a concentration in Healthcare.

The courses listed here are required for admission to professional physical therapy programs at the University of Kansas Medical Center (KUMC) and Wichita State University (WSU). Students who are interested in physical therapy programs outside the state should write for information to the appropriate institution.

Admission to schools of physical therapy is competitive and ESU cannot guarantee that students will be accepted. Students applying for these programs must have a strong GPA in their degree program. Students must also take the General Test of the Graduate Record Examination (GRE).

For current information, the student should consult with the pre-physical therapy advisor early in their career.

PRE-VETERINARY MEDICINE

Students desiring to attend veterinary school are urged to complete a baccalaureate degree of their choice while completing the pre-professional requirements. It is recommended students choose a Major in Biochemistry and Molecular Biology or Biology with a concentration in Healthcare.

The School of Veterinary Medicine, Kansas State University, requires the coursework listed below which constitutes 70 hours of equivalent courses at ESU. Students wishing to attend another veterinary school should consult an appropriate catalog. These 70 hours must be completed by the end of the spring term prior to the fall the student wishes to enter the professional veterinary program at KSU so courses may be in progress during the school year the student is applying.

FISHERIES AND WILDLIFE BIOLOGY

With a long history of excellence in fisheries & wildlife biology, natural history, ecology, and organismal biology, including the study of fishes, amphibians, reptiles, birds, mammals, plants, and invertebrates, we offer outstanding opportunities for students to specialize in fisheries & wildlife, natural resource management, and wildlife law enforcement. ESU Fisheries & Wildlife Track students conduct research in fisheries and wildlife topics and train for careers in natural resources conservation. ESU's Student Chapter of The Wildlife Society is active in promoting professionalism, networking, conservation awareness, and education in fisheries & wildlife management. Students seeking careers in Fisheries and Wildlife Biology should major in Biology with a concentration in Ecology and Biodiversity.

DEPARTMENT OF COMMUNICATION AND THEATRE

Professor Heidi Hamilton, Chair

(Persuasion, Gendered Communication, Social Movements)

Professor James L. Bartruff, Director of Theatre

(Directing, Acting, Shakespeare, and Musical Theatre)

Professors: Stephen E. Catt (Organizational Communication, Interviewing, Interpersonal Communication, and Communication Training and Development), Michael R. Dennis (Communication Theory and Health Communication), Nancy J. Pontius (Scenic and Lighting Design). **Associate Professors:** Sheryl D. Lidzy (Public Speaking and Interpersonal Communication). **Assistant Professors:** James Harris (Acting, Stage Movement), Jasmine R. Linabary (Social Media/Digital Communication, Small Group Communication and Public Speaking), Dennis Turney (Acting, State Voice, Dramatic Literature, and Theatre History), Susie Williams (Costume Design, Speech & Theatre Education). **Instructors:** Kenna Reeves (Interpersonal and Public Communication), Chris Loghry (Public Speaking, Directing Forensic Activities, and Argumentation and Debate). **Costume Shop Manager:** Amanda Dura. **Technical Director/Scene Shop Manager:** Chris Lohkamp.

<http://www.emporia.edu/communication/>

The faculty members in the department are widely known for their work in professional organizations as well as their commitment to excellence in the classroom. Several faculty members have held offices in state and national organizations and have won awards for their teaching and research.

The Department of Communication and Theatre offers a variety of majors and minors for students interested in speech communication, debate, interpretation, and theatre. Students may pursue teaching or non-teaching degree programs within the department. In addition to programs offered for the major or minor, the department sponsors a student chapter of the National Communication Association Honor Society and university activities in which the non-major (or non-minor) student may participate. The Pflaum Lecture honors the memory of George R. R. Pflaum, who chaired the department for many years.

The Basic Skills requirements of the General Education Core Curriculum must be completed prior to formal assignment of a major advisor for students wishing to major in communication. The programs in communication include study in critical & cultural communication, relational communication, organizational communication, and public relations. The department sponsors a nationally-ranked and highly competitive program in collegiate debate and hosts the nationally prominent annual Pflaum Debate Tournament. Students who wish to teach complete a program of study in the department with a reputation for excellence in teacher preparation. Graduates of the program are eligible to teach any subject in speech or theatre taught in Kansas high schools.

ESU Theatre productions are of the highest quality. They are well supported by the university, and well attended by the campus and local community. There are several productions during the year, including the Homecoming Scholarship Musical and an extremely popular Summer Theatre season.

Auditions and technical production crews for all theatre productions are open to all ESU students, regardless of major. These assignments and auditions usually occur during the first week of each semester. Students may call the Department of Communication and Theatre for more information about upcoming theatre auditions.

ESU Theatre regularly produces shows in three different venues. The Karl C. Bruder Theatre, located in King Hall, is a 400-seat proscenium theatre that serves as the home for Emporia State Summer Theatre and for many productions during the academic year. Albert Taylor Hall, a proscenium theatre that seats 1,200 and is located in Plumb Hall, is traditionally used for the Homecoming Scholarship Musical each fall. The Ronald Q. Frederickson Theatre, located in Roosevelt Hall, a black box theatre with flexible seating configurations, usually seats around 100.

The ESU Theatre program is an active participant in the Kennedy Center American College Theatre Festival, normally entering about four productions each year in the Festival and attending the Regional Festival each January. ESU Theatre has many notable successes in this Festival, including several productions invited to the Kennedy Center for the National Festival. ESU theatre students have won many awards for acting, designing, criticism, and playwriting, including three national winners for the prestigious Irene Ryan Acting Scholarship.

BACHELOR OF ARTS COMMUNICATION MAJOR

The major in communication under the Bachelor of Arts degree is a 33-semester hour program which is a broad, liberal arts experience as well as an introduction to major facets of communication theory and practice. The BA degree in communication is an appropriate degree leading to graduate school in communication, law school, or related occupational areas such as human resources, public relations, management, sales, communication media, the ministry, and public service. Students in this program complete the communication core courses (18 hours); ONE concentration (15 hours) in *Critical & Cultural Communication*, *Organizational Communication*, *Public Relations*, or *Relational Communication*; and 12 hours of a second program of study.

Required Courses (18 hours):

SP 100	Interpersonal Communication	
	OR	
SP 101	Public Speaking (whichever is not used to meet the General Education Basic Skill requirement)	3 hours
SP 303	Organizational Communication	3 hours
SP 312	Theories of Communication	3 hours
SP 315	Small Group Communication	3 hours
SP 332	Theories of Persuasion	3 hours
SP 580	Analysis of Communication Studies	3 hours

AREAS OF CONCENTRATION (15 hours):

Select one concentration.

CRITICAL & CULTURAL COMMUNICATION**Required courses (6 hours):**

SP 360	Communication & Gender	3 hours
SP 362	Social Movements	3 hours

Electives (9 hours):

SP 222	Argumentation & Debate	3 hours
SP 304	Online Communication	3 hours
SP 322	Theories of Argument	3 hours
SP 350	Intercultural Communication	3 hours
SP 351	Studies in Public Address	3 hours
SP 370	Special Problems in Speech	3 hours
SP 490	Seminar in Rhetoric & Communication	3 hours
SP 555	Contemporary Issues in Free Speech	3 hours

* see below

LEADERSHIP COMMUNICATION**Required courses (6 hours):**

SP 350	Intercultural Communication	3 hours
--------	-----------------------------	---------

OR

SP 360	Communication and Gender	3 hours
SP 502	Group Leadership	3 hours

Electives (9 hours):

SP 362	Social Movements	3 hours
SP 370	Special Problems in Speech	3 hours
SP 403	Communication Training & Development	3 hours
SP 500	Conflict Resolution	3 hours

* see below

ORGANIZATIONAL COMMUNICATION**Required Courses (6 hours):**

SP 403	Communication Training & Development	3 hours
SP 500	Conflict Resolution	3 hours

Electives (9 hours):

SP 304	Online Communication	3 hours
SP 306	Advanced Interpersonal Communication	3 hours
SP 313	Interviewing: Principles & Techniques	3 hours
SP 350	Intercultural Communication	3 hours
SP 360	Communication and Gender	3 hours
SP 370	Special Problems in Speech	3 hours
SP 502	Group Leadership	3 hours

* see below

PUBLIC RELATIONS**Required Courses (9 hours):**

SP 305	Principles of Public Relations	3 hours
SP 355	Public Relations Writing	3 hours
SP 405	PR: Cases and Campaigns	3 hours

Electives (6 hours):

SP 329	Principles of Radio/Television Broadcasting	3 hours
SP 365	Public Relations Techniques	3 hours
SP 441	Health Communication	3 hours
SP 474	Field Internship I	3 hours
JO 501	Law & Ethics of Journalism	3 hours

* see below

RELATIONAL COMMUNICATION**Required Courses (6 hours):**

SP 306	Advanced Interpersonal Communication	3 hours
SP 350	Intercultural Communication	3 hours

Electives (9 hours):

SP 304	Online Communications	3 hours
SP 325	Nonverbal Communication	3 hours
SP 360	Communication and Gender	3 hours
SP 370	Special Problems in Speech	3 hours
SP 400	Family Communication	3 hours
SP 441	Health Communication	3 hours
SP 500	Conflict Resolution	3 hours
SP 502	Group Leadership	3 hours

* see below

***Up to six hours of a combination of any of the following may apply:**

Independent Study
Internship
Intercollegiate Forensics

Required Second Program of Study (Minimum: 12 hours)

The student should work with an academic advisor within the department to complete a second program of study.

**BACHELOR OF SCIENCE
COMMUNICATION MAJOR**

The major in communication under the Bachelor of Science degree is taken by students interested in professional and management positions which call for a high degree of oral communication skills. The BS degree in communication is an appropriate degree leading to careers in human resources, public relations, management, sales, communication consulting, training, customer service, negotiation, public information, and speech writing. Students in this program complete the communication core courses (18 hours); ONE concentration (15 hours) in *Critical & Cultural Communication*, *Organizational Communication*, *Public Relations*, or *Relational Communication*; and 12 hours of communication electives.

Required Courses (18 hours)

SP 100	Interpersonal Communication	3 hours
--------	-----------------------------	---------

OR

SP 101	Public Speaking (whichever is not used to meet the General Education Basic Skill requirement)	3 hours

**BACHELOR OF SCIENCE IN EDUCATION
SPEECH AND THEATRE TEACHING FIELD**

The BSE in Speech and Theatre is a comprehensive teaching degree which prepares students to teach speech, theatre, debate, forensics, and radio/television at the secondary level, grades 6 through 12, in Kansas schools. Students must maintain an overall Cumulative GPA of 2.75, complete a sequence of required courses, and apply to the Department of Communication and Theatre for official admittance to the program.

See the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog. Please contact Susan Williams, coordinator of teacher education for speech and theatre at (620) 341-5701 or swilli13@emporia.edu for further information.

OPTION A – Two Teaching Fields**Required Courses (40 hours):**

SP 100	Interpersonal Communication	3 hours
SP 222	Argumentation and Debate	3 hours
SP 315	Small Group Communication	3 hours
SP 312	Theories of Communication	3 hours
SP 329	Principles of Radio-TV Broadcasting	3 hours
SP 470	Teaching of Speech	3 hours
SP 572	Directing Forensic Activities	3 hours
TH 101	Introduction to Theatre	1 hour
TH 121	Acting I	3 hours
TH 131	Stagecraft	3 hours
TH 132	Stagecraft Lab	1 hour
TH 272	Theatre Production I	1 hour
TH 340	Play Production	3 hours
TH 381	Survey of Dramatic Literature	3 hours

OR

TH 382	Modern Drama	3 hours
TH 426	Play Directing	3 hours
TH 472	Theatre Production II	1 hour

OPTION B - One Teaching Field**Required Courses:**

40 hours of courses as required by *Option A*.

Electives (8 hours):

The student and advisor will elect an additional 8 semester hours of courses with prefixes of SP or TH.

COMMUNICATION MINOR

A minor in communication may be taken by students who have majors in other disciplines. Courses in communication are excellent preparation for students in industry, public relations, management, media, counseling, law, and other professions that are heavily dependent upon good communication skills. Students whose academic major falls within the College of Liberal Arts and Sciences will normally take the minor with the liberal arts option; those whose academic major falls outside the College of Liberal Arts and Sciences will normally take the minor with the business option. Either minor is an appropriate choice for students whose academic program requires a minor as well as for students who are required to have a second program of study under the degree Bachelor of Arts.

LIBERAL ARTS OPTION (21 HOURS)

Required Courses (9 hours):

SP 100	Interpersonal Communication	
OR		
SP 101	Public Speaking	3 hours
(whichever course is not used to meet the General Education Basic Skill requirement)		
SP 306	Advanced Interpersonal Communication	3 hours
SP 307	Advanced Public Speaking	3 hours

Electives (12 hours):

Students select in consultation with an advisor in communication an additional twelve (12) hours of courses in communication to complete the minor. No more than three (3) hours total from the following courses may apply toward the minor: Intercollegiate Forensics (SP 142, 242, 342, and 442); Communication Internship (SP 570 and SP 571); and Independent Study (SP 471).

BUSINESS OPTION (21 HOURS)

Required Courses (15 hours):

SP 100	Interpersonal Communication	
OR		
SP 101	Public Speaking	3 hours
(whichever course is not used to meet the General Education Basic Skill requirement)		
SP 303	Organizational Communication	3 hours
SP 307	Advanced Public Speaking	3 hours
SP 313	Interviewing: Principles & Techniques	3 hours
SP 403	Communication Training & Development	3 hours

Electives (6 hours):

Students select in consultation with an advisor in communication an additional six (6) hours of courses in communication to complete the minor. No more than three (3) hours total from the following courses may apply toward the minor:

Intercollegiate Forensics (SP 142, 242, 342, and 442);
Communication Internship (SP 570 and SP 571); and
Independent Study (SP 471).

BACHELOR OF ARTS

THEATRE MAJOR

The degree Bachelor of Arts with a major in Theatre is a broad, general education experience as well as an introduction to major facets of theatre performance, production, design, history and literature. Majors are required to audition for productions and to contribute to all productions, either as cast members or as production crew members; they will normally be enrolled in theatre projects for each production on which they work. To be eligible for production assignments, students must meet academic eligibility standards as established by the department. In addition, the B.A. in theatre is an appropriate degree leading to graduate work in theatre or related fields, such as arts administration, law, public relations, or the ministry.

Required Courses (25 hours):

TH 101	Introduction to Theatre	1 hour
TH 121	Acting I	3 hours
TH 131	Stagecraft	3 hours
TH 132	Stagecraft Lab	1 hour
TH 221	Acting II*	3 hours
TH 350	Introduction to Theatrical Design	3 hours
TH 381	Survey of Dramatic Literature	
OR		
TH 382	Modern Drama	
TH 401	Senior Capstone	1 hour
TH 426	Play Directing	3 hours
TH 351	History of Costume and Décor*	3 hours
TH 472	Advanced Theatre Projects	1 hour

Required Course Options (9 hours)

Students must choose one course from each of the optional pairs listed below, for a total of 9 additional hours:

TH 210	Movement for Actors	
OR		
TH 223	Voice and Diction	3 hours
TH 457	Scene Design	
OR		
TH 454	Costume Design*	3 hours
TH 390	History of the Theatre I	
OR		
TH 391	History of the Theatre II	3 hours

*These courses have prerequisites.

Required Second Program of Study:

Students complete a second program of study from 15 to 30 hours in another discipline of their choice.

BACHELOR OF ARTS

SECOND PROGRAM OF STUDY: THEATRE

See the section on Theatre Minor.

BACHELOR OF FINE ARTS

THEATRE MAJOR

The degree Bachelor of Fine Arts with a major in Theatre provides intense preparation for students desiring to become competent and knowledgeable in all areas of theatre. General education requirements are those of LAS majors (non-teaching) and are printed in the undergraduate catalog. Majors are required to audition for productions and contribute to all productions, either in the cast or on a crew. Normally, students are enrolled in theatre projects for each production on which they work. To be eligible for production assignments, students must meet academic eligibility standards as established by the department.

Required Courses (57 hours):

TH 101	Introduction to Theatre	1 hour
TH 121	Acting I	3 hours
TH 131	Stagecraft	3 hours
TH 132	Stagecraft Lab	1 hour
TH 133	Make-up	2 hours
TH 210	Movement for Actors	3 hours
TH 221	Acting II	3 hours
TH 223	Voice and Diction	3 hours
TH 234	Stage Costuming	2 hours
TH 325	Script Analysis	3 hours
TH 331	Scenery Practicum	1 hour
TH 334	Costume Practicum	1 hour
TH 336	Stage Lighting	3 hours
TH 350	Introduction to Theatrical Design	3 hours
TH 351	History of Costume and Décor	3 hours
TH 381	Survey of Dramatic Literature	
	OR	3 hours
TH 382	Modern Drama	
TH 390	History of the Theatre I	3 hours
TH 391	History of the Theatre II	3 hours
TH 401	Senior Capstone	1 hour
TH 426	Play Directing	3 hours
TH 454	Costume Design	3 hours
TH 457	Scene Design	3 hours
TH 497	American Musical Theatre	
	OR	3 hours
TH 383	Introduction to Shakespeare	

Electives (13 hours):

Students will work with their advisor to select courses in theatre arts, communication, music, art, and/or dance.

THEATRE MINOR

Students who have majors in other disciplines may take a minor in theatre. The minor consists of 18 semester hours. Courses in theatre are excellent supplements for students planning careers in education, business, psychology, counseling, public relations, communication, law, and other fields that require the ability to work exceptionally well with other people. The theatre minor is an appropriate choice for students in the humanities or fine arts who wish to deepen their understanding of their major fields, as well as science majors who are seeking a breadth of undergraduate experiences. It is also an appropriate choice for students whose program requires a minor, as well as students who are required to have a second program of study under the degree Bachelor of Arts.

Required Courses (10 hours):

TH 121	Acting I	3 hours
TH 131	Stagecraft	3 hours
TH 132	Stagecraft Lab	1 hour
TH 381	Survey of Dramatic Literature	
	OR	3 hours
TH 382	Modern Drama	

Elective Courses (8 hours):

In consultation with an advisor in theatre, students will select an additional eight (8) hours of courses in theatre to complete the minor.

See Course Listing for course descriptions

DEPARTMENT OF ENGLISH, MODERN LANGUAGES, AND JOURNALISM

Professor Kevin Rabas, Chair

Professors: Kevin B. Kienholz (English Education, Curriculum Studies), Max McCoy (Journalism), Luisa Pérez (Spanish, Spanish Education), Kevin Rabas (Creative Writing), Rachelle M. Smith (Rhetoric and Composition), Jerald Spotswood (British Literature), Mel Storm (Medieval Literature, Linguistics), Amy Sage Webb (Creative Writing). **Associate Professors:** Daniel Colson (American Literature), Cynthia E. Patton (Eighteenth- and Nineteenth-Century British Literature, Japanese Film and Literature), Gregory Robinson (Spanish and Ethnic Literature) **Assistant Professors:** Michael Behrens (British Literature), Kristine Dekat (Journalism), Katherine Daily O’Meara (Director of Composition; Composition and Rhetoric, Linguistics), Rachel Spaulding (Spanish and Ethnic Literature). **Instructors:** Lindsey Bartlett (English), Richard Keller (English), Renate Kerwick (German), Kim McCoy (English, Journalism), Theresa Mix (English), Lisa Moritz (English), Joelle Spotswood (Director, Writing Center and English Language Learners Lab, English).

<http://www.emporia.edu/emli>

The Department of English, Modern Languages, and Journalism offers programs leading to the following degrees:

Bachelor of Arts

Bachelor of Science in Education – Secondary

The Bachelor of Arts degree offers majors in English, Modern Language – Spanish Concentration.

The Bachelor of Science in Education offers teaching fields in English, English – middle level, Journalism (second teaching field), Modern Language with emphasis in Spanish. A concentration in Foreign Language for Elementary School Teachers is also available.

Minors are available in English, Creative Writing, Journalism, Latin American Studies, and East Asian Studies. The department also houses the Intensive English Program.

English & Journalism

English has two primary goals: to teach students to write clearly and effectively, and to help them develop a critical understanding of print and non-print texts, as well as of the historical and cultural contexts in which those texts appear. To reach these goals, the department offers a broad variety of classes and programs for students at all levels, from introductory composition courses designed for entering first-year students to specialized upper-level courses in literature, film, language, creative and professional writing, and journalism. Courses at the first-year and sophomore levels help students develop the language competencies they need to succeed in other college-level work, and introduce them to literature, creative and professional writing, and journalism. Upper-level courses build upon these skills and abilities. In junior- and senior-level courses, students heighten their understanding of the development of

American, British, and world literatures as well as their appreciation of the English language; upper-level writing courses allow students to develop expertise through guided practice in creative, journalistic, and critical writing.

English and journalism courses are open to students in all majors. Students interested in improving their writing and interpretive skills may take a broad variety of courses as electives, as part of a minor in English, creative writing, or journalism, or as part of a second teaching field in English or journalism. Through their work in English and journalism, students have the opportunity to participate in *Quivira*, the campus literary magazine, *Sunflower*, the campus yearbook, and *The Bulletin*, the campus newspaper. The department also sponsors many other extra-curricular activities, including lectures and readings by both regionally- and nationally-known scholars and writers.

In addition to its other facilities, the Department of English is home to the campus **Writing Center**, located in 209C William Allen White Library, and the **Walker Professional Writing Computer Classroom**, located in 406 Plumb Hall.

The English curriculum offers majors leading to the Bachelor of Arts and the Bachelor of Science in Education. In addition, students may earn a minor in English, creative writing, or journalism, or may receive second teaching field licensure in English or journalism.

English also offers the Master of Arts degree in English. For more information see the Graduate Office web site, <http://emporia.edu/grad/english/>.

BACHELOR OF ARTS ENGLISH MAJOR

The Bachelor of Arts with a major in English fosters abilities traditionally required of liberal arts students in their academic work and in their later careers, including the interpretation of texts, the articulation of ideas (both orally and in writing), and professional research. The English major requirements ensure that students will be exposed to the widest possible range of texts, literary and historical movements, and critical approaches, while the flexible program structure allows students to choose courses that fit their own needs and interests.

Required Courses (24 hours):

EG 210	Introduction to Literary Study	3 hours
At least one course in each of the following areas:		
I.	American Literature	3 hours
II.	English Literature	3 hours
III.	World Literature	3 hours
IV.	Special Topics	3 hours
V.	Literary Criticism/Rhetoric	3 hours
VI.	Language/Linguistics	3 hours
VII.	Writing	3 hours

Elective Courses (15 hours):

Additional courses to make a total of 39 hours. Of all courses taken for the major, two must be in literature written before 1830 and two in literature written after 1830. At least 27 hours must be in courses numbered 300 or higher. **A minor or second program of study (12 hour minimum) is also required.**

BACHELOR OF SCIENCE IN EDUCATION ENGLISH TEACHING FIELD

The degree Bachelor of Science in Education with an English teaching field prepares the student for a career in high school and junior high/middle school teaching. It enables the prospective teacher to obtain a broad background in English as well as excellent preparation in the theory and practice of teaching literature, composition, language, and the mass media. See the core curriculum general education requirements in the General Education section of this catalog for additional requirements for the BSE. See the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog. A 2.6 GPA in the courses listed below is required for admission to teacher education and student teaching.

Required Courses (30 hours):

EG 210	Introduction to Literary Study	3 hours
EG 490	Teaching English in the Middle-Level And Secondary School	3 hours
At least one course in each of the following areas:		
I.	American Literature	3 hours
II.	English Literature	3 hours
III.	World Literature	3 hours
IV.	Media Literacy (mass media/non- Print): JO 200	3 hours
V.	Young Adult Literature	3 hours
VI.	Literary Criticism/Rhetoric	3 hours
VII.	History of the English Language	3 hours
VIII.	Writing: EG 301 or EG 280 or JO 301	3 hours

Elective Courses (12 hours):

Additional courses to make a total of 42 hours. Of all courses taken for the major, two must be in literature written before 1830 and two in literature written after 1830. At least 27 hours must be in courses numbered 300 or higher. Course work must include works written by female writers and by writers of color and ethnic diversity.

BACHELOR OF SCIENCE IN EDUCATION ENGLISH TEACHING FIELD MIDDLE-LEVEL LICENSURE

This program prepares students to teach English in grades 5-8 in a middle-level setting.

Required Courses (18 hours):

EG 490	Teaching English in the Middle-Level And Secondary School	3 hours
At least one course in each of the following areas:		
I.	Media Literacy (mass media/non- print): JO 200	3 hours
II.	Young Adult Literature	3 hours
III.	Literary Criticism/Rhetoric	3 hours
IV.	History of the English Language	3 hours
V.	Writing: EG 301 or EG 280 or JO 301	3 hours

Elective Courses (6 hours):

Additional courses to make a total of 24 hours.

BACHELOR OF SCIENCE IN EDUCATION (SECOND TEACHING FIELD ONLY) JOURNALISM LICENSURE

This program prepares students to teach journalism at the secondary level, grades 7-12.

Required Courses (27 hours):

JO 200	Mass Communication	3 hours
JO 301	News Reporting	3 hours
JO 302	Advanced Reporting	3 hours
JO 305	Publication Design	3 hours
JO 306	Photojournalism	3 hours
JO 403	History and Principles of American Journalism	3 hours
JO 490	Teaching Journalism in the Middle Level and Secondary School	3 hours
JO 501	Law and Ethics of Journalism	3 hours
JO 502	Editing	3 hours

ENGLISH MINOR

The English minor enables students to pursue a lively secondary interest in literature and in so doing to heighten their skills as critical readers, thinkers, and writers. These skills augment the expertise students gain in their major fields of study, and strengthen their chances for success in such fields as corporate or government service, law, and communication.

A minor in English consists of a minimum of 18 semester hours of coursework beyond Composition II. Students must take at least one course from each of the following groups.

Required Courses (6 hours)

I.	Early Literature	3 hours
	EG 220 Early World Literature	
	EG 230 Early British Literature	
	EG 240 Early American Literature	
II.	Later Literature	3 hours
	EG 221 Later World Literature	
	EG 231 Later British Literature	
	EG 241 Later American Literature	

Electives (12 hours):

Twelve hours of English electives should be selected in consultation with the departmental advisor. Electives should demonstrate a breadth of experience in both language and literature. At least half of the coursework taken for the English minor must be at the junior-senior level.

CREATIVE WRITING MINOR

The Creative Writing minor is a 24-hour program of study open to all students regardless of major. Through this minor, students receive guided practice in the writing of poetry, fiction, drama, and non-fiction prose, as well as an opportunity to share their work with others in both workshops and public events. Outlets for student work include *Quivira* (the region's oldest continuously-published campus literary magazine) and the Quivira literary club, which sponsors readings, dramatic productions, and other events. Career-oriented opportunities in publishing and the business of literary journals are available to students through the "Seminar in Literary Magazine," which produces ESU's national literary journal, *Flint Hills Review*.

Required Courses (15 hours), to be taken sequentially:

- | | |
|--|---------|
| 1. Introductory-level Creative Writing | 3 hours |
| EG 280 Introduction to Creative Writing | |
| 2. First-level Creative Writing | 3 hours |
| EG 383 Fiction Writing | |
| OR | |
| EG 385 Poetry Writing | |
| 3. Advanced-level Creative Writing | 3 hours |
| EG 583 Advanced Fiction Writing | |
| OR | |
| EG 585 Advanced Poetry Writing | |
| 4. Elective Study in Creative Writing | 3 hours |
| EG 587 Topics in Creative Writing | |
| OR | |
| EG 588 Studies in Creative Writing | |
| 5. Seminar Study in Creative Writing | 3 hours |
| EG 680 Undergraduate Seminar in Creative Writing | |

Electives (9 hours):

Of the nine hours of elective courses in English, at least one must be approved by a Creative Writing advisor as a course in 20th-century literature. Up to nine hours of coursework for the creative writing minor may also be applied toward the B.A. in English.

JOURNALISM MINOR

The minor in journalism, open to students with any major, provides a foundation for careers in journalism and related fields. A 2.6 GPA in the courses listed below is required for program completion.

Required Courses (18 hours):

JO 301	News Reporting	3 hours
JO 302	Advanced Reporting	3 hours
JO 305	Publication Design	3 hours
JO 403	History and Principles of Journalism	3 hours
JO 501	Law and Ethics of Journalism	3 hours
JO 502	Editing	3 hours

Electives (6 hours):

The remaining 6 hours required for the minor in journalism may be other courses in journalism or, with special permission of the journalism advisor, other areas of study.

Modern Languages

Degree programs with specialization in Spanish are available in the area of Modern Languages. These programs familiarize the student with the literature, grammar, linguistics, and culture of the target language. Modern Language majors are prepared for teaching; for work in government agencies, business, and industry; and for admission to graduate school.

The introductory courses are designed and presented to provide an initial experience with language for those who have not had the opportunity previously and at the same time are programmed to develop skills necessary for further concentrated study.

The Modern Languages curriculum offers the modern language major for the Bachelor of Arts degree with a program of study in Spanish. Teaching programs include the Bachelor of Science in Education, secondary, with a Spanish emphasis, an endorsement in English as a Second Language (ESL), as well as a concentration in Foreign Language for Elementary School Teachers.

BACHELOR OF ARTS**MODERN LANGUAGE MAJOR**

The program of study in Spanish for the degree Bachelor of Arts provides a well-rounded liberal arts background for the student planning to work in government agencies, business, and industry; enter graduate school; or pursue professional training in such fields as law and medicine. It is designed to provide students with an overall knowledge of the language, culture, and literature of the target language. Teacher licensure may be attained while pursuing a Bachelor of Arts degree.

The core curriculum general education requirements for the degree Bachelor of Arts are outlined in the General Education section of this catalog.

Requirements:

Twenty-nine hours (beyond first year courses which are a part of the general education component of the degree requirements). Moreover, a major in good standing must maintain a 3.0 grade point average in the target language.

Recommendation:

It is strongly recommended that all majors participate in an acceptable study program abroad in which they will be exposed to the target language and culture.

MODERN LANGUAGE MINOR

The program in Spanish for students completing a minor or needing a second program of study for the degree Bachelor of Arts consists of 13 hours of credit in one language (beyond the first-year courses).

BACHLOR OF ARTS**MODERN LANGUAGE MAJOR****SPANISH CONCENTRATION****Prerequisites:**

SA 110	Spanish Language & Culture I (or equiv.)	5 hours
SA 210	Spanish Language & Culture II (or equiv.)	5 hours

Required courses:

SA 313	Spanish Language & Culture III (or equiv)	5 hours
	OR	
SA 314	Spanish Heritage Language & Culture	5 hours
SA 339	Reading and Conversation	3 hours
SA 359	Advanced Grammar & Composition	3 hours
SA 365	Introduction to Hispanic Literature	3 hours
SA 379	Civilization of Spanish-Speaking Countries	3 hours
FL 499	Foreign Language Capstone Seminar	1 hour

Electives:

SA 305	Summer Study Abroad in Latin America	3 hours
SA 349	Studies in Spanish in the Professions	3 hours
SA 389	Studies in the Culture of Spain	3 hours
SA 399	Studies in Culture of Latin America	3 hours
SA 410	Phonetics and Conversation	3 hours
SA 415	Survey of Hispanophone Culture & Literature	3 hours
SA 426	Readings in Hispanophone Culture and Literature	3 hours
SA 435	Survey of Peninsular Literature and Culture	3 hours
SA 446	Readings in Peninsular Literature and Culture	3 hours
SA 455	Survey of Latin American Literature	3 hours

SA 466	Readings in Latin American Literature and Culture	3 hours
SA 475	Independent Study	1-4 hours
SA 489	Studies in Transatlantic Culture	3 hours
SA 495	Special Topics in Spanish	3 hours
SA 635	Directed Studies in Spanish	1-3 hours
SA 695	Special Topics in Spanish Language and Literature	3 hours

Required Second Program of Study:

The student is required to complete a second program of study from 15 to 30 hours in another discipline of the student's choice.

SPANISH (SECOND PROGRAM OF STUDY)

This program of study is intended to provide students an in-depth familiarity with Spanish. It is designed to accompany a major program of study in a separate discipline, fulfilling the Bachelor of Arts degree requirement for a second program of study from 15 to 30 hours in another discipline.

Requirements:

Thirteen hours (beyond first year courses which are a part of the general education component of the degree requirement).

Prerequisites:

SA 110	Spanish Language & Culture I(or equiv.)	5 hours
SA 210	Spanish Language & Culture II(or equiv.)	5 hours

Required courses:

SA 313	Spanish Language & Culture III	4 hours
SA 314	Spanish Language & Culture IV	3 hours
SA 339	Reading and Conversation	
OR		
SA 359	Advanced Grammar & Composition	3 hours

Electives:

Select as needed to fulfill 13 hour requirement:

SA 339	Reading & Conversation	3 hours
SA 359	Advanced Grammar & Composition	3 hours
SA 365	Introduction to Literature	3 hours
SA 379	Civilization of Spanish-Speaking Countries	3 hours
SA 389	Studies in the Culture of Spain	3 hours
SA 399	Studies in Culture of Latin America	3 hours
SA 365	Introduction to Literature	3 hours
SA 410	Phonetics and Conversation	2 hours
SA 446	Readings in Peninsular Literature	3 hours
SA 466	Readings in Latin American Lit.	3 hours
SA 475	Independent Study	1-4 hours
SA 495	Special Topics in Spanish	3 hours

BACHELOR OF SCIENCE IN EDUCATION –SECONDARY MODERN LANGUAGE TEACHING FIELD

The program of study in Spanish for the degree Bachelor of Science in Education prepares the student to enter the teaching profession. In addition to secondary teaching, this degree is excellent preparation for entry into various training programs in business and industry, government positions, and graduate school. The credit hours include work in language, literature, culture, and composition.

There are two options available in this degree program. Option A requires two teaching fields (example: History-Spanish). Option B requires a teaching field in only a language. (It is also possible to attain teaching licensure while pursuing a BA degree.) The core curriculum general education requirements are outlined in the General Education section of this catalog. See the Professional Education requirements for the Bachelor of Science in Education – Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

Option A – Requirements:

Twenty-two hours (beyond SA 210). Moreover, a student in good standing must maintain a 3.0 grade point average in the modern language.

Option B – Requirements:

Thirty-one hours (beyond SA 210). An oral interview is required upon entering the program and before graduation to evaluate progress and proficiency. Students should contact the Director of Modern Languages to schedule their oral interview. Graduates must attain an ACTFL Oral Proficiency rating of "Advanced Low." (This assessment may be included in the methods course FL 540). Moreover, a student in good standing must maintain a 3.0 grade point average in the modern language.

Recommendation:

It is strongly recommended that all majors participate in an acceptable program of study abroad in which they are exposed to the target language and culture.

SPANISH EMPHASIS

OPTION A – Two Teaching Fields

Prerequisites:

SA 110	Spanish Language & Culture I(or equiv.)	5 hours
SA 210	Spanish Language & Culture II(or equiv.)	5 hours

Required courses:

SA 313	Spanish Language & Culture III (or equiv.)	5 hours
OR		
SA 314	Spanish Heritage Language & Culture	5 hours
SA 339	Reading & Conversation	3 hours
SA 359	Advanced Grammar & Composition	3 hours
SA 379	Civilization of Spanish-Speaking Countries	3 hours
FL 479	Foreign Language Acquisition	3 hours
FL 499	Foreign Language Capstone Seminar	1 hour
FL 540	Language Teaching Methodology	3 hours

Electives:

AB 110	Arabic Language & Culture I	5 hours
AB 210	Arabic Language & Culture II	5 hours
AS 110	Chinese Language & Culture I	5 hours
AS 210	Chinese Language & Culture II	5 hours
FR 110	French Language & Culture I	5 hours
FR 210	French Language & Culture II	5 hours
GR 110	German Language & Culture I	5 hours
GR 210	German Language & Culture II	5 hours
SA 349	Studies in Spanish in the Professions	3 hours
SA 365	Introduction to Hispanic Literature	3 hours
SA 389	Studies in the Culture of Spain	3 hours
SA 399	Studies in Culture of Latin America	3 hours
SA 410	Phonetics and Conversation	3 hours
SA 435	Survey of Peninsular Literature and Culture	3 hours

SA 446	Readings in Peninsular Literature and Culture	3 hours
SA 455	Survey of Latin American Lit.	3 hours
SA 466	Readings in Latin American Literature and Culture	3 hours
SA 475	Independent Study	1-4 hours
SA 489	Studies in Transatlantic Lit & Culture	3 hours
SA 495	Special Topics in Spanish	3 hours
SA 635	Directed Studies in Spanish	1-3 hours
SA 695	Special Topics in Spanish Language and Literature	3 hours

OPTION B – One Teaching Field

Prerequisites:

SA 110	Spanish Language & Culture I (or equiv.)	5 hours
SA 210	Spanish Language & Culture II (or equiv.)	5 hours

Required courses:

SA 313	Spanish Language & Culture III (or equiv.)	5 hours
OR		
SA 314	Spanish Language & Culture IV	5 hours
SA 339	Reading & Conversation	3 hours
SA 359	Advanced Grammar & Composition	3 hours
SA 379	Civilization of Spanish-Speaking Countries	3 hours
FL 479	Foreign Language Acquisition	3 hours
FL 540	Language Teaching Methodology	3 hours

Electives:

AB 110	Arabic Language & Culture I	5 hours
AB 210	Arabic Language & Culture II	5 hours
AS 110	Chinese Language & Culture I	5 hours
AS 210	Chinese Language & Culture II	5 hours
FR 110	French Language & Culture I	5 hours
FR 210	French Language & Culture II	5 hours
GR 110	German Language & Culture I	5 hours
GR 210	German Language & Culture II	5 hours
SA 349	Studies in Spanish in the Professions	3 hours
SA 365	Introduction to Hispanic Literature	3 hours
SA 389	Studies in the Culture of Spain	3 hours
SA 399	Studies in Culture of Latin America	3 hours
SA 410	Phonetics and Conversation	3 hours
SA 415	Survey in Hispanophone Lit & Culture	3 hours
SA 426	Readings in Hispanophone Lit & Culture	3 hours
SA 435	Survey of Peninsular Literature and Culture	3 hours
SA 446	Readings in Peninsular Literature and Culture	3 hours
SA 455	Survey of Latin American Lit.	3 hours
SA 466	Readings in Latin American Literature and Culture	3 hours
SA 475	Independent Study	1-4 hours
SA 489	Studies in Transatlantic Lit & Culture	3 hours
SA 495	Special Topics in Spanish	3 hours
SA 635	Directed Studies in Spanish	1-3 hours
SA 695	Special Topics in Spanish Language and Literature	3 hours

DUPLICATION OF HIGH SCHOOL CREDIT

Ordinarily, one year of high school language is evaluated as being the equivalent of one semester of college language and persons with two years of high school credit in one language. However, students who have had one year of high school credit in French, German, or

Spanish may enroll in a Language & Culture I language course in that language; persons with two years of high school credit in one language may enroll in a Language & Culture II language course in the language. All students are encouraged to take the placement exams in French, German or Spanish available via the Director of Modern Languages. No Placement tests or duplication of high school credit are available for other Chinese or Arabic.

INTENSIVE ENGLISH COURSES

The Intensive English Program is intended to make admission possible for those non-native speakers of English who are academically eligible for admission to study at Emporia State University, but have not met the required minimum English proficiency test scores. Intensive English provides non-credit courses in basic English language skills to students whose proficiency in English is determined to be too low to commence a full program of academic study. Descriptions of Intensive English courses designed for international students are located in this section.

MINOR IN LATIN AMERICAN STUDIES

The minor in Latin American Studies is a multidisciplinary program that provides students with a chance to explore the people, culture, and geography of Latin America as well as the Latino Culture in the United States. The program combines courses from disciplines, such as art, history, geography, biology, sociology, literature, music, and Spanish in order to provide an intensive exploration of Latin America. A minor in Latin American Studies would be beneficial to students interested in many types of careers including teaching, public service, health care, law, the sciences, the arts, the media, and other fields. The minor in Latin American Studies provides a wonderful complement to a student's participation in the International Student Exchange Program, such that courses taken in the Latin American Studies Program would add to the international experience of the student.

Website: <http://academic.emporia.edu/mooredwi/latinamer>

Requirements:

To complete the minor a student must complete at least 14 hours of prerequisite Spanish through Intermediate Spanish I (SA 313), the equivalent in Portuguese, or pass an equivalency examination. In addition, the student must complete 18 hours of course work from the Latin American Studies program. The course work includes 1 required course (CW 210, Introduction to Latin American Studies) and 15 hours of courses which must be from the approved list of courses in Latin American Studies.

NOTE: Specific courses that may be applied to the minor are listed each semester in the Latin American Studies section of the class schedule.

Additional courses may apply to the program, with approval of the Latin American Studies Steering Committee.

Required (3 hours):

CW 210	Introduction to Latin America	3 hours
--------	-------------------------------	---------

Electives (15 hours):

Select at least 6 hours from each of two different disciplines listed below.

Modern Languages

SA 379	Civilization of Spanish Speaking Countries	3 hours
SA 399	Studies in Culture of Latin America	3 hours
SA 455	Survey of Latin American Literature	3 hours
SA 466	Readings in Latin American Literature	3 hours
SA 475	Independent Study	1-4 hours

Social Sciences/Sociology

GE 300	Geography of Latin America	3 hours
PO 427	Government and Politics of Latin America	3 hours

Natural Sciences

GB 459	Field Biology of Mexican Vertebrates	2 hours
GB 409	Biology Projects	1-3 hours

Art

AR 300/500	Exploring Art in Latin America	1-3 hours
AR 300/500	Latin American Art History	1-3 hours
AR 300/500	Studio Art in Latin America	1-3 hours

See Course Listing for course descriptions.

DEPARTMENT OF INTERDISCIPLINARY STUDIES

Professor Alfredo Montalvo, Chair

<http://www.emporia.edu/info/degrees-courses/undergrad/interdisciplinary-studies>

The Department of Interdisciplinary Studies at Emporia State University offers a baccalaureate degree granted by the College of Liberal Arts and Sciences – the Bachelor of Interdisciplinary Studies (BID), and the minor in Ethnic and Gender Studies. The undergraduate degree program incorporates courses from multiple academic areas and provides students with the flexibility of designing their own program of study. The interdisciplinary Ethnic and Gender Studies minor will expand students' awareness of issues regarding ethnicity and gender, and is appropriate for students pursuing any major on campus.

BACHELOR OF INTERDISCIPLINARY STUDIES

NOTE: The BID degree can be pursued and completed online as well as on campus.

Each BID student, with input from the BID advisor, will develop a unique and personalized program of study. Students must fulfill the following requirements:

1. Complete a minimum of 36 hours for the BID program. The specific academic areas of emphasis for this coursework will be specified through consultation with the BID advisor. Courses to be taken as part of the degree must be consistent with these areas of emphasis, and should be part of a plan developed by the student working with the advisor.
2. Complete ID 302, Introduction to Interdisciplinary Studies (3 credit hours), and ID 490, BID capstone (3 credit hours).
3. Of the remaining 30 hours, students must complete at least 18 after declaring the BID as their program of study.
4. Only 6 credit hours applied to the BID program of study can be at the 200 level. The remaining 30 hours must be at 300 or above.
5. Earn a minimum grade of C in each course included in the program of study.
6. Earn a minimum GPA of 2.5 in the program of study coursework.

In addition, students must complete university graduation requirements, including: the general education program for the Bachelor of Science degree; 45 credit hours of upper-division coursework; a 2.0 overall GPA; 120 credit hours of total coursework.

Students should contact the Department of Interdisciplinary Studies, 433 South Morse Hall, 620-341-5583 or dis@emporia.edu with questions or for additional information about the program.

MAJOR IN GENERAL STUDIES (GRS)

The GRS major is an online or on-campus degree completion program that allows students to finish a bachelor's degree with the greatest flexibility possible.

Students must:

1. Complete the equivalent of two academic years of coursework (60 credit hours) in closely related subjects, which may include a minor in any subject.
2. Complete ID 492, GRS capstone.
3. Complete elective courses to reach 120 credit hours.

Students must complete all university graduation requirements, including: the general education program equivalent to the requirements for the Bachelor of Science degree; 45 credits of upper-division coursework; a 2.0 overall GPA; and meet ESU residency requirements.

ETHNIC & GENDER STUDIES PROGRAM

The Ethnic and Gender Studies Program at Emporia State University is an interdisciplinary program of study, established through the College of Liberal Arts and Sciences, that serves as an umbrella program for the distinct but often related fields of ethnic studies and gender studies. Emporia State offers a minor in Ethnic and Gender Studies.

Ethnic and Gender Studies are interdisciplinary fields which explore the humanities areas of art, drama, film, folklore, history, literature, music, religion, among others; explore the social and political problems faced by different ethnic groups and women; and investigate race and gender issues in the study of the social and physical sciences.

The Ethnic and Gender Studies minor offers courses in programs including, but not limited to, communication, English, geography, history, sociology, anthropology and Spanish. Courses explore the social and political problems faced by different ethnic groups and women, and present analyses and interpretations of particular cultural or gender-based experiences, using methodologies and perspectives from different disciplines. ID 301, the Issues in Ethnic and Gender Studies course is an option in the multicultural perspectives component of the general education curriculum.

The Ethnic and Gender Studies program also sponsors or co-sponsors multiple events each academic year, bringing in speakers, performances, and workshops for a variety of constituencies, including students, faculty, and community members. The program, at its annual Women's History Month reception, recognizes the contributions of women on campus and in the community, through the awarding of the Susan B. Anthony Scholarship, the Dr. Mary Headrick Award, and the Ruth Schillinger Award.

For more information, please see <http://www.emporia.edu/ethngend/> or contact the Department of Interdisciplinary Studies.

ETHNIC & GENDER STUDIES MINOR

Students are required to take ID 301, Issues in Ethnic and Gender Studies, and 15 additional credit hours of Ethnic and Gender studies program courses, at the 300-level and above, in at least three different disciplines or academic areas.

All courses chosen for the minor must be on the list of approved Ethnic and Gender Studies Courses.

NOTE: Specific courses that may be applied to the minor are listed each semester in the ethnic/gender studies program section of the class schedule and on the program webpage.

Students are encouraged to confer with the Ethnic and Gender Studies Program Director for guidance in course selection.

Students are required to submit for approval on a pass/fail basis a portfolio (ID 491) representative of their work in ethnic and gender studies classes.

In addition, students are required to attend on- or off-campus events that center on issues of race, class, or gender, and at least eight of these are to be documented in the portfolio.

See Course Listing for course descriptions.

DEPARTMENT OF MATHEMATICS AND ECONOMICS

Professor Brian Hollenbeck, Chair (Mathematics)

Professors: Marvin Harrell (Mathematics), Brian Hollenbeck (Mathematics), Connie Schrock (Mathematics), Qiang Shi (Mathematics). **Associate Professors:** Essam Abotteen (Mathematics), Rob Catlett (Economics), Daniel Miller (Mathematics), Larry Scott (Statistics), Chad Wiley (Mathematics). **Assistant Professors:** Adelaide Akers (Mathematics), Thomas Mahoney (Mathematics), Bekah Selby (Economics). **Instructors:** Robert Kornowski (Mathematics), Kindra Wells (Mathematics).

<http://www.emporia.edu/mathecon/>

The Department of Mathematics and Economics offers programs leading to the following degrees:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Science in Education
- Master of Science

For the degree Bachelor of Arts, there is a major in mathematics. For the degree Bachelor of Science, there are majors in mathematics and economics. For the degree Bachelor of Science in Education, there are programs for licensure in mathematics. In addition, the department offers dual-degree engineering programs in conjunction with other universities. The specific requirements for each of these programs are given on the following pages. While certain basic background courses in the discipline are required, the student is permitted considerable flexibility in selecting course work and independent study to meet their specific career goals.

Majors may prepare for a variety of career possibilities in teaching, mathematics or economics. Students are well prepared for further education in graduate or professional programs.

Although the Bachelor of Science is the traditional degree in this area, the Bachelor of Arts degree is intended for students who want a broad liberal arts education while majoring in a selected discipline. Students seeking teaching licensure normally work toward the Bachelor of Science in Education, although licensure is possible within the B.S. or B.A. in the discipline.

The department also offers a master's degree. For more information see the Graduate Office web site, <http://emporia.edu/grad/>.

Economics

BACHELOR OF SCIENCE ECONOMICS MAJOR

The economics major is designed to develop and enhance critical and analytical thinking in a focused program of study. The Bachelor of Science with a major in economics requires a total of 30 hour in economics and cognate areas. The core of the program includes a broad-based exposure to economics in either EC 101 or BC 103 and BC 104 followed by courses in intermediate microeconomics, intermediate macroeconomics, and statistics. Beyond the core, students take additional advisor-approved electives in economics and related areas to complete the 30 hour requirement.

Degree Pattern for Economics Majors:

General education requirements	49 hours
Major requirements	30 hours
Electives and/or optional minor	<u>41 hours</u>
	120 hours

Economics Major Requirements (30 hours):

BC 103	Principles of Economics I* and	3 hours
BC 104	Principles of Economics II*	3 hours

OR

EC 101	Basic Economics	3 hours
EC 305	Intermediate Microeconomics	3 hours
EC 306	Intermediate Macroeconomics	3 hours
MA 341	Intro to Probability and Stats	OR
MA 380	Probability and Statistics	OR
BU 255	Business Statistics	OR
	Any other approved statistics course	3 hours

Economics and Other Elective Courses

Any EC or BC courses including internships and/or Independent study in economics.

EC 499	Economics Capstone	OR
	An approved alternative	

Optional Mathematics Courses

MA 161	Calculus I	OR
MA 165	Basic Calculus	5 hours
		OR

5 hours of approved Calculus Based Math

*Students who earned credit in EC 101, Basic Economics, should not subsequently enroll in either BC 103 or BC 104, instead, they may substitute an upper-level economics course. Furthermore, EC 101 or BC 103 may be used to satisfy the requirements of the university's General Education Program and required courses in the major simultaneously.

ECONOMICS MINOR

A minor in economics is available to all undergraduate students and it consists of 15 hours in economics. A minimum of 9 hours in upper-level courses (i.e., economics courses numbered 300 or above) is required. (Students who have earned credit in EC 101, Basic Economics, should not subsequently enroll in either BC 103 or BC 104.)

Mathematics

BACHELOR OF ARTS MATHEMATICS MAJOR

The student desiring to be a mathematician who is well educated in the broad liberal arts tradition should take a 32 hour major in mathematics for the degree Bachelor of Arts. Upon graduation, this student will be extremely well prepared to pursue a graduate degree in mathematics or a related area, or to enter a job situation requiring versatility rather than specialization.

Required Courses (32 hours):

MA 125	Introduction to Mathematics	1 hour
MA 161	Calculus I	5 hours
MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 363	Calculus III	3 hours
MA 380	Probability & Statistics	3 hours
MA 425	Abstract Algebra	3 hours
MA 735	Advanced Calculus I	3 hours

Select one of the following (3 hours):

MA 728	Vector Spaces	3 hours
	OR	
MA 736	Advanced Calculus II	3 hours
	OR	
MA 741	Group Theory	3 hours
	OR	
MA 742	Ring Theory	3 hours
	OR	
MA 743	Field Theory	3 hours

Required Second Program of Study:

The student is required to complete a second program of study from 15 to 30 hours in another discipline of the student's choice.

BACHELOR OF SCIENCE MATHEMATICS MAJOR

This program is designed for students desiring considerable specialization in mathematics. Courses selected according to their desires and objectives will prepare the student to take employment as a mathematician in industry or government, or in the fields of science, engineering, computers, statistics, business, economics, or actuarial science.

See the general education requirements in the General Education section of this catalog.

Required Core Courses (29 hours):

MA 125	Introduction to Mathematics	1 hour
MA 161	Calculus I*	5 hours
MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 363	Calculus III	3 hours
MA 380	Probability & Statistics	3 hours
MA 425	Abstract Algebra	3 hours
MA 735	Advanced Calculus I	3 hours

*A student not sufficiently prepared for MA 161 may be required to take MA 160 first.

Additional Required Courses (18 hours):

Select one of the following (3 hours):

MA 130	Problem Solving with Computers	3 hours
CS 260	Programming & Problem Solving	3 hours

Select one of the following (3 hours):

MA 291	Mathematical Modeling	3 hours
MA 731	Statistics Using SAS	3 hours

Select two of the following (6 hours total):

MA 335	Differential Equations I	3 hours
MA 734	Complex Variables	3 hours
MA 760	Numerical Analysis	3 hours
MA 762	Optimization Techniques	3 hours
MA 765	Numerical Linear Algebra	3 hours

Select two of the following (6 hours total):

MA 728	Vector Spaces	3 hours
MA 736	Advanced Calculus II	3 hours
MA 740	Number Theory	3 hours
MA 741	Group Theory	3 hours
MA 742	Ring Theory	3 hours
MA 743	Field Theory	3 hours

Electives:

MA 291	Mathematical Modeling	3 hours
MA 335	Differential Equations I	3 hours
MA 352	Introduction to Biostatistics	3 hours
MA 410	Seminar in Mathematics	1-3 hours
MA 421	College Geometry	5 hours
MA 480	Independent Study	1-3 hours
MA 510	Technology in Mathematics	3 hours
MA 532	Mathematical Statistics I	3 hours
MA 542	Discrete Structures	3 hours
MA 581	Mathematical Modeling	3 hours
MA 591	Topics in Mathematics	1-3 hours
MA 714	Knot Theory	3 hours
MA 715	Topology	3 hours
MA 721	Projective Geometry	3 hours
MA 722	Non-Euclidean Geometry	3 hours
MA 728	Vector Spaces	3 hours
MA 731	Statistics Using SAS	3 hours
MA 732	Categorical Data Analysis	3 hours
MA 733	Mathematical Statistics II	3 hours
MA 734	Complex Variables	3 hours
MA 736	Advanced Calculus II	3 hours
MA 739	Applied Analysis	3 hours
MA 740	Number Theory	3 hours
MA 741	Group Theory	3 hours
MA 742	Ring Theory	3 hours
MA 743	Field Theory	3 hours
MA 746	Computational Algebraic Geometry	3 hours
MA 757	Graph Theory	3 hours
MA 758	Wavelets	3 hours
MA 760	Numerical Analysis	3 hours
MA 762	Optimization Techniques	3 hours
MA 763	Simulation Techniques	3 hours
MA 764	Regression Analysis	3 hours
MA 765	Numerical Linear Algebra	3 hours
MA 791	Topics in Mathematics	1-3 hours

In addition to the required courses above, students are encouraged to consult with their advisor about selecting additional courses from mathematics, statistics, economics, computer science, business, accounting, physics, biology, and chemistry in order to complete the 70 hour major. Furthermore, a total of 120 hours is needed for this program of study.

BACHELOR OF SCIENCE MATHEMATICS MAJOR STATISTICS CONCENTRATION

The curriculum for a major in mathematics with a concentration in statistics provides a sound foundation for a student seeking a vocation with a technological orientation or wishing to pursue graduate study in statistics. Graduates who have a strong background in statistics with some computer science and experience in an applied field have many career opportunities in actuarial science, government, business, and industry.

See the general education requirements in the General Education section of this catalog.

Required Core Courses (29 hours):

MA 125	Introduction to Mathematics	1 hour
MA 161	Calculus I*	5 hours
MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 363	Calculus III	3 hours
MA 380	Probability and Statistics	3 hours
MA 425	Abstract Algebra	3 hours
MA 735	Advanced Calculus I	3 hours

*A student not sufficiently prepared for MA 161 may be required to take MA 160 first.

Additional Required Courses (18 hours):

Select one of the following (3 hours):

MA 130	Problem Solving with Computers	3 hours
CS 260	Programming & Problem Solving	3 hours

Select one of the following (3 hours):

MA 291	Mathematical Modeling	3 hours
MA 731	Statistics Using SAS	3 hours

Select four of the following (12 hours total):

MA 532	Mathematical Statistics I	3 hours
MA 732	Categorical Data Analysis	3 hours
MA 733	Mathematical Statistics II	3 hours
MA 763	Simulation Techniques	3 hours
MA 764	Regression Analysis	3 hours

Electives:

MA 291	Mathematical Modeling	3 hours
MA 335	Differential Equations I	3 hours
MA 421	College Geometry	5 hours
MA 532	Mathematical Statistics I	3 hours
MA 542	Discrete Structures	3 hours
MA 591	Topics in Mathematics	1-3 hours
MA 715	Topology	3 hours
MA 728	Vector Spaces	3 hours
MA 733	Mathematical Statistics II	3 hours
MA 734	Complex Variables	3 hours

MA 736	Advanced Calculus II	3 hours
MA 740	Number Theory	3 hours
MA 741	Group Theory	3 hours
MA 742	Ring Theory	3 hours
MA 743	Field Theory	3 hours
MA 760	Numerical Analysis	3 hours
MA 762	Optimization Techniques	3 hours
MA 763	Simulation Techniques	3 hours
MA 764	Regression Analysis	3 hours
MA 765	Numerical Linear Algebra	3 hours
MA 791	Topics in Mathematics	1-3 hours

In addition to the required courses above, students are encouraged to consult with their advisor about selecting additional courses from mathematics, statistics, economics, computer science, business, accounting, physics, biology, and chemistry in order to complete the 70 hour major. Furthermore, a total of 120 hours is required for this program.

BACHELOR OF SCIENCE IN EDUCATION MATHEMATICS TEACHING FIELD

The Bachelor of Science in Education degree with a teaching field in mathematics enables the graduate to be fully licensed to teach mathematics in Kansas schools. Along with the mathematics courses listed, students will take a sequence of professional education courses. See the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

ELEMENTARY MAJOR MATHEMATICS CONCENTRATION

In addition to MA 110, MA 307, and MA 308 which are required of all elementary teacher candidates, the elementary education student desiring a concentration in mathematics must complete:

MA 130	Problem Solving with Computers	3 hours
MA 312	Algebra for the Elementary/Middle School Teacher	3 hours
MA 313	Geometry for the Elementary/Middle School Teacher	3 hours
MA 341	Introduction to Probability and Statistics	3 hours

MIDDLE SCHOOL/JUNIOR HIGH LICENSURE

Students pursuing the Bachelor of Science in Education with an elementary education major who wish to be licensed to teach mathematics in Kansas middle schools/junior high must take these courses.

Required Courses:

MA 112	Trigonometry	2 hours
MA 130	Problem Solving with Computers	3 hours
MA 165	Basic Calculus	5 hours
MA 229	Problem-Solving with Mathematics	3 hours
MA 309	Strategies for the Mathematics Classroom with Diverse Learners	3 hours
MA 312	Algebra for the Elementary/Middle School Teacher	3 hours

MA 313	Geometry for the Elementary/Middle School Teacher	3 hours
MA 341	Introduction to Probability and Statistics	3 hours
MA 460	History of Mathematics	1 hour
MA 470	Teaching Secondary Mathematics	3 hours
EE 317	Teaching Mathematics in Elementary Schools	2 hours

Note: MA 470 must be taken before student teaching in middle school mathematics. It is recommended that MA 470 be taken before Block II.

Students must have at least a 2.6 grade point average in mathematics courses prior to student teaching.

See the appropriate general education and professional education requirements elsewhere in this catalog.

MIDDLE-LEVEL LICENSURE

For students other than Elementary Education majors seeking middle-level license.

Required Courses:

MA 125	Introduction to Mathematics	1 hour
MA 112	Trigonometry	2 hours
MA 130	Problem Solving with Computers	3 hours
MA 165	Basic Calculus	5 hours
MA 229	Problem Solving with Mathematics	3 hours
MA 240	Discrete Mathematics	3 hours
MA 291	Mathematical Modeling	3 hours
MA 309	Strategies for the Mathematics Classroom With Diverse Learners	3 hours
MA 313	Geometry for the Elementary/Middle School Teacher	3 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 341	Introduction to Probability and Statistics	3 hours
MA 460	History of Mathematics	1 hour
MA 470	Teaching Secondary Mathematics	3 hours

Other Requirements:

- After completion of the courses above, under the direction of the Teachers College at ESU, the student will complete the equivalent of one semester student teaching experience for students with only one teaching field and half-semester student teaching experience when a student has two or more teaching fields at the appropriate level.

- MA 470 must be taken before you may student teach in the middle school mathematics. It is recommended that you take MA 470 after Phase I, but if necessary it is possible to make special arrangements.

- All students must have at least a 2.6 GPA in their mathematics courses prior to Phase II.

- It is recommended that all students seeking a middle-level license see a mathematics education advisor in the Department of Mathematics and Economics to develop/review their long-range plans.

- The successful completion of at least 120 hours is needed for this program.

SECONDARY MATHEMATICS LICENSURE

The student who desires mathematics as one of two teaching fields should choose Option A. The student preparing for one teaching field, mathematics only, should choose Option B.

The student must have at least a 2.6 grade point average in their mathematics courses prior to Phase II.

See the general education requirements in the General Education section of this catalog. See the professional requirements elsewhere in this catalog.

OPTION A – Two Teaching Fields

Required Courses (41 hours):

MA 125	Introduction to Mathematics	1 hour
MA 130	Problem Solving with Computers	3 hours
MA 161	Calculus I	5 hours
MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
MA 291	Mathematical Modeling	3 hours
MA 309	Strategies for the Mathematics Class- With Diverse Learners	3 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 380	Probability & Statistics	3 hours
MA 421	College Geometry	5 hours
MA 425	Abstract Algebra	3 hours
MA 460	History of Mathematics	1 hour
MA 470	Teaching Mathematics in the Middle/High School	3 hours

Note: MA 110 (College Algebra) and MA 112 (Trigonometry) or MA 160 (Pre-calculus) may be required if mathematics background is insufficient.

OPTION B – One Teaching Field

Complete the 41 hours required above in Option A and the following 6 hours:

MA 363	Calculus III	3 hours
--------	--------------	---------

Take one of the following:

MA 532	Mathematical Statistics I	3 hours
MA 728	Vector Spaces	3 hours
MA 734	Complex Variables	3 hours
MA 735	Advanced Calculus I	3 hours
MA 740	Number Theory	3 hours
MA 741	Group Theory	3 hours
MA 742	Ring Theory	3 hours
MA 743	Field Theory	3 hours

Other Requirements:

- After completion of the courses above, under the direction of the Teachers College at ESU, the student will complete the equivalent of one semester student teaching experience for students with only one teaching field and half-semester student teaching experience when a student has two or more teaching fields at the appropriate level.

- All students must have at least a 2.6 GPA in their mathematics courses prior to Phase II.

- The successful completion of at least 120 hours is needed for this program.

MATHEMATICS MINOR

The minor in mathematics will provide the interested student with an opportunity to acquire some minimal skills in mathematical problem solving which may be applied to other disciplines. A minor in mathematics consists of the following 19-hour program in mathematics.

Required Courses (13 hours):

MA 161	Calculus I	5 hours
MA 262	Calculus II	5 hours
MA 240	Discrete Mathematics	3 hours
OR		
MA 322	Introduction to Linear Algebra	3 hours

Electives (Select 6 hours):

MA 240*	Discrete Mathematics	3 hours
MA 363	Calculus III	3 hours
MA 291	Mathematical Modeling	3 hours
MA 322*	Introduction to Linear Algebra	3 hours
MA 335	Differential Equations I	3 hours
MA 380	Probability and Statistics	3 hours

**If not counted as a required course*

DUAL-DEGREE ENGINEERING

The dual-degree program in engineering allows the student to complete all of the requirements for the degree of bachelor of science with a major in mathematics, including all major requirements as well as those in general education, in three years and a summer of residence at Emporia State University. All that remains after the third year is to meet the requirement of at least 120 semester hours to graduate. The dual-degree program permits the student to transfer back to Emporia State as many hours of engineering courses as are necessary to fulfill the 120-hour requirement, and suspends the residency rule that requires a student to be currently enrolled at the time of graduation. A student can normally expect to graduate from ESU after their fourth year in college (and the first at the engineering school), and to receive the B.S. in engineering from either KSU or KU after the fifth year.

The dual-degree is available in conjunction only with Kansas State University and the University of Kansas. Listed below are the curricula that should be followed by students in the dual-degree programs with a major in mathematics. For additional information about the engineering program see Physical Science Engineering.

DUAL-DEGREE ENGINEERING

ESU BACHELOR OF SCIENCE

MATHEMATICS MAJOR

Recommended Schedule of Classes:

FIRST YEAR

Fall – 17 hours

CS 260	Programming and Problem Solving	3 hours
MA 161	Calculus I	5 hours
EG 101	Composition I	3 hours
SP 101	Public Speaking	3 hours
PE 100	Lifetime Fitness	1 hour
PS 100	Introduction to Engineering	2 hours

Spring – 17 hours

MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
	PE Activity	1 hour
EG 102	English Comp II	3 hours

(See summer course note, following second year schedule.)

SECOND YEAR

Fall – 16 hours

PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
PH 315	Statics	3 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 363	Calculus III	3 hours
	Fine Arts Elective	2 hours

Spring – 18 hours

MA 335	Differential Equations I	3 hours
MA 425	Abstract Algebra	3 hours
CS 501	Advanced Computer Programming	3 hours
BC 103	Principles of Economics I	3 hours
PH 316	Dynamics	3 hours
	Social/Behavioral Elective	3 hours

Summer -- 10 hours

CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
CH 126	Chemistry II	3 hours
CH 127	Chemistry II Lab	2 hours

Chemistry is offered only on alternate summers, so this session may be shifted to the summer between the first and second year. Not all engineering programs at KU require Chemistry II. Please refer to the table below.

THIRD YEAR

Fall -- 17 hours

MA 735	Advanced Calculus I	3 hours
	Mathematics Elective	3 hours
	Technical Elective	3 hours
	Literature/Ideas Elective	3 hours
	Cultural Diversity Elective	3 hours
	Fine Arts Elective	2 hours

Spring -- 18 hours

MA 380	Probability & Statistics	3 hours
	Mathematics Elective	6 hours
	Technical Electives	3 hours
	Social/Behavioral Science Elective	3 hours
	History Elective	3 hours

See “**TECHNICAL ELECTIVES**” and “**GENERAL EDUCATION INFORMATION**” at the end of the Dual Degree Engineering section.

**DUAL-DEGREE ENGINEERING
ESU BACHELOR OF SCIENCE
MATHEMATICS MAJOR
STATISTICS CONCENTRATION**
Recommended Schedule of Classes:

FIRST YEAR*Fall – 19 hours*

CS 260	Programming and Problem Solving	3 hours
MA 161	Calculus I	5 hours
EG 101	Composition I	3 hours
SP 101	Public Speaking	3 hours
PE 100	Lifetime Fitness	1 hour
PS 100	Introduction to Engineering	2 hours
	Technical Elective	2 hours

Spring – 17 hours

MA 240	Discrete Mathematics	3 hours
MA 262	Calculus II	5 hours
EG 102	Composition II	3 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
	PE Activity	1 hour

(See summer course note, following second year schedule.)

SECOND YEAR*Fall – 17 hours*

PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
MA 363	Calculus III	3 hours
MA 322	Introduction to Linear Algebra	3 hours
CS 340	Algorithms & Data Structures I	3 hours
	Technical Electives	3 hours

Spring – 18 hours

MA 335	Differential Equations I	3 hours
MA 380	Probability & Statistics	3 hours
MA 425	Abstract Algebra	3 hours
MA 731	Statistics Using SAS	3 hours
	Technical Elective	3 hours
FA 220	Analysis of Fine Arts	3 hours

Summer – 10 hours

CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
CH 126	Chemistry II	3 hours
CH 127	Chemistry II Lab	2 hours

Chemistry is offered only on alternate summers, so this session may be shifted to the summer between the first and second year.

Not all engineering programs at KU require Chemistry II.

Please refer to the table below.

THIRD YEAR*Fall – 17 hours*

MA 532	Mathematical Statistics I	3 hours
MA 735	Advanced Calculus I	3 hours
BC 103	Principles of Economics I	3 hours
	Literature Elective	3 hours
	History Elective	3 hours
	Fine Arts Elective	2 hours

Spring – 18 hours

MA 733	Mathematical Statistics II	3 hours
MA 764	Regression Analysis	3 hours
	Technical Elective	6 hours
	Social/Behavioral Science Elective	3 hours
	Multi-Cultural Elective	3 hours

TECHNICAL ELECTIVES**FOR DUAL-DEGREE ENGINEERING**

Technical electives are courses offered at Emporia State University which will meet certain engineering requirements at either Kansas State University or the University of Kansas. Please refer to the information below to see which courses should be selected.

(Transfer to Kansas State Univ.)		EECE	IE	ME
PS 100	Intro to Engineer	2	Elec	Elec
PS 200	Intro Engin Graphic	1-2	Elec	Req
PH 316	Dynamics	3	Req	Req
PH 410	Elec Circ Anal/Lab	4	Req	Req
PH 530	Heat & Thermodyn	3	---	---
PH 540	Modern Physics	3	Elec	---
MA 734	Complex Variables	3	Elec	---
CH126/127	Chem II/Lab	5	Req	Req
AC 233	Acct for Inv & Fin	3	Elec	Req
(Transfer to University of Kansas)		EE		ME
PS 100	Intro to Engineer	2	---	---
PS 200	Intro Engin Graphic	2-3	---	Req
PH 316	Dynamics	3	Elec	---
PH 410	Elec Circ Anal/Lab	4	---	Req
PH 530	Heat & Thermodyn	3	---	---
PH 540	Modern Physics	3	Req*	Elec
MA734	Complex Variable	3	Elec	Elec
CH126/127	Chem II/Lab	5	---	Req
AC 233	Acct for Inv & Fin	3	---	---

*At KU, PH 540 is "required" for DDE-Math and DDE-Statistics.

**GENERAL EDUCATION INFORMATION
FOR DUAL-DEGREE ENGINEERING****Emporia State University Requirements:**

Students in the dual-degree pre-engineering program must meet the LAS general education requirements with the following exceptions: SP101 must be taken rather than SP100; EC103 must be taken rather than EC101; and a Life Science (4 hrs) and Applied Science (3 hrs) courses are not required. MA 161 (Calculus I) should be substituted for the basic skills mathematics requirement; and CH123/124 (Chemistry I/Lab) for the physical science requirement.

Kansas State University Requirements:

KSU requires that all engineering students complete English Composition I, English Composition II (unless an "A" or "B" is earned in English Composition I), public speaking, one course in physical education, and technical writing (at the junior level).

In addition to the required courses, each KSU student is to complete 15 hours in the humanities and social sciences, which includes such areas as anthropology, art, economics, English, geography, history, journalism, modern language (advanced work only), music, philosophy, political science, psychology, sociology and speech. At least two courses must be taken at the 400 level or above, and not more than three credits may be taken in applied music or applied art.

The University of Kansas Requirements:

Students will be required to complete 15-18 semester hours in the areas of humanities and social sciences, depending upon the field of engineering. In selecting courses, students should follow these guidelines: 1) At least one course designated as a humanities course, and one designated as a social science course. 2) At least two courses offered by one department. 3) A maximum of four credits from such areas as band, chorus, orchestra, drawing, painting, and sculpture may be taken for general education credit.

See Course Listing for course descriptions.

DEPARTMENT OF MUSIC

Professor Allan Comstock, Chair

(Double Reeds, Music History)

Professor: Allan D. Comstock (Double Reeds, Music History), Dawn Courtney (Single Reeds, Music Education), Martín Cuéllar (Piano), Andrew Houchins (Music Theory, Technology), Gary Ziek (Bands, Trumpet, Jazz). **Associate Professors:** Tracy Freeze (Percussion, Technology), Penelope A. Speedie (Voice, Opera), **Assistant Professors:** Robert Ward (Choral Director, Music Education), Gaile Stephens (Music Education), Scott Wichael (Voice). **Instructors:** Kate Bergman (Flute), Tiffany Budke (Music Appreciation), Melinda Groves (Group Piano), Susan Mayo (Cello, Double Bass), Ramiro Miranda (Orchestra Director, Upper Strings), Terrisa Ziek (Horn, Music Education).

<http://www.emporia.edu/music/>

The Department of Music (NASM accredited since 1947) offers a comprehensive inventory of courses for those who wish to major or minor in music and for those who seek musical knowledge and experiences. Students may acquaint themselves with music as appreciative listeners, inquisitive scholars, or active performers. Music faculty are active in performance, composition, and arrangement, and publication efforts.

A state-approved degree program is offered to prepare teachers of music for the elementary and secondary schools of Kansas. Other degree programs are designed to enable students to pursue advanced studies in music and/or to find employment within the field of music.

The department provides a yearly schedule of concerts, recitals, master classes, and lectures which feature ESU music faculty and students as well as invited artist performers.

The undergraduate degree programs are as follows:

- Bachelor of Arts - Major in Music
- Bachelor of Music – Major in Music
 - Music Education Concentration
 - Music Performance Concentration

Certificate offered in the following area:

Music Performance

Two options for a Music Minor are available.

The department also offers a master's degree. For more information see the Graduate Office web site, <http://emporia.edu/grad/>.

BACHELOR OF ARTS

MUSIC MAJOR

(Changes Effective Fall 2013)

A broad-based music degree, the Bachelor of Arts degree prepares the student to enter an extensive variety of career options. Music opportunities include performance, studio instruction, church and community music careers, and occupations in the music service industry (merchandising, recording, booking, etc.). Other career directions might include community arts organizations, liberal arts options, and as a professional degree preparation.

The degree emphasis, along with traditional music preparation, includes opportunities for student-directed elective second concentrations. Students have extensive opportunities for solo, chamber, and ensemble performance.

This major encompasses 38 hours of core and applied music study with an additional 12 Second Field hours. Second Field options may be in music, in music technology, or in another academic field. See individual course descriptions for prerequisites and concurrent enrollment requirements.

Students must also complete general education requirements as stated in this catalog.

Music Theory (12 hours):

MU 108	Ear Training/Sight Singing 1	1 hour
MU 118	Music Theory 1	3 hours
MU 109	Ear Training/Sight Singing 2	1 hour
MU 119	Music Theory 2	3 hours
MU 208	Ear Training/Sight Singing 3	1 hour
MU 218	Music Theory 3	3 hours

Music History & Literature (9 hours):

MU 328	Music History I	3 hours
MU 329	Music History II	3 hours
MU 324	World Music	3 hours

Music Professional Studies (2 hours):

MU 099	Music Convocation (required each semester)	0 hours
MU 477	Basic Conducting	2 hours

Music Performance (16 hours):

	Applied Music-Primary Instrument	8 hours
	Group/Applied Piano	2 hours
	Music Ensembles	6 hours
MU 575	Senior Recital or	
MU 580	Senior Capstone Research Project	

Music Electives (2 hours):

2 hours

Second Field or Internship Requirements

12 hours

BACHELOR OF MUSIC

MUSIC MAJOR

(Changes Effective Fall 2019)

The degree Bachelor of Music with a Music Education concentration prepares the student to teach PreK-12 music. The program assumes that nurturing qualified music teachers includes the specialized preparation to develop performance skills; the music educator must be a competent performing musician.

Satisfactory completion of the requirements for this degree entitles the graduate to a license to teach music, issued by the Kansas State Department of Public Instruction to teach PreK-12 Instrumental Music or Pre-K 12 Vocal Music. The music education concentration selects the Instrumental Music Track or the Vocal Music Track. See individual course descriptions for prerequisites and concurrent enrollment requirements. Second area certification is available.

Requirements for admission to teacher education and recommendation for a teaching certificate are outlined under the degree Bachelor of Science in Education-Secondary Education Major. Students must successfully complete all Professional Education Requirements. See the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

Students must also complete general education requirements as stated in this catalog.

The degree Bachelor of Music with a concentration in Music Performance is recommended for the student interested in a career as a professional musician or as an independent teacher of music. It is especially appropriate for the student who plans to continue on to graduate study in music. The degree may be elected upon the recommendation of the music faculty after the student has demonstrated ability in their area of performance by means of a formal performance audition. This audition performance is generally taken at the end of the second semester of applied study.

The program centers on a core of courses in music theory, music history, and music literature. It is designed to provide a thorough musical education along with a broad expectation in the liberal arts and sciences. Performance requirements include a strong emphasis on solo, chamber, and large ensemble performance opportunities. Students may major in voice, piano, violin, viola, cello, double-bass, flute, clarinet, oboe, bassoon, saxophone, trumpet, trombone, horn, baritone horn, tuba, percussion, and composition.

Students must also complete general education requirements as stated in this catalog.

Music Theory (16 hours)

MU 108	Ear Training/Sight Singing 1	1 hour
MU 118	Music Theory 1	3 hours
MU 109	Ear Training/Sight Singing 2	1 hour
MU 119	Music Theory 2	3 hours
MU 208	Ear Training/Sight Singing 3	1 hour
MU 218	Music Theory 3	3 hours
MU 209	Ear Training/Sight Singing 4	1 hour
MU 219	Music Theory 4	3 hours

Music History & Literature (9 hours):

MU 324	World Music	3 hours
MU 328	Music History: Classical Greece to The Baroque Period	3 hours
MU 329	Music History: Classical Period to The 21 st Century	3 hours

Music Professional Studies (2 hours):

MU 099	Music Convocation (required each semester)	0 hours
MU 477	Basic Conducting	2 hours

Music Performance (19 hours):

	Applied Music-Primary Instrument	7 hours
	Music Ensembles (MU245/310/316/318/319)	7 hours
MU 131	Group Piano 1	1 hour
MU 132	Group Piano 2	1 hour
MU 133	Group Piano 3	1 hour
MU 134	Group Piano 4	1 hour
MU 391	Chamber Music	1 hour
MU 575	Senior Recital	0 hours

Music Education Concentration

Instrumental Music Track (14 hours):

MU 210	Foundations of Music Education	2 hours
MU 350	Voice Methods	1 hour
MU 352	String Methods	1 hour
MU 354	Woodwind Methods	1 hour
MU 356	Brass Methods	1 hour
MU 358	Percussion Methods	1 hour
MU 372	Marching Band Methods	1 hour
MU 474	Elementary Music Methods	2 hours
MU 484	Instrumental Conducting	2 hours
MU 494	Instrumental Music Methods	2 hours

Vocal Music Track (14 hours):

MU 210	Foundations of Music Education	2 hours
MU 237	Applied Piano for Vocal Students 1	1 hour
MU 320	Vocal Diction 1	1 hour
MU 321	Vocal Diction 2	1 hour
MU	Methods (3-4 hours)	

Selected from:

MU 352	String Methods	1 hour
MU 354	Woodwind Methods	1 hour
MU 356	Brass Methods	1 hour
MU 358	Percussion Methods	1 hour
MU 474	Elementary Music Methods	2 hours
MU 492	Choral Methods	2 hours
MU 482	Choral Conducting	2 hours
MU 524	Vocal Pedagogy	1 hour
MU	Music Electives	1 hour

Music Performance Concentration:

Instrumental Track (26 hours):

	Applied Concentration	16 hours
	Music Ensembles	1 hour
	Pedagogy Course	2 hours
MU 391	Chamber Music	1 hour
	Music Electives	6 hours
MU 375	Junior Recital	0 hours

Voice Track (26 hours):

	Applied Concentration	14 hours
	Music Ensembles	1 hour
	Applied Piano	2 hours
MU 320	Vocal Diction 1	1 hour
MU 321	Vocal Diction 2	1 hour
MU 524	Vocal Pedagogy	1 hour
MU 741	The Art Song	2 hours
	Music Electives	4 hours
MU 375	Junior Recital	0 hours

CERTIFICATES IN MUSIC

The certificates in music provide additional specialized study within specific music application areas. Study in certificate areas is limited to upper division students. Admission is with permission of the applied instructor for each specialized area.

Certificate, Graduate – Music Performance (12 hours)

MU 800	Applied Music	4 hours
MU 700/800	Performance Area Literature	3 hours
MU 600/800	Music Electives	5 hours

MUSIC MINOR

The undergraduate with an interest in music can select one of two music minors: Plan I-Applied Music and Performance; Plan II-Music Theory and History. This program, designed for the student who wants thorough preparation in some field other than music, provides the opportunity to pursue a minor concentration in music.

At the beginning of the student's first-year, but not later than the start of the junior year, the degree candidate may select the music minor. Before this choice can be official, the chair of music must meet with the candidate to approve the scheme of courses. Following this conference, the schedule of required courses for the music minor is entered on a "minor contract" that is filed with the registrar. The music minor does not lead to certification in music instruction. See individual course descriptions for prerequisites and concurrent enrollment requirements.

PLAN I - Applied Music and Performance

MU 108	Ear Training/Sight Singing 1	1 hour
MU 118	Music Theory 1	3 hours
MU 109	Ear Training/Sight Singing 2	1 hour
MU 119	Music Theory 2	3 hours
MU 324	World Music	3 hours
MU 328	Music History I	3 hours
	Or	
MU 329	Music History II	4 hours
MU	Applied Music	2 hours
MU	Music Ensembles	3 hours
MU	Music Electives	

PLAN II – Music Theory & History

MU 108	Ear Training/Sight Singing 1	1 hour
MU 118	Music Theory 1	3 hours
MU 109	Ear Training/Sight Singing 2	1 hour
MU 119	Music Theory 2	3 hours
MU 324	World Music	3 hours
MU 328	Music History I	3 hours
MU 329	Music History II	3 hours
MU	Music Electives	6 hours

MUSIC ENSEMBLES

The Department of Music offers a wide variety of performance ensembles available to all university students. Ensembles rehearse several hours weekly and give 1-2 public performances each semester. The following performance ensembles are available.

Bands-

MU 244	Hornet Revue (Pep Band)
MU 245	Marching Hornets (Marching Band)
MU 316	Wind Ensemble

Choirs-

MU 220	Community Chorus
MU 310	A Cappella Choir
MU 312	Opera Theatre
MU 391	Musical Theatre

Orchestra-

MU 319	Orchestra
MU 391E	Chamber Orchestra

Jazz-

MU 318	Jazz Ensemble
--------	---------------

Chamber Music-

MU 391A	Chamber Winds
MU 391B	Low Brass Ensemble
MU 391C	Percussion Ensemble
MU 391G	Chamber Choir
MU 391H	Flute Choir
MU 391I	String Ensemble
MU 391J	Clarinet Choir
MU 391K	Saxophone Ensemble

PRIVATE LESSONS AND PLACEMENT

There are no additional fees for private lessons for university students. One weekly half-hour private lesson per semester plus necessary practice is required for one credit hour. One weekly one hour private lesson per semester plus necessary practice is required for two or more credit hours. A student may study as many instruments as desired. Private instruction by a highly qualified faculty is available for voice, flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, baritone horn, tuba, violin, viola, cello, string bass, piano, percussion, composition, and digital audio. Students must successfully complete a performance audition for admission to study applied piano or applied voice. Enrollment within all areas of applied study is limited with preference given to music major students.

See Course Listing for course descriptions.

DEPARTMENT OF NURSING

Professor: Dr. Linda Adams-Wendling, Chair and Professor

Associate Professors: Kari Hess, Dr. Mary Mitsui, Gina Peek, Lynnette Schreiner

Assistant Professors: Keri Jarvis, Autumn McCullough, and Katelyn Haddock.

<http://www.emporia.edu/nursing/>

The Department of Nursing, a department in the College of Liberal Arts and Sciences, offers a four-year baccalaureate program that prepares graduates with the knowledge, skills and attitudes to function as professional nurses. Students completing the program receive the Bachelor of Science in Nursing (BSN) degree.

There are two educational tracks leading to the BSN, including the pre-licensure track and RN-BSN track. The majority of students will complete the required 120 credit hours to earn the BSN degree. The nursing curriculum usually requires two years for completion once admitted into the major. A seamless academic progression plan for the LPN to earn the BSN degree is available within the pre-licensure BSN educational track. Graduates of Department of Nursing are eligible to take the national collegiate licensure examination for registered nurses (NCLEX-RN). Contact the nursing website for information about the pre-licensure BSN educational track.

The program also offers the RN-to-BSN educational track for registered nurses seeking to earn their BSN. An individual who has completed a nursing program and is licensed in Kansas as a RN may apply for admission as an articulating student to the Department of Nursing.

Contact the nursing Website or the nursing department for information about the RN-to-BSN.

The size of the department allows each student to have access to individual guidance throughout the program, and the nursing faculty works with students in the classroom, laboratory, simulation, and practicum settings. Faculty members are committed to scholarly, professional, and community activities and promote student involvement in these endeavors.

Recipients for any available nursing scholarships are selected on scholarship fund specific criteria. Criteria generally address academic performance and financial need.

APPLICATION STATEMENT:

Program prerequisites for the nursing major include admission to Emporia State University and a minimum of 60 credit hours in required non-nursing courses. Admission prerequisite or foundational courses include all non-nursing courses listed on the recommended schedule below. An applicant may choose any course that meets general education requirements if the admission prerequisite or foundational course is marked with an asterisk (*). With department approval, a suitable course may be substituted if the admission prerequisite course is marked with two asterisks (**).

Applicants should have completed the 60 credit hours by the end of the spring semester of the application year. Applications are due May 1 of each admission year for fall or spring admission consideration (see admission policies on the nursing website). Applicants who need to complete no more than six nursing prerequisite or foundational hours prior to entrance in the nursing program should submit with the application a written request for special consideration. The 60 credit hours must be completed by the end of the summer semester prior to entrance in the nursing program of the application year.

Grades earned in the admission prerequisite courses will be used to calculate the Department of Nursing admission GPA. A minimum Department of Nursing admission GPA of 2.5, with at least a C in the admission prerequisite courses, is required.

The required standardized pre-admission test as designated by the Department of Nursing must be completed. Test information, including testing dates, is available from the Department of Nursing website or office. Students are responsible for reserving a testing date and time and for paying the costs associated with the pre-admission test. Successful certified nursing assistant (CNA) completion is required to begin the nursing major.

Non-native speakers of English are required to take the Test of English as a Foreign Language Internet Based Test (TOEFL iBT) and meet the minimum score requirements as described in the ESU Department of Nursing admission policies. Contact the Department of Nursing for further information.

General education and Department of Nursing's curriculum requirements are outlined in the Department of Nursing's admission policies. Retention and progression policies are detailed in the Department of Nursing's Student Handbook. Students enrolled in the Department of Nursing should refer to the withdrawal policy regarding nursing courses. Students are required to maintain cardiopulmonary resuscitation (CPR) certification, specifically Basic Life Support (BLS certification), carry health insurance and professional liability insurance while enrolled in the nursing major.

Learning in clinical settings is an important aspect of the nursing program at Emporia State University. Many health care facilities require information about students engaged in clinical learning opportunities, including, but not limited to: verification of name; address and social security number; personal health information; drug and alcohol testing; criminal background checks, including fingerprint background checking; verification of education; listing on any registered sex offender lists; listing on the Office of Inspector General's Excluded Individual's list; and listing on the U.S. General Services Administration's Excluded Parties List.

While the Department of Nursing may assist students in obtaining and gathering information required by a health care facility, the student is responsible for the cost of obtaining such information. The information required to permit a student to participate in a clinical setting is determined by the respective health care facility.

Students with a criminal history and/or arrests for which action is still pending will be evaluated on an individual basis, with no guarantee of admission to the program or a clinical site. Any student who does not consent to required disclosure, drug testing, or background checks, or does not meet the clinical settings' eligibility requirements, may not be allowed to enter clinical settings. The Department of Nursing is not responsible for finding alternative clinical sites. If a student is unable to fulfill the clinical experiences required by their program of study, the student may be unable to graduate. Department of Nursing reserves the right to request repeat background, drug testing, and/or criminal history checks at the expense of the student if deemed necessary by the Division Chair.

The department reserves the right to refuse admission or progression to an applicant or student who cannot meet, with reasonable accommodations, the functional abilities to practice safely and effectively as defined by the National Council of State Boards of Nursing, Inc. (1996). For questions related to special needs or accommodations, please contact directly the Emporia State University Director of Student Accessibility and Support Services.

Be advised that by current Kansas law, the Kansas State Board of Nursing may refuse licensure to applicants with certain arrests, misdemeanors, and felonies (Refer to the Kansas Nurse Practice Act <http://www.ksbn.org/npa/npa.pdf> for a full description of licensure requirements in Kansas). For more information, contact the state board of nursing in the state where you intend to practice. The

Department of Nursing reserves the right to refuse admission or progression to an applicant or student who has been convicted as a felon or has otherwise committed offenses inappropriate for a nurse. Individuals convicted of a felony crime against person will not be licensed in Kansas or admitted to the nursing program.

For additional information or to arrange an advising appointment, please contact:

Department of Nursing
Cora Miller Hall
1127 Chestnut Street
Emporia, KS 66801

Phone: 620-343-6800, ext. 5654

Website: <http://www.emporia.edu/nursing>

ACCREDITATION STATEMENT:

The ESU/Department of Nursing is accredited by the Kansas Board of Regents and approved by the Kansas State Board of Nursing (KSBN). The program also is accredited by the Accreditation Commission for Education in Nursing (ACEN) formally known as NLNAC. For more information about the program contact ACEN, 3343 Peachtree Road NE, Suite 850, Atlanta, Georgia 30326, www.acenursing.org Telephone: (404) 975-5000.

BACHELOR OF SCIENCE IN NURSING

Foundational Courses for BSN

FIRST YEAR

Fall – 16 hours

EG 101	Composition I	3 hours
MA 110	College Algebra*	3 hours
GB 100	Biology**	3 hours
GB 101	Biology Lab**	1 hour
PY 100	Introductory Psychology	3 hours
SP 101	Public Speaking	3 hours

Spring – 15 hours

GB 385	Nutrition	3 hours
EG 102	Composition II	3 hours
PY 212	Developmental Psychology Nursing And Other Majors	3 hours
CH 110	General Chemistry**	4 hours
CH 111	General Chemistry Lab**	1 hour
PE 100	Active Living	1 hour

SECOND YEAR

Fall – 14 hours

ZO 362	Anatomy & Physiology**	3 hours
ZO 363	Anatomy & Physiology Lab**	2 hours
SO 101	Introduction Sociology*	3 hours
HI 112	US History since 1877*	3 hours
PI 301	Ethics (or PI 225 Philosophy)*	3 hours

Spring – 15 hours

CW 152	Introduction to Health Care Careers	3 hours
ZO 364	Human Pathophysiology**	3 hours
MC 316	Microbiology**	3 hours
MC 317	Microbiology Lab**	1 hour
TH 105	Theatre Appreciation*	2 hours
MA 341	Statistics (or accepted by Department)**	3 hours

Total 60 hours

Admission to nursing major

THIRD YEAR

Fall – 17 hours

NU 308	Foundations of Professional Nursing	3 hours
NU 306	Health Assessment	2 hours
NU 307	Health Assessment Lab	1 hour
NU 310	Fundamentals of Nursing	4 hours
NU 311	Fundamentals of Nursing Practicum	3 hours
NU 382	Geriatric Nursing	1 hour
NU 386	Introduction to Evidence Based Practice/Health Informatics	3 hours

Spring – 15 hours

NU 379	Decision Making in Nursing I	1 hour
NU 340	Pharmacology	3 hours
NU 374	Adult Health I Nursing	3 hours
NU 375	Adult Health I Nursing Practicum	3 hours
NU 376	Mental Health Nursing	3 hours
NU 377	Mental Health Nursing Practicum	1 hour
NU 392	End of Life Care	1 hour

FOURTH YEAR

Fall – 16 hours

NU 484	Adult Health II Nursing	3 hours
NU 428	Pediatric and Family Nursing	3 hours
NU 485	Adult Health II Nursing Practicum	3 hours
NU 429	Maternal Newborn and Pediatric Nursing Practicum	3 hours
NU 426	Maternal Newborn Nursing	3 hours
NU 431	Decision Making in Nursing II	1 hour

Spring – 12 hours

NU 454	Facing the Challenge of NCLEX-RN	1 hour
NU 486	Public, Population, and Global Health	4 hours
NU 492	Nursing Leadership	3 hours
NU 493	Transition into Professional Nursing Practicum	4 hours

Total 60 hours

+ Indicates a grade of C or better is required in the course.

* Student may choose any course that meets general education requirements.

** Or suitable course with department approval.

NOTE: A grade of C or better must be achieved in each required nursing theory/laboratory course. All practicum courses must be passed. Failure in a practicum course will result in termination from the nursing major with no option to be readmitted to the Department of Nursing. A grade of less than a C in an elective nursing course will not directly affect a student's retention or progression in the nursing major unless the student's GPA or the CGPA does not meet department or university requirements.

NOTE: From the initial date of admission the student must complete the program in a maximum of five years.

See Course Listing for course descriptions.

DEPARTMENT OF PHYSICAL SCIENCES

Professor Rich Sleezer, Chair (Earth Science)

Professors: Jorge Ballester (Physics), Robert Jones (Physics), Marcia Schulmeister (Environmental Geology), Richard Sleezer (Earth Science),

Associate Professors: Michael Morales (Paleontology), Christopher Pettit (Physics), Kim T. Simons (Biochemistry), Eric L. Trump (Organic Chemistry).

Assistant Professors: Claudia Aguirre-Mendez (Chemistry Education), Alivia Allison (Earth Science), Bindu KC (Physical Chemistry), Jason Applegate (Inorganic Chemistry), Andrea Luthi (Biochemistry), Mingjing Sun (Analytical Chemistry and Forensic Chemistry), Qiyang Zhang (Analytical Chemistry), Paul Zunkel (Meteorology, Geospatial).

Instructors: Scott Capes (Physics and Chemistry), David Whipple (Chemistry).

<http://www.emporia.edu/physci/>

The Department of Physical Sciences offers programs leading to the following degrees:

Bachelor of Arts

Bachelor of Science

Bachelor of Science in Education

For the degree Bachelor of Arts (BA), there are majors in chemistry, earth science, and physics. For the degree Bachelor of Science (BS), there are majors in biochemistry and molecular biology (joint with biological sciences), chemistry, earth science, and physics. For the degree Bachelor of Science in Education, there are programs for licensure in chemistry, earth-space science, physics, and science grades 5-8/middle-school science (or general science). In addition, the department offers dual-degree engineering programs in conjunction with other universities, a pre-engineering, a pre-medical, and a pre-dental program, and minor programs. GeoSpatial Analysis certificate programs also exist at the undergraduate and graduate levels. The specific requirements for each of these majors and programs are given on the following pages. While certain basic background courses in the discipline are required, the student is permitted flexibility in selecting course work, independent study, and field experiences to meet their specific career goals.

Majors and other programs in the physical sciences may prepare one for a variety of career possibilities: research in government and industrial laboratories, sales or technical positions in scientific companies, product development responsibilities in industry, teaching in middle/secondary schools; or numerous occupations in health-related fields. In addition, the majors or programs are the foundations for additional education at the graduate level, or pre-professional preparation for law, engineering, or medicine; employment in environmental fields; and finally graduate work in such related areas as library science and business. While the Bachelor of Science is the traditional degree for the physical sciences, the degree Bachelor of Arts is available and intended for students who want a broad liberal arts education while majoring in a selected discipline. Students seeking teaching licensure normally work toward the Bachelor of Science in Education, although licensure is possible within the BS or BA in the discipline.

Chemistry

Chemistry is the science of understanding the structure of matter and the transformations which matter undergoes. Persons involved in chemistry-related professions are interested in discovering how they can help society fulfill its traditional material needs for improved clothing, shelter, and food, or how they can diagnose and treat physical ailments and afflictions associated with our technical age.

The Bachelor of Arts (BA) degree programs are designed to provide a more general type of educational background through broad exposure to various disciplines. Students seeking this degree are normally preparing for an interdisciplinary professional career which requires training in the sciences as well as in other fields, such as scientific sales, scientific writing, or social or environmental programs. The Bachelor of Science degree with majors in biochemistry and molecular biology (BMB) or chemistry are designed to provide science-focused majors. The BMB is used by many students in pre-professional programs, such as pre-medicine, pre-pharmacy, pre-optometry, and in some cases pre-law. The BS degree with a major in chemistry provides more depth than either of the above degree programs. The chemistry undergraduate BS program is approved by the Committee for Professional Training of the American Chemical Society. This committee endorses programs by careful evaluation of the major course requirements, faculty credentials, and facilities. A Bachelor of Science in Education (BSE), secondary, is designed to provide background for licensure for teaching chemistry in Kansas.

Emporia State chemistry students have the opportunity and are encouraged to become members of the American Chemical Society (ACS).

BACHELOR OF ARTS CHEMISTRY MAJOR

See introductory comments under "Chemistry" section heading above concerning BA degree.

Required Courses (30 hours):

The student is reminded that some chemistry courses require a background in physics and mathematics; for example, 15 hours of required associated courses for the BA with a chemistry major include MA 165 Basic Calculus, 5 hours, and PH 140-344 College Physics I and II and laboratories, 10 hours. Early consultation with a chemistry faculty advisor is strongly recommended.

See the graduation and general education requirements for the Bachelor of Arts degree in the General Education section of this catalog. (Note: The BA general education program requires 10 hours of a foreign language, and a minor or second program of study.)

Required Courses (25+ hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours
CH 479	Undergraduate Research	1 hour
CH 480	Capstone Report and Seminar	1 hour
CH 370-371	General Organic Chemistry & Lab	5 hours

OR

CH 572-575	Organic Chemistry I & II (Lecture and Lab)	10 hours
CH 620	Elements of Physical Chemistry	3 hours

OR

CH 720-722	Physical Chemistry I & II (Lecture and Lab)	8 hours
------------	--	---------

Required and/or Free Electives (a possible 5+ hours):

A minimum of 30 hours in chemistry is required for the degree. A maximum of three hours of Undergraduate Research may be used to meet these requirements. Students may also select additional hours as desired to meet specific educational goals.

Required Associated Courses (15 hours):

A student must take at least MA 165 Basic Calculus, 5 hours, and at least PH 140/141 and PH 343/344 College Physics I & II and Labs, 10 hours.

Required Second Program of Study:

The student is required to complete a second program of study of 15 to 30 hours in another discipline.

BIOCHEMISTRY CONCENTRATION

This is a program of study leading to the BA degree with a major in chemistry in which biochemistry and the relevance of chemistry in biological functions are emphasized. The required second field of study for the BA degree will be completed in biology, unless the student is pursuing the BA degree, Chemistry major, and Biochemistry concentration with the 3+3 dual-degree articulated chiropractic program with Cleveland University-Kansas City. See those specific instructions on a separate program sheet available from the main office of the Physical Sciences, Cram Science Hall room 133.

Required Chemistry Courses (33+ hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab*	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours
CH 479	Undergraduate Research	1-3 hours
CH 480	Capstone Report and Seminar	1 hour
CH 560-561	Fundamentals of Biochemistry & Lab	5 hours
Or		
CH 660-661	Biochemistry I & Lab	5 hours
CH 620	Elements of Physical Chemistry**	3 hours
CH 760	Nucleic Acids Biochemistry	3 hours
Or		
CH 662	Biochemistry II	3 hours

*CH 572-575 may substitute for CH 370-371. Required substitution for premeds.

**CH 720-722 or CH 525 Descriptive Inorganic may substitute for CH 620.

Required Biology Courses (19 hours):

GB 140-141	Principles of Biology & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
Biology Electives		11 hours

ENVIRONMENTAL CHEMISTRY CONCENTRATION

The following courses with a BA degree, chemistry major, will prepare a student for a career in environmental chemistry. This preparation in chemistry enables a student to perform essential laboratory analyses while broadening the base of knowledge to include course work in a related discipline (e.g., biology or earth science).

Required Chemistry Courses (31 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab*	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours

CH 479	Undergraduate Research	1 hour
CH 480	Capstone Report and Seminar	1 hour
CH 506	Environmental Chemistry	3 hours
CH 578	Water Analysis	3 hours
CH 620	Elements of Physical Chemistry**	3 hours

*CH 572-575 Organic Chemistry I & II/Lab may be substituted

**CH 720-722 Physical Chemistry I & II/Lab may be substituted

Second field of study (either option may be selected):**Biology Option**

GB 140-141	Principles of Biology & Lab	4 hours
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
EB 480	Principles of Ecology	2 hours
EB 481	Field Ecology	2 hours

Earth Science Option

ES 110-111	Intro to Earth Science & Lab	5 hours
ES 333	Environmental Geology	3 hours
ES 351	Intro to Geospatial Analysis	3 hours
GO324	Rocks and Minerals	3 hours
ES 545	Geomorphology	3 hours
GO571	Hydrogeology	4 hours
Earth Science/Geology elective(s)		3 hours

**BACHELOR OF SCIENCE
CHEMISTRY MAJOR**

This program is designed to provide the necessary background for employment in the chemical industry, for pre-professional education requiring chemistry (e.g., pharmacy, medicine, or law), for continued study at the graduate level, or for a combined career in chemistry and engineering, information science, or patent law.

A minimum of 49 hours is required for a BS degree with a major in chemistry. This includes 46 hours of required courses, plus electives which vary depending on whether the student seeks the American Chemical Society (ACS)-certified BS degree.

Students desiring to complete an ACS-certified BS degree must choose three advanced courses in chemistry. Advanced courses in biology, mathematics, or physics may be substituted with departmental approval for the "non-certified" degree. Courses in statistics and computer programming are highly recommended.

In addition to the chemistry requirements, students must complete the University-wide general education and graduation requirements. See the General Education section of the catalog.

Major Area Required Courses (46 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours
CH 479	Undergraduate Research	1 hour
CH 480	Capstone Report and Seminar	1 hour
CH 525	Descriptive Inorganic Chemistry	3 hours
CH 560	Fundamentals of Biochemistry	3 hours
CH 572-573	Organic Chemistry I & Lab	5 hours
CH 574-575	Organic Chemistry II & Lab	5 hours
CH 720	Physical Chemistry I	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 722	Physical Chemistry II	3 hours
CH 777	Instrumental Analysis	5 hours

For a non-certified degree, one advanced elective must be chosen from the following:

CH 724	Topics in Physical Chemistry	3 hours
CH 725	Advanced Inorganic Chemistry	3 hours
CH 760	Nucleic Acids Biochemistry	3 hours
CH 772	Topics in Organic Chemistry	3 hours

In order to earn an ACS-certified BS degree, the following two are required:

CH 725	Advanced Inorganic Chemistry	3 hours
CH 726	Advanced Inorganic Chemistry Lab	2 hours

And choose one advanced elective from among the following:

CH 723	Advanced Physical Chemistry Lab	2 hours
CH 724	Topics in Physical Chemistry	3 hours
CH 760	Nucleic Acids Biochemistry	3 hours
CH 776	Topics in Biochemistry	3 hours
CH 772	Topics in Organic Chemistry	3 hours

Required Associated Courses (20 hours):

These courses are pre- or co-requisites to CH 720 and should be taken as early as possible; ideally CH 720 should be taken in the fall of the junior year.

MA 161	Calculus I	5 hours
MA 262	Calculus II	5 hours
PH 190-192	Physics I Lecture, Recitation & Lab	5 hours
PH 393-395	Physics II Lecture, Recitation & Lab	5 hours

BACHELOR OF SCIENCE BIOCHEMISTRY and MOLECULAR BIOLOGY MAJOR

This interdisciplinary BMB major provides an exciting opportunity for students to pursue additional graduate study or employment in fields such as biotechnology, bioengineering, or biomedical research. It also represents an excellent choice of major for preparation for a health-related professional program such as medical school.

In addition to the requirements shown below, students must complete the University-wide general education and graduation requirements. Program wide, students must complete a minimum of 20 hours of upper level (>300) courses in Chemistry and a minimum of 20 hours of upper level (>300) courses in Biology.

Required Courses (39-44 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
GB 425	General Genetics	3 hours
MC 540-541	Cell Biology & Lab	5 hours
CH 572-575	Organic Chemistry I/II & Labs	10 hours

OR

CH 370-371	General Organic Chemistry & Lab	5 hours
CH 660	Biochemistry I	3 hours
CH 661	Biochemistry Lab	2 hours
CH 662	Biochemistry II	3 hours

Research (2-6 hours chosen from courses listed below)

MC 409	UG Research in Mole/Cell Biology (can be repeated for a maximum of 6 hours)	2 hours
CH 479	Undergraduate Research Chemistry (can be repeated for a maximum of 6 hours)	2 hours

MC 765	Adv. Cellular/Molecular Biology Lab	2 hours
CH 765	Adv. Biochemistry Lab	2 hours

Seminar or Capstone (1 hour, choose one class based on where research hours were earned)

GB 470	Biology Undergraduate Seminar	1 hour
CH 480	Capstone report and seminar	1 hour

Required Associate Courses (15 hours):

MA 165	Basic Calculus	5 hours
OR		
MA 161	Calculus I	5 hours
PH 140-141	College Physics I & Lab	5 hours
PH 343-344	College Physics II & Lab	5 hours

NOTE: Physics I (PH 190/191/192) and Physics II (PH 393/394/395) may be substituted for College Physics.

Restricted Electives (18-27 hours)

Choose courses from the following pre-approved lists or advisor approved substitutions. Other Science courses may be used as electives if arranged by the faculty advisor and student.

Pre-approved courses:

CH 376-377	Quantitative Analysis & Lab	5 hours
CH 525	Descriptive Inorganic	3 hours
CH 620	Elements of Physical Chemistry	3 hours
CH 720	Physical Chemistry I	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 776	Topics in Biochemistry	1-3 hours
MC 316	General Microbiology	3 hours
MC 317	Microbiology Lab	1 hour
MC 459	Special Topics in Microbial and Cellular Biology	1-3 hours
MC 520	Molecular Genetics	3 hours
MC 549	Immunology	3 hours
MC 550	Immunology Lab	2 hours
MC 562	Pathogenic Microbiology	3 hours
MC 563	Pathogenic Microbiology Lab	2 hours
MC 760	Cancer Biology	3 hours
ZO 362	Human Anatomy & Physiology	3 hours
ZO 363	Human Anatomy & Physiology Lab	2 hours

MEDICAL TECHNOLOGY

Students interested in medical technology may elect a dual-degree program. After four years at ESU, a Bachelor of Science with a major in chemistry can be awarded. Students selecting this plan must complete the above BS degree, chemistry major, with the following changes:

Major area Required Courses (46 hours +3 elective):

Same as BS, chemistry major.

Associated Courses for Medical Technology:

GB 140-141	Principles of Biology & Lab	4 hours
MC 350-351	Molecular & Cellular Biology & Lab	4 hours
ZO 362-363	Human Anatomy & Physiology & Lab	5 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425-426	General Genetics & Lab	4 hours
MC 549-550	Immunology & Lab	4 hours
MC 562-563	Pathogenic Microbiology & Lab	5 hours

PRE-MEDICAL PROGRAM

General Information:

- The programs presented here—one major with a Bachelor of Arts degree and two others with a Bachelor of Science degree and majors in either chemistry or biochemistry and molecular biology – can be used to meet the expected entrance requirements of the University of Kansas School of Medicine (KUMC) because most ESU students apply to that institution. Students applying to other institutions may find that the school of their choice requires a slightly different mix of courses. Although pre-medical students can successfully meet the entrance requirements for medical school with any major, the presented here provide additional, useful background and expanded medical career options such as the PhD-MD.
- Pre-med students are encouraged to review the admissions requirements of medical schools. Each school will have a different set of requirements and recommendations. Most of the requirements will be fulfilled by a BS, BMB, or BA Chemistry with a concentration in Biochemistry program.
- Students must complete the University-wide general education and graduation requirements. See the General Education section of the catalog.
- Most successful ESU pre-med students have GPAs of 3.5 or higher.
- To be considered for medical school admission, pre-med students must score well on the MCAT (Medical College Admission Test). The academic advisor and student will work to create a course schedule to allow the student to take the MCAT between the third and fourth year of studies.
- We strongly suggest that pre-meds take an active role in the ESU American Chemical Society student organization (Chemistry Club) and the Caduceus Society (Pre-Med Club).
- Volunteer work and shadowing of a medical professional is essential for admission into medical school.

BACHELOR OF SCIENCE

CHEMISTRY MAJOR

PRE-MEDICAL PROGRAM (Recommendation)

Major Area Required Courses (46 hours minimum):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours
CH 479	Undergraduate Research	1 hour
CH 480	Capstone Report and Seminar	1 hour
CH 525	Descriptive Inorganic Chemistry	3 hours
CH 560	Fundamentals of Biochemistry	3 hours
CH 572-573	Organic Chemistry I & Lab	5 hours
CH 574-575	Organic Chemistry II & Lab	5 hours
CH 720	Physical Chemistry I	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 722	Physical Chemistry II	3 hours
CH 777	Instrumental Analysis	5 hours

Choose one advanced chemistry elective from the following:

CH 724	Topics in Physical Chemistry	3 hours
CH 725	Advanced Inorganic Chemistry	3 hours
CH 760	Nucleic Acids Biochemistry	3 hours
CH 772	Topics in Organic Chemistry	3 hours

Required Biology Courses:

The minimum to satisfy entrance requirements at the University of Kansas School of Medicine also includes:

GB 140-141	Principles of Biology	4 hours
ZO 362-363	Anatomy and Physiology & Lab	5 hours

In addition, the following courses are strongly recommended:

CH 561	Fundamentals of Biochemistry Lab	2 hours
MC 316-317	Microbiology & Lab	4 hours
GB 425	General Genetics	3 hours
ZO 515-516	Vertebrate Structure & Development & Lab	5 hours

Required Associated Courses (20 hours):

These courses are pre- or co-requisites to CH 720 and should be taken as early as possible; ideally CH 720 should be taken in the fall of the junior year.

MA 161	Calculus I	5 hours
MA 262	Calculus II	5 hours
PH 190-192	Physics I Lecture, Recitation & Lab	5 hours
PH 393-395	Physics II Lecture, Recitation & Lab	5 hours

If a pre-med student also wishes to earn an ACS-certified BS degree, three advanced chemistry electives, rather than one, must be taken. Two of these must be:

CH 725	Advanced Inorganic Chemistry	3 hours
CH 726	Advanced Inorganic Chemistry Lab	2 hours

BACHELOR OF ARTS

CHEMISTRY MAJOR

PRE-MEDICAL PROGRAM (Recommendation)

Major Area Required Courses (38 hours minimum):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours
CH 479	Undergraduate Research	1 hour
CH 480	Capstone Report and Seminar	1 hour
CH 560	Fundamentals of Biochemistry	3 hours
CH 561	Fundamentals of Biochemistry Lab	2 hours
CH 572-573	Organic Chemistry I & Lab	5 hours
CH 574-575	Organic Chemistry II & Lab	5 hours
CH 620	Elements of Physical Chemistry*	3 hours
CH 760	Nucleic Acids Biochemistry	3 hours

*CH 720-722 may substitute for CH 620

Required Biology Courses (19 hours):

GB 140-141	Principles of Biology & Lab	4 hours
MC 316-317	Microbiology & Lab	4 hours
ZO 362-363	Anatomy and Physiology & Lab	5 hours
	Biology Electives	6 hours

The following courses are strongly recommended for medical school preparation:

GB 425	General Genetics	3 hours
ZO 515-516	Vertebrate Structure and Development & Lab	5 hours

Required Associated Courses (15 hours):

MA 165	Basic Calculus*	5 hours
	*MA 161 may substitute for MA 165	
PH 140-141	College Physics I & Lab	5 hours
PH 343-344	College Physics II & Lab	5 hours

The pre-med student in this recommended program must also satisfy the university requirements for the BA degree. See the Undergraduate Degrees section of the catalog.

BACHELOR OF SCIENCE IN EDUCATION

SECONDARY –

CHEMISTRY TEACHING FIELD (Licensure)

See Physical Science section.

DUAL-DEGREE IN ENGINEERING

CHEMISTRY MAJOR

See Engineering section.

CHEMISTRY MINOR

The minor in chemistry consists of a minimum of 23 hours of credit in chemistry courses.

Required Courses (20 hours):

CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab*	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours

Elective Courses (3+ hours):

The student in conjunction with a chemistry faculty advisor must select and complete at least one of the following courses in addition to those required above (unless CH 572-575 were elected):

CH 506	Environmental Chemistry	3 hours
CH 525	Descriptive Inorganic Chemistry	3 hours
CH 560	Fundamentals of Biochemistry	3 hours
CH 578	Water Analysis	3 hours
CH 620	Elements of Physical Chemistry	3 hours

*Organic Chemistry I (CH 572-573) is not considered to be an appropriate substitute for CH 370-371. However, CH 572-573 and Organic Chemistry II (CH 574-575) may be used to fulfill the organic requirement and the elective requirement.

Earth Science

BACHELOR OF ARTS

EARTH SCIENCE MAJOR

The Bachelor of Arts (BA) degree with an earth science major can include course work in geology, meteorology, environmental, geospatial analysis, and space science. The BA degree allows the student some specialization in geology while gaining breadth in other closely related or allied disciplines. See the general education requirements in the General Education section of this catalog.

Required Courses (17 hours):

ES 319	Meteorology	
OR		
ES 365	World Regional Climatology	3 hours
GO 324	Rocks and Minerals	3 hours
GO 325	Earth History	3 hours
(The prerequisite for GO 325 is ES 110/111 or consent of the instructor. ES 110/111 counts for General Education credit.)		
GO 326	Plate Tectonics	3 hours
GO 547	Field Geology	5 hours

Elective ES and GO Courses (9 hours):

ES 254	Physical Geography	3 hours
ES 319	Meteorology	3 hours

ES 320	Severe and Unusual Weather	3 hours
ES 331	Ice Age Environments	3 hours
ES 333	Environmental Geology	3 hours
GO 336	Mineralogy	4 hours
GO 340	Gemstones and Gemology	2-3 hours
ES 341	Wetland Environments	3 hours
ES 351	Introduction to GeoSpatial Analysis	3 hours
ES 365	World Regional Climatology	3 hours
ES 366	Natural Hazards	3 hours
ES 367	Topics in Earth Science	3 hours
ES 439	Independent Study in Earth Science	1-3 hours
ES 470	Internship in GeoSpatial Analysis	3 hours
ES 475	Senior Thesis	1-5 hours
ES 518	Space Science	3 hours
GO 521	History of Geology	3 hours
GO 536	Optical Mineralogy	3 hours
ES 539	Soil Science and Laboratory	4 hours
ES 545	Geomorphology	3 hours
ES 546	Field Geomorphology	2-5 hours
GO 548	Field Stratigraphy	2 hours
ES 551	Computer Mapping Systems	3 hours
ES 555	Small-Format Aerial Photography	3 hours
ES 567	Topics in Earth Science	1-4 hours
GO 568	Structural Geology	3 hours
GO 569	Invertebrate Paleontology	3 hours
GO 570	Sedimentation and Stratigraphy	3 hours
GO 571	Hydrogeology	4 hours
GO 572	Contaminant-Hydrogeology	3 hours
GO 580	Environmental Field Methods	3 hours
ES 703	Seminar in Physical Geography	1-3 hours
GO 766	Petrology and Petrography	4 hours
ES 767	Topics in Earth Science	1-4 hours
GO 769	Vertebrate Paleontology	3 hours
ES 771	Remote Sensing	4 hours
ES 775	Advanced Image Processing	3 hours

Elective Associated Courses (10 hours):

Courses in chemistry, physics, mathematics, computer science, geography, biology, etc. as formally approved by the student's advisor.

Required Second Program of Study:

The student is required to complete a minor or second major or program of study in another discipline.

BACHELOR OF SCIENCE

EARTH SCIENCE MAJOR

The Bachelor of Science (BS) degree with an earth science major emphasizes geology, but may also include course work in atmospheric sciences, pedology (soils), physical geography, environmental studies, hydrology, geospatial analysis, and space science. The BS degree is designed for focused professional preparation for employment or graduate study in one of the earth sciences. See the general education requirements in the General Education section of this catalog.

Required Courses (33 hours):

ES 319	Meteorology	
OR		
ES 365	World Regional Climatology	3 hours
GO 324	Rocks and Minerals	3 hours
GO 325	Earth History	3 hours
GO 326	Plate Tectonics	3 hours

ES 333	Environmental Geology	3 hours
ES 351	Introduction to GeoSpatial Analysis	3 hours
GO 547	Field Geology	5 hours
CH 123-124	Chemistry I and Lab	5 hours
CH 126-127	Chemistry II and Lab	5 hours

Elective Courses (20 hours):

ES 254	Physical Geography	3 hours
ES 319	Meteorology	3 hours
ES 320	Severe and Unusual Weather	3 hours
ES 331	Ice Age Environments	3 hours
GO 336	Mineralogy	4 hours
GO 340	Gemstones and Gemology	2-3 hours
ES 341	Wetland Environments	3 hours
ES 365	World Regional Climatology	3 hours
ES 366	Natural Hazards	3 hours
ES 367	Topics in Earth Science	3 hours
ES 439	Independent Study in Earth Science	1-4 hours
ES 470	Internship in GeoSpatial Analysis	3 hours
ES 475	Senior Thesis	1-5 hours
ES 518	Space Science	3 hours
GO 521	History of Geology	3 hours
GO 536	Optical Mineralogy	3 hours
ES 539	Soil Science and Laboratory	4 hours
ES 545	Geomorphology	3 hours
ES 546	Field Geomorphology	2 hours
GO 548	Field Stratigraphy	2 hours
ES 551	Computer Mapping Systems	3 hours
ES 555	Small-Format Aerial Photography	3 hours
ES 567	Topics in Earth Science	1-4 hours
GO 568	Structural Geology	3 hours
GO 569	Invertebrate Paleontology	3 hours
GO 570	Sedimentation and Stratigraphy	3 hours
GO 571	Hydrogeology	4 hours
GO 572	Contaminant-Hydrogeology	3 hours
GO 580	Environmental Field Methods	3 hours
ES 703	Seminar in Physical Geography	1-3 hours
GO 766	Petrology and Petrography	4 hours
ES 767	Topics in Earth Science	1-4 hours
GO 769	Vertebrate Paleontology	3 hours
ES 771	Remote Sensing	4 hours
ES 775	Advanced Image Processing	3 hours

Required Associated Courses (10 hours):

Elective courses in allied sciences of biology, chemistry, computer science, geography, mathematics, physics, or physical sciences (10 hours). Specific courses must be approved upon consultation with a student's advisor. This requirement may be satisfied by completing either a minor approved by a student's advisor or a second major in any other field. For employment by the Kansas Department of Health and Environment as an Environmental Geologist I, 10 hours of physics are required.

**BACHELOR OF SCIENCE IN EDUCATION
SECONDARY –
EARTH-SPACE SCIENCE TEACHING FIELD
(Licensure)**

See Physical Science section.

**DUAL-DEGREE IN ENGINEERING
EARTH SCIENCE MAJOR**

See Engineering section.

EARTH SCIENCE MINOR

The minor in earth science consists of 20 hours of required or approved elective courses in earth science. The minor is a useful way for students majoring in other fields to expand their understanding of science and planet Earth. The minor in earth science consists of a minimum of 20 hours of credit.

Required Courses (11 hours):

ES 110	Intro to Earth Science	4 hours
ES 111	Intro to Earth Science Lab	1 hour
GO 325	Earth History	3 hours
GO 326	Plate Tectonics	3 hours

Elective ES, GO, or PS Courses numbered 200 or above (9 hours):

Electives should be selected in consultation with an earth science advisor (official or unofficial).

GEOSPATIAL ANALYSIS MINOR

Geospatial analysis refers to geographic information systems (GIS) and remote sensing applied to documenting, mapping, interpreting, and managing natural and cultural resources. GIS techniques have become the preferred method for documenting and monitoring a range of environmental conditions. An interdisciplinary minor in geospatial analysis could be used in combination with any undergraduate Bachelor of Arts or Bachelor of Science degree major. This minor is especially recommended to enhance majors in biological, physical, and social sciences, as well as mathematics and computer science. Additional information can be obtained from the main office of the Department of Physical Sciences, Cram Science Hall, room 133, Box 4030, the Department of Biology, Breukelman Science Hall, room 174, Box 4050, or Department of Social Sciences, Plumb Hall, room 411, Box 4032.

Requirements for minor in GSA are:

General education courses in biological and physical sciences: GB100/101; CH, ES, or PH 110/111; or advanced courses.

Required Courses (9 hours):

EB/ES 351	Introduction to Geospatial Analysis	3 hours
GE 371	Cartography	3 hours
ES 551	Computer Mapping Systems	3 hours

Elective Courses (9 hours):

Electives are to be selected *upon approval of student's advisor*. Elective courses must be 200-level or higher and should be chosen to complement courses in the student's major. (Note: courses used to satisfy requirements for the student's major cannot be used as electives for this minor.)

Refer to the list available from the Department of Physical Sciences' office, Cram Science Hall room 133, for recommended elective courses for geospatial analysis, some of which require prerequisites. Consult an advisor for assistance. Other appropriate courses, including topics, seminars, and independent study, may also be used for electives, *but must be approved by the student's advisor*.

GEOSPATIAL ANALYSIS UNDERGRADUATE CERTIFICATE

The interdisciplinary undergraduate Certificate in Geospatial Analysis (GSA) is a stand-alone program, which does not require matriculation for a major and degree. The undergraduate GSA certificate is especially recommended for nontraditional, non degree-seeking, on- or off-campus students interested in acquiring these skills or desiring professional development opportunities. See, also, information with geospatial analysis minor above.

Required courses (12 hours):

GE 371	Cartography	3 hours
EB/ES 351	Introduction to Geospatial Analysis	3 hours
ES 551	Computer Mapping Systems	3 hours
	ES 439/475, GE 498, or EB 459 "Research Project"	3 hours

Elective courses (6 hours):

Elective courses must be 200-level or higher and should be chosen in conjunction with the student's advisor. Electives may be chosen from a list of recommended courses. Other appropriate courses, including topics, seminars, internships and independent studies may also be used for electives if approved by the student's advisor. Refer to the list available from the Department of Physical Sciences for recommended elective courses for geospatial analysis, some of which require prerequisites.

PALEONTOLOGY MINOR

This program is designed to provide some specialization and experience in paleontology to complement a major in another field of study (especially biology) for either a BS or BA degree.

The basic requirements are listed below. The total credit hours necessary are 19. The courses ES 110/111 (Introduction to Earth Science and Lab) are a prerequisite for the GO courses listed.

Required Courses (19 hours):

GO 325	Earth History	3 hours
GO 326	Plate Tectonics	3 hours
GO 569	Invertebrate Paleontology	3 hours
GO 570	Sedimentation & Stratigraphy	3 hours
GO 769	Vertebrate Paleontology	3 hours
GB 325	Bioscientific Terminology	1 hour
GB 725	Evolution	3 hours

Engineering

Two programs are available for students wishing to become engineers. The two-year pre-engineering program prepares students to transfer to an engineering school and complete a bachelor of science (BS) degree in engineering. The three-year dual-degree program gives students the additional opportunity to complete a BS degree with a major in chemistry, earth science, physics or mathematics from ESU, as well as the BS in engineering. All engineering fields require a considerable level of computer expertise.

Students in the pre-engineering program transfer to an engineering school at Kansas State University (KSU), the University of Kansas (KU), Wichita State University (WSU) or an out-of-state university after completing two years at ESU. This program offers students excellent technical preparation for the engineering school with appropriate courses in mathematics,

physics, chemistry, earth science, computer science and engineering. Required general education courses are included. The pre-engineering program is designed in consultation with, and parallels the first two years offered by, the accredited engineering schools in Kansas.

Students in the ESU dual-degree program transfer to the engineering school at WSU, KSU, or KU, after completing three years at ESU. This program offers students excellent technical preparation for engineering school and the opportunity to obtain a BS degree from ESU after one year in attendance at the engineering school. After completing the ESU degree, these students complete the BS in engineering degree from WSU, KSU, or KU with an additional year at the engineering school.

The time actually required to complete an engineering degree can be longer than the expected four years for the pre-engineering program, or five years for the dual-degree program. Engineering programs at ESU assume that Calculus I will be taken during the first semester of the first year. Students needing to take preparatory courses in algebra and trigonometry should do so, with the expectation that they will need additional time to complete their degree. Students participating in significant extracurricular activities such as athletics or work might also need additional time to complete the degree. Steady academic progress and eventual completion of the engineering degree are more important than the number of semesters required. Each student is expected to work with an advisor to adjust the recommended program to fit individual circumstances.

PRE-ENGINEERING

Recommended programs have been developed for students planning to transfer to KSU, KU or WSU after spending two years at ESU. Students planning to transfer to an out-of-state engineering school are expected to work with an advisor to develop a modified program of study based on the existing program for transfer to KSU.

Recommended program for those planning to transfer to Kansas State University:

This program is designed for students planning to transfer to the College of Engineering at Kansas State University to complete the Bachelor of Science in Engineering degree. It is highly recommended that students schedule a visit with an engineering advisor at KSU before registering for their final semester at ESU.

The following engineering fields are available at KSU: architectural engineering (Ar), biological and agricultural engineering (Ag), chemical engineering (Ch), civil engineering (CE), electrical and computer engineering (EE), industrial and manufacturing systems engineering (IM), and mechanical and nuclear engineering (ME).

NOTE: Chemical Engineering at KSU is a 2+3 program due to a required course that must be taken at KSU in the first semester of a student's chemical engineering program.

Required Courses (67-69 hours):

FIRST YEAR

Fall – 17 hours

EG 101	English Composition I	3 hours
MA 161	Calculus I	5 hours
CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
PE 100	Lifetime Fitness	1 hour
PS 100	Intro to Engineering	3 hours

Spring – 18 hours

MA 262	Calculus II	3 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
CH 126	Chemistry II	3 hours
CH 127	Chemistry II Lab	2 hours
EG 102	English Composition II	3 hours

SECOND YEAR (All but Chemical, see below)**Fall – 17 hours**

PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
PH 315	Statics	3 hours
MA 363	Calculus III	3 hours
SP 101	Public Speaking	3 hours
	Technical Elective(s)	3 hours

Spring – 17 hours

MA 335	Differential Equations I	3 hours
BC 103	Principles of Economics I	3 hours
CS 260	Programming & Problem Solving (C++)	3 hours
PH 316	Dynamics	3 hours
	Technical Elective(s)	5 hours

SECOND YEAR (Chemical Engineering)**Fall – 16 hours**

MA 363	Calculus III	3 hours
PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
CH 572	Organic Chemistry I	3 hours
CH 573	Organic Chemistry I Lab	2 hours
PH 315	Statics	3 hours

Spring – 16 hours

BC 103	Principles of Economics I	3 hours
MA 335	Differential Equations I	3 hours
CH 574	Organic Chemistry II	3 hours
CH 575	Organic Chemistry II Lab	2 hours
CH 376	Quantitative Analysis	3 hours
CH 377	Quantitative Analysis Lab	2 hours

Technical Elective Courses:

PS 100	Introduction to Engineering*	3 hours
PS 200	Intro to Engineering Graphics	1-2 hours
PH 315	Statics	3 hours
PH 316	Dynamics	3 hours
PH 410-411	Electrical Circuit Analysis & Lab	4 hours
PH 540	Modern Physics	3 hours
MA 322	Introduction to Linear Algebra	3 hours
MA 380	Probability & Statistics	3 hours
GO 231	Physical Geology	3 hours
ES 351	Introduction to GeoSpatial Analysis	3 hours
GB 140-141	Principles of Biology & Lab	4 hours
CS 315	JAVA Programming	3 hours
CH 310	Engineering Materials	2 hours
CH 370-371	General Organic Chemistry & Lab	5 hours
CH 560	Fundamentals of Biochemistry	5 hours
CH 720	Physical Chemistry I	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 722	Physical Chemistry II	3 hours

Key to courses as electives (Elec) or required (Req):

	Ag	Ch	CE	EE	IM	ME	Ar
PS 100	Elec	Elec	Elec	Elec	Elec	Elec	Elec
PS 200	Elec	Elec	Elec	Elec	Elec	Elec	Elec

CH 721	---	Req	---	---	---	---	---
CH 722	---	Req	---	---	---	---	---

The total number of elective course transfer credits is limited in some engineering fields.

**PS 100 is recommended for all first-year pre-engineering students*

Humanities and Social Sciences:

Each engineering student at Kansas State University is required to complete 13-15 hours of course work in the areas of the humanities and social sciences, excluding the required economics course. The following list indicates which courses may be taken at Emporia State University to satisfy this requirement. At least 2 courses must be taken at the 300-level or above. Not more than 3 credit hours may be taken in applied music and/or applied arts.

Art	Only AR 225, 235
Economics	Any course above BC 103
English	Any above those required
Geography	Any course
History	Any course
Modern Language	At least 8 hours to receive any credit
Philosophy	Any course except PI 301
Political Science	Any course
Psychology	Any course
Sociology and	
Anthropology	Any course
Theater Arts	Only TH 105 accepted

Recommended program for those planning to transfer to the University of Kansas:

This program is designed for students planning to transfer to the University of Kansas School of Engineering to complete the Bachelor of Science in Engineering degree. It is highly recommended that students schedule a visit with an engineering advisor at KU before registering for their final semester at ESU.

The following engineering fields are available at KU: aerospace engineering (AE), chemical engineering (Ch), civil engineering (CE), electrical engineering (EE), engineering physics (EP), mechanical engineering (ME), and petroleum engineering (PE).

Required Courses (64-66 hours):

FIRST YEAR**Fall – 16 hours**

EG 101	English Composition I	3 hours
MA 161	Calculus I	5 hours
CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
PS 100	Intro to Engineering	3 hours

Spring – 16 hours

MA 262	Calculus II	5 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
BC 103	Principles of Economics I	3 hours
EG 102	English Composition II	3 hours

SECOND YEAR (All but Chemical or Petroleum, see below)**Fall – 17 hours**

PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
PH 315	Statics	3 hours
MA 363	Calculus III	3 hours
	Humanities Elective	3 hours
	Technical Elective(s)	3 hours

Spring – 17 hours

MA 322	Introduction to Linear Algebra	3 hours
MA 335	Differential Equations I	3 hours
PH 316	Dynamics	3 hours
CS 260	Programming & Problem Solving (C++)	3 hours
	Technical Elective(s)	5 hours

SECOND YEAR (Chemical and Petroleum)**Fall – 16 hour**

MA 363	Calculus III	3 hours
PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
CH 572	Organic Chemistry I	3 hours
CH 573	Organic Chemistry I Lab	2 hours
PH 315	Statics	3 hours

Spring – 16 hours

BC 103	Principles of Economics I	3 hours
MA 335	Differential Equations I	3 hours
CH 574	Organic Chemistry II	3 hours
CH 575	Organic Chemistry II Lab	2 hours
CH 376	Quantitative Analysis	3 hours
CH 377	Quantitative Analysis Lab	2 hours

*Not required in petroleum engineering. Substitute humanities or social sciences electives.

Technical Elective Courses:

SP 101	Public Speaking	3 hours
PS 100	Introduction to Engineering**	3 hours
PS 200	Intro to Engineering Graphics	1-2 hours
PH 315	Statics	3 hours
PH 316	Dynamics	3 hours
PH 410-411	Electrical Circuit Analysis & Lab	4 hours
PH 540	Modern Physics	3 hours
MA 322	Introduction to Linear Algebra	3 hours

MA 380	Probability & Statistics	3 hours
GO 231	Physical Geology	3 hours
GB 140-141	Principles of Biology & Lab	4 hours
ES 351	Introduction to GeoSpatial Analysis	3 hours
CS 260	Programming & Problem Solving (C++)	3 hours
CS 315	JAVA Programming	3 hours
CH 126-127	Chemistry II & Lab	5 hours
CH 310	Engineering Materials	2 hours
CH 560	Fundamentals of Biochemistry	3 hours
CH 572-573	Organic Chemistry I & Lab	5 hours
CH 574-575	Organic Chemistry II & Lab	5 hours
CH 720	Physical Chemistry I	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 722	Physical Chemistry II	3 hours

CH 721	---	Req	---	---	---	---	Req
CH 722	---	Elec	---	---	---	---	Elec

The total number of elective course transfer credits is limited in some engineering fields.

*These courses should be taken before transferring to KU.

**PS 100 is recommended for all first-year pre-engineering students.

Humanities and Social Sciences:

Students will be required to complete 15-18 semester hours in the humanities and social sciences, depending upon the field of engineering.

In selecting courses students should follow these guidelines:

- At least one course designated as a humanities course, and one designated as a social sciences course.
- At least two courses offered by one department.
- A maximum of four credits from such areas as band, chorus, orchestra, drawing, painting, and sculpture may be acceptable at the discretion of the respective departments.

Courses that may be taken at Emporia State University to fulfill these requirements include:

Anthropology	Any course except AN 100, 355, 356 (SS)
Art	Only AR 225, AR 235 accepted (HU)
Economics	Any course above BC 103 (SS)
English	Any course except EG 301 (HU)
Modern Language	Only credits earned in second-year courses may apply (HU)
Geography	Any course except GE 371 (SS)
History	Any course (HU)
Philosophy	Any course (HU)
Political Science	Any course (SS)
Psychology	Any course (SS)
Sociology	Any course except SO 500 (SS)

Recommended program for those planning to transfer to Wichita State University:

This program is for students planning to transfer to the College of Engineering at Wichita State University to complete the Bachelor of Science in Engineering degree. It is highly recommended that students schedule a visit with an engineering advisor at WSU before registering for their final semester at ESU.

The following engineering fields are available at WSU: aerospace engineering (AE), electrical and computer engineering (EE), industrial engineering (IE), mechanical engineering (ME), and manufacturing engineering (Mf).

Required Courses (66-68 hours):

FIRST YEAR

Fall – 16 hours

EG 101	English Composition I	3 hours
MA 161	Calculus I	5 hours
CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
PS 100	Intro to Engineering	3 hours

Spring – 16-17 hours

MA 262	Calculus II	5 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
EG 102	English Composition II	3 hours
	Science Elective(s)	3-4 hours

SECOND YEAR

Fall – 17 hours

PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
MA 363	Calculus III	3 hours
PH 315	Statics	3 hours
SP 101	Public Speaking	3 hours
	Humanities or Social Science Elective(s)	3 hours

Spring –17-18 hours

MA 335	Differential Equations I	3 hours
CS 260	Programming & Problem Solving (C++)	3 hours
MA 322	Intro to Linear Algebra	3 hours
PH 316	Dynamics	3 hours
	Technical, Natural Science, and/or Humanities and Social Sciences Electives*	5-6 hours

*Courses accepted as technical (T) and natural science (NS) electives are listed below.

Technical and Natural Science Electives:

PS 100	Introduction to Engineering*	3 hours
PS 200	Intro to Engineering Graphics	1-2 hours
PH 315	Statics	3 hours
PH 316	Dynamics	3 hours
PH 410-411	Electrical Circuit Analysis & Lab**	4 hours
PH 540	Modern Physics	3 hours
MA 322	Linear Algebra	3 hours
MA 380	Probability & Statistics	3 hours
GO 231	Physical Geology	3 hours
EG 305	Technical Writing	3 hours
BC 103	Principles of Economics I	3 hours
CS 260	Programming & Problem Solving (C++)	3 hours
CH 370-371	General Organic Chemistry & Lab	5 hours

*PS 100 is recommended for all pre-engineering students.

**Accepted only if EE 382 Lab is completed at WSU.

Key to the above technical courses (electives or required):

	AE	EE	IE	ME	Mf
PS 100	---	---	T-Elec	T-Elec	T-Elec
PS 200	Req	Req	Req	Req	Req

Humanities and Social Sciences:

Students may complete 15 hours of humanities (HU) and social sciences (SS) course work using the following guidelines:

- One course from each of two different social science areas.
- One course from each of three different humanities or fine arts areas.
- Further study in a second higher-level course in one of the five course areas listed in a. and b. (except philosophy).

Note: Skills courses such as band, chorus, orchestra, drawing, painting, and sculpture are not acceptable.

Courses that may be taken at Emporia State to fulfill these requirements include:

Anthropology	Any course except AN 200, 355,356 (SS)
Art	Only AR 225, AR 235 accepted (HU)
Economics*	Any course (SS)
English	Any course except EG 100, 101, 102, 103, 104, 301, 305 (HU)
Modern Language	Only credits earned in second-year courses may apply (HU)
History	Any course (HU)
Music	Only MU 226, 228 accepted (HU)
Philosophy	Any course (HU)
Political Science	Any course (SS)
Psychology	Only PY 100, 230, 231, 333, 401, 432 (SS)
Sociology	Any course except SO 125, 350, 351, 352, 353, 403, 418, 480 (SS)
Theatre Arts	Only TH 105 (HU)

*Industrial Engineering majors should complete Economics I and II (which also satisfies the requirement of a second higher-level humanities or social sciences course).

Dual-Degree Engineering

The dual-degree allows the student in three years and a summer to complete the basic pre-engineering program, complete the departmental requirements for a major in chemistry, earth science, physics, or mathematics, and complete all of the general education requirements for a bachelor's degree from Emporia State. Students normally earn the remaining credit hours required for graduation during the first year at an engineering school, and transfer them back and apply for the ESU degree at the end of the year. A fifth year is then necessary to complete the engineering requirements and obtain the BS in engineering. The dual-degree is only available at this time (June 2014) in conjunction with Kansas State University, the University of Kansas, and Wichita State University. Listed below are the programs of study that should be followed by students in the dual-degree programs with majors in chemistry, earth science, or physics. See Mathematics section for that dual-degree program.

DUAL-DEGREE ENGINEERING ESU BACHELOR OF SCIENCE CHEMISTRY MAJOR

This program is offered in conjunction with Kansas State University and the University of Kansas. It is especially appropriate for students planning to complete degrees in agricultural, civil, chemical or petroleum engineering.

To earn the BS degree at Emporia State, the student must satisfy all major and general education requirements prior to conferral of the degree. The student will normally fulfill the requirements for the BS in engineering after an additional two years at either Kansas State University or the University of Kansas.

NOTE: Chemical Engineering at KSU is a 3+3 program due to a required course that must be taken at KSU in the first semester of a student's chemical engineering program.

TECHNICAL COURSES – DUAL-DEGREES

Several courses may be used as "technical courses" in the various dual-degree programs. Refer to the charts following the two-year pre-engineering programs to determine which courses are appropriate for each program. General education information specific to dual-degree majors for ESU, KSU, and KU appears at the end of this section concerning Dual-Degree Engineering.

Recommended Courses:

Fall – 17 hours

EG 101	English Composition I	3 hours
MA 161	Calculus I	5 hours
CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
PE 100	Lifetime Fitness	1 hour
PS 100	Intro to Engineering	3 hours

Spring – 18 hours

MA 262	Calculus II	5 hours
CH 126	Chemistry II	3 hours
CH 127	Chemistry II Lab	2 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
EG 102	English Composition II	3 hours

Fall – 18 hours

	Fine Arts Elective	2 hours
MA 363	Calculus III	3 hours
PH 315	Statics	3 hours
PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
CH 572	Organic Chemistry I	3 hours
CH 573	Organic Chemistry I Lab	2 hours

Spring – 19 hours

	Literature/Ideas Elective	3 hours
	Social/Behavioral Elective	3 hours
MA 335	Differential Equations I	3 hours
CH 376	Quantitative Analysis	3 hours
CH 377	Quantitative Analysis Lab	2 hours
CH 574	Organic Chemistry II	3 hours
CH 575	Organic Chemistry II Lab	2 hours

Summer—9 hours

BC 103	Principles of Economics I	3 hours
SP 101	Public Speaking	3 hours
	Social/Behavioral Science Elective	3 hours

Fall – 17 hours

CH 720	Physical Chemistry I	3 hours
	Chemistry Elective	3 hours
	Fine Arts Elective	2 hours
CH 479	Undergraduate Research	1 hour
	Social/Behavioral Science Elective	3 hours
	Cultural Diversity Elective	3 hours
	Technical Elective	3 hours
	History (Multicultural Intensive) Elective	3 hours

Spring – 19 hours

CH 722	Physical Chemistry II	3 hours
CH 721	Physical Chemistry Lab	2 hours
CH 777	Instrumental Methods of Analysis	5 hours
CH 480	Capstone Report and Seminar	1 hour
CS 260	Programming & Problem Solving (C++)	3 hours
PE	Activity Course	1 hour
	Technical Elective	3 hours

DUAL-DEGREE ENGINEERING ESU BACHELOR OF SCIENCE EARTH SCIENCE MAJOR

This program is offered in conjunction with Kansas State University and the University of Kansas. It is especially appropriate for students planning to complete the degree in civil engineering.

To earn the BS degree at Emporia State, the student must satisfy all major and general education requirements prior to conferral of the degree. The student will normally fulfill the requirements for the BS in engineering after an additional two years at either Kansas State University or the University of Kansas.

Recommended Courses:

Fall – 17 hours

EG 101	English Composition I	3 hours
MA 161	Calculus I	5 hours
GO 231	Physical Geology*	3 hours
	Fine Arts Elective	2 hours
PS 100	Intro to Engineering	3 hours
PE 100	Lifetime Fitness	1 hour

*ES 110/111 may be substituted

Spring – 17 hours

MA 262	Calculus II	5 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
EG 102	English Composition II	3 hours
	Earth Science Elective	3 hours
PE	Activity Course	1 hour

Summer – 10 hours

CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
CH 126	Chemistry II	3 hours
CH 127	Chemistry II Lab	2 hours

Fall – 17 hours

MA 363	Calculus III	3 hours
PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
GO 324	Rocks and Minerals	3 hours
GO 325	Earth History	3 hours
PH 315	Statics	3 hours

Spring – 17 hours

MA 335	Differential Equations I	3 hours
GO 32	Plate Tectonics	3 hours
BC 103	Principles of Economics I	3 hours
PH 316	Dynamics	3 hours
	Earth Science Elective	3 hours
	Fine Arts Elective	2 hours

Fall – 18 hours

CS 260	Programming & Problem Solving (C++)	3 hours
SP 101	Public Speaking	3 hours
ES 319	Meteorology	3 hours
	OR	
ES 365	World Regional Climatology	3 hours
ES 351	Intro to Geospatial Analysis	3 hours
	Cultural Diversity Elective	3 hours
	Literature/Ideas Elective	3 hours

Spring – 18 hours

	Technical Electives	6 hours
	Earth Science Electives	6 hours
	Social/Behavioral Science Elective	3 hours
	History (Multicult Inten) Elective	3 hours

Summer – 8 hours

GO 547	Field Geology	5 hours
	Social/Behavioral Science Electives	3 hours

DUAL-DEGREE ENGINEERING ESU BACHELOR OF SCIENCE PHYSICS MAJOR

This program is offered in conjunction with Kansas State University, the University of Kansas, and Wichita State University. It is especially appropriate for students planning to complete degrees in electrical, computer, or mechanical engineering. To earn the BS degree at Emporia State, the student must satisfy all major and general education requirements prior to conferral of the degree. The

student will normally fulfill the requirements for the BS in engineering after an additional two years at either Kansas State University, the University of Kansas or Wichita State University.

Recommended Courses:**Fall – 17 hours**

EG 101	English Composition I	3 hours
CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
MA 161	Calculus I	5 hours
PE 100	Lifetime Fitness	1 hour
PH 100	Orientation to Physics	3 hours

Spring – 17 hours

MA 262	Calculus II	5 hours
CH 126	Chemistry II	3 hours
CH 127	Chemistry II Lab	2 hours
PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
	Fine Arts Elective	2 hours

Fall – 17 hours

EG 102	English Composition II	3 hours
MA 363	Calculus III	3 hours
PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
CS 260	Programming & Problem Solving (C++)	3 hours
PH 315	Statics	3 hours

Spring – 17 hours

MA 335	Differential Equations I	3 hours
PH 540	Modern Physics	3 hours
	Fine Arts Elective	2 hours
PH 316	Dynamics	3 hours
	Technical Electives	6 hours

Summer – 7 hours

SP 101	Public Speaking	3 hours
PE	Activity Course	1 hour
	Social/Behavioral Science Elective	3 hours

Fall – 18 hours

PH 741	Advanced Physics I Lab	3 hours
PH 760	Mechanics I	3 hours
PH 762	Electricity & Magnetism I	3 hours
MA 322	Linear Algebra	3 hours
BC 103	Principles of Economics I	3 hours
	Literature/Ideas Elective	3 hours

	Physics Electives	6 hours
	History (Multicult Inten) Electives	3 hours
	Technical Elective	3 hours
	Social/Behavioral Science Elective	3 hours
	Cultural Diversity Elective	3 hours

DUAL-DEGREE ENGINEERING PROGRAM GENERAL EDUCATION INFORMATION

Emporia State University

The following general education program applies to students participating in an approved ESU dual-degree program offered in conjunction with an engineering program accredited by the Accreditation Board for Engineering and Technology (ABET).

Students in these programs follow the general education program published in this catalog, with the following exceptions:

1. Students in the program must use MA 161 (Calculus I) to fulfill the quantitative and Mathematical Reasoning core requirement.
2. Students in the programs must use SP 101 (Public Speaking) to fulfill the Speaking and Listening core requirement.
3. Students in the programs must use CH123/124 (Chemistry I/Lab) to fulfill the Physical Sciences and lab portion of the Life and Physical Sciences core requirement.
4. Students in the programs are exempted from the Biological Sciences and Lab portion of the Life and Physical Sciences core requirement.
5. Students in the programs satisfy the Personal and Social Well-Being core requirement by successfully completing one course (1-3 credit hours) from the approved list.

Kansas State University Requirements:

KSU requires that all engineering students complete English Composition I, English Composition II (unless an "A" or "B" is earned in English Composition I), speech, one course in physical education, and technical writing (at the junior level). In addition to the required courses, each KSU student is to complete 15 hours in the humanities and social sciences, which includes such areas as anthropology, art, economics, English, geography, history, journalism, modern language (advanced work only), music, philosophy, political science, psychology, sociology, and speech. At least two courses must be taken at the 300-level or above, and not more than three credits may be taken in applied music or applied art.

The University of Kansas Requirements:

Students will be required to complete 15-18 semester hours in the areas of humanities and social sciences, depending upon the field of engineering. When selecting courses, students should follow these guidelines:

1. At least one course designated as a humanities course, and one designated as a social science course.
2. At least two courses offered by one department.
3. A maximum of 4 credits from such areas as band, chorus, orchestra, drawing, painting, and sculpture may be acceptable at the discretion of the respective departments.

Wichita State University Requirements:

See engineering advisor.

Science Grades 5-8

BACHELOR OF SCIENCE IN EDUCATION SECONDARY – SCIENCE GRADES 5-8 TEACHING FIELD (Licensure)

See Physical Science section, below, Science Grades 5-8 Teaching Field. (This program is sometimes referred to as the middle-level science licensure program, and was formerly the General Science teaching field program.)

Physical Science

PHYSICAL SCIENCE MINOR

A minor in physical science will consist of a minimum of 20 hours. PS 214, *Physical Science* or the equivalent, may serve on the minor if this is the student's first course in the physical sciences. It is expected that the student select courses from each of the areas of chemistry, physics, and earth science. Additional information is available from the Departments of Physical Sciences Office, Cram Science Hall, room 133.

BACHELOR OF SCIENCE IN EDUCATION SECONDARY TEACHING FIELDS (Licensures) – CHEMISTRY (71321) EARTH-SPACE SCIENCE (71381) SCIENCE GRADES 5-8 (71341)* PHYSICS (71331)

*Science Grades 5-8 as a field of licensure is Middle-school.

The program variations satisfy the *requirements to teach in the secondary schools of Kansas in chemistry, earth-space science, physics, and science grades 5-8*. Students are required to complete licensures in two of these areas or one of these plus an additional licensure area (mathematics or biology, for example).

While there are two university options available for students preparing to teach at the secondary level (Option A, two licensure areas, and Option B, one licensure area), the Physical Sciences offer only Option A. Beginning physical sciences teachers are nearly always required to teach in more than a single field. In Physical Sciences (CH, ES, GO, PH and PS) teaching licensure courses, students must have a GPA of 2.5 or higher, and no more than one course with a "D" grade. Lecture-laboratory course combinations with separate course numbers are considered two courses.

Departmental approval is required for admission to candidacy for the teacher education program (Phase I) and student teaching (Phase II).

See the general education requirements applicable to BSG program in the General Education section of this catalog.

See also, the Professional Education and Program requirements for the Bachelor of Science in Education - Secondary Education, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

The following requirements exist for the various teaching fields; the core is common to all fields (licensures):

Physical Science Core Requirements (20 hours):

CH 123-124	Chemistry I & Lab	5 hours
PH 140-141	College Physics I & Lab	5 hours
ES 110-111	Intro to Earth Science & Lab	5 hours
PS 516	Teaching Physical Science in Middle/High School	3 hours
PS 430	Nature of Science	2 hours
MA 161	Calculus I	
	OR	5 hours*
MA 165	Basic Calculus	

*required for licensure in physics, also satisfies the mathematics general education requirement

Additional Requirements:

Complete the set or sets of courses listed below for each licensure selected.

Chemistry -- 15 hours

CH 126-127	Chemistry II & Lab	5 hours
CH 370-371	General Organic Chemistry & Lab	5 hours
CH 376-377	Quantitative Analysis & Lab	5 hours

Earth-Space Science -- 14 hours

GO 325	Earth History	3 hours
ES/GO	Field course	2 hours
ES 319	Meteorology	3 hours
PH 110/111	Intro to Space Science & Lab	5 hours
ES 439	Independent Study	1 hour

Physics – 12 hours

PH 343-344	College Physics II & Lab	5 hours
PH 540	Modern Physics	3 hours
PH	Approved Elective(s) (must include a lab beyond general physics level)	3 hours
PH 490	Independent Study	1 hour

Science Grades 5-8 – See also Biology section.**Life Science Requirements (12 hours):**

GB 140-141	Principles of Biology & Lab	
	OR	4 hours
GB 100-101	General Biology & Lab	
BO 212-213	Biology of Plants & Lab	4 hours
ZO 214-215	Biology of Animals & Lab	4 hours

Physical Science Requirements (10 hours):

CH 126-127	Chemistry II & Lab	5 hours
	OR	
PH 343-344	College Physics II & Lab	5 hours
PH 110-111	Introduction to Space Science	5 hours

All pre-service candidates will demonstrate instructional technology competence and should arrange to do part of their student teaching at the middle-school level.

NOTE: Persons seeking science grades 5-8 as a licensure area in addition to others administered by the Departments of Physical Sciences must take PS 430. For science grades 5-8 licensure, a portion of student teaching must be at that level.

Physics**BACHELOR OF ARTS****PHYSICS MAJOR**

This program is designed to allow some specialization in Physics while gaining breadth in other disciplines. Required courses in the major total 25 hours.

Required Courses (14-16 hours):

PH 190	Physics I	3 hours
PH 191	Physics I Lab	1 hour
PH 192	Physics I Recitation	1 hour
PH 393	Physics II	3 hours
PH 394	Physics II Lab	1 hour
PH 395	Physics II Recitation	1 hour
PH 490	Independent Study	1-3 hours
PH 540	Modern Physics	3 hours

NOTE: College Physics I (PH 140/141) and College Physics II (PH 343/344) may be substituted for Physics I (PH 190/191/192) and Physics II (PH 393/394/395), respectively.

Elective Courses (11 hours):

A student must complete an additional 11 hours of approved electives in physics. All physics courses at the 300-level or above may be used to fulfill this requirement. An upper-division laboratory course is highly recommended. The degree program may include a maximum of 6 hours of credit for any combination of PH 315, PH 316, PH 760, and PH 761.

Required Associated Courses (15 hours):

CH 123	Chemistry I	3 hours
CH 124	Chemistry I Lab	2 hours
MA 161	Calculus I	5 hours
MA 262	Calculus II	5 hours

Required Second Program of Study:

The student is required to complete a second program of study from 12 to 30 hours in another discipline of choice, or an ESU approved minor.

BACHELOR OF SCIENCE**PHYSICS MAJOR**

This degree and major are designed for students planning a graduate degree in one of the many areas of experimental or theoretical physics or a career in a closely allied field. The program of study is flexible, permitting students to achieve a certain degree of specialization, but also requiring significant experience in theory, experimentation and computation. PH 490, Independent Study, is a capstone course to be taken in the final year. In addition to the physics courses, students develop a solid background in mathematics, computer science, and chemistry, which provides many career options. For some, physics provides an excellent foundation for the professions of law or medicine, or applied opportunities for physics-based careers such as medical physics or computational science. Recommended programs of study are available for students who wish to obtain a BS in physics and simultaneously prepare for employment or further education in an

allied field, e.g., engineering, geophysics, medicine, or computer science. Additional information about recommended programs and opportunities may be obtained in the Department of Physical Sciences Office, Cram Science Hall, room 133. See the general education requirements in the General Education section of this catalog.

Required Courses (23-25 hours):

PH 190/191/192	Physics I Lecture/Lab/Recitation	5 hours
PH 393/394/395	Physics II Lecture/Lab/Recitation	5 hours
PH 490	Independent Study	1-3 hours
PH 540	Modern Physics	3 hours
PH 741	Advanced Physics I Lab	3 hours
PH 760	Mechanics I	3 hours
PH 762	Electricity & Magnetism I	3 hours

Elective Courses (8 hours):

At least 6 hours of electives must be at the 300-level or above. PH 100 may be used as an elective. The degree program may include a maximum of 6 hours of credit for any combination of PH 315, PH 316, PH 760, and PH 761, and a maximum of 3 hours of credit in PH 490.

Required Associated Courses (19 hours):

CH 126-127	Chemistry II & Lab	5 hours
CS 260	Programming & Problem Solving (C++)	3 hours
MA 262	Calculus II	5 hours
MA 363	Calculus III	3 hours
MA 335	Differential Equations	3 hours

PHYSICS MINOR

This program is designed to allow a degree of specialization in physics while majoring in another field such as chemistry, mathematics, earth science, or computer science. The total credit hours necessary 19.

Required Courses (10 hours):

PH 190/191/192	Physics I Lecture/Lab/Recitation	5 hours
PH 393/394/395	Physics II Lecture/Lab/Recitation	5 hours

Elective Courses (9 hours):

The student may select from these and other physics courses for a minimum of 9 hours. PH 540 Modern Physics and an advanced laboratory course such as PH 741 advanced Physics Laboratory I are highly recommended.

PH 100	Orientation to Physics	3 hours
PH 450	Interdisciplinary Sciences: Physics	3 hours
PH 500	Topics in Physics	1-5 hours
PH 510	Computer Applications in Physics	3 hours
PH 520	Light	3 hours
PH 530	Heat & Thermodynamics	3 hours
PH 540	Modern Physics	3 hours
PH 547	Analog Electronics	3 hours
PH 548	Analog Electronics Lab	2 hours
PH 550	Digital Electronics	3 hours
PH 551	Digital Electronics Lab	2 hours
PH 730	Seminar in Physics	0-2 hours
PH 741	Advanced Physics Lab I	3 hours
PH 742	Advanced Physics Lab II	3 hours

PH 760	Mechanics I	3 hours
PH 762	Electricity & Magnetism I	3 hours
PH 763	Electricity & Magnetism II	3 hours
PH 790	Theoretical Physics	3 hours
PH 795	Introduction to Quantum Mechanics	3 hours

BACHELOR OF SCIENCE IN EDUCATION PHYSICS TEACHING FIELD (Licensure)

See Physical Science section.

HEALTH-RELATED FIELDS

Students wishing to prepare for careers in the health-related professions (such as dentistry, optometry, medicine, medical technology, optometry, and pharmacy) should consult the appropriate section in this catalog. These programs are under the direction of an interdepartmental committee. Details on preparation for a specific field are available in the office of the Departments of Physical Sciences. The pre-dental and pre-pharmacy programs are outlined below.

PRE-DENTAL PROGRAM

A major in chemistry or biochemistry and molecular biology can provide an excellent background for dental students.

Required and Recommended Courses:

A survey of eight dental schools to which ESU students regularly send applications indicates the following minimum requirements for acceptance. All science courses must have an accompanying laboratory.

English Composition	2 semesters
General Chemistry	2 semesters
Organic Chemistry	2 semesters
Physics	2 semesters
Biology*	4 semesters

*These courses must include general biology, anatomy, physiology, and cell biology. Other courses that have counterparts in the dental curriculum (histology, neuroscience, microbiology, biochemistry) are strongly recommended.

Most ESU students that have been accepted into the School of Dentistry at UMKC in recent years have gained admission through the Reserved Admission Program. To be eligible for Reserved Admission one must have completed a minimum of, but not more than, four semesters of college credit while being continuously enrolled in full-time course loads (a minimum of 15-18 credit hours per semester). The semester grade point average must be at least 3.60 in a degree-seeking program including prerequisite courses.

PRE-PHARMACY PROGRAM

The pre-pharmacy program is a two-year curriculum required by schools of pharmacy for admission to their professional programs. An additional three or four years of study at a school of pharmacy is required to become a registered pharmacist. **Courses need to be completed with a "C or higher".**

EG 101	English Composition I	3 hours
EG 102	English Composition II	3 hours
CH 123-124	Chemistry I & Lab	5 hours
CH 126-127	Chemistry II & Lab	5 hours

GB 140-141	Principles of Biology & Lab	4 hours
ZO 362-363	Human Anatomy & Physiology & Lab	5 hours
MA 165	Basic Calculus or MA 161 Calculus	5 hours
SP 101	Public Speaking	3 hours
CH 572-573	Organic Chemistry I & Lab	5 hours
CH 574-575	Organic Chemistry II & Lab	5 hours
MC 316-317	Microbiology & Lab	4 hours
MA 341	Intro to Probability and Statistics	3 hours
PH 140-141	College Physics I & Lab	5 hours
	General Studies Electives	12 hours

The physical science, life science, mathematics, and technology would be satisfied by CH123/124, GB140/141 (or GB100/101), MA165 (or MA161), and CH376/377, respectively.

General Education Substitution

PHPR613 Pharmacoeconomics (University of Kansas) 2 hours for EC101 Basic Economics

Equivalent courses from other accredited schools of pharmacy would also serve as substitutions for these requirements.

Remaining requirements for the baccalaureate degree are fulfilled upon satisfactory completion of the first two years of any accredited pharmacy school curriculum. An official transcript will need to be sent directly from the pharmacy school to Emporia State University

DUAL DEGREE PHARMACY

(Changes effective Fall 2014)

Under this program, students would receive a BA in Chemistry from Emporia State University and a Doctor of Pharmacy (PharmD) from an accredited pharmacy school. The program consists of up to 101 credit hours at ESU pending requirements met by substitutions or demonstrated proficiencies.

REQUIRED COURSES

Chemistry

CH 123/124	Chemistry I & Lab	5 hours
CH 126/127	Chemistry II & Lab	5 hours
CH 572/573	Organic Chemistry I & Lab	5 hours
CH 574/575	Organic Chemistry II & Lab	5 hours
CH 376/377	Quantitative Analysis & Lab	5 hours

Biology

GB 140/141	Principles of Biology & Lab	4 hours
MC 316/317	Microbiology & Lab	4 hours
ZO 362/363	Human Anatomy & Physiology	5 hours
MC 350/351	Molecular & Cellular Biology/Lab	4 hours

Physics

PH 140/141	College Physics I & Lab	5 hours
PH 343/344	College Physics II & Lab	5 hours

Mathematics

MA 165 or MA 161	Basic Calculus (or Calculus I)	5 hours
SUBTOTAL		57 hours

Substitution:

Medicinal Biochemistry I MDCM 601 for Biochemistry I CH 330, Medicinal Biochemistry II for Biochemistry II CH 660, Clinical Pharmacokinetics PHAT 693 (2hours) for CH 620, Elements of Physical Chemistry Community Pharmacy Experience PHAR 550 (4 hours) for CH 479 and CH 480, Undergraduate Research and Capstone.

General Education

EG 101	Composition I	3 hours
EG 102	Composition II	3 hours
SP 101	Public Speaking	3 hours
	Fine Arts (2 courses)	4 hours
	Humanities (2 courses)	6 hours
	Social/Behavioral Sciences (1 course)	3 hours
	Foreign Language	10 hours
	Multicultural	3 hours
PE 100	Active Living and one other course	4 hours
SUBTOTAL		39 hours
TOTAL		96 hours

See Course Listing for course descriptions.

DEPARTMENT OF SOCIAL SCIENCES

Michael Smith, Chair (Political Science)

Professors: Charles Brown (Philosophy), Edward Emmer (Philosophy), Ellen Hansen (Geography), Phil Kelly (Political Science), Christopher Lovett (History), Darla Mallein (Social Sciences Education), Gregory Schneider (History), Michael Smith, (History). **Associate Professors:** John Barnett (Political Science), Amanda Miracle (History). **Assistant Professors:** Deborah Hann (Geography), Maire Johnson (History).

<http://www.emporia.edu/socsci>

The Department of Social Sciences offers degree programs in history, political science, and social sciences education. Courses in the department allow students to explore the broadest possible background of information about the societies of which they are a part, thereby gaining an understanding of the principles and problems of social behavior. The curriculum serves both professional needs and the needs of a liberal arts education. Internships are available in political science, archival and museum techniques, and geographic information systems. The department has memberships in the American Historical Association and the American Political Science Association.

Programs for students majoring in the Department of Social Sciences are designed to meet a variety of future employment goals, including those in teaching, business, and government agencies, as well as to prepare students for graduate and professional schools in such fields as law, history, philosophy, geospatial analysis and public administration.

Students majoring in the social sciences can graduate with the following degrees:

Bachelor of Arts
Bachelor of Science
Bachelor of Science in Education

Department requirements for the BA, the BS, and the BSE degrees follow. Students interested in pursuing the Bachelor of Science in Education degree and earning a license to teach secondary or middle level social sciences are encouraged to contact the Department of Social Sciences to receive a copy of the advising sheet that lists all of the degree requirements.

All students enrolled in Social Sciences programs must meet a minimum grade point average requirement in courses used to satisfy their departmental degree program. For the Bachelor of Science in Education, a 2.75 grade point average must be maintained. For all other programs, a 2.5 grade point average must be maintained. Additionally, a grade of "C" or better must be achieved in each class, including those taken at other institutions, used to satisfy the departmental program requirements.

The department also offers a master of arts degree in History. For more information see the Graduate Office web site, <http://emporia.edu/grad> and the department website listed above.

BACHELOR OF ARTS

This degree program is designed for students who seek a broad background to support their field of specialization. It is also a degree for students intending to enter graduate school. A faculty advisor is assigned to work with each student to arrange a program which will fulfill their needs and interests.

Transfer students must successfully complete a minimum of three approved courses in residence at this university. Additional hours may be required upon analysis of previous credits.

BACHELOR OF SCIENCE

This degree program is designed for students who want extensive multi-disciplinary work in the social sciences or a particular program of specialization in one of the specific fields. A faculty advisor is assigned to work with each student to arrange a program which will fulfill their needs and interests.

Transfer students must successfully complete a minimum of three approved courses in residence at this university. Additional hours may be required upon analysis of previous credits.

History

BACHELOR OF ARTS

HISTORY MAJOR

This degree prepares students for careers in which a broad liberal arts background is essential, including numerous areas of private business and government service. Many students who pursue this major also undertake additional professional training in such areas as law, museum and archival studies, library science, and journalism. Additional work beyond the undergraduate major in history may also qualify one to teach history in college, or to pursue a career in museum or archival work. Students may be licensed to teach while pursuing the BA in history; ask advisor for details. Students must also complete 10 hours of a foreign language for the BA degree.

See the general education requirements in the General Education section of this catalog.

Required Second Program of Study:

Students are required to complete a second program of study of 15 to 30 hours in another discipline of their choice. Suggested second program fields for this major include the following: Art History, Economics, English, Ethnic & Gender Studies, Geography, Philosophy, Political Science, or Sociology/Anthropology.

Introductory Courses, 6 hours

Students must select one of the two options below

Option A:

HI 101	World Cultures to 1500
HI 102	Modern World Civilization

Option B:

HI 111	U.S. History to 1877
HI 112	U.S. History since 1877

Required Courses, 4 hours

- HI 503 Research Seminar
- HI 506 History Capstone (1 credit hour)

Chronological Courses, 12 hours

Students must select one course from each of the four categories.

- A. Early World:
 - HI 311 Ancient Greece, 800-200 BCE
 - HI 312 Roman World, 500 BCE -500 CE
 - HI 313 Medieval Europe
 - HI 314 Early Modern Europe, 1350-1650
- B. Modern World:
 - HI 316 Age of Revolutions, 1760-1848
 - HI 317 Age of Empire, 1848-1914
 - HI 318 Age of Total War, 1900-1945
 - HI 319 World Since 1945
- C. Early America:
 - HI 340 Origins of Colonial America
 - HI 341 American Revolution, 1763-1789
 - HI 342 Early Republic, 1789-1848
 - HI 343 Civil War Era, 1848-1877
- D. Modern America:
 - HI 344 Gilded Age, Progressive Era
 - HI 345 United States, 1914-1945
 - HI 346 United States, 1945-1974
 - HI 347 United States since 1974

Open Electives, 15 hours

Students are strongly encouraged to take a variety of courses from different categories

Europe- HI 310 Preclassical Age, HI 416 Anatomy of Revolutions, HI 418 Imperial Russia, HI 419 Soviet Union, HI 429 Modern Europe, HI 426 The Holocaust, HI 461 Modern England, HI 462 England in Film, HI 463 History of Ireland, HI 464 Ireland in Film

Asia, Africa and Latin America- HI 410 History of Islam, HI 411 Medieval Crusades, HI 412 Modern Middle East, HI 475 Modern China, HI 476 Conquest and Slavery in Latin America, HI 477 Modern Latin America

Military- HI 423 War and Society, HI 424 World War I, HI 425 World War II, HI 427 Vietnam, HI 435 American Military History

Ethnicity, Race and Gender- HI 440 Sex & Violence in 19th Century America, HI 441 Themes in American Indian History, HI 443 African-American History, HI 457 Immigration, HI 480 Introduction to Women's Studies, HI 483 American Women, HI 484 Early American Women, HI 485 Women of the Old West, HI 486 Modern American Women, HI 488 Sexuality in Early America

Regional- HI 333 Kansas History, HI 430 Country Folk and the Land, HI 431 Great Plains History, HI 432 Westward Expansion to 1860, HI 444 The American South

Political and Diplomatic- HI 446 Political Parties, 1789-1896, HI 447 Political Parties since 1896, HI 448 American Diplomatic History, HI 450 Right and Left in Modern America

Topics in History- HI 300 Topics in World History, HI 301 Topics in American History, HI 302 Introduction to History, HI 451 History and Film, HI 452, History and Memory, HI 454 History and Biography

Public- HI 590 Introduction to Public History, HI 591 Local History, HI 592 Archival Management

Upon approval, other classes including film and field trip classes can fulfill a topical requirement. Open electives also include additional survey courses and chronological courses not used as part of the major requirements listed above.

**BACHELOR OF SCIENCE
HISTORY MAJOR**

This history major prepares students for those careers in which a broad liberal arts background is essential, including many areas of private business and government service. Many of those who pursue this major also undertake additional professional training in such areas as law, museum and archival studies, library science, and journalism. Additional work beyond the undergraduate major in history may also qualify one to teach history in college, or to follow careers in museum or archival work.

See the general education requirements in the General Education section of this catalog.

Introductory Courses, 6 hours

Students must select one of the two options below

Option A:

- HI 101 World Cultures to 1500
- HI 102 Modern World Civilization

Total hours for certificate: 15 hours

Political Science

BACHELOR OF ARTS

POLITICAL SCIENCE MAJOR

The Bachelor of Arts with a major in political science is the traditional degree program. It reflects the goals of a well-rounded liberal arts education. Cultural, historical, and foreign language components distinguish this degree as does its focus on knowledge of international political institutions and processes. Accordingly, courses in international relations, comparative politics, international law and organizations, as well as in comparative political systems constitute its content. This degree is particularly well suited for students who wish to prepare for graduate or law school, as well as for those attracted to careers in foreign policy analysis, foreign service, military service, intelligence analysis, or as a consultant for international business and industry.

See the general education requirements in the General Education section of this catalog.

Political Science (required core): 9 hours

PO 121	American National Government	3 hours
PO 330	International Relations	3 hours
PO 333	American Foreign Policy	3 hours

Research Seminars (required): 6 hours

PO 500	Quantitative Research Methods	3 hours
PO 501	Qualitative Research Methods	3 hours

Political Science (electives): 15 hours

Any political science course not used to fulfill other major requirements. Students may also count up to six hours of Philosophy (PI) courses taught at the 300 level or above toward this requirement.

Total Hours 30**Required Second Program of Study:**

Students are required to complete a second program of study of 15 to 30 hours in another discipline of their choice. Suggested second program fields for this major include Communication, Economics, English, Modern Languages, Geography, History, National Security Minor, Philosophy or Sociology.

In addition to the foreign language requirement for the Bachelor of Arts degree, students enrolling in the political science major are encouraged to acquire competence in computer skills.

**BACHELOR OF SCIENCE
POLITICAL SCIENCE MAJOR**

The Bachelor of Science degree with a major in Political Science focuses on knowledge and understanding of American political institutions, organizations and processes. Students pursuing this degree will study legislative, executive, and judicial institutions at the national, state, and local levels. This degree is appropriate for those preparing for graduate work in political science, policy analysis, and law school, as well as considering careers as policy analysts, legislative staff or consultants, lobbyists, advisors to candidates and political parties, or interest group leaders and consultants.

See the general education requirements in the General Education section of this catalog.

Political Science (required core): 9 hours

PO 121	American National Government	3 hours
PO 322	State and Local Government	3 hours
PO 350	Public Administration	3 hours

Research Seminars (required): 6 hours

PO 500	Quantitative Research Methods	3 hours
PO 501	Qualitative Research Methods	3 hours

Political philosophy requirement: select 6 hours

PO 405	Development of Political Thought	3 hours
PO 406	Modern Political Theory	3 hours
PO 407	Contemporary Political Ideas	3 hours
PO 408	American Political Thought	3 hours

Any Philosophy (PI) course at the 300 level or above not used to satisfy other political science major requirements.

Study of Institutions: select 9 hours

PO 335	International Law and Organization	3 hours
PO 351	Public Policy	3 hours
PO 444	Constitutional Law I: Govrnt Inst.	3 hours
PO 446	The American Legislature	3 hours
PO 447	The American Presidency	3 hours
PO 448	The American Judiciary	3 hours
PO 449	Government Agencies	3 hours

Preferred Political Science Electives: select 12 hours

PO 400	Seminar in Political Science	3 hours
PO 445	Constitutional Law II: Civil Liber	3 hours
PO 455	Legislative Internship	5 hours
PO 480	Introduction to Law	2 hours
PO 498	Independent Study	3 hours

Up to two courses in institutions (above) not used to Satisfy that requirement

Other Political Science Electives 6 hours

Any political science courses not used to meet other major requirements.

Other Electives (6 hours)

PI 301	Ethics	3 hours
PI 302	Basic Logic	3 hours
SP 222	Argumentation and Debate	3 hours
SO 202	Social Problems	3 hours
SO 320	Social Stratification	3 hours
SO 353	Criminology	3 hours
SO 370	Race and Ethnic Relations	3 hours

POLITICAL SCIENCE MINOR

A minimum of 15 hours in Political Science courses. At least 5 of the 15 hours must be in courses numbered 300 or above.

LEGAL STUDIES MINOR

The Legal Studies Minor makes the department's Pre-law curriculum available to students who are not Political Science majors. It is excellent preparation for Law school and features a unique Introduction to Law course taught by a third-year student: the only such course in the state. Emporia State's pre-law students have a high rate of acceptance into law schools.

Course Name & Number **Credit Hours****Required Core courses.**

PO 444	Constitutional Law I	3 hours
PO 445	Constitutional Law II	3 hours
PO 480	Introduction to Law	2 hours

Select at least three courses from the following (9 credit hours)*

PO 335	International Law and Organization	3 hours
PO 448	American Judiciary	3 hours
SO 125	Introduction to Criminal Justice	3 hours
SO 309	Law and the Legal System	3 hours
SO 310	Introduction to Law Enforcement	3 hours
SO 335	Criminal Court Process	3 hours
SP 222	Argumentation and Debate	3 hours
SP 322	Theories of Argument	3 hours
SP 332	Theories of Persuasion	3 hours

BU 353	Legal Environment of Business	3 hours
BU 573	Law of Commerce	3 hours
BU 550	Legal Environment of International Business	3 hours

*In consultation with the Legal Studies Advisor students may be able to substitute other appropriate courses.

NATIONAL SECURITY MINOR

Total: 15 credit hours

Core Courses: (9 hours—select three of the following.)

PO 400	International Conflict Processes	3 hours
PO 520	National Security	3 hours
HI 346	United States 1945-74	3 hours
HI 347	United States since 1974	3 hours
HI 435	U.S. Military History	3 hours
GE 438	Geographies of International Development	3 hours

Electives: (6 hours—select two of the following.)

PO 335	International Law & Organization	3 hours
PO 425	Politics of Developing Areas	3 hours

PO 449	Government Agencies	3 hours
PO 451	Practicum in Public Administration	5 hours

Elective Courses (6 hours):

PO 322, PO 354, PO 400, PO 445, PO 446, PO 447, PO 448, PO 449, PO 750, PO 757		
BC 103	Principles of Economics I	3 hours
EC 554	Public Finance	3 hours
AC 223	Accounting for Operating Activities	3 hours
SP 303	Organizational Communications	3 hours
GE 415	Urban Geography	3 hours
SO 353	Criminology	3 hours
SO 405	Urban Sociology	3 hours

Social Sciences

BACHELOR OF SCIENCE IN EDUCATION

SOCIAL SCIENCES TEACHING FIELD

Students who successfully complete the secondary social sciences program will be licensed to teach American history, world history, Kansas history, government/civics, geography, economics, and sociology in grades 6-12. Students who successfully complete the middle level program will be licensed to teach American history, world history, Kansas history, government/civics, geography and economics in grades 5-8. All students in the social sciences who are preparing for teacher licensure are advised to contact the Department of Social Sciences to receive a copy of the advising sheet that lists the requirements for social sciences licensure at both the secondary and middle levels.

All students in any degree program in the Department of Social Sciences who wish to have on their contract recommendation for teaching-field and subject-matter-field licensure in the social sciences must fulfill the requirements in Options A or B below. Honors courses are highly recommended.

OPTION A - Two Teaching Fields

This option requires a second teaching field such as physical education, business, or English. See the general education requirements in the General Education section of this catalog. See the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

Required Courses (minimum of 54 hours):

SS 310	Intro. to Teaching Social Studies	3 hours
SS 460	Teaching Secondary/Middle Soc Studies	3 hours
HI 111	US History to 1877	3 hours
HI 112	US History Since 1877	3 hours
HI 333	Kansas History	3 hours
HI 303	Teaching With Primary Sources	3 hours
HI 300 or	Higher Elective in US History	3 hours
HI 101	World Cultures to 1500	3 hours
HI 102	Modern World Civilization	3 hours
HI 300 or	Higher Elective in World History	3 hours
HI 300 or	Higher Elective in World History	3 hours
PO 100	Intro to Government & Politics	3 hours
PO 121	American National Government	3 hours
PO 300 or	Higher Elective	3 hours
PO 300 or	Higher Elective	3 hours
EC 101	Basic Economics	3 hours
GE 101	World Regional Geography	3 hours
SO 261	Intimate Relationships	3 hours

HI 112	US History Since 1877	3 hours
HI 333	Kansas History	3 hours
HI 300 or	Higher Elective in US History	3 hours
HI 303	Teaching With Primary Sources	3 hours
HI 101	World Cultures to 1500	3 hours
HI 102	Modern World Civilization	3 hours
HI 300 or	Higher Elective in World History	3 hours
HI 300 or	Higher Elective in World History	3 hours
PO 100	Intro to Government & Politics	3 hours
PO 121	American National Government	3 hours
PO 300 or	Higher Elective	3 hours
PO 300 or	Higher Elective	3 hours
EC 101	Basic Economics	3 hours
GE 101	World Regional Geography	3 hours
SO 261	Intimate Relationships	3 hours

All students at this university answering requirements for a teaching field in the social sciences must have a grade-point average of 2.75 in the social sciences for admittance into the social sciences teacher-education program. All Social Sciences Education majors must be approved by the Social Sciences Teacher Education Admissions Committee in order to enter the Phase I Teacher Education Program.

PROGRAM FOR LICENSURE IN MIDDLE SCHOOL SOCIAL SCIENCES

This program is designed to provide course work necessary for the academic preparation of prospective social sciences teachers on the middle school level. Students who complete the program will have the recommendation of the chair of the Social Sciences Secondary Education Program Director for licensure to teach the social sciences at this level. This program does not constitute a first teaching field in the social sciences. However, a middle school licensure program in the social sciences could fulfill the same purpose as a second teaching field. The program's primary purpose is one of providing licensure for those students who wish to be eligible to teach the social sciences at the middle school level under the program approval guidelines of the Kansas State Department of Education.

MIDDLE SCHOOL LICENSURE

Social Sciences Requirements (33 hours)

Required Courses:

SS 310	Intro. to Teaching Social Studies	3 hours
SS 460	Teaching Secondary/Middle Soc Studies	3 hours
HI 111	US History to 1877	3 hours
HI 112	US History Since 1877	3 hours
HI 333	Kansas	3 hours
HI 101	World Cultures to 1500	3 hours
HI 102	Modern World Civilization	3 hours
PO 100	Intro to Government & Politics	3 hours
PO 121	American National Government	3 hours
EC 101	Basic Economics	3 hours
GE 101	World Regional Geography	3 hours

These are minimum requirements. The social sciences faculty recommends additional hours in those subjects in which the student intends to teach.

Credit in equivalent courses such as transfer credits should be evaluated by a faculty advisor in the Department of Social Sciences before the student's initial enrollment.

OPTION B - One Teaching Field

This option is for students who select social sciences as a single teaching field. See the general education requirements in the General Education section of this catalog. See The Teachers College section for information regarding admission to teacher education and for professional education requirements.

Required Courses (minimum of 54 hours):

SS 310	Intro. to Teaching Social Studies	3 hours
SS 460	Teaching Secondary/Middle Soc Studies	3 hours
HI 111	US History to 1877	3 hours

Additional Program Requirements:

Elementary education students and students in other teaching fields seeking the middle level license in social studies must student teach at least 8 weeks in a middle school social studies classroom. This requirement is coordinated by the Teachers College. Also PY 211 and MA 225, both 3 credit hours, and ED 220, 2 credit hours, are required of all students pursuing the BSE in Social Sciences.

College-wide (CW) courses do not apply in meeting social sciences teaching field requirements. Honors courses are highly recommended.

EAST ASIAN STUDIES MINOR

The minor in East Asian Studies provides students with detailed information about the peoples, cultures, history, philosophies, religions, art and literatures of East Asia, especially important in this era of international, political and business relations.

Requirements**15 Credit hours from any combination of the following:**

AS 110	Chinese Language & Culture I	3 hours
AS 210	Chinese Language & Culture II	3 hours
AS 313	Chinese Language & Culture III	3 hours
AS 314	Chinese Language & Culture IV	3 hours
AS 320	Introduction to Modern Asia	3 hours
GE 359	Geography of East Asia	3 hours
FL 475	Independent Study in Foreign Lang.	1-4 hours
HI 427	Vietnam	3 hours
HI 474	China to 1800	3 hours
HI 475	Modern China	3 hours
PI 335	Eastern Thought: Hinduism to Zen	3 hours
PO 425	Politics of Developing Areas	3 hours
PO 426	East Asian Governments	3 hours

GEOGRAPHY MINOR

The geography minor is meant to develop skills and understanding of spatial thinking and patterns in human activities and human-environment interactions. The minor may be designed to supplement and complement many majors, as it increases awareness of connections between students and the real world around them, from the local environment to international relations. The minor requires completion of 15 credit hours in geography courses.

Required Courses (6 credit hours):

GE 101	World Regional Geography	3 hours
--------	--------------------------	---------

And one of the following:

GE 200	Introduction to Geography	3 hours
--------	---------------------------	---------

OR

GE 254	Physical Geography	3 hours
--------	--------------------	---------

Electives

9 credit hours of Geography (GE) course at the 300 level or above.

PHILOSOPHY MINOR

Philosophy can yield immediate benefits for students planning postgraduate work. As law, medical, business, and other professional school faculty and admissions personnel have often said, philosophy is excellent preparation for the training and later careers of the professionals in question. (From: "Philosophy: A Brief Guide for Undergraduates," American Philosophical Association.)

The minor in philosophy requires completion of 15 credit hours:

Required Courses:

PI 225	Introduction to Philosophy	3 hours
PI 301	Ethics	3 hours
PI 302	Basic Logic	3 hours

Suggested Courses: Any Philosophy course of interest to the student.

While our courses do not follow a regular rotation, they may include:

History of philosophy such as Ancient, Modern, or Contemporary Philosophy
Religious philosophy, including Western Religious Philosophy and World Religions
Standard themes such as Philosophy of Science, Existential Philosophy and World Religions
Special topics courses, including Philosophy of Arts And Beauty, Environmental Ethics

See Course Listing for course descriptions.

DEPARTMENT OF SOCIOLOGY, ANTHROPOLOGY, AND CRIME & DELINQUENCY STUDIES

Associate Professor Alfredo Montalvo-Barbot, Chair

Professors: Evandro Camara (Sociology), Gary J. Wyatt (Sociology).

Associate Professors: Alfredo Montalvo (Sociology), Rochelle Rowley (Community Psychology).

Assistant Professor: Rebecca Rodriguez Carey (Sociology)

<http://www.emporia.edu/socanth/>

The Department of Sociology, Anthropology, and Crime & Delinquency Studies offers academic programs in sociology and crime and delinquency studies leading to the Bachelor of Arts and Bachelor of Science degrees.

Including general education requirements and other electives, the Bachelor of Science in Sociology and the Bachelor of Science in CDS require a total of 120 credit hours.

Including general education requirements and other electives, the Bachelor of Arts in Sociology and the Bachelor of Arts in CDS require a total of 120 credit hours.

Students interested in sociology, anthropology and crime and delinquency studies may choose from a variety of courses and programs. The curriculum is designed to be flexible enough for education majors to prepare for the field of teaching sociology and anthropology in high schools or colleges, or to pursue careers in local, state, and federal agencies, or to gain admission to graduate study in a field of specialization.

The curriculum enables students to earn the following degrees:

Bachelor of Arts Bachelor of Science

In addition, sociology majors may choose a concentration in Child Maltreatment and Family Violence. CDS majors may choose a concentration in Correctional Services (BS students only). We also offer minors in Sociology, Anthropology, and CDS.

BACHELOR OF ARTS (37 Hours) SOCIOLOGY MAJOR (Changes Effective Fall 2014)

The degree Bachelor of Arts with a major in sociology traditionally has been a broad-based liberal arts degree designed to provide students with a solid foundation in sociology and course work in a variety of other liberal arts disciplines. In keeping with that tradition, students pursuing this degree at Emporia State University are required to complete a total of 37 semester hours in sociology and anthropology. In addition to the above requirements, students pursuing the B.A. degree in Sociology are required to complete the university requirements for the Bachelor of Arts degree for liberal arts majors. Students must choose a second major, a second program of study, or a minor in an academic discipline approved by their advisor. The B.A. degree in Sociology requires

students to complete ten hours of one Foreign Language. Students who complete a major in sociology have many career opportunities. Graduates have pursued careers in teaching, social work, probation and parole, law enforcement, social agency administration, centers for the aged, corrections, and a variety of other fields. In addition, an undergraduate degree with a major in sociology provides an excellent foundation for graduate work in the disciplines of sociology and anthropology, criminal justice, and for law school. In order to enhance career preparation, the department offers student practicum experiences with local social service agencies and internships with law enforcement agencies. Students who wish to pursue careers in social service or law enforcement may have the opportunity to supplement their degree programs with applied experiences. In an effort to provide a more stimulating atmosphere for learning and to enhance interaction among the students of our program, the department established the ESU Sociology Club, the Anthropology Club, and the Criminal Justice Organization. Sociology Club activities include both educational and social gatherings and all students are encouraged, but not required, to participate. The Anthropology Club promotes a better understanding of, and interest in anthropological research among students, provides access to opportunities for further student education through outside resources and encourage the pursuit of professional development in the field of Anthropology. The Criminal Justice Organization brings together students interested in criminal justice careers to plan and implement activities that help expand their learning experience beyond the classroom.

In order to recognize excellence in academic achievement, the Zeta chapter of Alpha Kappa Delta International Sociology Honor Society has been established at ESU. Activities include attending and presenting professional papers at local and national conferences and sponsor guest speakers as well as other academic events in the department and on campus. We also have a Student Advisory Board. The Student Advisory Board suggests changes concerning the curriculum as well as alerts the department to students' concerns. The Bargain Box, Roy Durham Memorial, Mr. and Mrs. Noel P. Gist, J. Jack and Mary W. Melhorn, Minnie Meyer, and Nathaniel Terrell Memorial Scholarships have been earmarked for students majoring in sociology and/or Crime and Delinquency Studies at ESU. See the general education requirements in the General Education section of this catalog.

- Students must have a minimum grade of "C" in all courses that will be applied to major.
- *A minimum of 15 hours towards the major must be completed at ESU.
- Sociology Majors must take AN 210, Contemporary Cultures, as a General Education requirement.

Sociology Core Requirements (25 hours):

SO 101	Introduction to Sociology	3 hours
SO 202	Social Problems (Spring only)	3 hours
SO 303	Social Deviance (Spring only)	3 hours
AN 315	Family in Cross-Cultural Perspective	3 hours
OR		
SO 400	The Family in Social Context	
SO 320	Social Stratification (Fall only)	3 hours
SO 450	Research Methods (Fall only)	3 hours
SO 550	Research Methods and Statistics in Sociology (Spring only)	3 hours
SO 565	Sociological Theory (Spring only)	3 hours
SO 580	Senior Capstone (Fall only-Seniors)	1 hour

SOCIOLOGY ELECTIVES (12 hours)**Choose Option A or Option B**

Option A: Select 12 credit hours of Sociology electives:

Elective courses must be 300-level or above and may be chosen from any combination of AN (Anthropology) or SO (Sociology) courses. (Excluding SO 471 Independent Study, SO 472 Sociology Practicum, and SO 473 Internship in Crime and Delinquency Studies).

Option B: Concentration in Child Maltreatment and Family Violence

Required Courses	(12 hours)
SO 408 Child Abuse and Maltreatment	3 hours
SO 410 Intimate Violence	3 hours
SO 471 Independent Study	3 hours
SO 472 Sociology Practicum	3 hours

BACHELOR OF SCIENCE (45 Hours)**SOCIOLOGY MAJOR**

(Changes Effective Fall 2014)

The degree Bachelor of Science in sociology is designed to provide a student with in-depth academic preparation in the field of sociology. Students pursuing the B.S. degree with a major in sociology are required to complete 45 semester hours in sociology. The B.S. degree is designed primarily for those students who intend to pursue careers in social service, law enforcement, criminal justice, government agencies, and other related fields, or who want more extensive preparation in the discipline of sociology for advanced degree programs. Students who complete a major in sociology have many career opportunities. Graduates have pursued careers in teaching, probation and parole, law enforcement, social agency administration, centers for the aged, corrections, and a variety of other fields. In addition, an undergraduate degree with a major in sociology provides an excellent foundation for graduate work in the disciplines of sociology and anthropology, social work, criminal justice, and for law school. In order to enhance career preparation, the department offers student practicum experiences with local social service agencies and internships with law enforcement agencies. Students who wish to pursue careers in social service and criminal justice may have the opportunity to supplement their degree programs with applied experiences. In an effort to provide a more stimulating atmosphere for learning and to enhance interaction among the students of our program, the department established the ESU Sociology and Anthropology Clubs. Sociology Club activities include both educational and social gatherings and all students are encouraged, but not required, to participate. The Anthropology Club promotes a better understanding of, and interest in anthropological research among students, provides access to opportunities for further student education through outside resources and encourage the pursuit of professional development in the field of Anthropology.

In order to recognize excellence in academic achievement, the Zeta chapter of Alpha Kappa Delta International Sociology Honor Society has been established at ESU. Activities include attending and presenting professional papers at local and national conferences and sponsor guest speakers as well as other academic events in the department and on campus. We also have a Student Advisory Board. The Student Advisory Board suggest changes to the curriculum as well as alerts the department of students' concerns. The Bargain

Box, Roy Durham Memorial, Mr. and Mrs. Noel P. Gist, J. Jack and Mary Melhorn, Minnie Meyer, and Nathaniel Terrell Memorial Scholarships have been earmarked for students majoring in sociology at ESU. See the general education requirements in the General Education section of this catalog.

- Students must have a minimum grade of "C" in all courses that will be applied to major.
- *A minimum of 15 hours towards the major must be completed at ESU.
- Sociology Majors must take AN 210, Contemporary Cultures, as a General Education requirement.

SOCIOLOGY CORE REQUIREMENTS (25 hours):

SO 101 Introduction to Sociology	3 hours
SO 202 Social Problems (Spring only)	3 hours
SO 303 Social Deviance (Spring only)	3 hours
AN 315 Family in Cross-Cultural Perspective	3 hours
OR	
SO 400 The Family in Social Contest	3 hours
SO 320 Social Stratification (Fall only)	3 hours
SO 450 Research Methods (Fall only)	3 hours
SO 550 Research Methods and Statistics in Sociology (Spring only)	3 hours
SO 565 Sociological Theory (Spring only)	3 hours
SO 580 Senior Capstone (Fall only-Seniors)	1 hour

SOCIOLOGY ELECTIVES (20 hours)**Choose Option A or Option B**

Option A: Select 20 credit hours of elective courses in any combination of anthropology or sociology courses 300 level and above.

Option B: Concentration in Child Maltreatment and Family Violence (20 hours)

Required Courses	(12 hours)
SO 408 Child Abuse and Maltreatment	3 hours
SO 410 Intimate Violence	3 hours
SO 471 Independent Study	3 hours
SO 472 Sociology Practicum	3 hours

Electives: Minimum of 8 credit hours in anthropology or sociology courses 300 level and above.

MINOR IN SOCIOLOGY (18 Hours)

(Changes Effective Fall 2014)

A minor in Sociology consists of 18 semester hours of Sociology course work. A minimum of 9 hours in Sociology must be completed at Emporia State University.

Required Courses (6 hours):

SO 101 Introduction to Sociology	3 hours
Or	
SO 202 Social Problems (Spring only)	3 hours
And	
SO 565 Sociological Theory (Spring only)	3 hours
Sociology Electives	12 hours

The 12 hours of electives must be upper-level courses (300-level or above).

Students must have a minimum grade of “C” in each class.

No more than 3 hours of SO 471 Independent Study, SO 472 Sociology Practicum and/or SO 473 Internship in Crime and Delinquency Studies may be counted as an elective. All Independent Study, Practicum and Internship hours need the approval of the instructor.

MINOR IN ANTHROPOLOGY (18 Hours)

A minor in Anthropology consists of 18 semester hours of Anthropology related course work. A minimum of 9 hours must be completed at Emporia State University.

Students must have a minimum grade of “C” in each class.

Required Courses (9 hours):

AN 210 Contemporary Cultures	3 hours
AN 320 Human Evolution and Civilization	3 hours
One 3 hour non-anthropology upper division elective with advisor’s approval	3 hours
Anthropology Electives	9 hours

The 9 hours of electives must be upper level anthropology courses (300-level or above). No more than 3 hours of AN 471 Independent Study may be counted as an elective. All Independent Study hours need the approval of the instructor.

BACHELOR OF ARTS (37 Hours)

CRIME AND DELINQUENCY STUDIES

The Bachelor of Arts degree in Crime and Delinquency Studies traditionally has been a broad-based liberal arts degree designed to provide the student with a solid foundation in Crime and Delinquency Studies and course work in a variety of other liberal arts disciplines. The Bachelor of Arts degree program is designed primarily for those students who intend to pursue an advanced degree in Crime and Delinquency Studies, Juvenile Justice or Law. In keeping with that tradition, students pursuing a B.A. in Crime and Delinquency Studies at Emporia State University are required to complete a total of 37 semester hours in Sociology and Anthropology. All students working toward the B.A. in Crime and Delinquency Studies are required to complete a 25-hour “Required Core”, 6 hours in secondary courses, and 6 hours in interdisciplinary courses.

In addition to the above requirements, students pursuing the B.A. degree in Crime and Delinquency Studies are required to complete the university requirements for the Bachelor of Arts degree for liberal arts majors. Students must choose a second major, a second program of study, or a minor in an academic discipline approved by their advisor. The B.A. degree in Crime and Delinquency Studies requires students to complete ten hours of one Foreign Language. Students who complete a major in Crime and Delinquency Studies have many career opportunities. Graduates have pursued careers in probation and parole, law enforcement, social agency administration, corrections, and a variety of other

fields. In addition, an undergraduate degree with a major in Crime and Delinquency Studies provides an excellent foundation for graduate work in the disciplines of criminal justice and for law school. In order to enhance career preparation, the department offers student practicum experiences with local social service agencies and internships with criminal justice agencies.

The purpose of the core curriculum is to provide a core knowledge that enables students to critically think about and engage in research on salient issues in Crime and Delinquency Studies. The core curriculum requirements provide students with research and theoretical learning techniques and experiences that provide a basis for more advanced course work. The core curriculum requirements also provide a foundation for students interested in graduate programs. See the general education requirements in the General Education section of this catalog.

- Students must have a minimum grade of “C” in all courses that will be applied to the major.
- CDS majors must take SO 101 Introduction to Sociology as a General Education Requirement.
- A minimum of 15 hours toward the major must be completed at Emporia State University.
- A photography course is recommended.

CRIME AND DELINQUENCY STUDIES

CORE REQUIREMENTS (25 Hours)

SO 125 Introduction to Criminal Justice	3 hours
SO 310 Law Enforcement	3 hours
SO 353 Criminology	3 hours
SO 403 Sociology of Corrections	3 hours
SO 418 Juvenile Delinquency	3 hours
SO 450 Research Methods (Fall only)	3 hours
SO 520 Crime and Delinquency Prevention and Intervention (Spring only)	3 hours
SO 550 Research Methods and Statistics in Sociology (Spring only)	3 hours
SO 580 Senior Capstone (Fall only-Seniors)	1 hour

Departmental Secondary Courses – (6 hours):

Elective course must be 300-level or above and may be chosen from any combination of AN (Anthropology) or SO (Sociology) courses.

Interdisciplinary Courses – (6 hours)

Student must complete at least 6 hours of courses 300 level or above in one or more academic fields of interest other than Sociology, Anthropology, and Crime and Delinquency Studies.

Total of 37 hours in Major*

BACHELOR OF SCIENCE (45 Hours)

CRIME AND DELINQUENCY STUDIES

The Bachelor of Science degree in Crime and Delinquency Studies is designed to provide a student with in-depth academic preparation in the field of Crime and Delinquency. The B.S. degree is designed primarily for those students who intend to pursue careers in Crime and Delinquency Studies, juvenile justice, law enforcement, government agencies, and other related fields, or who want more extensive preparation in the discipline of Crime and Delinquency Studies for advanced degree programs. Students pursuing the B.S. degree in Crime and Delinquency Studies are

required to complete 25 hours required core in Crime and Delinquency Studies. All students working toward the B.S. degree in Crime and Delinquency Studies are required to complete 14 hours in secondary courses and 6 hours in interdisciplinary courses. Students must earn a GPA of 2.0 or better in the major. In order to enhance career preparation, the department offers student practicum experiences with local social service agencies and internships with criminal justice agencies.

The purpose of the core curriculum is to provide a core knowledge that enables students to critically think about and engage in research on salient issues in Crime and Delinquency. The core curriculum requirements provide students with research and theoretical learning techniques and experiences that provide a basis for more advanced course work. The core curriculum requirements also provide a foundation for students interested in graduate programs. See the general education requirements in the General Education section of this catalog.

- Students must have a minimum grade of “C” in all courses that will be applied to the major.
- CDS majors must take SO 101 Introduction to Sociology as a General Education requirement.
- A minimum of 21 hours towards the major must be completed at Emporia State University.
- A photography course is recommended.

CRIME AND DELINQUENCY STUDIES

CORE REQUIREMENTS (25 hours):

SO 125	Introduction to Criminal Justice	3 hours
SO 310	Law Enforcement	3 hours
SO 353	Criminology	3 hours
SO 403	Sociology of Corrections	3 hours
SO 418	Juvenile Delinquency	3 hours
SO 450	Research Methods (Fall only)	3 hours
SO 520	Crime and Delinquency Prevention and Intervention (Spring only)	3 hours
SO 550	Research Methods and Statistics in Sociology (Spring only)	3 hours
SO 580	Senior Capstone (Fall only-Seniors)	1 hour

Option A (20 hours): Choose at least **14 hours** from any combination of anthropology or sociology courses 300 level or above.

Interdisciplinary courses: Choose at least 6 hours of courses 300 level or above in one or more academic fields of interest other than Sociology, Anthropology, and Crime and Delinquency Studies.

Option B (20 hours): Concentration in Correctional Services

Required Courses: (14 hours)

SO 340	Community Corrections	3 hours
SO 355	Juvenile Justice Systems	3 hours
SO 471	Independent Study	3 hours
SO 472	Sociology Practicum	5 hours

Interdisciplinary courses: Choose at least 6 hours of courses 300 level or above in one or more academic fields of interest other than Sociology, Anthropology, and Crime and Delinquency Studies

Total of 45 hours in Major

MINOR IN CRIME AND DELINQUENCY STUDIES

A minor in Crime and Delinquency Studies shall consist of 18 semester hours from the core and secondary courses for the Crime and Delinquency Studies Degree. A minimum of 9 hours in Sociology must be completed at Emporia State University.

Required Courses (18 hours):

SO 125	Introduction to Criminal Justice	3 hours
SO 520	Crime and Delinquency Prevention and Intervention	3 hours
CDS Electives		12 hours

The remaining 12 semester hours are Crime and Delinquency Studies electives, but must be upper-level courses (300-level or above). No more than 3 hours of SO 471 Independent Study or SO 473 Internship in Crime and Delinquency Studies may be counted as an elective. All independent study hours need the approval of the instructor. Any Sociology/Anthropology upper-level courses used for Crime and Delinquency Studies electives must be approved by the Chair of the department. Students must complete all core courses with a “C” minimum in each course. Students must earn a cumulative grade point average of 2.0 or above.

See Course Listing for course descriptions.

THE TEACHERS COLLEGE

Joan D. Brewer, Interim Dean

Zeni Colorado-Resa, Interim Associate Dean

The Teachers College consists of the Dean's Office, six academic departments, the Office of Field Placement and Licensure, the Jones Institute for Educational Excellence, the Center for Early Childhood Education, and the Resource Center. Academic departments of The Teachers College are the following:

Department of Counselor Education

Department of Elementary Education/Early Childhood/Special Education

Department of Health, Physical Education, and Recreation

Department of Instructional Design and Technology

Department of Psychology

Department of School Leadership/Middle & Secondary Teacher Education

<http://www.emporia.edu/teach>

Specific information about the programs and faculty of each of the college's six academic departments is contained in the following sections of this catalog.

MISSION OF THE TEACHERS COLLEGE

The mission of The Teachers College, the school personnel preparation unit of Emporia State University, is to prepare professionals who provide service to society, apply interdisciplinary scholarly knowledge, engage in effective practice, respond to uncertainty and change, rely on self-reflection, and belong to professional community. Our graduates are skilled practitioners who are prepared with essential knowledge, skills, and dispositions in their fields of specialization. Candidate learning reflects historical and contemporary knowledge, research, theory, and practice that meet the academic, personal, and social needs of their students. The vision of The Teachers College is that The Teachers College will promote the Common Good through educational excellence and enhanced presence permeated with leadership, diversity, and technology.

Professional programs are designed to reflect the current knowledge base and effective practices. Curricular coherence is strengthened through faculty study and dialogue on purpose, course content, and intended candidate learning outcomes.

OUTCOMES FOR TEACHER CANDIDATES AND OTHER SCHOOL PROFESSIONALS:

Knowledge

Candidates will exhibit knowledge of:

1. characteristics of diverse learners.
2. legal issues and ethical standards that apply to sound educational practices.
3. educational strategies that support the learning for students from diverse cultural and linguistic backgrounds.
4. general education within an intellectual framework.
5. subject matter content and content-specific pedagogy that inform the basis for entitlement to practice.
6. philosophical, historical, social, and theoretical foundations of education.

7. on-going developments in subject matter content, curriculum planning, instructional theory and practice, classroom management, and assessment.
8. teaching and learning as a dynamic, constructive, and metacognitive process.
9. a repertoire of teaching and learning strategies, designed to help students increase their power as learners.
10. ever changing educational needs of students living in a global society.
11. appropriate technology and how it may be used to enhance teaching and learning.
12. various instructional strategies that can be used to meet the needs and learning styles of individual students.
13. theories of human physical, cognitive, social, and emotional development.
14. appropriate techniques for teaching and using self-reflection strategies.
15. a variety of assessment strategies to diagnose and respond to individual learning needs.
16. professional ethics and standards for practice.
17. teamwork and practices for creating healthy environments for learning and teaching.
18. effective communication techniques in order to develop a positive learning environment.

Skills

Candidates will demonstrate ability to:

1. integrate and use concepts from their general, content, and professional studies in their educational environment.
2. demonstrate professional performance that incorporates theory, research, and practice in order to help all students learn.
3. implement non-biased techniques for meeting needs of diverse learners.
4. integrate knowledge across and within disciplines.
5. use knowledge of subject matter content and instructional strategies to meet the widely-diverse needs of the students they educate.
6. determine and assess what students need to know and be able to do in order to succeed.
7. utilize creative planning and curriculum integration to promote learning of all students.
8. learning experiences commensurate with a student's level of readiness.
9. assess their educational practices, modify their assumptions and actions, and expand their repertoire of skills.
10. use and support effective communication techniques in order to develop a positive learning environment.
11. make use of appropriate technology to support student learning.
12. integrate effective behavior management into all interactions with students.
13. apply a variety of instructional strategies and materials to promote student learning, critical thinking, and problem solving.
14. employ appropriate assessment techniques in order to measure student performance and growth.
15. develop a storehouse of learning strategies that help students understand and integrate knowledge.
16. respond respectfully to ideas and views of others.
17. recognize and appropriately respond to the need for on-going self-development and professional development in response to professional standards of practice.
18. utilize student learning standards to promote student learning and achievement.

Dispositions

Candidates will exhibit dispositions that exemplify:

1. professionalism and ethical standards.
2. respect for cultural and individual differences by providing equitable learning opportunities for all students.
3. a willingness to think critically about content, curriculum planning, teaching and learning pedagogy, innovative technology, and assessment.
4. the belief that educating children and adults requires the integration of multiple kinds of knowledge.
5. a desire to analyze concepts, evaluate clinical practices, experiment, and initiate innovative practices as needed.
6. a commitment to life-long learning by participating in professional organizations and by keeping current with research in their field.
7. a commitment to challenge all students to learn and to help every child to succeed.
8. an awareness of the larger social contexts within which learning occurs.
9. a commitment to self-reflection to recognize in all students human physical, cognitive, social, and emotional development.
10. a belief that curriculum planning and teaching practices be meaningful, engaging, and adapted to the needs of diverse learners.
11. a desire to collaborate with colleagues, parents and community members, and other educators to improve student learning.
12. a willingness to learn from other professionals in the field.

CONCEPTUAL FRAMEWORK MODEL

Emporia State University's faculty, including professional education and content area faculty, support a program designed to transform candidates into Professionals. To help all students learn, Professionals must have a command of content, critical ideas and skills, and the capacity to reflect on, evaluate, and learn from their practice so that it continually improves. While there are different ways that successful professionals can be highly effective, six proficiencies emerge from a shared evidence-based understanding of professional effectiveness. These six proficiencies define the Professional: providing service to society; applying interdisciplinary scholarly knowledge; engaging in effective practice; responding to uncertainty and change; relying on self-reflection; and belonging to professional community

Candidates study, learn, and grow in an academic setting that integrates and highlights the connections among general studies, content studies, professional studies, and clinical experiences. Moreover, the candidate is immersed in an academic milieu that values a number of tenets the faculty see as essential for the professional development and growth of teachers, other school personnel, and those in the helping professions: especially, the value of diversity, the relevance of authentic assessment, the essentials of professionalism, the importance of collaboration, the usefulness of technology, and the power of reflection. ESU's professional education programs and non-professional education programs offered within The Teachers College devote themselves to the proposition that candidates who learn and grow in such an atmosphere and who integrate knowledge, theory, and practice demonstrate the proficiencies of the Professional at the time of program completion.

DELIVERY OF THE CURRICULUM

Faculty of The Teachers College expect students to meet or exceed established scholastic, professional, and licensure standards. In order to deliver curriculum, the faculty provide effective instruction, academic advisement, and personal guidance to students. To accomplish this, faculty participate in a vigorous self-development program which includes scholarly/creative activity, close contact with their professional fields, and the study of methods for continually upgrading the quality of their teaching and other professional interactions with students. The college and university provide the faculty adequate opportunities for self-development that include training programs, leave policies, and the funding of professional travel.

Because curricular coherence is essential, faculty members who represent general education, specialty studies, supporting professional disciplines, and pedagogy create and maintain continuous dialogue regarding the content and quality of professional preparation programs sponsored by The Teachers College.

Students formally evaluate courses and instruction, and department administrators assist with development of instructional goals and appraisals of goal accomplishment. Evaluation of each preparation program is conducted by employer assessment of the performance of graduates as well as determining graduate perspectives on curricular adequacy.

PROFESSIONAL EDUCATION

University procedures and requirements for being admitted to a teacher education program are administered by the Elementary Advising Center (for elementary majors) in 245 Visser Hall, 620-341-5770. Admissions for secondary majors are administered by the Director of Secondary Admissions, whose office is located in 203 Visser Hall, 620-341-5078. Student teaching, all other field experiences, and procedures and requirements for becoming initially licensed to teach are administered by the Office of Field Placement and Licensure, 208 Visser Hall, 620-341-5447.

The professional component of Emporia State's secondary and middle school teacher education program has two phases. Phase I consists of campus and field based professional course work in education. Normally, students enter Phase I during the junior year. Phase II consists of a full semester of student teaching which occurs during the senior year.

Elementary education majors complete the professional component through participation in blocked courses and a year-long Professional Development School program of field experience. These Professional Development Schools are located in various school districts within the state.

For teacher education admission requirements, see admission requirements located in the Elementary Education/Early Childhood/Special Education and the School Leadership/Middle & Secondary Teacher Education Department sections of the Undergraduate Catalog.

OFFICE OF FIELD PLACEMENT AND LICENSURE (OFPL)

The Office of Field Placement and Licensure, 208 Visser Hall, 620-341-5447, and coordinates field experiences for ED/EL 220 Introduction to Teaching, student teaching, counselor education, adaptive special education, library media specialist, teaching English as a second language, field experiences for academic methods, campus-wide internships in schools, and the Family Literacy program. OFPL also houses the Teacher Licensure Officer, 620-341-5412.

TEACHER EDUCATION DISCLOSURE STATEMENT

The Teachers College of Emporia State University reserves the right to refuse admission to the teacher education program to any person who has a felony conviction or has otherwise committed offenses inappropriate for a teacher (The Teachers College Policies and Procedures Manual).

In addition, the KSDE Regulations and Standards for Kansas Educators (adopted July 1, 2003) address restrictions regarding issuance and renewal of licenses, hearings upon denial, and reports required of county and district attorneys (see Statute # 72: Schools, Article 13: Teachers' Certificates, Title: Restrictions on issuance and renewal of licenses, hearings upon denial, etc.). For a copy of these regulations, contact the Director, Office of Field Placement and Licensure, Visser Hall 208, 620-341-5447.

This statute empowers the Kansas State Board of Education to deny a teaching license or certificate or to cancel or revoke a license or certificate for several reasons, including but not limited to:

- (1) conviction of any crime punishable as a felony;
- (2) conviction of any crime involving a minor;
- (3) conviction of any misdemeanor involving theft;
- (4) conviction of any misdemeanor involving drug-related conduct;
- (5) conviction of any act defined in any section of article 36 of chapter 21 of the Kansas statutes annotated;

- (6) conviction of an attempt under K.S.A. 21-3301, and amendments thereto, to commit any act specified in this subsection;
- (7) commission or omission of any act that injures the health or welfare of a minor through physical or sexual abuse or exploitation;
- (8) engaging in any sexual activity with a student;
- (9) breach of an employment contract with an education agency by abandonment of the position;
- (10) conduct resulting in a finding of contempt of court in a child support proceeding;
- (11) entry into a criminal diversion agreement after being charged with any offense or act described in this subsection;
- (12) obtaining, or attempting to obtain, a license by fraudulent means or through misrepresentation of material facts; or
- (13) denial, revocation, cancellation, or suspension of a license in another state on grounds similar to any of the grounds described in this subsection.

The Kansas State Board of Education will consider individuals for licensure who have entered into a criminal diversion agreement(s) provided the individual has satisfied the terms and conditions of the agreement. The state board of education may consider other factors, including but not limited to:

- (A) The nature and seriousness of the conduct that resulted in the denial or revocation of a license;
- (B) the extent to which a license may offer an opportunity to engage in conduct of a similar type that resulted in the denial or revocation;
- (C) the present fitness of the person to be a member of the profession;
- (D) the actions of the person after the denial or revocation;
- (E) the time elapsed since the denial or revocation;
- (F) the age and maturity of the person at the time of the conduct resulting in the denial or revocation;
- (G) the number of incidents of improper conduct; and
- (H) discharge from probation, pardon, or expungement

Individuals who are denied licensure or who have certificates revoked are entitled to a hearing and shall be given notice and an opportunity for a hearing in accordance with the provisions of the Kansas administrative procedure act. The county or district attorney shall file a report with the state board of education indicating the name, address and social security number of any person who has been determined to have committed any offense or act as described above, or who has entered into a criminal diversion agreement after having been charged with such acts or offenses.

Although Emporia State University verifies the completion of the approved teacher education program, only the Kansas State Board of Education has the right to issue, suspend, revoke, or deny a Kansas teaching license. To enable The Teachers College and candidates to make sound judgments about continuance in the teacher education program and placements in school settings, candidates are asked to disclose information concerning conviction of crimes involving controlled substances (including alcohol), theft, welfare of a child, domestic battery toward a minor or other felonies and diversion agreements for such crimes. Information provided on the Statement of Disclosure may be used to deny admission to programs or placements in laboratory experiences in schools.

PROGRAM COMPLETION TESTING REQUIREMENT

Prior to program completion, all Emporia State University students who will graduate with an education degree are required to pass the Principles of Learning Test at the appropriate level (early childhood, elementary, middle, or secondary) AND the content assessment in each content area for which they request an endorsement on their teaching license. However, passing these two tests is not a degree requirement for middle/secondary education students. Passing these two tests is a degree requirement for elementary education degree-seekers.

TITLE II REPORTING

The U.S. Office of Education requires that we report on the quality of our teacher education graduates and their scores on standardized tests. ESU's annual Title II Report may be viewed at the following address on the homepage of The Teachers College: <http://www.emporia.edu/teach/accountability/title-2-report.html>

POST-BACCALAUREATE LICENSURE PROGRAMS

Persons who hold a baccalaureate degree but who do not meet standards established for teacher licensure in Kansas may follow programs of study at Emporia State University designed to help meet those standards.

Students who hold a baccalaureate degree and who wish to enroll in courses which lead to teacher licensure may make application for admission through the graduate office or application can be made for a second Bachelor's Degree. The student must also apply for admission to teacher education and be formally approved by the appropriate committee (see requirements for the degree Bachelor of Science in Education).

Programs providing for provisional licensure are available for fully licensed teachers who wish to become licensed (endorsed) in another field. Information may be obtained from the university's Licensure Officer, 208D Visser Hall, 620-341-5412.

RESTRICTED LICENSURE PROGRAM

Emporia State University offers a restricted licensure program that provides an avenue for individuals holding a bachelor's/master's degree in a content area to complete an initial licensure program while employed by a school district. Admission criteria and program requirements can be found at <http://www.emporia.edu/teach/alttrouteprogram/> or by contacting the Director, Office of Field Placement and Licensure, in 208 Visser Hall, 620-341-5447.

DEPARTMENT OF COUNSELOR EDUCATION

Chair: Katrina R. Miller

Professors: Katrina R. Miller (Rehabilitation Counseling).
Associate Professors: Gaelynn P. Wolf Bordonaro (Art Therapy).

Assistant Professors: Damara G. Paris (Rehabilitation Counseling).

Instructors: Libby S. Schmanke (Art Therapy).

<http://www.emporia.edu/ce>

The Department of Counselor Education provides undergraduate training in rehabilitation and disability studies education for those students who plan either to enter the work force upon graduation or do graduate work in counseling.

At the graduate level, the Department offers graduate work leading to the Master of Science degree in Art Therapy Counseling, Art Therapy, Clinical Counseling with concentrations in Addictions, Mental Health, and Rehabilitation Counseling, and School Counseling.

BACHELOR OF SCIENCE

REHABILITATION AND DISABILITY STUDIES MAJOR

A major in Rehabilitation and Disability Studies is offered under the Bachelor of Science degree. A minor option is also available comprised of 18 approved semester hours. A variety of rapidly expanding human service settings await a rehabilitation & disability studies graduate. The goal of rehabilitation is to help the person with a disability attain the highest level of self-sufficiency, independence, and function that the student is capable of achieving. The number of individuals in need of rehabilitation services is increasing and the programs being developed to meet those needs are continuing to expand. It is a viable career for those who enjoy "helping others to help themselves." Persons interested in this area of preparation should contact the Coordinator of Rehabilitation & Disability Studies the Department Chair.

General Education Requirements:

See General Education section of this catalog.

Requirements for Majors and Minors:

Persons wishing to major or minor in Rehabilitation & Disability Studies must meet the following conditions prior to being considered for acceptance in the program:

1. Complete a minimum of 45 undergraduate credit hours, earning a minimum cumulative grade point average of 2.5 or higher.
2. Complete either RE 290 Introduction to Rehabilitation Programs (3) or RE 291 Survey of Disabling Conditions (3) with a grade of B or better.
3. Students with less than a 2.5 cumulative grade point average may not enroll in more than six credit hours of rehabilitation course work prior to being accepted as a major or minor in the program.

After meeting the previous conditions or during the semester in which the conditions will be met, students seeking admission should submit a completed admissions application for the Rehabilitation Services Education program and a copy of their transcript to the Coordinator of Rehabilitation Education Services in the Department of Counselor Education. After admission into the Department of Counselor Education, you will be assigned a faculty advisor.

Non-Major Emphasis:

Non-major Rehabilitation & Disability Studies students desiring to take more than six (6) hours of rehabilitation course work to fulfill the emphasis requirements for other majors must meet the Rehabilitation & Disability Studies program admissions criteria of having completed a minimum of 45 undergraduate credit hours and earning a minimum cumulative grade point average of 2.5 or higher. The following courses will not be available for non-majors: RE 320, Independent Study; RE 636, Introduction to Group Procedures; and RE 699, Internship in Rehabilitation.

B.S. Rehabilitation & Disability Studies (44 hours):

CORE (23)

RE 290	Intro to Rehabilitation Programs	3 hours
RE 291	Survey of Disabling Conditions	3 hours
RE 301	Rehab Research and Report Writing	1 hour
RE 305	Ethics in Human Services	3 hours
RE 510	Applied Counseling Skills Development	3 hours
PY 300	Descriptive Research Methods	3 hours
RE 700	Seminar in Rehabilitation Services	1 hour
RE 699	Internship in Rehabilitation	6 hours

CONCENTRATION 1:

Addiction Counseling (21)

CE 670	Substance Abuse in Counseling	3 hours
CE 646	Psychopharmacology	3 hours
RE 683	Family Issues and Advocacy	3 hours
RE 392	Survey of Mental & Psychological Disorders	3 hours
RE 636	Introduction to Group Procedures	3 hours
RE 641	Case Management in Rehabilitation	3 hours
	Advisor Approved Electives	3 hours

CONCENTRATION 2:

Rehabilitation & Disability Studies (21)

RE 392	Survey of Mental & Psychological Disorders	3 hours
RE 683	Family Issues and Advocacy	3 hours
CE 694	Assessment & Employment of Persons with Disabilities	3 hours
RE 646	Psychopharmacology	3 hours
RE 641	Case Management in Rehabilitation	3 hours
	Advisor Approved Electives	6 hours

MINOR IN REHABILITATION AND DISABILITY STUDIES

A minor in Rehabilitation & Disability Studies requires 18 specified semester hours. Students minoring in RDS will not participate in the field site experience or do an independent study. To be eligible for a minor in Rehabilitation & Disability Studies, a student must have a 2.5 GPA and complete RE 290 Introduction to Rehabilitation Programs for RE 291 Survey of Disabling Conditions with a B or better.

Required Courses (6 hours):

RE 290	Intro to Rehabilitation Programs	3 hours
RE 291	Survey of Disabling Conditions	3 hours

Elective Courses (12 hours):

Students must select a minimum of 12 hours from the following optional classes:

RE 305	Ethics in Human Services	3 hours
RE 646	Psychopharmacology	3 hours
RE 392	Survey of Mental/Psych Disabilities	3 hours
RE 510	Applied Counseling Skills Development	3 hours
RE 636	Introduction to Group Procedures	3 hours
RE 641	Case Management in Rehabilitation	3 hours
RE 670	Substance Abuse in Counseling	3 hours
RE 683	Family Issues and Advocacy	3 hours
CE 694	Assessment & Employment of Persons With Disabilities	3 hours

See Course Listing for course descriptions.

DEPARTMENT OF ELEMENTARY EDUCATION/ EARLY CHILDHOOD/ SPECIAL EDUCATION

Associate Professor Jerry Liss, Interim Chair

Professors: Marjorie Bock, Gerry Coffman, Elizabeth Dobler, Lawrence Lyman, Connie Phelps, Carol Russell, Nancy Smith, Scott Waters.

Associate Professors: Karen Bates, Heather Caswell, Sonja Ezell, Deborah Larson, Jerry Liss, Jennie Long, Lori Mann, Kelly O'Neal-Hixson, Melissa Reed.

Assistant Professors: Catherine Ayantoye, Mari Caballero, Tiffany Hill, Teddy Roop, Sara Schwerdtfeger.

Instructors: Sara Arthur, Lendi Bland, Nelda Epp, Melissa Gerleman, Stephanie Metzger, Lindsey Razafsky, Todd Roberts, Ashley Udell.

<http://www.emporia.edu/teach/elecse/>

The Department of Elementary Education/Early Childhood/Special Education provides undergraduate and graduate degree programs for the preparation of teachers, early childhood through middle school; graduate work leading to the Master of Science degree in Special Education (High Incidence Concentration or Gifted, Talented and Creative Concentration).

BACHELOR OF SCIENCE IN EDUCATION ELEMENTARY EDUCATION MAJOR

See the general education requirements in the General Education section of this catalog.

Professional Education (37-38 hours):

PY 211	Developmental Psychology for Education Major	3 hours
MU 124	Basic Music	2 hours
EL 230	Children's Literature	3 hours
EL 312	Integrating Elementary English Language Arts	3 hours
EL 319	Literacy in the Multicultural Classroom	1 hour
EL/ED 220	Introduction to Teaching	2 hours
EL 310	Adapting Curr for Diverse Learners	2 hours
	OR	
EL/ED 535	Cultural Awareness	3 hours
EL 350	Mathematical Applications for the Elementary Classroom	4 hours
IT 371	Adv. Instructional Tech for Educators	3 hours
SD 550	Survey of Exceptionality	3 hours
SD 560	Collaboration & Strategies	3 hours
AR 324	Elementary Art Education	2 hours
PE 381	Elementary School Health & Physical Education	2 hours
MU 344	Integrating Music in the Elem Clsm	2 hours
EL 150	Introduction to the El Ed Major	1 hour
EE 375	Ethics and Law in Elementary Clsm	1 hour

ADMISSION TO BLOCK 1

Block 1 Courses (10 hours):

EE 311	Elementary Planning & Assessment	1 hour
EE 313	Elementary Reading Methods I	3 hours
EE 314	Elementary Social Studies Methods	3 hours
EE 316	Elementary Science Methods	3 hours

It is very important for all Elementary Education majors to make contact with an Elementary Advisor immediately upon entry into ESU. Students should go through the Block 1 admission process during their junior year. For an elementary education major to be admitted into the upper-level Block 1 portion of the program, the following requirements must be met:

- Junior-level or post-baccalaureate classification at Emporia State University.
- Minimum grade point average of 2.75 in the "Core Curriculum General Education Courses."
- Overall grade point average of at least 2.5.
- Have a grade of "C" or better in EL 312, EL/ED 220, EL150, EL 230, EL 310* or ED/EL535*, EL 319, EL 350, EG 101, EG 102, MA 110, SD 550, SD 560*, SP 101, GB 303*, IT 371*, IT 325, PY 211, MU 124, AR 324, PE 381, and MU 344. (*Concurrent enrollment permitted.)
- Composite score of 22 or higher on the ACT (American College Testing) exam **OR** Core Academic Skills for Educators (CORE) scores of writing 162, reading 156 and mathematics 150 **OR** Collegiate Assessment of Academic Proficiency (CAAP) test scores of mathematics 55, reading 57, and writing equivalent to 162 CORE.
- Completion of a minimum of 100 hours of supervised work experience with children or youth in advocacy roles.
- Successfully met the cutoff scores for the required reading, spelling, and handwriting tests.
- Demonstrate required dispositions in The Teachers College conceptual framework.
- Disclosure Statement completed and signed.
- Completed disposition form by EL150 & EL350 faculty.
- Ethics and Professionalism Statement signed.
- Have 3 references on file from faculty in the following list: EL/ED 220, EL230, EL312, PS115, MU124, PE381, SD550/560 or IT325/371.
- Must be approved by the Elementary Education Admissions Committee.
- An approved criminal background check
- Health clearance completed and turned in (TB test & physical).

Block 2 and Block 3 classes must be taken at a Professional Development School (PDS). PDS sites are available in these areas: Butler County, El Dorado, Emporia, Gardner, Goddard, Haysville, Kansas City, Maize, Olathe, Shawnee Mission, Topeka, and Wichita. Assignments to PDS sites will be made on a space-available basis when all required application materials have been received in the Elementary Advising Office and all requirements have been met.

ADMISSION TO BLOCK 2

Block 2 Courses (17 hours):

(Must be completed in a Professional Development School)

EE 315	Elementary English Language Arts Methods	3 hours
EE 317	Elementary Mathematics Methods	3 hours
EE 318	Elementary Classroom Management	3 hours
EE 320	Observing Teaching/Learning Models	4 hours
EE 413	Elementary Reading Methods II	3 hours
EE 414	Elementary Reading Practicum	1 hour

For admission to Block 2, the PDS phase of Emporia State's teacher education program, a student must meet the following standards:

- Senior-level or post-baccalaureate classification in the university.
- A minimum grade-point average of 2.5 in required professional studies.
- An overall grade-point average of at least 2.5.
- Maintain an approved criminal background check and health clearance (TB test and physical).
- Participate in personal interview when requested by the Elementary Admissions Committee.
- Must be approved by the Elementary Admissions Committee.
- Ethic and Professionalism Statement signed.
- Completed disposition form by Block 1 faculty.

ADMISSION TO BLOCK 3

Block 3 Courses (12 hours):

(Must be completed in a Professional Development School)

EL 466	Student Teaching Elementary (or EL 464 and appropriate LE courses Approved by the Elementary Advising Office)	12 hrs.
EE 431	Performance Assessment for Student Teaching	0 hrs.

For admission to Block 3 courses, the student must complete each of the following standards:

- Completion of all Block 2 courses with a grade of C or better.
- An overall grade point average of at least 2.5.
- Satisfactory recommendation from the PDS mentor teacher.
- Satisfactory recommendation from the university supervisor.
- Maintain an approved criminal background check and health clearance (TB test and physical).
- Completed disposition form by Block 2 faculty and mentor teacher.
- Must be approved by the Elementary Admissions Committee.

DEGREE COMPLETION AND LICENSURE

To receive the Bachelor of Science degree in Elementary Education and be recommended for teacher licensure, the student must complete the following standards:

1. Completion of all required course work.
2. Completion of all Block 3 courses with a grade of C or better.
3. Overall point average of at least 2.5.
4. Satisfactory completion of a Kansas Performance Teaching Portfolio.
5. Satisfactory evaluations from the PDS mentor teacher and the university supervisor.
6. Successful completion of the Principles of Learning and Teaching Examination, including content test(s) required by the Kansas State Department of Education.

See Course Listing for course descriptions.

DEPARTMENT OF HEALTH, PHYSICAL EDUCATION, AND RECREATION

Professor Paul Luebbers, Chair

Professors: Joan Brewer, Michael Butler, Paul Luebbers, Mark Stanbrough, Vicki Worrell **Associate Professors:** Matt Howe, Clint Longacre, Shawna Shane, Jennifer Thomas. **Assistant Professors:** Tyler Goad, Sunnin Keosybounheuang, Hannah Kipfer, Keith Pfannenstiel, **Instructors:** Kendra Hodges, Andrew Johnson, Katie Mathews, Sally Miller.

<http://www.emporia.edu/hper/>

The central purpose of the Department of Health, Physical Education and Recreation is to provide individuals with a variety of selected movement experiences which will contribute to healthy and effective lives. The department encourages the development of a physically educated person. To be physically educated is to possess physical capacities, knowledge, and skills which contribute to one's effectiveness as a moving and thinking individual in our complex society.

VISION

The vision of Department of Health, Physical Education and Recreation (HPER) at Emporia State University will strive to be a nationally prominent department known for academic excellence, professional leadership, and public service.

MISSION

The mission of the Department of Health, Physical Education, and Recreation (HPER) at Emporia State University is to prepare quality professionals in the area of athletic training, health, physical education, physical performance, sport leadership, recreation, and coaching, facilitate practical and action-based research and scholarly inquiry, and provide cutting-edge and collaborative services in athletic training, health, physical education, recreation and coaching. We embrace and promote lifelong opportunities for discovery, learning, and participation that contribute to healthy lifestyles.

FACILITIES

Emporia State University is very fortunate in the quantity and quality of specialized facilities, playing fields and equipment available for all of our disciplines. The HPER Building has five gymnasiums, an eight-lane swimming pool and an adaptive pool. Also included are two handball-racquetball courts, a dance studio, a spin cycle room, a strength and conditioning room, smart classrooms, seminar rooms, specialized laboratories, and central office suite.

Campus outdoor facilities include four tennis courts, a baseball field, a softball field, a soccer pitch and approximately forty acres of grass fields. Welch Stadium is located immediately south of the HPER Building. The stadium surrounds the varsity football field and an eight-lane polyurethane track. Various community facilities are also utilized to service the programs.

ASSUMPTION OF RISK

Due to the nature of the activity that involves a high level of physical stress (heart, lungs, muscles, bones, etc.) an inherent risk of injury is involved. Such injury may include, but is not limited to, sprains, strains, burns, bruises, broken bones, tissue cuts, and the catastrophic. Students are advised of the potential for injury and should participate in any class in HPER only after they fully understand and accept the inherent risk factor. It is highly recommended that each student have their physical health evaluated by a physician. The instructor assumes no responsibility for evaluating medical and/or physical readiness.

INSTRUCTIONAL PROGRAM IN HEALTH AND PHYSICAL EDUCATION FOR GENERAL EDUCATION STUDENTS

When possible, students should enroll in HL150, Critical Health Issues and Decisions in Society in their first year, followed by PE100, Active Living.

NON-TEACHING CAREERS IN HEALTH, PHYSICAL EDUCATION, SPORT LEADERSHIP AND RECREATION, AND ATHLETIC TRAINING

Persons interested in non-teaching careers associated with the fields of health, physical education or recreation may pursue such interests through the Bachelor of Science degrees in Sport Leadership & Recreation, Health & Human Performance or Athletic Training. These programs have an established core of classes. Examples of careers that can be pursued are personal training, physical activity directors in private, public and individual organizations, intramural directors, athletic trainers, camp directors, worksite wellness directors, and program directors and clinicians in health agencies of all types. Additionally, these programs can be considered pre-professional programs for such advanced degrees as Physical Therapy, Occupational Therapy, Chiropractic, and many other types of allied health advanced degrees.

PROFESSIONAL PREPARATION PROGRAMS IN HEALTH EDUCATION AND PHYSICAL EDUCATION

The Department of HPER has programs that prepare students to teach physical education and/or health education and to coach various sports. Persons who plan to teach health education or physical education should follow the degree plan for the Bachelor of Science in Education. Satisfactory completion of the requirements for the BSE degree and successfully passing the required professional tests entitles the graduate to a teaching license (PreK-12) issued by the Kansas State Board of Education.

**BACHELOR OF SCIENCE
ATHLETIC TRAINING MAJOR
(CAATE Accredited)**

The Bachelor of Science Degree in Athletic Training is a CAATE accredited education program designed for students who desire to become certified athletic trainers. The student who completes the program requirements satisfactorily will be eligible to sit for the national certification exam for athletic trainers. Students interested in the athletic training program must formally apply to be accepted in this program. The Athletic Training Program is divided into two phases. Phase I, Pre-Professional Program, consists of pre-requisite requirements that must be satisfactorily completed for the Athletic Training Program. Phase II, Professional Program, consists of the required courses, clinical experiences, and other requirements necessary to complete the Athletic Training Program.

Admission to Phase I, Pre-Professional Program, the student must:

1. Be admitted to Emporia State University;
2. Complete and return a written application to the AT Program and meet with the program director upon return of the application;
3. Complete observation hours (minimum of 60 hours, 30 of which need to be completed by Phase II Application time.) under the direct supervision of a certified athletic trainer (ATC) during this phase;
4. Read and sign the technical standards form;
5. Read and sign the Hepatitis B consent/waiver;
6. Complete OSHA training and sign roster at completion of training;
7. Read and sign declaration of understanding after reading the ATS Handbook;
8. Complete a program required physical by a physician (MD or DO) of their choice.

Admission to Phase II, Professional Program, and the student must:

1. Complete the Phase I pre-requisites (HL 150 Critical Health Issues and Decisions in Society, HL 155 First Aid, PY 100 Introductory Psychology, GB 140/141 Principles of Biology, CH 120/121 General Chemistry OR CH 123/124 Chemistry I, PE 271/272 Introduction to Athletic Training and Lab) and enrolled in or have taken ZO 362/363 Anatomy and Physiology.
2. Complete all requirements outlined in the Pre-Professional Phase (Phase I) application procedures;
3. Complete and return a written application to the AT Program for the Professional Phase and meet with the program director upon return of the application;
4. Attain a 2.7 cumulative GPA and in all athletic training core courses;
5. Attain an 80% on clinical proficiencies in PE 272.
6. Gain admittance into the Professional Phase from the AT Program;
7. Read and sign acceptance contract of Phase II requirements.

The number of applicants accepted into Phase II each year is dependent on available clinical space with a maximum of 24 applicants accepted per class. Candidate selection will be made by the program director based upon recommendations from program faculty, staff, clinical evaluations, and review of material submitted. Students should see the program director for clarification of the application requirements and with any questions regarding the AT Program. The program requirements include required coursework, a cumulative grade point average of 2.7, 2.7 GPA in required program courses and no grade lower than a C, satisfactory completion of clinical proficiencies, and 1200 hours of clinical education.

Required Courses (51 hours):

HL 155	First Aid and Personal Safety	2 hours
HL 524	Nutrition for Sport and Performance	3 hours
PE 266	Technology in HPER	3 hours
PE 271	Intro to Athletic Training	2 hours
PE 272	Intro to Athletic Training Lab	2 hours
PE 273	Organization and Administration Of Athletic Training	3 hours
PE 274	Clinical Education I	1 hour
PE 275	Clinical Education II	1 hour
PE 345	Prevention and Care of Athletic Injuries	3 hours
PE 346	Clinical Education III	1 hour
PE 347	Clinical Education IV	1 hour
PE 360	Exercise Physiology	3 hours
PE 362	Kinesiology	3 hours
PE 481	Modality Usage in Athletic Training	3 hours
PE 482	Rehabilitation of Athletic Injuries	3 hours
PE 483	Clinical Education V	1 hour
PE 484	Clinical Education VI	1 hour
PE 485	Assessment of Phy Inj-Upper	3 hours
PE 486	Assessment of Phy Inj-Lower	3 hours
PE 487	Athletic Training Certification Preparation	1 hour
PE 517	Medical Issues in Athletic Training	3 hours
ZO 362/363	Anatomy & Physiology and Lab	5 hours

Athletic Training students must take GB 140/141 Principles of Biology and Lab and CH 120/121 General Chemistry and Lab OR CH 123/124 Chemistry I and Lab as a pre-requisite for required courses ZO 362/363 Human Anatomy and Physiology/Lab.

Students must have a 2.7 GPA and no grade lower than a "C" in all of the above required courses.

In order to successfully progress through the chose program, a student must complete and pass AT competencies at 80% level during the program as determined by the Department of HPER.

The student must complete the required number of hours from the program area. Forty-five of the 120 hours of credit required for graduation must be in courses numbered 300 or above.

BACHELOR OF SCIENCE IN EDUCATION HEALTH EDUCATION TEACHING FIELD

Option A – Two Teaching Fields

This degree prepares students to teach health education and one other academic field of their choice. In addition to teaching health, the health education program prepares persons for careers in public health, commercial and private agencies and with county, state, and federal agencies. For additional degree requirements, see general education requirements and the Professional Education requirements for the Bachelor of Science in Education - Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

Required Courses (24 hours):

HL 150	Critical Health Issues and Decisions In Society	3 hours
HL 155	First Aid and Personal Safety	2 hours
HL 350	Health Risk Factors	3 hours
HL 355	Health Promotion Protection Management	3 hours
HL 450	School Health Programs	3 hours
HL 458	Teaching Human Sexuality Education	3 hours
HL 559	Methods of Teaching Health	4 hours
PE 262	Special Populations in HPER	2 hours
PE 264	Special Populations Lab in HPER	1 hour

Students must have a 2.75 GPA in all of the above courses and no grade lower than a C.

In order to successfully progress through the chosen program, a student must complete and pass major assessments during the program as determined by the Department of HPER.

BACHELOR OF SCIENCE IN EDUCATION PHYSICAL EDUCATION

This plan prepares students who wish to teach physical education at the PreK-12 grade level. For additional degree requirements, see general education requirements in the General Education section and the Professional Education requirements for the Bachelor of Science in Education-Secondary Education Major, in the Department of School Leadership/Middle & Secondary Teacher Education section of this catalog.

Required Courses (42 hours):

PE 161	Foundations of PE: Field Sports	1 hour
PE 162	Foundations of PE: Individual Activities	1 hour
PE 163	Foundations of PE: Court Sports	1 hour
PE 164	Foundations of PE: Outdoor Activities	1 hour
PE 167	Foundations of PE: Activity Trends	2 hours
PE 262	Special Populations in HPER	2 hours
PE 264	Special Populations Lab in HPER	1 hour
PE 268	Instructional Principles in Physical Educ	3 hours
PE 300	History of Physical Education & Sport	1 hour
PE 320	Principles of Strength & Conditioning	2 hours
PE 345	Prevention & Care of Athletic Injuries	3 hours
PE 360	Physiology of Exercise	3 hours
PE 361	Motor Behavior	2 hours
PE 362	Kinesiology	3 hours
PE 365	Games/Rhythms/Activities for Elem PE	2 hours
PE 400	Measurement and Evaluation	3 hours
PE 480	Curr & Teaching Methods for Elem PE	3 hours
PE 570	Middle/Sec PE Methods & Curriculum	5 hours
HL 350	Health Risk Factors	3 hours

Students must have a 2.75 GPA in all of the above courses and no grade lower than a “C”.

In order to successfully progress through the chosen program, a student must complete and pass major assessments during the program as determined by the Department of HPER.

ZO 200/201, Anatomy and Physiology/Lab are prerequisites for PE 360 and PE 362.

BACHELOR OF SCIENCE SPORT LEADERSHIP AND RECREATION MAJOR

The Bachelor of Science in Sport Leadership and Recreation provides career opportunities in the leisure services and general recreation fields. Employment opportunities are available in municipal recreation and park agencies; state and federal agencies; institutions serving special populations; college recreational services; youth-serving agencies and commercial, outdoor, military, church and industrial agencies.

Recreation (63 hours):

SL 100	Introduction to Recreation	3 hours
SL 360	Facility Design & Management	3 hours
SL 370	Sport Management	3 hours
SL 374	Delivery Systems & Issues in Sport Leadership & Recreation	3 hours
SL 389	Event & Program Design in Sport Leadership & Recreation	3 hours
SL 395	Practicum I in Sport Leadership & Recreation	2 hours
SL 401	Aquatic Management	3 hours
SL 420	Leadership in the Sport Industry & Recreation	3 hours
SL 430	Revenue Management in Sport Leadership & Recreation	3 hours
SL 451	Professional Development in Sport Leadership & Recreation	2 hours
SL 470	Practicum II in Sport Leadership & Recreation	3 hours
SL 570	Internship in Sport Leadership & Recreation	12 hours
BU 353	Principles of Law	3 hours
HL 155	First Aid & Personal Safety	2 hours
MK 301	Principles of Marketing	3 hours
PE 262	Special Populations HPER	2 hours
PE 264	Spec Populations Lab in HPER	1 hour
PE 266	Technology in HPER	3 hours
PE 420	Psychology of Sport	3 hours

Elective 3 hours

Choose one from the following: SP350, SP360, SP362, SP370, SP403, SP500, SP502

Students must have a 2.7 GPA and no grade lower than a “C” in all of the above required courses.

In order to successfully progress through the chosen program, a student must complete and pass major assessments during the program as determined by the Department of HPER.

The student must complete the required number of hours from the program area. Forty-five of the 120 hours of credit required for graduation must be in courses numbered 300 and above.

BACHELOR OF SCIENCE HEALTH AND HUMAN PERFORMANCE MAJOR

The purpose of the health promotion program is to train those students who wish to gain the knowledge and skills to work with individuals and organizations who desire to improve their levels of wellness through personalized training and education efforts delivered at a worksite environment. Employment opportunities are available in academic, commercial, clinical/medical, for-profit businesses and recreational settings.

Health Promotion (59 hours):

HL 150	Critical Health Issues and Decisions in Society	3 hours
HL 155	First Aid and Personal Safety	2 hours
HL 250	Introduction to Health & Human Performance	3 hours
HL 344	Modifying Health Behavior	3 hours
HL 355	Health Promotion/Protection Management	3 hours
HL 356	Health Fitness Instruction & Leadership	2 hours
HL 370	Practicum in Health & Human Performance I	1 hour
HL 435	Strength and Condition for the Personal Trainer	2 hours
HL 465	Worksite Health & Productivity Management	3 hours
HL 524	Nutrition for Sport and Performance	3 hours
HL 565	Strategies in Health & Human Performance	4 hours
HL 566	Exercise Testing and Prescription	4 hours
HL 570	Practicum in Health & Human Performance II	2 hours
HL 580	Internship in Health & Human Performance	12 hours
GB 385	Nutrition	3 hours
PE 266	Technology in HPER	3 hours
PE 360	Physiology of Exercise	3 hours
PE 362	Kinesiology	3 hours

A student must have a GPA of 2.75 and no grade lower than a "C" in all of the above required courses.

In order to successfully progress through the chosen program, a student must complete and pass major assessments during the program as determined by the Department of HPER.

The student must complete the required number of hours from the program area. Forty-five of the 120 hours of credit required for graduation must be in courses numbered 300 and above.

MINORS IN HEALTH, PHYSICAL EDUCATION, RECREATION & COACHING

A minor (non-teaching) consists of a minimum of 15 hours. Students electing a minor should, not later than the second semester of the sophomore year, consult with the chair of the department for the assignment of an advisor. The advisor will work with the student in the development of a minor program contract. Specific course requirements follow.

COACHING MINOR

Required Courses (18 hours):

PE 305	Theory and Principles of Coaching	3 hours
PE 320	Principles of Strength and Conditioning	2 hours
PE 345	Prevention and Care of Athletic Injuries	3 hours
PE 420	Psychology of Sport	2 hours
PE 540	Coaching Education Practicum	2 hours

Select 2 from the following fundamentals of coaching classes:

PE 350	Fundamentals of Coaching of Baseball	3 hours
PE 351	Fundamentals of Coaching of Basketball	3 hours
PE 352	Fundamentals of Coaching of Football	3 hours
PE 354	Fundamentals of Coaching of Track	3 hours
PE 355	Fundamentals of Coaching of Volleyball	3 hours
PE 356	Fundamentals of Coaching of Softball	3 hours
PE 357	Fundamentals of Coaching Soccer	3 hours
PE 358	Fundamentals of Coaching Tennis/Golf	3 hours

HEALTH MINOR

This non-teaching minor consists of 15 hours.

Required Courses (6 hours):

HL 150	Critical Health Issues and Decisions in Society	3 hours
HL 355	Health Promotion Protection Management	3 hours

Elective courses (minimum of 9 credit hours):

The remaining theory courses needed to complete the 15 hours are to be selected in terms of the student's area of interest and in consultation with and approval of the minor advisor and chair of the department. The following courses are available to choose from.

HL 155	First Aid and Personal Safety	2 hours
HL 250	Introduction to Health & Human Performance	3 hours
HL 344	Modifying Health Behavior	3 hours
HL 350	Health Risk Factors	3 hours
HL 356	Health Fitness Instruction and Leadership	2 hours
HL 450	School Health Programs	3 hours
HL 458	Teaching Human Sexuality Education	3 hours
PE 320	Principles of Strength and Conditioning	2 hours

A student must have a GPA of 2.75 and no grade lower than a "C" in all of the above required courses.

PHYSICAL EDUCATION MINOR

This non-teaching minor consists of 15 hours.

Required Courses (8 hours):

PE 320	Principles of Strength and Conditioning	2 hours
PE 360	Physiology of Exercise	3 hours
PE 362	Kinesiology	3 hours

Select two of the following courses (2 hours):

PE 161	Foundations of PE: Field Sports	1 hour
PE 162	Foundations of PE: Individual Activities	1 hour
PE 163	Foundations of PE: Court Sports	1 hour
PE 164	Foundations of PE: Outdoor Activities	1 hour
PE 167	Foundations of PE: Activity Trends	2 hours

Select one of the following courses (2-3 hours):

HL 155	First Aid and Personal Safety	2 hours
PE 268	Instructional Principles in Physical Educ	3 hours
PE 381	Health/PE for Elementary Teachers	2 hours

Elective Courses (minimum of 2 hours):

The remaining theory courses needed to complete 15 hours are to be selected in terms of the student's area of interest and in consultation with and approval of the minor advisor and chair of the department.

ZO 200/201, Anatomy and Physiology/Lab are prerequisites for PE 360 and PE 362.

A student must have a GPA of 2.75 and no grade lower than a "C" in all of the above required courses.

RECREATION MINOR

This non-teaching minor consists of 15 hours.

Required Courses (9 credit hours):

RC 100	Introduction to Recreation	3 hours
RC 360	Facility Management in Recreation	3 hours
RC 389	Program Design & Promotion in Rec	3 hours

Elective Courses (6 credit hours):

The remaining courses needed to complete 15 hours are to be selected in terms of the student's area of interest and in consultation with and approval of the minor advisor.

MASTER OF SCIENCE**HEALTH, PHYSICAL EDUCATION AND RECREATION**

The Department of Health, Physical Education, and Recreation offers graduate work leading to the Master of Science degree for students interested in advancing their education and opportunities in the areas of teaching, health, coaching and research. All of the graduate faculty in the department have completed doctoral degrees. Many of the faculty are nationally recognized in their fields.

The master's degree program offered through the Department may be completed entirely online through internet courses. This unique program was the first fully accredited distance learning master's degree program in Health, Physical Education, and Recreation in the United States..

The object of this program is to build upon a well-rounded health &/or physical education foundation and a specialized knowledge of concepts and methods in teaching and coaching, which will enable the student to pursue a productive career in teaching health or physical education and/or coaching various sports. The program also provides students, who have appropriate undergraduate preparation, the expertise for employment in wellness and fitness programs. Responsibility for a student's program is vested in an advisor charged with arranging the student's course work and supervising research activities.

Students must present an acceptable undergraduate background in health, physical education, or sport leadership and recreation representing a breadth of preparation comparable to that required for an undergraduate concentration in HPER at Emporia State University. Students lacking some prerequisites in their undergraduate preparation may be required to complete additional courses as prescribed by the advisor and committee.

See Course Listing for course descriptions.

DEPARTMENT OF INSTRUCTIONAL DESIGN AND TECHNOLOGY

Dr. Jim Persinger, Interim Department Chair
Dusti Howell, IDT Program Director

Cathryn Crosby, TESOL Program Coordinator

Professors: Dusti D. Howell, Janet Holland

Associate Professors: Zeni Colorado-Resa, Cathryn Crosby,
Manjula Shinge.

Assistant Professors: Yeol Huh, Dabae Lee, Sungwoong Lee.

<http://emporia.edu/teach/idt>

The Department of Instructional Design and Technology includes the Instructional Design and Technology (IDT) and Teaching English to Speakers of Other Languages (TESOL) programs. Through these programs, the department offers a Master of Science Degree in Instructional Design and Technology that is delivered entirely online, face-to-face, or a blend of the two delivery modes. This degree prepares individuals for leadership in the design, development, and integration of technology and online learning into teaching and private sector training. The department also offers a Master of Arts in TESOL, Graduate Certificate in eLearning and Online Teaching, a Graduate Certificate in Teaching with Technology, and a Graduate Certificate in TESOL. See the Graduate Catalog for these programs.

The IDT program offers undergraduate courses that are required in degree programs for the preparation of teachers, early childhood through grade twelve, while the TESOL program offers an undergraduate teaching endorsement in English as a Second Language (ESL).

ENGLISH AS A SECOND LANGUAGE (ESL) ENDORSEMENT

The ESL program is designed to provide a means whereby pre-service teachers may obtain Kansas State endorsement in this area. The courses making up the endorsement curricula provide skills needed to assure effective special English language and content instruction to students identified as limited English proficient under U.S. Department of Education criteria.

ENGLISH AS A SECONDLANGUAGE (ESL) ENDORSEMENT CURRICULUM

This curriculum requires 15 hours of specialized course work, including a 3-hour practicum.

TS 519	Language Assessment & Evaluation	3 hours
TS 532	Teaching English as a Second/Foreign Language	3 hours
ED 535	Cultural Awareness for Educators	3 hours
TS 600	Linguistics for Language Teachers	3 hours
TS 535	Practicum in Teaching English as A Second/Foreign Language	3 hours

NOTE: If taken as graduate level credit, these 15 credit hours will apply toward the Master of Arts in TESOL (see Graduate Catalog).

See Course Listing for course descriptions.

DEPARTMENT OF PSYCHOLOGY

Chair: Dr. James D. Persinger

<http://www.emporia.edu/psych>

Professors: James D. Persinger (School/Educational Psychology), Kenneth A. Weaver* (Cognitive Psychology), John C. Wade (Clinical Psychology).

Associate Professors: Cathy A. Grover (Behavioral Neuroscience), Kaira Hays (School Psychology).

Assistant Professors: Kelly McEnerney (Developmental Psychology).

Instructors: Carol D. Daniels (School/Educational Psychology), Tracy Wechselblatt (Clinical Psychology), Kylea Shoemaker (School Psychology/Therapeutic Science).

Names followed by an asterisk () are full-time university personnel teaching part-time in an academic department.

The Department of Psychology provides undergraduate training for those students who plan either to enter the work force upon graduation or do graduate work in Psychology. Undergraduate preparation is also offered for students who plan to teach Psychology at the secondary level or minor in Psychology.

At the graduate level (Master's Degree), training is provided in Clinical Psychology, Industrial/Organizational Psychology, and School Psychology. The Specialist in Education degree is also offered in School Psychology. For more information see the department's web site, <http://emporia.edu/psych/>.

PSYCHOLOGY MAJORS/MINORS

All psychology majors/minors (or those with a psychology teaching field) must earn a "C" grade or better in all of their required and elective psychology course (including PY 100) on their degree plan/contract.

PY 100 Introductory Psychology, counted in the general education requirements rather than in the departmental major, is a prerequisite to all other psychology courses. See the general education requirements in the general education section of this catalog.

BACHELOR OF ARTS (BA) and

BACHELOR OF SCIENCE (BS) PSYCHOLOGY MAJOR

(Changes Effective Fall 2014)

Both majors require 120 credit hours of courses numbered 100 or above, including a total of 42 credit hours of courses within the major, with 30 hours specified by the department and 12 hours of electives.

Required Courses (30 hours):

PY 101	Introductory Psychology Laboratory	1 hour
PY 102	Introduction to the Psychology Major	1 hour
OR		
PY 502	The Professional Psychologist	1 hour
PY 210	Developmental Psychology for the Psychology Major	3 hours
PY 300	Descriptive Research Methods and Statistics in Psychology	3 hours

PY 301	Experimental Research and Inferential Statistics	3 hours
PY 322	Learning and Cognition	3 hours
PY 333	Social Psychology	3 hours
PY 401	Foundations of Psychology	3 hours
PY 427	Abnormal Psychology	3 hours
PY 440	Psychological Testing	3 hours
PY 490	Undergraduate Psychology Internship	4 hours

Electives:

PY 102	Introduction to the Psychology Major	1 hour
PY 203	Special Topics in Applied Psychology	1-3 hours
PY 303	Special Topics in Undergraduate Psychology	1-3 hours
PY 403	Independent Study	3 hours
PY 432	Introduction to Industrial/Organizational Psychology	3 hours
PY 502	The Professional Psychologist	1 hour
PY 503	Special Topics in Psychology	1-3 hours
PY 506	Methods for Teaching Psychology	3 hours
PY 520	Statistics I	3 hours
PY 560	Physiological Psychology	3 hours
PY 570	Sensation and Perception	3 hours
PY 624	Theories of Motivation	3 hours
PY 626	Theories of Personality	3 hours
PY 700	Advanced General Psychology	3 hours
PY 703	Special Topics in Graduate Psychology	3 hours
PY 707	Memory	3 hours
PY 708	Brain Function and Dysfunction	3 hours
PY 709	Introduction to Neuropsychology	1 hour
SD 550	Survey of Exceptionality	3 hours

The student is required to complete a **second program of study** of at least 15 hours in another discipline (cognate area) for both the BA and BS psychology degree.

Bachelor of Arts majors have 10 additional credit hours in one foreign language requirements and 6 additional credit hours in liberal arts requirements (i.e., Introduction to Literature and Introduction to Philosophy).

BACHELOR OF SCIENCE IN EDUCATION (BSE) PSYCHOLOGY TEACHING FIELD

This teaching field prepares the student to teach psychology at the secondary level. PY 100 Introductory Psychology and PY 211 Developmental Psychology are counted in the general education requirements in the departmental major. This plan consists of 24 hours of required psychology courses. A second teaching field is required. See the general education requirements in the general education section of this catalog.

Required Courses (24 hours):

PY 300	Descriptive Research Methods and Statistics in Psychology	3 hours
PY 301	Experimental Res and Inferential Statistics	3 hours
PY 322	Learning and Cognition	3 hours
PY 333	Social Psychology	3 hours
PY 401	Foundations of Psychology	3 hours
PY 427	Abnormal Psychology	3 hours
PY 440	Psychological Testing	3 hours
PY 506	Methods for Teaching Psychology	3 hours

MINOR IN PSYCHOLOGY

A minor in psychology requires 18 hours (in addition to PY 100). Twelve hours are specified by the department, the other six hours are electives.

Required Courses (12 hours):

PY 210	Developmental Psychology for the Psychology Major	3 hours
PY 322	Learning and Cognition	3 hours

OR

PY 333	Social Psychology	3 hours
PY 427	Abnormal Psychology	3 hours
PY 440	Psychological Testing	3 hours

Elective Courses (6 hours):

Six hours of electives may be selected from other required courses in the BA/BS psychology major list and/or from the same list of electives as the psychology majors.

See Course Listing for course descriptions.

DEPARTMENT OF SCHOOL LEADERSHIP/ MIDDLE & SECONDARY TEACHER EDUCATION

Associate Professor Dan Stiffler, Chair

Professors: Nancy Albrecht, Paul Bland, Ed Church, Jerry Will.

Associate Professors: Kirsten Limpert, Neal Luo, John Morton, Tim Marshall and Dan Stiffler.

Assistant Professor: Amanda Lickteig

<http://www.emporia.edu/slmste>

The graduate programs in educational administration are designed to prepare personnel to assume leadership roles as lead teachers, building leadership team members, principals, superintendents, and other central office personnel.

*For descriptions of the programs for this department please study Emporia State University's School Leadership/Middle and Secondary Teacher Education department's graduate catalog.

BACHELOR OF SCIENCE IN EDUCATION SECONDARY EDUCATION MAJOR

The teacher education program available to students desiring licensure to teach at the secondary level is a joint responsibility of the Department of School Leadership, Middle and Secondary Education and other departments of the university offering teaching field programs.

Teacher Licensure Fields:

The secondary education program leads to teaching licensure in the following fields:

Art
Biology
Business
Chemistry
Earth and Space Science
English
Teaching of English for speakers of other Languages: (TESOL)
Spanish
Health
History/Government
Journalism
Mathematics
Music
Physical Education
Physics
Psychology
Speech/Theater

Specialized Preparation in Teaching Fields:

In choosing teaching fields, students will select one of the following optional plans:

Option A --

Two teaching fields requiring no less than the minimum standards of the Kansas State Department of Education and no more than 36 hours. Students may elect courses beyond the 36 hour maximum, but may not be required to take such courses. Under the two-field option, the total semester hours needed to meet degree requirements may exceed the minimum of 120 hours.

Option B --

One teaching field, or area of concentration, of (1) no fewer than 35 semester hours and no more than 50 hours, and (2) in addition, no more than 20 semester hours in a related field or fields may be required. The total of (1) and (2) shall not exceed 70 semester hours. General education courses may be included in the required programs if departments wish to do so. Students may elect courses beyond the 70 hour maximum but may not be required to take such courses.

Each department which prepares students for secondary teaching has developed a program of courses to be taken by students who choose to follow Option A or Option B. The student may obtain a copy of this program from the department.

General Education Requirements:

See general education requirements in the General Education section of this catalog.

Professional Education and Prerequisite Course Requirements:

Specific prerequisite courses for BSE programs include the following:

To be completed before admission to Phase I:

ED 220	Introduction to Teaching	2 hours
PY 211	Developmental Psychology for the Education Major	3 hours

To be completed before admission to Phase II:

EL 416	Integrating Literacy Strategies Across Secondary Content	2 hours
SD 550	Survey of Exceptionality	3 hours
ED 340	Using Assessment & Data in Secondary Classroom	3 hours
IT 360	Instructional Technology for Secondary Educators	3 hours

PHASE I PROFESSIONAL SEMESTER

Phase I admission. Before being allowed to enroll in Phase I courses (ED 333, ED 334, and PY 334), the student must complete the following admission requirements:

- Achieve a minimum cumulative GPA of 2.75 in the "core curriculum general education courses"
- Obtain junior-level classification
- Maintain a 2.5 overall GPA
- Obtain CORE (Core Academic Skills for Educators) scores of writing 162, reading 156, and mathematics 150; or CAAP (Collegiate Assessment of Academic Proficiency) scores of writing (equivalent to PPST writing score), reading 57, and math 55; or composite scores of 22 on the ACT (American College Testing) exams.
- Earn a final grade of "C" or better in Introduction to Teaching, English Composition I and II, Public Speaking, College Algebra, and Developmental Psychology for the Education Major.

- Meet or exceed (and maintain) the minimum GPA requirement set by the faculty of their teaching specialty -- see academic advisor and be approved by their academic department.
- Provide documentation of the required 100 hours of supervised work experience with children or youth.
- Demonstrate English Language writing and speaking proficiency.
- Clear a criminal background check.
- Undergo disposition assessments (multiple negative disposition assessments can result in denial of admission)
- Complete an application to Phase I.

Phase I courses—taken concurrently

ED 333	Principles of Secondary Education	4 hours
ED 334	Classroom Management	3 hours
PY 334	Educational Psychology	2 hours

PHASE II PROFESSIONAL SEMESTER:

For admission to Phase II, the student teaching phase of Emporia State's teacher education program, a student must be senior level or post-baccalaureate classification and meet the following requirements:

- Maintain an overall grade-point average of at least 2.5.
- Meet minimum departmental grade-point average requirements.
- Earn minimum of "C" grade in all professional education courses.
- Complete health clearance to be in a school setting.
- Complete and sign Disclosure Statement.
- Complete all application processes.
- Obtain signed department approval for each licensure area
- Be approved by the Secondary Admissions Committee
- Participate in personal interview when requested by the academic area or the Secondary Admissions Committee.
- Be recommended by five designated instructors.

Phase II courses—taken concurrently

LE 487	Student Teaching Secondary	*12 hrs.
ED 431	Performance Assessment for Student Teaching	0 hrs.

*Or equivalent student teaching credit. (See LE course listing.)

Licensure Testing

During the Student Teaching Semester (or before applying for licensure), the student must pass the Principles of Learning and Teaching Exam and content area exam(s).

GRADUATE PROGRAMS

Graduate programs in School Leadership/Middle and Secondary Teacher Education are designed to prepare personnel to assume leadership roles as lead teachers, building-leadership team members, coordinators, supervisors, principals, superintendents, and other central office personnel.

The Curriculum & Instruction master's program prepares teachers to become curriculum coordinators, curriculum specialists, effective practitioners and helps prepare teachers for National Board Certification.

The Educational Administration master's program qualifies students for Building-Level administrator licensure endorsement. The non-degree Educational Administration Building-Level and District-Level licensure are also available.

The Instructional Leadership Master Program is specifically designed for individuals who have obtained a Bachelor's degree in teaching and wish to pursue graduate work in the area of teacher leadership. This masters leads to Teacher Leader licensure.

The Master of Education Teaching degree provides a master's program that complements the Alternate Route/Restricted Licensure program allowing an opportunity for students to pursue a master's degree after completing the initial teacher license at the secondary level.

See Course Listing for course descriptions.

GRADUATE SCHOOL

Mission

Graduate School Administration

The Dean of the Graduate School and Distance Education is responsible for carrying out the university policies concerning graduate education. Emporia State University offers programs of study leading to the degrees Master of Accountancy, Master of Science, Master of Arts, Master of Business Administration, Master of Education, Master of Library Science, Master of Music, Specialist in Education and Ph.D. in Library and Information Management.

The Graduate Council

The Graduate Council assists the Dean with review and coordination of all graduate programs, formulation of academic policies governing graduate programs, and with administration of the Graduate School. It meets monthly, additional times if necessary, and is chaired by an elected chairperson. Membership in the Graduate Council consists of the chair of each department offering graduate course work, or a regular member of the graduate faculty either designated by the chair or elected by department faculty, and two student representatives who are selected annually by the Graduate Dean.

Departmental Committees

Each department offering graduate programs has a graduate committee. The departmental graduate committee determines departmental graduate policies and procedures as long as they are not in conflict with university/graduate school policy.

GRADUATE ADMISSIONS POLICIES

Applications must be submitted online.

Graduate School - Box 4003
1 Kellogg Circle
Emporia, KS 66801-5087
FAX number: 620-341-5909
Telephone: 620-341-5403 or 1-800-950-GRAD
E-mail: gradinfo@emporia.edu

Application for admission to graduate study should be submitted to the Graduate School no later than two weeks before the first day of an enrollment period. Some programs require earlier application or additional application forms prior to admission. Students should check with individual departments for additional application requirements.

Students who have not enrolled for three-years and have been inactivated will be required to reapply and obtain new departmental approval/eligibility before they can continue in their degree program.

Undocumented persons (must provide documentation of citizenship application) or resident aliens (must provide a copy of permanent residency card) who do not hold an F1 or J1 visa may apply for graduate study, through Graduate School.

The Graduate School will accept 3-year undergraduate degrees under the following conditions:

- 3-year degrees from accredited universities in India. Departments will still have the option of requiring prerequisites as part of the graduate eligibility process. (Approved by the Graduate Council 2/20/03)
- 3-year degrees from universities that are part of the Bologna agreement. (Approved by the Graduate Council 9/19/13)

Application fees are not refundable and application materials are non-returnable.

We strongly encourage students to familiarize themselves with all graduate student policies and procedures. All correspondence from the graduate school (e.g., admissions information, eligibility, degree analysis, instructions for graduation) will be directed to your **ESU email account**. Please contact Instructional Technologies (IT) at 341-5555 or toll free at 877-341-5555 if you have any questions regarding your email account.

GRADUATE ADMISSIONS CATEGORIES

Non-degree/Licensure Seeking Student

Students with at least a baccalaureate degree from a regionally accredited institution who desire to enroll in graduate course work but are not seeking a degree or certificate are classified as non-degree or licensure students. Non-degree enrollment status is designed for students who wish to take courses but do not plan to pursue a degree. **Non-degree student do not qualify for financial aid.** Enrollment as a non-degree student does not guarantee admission to the University as a degree-seeking student. Non-degree seeking students are not exempt from any course prerequisites. Students are required to pay a \$25 application fee and submit proof of baccalaureate degree (copy of unofficial transcript,) from a regionally accredited institution prior to application being processed. Course term limits and transfer courses for licensure programs are to be decided by the respective departments. Faculty reserve the right to decide on the applicability of course work taken prior to formal admission into a degree program. A non-degree or licensure student, who wishes to enter a degree program at a later date, must submit a new application and go through the admission review process. A maximum of 12 approved hours earned under this status may be applied to a degree program.

Students should check the graduate degree listing or contact the Teacher Licensure Coordinator in the Teachers College (620-341-5412) for specific licensure programs offered at ESU. Some departments do require official transcripts from licensure applicants

Certificate Seeking

Students with at least a baccalaureate degree from a regionally accredited institution who desire to enroll in graduate course work for the purpose of obtaining a certificate are classified as certificate seeking students. Verification of undergraduate degree completion (Unofficial Transcript) must be sent to the Graduate School before an application can be processed. A grade point average of not less than 2.5 in the last 60 semester hours of study or an overall grade point average of no less than 3.0 for a completed certificate degree. This admission does not constitute admission to a specific program. Students should check the graduate degree listing for specific certificate programs offered at ESU. Students are required to pay a \$50 application fee.

Master's Degree (MA, MACC, MBA, MED, MLS, MM, MS)

The following are admission requirements for degree seeking students.

Please note, students in distance programs must submit a copy of the valid government-issued photo identification (ID) that is acknowledged by the student's signature. Government-issued ID's include such things as driver's license, passport, military ID, permanent resident card. Students must also complete the [ID Verification Form](#).

- 1) A bachelor's from a regionally accredited institution. Verification of undergraduate degree completion (Unofficial Transcript) must be sent to the Graduate School before an application can be processed. The document can be upload through the [Graduate Application Portal](#), faxed to 620-341-5909, emailed to gradinfo@emporia.edu or mailed to: Emporia State University, Campus Box 4003, 1 Kellogg Circle, Emporia KS 66801.
- 2) Adequate preparation in the proposed area of specialization (to be determined by the department of specialization).
- 3) A grade point average of not less than 2.5 in the last 60 semester hours of study or an overall grade point average of no less than 3.0 for a completed master's degree. This admission does not constitute admission to a specific program. **If a completed master's degree transcript is submitted for admission, the student MUST also submit an official copy of their bachelor's degree transcript.**
- 4) Probationary* admission to the Graduate School is permitted if the student has a grade point average between 2.2 and 2.49 on the last 60 hours of study. However it is up to the department to admit a student on probation. The student must achieve a 3.00 grade point average in their first nine semester hours of graduate study.

Probationary conditions cannot extend more than 1 year or for a certain number of credit hours. If the student does not meet this condition, they will not be permitted to continue in graduate study.

- 5) Students must submit official Bachelor's degree transcripts containing at least 60 credit hours of course work and final grades. Any additional transcripts from college credit accumulated after the bachelor's degree, **MUST** be submitted if you will be using these credits for transfer credit or for last 60 GPA. Transcripts are considered official only if they are received from the institution in a sealed envelope or are received through a secure transcript service. Official transcripts from a regionally accredited institution must be received by the end of the first semester or students will not be allowed to enroll in a second semester. Secure electronic transcripts are accepted if sent to gradinfo@emporia.edu directly from the issuing institution.
- 6) Satisfactory completion of the entrance/admission tests required by the major department. Students who have not completed the required entrance/admissions tests by the first semester will not be allowed to enroll for a second semester. An enrollment hold will be placed on the student's account. Specific information about these examinations may be obtained from the department in which one wishes to study or from the Graduate School.
- 7) Students who have been denied to an academic program are not eligible for non-degree study during the academic semester they were denied admission, except with permission of department. Student can reapply to another graduate degree immediately.
- 8) Students who have obtained a degree from a foreign university/college must have a transcript evaluation from a recommended external source that is a member of NACES (National Association of Credential Evaluation Services). Students will not be allowed to enroll until the evaluation has been received in the Graduate School.
- 9) Payment of a non-refundable \$50 application fee.

* Probationary refers to permitting graduate students into a graduate program if they do not meet regular admission criteria. Conditional refers to permitting undergraduate seniors to take graduate classes for graduate credit.

Specialist in Education Degree (Ed.S.)

Please contact the Department of Psychology for information. Students are required to pay a non-refundable \$50 application fee. Official transcripts from a regionally accredited institution must be received by the end of the first semester or students will not be allowed to enroll in a second semester.

Please note, students in distance programs must submit a copy of the valid government-issued photo identification (ID) that is acknowledged by the student's signature. Government-issued ID's include such things as driver's license, passport, military ID, permanent resident card. Students must also complete and submit an [ID Verification Form](#).

Doctor of Philosophy (Ph.D.)

Please contact the School of Library and Information Management for information. Students are required to pay a non-refundable \$60 application fee. Official transcripts from a regionally accredited institution must be received by the end of the first semester or students will not be allowed to enroll in a second semester.

Please note, students in distance programs must submit a copy of the valid government-issued photo identification (ID) that is acknowledged by the student's signature. Government-issued ID's include such things as driver's license, passport, military ID, permanent resident card. Students must also complete the [ID Verification Form](#).

GRADUATE ASSISTANTSHIP AWARDS

Emporia State University provides assistance for graduate students through three primary sources in addition to the regular student financial aid programs. Graduate assistantships are available in most departments offering graduate degree programs. Types of assistantships available are teaching, research, and administrative. To qualify for an assistantship, an applicant must have a minimum undergraduate (four-year) grade point average of 2.5 or 2.75 for the last two years of undergraduate study, based on a 4.0 system, or 3.0 for at least 6 credit hours of graduate level course work (**gpa requirement cannot be waived**). The minimum course load for graduate assistants is six (6) hours during regular terms and three (3) hours for a summer term, holding a full-time assistantship (20 hours per week). The minimum course load for split graduate assistants is three (3) hours during regular and summer terms, holding a quarter assistantship (10 hours per week).

Courses that count toward the 6 credit hour enrollment requirement for graduate assistants must consist of graduate level courses. Once the 6 credit hour requirement has been fulfilled, the student may take additional courses (either graduate or undergraduate). A waiver of the minimum enrollment requirement may be granted by graduate school with the approval of the department chair and graduate dean.

Split graduate assistants courses that count toward the 3 credit hour enrollment requirement must consist of graduate level courses. Once the 3 credit hour requirement has been fulfilled, the student may take additional courses (either graduate or undergraduate). Any courses taken above 3 credit hours are charged at the Kansas resident tuition rate plus additional fees, are paid by the graduate assistant.

Graduate assistant positions are contingent upon a successful criminal background check.

Graduate assistantships for the purpose of a tuition waiver must be awarded on the basis of 20 hours worked per week for a full semester. Split graduate assistantships for the purpose of a tuition waiver must be awarded on the basis of 10 hours worked per week for a full semester. To be eligible for a tuition waiver during the summer, graduate assistants must hold an assistantship for at least one month during the summer term. If a graduate assistant's award is terminated prior to the end of the contract, the student will be required to repay the tuition waiver on a prorated basis. Courses taken for audit credit do not count in computing minimum course load requirements. Non-resident assistants are eligible for resident fees during each full semester in which they hold an assistantship appointment for quarter-time 10 hours or full time 20 hours duty per week. Graduate assistants will be responsible for paying the campus and technology fees each semester.

Full time graduate assistants are expected to work half-time (20 hours per week). Work given them is expected to fit within a 20-hour work week. Split graduate assistants are expected to work quarter-time (10 hours per week). Work given them is expected to fit with a 10-hour work week. In emergency or otherwise exceptional circumstances (e.g., the illness of a colleague), a graduate assistant, with the approval of the department chair, dean, and graduate dean, may be paid additional compensation for additional and temporary work. Such compensation will be provided only in rare and unusual circumstances. Graduate assistants will not be compelled to work when the university is closed nor will they be docked in pay.

A graduate student may hold an assistantship funded via university allocations for one (1) masters degree or dual degree program. Masters students may hold an assistantship for up to six semesters (excluding summers). Ph.D. students may hold an assistantship for up to eight academic semesters (excluding summers). Departments may grant extended funding beyond these limits up to 8 semesters respectively for research assistantships if such funds are provided via external (non-university-allocated) sources. (Revised by Graduate Council, Oct 19, 2017).

Graduate Assistants are required to show normal academic progress (3.00 grade point average) each semester (fall and spring semesters only). When a student's semester grade point average (GPA) falls between 2.99 and 2.5, the student will be placed on academic probation and may be dismissed from their graduate assistantship position at the discretion of the department. Two consecutive semesters of a GPA between 2.99 and 2.5 will result in termination of the graduate assistantship. When a student's semester GPA falls below 2.5, the graduate assistantship will be terminated; the department may reappoint the student to a graduate assistantship when the student's cumulative GPA is 3.00 or better and the most recent semester GPA is 3.0 or better.

Graduate assistantships may be terminated at any time on non-academic grounds including, but not limited to, misrepresentation of academic credentials or application materials, unsatisfactory performance on assigned tasks, insubordination, violation of University or departmental rules or policies, a criminal conviction, or a lack of appropriations or funding.

Graduate Assistant Categories and Job Descriptions

Graduate Teaching Assistant

A Graduate Teaching Assistant (GTA) serves an instructional role in a class or laboratory offered by an academic unit for credit. The GTA need not be the instructor of record. Duties may include actual instruction in a classroom setting; leading discussion sessions; conducting help and/or tutoring sessions; assisting with laboratory setup; helping faculty prepare lectures and course materials; grading papers, exams, laboratory reports, projects, and class homework; coaching; and performing other duties pertaining to the instructional mission of ESU.

All teaching assistants are required to complete course work, or equivalent, in instruction provided by their respective department to assure knowledge of the teaching processes and effective instruction. This factor is a condition of employment. Exemptions may only be granted by the Dean of the Graduate School (contact the Graduate School to clarify exemption guidelines).

Master's level GTA may teach courses at the 100-200 level. With department chair approval, GTA's may also teach courses at the 300 level. GTA's may not teach courses at the 400-500 level without approval from the Department Chair, College/School Dean, and Graduate Dean.

GTA's tuition waiver is limited to a maximum of 12 graduate credits hours per semester. Graduate assistants will be responsible for paying additional credit hours over the 12 credits, the campus activity fees, area fees, technology fees, course fees and waiver is for the actual semester of appointment only. (Revised by the Graduate Council April 13, 2017.)

GTA must work twenty hours per week for a complete semester in order to be eligible for the tuition waiver.

Graduate Research Assistant

The primary function of a Graduate Research Assistant (GRA) is to assist a faculty member in an academic department with their scholarly and/or creative activities. Duties may include maintaining and operating scientific instruments and/or computer equipment; locating, reading, and summarizing pertinent research articles; performing laboratory experiments and assisting with fieldwork; calculating and analyzing results of research; and assisting musicians and artists in their creative endeavors.

GTA's tuition waiver is limited to a maximum of 12 graduate credits hours per semester. Graduate assistants will be responsible for paying additional credit hours over the 12 credits, the campus activity fees, area fees, technology fees, course fees and waiver is for the actual semester of appointment only. (Revised by the Graduate Council April 13, 2017.)

GTA must work twenty hours per week for a complete semester in order to be eligible for the tuition waiver.

Graduate Administrative Assistant

The primary function of a Graduate Administrative Assistant (GAA) is to assist in non-teaching and non-research activities. A GAA should perform more than the usual receptionist/secretary duties. Duties should augment a student's academic program and provide opportunities to apply knowledge gained through the program. Duties may include entering computer data, maintaining records, preparing reports and surveys, and interpreting and correlating administrative data. GAA responsibilities may also include interacting with students, faculty, administrators, alumni, and visitors to the University. Departments will be expected to explain briefly on the actual award form how the GAA duties augment the student's academic program.

GTA's tuition waiver is limited to a maximum of 12 graduate credits hours per semester. Graduate assistants will be responsible for paying additional credit hours over the 12 credits, the campus activity fees, area fees, technology fees, course fees and waiver is for the actual semester of appointment only. (Revised by the Graduate Council April 13, 2017.)

GTA must work twenty hours per week for a complete semester in order to be eligible for the tuition waiver.

Student Health Insurance

Emporia State University contributes to the cost of the United Health Care insurance plan for eligible GTAs, GRAs, and GAAs holding a full-time (20 hours per week) assistantship for a complete semester. Split assistantships holding a quarter-time (10 hours per

week) are not eligible benefits or Health Insurance. For eligible international students the student portion of the premium will automatically be added to the ESU student account. Enrollment in the plan will occur automatically when the ESU student account is paid at the beginning of each semester. Eligible Graduate Assistants who are US citizens enroll for the health insurance on-line at the [United Health Care](#) web site. Please see the ESU Office of Human Resources, Plumb Hall 211, for questions.

Graduate Assistant Technology Policy

Each graduate assistant must have access to a dedicated computer and work station with appropriate software and network connection to support their graduate assistant work within their department (approved by Graduate Council on November, 2004).

Graduate Assistant Awards for International Graduate Students

International graduate students cannot be offered a graduate assistantship until they have completed all the admission requirements of the Office of International Education and have been accepted to Emporia State University and have been found eligible in a graduate degree.

Once these requirements are met, an offer can be made contingent upon successful clearance of a background check. The department will be required to provide the student with a letter stating they have been offered a position. This proof of employment is a requirement in order to obtain a Social Security number. The student cannot begin work until Human Resources has received all the required employment documents and the background check has cleared.

Required Tests for International Graduate Teaching Assistants

In addition to English Proficiency requirements for admission to graduate study, graduate teaching assistants being considered for any employment having classroom or laboratory instructional responsibility and/or direct tutorial responsibilities and whose first language is not English must meet the following requirements **PRIOR** to being awarded a graduate teaching assistantship.

1. Present a TOEFL score of at least 550.
2. To be eligible for an appointment without spoken English language remediation conditions, all prospective graduate teaching assistants, whose first language is not English, shall be required to achieve a minimum score of 50 on the Test of Spoken English (TSE), or a score of 250 Speaking Proficiency English Assessment Kit (SPEAK), or equivalent, or a minimum score of 22, set by Board staff in consultation with the Council of Chief Academic Officers and with the approval of the Board Academic Affairs Standing Committee, on the Speaking section of the Test of English as a Foreign Language internet Based Test (TOEFL iBT).
3. Must be interviewed and have their competency in spoken English assessed by no fewer than three institutional personnel, one of whom shall be a student. The interview can be conducted either face-to-face or by mediated means.
4. Prospective graduate teaching assistants who do not meet the above requirements shall not be assigned teaching responsibilities nor other tasks requiring direct instructional contact with students. International Graduate Teaching Assistant requirements taken from the *Kansas Board of Regents Policy and Procedures Manual*.

International Graduate Teaching Assistant requirements taken from the *Kansas Board of Regents Policy and Procedures Manual*.

International students requiring testing for teaching assistantships must be on campus and available for testing two weeks prior to the date classes begin.

DEGREE REQUIREMENTS

Master's/Ed.S./Ph.D.

Master's Degree

1. All requirements for the degree must be completed within a period of seven (7) years from the first enrollment date. In the case of compelling circumstances, the department offering the degree may consider a petition for a one-year extension of all requirements. The Graduate Council may consider a petition, with departmental approval, to validate course work in the ninth or tenth year, dating from the first enrollment. Validation may be accomplished by examination or additional approved work. No transfer work can be validated. No work over ten years old can be used to satisfy the requirements for graduate degrees.
2. For graduate programs requiring 30-45 credit hours, degree-seeking graduate students **must** submit an approved degree plan signed by their advisor, department chair, and approved by the Dean of the Graduate School and Distance Education to the Graduate School **after completion of 15 credit hours**. Students in graduate programs requiring more than 45 credit hours must submit an approved degree plan signed by their advisor, department chair, and approved by the Dean of the Graduate School and Distance Education to the Graduate Schools **after 30 credit hours**. After these credit hour limits, if an approved degree plan is not on file in the Graduate School, an enrollment hold will be placed on the student's account.
3. The student must be admitted to degree candidacy by the major department. Usually a student is admitted to degree candidacy at the same time the degree plan is filed.
4. The student must complete the required number of semester hours of graduate level course work set by their department.
5. A minimum of 60 percent of credit hours must be earned in courses numbered 700 and above.
6. Satisfactory grades must be maintained as defined in the section titled "Grades."
7. The student must have an overall 3.0 GPA and a 3.0 GPA in their degree plan in order to be awarded a degree.
8. Graduates may participate in the commencement preceding completion of all degree requirements or in the first commencement following completion of all degree requirements.

The Specialist in Education Degree

The Specialist in Education (EdS) is an advanced degree involving a year of study beyond the master's degree. This degree program is designed to be independent of any further graduate study. It is wholly within the province of an institution offering the doctorate to determine whether or not any part of the specialist program may partially fulfill requirements for the doctorate.

1. A master's degree from a regionally accredited institution with a GPA of 3.5 in the most recent master's degree.

2. If the master's degree was awarded by Emporia State University and the student completed the Graduate Essay Examination (GEE) of The Teachers College during their master's degree, the student will not be required to retake the GEE.
3. All requirements for the degree must be completed within a period of seven (7) years from the first enrollment date. In the case of compelling circumstances, the department offering the degree may consider a petition for a one-year extension of all requirements. The Graduate Council may consider a petition, with departmental approval, to validate course work in the ninth or tenth year, dating from the first enrollment. Validation may be accomplished by examination or additional approved work. No transfer work can be validated. No work over ten years old can be used to satisfy the requirements for graduate degrees.
4. A specialist approved degree plan **must** be submitted to the Graduate School after a student completes 15 credit hours. After this credit hour limit, if an approved degree plan is not on file in the Graduate School, an enrollment hold will be placed on the student's account.
5. The student must complete the required number of semester hours of graduate level course work set by department. If equivalent courses were completed at the undergraduate level, graduate courses must be taken to fulfill the graduate hour requirements.
6. One academic year of supervised experience (internship) is required before the student may be recommended for full approval as a school psychologist **certified by the Kansas Department of Education**.
7. Students must pass a thesis defense or oral examination over their thesis area and research.
8. Satisfactory grades must be maintained as defined in the section titled "Grades."
9. Graduates may participate in the commencement preceding completion of all degree requirements or in the first commencement following completion of all degree requirements.

The Ph.D. Program

The curriculum of the Ph.D. program is designed to produce effective teachers and skilled researchers in fields related to library and information management.

1. All requirements for the degree must be completed within a period of eight (8) years from the first enrollment date.
2. An approved doctorate degree plan **must** be submitted to the Graduate School after the student completes 30 credit hours. After this credit hour limit, if an approved degree plan is not on file in the Graduate School, an enrollment hold will be placed on the student's account.
3. Students will advance to degree candidacy after passing qualifying exams. These exams must be taken within a six-month period.
4. Students must complete the required number of semester hours of graduate level course work set by their department.
5. Students must be enrolled in a class each semester in order to be active in the program (continuous enrollment). Ph.D. students who are forced to interrupt their studies for a period of one or more years should request a leave of absence from the program. In consultation with their graduate advisor, students should define the program modifications that the leave of absence requires and

submit a formal letter to the doctoral program director that includes appropriate reasons for the request. This form needs to be signed and approved by the graduate advisor, School Dean, and Graduate Dean. Requests shall indicate the reason for leaving and the expected date of return to the university. The leave of absence is designed to suspend the requirement for continuous enrollment. It does not affect the maximum time limitation set for a degree program as documented in the time limitation section. (See Slim Doctoral Program Handbook).

6. Students must complete at least 15 hours of dissertation credit. If dissertation has not been completed in 15 hours they must enroll in at least three credits each semester until the dissertation is completed.
7. Students must complete a minimum of 90 graduate hours beyond the baccalaureate degree.
8. Students must maintain a satisfactory level of work as determined by the doctoral faculty.
9. Graduates may not participate in the commencement ceremonies before acceptance of the dissertation by the committee, SLIM dean, and Graduate School dean.

APPLICATION PROCEDURES/REQUIREMENTS FOR GRADUATE CERTIFICATE PROGRAMS

Certificate programs offered are: Archives Studies, Autistic Spectrum Disorders, eLearning and Online Teaching, English, Elementary Literacy, Elementary STEM, Geospatial Analysis, History, Informatics, Information, Technology & Scientific Literacy, International Student Music Performance, Leadership and Administration in Information Organizations, Math, Music Performance, Public History, Psychology of Learning, Secondary Literacy, Teaching with Technology, TESOL and Youth Services.

Application Procedures and Program Requirements

1. A graduate application for admission and payment of the application fee of \$50 must be submitted to the Graduate School.
2. Official Bachelor's transcripts containing at least 60 credit hours of course work and final grades. Any additional transcripts from college credit accumulated after the bachelor's degree MUST be submitted if you will be using these credits for transfer credit or for last 60 GPA. Official transcripts must be on file in the Graduate School or submitted directly to the Graduate School.
3. The Department/School will determine the eligibility of the student for the Certificate Program and notify the Graduate School of the determination.
4. A Certificate Plan listing all courses used to fulfill the Certificate Program requirements must be submitted to the Graduate School and approved by the Graduate Dean.
5. A maximum of nine (9) semester hour of credit maybe transferred into an ESU certificate program, earned at a regionally accredited institution. Respective departments have the option to be more restrictive.
6. Students completing all certificate programs must complete all courses for the certificate with a 3.0 GPA and within a 7-year timeframe.
7. Students seeking a certificate must be enrolled in a minimum of 1 graduate credit hour during the term in which the students acquire their certificate.
8. A Certificate Completion Notification should be submitted to the Graduate School by the student mid-semester prior to the semester in which the student anticipates completing the Certificate Program requirements. The Certificate

Completion Notification form can be found online or in pdf format at <http://www.emporia.edu/grad/graduate-forms/>.

9. Completion of a graduate certificate program does not guarantee acceptance into a master's degree program.
10. The information on the transcript will read as follows:

Graduate Certificate: Archives Studies, Autistic Spectrum Disorders, eLearning and Online Teaching, English, Elementary Literacy, Elementary STEM, Geospatial Analysis, History, Informatics, Information, Technology & Scientific Literacy, International Student Music Performance, Leadership and Administration in Information Organizations, Math, Music Performance, Public History, Psychology of Learning, Secondary Literacy, Teaching with Technology, TESOL and Youth Services. (whichever applicable)

Date: (Same as degree conferral dates for degree-seeking graduate students)

Check with the School of Library and Information Management, Math Department, Music Department, Department of Physical Sciences, Psychology Department, Instructional Design and Technology, Social Sciences Department or Elementary Education for additional information/requirements.

GRADUATE POLICIES

Eligibility to study in a graduate program is determined by a graduate committee in each department and by the Dean of the Graduate School and Distance Education. Classifications for eligibility are either unconditional, conditional (seniors earning graduate credit), or probationary. Students will receive notification from the Graduate School of their eligibility status. Admission to graduate study does not imply admission to candidacy for an advanced degree.

Degree Candidacy

After having been admitted to graduate study with the objective of earning an advanced degree, the student must apply for and be admitted to candidacy for the degree sought. Candidacy is the formal approval for pursuit of a graduate degree after it is determined that all specified preliminary requirements have been met. Procedures and requirements for admission to candidacy are determined by the department in which the student is specializing, including the following general requirements:

1. The student must have met the entrance or candidacy requirements of the major department, and the results must be on file in the Graduate School.
2. If a student was admitted on probation, a release from probation must be processed before or concurrently with degree candidacy.
3. Student must have a degree plan on file in the Graduate School (see degree plan policy below).
4. The student must have completed at least six hours of course work on the graduate program of study and must have a cumulative 3.0 GPA before being admitted to degree candidacy. (approved by Graduate Council, November 2017)

Admission to degree candidacy is based not only on the minimal standards stated above, but also includes an appraisal of the student's record and potential. The Graduate School has a responsibility to maintain a standard of excellence determined by the graduate faculty.

Once those requirements have been completed, the graduate advisor must notify the Graduate School via email of the student's degree candidacy. The graduate advisor must send a notification to the Graduate School indicating a student has been admitted to degree candidacy. The Graduate School will send a letter notifying the student of their admittance to degree candidacy. If a student is denied degree candidacy, the graduate advisor must send a letter to the Graduate School indicating the reasons why the student has been denied degree candidacy. The Graduate School will notify the student of this decision and attach a copy of the departmental letter to the notification.

A student may be removed from degree candidacy (termination) based on academic progress. Notification of termination must come from the department that is terminating the student. The student must receive an official letter of termination with the reasons for the termination from the department chair/dean. If the student disagrees with the decision of termination, the student may appeal this decision in writing within thirty days from receipt of the letter. Certified mail is recommended, to verify student received official letter. The written appeal should be sent to the Dean of the Graduate School and Distance Education. The Dean will review the appeal and may consult with other colleagues in this review. The decision of the appeal is final. Notification to the student and their department will occur in writing within ten business days of receipt of the appeal request.

Graduate Examinations

Departments offering a graduate program may require one or more examinations for admission to degree candidacy or for graduation. The nature of these examinations varies among departments. Students should confer with their graduate advisor concerning this requirement.

*In a program that requires a final exam, the results (pass or fail) must be submitted by the department to the Graduate School for inclusion in the student's record. The department must convey the results to the student. The student must pass the final exam before a degree can be conferred.

*Students must be enrolled in a minimum of 1 credit hour during the semester they take their final exam.

Advisory Committee

Each candidate who is writing a thesis must have the work supervised by an advisory committee. A department may require an advisory committee for the supervision of research papers or projects, which are part of a degree program. The candidate will select a chair of the thesis committee in consultation with the candidate's advisor. One member of the committee must be from outside the candidate's area of specialization. Students are required to complete and submit the Thesis and Dissertation Committee Declaration Form the semester prior to completing the thesis or dissertation.

Degree Plan

For graduate programs requiring 30-45 credit hours, degree-seeking graduate students **must** submit an approved degree plan signed by

their advisor, department chair, and approved by the Dean of the Graduate School and Distance Education to the Graduate School **after completion of 15 credit hours**. Students in graduate programs requiring more than 45 credit hours must submit an approved degree plan signed by their advisor, department chair, and approved by the Dean of the Graduate School and Distance Education to the Graduate Schools **after 30 credit hours**. After these credit hour limits, if an approved degree plan is not on file in the Graduate School, an enrollment hold will be placed on the student's account.

Intent to Graduate

Notice of intent to graduate must be received by the Graduate School the semester preceding graduation. The Intent to Graduate form is due March 1 for summer graduates, July 1 for fall graduates, and November 1 for spring graduates. Failure to give notice of intent to graduate may cause a delay in graduation. The intent to graduate form must be submitted online at <http://www.emporia.edu/grad/graduate-forms/>.

Grades

Candidates for the Specialist in Education degree may use no grade lower than B or P in meeting degree requirements.

Candidates for the Master of Accountancy, Master of Arts, Master of Business Administration, Master of Education, Master of Science, Master of Music, and Master of Library Science degrees must earn a grade point average of B (3.0) in all courses used for the degree. A grade of A, B, (inclusive of B-) or P (no C, D or F grades) may be used in 500 and 600 level courses, and no grade lower than C may be used in other graduate classes. P grades will not be calculated in the GPA. Courses in which grades of C, D or F are earned may be retaken. Only those courses in which a grade of B (inclusive of B-) or higher has been earned may be transferred from another institution. Courses in which P grades have been earned may be transferred from another accredited college or university, but the total of transfer P grades and P grades earned at ESU used to meet degree requirements cannot exceed 40% of the total credit hours for the degree. Although transfer credit may be accepted and used on the degree plan, no grades earned on transfer credit may be used in determining grade point averages. (Revised by the Graduate Council January 20, 2011).

Non-degree graduate students are held to the same academic standard as degree seeking graduate students. Degree seeking graduate students and non-degree graduate students must maintain a 3.0 GPA. If a graduate (Degree and Non-degree) student's semester GPA falls below 3.0, the student will be placed on academic probation and may be dismissed from their graduate program at the discretion of the department (denial of degree candidacy). A student who has two consecutive semesters of a GPA below a 3.0 will be dismissed from the Graduate School and not be permitted to enroll in classes.

In-Progress Grades

In Progress (IP) grade extensions are used in graduate classes identified by the College/School as requiring graduate work that extends beyond one semester "IP" grades may be extended each semester at the discretion of the faculty member in charge. A final course grade must be submitted for the course(s) by the end of the semester the student graduates. Upon the graduate student's completion of a non-thesis degree program, any thesis credit hours for which a grade has not been received will be transformed from "IP" to "W" grades. (FSB 03007)

Incomplete Grades

The grade "I" (incomplete) is given only for personal emergencies which are verifiable and when the student has done passing work in the course. The student has the responsibility to take the initiative in completing the work and the student is expected to make up the "incomplete" as soon as possible during the following semester.

Except for graduate research, thesis, or the equivalent, all incomplete work must be finished by the end of the following full semester (summer sessions are not considered a full semester for purposes of this deadline.) During the initial extension period, a student may submit a written petition for an extension of one additional semester during which an incomplete grade may be removed. In the most exceptional cases, the faculty member with the written approval of the department chair, may grant the request for an extension. An extension beyond two semesters will require the approval of the dean of the school or college in which the course was offered. (The granting of an extension will not be routine.)

Individual instructors may establish earlier deadlines for completion of the work. Students who do not complete the unfinished work by the established deadline will have the grade of "F" entered on the transcript and will be required to re-enroll to earn credit in the course.

Definition of Semester Hours

All credits on official transcripts are certified in terms of the semester hour. A semester hour consists of a minimum of 750-800 minutes of classroom contact on lecture courses or its equivalent in independent study during the semester.

Transfer Credit

Graduate credit earned in regionally accredited institutions may be transferred for credit toward the Master's, Specialist in Education, or Ph.D. degrees subject to the following conditions:

- 1) No more than nine (9) semester hours of credit may be transferred into an ESU program requiring fewer than 40 hours of graduate coursework, or fifteen (15) into an ESU program requiring 40 or more hours of graduate coursework. Individual programs may reduce this limit at their discretion.
- 2) In cases where graduate students are entering two graduate programs, the accepted number of transfer hours may be applied to one of the two degree programs or divided between the two degree programs. The accepted number of transfer credit cannot be applied to each degree program separately.
- 3) A grade of B- or higher must have been earned in all such transfer credit.
- 4) Official transcripts of all transfer work must be on file in the Graduate School prior to submitting degree plans. Courses must be current or within 7 years timeframe.
- 5) Transfer courses must be approved by the chair of the major department and the Dean of the Graduate School and Distance Education.
- 6) The transfer credit must be applicable toward a graduate degree at the university at which the course work was taken.
- 7) Courses in which P grades have been earned may be transferred from another accredited college or university, but the total of transfer P grades and P grades earned at ESU used to meet degree requirements cannot exceed 40% of the total credit hours for the degree. Although transfer credit may be accepted and used on the degree

plan, no grades earned on transfer credit may be used in determining grade point averages. (Revised by Graduate Council January 20, 2011).

Students who have completed graduate level course work at accredited international universities must submit their transcripts to an approved foreign credential evaluation service which is a member of the National Association of Credential Evaluation Services. Students with questions should consult with the Office of International Education, Registration Office, or the Graduate School. All of the usual criteria for transfer credits apply (approved by Graduate Council March, 2005).

Seniors Earning Graduate Credit

College seniors at Emporia State University may earn graduate credit after accumulating 90 undergraduate hours by accomplishing the following:

- 1) Completing a formal application for graduate study and submitting an official transcript.
- 2) Having a minimum overall undergraduate GPA of 2.5.
- 3) Having a degree contract on file with the undergraduate degree analyst in the Registrar's Office.
- 4) Completing a Request for Graduate Credit form for each course for enrollment. The approval of the advisor, course instructor, Dean of the Graduate School and Distance Education, and Registrar is required. The Senior Request for Graduate Credit form must be presented to Registration at the time of enrollment.
- 5) Graduate courses taken **may not** be used to meet undergraduate requirements, except in case of approved accelerated masters programs. Undergraduate students who take graduate credit may only enroll for a total of 17 semester hours during the fall/spring or a total of 10 hours for the summer term (undergraduate/graduate). No more than 12 semester hours of graduate credit can be accumulated in this way. Only those courses numbered 500-799 will be considered for graduate credit before the undergraduate degree has been awarded. Undergraduate students may not enroll in 800 or 900 level graduate classes.

*Seniors cannot earn graduate credit in the Accelerated Online Programs for Educational Administration, Curriculum and Instruction, MBA and MAcc. (approved by Graduate Council, March, 2018).

Dissertation

A dissertation is required for the Doctor of Philosophy in Library and Information Management. Students are required to complete and submit the Thesis and Dissertation Committee Declaration Form the semester prior to completing the thesis or dissertation. Please check with SLIM for the deadline for receiving the finalized dissertation in their school. One copy of the dissertation in final form and approved by the department with committee signatures is due in the Graduate School one week before graduation. The dissertation guide is available online on the graduate web site. Dates by which dissertations must be received in the Graduate School are listed in the dissertation guide booklet. Exceptions to the rules governing the typing of dissertations may be permitted, but only with the written consent of the Dean of the Graduate School and Distance Education and the chair of the candidate's committee.

An original copy with departmental signatures is due in the Graduate School no later than 3 weeks prior to the close of the semester for review by the Graduate School. All dissertations must have the approval of the student's dissertation committee, the chair of the dissertation committee, and the Dean of the School of Library and Information Management or the dissertation will not be accepted by the Graduate School. An electronic copy of the finalized, corrected dissertation must also be provided at the time the final, corrected hard-copy manuscript is submitted to the Graduate School. A finalized, corrected hard copy with payment is due in the Graduate School one week prior to the close of the semester. The cost for the required bound copy is \$15 and personal copies can be bound for \$25 each plus applicable tax.

Thesis

A thesis is required for certain degrees and is an option in others. Students are required to complete and submit the [Thesis and Dissertation Committee Declaration Form](#) the semester prior to completing the thesis or dissertation. A copy of the thesis must be submitted to the major department no later than three weeks prior to the day on which the degree is to be conferred. Some departments may have earlier deadlines. One copy of the thesis in final form is due in the Graduate School one week before graduation. A candidate may obtain a thesis guide online at <http://www.emporia.edu/grad/graduate-policies/>. Dates by which theses must be received in the Graduate School are listed in the thesis guide. Exceptions to the rules governing the typing of theses may be permitted, but only with the written consent of the Dean of the Graduate School and Distance Education and the chair of the candidate's committee.

A candidate must apply a minimum of 3 credit hours but may not apply more than six hours of thesis credit toward a master's degree.

An original copy with departmental signatures is due in the Graduate School no later than 3 weeks prior to the close of the semester for review by the Graduate School. All thesis must have the approval of the student's thesis advisory committee, the chair of the thesis advisory committee, and the department chair or the theses will not be accepted by the Graduate School. An electronic copy of the finalized, corrected thesis must also be provided at the time the hard-copy manuscript is submitted to the Graduate School. The electronic copy (in pdf format) should be sent as an attachment to jspotswo@emporia.edu and need not contain departmental signatures. It should be the same as the hard-copy manuscript that is submitted, without the signature page. A finalized, corrected copy of the thesis with payment is due in the Graduate School one week prior to the close of the semester. The cost for the required bound copy is \$10 and personal copies can be bound for \$25 each plus applicable tax.

Project Binding

The latest Graduate School will accept projects for binding is the Wednesday of final exam week. The cost for the departments required bound copy is \$10 (2 max.) and personal copies can be bound for \$25 each plus applicable tax.

Thesis and Research Credit

There are no limitations on the number of thesis and investigative credit hours for which a student may enroll. However, only six hours and five hours of thesis credit may apply toward master's and specialist degrees respectively, and no more than 12 hours of thesis and investigation (independent study, project) credit may apply toward a single master's or specialist degree.

Graduate Degree and Enrollment

Graduate students using the resources of the university (e.g., instructors, libraries, laboratories, computers) are expected to be enrolled in courses for credit and must be enrolled in at least one semester credit hour during the term in which the degree is granted or the requirements are met. Any exceptions to this policy must be requested by the department chair and approved by the Dean of Graduate School and Distance Education.

Loads

A graduate student enrolled in nine or more graduate semester hours in a given semester during the academic is classified as a full-time student. (Graduate assistants are required to enroll in a minimum of 6 graduate credit hours to maintain their assistantship.)

The maximum load for a graduate student during the fall and spring semesters is 16 hours per semester. The minimum load required for students with a fall or spring graduate assistantship is 6 hours. Overloads may be approved under exceptional circumstances during the fall and spring semesters. A department under the supervision of its respective school may establish additional restrictions upon credit hours earned during an enrollment period. The normal load for summer session is 1 hour of graduate credit per week enrolled. The maximum load for summer is 1.5 hours of graduate credit for each week of attendance. The minimum load required for students with a summer assistantship is 3 hours. Students may earn no more than 12 hours of credit during the period between the end of spring semester and the beginning of fall semester. The student may also earn no more than 9 hours in any six week period. Overloads beyond these maximum limits must be approved by the advisor and the head of the department.

Courses enrolled for audit credit do not count in computing minimum course load requirements for graduate assistants. Any exception to these regulations must be requested by the chair of the major department and approved prior to enrollment by the Dean of the Graduate School and Distance Education.

Time Limit

Requirements for the master's, certificates and specialist in education graduate degrees must be completed within seven (7) years from the date of the first enrollment. Requirements for the Ph.D. program must be completed within eight (8) years from the date of the first enrollment. In the case of compelling circumstances, the Department offering the degree may consider a petition for a one-year extension of all requirements. The Graduate Council may consider a petition, with Departmental approval, to validate course work in the ninth or tenth year, dating from the first enrollment. Validation may be accomplished by examination or additional approved work. No transfer work can be validated. No work over ten years old can be used to satisfy the requirements for graduate degrees.

Post-Baccalaureate Certification

Holders of baccalaureate degrees who wish to obtain certification for teaching at the elementary or secondary level should contact the teacher licensure specialist in the Office of Professional Education Services in The Teachers College for initial advisement, phone 620-341-5447.

Requirements for a Second Master's Degree

Should a student wish to secure a second master's degree at ESU, a department or school may approve a degree plan, which includes a maximum of ten semester hours of credit from the first degree. Any exception to this ten-hour limit must be requested by the chair of

the major department recommended by the Graduate Council and approved by the Dean of the Graduate School and Distance Education. The second degree program must fulfill all of the requirements for that particular master's degree.

Shared Credit Hours for Multiple Degree Programs

Students in dual degree programs may share a limited number of credit hours toward the requirements of both degrees. The term "shared hours" refers to the use of a limited number of credit hours toward the requirements of two separate degrees or programs. The principle of shared-hours allows the student to earn two degrees for fewer credit hours than would normally be required if both programs were taken independently.

Sharing credit hours for two certificate programs is not allowed.

- A student wishing to secure a second master's degree at Emporia State University may share a maximum of ten semester hours of credit from the first degree, provided the credits are approved by the chair of the major department and Dean of the Graduate School and Distance Education AND are within the seven year time limit.
- Any exception to the ten-hour limit must be requested by the chair of the major department and approved by the Graduate Council and Dean of Graduate School and Distance Education. To preserve the integrity of each graduate degree, requests that exceed the maximum of 10 shared hours must demonstrate that at least half of the minimum required credit hours for each graduate degree are earned in the individual graduate program and counted solely for that degree.

Examples:

- A student enrolled in a 36-hour Emporia State University master's program may not request more than a combination of 18 transfer and/or shared credit hours toward the graduate program.
- A student enrolled in a 60-hour Emporia State University master's program may not request more than a combination of 30 transfer and/or shared credit hours toward the graduate program.
- A graduate program may overlap with only **one other program** for the purpose of shared credit hours. Credit hours may never be used for **three** or more programs. If a student seeks a third certificate or degree, it must stand alone.
- Graduate programs may limit the shared of credit hours below the Emporia State University Graduate School maximum, but may not allow double-counting above the ESU Graduate School limit.

Graduate Awards

The Laurence C. Boylan Scholar Award was created by a special fund drive to honor Dr. Boylan, Dean of Graduate Studies from 1958-66. The Laurence C. Boylan Fund provides awards for distinguished scholarship in graduate study at ESU by honoring outstanding scholars. Degree-seeking graduate students must submit an application and demonstrate a financial need.

The Harold Durst Graduate Research Award is presented annually to provide financial support for creative activities and research by a

graduate student completing a thesis. Students are required to submit a proposal including introduction, background, significance of proposed research/creative activity, methodology, expected outcomes, literature cited, budget, and include a vita. Proposals are reviewed by a sub-committee of the Graduate Council.

The Graduate Council established two Graduate Teaching Assistant University Awards to recognize excellence in teaching, defined as instruction in both traditional classroom and technology-assisted formats. Two awards of \$500 each are awarded annually. Nominations must be submitted by faculty members, department chairs, or graduate teaching assistants. Nominations are reviewed by a sub-committee of the Graduate Council.

The Graduate Council established the Outstanding Graduate Faculty Mentor Award to recognize graduate faculty who demonstrate dedication to and mentorship of graduate students and provide leadership to graduate education. An award of \$1000 will be awarded annually.

The Robert J. Grover Graduate Student Scholarship was established by the Graduate Student Advisory Committee (GSAC) in 2005. Two awards of \$400 each are awarded annually. Applicants must be degree-seeking graduate students with a gpa of 3.75 or better.

The Graduate School established the Thesis/Dissertation Support Awards to support students completing a thesis or dissertation. Five awards of \$500 each will be awarded each semester (fall and spring). The awards must be used as financial support for creative activities or research necessary for the completion of a thesis/dissertation.

The Graduate School established the New Graduate Student Scholarship to award first time degree seeking graduate students. A limited number of \$500 graduate scholarships will be awarded each semester (spring, summer and fall). The scholarship must be used to pay tuition/fees for any degree-seeking program of graduate study.

Exceptions to these Policies

All questions concerning possible exceptions or the interpretations of these policies, procedures, and requirements should be directed to the Dean of the Graduate School and Distance Education.

ACADEMIC DISHONESTY POLICY

3D.0801 ACADEMIC DISHONESTY POLICY (FSB 95002 approved by President 1/31/96; FSB 03002 passed by Faculty Senate 1/20/04; approved by President 2/9/04; FSB 05002 passed by Faculty Senate 1/17/06; approved by President 2/7/06; title update approved by President of the Faculty 8/22/2010; FSB 10007 passed by Faculty Senate 3/15/2011; approved by President 3/21/2011; updated 10/2/2013).

Academic dishonesty, a basis for disciplinary action, includes but is not limited to activities such as cheating and plagiarism (presenting as one's own the intellectual or creative accomplishments of another without giving credit to the source or sources).

The faculty member in whose course or under whose tutelage an act of academic dishonesty occurs has the option of failing the student for the academic hours in question, or for any components or requirements for that course. Departments, schools, and colleges may have provisions for more severe penalties. Emporia State

University may impose penalties for academic dishonesty up to and including expulsion from the student's major or from the University. In addition, acts of academic dishonesty shall be grounds to deny admission to a department or program.

In addition to the penalties above, the faculty member shall notify in writing their department chair and the registrar of the infraction. The department chair shall forward a report of the infraction to the Provost and Vice President for Academic Affairs and Student Life. The registrar shall block the student from withdrawing from the course to avoid the penalties that result from the infraction. The Provost and Vice President for Academic Affairs and Student Life shall act as the record keeper for student academic infractions. The Provost and Vice President for Academic Affairs and Student Life will notify the student in writing that an infraction has been reported and inform the student of the right to appeal and of the appropriate appeal procedures. The Provost and Vice President for Academic Affairs and Student Life shall notify the student, the department chair, and the faculty member that initiated the proceedings, of any additional action taken beyond those already imposed by the faculty member. Should a single infraction be so egregious, or should a student have a record of multiple infractions, the Provost and Vice President for Academic Affairs and Student Life may impose additional penalties, including expulsion of the student from the University.

The student has the right to appeal the charge of academic dishonesty (see Student Conduct section in the University Policy Manual). If after an appeal it is found that the student did not commit an act of academic dishonesty, no penalties will be imposed on the student.

A chair of a department or director of a program may request from the Provost and Vice President for Academic Affairs and Student Life a list of all currently enrolled ESU students within that major or program who have committed acts of academic dishonesty. This request may be a standing request to be filling automatically during each semester until the request is rescinded by the chair or director. In addition, a chair of a department or director of a program may submit to the office of the Provost and Vice President for Academic Affairs and Student Life a list of applicants to a program or major and the chair or director may be informed if any of the applicants has committed any acts of academic dishonesty.

Prior to the beginning of the next academic year, the office of the Provost and Vice President for Academic Affairs and Student Life shall send to the Chair of the Academic Affairs Committee of the Faculty Senate a list containing nonspecific student identifiers, such as Student 1, Student 2, etc., their specific academic infraction(s) reported to the Provost's office, the total number of infractions that have been reported for each student, and any actions taken by the Provost and Vice President for Academic Affairs and Student Life.

Appendix A:

Accelerated Degree Program Guidelines and Procedures

For Bachelor's/Master's Accelerated Degree Programs (4+1)

Emporia State University's Accelerated Degree programs (Bachelor's and Master's - 4+1) are designed by academic units to provide its selected highest quality students with the opportunity to link advanced undergraduate coursework with graduate coursework

and degree completion with the opportunity to get a head start on the Master's degree while completing the Bachelor's degree. **All proposals must be sent through curriculum review and reviewed and approved by the Graduate Council and Dean of the Graduate School.**

There are two possible options for creating Accelerated Bachelor's/Master's Degree Programs. One option is where the bachelor's and master's program are in the same department (Undergraduate Math and Graduate Math) or closely related departments (Undergraduate Chemistry and Graduate Physical Sciences). The second option is where the bachelor's and master's program are in different disciplines. The two programs must clearly identify the undergraduate program, graduate program and shared hours.

Complete the program development form. Each proposal must include the following:

- A program description
- Admissions requirements (if higher than requirements set by Graduate School).
- Degree requirements for undergraduate program, graduate program and shared hours.
- A sample plan of study for both the undergraduate and graduate portions of the program.

Admission Standards

- Students must have a minimum of an overall undergraduate GPA of 3.3.
- Students must apply for admission to an accelerated master's option during their second semester of their junior year or after 75 credit hours. In order to apply, students must:
 1. Apply to Graduate School – "Graduate Application."
 2. Apply and be accepted to an approved accelerated master's program – "Accelerated Application Form."
- Students must meet all admission criteria established by the academic unit and Graduate Education, except the completion of the baccalaureate degree.
- The admission standards for the accelerated degree must be consistent with the admissions criteria of Graduate School and the academic unit for the Master's degree. A written statement detailing the satisfactory academic progress requirements to remain in the accelerated degree program must appear in all recruiting, admission materials and website provided by the academic unit.
- The academic unit must designate a faculty member responsible for coordinating the admissions process.
- Students will be eligible to start the accelerated program after completing 90 (senior status) credit hours of coursework towards their undergraduate degree program. During senior year, students must complete "Accelerated Enrollment Form" form from the Graduate School.

Monitoring Student Status

- The academic unit must specify how a student's academic progress in the program will be monitored and reported. A student will be considered an undergraduate until all undergraduate degree requirements have been completed, at which time the Master's degree program will be activated. Undergraduate students enrolled in the accelerated programs will be eligible to enroll in graduate level courses and seminars. However, **they will not be eligible for most graduate services including teaching**

and research assistantships and related health insurance, financial aid, or graduate award programs until the undergraduate degree is completed.

- All recruiting and admission materials provided by the academic unit should include a written statement indicating that students will be considered undergraduates until all undergraduate requirements have been met and the Bachelor's degree has been posted to the student's transcript.
- The academic unit must specify how the accelerated program will provide academic advising. Administration of the accelerated program must include an annual review of each student's academic progress in meeting both Bachelor's and Master's degree requirements. The academic unit must clearly outline satisfactory academic progress guidelines, including specific timelines, as well as the consequences of not meeting these requirements.
- Advisors must submit an undergraduate plan of study and a graduate degree plan for the student to appropriate offices.
- Undergraduate students who have been accepted to an accelerated bachelor's/master's degree program prior to the awarding of their undergraduate degree must complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the semester for which they were admitted to the accelerated program.
- Undergraduate students may not use graduate level courses taken before they have been accepted in the accelerated master's program (i.e., students cannot retroactively become part of the accelerated degree). A degree plan must clearly identify the graduate course of study and identify the 12 shared hours.

Degree Requirements

- Students in the accelerated degree program must meet all degree requirements of the Bachelor's and Master's programs.
- When a thesis is required for the Master's degree, the undergraduate honors thesis may not be substituted for the master's thesis.
- Accelerated Bachelor's/Master's programs may use a maximum of 12 pre-admission to Graduate School credits, which may include up to a maximum of 12 hours shared between the Bachelor's and Master's program. All 12 shared hours must be taken at the 700 level. No 500 or 600 level courses will be accepted as shared hours.
- Only course approved 700 level courses (12 shared hours) in which the student receives a B (B+, B) or better will be transferred to the graduate transcript. These courses must be approved by advisor, Department Chair and Dean of the Graduate School.
- Transcripts - Two transcripts, one undergraduate and one graduate, will show the completed coursework for Accelerated Degree students. Undergraduate transcripts will contain all courses taken for undergraduate degree. Graduate transcripts will contain all courses taken for graduate credit. All courses shown on the undergraduate transcript will be used to calculate the undergraduate GPA. Graduate GPA will be calculated using only the graduate courses.

Continuing and Graduation Requirements

- Maintain a cumulative GPA of 3.3 or higher (in both undergraduate and graduate programs)

- Earn a grade of B (3.0) or higher on all double-counted, graduate level (700 level) courses.
- Complete the degree requirements within time limits set by the Graduate School and the degree-granting program.
- If a student does not meet the above the standards, they will be removed from the accelerated degree program. At that time, the department will change the student's major code back to a regular undergraduate major (as specified by the student, in consultation with the department/advisor).

Program Monitoring

- The academic unit should outline a plan for monitoring the program's success after three years.
- For official university reporting purposes, students will be considered as undergraduates until the Bachelor's degree is awarded.

Proposal Submission Procedures

Accelerated degree program proposals must be submitted to Graduate School and Graduate Council for approval. Complete the program development form. Each proposal must include the following:

- A program description
- Admissions requirements (if higher than requirements set by Graduate School).
- Degree requirements for undergraduate program, graduate program and shared hours.
- A sample plan of study for both the undergraduate and graduate portions of the program.

Leaving the Accelerated Degree Program

- Students admitted to the Accelerated Degree program, who voluntarily decide not to pursue a graduate degree, or who are not admitted to the graduate program, may change majors back to a regular undergraduate program at any time. If an Accelerated Degree student chooses not to pursue a graduate degree, the student should notify the administering department in writing of this decision; this notification should include the specific undergraduate major that the student intends to pursue. At that time, the department will change the student's major code back to a regular undergraduate major (as specified by the student, in consultation with the department/advisor). Once a student withdraws from the accelerated program, they may not return to that program and cannot not reapply to the accelerated program again.

Tuition and Financial Aid

- Undergraduate tuition rates apply to students up until undergraduate degree is awarded. After that time, graduate tuition rates will apply.
- Undergraduate students may receive federal financial aid (through the Financial Aid Office) for both undergraduate and graduate courses.
- However, once a student becomes a graduate student, financial aid is not available for undergraduate courses. In addition, financial aid as a graduate student is not available until an undergraduate degree has been conferred. This is why it is important for Accelerated Degree students to complete all undergraduate degree requirements and apply for an undergraduate degree during the first four years. Students are strongly encouraged to contact the financial aid office to discuss financial aid options during the fourth and fifth years.

ACCOUNTING, INFORMATION SYSTEMS, AND FINANCE

Web: <http://www.emporia.edu/business/>

Phone: 620-341-5685

Ed Bashaw, Dean
Liz Diers, Chair

Graduate Faculty:

Professors: George Durler.

Associate Professors: Daniel Haskin, Tanja Steiner.

Assistant Professors: Juan Chavarria, Liz Diers, Lindan Fan, Javier Flores, Douglass Smith, Lei Wen.

MASTER OF ACCOUNTANCY

Admission Requirements

- Bachelor's degree in accounting from a regionally-accredited (or equivalent) college or university, or a bachelor's degree in business from a regionally-accredited (or equivalent) college or university with a transcript demonstrating completion of the following:
 - Intermediate Financial Accounting I and II
 - Cost Accounting
 - Income Taxation
 - Auditing
- Minimum GPA of 2.65 or higher (4.0 system) cumulative or in the last 60 semester hours of study, and
- Meet the formula of $200 \times \text{undergraduate GPA} + \text{GMAT score} \geq 1050$ (or equivalent GRE scores).

Exempt from GMAT if:

1. Bachelor's degree in business from a regionally-accredited (or equivalent) college or university with 3.5 GPA or higher or,
2. Master's degree from a regionally-accredited (or equivalent) college or university, regardless of field or,
3. 3 or more years of leadership/managerial experience (with resume submitted).

Degree Candidacy Requirements

- a. Must have an overall 3.0 GPA to graduate.
- b. No more than two "C's" in courses taken at the 800-level. Note: students must earn a minimum of a "B" in all 500-level courses.
- c. No more than one "C" and on "D/F" in courses taken; the course with a "D/F" grade must be retaken and replaced with a minimum "B" grade to meet the previous standards. Students who earn a second "D" or "F" will be dismissed from

the program. Students who earn a second "C" in the same course or a second "D" or "F" in any course will be considered for dismissal from the program.

- d. Students who fall below these standards will be dismissed from the program. Students who have been dismissed from the program may submit a written petition for reinstatement to the School of Business Graduate Committee. As part of the reinstatement petitioning process, the Committee reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used in the reinstatement decision. Information provided by previous instructors will not be shared with the student. *Reinstatement is a privilege and few students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the Committee's discretion and must meet reinstatement conditions as determined by the Committee. Students not achieving the probationary or reinstatement conditions will be automatically dismissed from the program without recourse. The decision of the School of Business Graduate Committee is final.

MASTER OF ACCOUNTANCY

Graduation Requirements

Required Courses

AC 820*	Advanced Income Tax	3 hours
AC 833	Advanced Auditing	3 hours
AC 840	Advanced Management Accounting	3 hours
AC 853	Accounting Theory	3 hours
AC 860	Advanced Accounting Information Systems	3 hours

Electives (15 hours or 5 courses) (At least nine of these hours must be at the 800 level; at least six of these hours must be in Accounting)

AC 723	Federal Income Tax Accounting II	3 hours
AC 734	Governmental and Not-for Profit Accounting	3 hours
AC 830	Fraud Examination.	3 hours
IS 813	Information Technology Project Management	3 hours
IS 853	Business Analytics	3 hours
IS 863	Enterprise Resource Planning Foundations	3 hours
IS 873	Information Systems for Managerial Decision Making	3 hours
BC 807*	Managerial Economics	3 hours
BC 820*	International Economics	3 hours
BU 573**	Law of Commerce	3 hours
BU 820**	Quantitative Analysis for Business Decisions	3 hours
Total Hours		30 hours

*Necessary for CPA exam in Kansas if student did not take an upper-level economics course as an undergraduate.

**Necessary for CPA exam in Kansas if student did not take Law of Commerce and/or a Quantitative methods course as an undergraduate.

Other courses may be necessary to meet requirements for professional exams.

Students may concentrate elective courses in an area, if they desire, and the necessary courses are available.

Equivalent to a B.S. degree in Accounting means completion of Intermediate Accounting I and II, Cost Accounting, Accounting Information Systems, Auditing, Federal Taxation, Business Statistics, Financial Management, Principles of Marketing, Principles of Management, Operations Management, Legal Environment of Business, Microeconomics, Macroeconomics, and Business Policy.

MASTER OF SCIENCE IN INFORMATION TECHNOLOGY

Admission requirements

1. Bachelor's degree from a regionally accredited (or equivalent) college or university.
2. Minimum GPA of 2.65 or higher (4.0 system) cumulative or in the last 60 semester hours of study.
3. Meet the formula of $200 \times \text{undergraduate GPA} + \text{GMAT score} = 1050$ or higher (or equivalent GRE scores).
4. In addition, a student must have a background in the following areas:
 - College Algebra or equivalent courses(s)
 - Business Statistics or equivalent course(s)
 - Object-Oriented programming or equivalent course(s) or relevant IT work experience.

Exempt from GMAT/GRE if:

1. Bachelor's degree from a regionally-accredited (or equivalent) college or university with 3.5 GPA or higher.
OR
2. Master's degree from a regionally-accredited (or equivalent) college or university.
OR
3. 3 or more years of leadership/managerial/technology-related experience (with resume submitted).

Degree Candidacy Requirements

- a. Must have an overall 3.0 GPA to graduate.
- b. No more than two "C's" in courses taken at the 800-level.
Note: students must earn a minimum of a "B" in all 500-level courses.
- c. No more than one "C" and one "D/F" in courses taken; the course with a "D/F" grade must be retaken and replaced with a minimum "B" grade to meet the previous standard. Students who earn a second "D" or "F" will be dismissed from the program. Students who earn a second "C" in the same course or a second "D" or "F" in any course will be considered for dismissal from the program.
- d. Students who fall below these standards will be dismissed from the program. Students who have been dismissed from the program may submit a written petition for reinstatement to the School of Business Graduate Committee. As part of the reinstatement petitioning process, the Committee reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used in the reinstatement decision. Information provided by previous instructors will not be shared with the student.
*Reinstatement is a privilege and few students who are

dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the Committee's discretion and must meet reinstatement conditions as determined by the Committee. Students not achieving the probationary or reinstatement conditions will be automatically dismissed from the program without recourse. The decision of the School of Business Graduate Committee is final.

Graduation requirements

Required courses:

IS 813	Information Technology Project Mgmt	3 hours
IS 823	Systems Analysis and Design	3 hours
IS 824	Database Management	3 hours
IS 825	Cloud Computing & Management	3 hours
IS 826	Application Programming	3 hours
IS 828	Enterprise Architecture	3 hours
IS 843	Electronic Commerce4	3 hours
IS 873	Info. Syst. for Managerial Decision Making	3 hours

Required Elective Courses (9 hours only)

CS 564	Network Defense & Countermeasure	3 hours
CS 565	Computer Forensics	3 hours
IS 504	Data Mining	3 hours
IS 805	Special Topics in Information Systems	3 hours
IS 827	Advanced Application Programming	3 hours
IS 853	Business Analytics	3 hours
IS 863	Enterprise Resource Planning	3 hours

Total **33 hours**

BIOLOGICAL SCIENCES

Web: <http://www.emporia.edu/biosci>

Phone: 620-341-5311

William Jensen, Graduate Program Coordinator

Graduate Faculty

Professors: Melissa Bailey, Scott S. Crupper, William Jensen, Lynnette C. Sievert, Marshall Sundberg.

Associate Professors: Tim Burnett, Brenda Koerner.

Assistant Professors: Stephen Fields, Zachary Klein, David McKenzie, Alexis Powell, Darren Rebar.

The graduate program of the Department of Biological Sciences is designed to qualify persons for teaching biology in community college, and liberal arts colleges; for continued graduate work at the doctoral level; and for employment in various fields of biology, including certain fields of applied biology.

Lecture rooms, teaching laboratories, a greenhouse, and research facilities of the department are located in Breukelman Hall. Constant-temperature chambers for plant and animal studies, centrifuges of various kinds, and electrophoretic, spectrographic, chromatographic, electrophysiological, and immunochemical instruments, as well as field-operated physioecological monitoring equipment are extensively used by graduate students. There is also equipment for modern molecular biology (e.g. DNA sequencer), animal facilities, a herbarium, and research microscopes. A natural history museum, with specimens mounted by internationally recognized taxidermist Richard H. Schmidt, contains hundreds of species of birds, mammals, fish mounts, and hand-painted molds of Kansas snakes. The museum also has more than a thousand other vertebrate study specimens. A field station, The Ross Natural History Reservation, consisting of laboratory buildings, ponds, and 200 acres of native grassland and located ten miles northwest of the main campus is extensively used in conjunction with class work, research, and science education. In addition, the students in our graduate programs have access to two Ozarkian wooded areas, two wetlands, a 40 acre tall grass prairie area in the Flint Hills with a spring, stream and pond, and several Federal and State reservoirs within a short drive. The Kansas Department of Wildlife and Parks has a research office on campus, and often interacts with the department.

Admission Requirements

Students who plan to do graduate work in biology should have an adequate background of undergraduate courses suitable to the area of biology in which they are interested. If such a background is lacking or incomplete, the student may be asked to make up these deficiencies in addition to pursuing the normal graduate program.

In addition to the Application For Admission To Graduate Study, the Department of Biological Sciences uses a special application that is online, or is available upon request from the Graduate Coordinator of the department. We require the applicant to submit references and a personal background statement detailing goals and experiences in biology. International students must apply for graduate school through the International Student Office. The department's admission committee will make a decision based upon the applicant's undergraduate grade point average, the application

materials, and a willing advisor. The applicant can be accepted unconditionally, on a probationary basis, or the applicant can be denied. To be considered for spring admission, completed Master of Science applications need to be received by November 15 and by April 15 for summer/fall admission. There are no application deadlines for Master of Arts applications and their review will be performed as they are received.

Degree Candidacy Requirements

If the academic record, English proficiency examination, proposed plan of research and degree plan are satisfactory, the Degree Candidacy Card will be signed by the Graduate Coordinator of the department and forwarded to the Graduate School. If the record is unsatisfactory, the student will not be admitted to degree candidacy and can be asked to terminate graduate study.

In the event the degree candidacy application is denied, the student can appeal the case by letter to the Department of Biological Sciences Graduate Committee for review. The committee, after consulting with the advisor, can require that the student discontinue graduate study or suggest that the student complete additional course work.

Master's Degree, Biology

Students must pass an English proficiency examination given by the department during the first semester of enrollment and prior to enrolling GB 752. The student must present a public seminar and take an oral examination over the research at the completion of the thesis or research problem.

Master of Science (M.S.)

For those students considering graduate work beyond the master's degree, or employment as professional biologists, the M.S. program of study is strongly recommended. This program is designed to provide students with a more sophisticated research experience. The major in biology with a thesis requires not less than 30 hours of graduate credit. Up to nine hours of approved graduate course work outside the department may be accepted towards the graduate course work requirements.

Required Courses	Hours
GB 750 Research Design and Analysis	3 hours
GB 752 Scientific Writing	2 hours
GB 770 Graduate Research Seminar (2 hrs. credit, 2 hrs. non-credit)	2 hours
GB 890 Thesis, MS	5 hours
Electives above 500 level (may include no more than 7 hrs of Research)	18 hours
Total	30 hours

Master of Science (M.S.)(Non-thesis)

(Effective Fall 2016)

The M.S. (Non-thesis) in Biological Sciences will emphasize broad graduate training, designed to educate and train students with specific professional goals. As such, a restrictive curriculum will not be specified. Instead, individualized programs will be designed according to the needs and career objectives of the individual student, in consultation with the student and Department faculty members with expertise in the chosen area of study. The program of study must be approved by both the student's major advisor and by the Graduate Coordinator. The M.S. (Non-thesis) program will require 35 hours of course work (in addition to 2 hours of Biology Seminar

GB 771) and an oral examination. The M.S. (Non-thesis) program requires GB 750 Research Design and Analysis and GB 752 Scientific Writing. A maximum of 6 hours of research or internship and research combined may be counted toward the 35 hours. Up to nine hours of approved graduate course work outside the department may be accepted towards the graduate course work requirements. At least 60% of graduate credit hours need be 700-level or above.

All students enrolled in the M.S. (Non-thesis) program must select an exam committee of at least three faculty members that will administer the oral examination. If the student fails the exam on the first attempt, a second attempt must be made the following semester (including summer semesters). Failing the comprehensive oral exam a second time will require a formal petition for a third attempt. Denial of the petition will result in dismissal from the program.

Required Courses

GB 750 Research Design and Analysis	3 hours
GB 752 Scientific Writing	2 hours
GB 770 Graduate Research Seminar	2 hours
GB 771 Biology Seminar (2 hrs non-credit)	0 hours
Electives above 500 level (may include no more than 6 hrs of Research and Internship)	28 hours
Total Hours	35 hours

Master of Arts Degree, Biology

The M.A. in Biological Sciences emphasizes broad graduate training, designed to educate and train students with specific professional goals. As such, a restrictive curriculum will not be specified. Instead, individualized programs will be designed according to the needs and career objectives of the individual student, in consultation with the student and Department faculty members with expertise in the chosen area of study. The program of study must be approved by both the student's major advisor and by the Graduate Coordinator. The M.A. program requires 35 hours of course work and an oral examination. A maximum of 6 hours of research may be counted toward the 35 hours. Up to nine hours of approved graduate course work outside the department may be accepted towards the graduate course work requirements.

All students enrolled in the M.A. program must select an exam committee of at least three faculty members who will administer the oral examination. If the student fails the exam on the first attempt, a second attempt must be made the following semester (including summer semesters). Failing the comprehensive oral exam a second time will require a formal petition for a third attempt. Denial of the petition will result in dismissal from the program.

Master of Science in Forensic Science Criminalistics Concentration

Admission Requirements

Students who plan to do graduate work in the MSFS concentration should have an adequate background of undergraduate courses suitable to the area of forensic science in which they are interested. If such a background is lacking or incomplete, the student may be asked to make up these deficiencies in addition to pursuing the normal graduate program. Students are required to have taken a minimum of one semester of general biology or equivalent and one

semester of general chemistry or equivalent. Each student's academic background will be considered by the admissions committee on an individual basis. A minimum undergraduate GPA of a 3.0 is required for admission. Students with lower GPAs may be considered on a case-by-case basis, but may be admitted to the program on probation.

Required Courses

FO 702 Biological and Physical Evidence	3 hours
FO 710 Forensic Microscopy	3 hours
FO 711 Forensic Microscopy Laboratory	2 hours
FO 770 Graduate Research Seminar	1-2 hours
FO 771 Forensic Science Seminar	1-2 hours
FO 850 Molecular Techniques for Forensic Science	3 hours
Electives at or above the 500 level	19 hours

2 of the following (total 6 hours)

FO 803 Current Research in Forensic Science	3 hours
FO 809 Graduate Project in Forensic Science	3 hours
FO 886 Internship: Forensic Science	3 hours
FO 890 Thesis, MSFS	1-6 hours

Total Hours for M.S. in Forensic Science **40 hours**

Master of Science in Forensic Science- Biology or Chemistry Concentration

Admissions Requirements

Students wishing to pursue the MSFS – Biology concentration must have an undergraduate degree in a natural or forensic science with relevant background courses suitable to the area of study in which they are interested. If such a background is lacking or incomplete, the student may be asked to make up these deficiencies in addition to pursuing the normal graduate program. **Students must have taken Quantitative Analysis or equivalent before they are allowed to take CH 777 or CH 779.** A minimum undergraduate GPA of a 3.0 is required for admission. Students with lower GPAs may be considered on a case-by-case basis, but may be admitted to the program on probation.

Master of Science in Forensic Science Biology Concentration

Required Courses

	Hours
FO 702 Biological and Physical Evidence	3 hours
FO 770 Graduate Research Seminar	1-2 hours
FO 771 Forensic Science Seminar	1-2 hours
FO 850 Molecular Techniques for Forensic Science	3 hours
Electives at or above the 500 level	27 hours

At least 1 of the following:

FO 803 Current Research in Forensic Science	3 hours
FO 809 Graduate Project in Forensic Science	1-6 hours
FO 886 Internship: Forensic Science	3 hours
FO 890 Thesis, MSFS	1-6 hours

BUSINESS ADMINISTRATION

Web: <http://www.emporia.edu/business/>

Phone: 620-341-5685

Ed Bashaw, Dean
Joyce Zhou, Chair

Graduate Faculty:

Professors: Ed Bashaw, Dipak Ghosh, Kevin Johnson, Jun Yu.

Associate Professors: Marc Fusaro, Shawn Keough, Marian Riedy, Joyce Zhou.

Assistant Professors: Antonina Bauman, Geetha S. Lakshmikanth, Steven Lovett, Jeffrey Muldoon.

MASTER OF BUSINESS ADMINISTRATION (MBA)

Admission Requirements

1. Bachelor's degree from a regionally accredited (or equivalent) college or university.
2. Minimum GPA of 2.65 GPA or higher (4.0 system) cumulative or in the last 60 semester hours of study.
3. Meet the formula of $200 \times \text{undergraduate GPA} + \text{GMAT score} = 1050$ or higher (or equivalent GRE scores).

Exempt from GMAT if:

- Bachelor's degree in business from a regionally-accredited (or equivalent) college or university with 3.5 GPA or higher
- Master's degree from a regionally-accredited (or equivalent) college or university, regardless of field.
- 3 or more years of leadership/managerial experience (with resume submitted).

Additional Information for Selected Applicants:

For MBA-Accounting Concentration: Transcript must demonstrate completion of required accounting background courses or these will be additional requirements to complete the program.

For non-business majors: Program requirements include two additional, foundational courses (AC 773 Foundations of Accounting and Finance and BU 773 Foundations of Economics and Statistics).

Requirements for Degree Candidacy

- a. Must have an overall 3.0 GPA to graduate.
- b. Allow no more than two "Cs" in courses taken at the 800-level. Note: students must earn a minimum of a "B" in all 500-level courses.
- c. Allow no more than one "C" and one "D/F" in courses taken; the course with a "D/F" grade must be retaken and replaced with a minimum "B" grade to meet the previous standards.

Students who earn a second "D" or "F" will be dismissed from the program. Students who earn a second "C" in the same course or a second "D" or "F" in any course will be dismissed from the program.

- d. Students who fall below these standards will be automatically dismissed from the program. Students who have been dismissed from the program may submit a written petition for reinstatement to the MBA Committee. As part of the reinstatement petitioning process, the MBA Committee reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and few students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the MBA Committee's discretion and must meet reinstatement conditions as determined by the MBA Committee. Students not achieving the probationary or reinstatement conditions will be automatically dismissed from the program without recourse. The decision of the MBA Committee is final.

Background Competency Requirements

Background - All MBA students must have a background in the following areas prior to enrolling in courses for which the background is necessary.

- A. Accounting (including Financial and Managerial)
- B. Business Law (United States)*
- C. College Algebra (or equivalent)
- D. Computing
- E. Economics (including Micro and Macro)
- F. Finance
- G. Statistics

*This requirement may be met by taking an undergraduate- or graduate-level law course approved by the MBA Director.

Some or all of the background requirements may be met through academic credit or professional experience. Students otherwise admitted may take any course for which they have met the background requirement.

MBA ACCOUNTING CONCENTRATION

The MBA Program provides an optional accounting concentration. This concentration is for those interested in fulfilling the 150-hour admission requirement for the Uniform CPA Examination and for those interested in developing a more in-depth background in accounting.

Admission Requirements

Applicants must meet the admission and degree candidacy requirements listed previously.

Background Competency Requirements

In addition to Background Requirements (A) - (G) listed above, MBA Accounting Concentration students must have a minimum of a "C" grade in the following areas prior to enrolling in the accounting courses for which the background is necessary.

H. Intermediate Financial Accounting

I. Cost Accounting

J. Income Taxation

K. Auditing

L. Accounting Information Systems

Some or all of the background requirements may be met through academic credit or professional experience.

*Students interested in sitting for the CPA Examination in Kansas must have two courses in business law, a course in accounting systems, and eleven hours in written and/or oral communications.

COUNSELOR EDUCATION

Web: <http://www.emporia.edu/ce/>

Phone: 620-341-5220

Chair: Katrina Miller

Graduate Faculty:

Professors: Katrina Miller, Gaelynn P. Wolf Bordonaro.

Associate Professors: Damara Paris.

Assistant Professors: Carrie Boettcher, Brittany Dennis, Basil Kessler, Libby Schmanke.

Instructors: Alice Hinck, Mike McEchron.

The Department of Counselor Education offers graduate studies leading to the Master of Science degrees in Art Therapy Counseling, Clinical Counseling, Rehabilitation Counseling, and School Counseling. There is also a shared curriculum option in Art Therapy Counseling and Clinical Counseling resulting in an M.S. in Art Therapy Counseling and an M.S. in Clinical Counseling.

The department, which is housed in The Earl Center, 1601 State St., has a professional counseling clinic which includes digital audio-visual recording technology, individual and group counseling rooms, and an electronic health recordkeeping system all essential to the preparation of counselors in a global society.

Complete applications to Counselor Education are reviewed by an internal faculty committee. If selected for interview, applicants will meet with the committee on campus, by teleconference, or by videoconference. Applicants are notified of the committee's decision within two weeks of the interview.

Degree Candidacy Requirements

Candidacy is the formal approval for pursuit of the master's degree after it is determined that all specified criteria have been met. Upon completion of six to twelve credit-hours, students should make application for Degree Candidacy through their advisor. Requirements for degree candidacy are as follows:

Degree plan filed through student's advisor.
Maintain a B average with no grade lower than B in core courses.

Graduation Requirements

In order to receive a master's degree from this department the student must accomplish the following:

1. Complete an approved program of study as developed and approved by the assigned faculty advisor.
2. Apply for Degree Candidacy.
3. Pass a written comprehensive examination (taken during the final semester of enrollment). Art Therapy Counseling students complete either a Master's Project or Thesis and do not complete comprehensive examinations. Comprehensive examinations are coordinated by the department's administrative assistant. Therefore, students need to sign-up for this examination during their final semester of internship. An alternative to the comprehensive examination is completion of a master's level thesis. Students pursuing the dual curriculum in Art Therapy Counseling and Clinical Counseling have to complete the comprehensive examination for Clinical Counseling and either the Masters Project or Thesis for the Art Therapy degree requirements.

4. Complete an Intent to Graduate Form (submit to the Graduate office).

ART THERAPY MASTER'S DEGREE OPTIONS

The purpose of the art therapy program is to prepare professional art therapists. There are three options available to applicants:

1. A 60 credit hour Master of Science in Art Therapy Counseling;
2. A 90 credit hour, dual curriculum culminating in two master's degrees: the Master of Science in Art Therapy Counseling, and the Master of Science in Clinical Counseling; or,
3. A 90 credit hour, dual curriculum culminating in two master's degrees: the Master of Science in Art Therapy Counseling, and the Master of Science in Clinical Psychology.
4. A 30-credit hour Master of Science in Art Therapy (Post Master's MS) for those who already hold master's degree in a mental health field.

Applicants pursuing the dual curriculum option in Art Therapy Counseling and Clinical Counseling/Clinical Psychology must make application to each program separately.

ART THERAPY COUNSELING MASTER'S DEGREE ADMISSION REQUIREMENTS

Persons wishing to pursue a master's degree in Art Therapy Counseling are required to make application through the Graduate School prior to being admitted by the department. Applicants should complete all of the necessary admission requirements prior to their initial enrollment in courses.

An admissions committee composed of faculty members will consider the following criteria in deciding whether or not to recommend an applicant for admission:

1. Completed graduate school application online, at the Graduate School website;
2. Official transcripts showing earned BS, BA, BFA, or BSE degree;
3. Undergraduate Grade Point Average (GPA) of 3.0 or higher on a 4.0 point scale or a 3.25 on the last 60 semester hours, and/or graduate GPA of 3.0 or higher;
4. Writing style and content of program application;
5. Education and employment history: Please mention any volunteer or work experience with special populations in online application;
6. Three (3) references, at least one (1) from a current or former psychology professor. Reference forms are available at the Graduate School website, however, letters are preferred;
7. Interviews with faculty may be requested. Interviews may be conducted in person or via distance technology.
8. Completed Art Therapy Counseling program application, available at the Graduate School website or by contacting the Department at 620-341-5220;
9. Applicants interested in the dual program with Clinical Counseling or Psychology must complete a separate application available at the Graduate School website.

10. Graduate Record Examination (GRE) with a target score of 300 (verbal and quantitative);
11. Prerequisite of 12 semester hours of psychology to include Abnormal Psychology and Developmental Psychology;
12. 18 credit hours of studio art coursework; and,
13. Electronic portfolio with 15-20 examples of artwork demonstrating competence with a range of media.

All qualified applicants to Counselor Education receive equal consideration for admission, regardless of race, ethnicity, color, national origin, sex, gender, familial or parental status, marital status, sexual orientation or identity, religious or non-religious beliefs, age, disability, military or veteran status, or socioeconomic status. ESU provides accommodations to applicants with disabilities, as requested from the Office of Student Accessibility & Support Services. People of color and persons with disabilities are encouraged to apply.

Advisor Approved Elective	3 hours

Total for Non-thesis

60 hours

Students must complete the art therapy and counselor education courses with a "B" grade or better.

Direct art therapy experience under AT-R supervision is required in Art Therapy Internship. The combined experience must total at least 750 supervised hours of internship, which may be divided over two or more semesters at approved sites. Internship often begins Spring or Summer semester of the first year. Students are required to work with at least two different populations for a minimum of 100 hours. A student must be a degree candidate before enrolling in internship.

Length of Program

The M.S. in Art Therapy Counseling is designed to be completed in two academic years including summer internship however, part-time study is possible, which will increase the length of the program. Students with background deficiencies and those beginning the program in the spring semester should plan for extra time to complete degree requirements.

OPTIONS

- 1) Because the curriculum parallels that of a Master of Science in Clinical Psychology and Master of Science in Clinical Counseling, students may choose to complete the additional hours and internship for a second master's degree.
- 2) Additional education hours and student teaching may also qualify students for postgraduate teacher licensure in Art Education or Special Education with the state of Kansas.
- 3) The post-master's Master of Science in Art Therapy is designed for professionals already holding a master's degree in a related, master's – licensed field such as social work or counseling who would like to pursue a dual identity as an art therapist.

MS DEGREE, ART THERAPY (POST MASTER'S)

Prerequisites: In addition to the prerequisites listed above, applicants must have earned their graduate degree in a mental health field (Social Work, Psychology, Clinical Counseling, Marriage and Family Therapy) within the past seven years OR have an active state license in their field.

CLINICAL COUNSELING MASTER'S DEGREE OPTIONS

The purpose of the clinical counseling program is to prepare counselors to serve individuals and families experiencing a range of social justice and wellness concerns. There are three areas of study:

1. Addiction Counseling;
2. Clinical Mental Health Counseling; and,
3. Clinical Rehabilitation Counseling.

Students entering the Clinical Counseling program must select only one of these concentrations. Each concentration meets Kansas state licensing requirements. Additionally, program graduates are eligible to apply for national credentialing.

Applicants pursuing the dual curriculum option in Art Therapy Counseling and Clinical Counseling must make application to each program separately.

CLINICAL COUNSELING MASTER'S DEGREE ADMISSION REQUIREMENTS

Persons wishing to pursue a master's degree in Clinical Counseling are required to make application through the Graduate School in addition to being admitted by the department. Applicants should complete all of the necessary admission requirements prior to their initial enrollment in courses.

An admissions committee composed of faculty members will consider the following criteria in deciding whether or not to recommend an applicant for admission:

4. Completed graduate school application online, at the Graduate School website;
5. Official transcripts showing earned BS, BA, BFA, or BSE degree;
6. Undergraduate Grade Point Average (GPA) of 3.0 or higher on a 4.0 point scale or a 3.25 on the last 60 semester hours, and/or graduate GPA of 3.0 or higher;
7. Writing style and content of program application;
8. Education and employment history: Please mention any volunteer or work experience with special populations in online application;
9. Three (3) references, at least one (1) from a current or former supervisor if relevant. Reference forms are available at the Graduate School website, however, letters are preferred;
10. Interview with faculty. Interviews may be conducted in person or via distance technology;
11. Completed Clinical Counseling graduate student application, available at the Graduate School website or by contacting the Department at 620-341-5220; and,
12. Prerequisite of, or concurrent enrollment in, Abnormal Psychology.

Additional admissions requirements for dual curriculum Art Therapy Counseling and Clinical Counseling applicants:

1. Completed Art Therapy Counseling graduate student application, available at the Graduate School website or by contacting the Department at 620-341-5220
2. Graduate Record Examination (GRE) with a target score of 300 (verbal and quantitative);
3. Prerequisite of 18 semester hours of psychology to include Abnormal Psychology and Developmental Psychology;
4. 18 hours of studio art coursework; and,
5. Electronic portfolio with 15-20 examples of artwork demonstrating competence with a range of media.

All qualified applicants to Counselor Education receive equal consideration for admission, regardless of race, ethnicity, color, national origin, sex, gender, familial or parental status, marital status, sexual orientation or identity, religious or non-religious beliefs, age, disability, military or veteran status, or socioeconomic status. ESU provides accommodations to applicants with disabilities, as requested from the Student Accessibility and Support Services. People of color and persons with disabilities are encouraged to apply.

M. S. DEGREE, CLINICAL COUNSELING

The purpose of the Clinical Counseling program is to prepare counselors to work in various addictions and mental health. **The program is one of four Clinical Counseling programs in Kansas accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).**

The Counseling Internship

Interns will complete a 600 clock hour experience at a site or sites that offer opportunities for working with individuals served by institutions and agencies offering various addictions or mental health counseling services. The intern will engage in both individual and group counseling, and a variety of related activities that a regularly employed staff member in the setting would be expected to perform.

REHABILITATION COUNSELING

The purpose of the program is to prepare masters level rehabilitation counselors to work in a variety of rehabilitation settings, including public rehabilitation agencies, community based rehabilitation programs, correctional programs, alcohol and drug programs, independent living centers, employee assistance programs, educational settings, school to work transition programs, life-care planning programs, halfway houses, and group homes. Rehabilitation counselors provide or coordinate functional assessments; expert testimony; individual, group, and family counseling, vocational/career counseling, job development and placement; medical services; educational training; and follow-along services. Graduates are eligible for national rehabilitation counselor certification (CRC). **The program is the only one of its type in Kansas, and it is nationally accredited by the Rehabilitation Counseling is a 48-credit, fully online masters degree.**

Each student follows the same core curriculum. The unique academic background and work experience of each student is taken into account in planning a program of study. All programs require 100 hours of practicum experience and 600 hours of supervised internship experience working with persons with disabilities. Students will be required to pass the CRC examination or pass a written comprehensive examination.

Admission Requirements for the M.S. degree in Rehabilitation Counseling

- 1) Complete Graduate School Application.
- 2) Complete Department of Counselor Education Graduate Student Application. Available on the Graduate School website, or by contacting the Department at 620-341-5220.
- 3) An overall grade-point average of 3.00 on a four-point scale or a 3.25 on the last 60 semester hours for the undergraduate degree.
- 4) Three letters of recommendation. If you are employed, a reference from your current or recent employer/supervisor is desired.
- 5) Graduate Record Examination (280verbal and math) or Miller Analogies Test (40).
- 6) A B.S., B.A., B.F.A., or B.S.E. degree.
- 7) An online application (located on the Graduate School website) that responds to the following areas: Factors in your personal and professional background and experience that have led you to seek an advanced degree in rehabilitation counseling, your professional goals, the type of work setting and the client population with whom you desire to work after graduation, and the kind of person you believe yourself to be (personal qualities or characteristics).
- 8) Personal interview with rehabilitation counseling faculty.

SCHOOL COUNSELING MASTER'S DEGREE OPTIONS

The purpose of the school counseling program is to prepare counselors to provide support services at the elementary, middle and/or high school levels. There are three ways to enter the school counseling program:

1. Applicants holding a Professional teaching license in accord with school counselor licensure requirements in Kansas;
2. Applicants who have a degree in a counseling-related field discipline who enroll in the Restricted Licensure program; or,
3. Direct Entry (formerly) Parallel Pathways) is an initiative developed by the Kansas State Department of Education. The requirements of teaching license and one year of teaching experience are waived under this legislation, allowing applicants with a bachelor's degree in another discipline to enter a master's program in School Counseling. Additional requirements Direct Entry Candidates must complete an additional 70 clock hours of field experience in schools to meet KSDE School Counselor license requirements. Completion will be prearranged with program faculty to occur during enrollment in program coursework.

SCHOOL COUNSELING MASTER'S DEGREE ADMISSION REQUIREMENTS

Persons wishing to pursue a master's degree in School Counseling are required to make application through the Graduate School in addition to being admitted by the department. Applicants should complete all of the necessary admission requirements prior to their initial enrollment in courses.

An admissions committee composed of faculty members will consider the following criteria in deciding whether or not to recommend an applicant for admission:

1. Complete Graduate School Application online, at the Graduate School website.
2. Official transcripts showing earned BS, BA, BFA, or BSE degree;
3. Undergraduate Grade-Point Average (GPA) of 3.0 or higher on a 4.0 point scale or a 3.24 on the last 60 semester hours, and/or graduate GPA of 3.0 or higher;
4. Writing style and content of program application;

5. Education and employment history: Please mention any volunteer or work experience with special populations in online applications;
6. Three (3) references, at least one (1) from a current or former supervisor if relevant. Reference forms are available at the Graduate School website, however letters are preferred;
7. Interview with faculty. Interviews may be conducted in person or via distance technology.
8. Completed School Counseling graduate student application, available at the Graduate School website or by contacting the Department at 620-341-5220;
9. A writing sample to be completed at time of interview.

All qualified applicants to Counselor Education receive equal consideration for admission, regardless of race, ethnicity, color, national origin, sex, gender, familial or parental status, marital status, sexual orientation or identity, religious or non-religious beliefs, age, disability, military or veteran status, or socioeconomic status. ESU provides accommodations to applicants with disabilities, as request from the Student Accessibility and Support Services. People of color and persons with disabilities are encouraged to apply.

Procedure for Teacher Licensure

Upon completion of the requirements, the student is responsible for applying for licensure by contacting the Certification Office of Emporia State University. The Certification Officer then recommends to the Kansas State Department of Education that the student be endorsed in the appropriate area as a teacher of learners with behavior disorders, learning disabilities, mental retardation, or gifts and talents.

The department will recommend a student for full licensure when all the requirements for the program have been completed. A grade of B or better must be earned in both practicum courses to receive a recommendation.

The program is one of only two CACREP (Council for the Accreditation of Counseling and Related Educational Programs) accredited School Counseling programs in Kansas.

ELEMENTARY EDUCATION/EARLY CHILDHOOD/SPECIAL EDUCATION

Web: <http://www.emporia.edu/teach/elecse/>

Phone: 620-341-5445

Jerry Liss, Interim Chair

Graduate Faculty

Professor: Marjorie Bock, Geraldine Coffman, Elizabeth S. Dobler Lawrence Lyman, Connie Phelps, Carol Russell, Nancy L. Smith, Scott D. Waters,

Associate Professors: Karen Bates, Heather Caswell, Sonja Ezell, Deborah Larson, Jerald M. Liss, Jennie Long, Lori Mann, Kelly O'Neal-Hixson, Melissa Reed.

Assistant Professors: Catherine Ayantoye, Mari Caballero, Tiffany Hill, Teddy Roop, Sara Schwerdtfeger.

Instructors: Sarah Arthur, Lendi Bland, Nelda Epp, Melissa Gerleman, Lindsey Razafsky, Ashley Udell.

Graduate Programs

The Department of Elementary Education/Early Childhood/Special Education offers graduate work leading to an Instructional Specialist degree with concentrations in Reading Specialist PK-12/Elementary Content/Elementary STEM, a master's degree in Early Childhood Unified Education (Birth to Age 8 or Birth to K), and a master's degree in special education (high incidence or gifted, talented, and creative).

The Instructional Specialist degree is intended for the teaching practitioner in settings from early childhood through adolescence and young adulthood (EC-YA). The candidate will learn to deal more effectively with diverse candidate learners and move from theory to best practice in the field. The candidate may choose from areas of concentration that include Reading Specialist PK-12, Elementary Content, and Elementary STEM. Licensure is also available in Reading Specialist.

The graduate program in Early Childhood Unified is designed to prepare teachers to work effectively with young children in early childhood settings that are inclusive or non-inclusive, as well as teachers working with young children in early childhood special education settings; and to meet the challenges of the present and the future. Current federal mandates and trends in public schools recognize the growing importance of early childhood special education services for children from birth through age 8 and their families. Teachers with advanced training in their field will be in a favored position to usher in best practices for young children. There is an emphasis on early intervention and serving families with infants with special needs. The Master of Science degree in Early Childhood Education may result in the Kansas License ECU Birth through age 8 or the Kansas License ECU Birth to Kindergarten. The Master of Science degree in Early Childhood may result in the Kansas License Endorsement ECU Birth through age 8 (B-8) or the Kansas License ECU Birth to Kindergarten (B-K). An admission requirement for the ECU B-8 program is that the

candidate must hold a current license in elementary education. An admission requirement for the ECU B-K program include that the candidate hold a degree in a related field but does not hold a license in elementary education.

The graduate program in Special Education is dedicated to improving the lives of children and youth with special needs – children and youth with high incidence disabilities and/or children and youth who are gifted, talented, and creative. Both programs have a 24 credit hour endorsement program and a 36 credit hour master's degree. The curriculum of each program meets the endorsement standards for Early Childhood through Late Childhood (Grades K to 6) and Early Adolescence through Late Adolescence (Grades 6 to 12).

MASTER OF SCIENCE ELEMENTARY EDUCATION

Admission Requirements

Candidates must follow the graduate degree procedures of the Department of Elementary Education/Early Childhood/Special Education and the Graduate School. The departmental requirements for admission include the following:

- GPA of 3.0 on the last 60 hours of college course work for those completing a masters degree or 3.0 on the last 30 graduate hours from a previously completed masters program.
- Official transcripts of all college work, including Praxis scores, etc.
- Two references from supervisors or individuals who have had the responsibility of evaluating your academic or professional performance.
- Two Advance Candidate Assessment of Disposition Assessments
- Completed Disposition Form
- Signed disclosure form
- Faculty Evaluation and/or Personal Interview (prerogative of admissions committee).
- Current copy of teaching license. If the individual does not currently hold a teaching license, there will be a two-year waiting period between the completion of the last degree program and consideration for admissions into the master program.

Additional information regarding any of the stated criteria is available upon request. Candidates are urged to begin immediately to make arrangements or complete details to gain degree candidacy. APPLICANTS FOR ADMISSION TO DEGREE CANDIDACY MUST HAVE ALL REQUIREMENTS COMPLETED.

Admission and Retention Policies

Knowledge and compliance with the requirements for any graduate degree are primarily the responsibility of the candidate. Consequently, careful reading and study of the Graduate Policy Handbook should be a self-imposed prerequisite for all candidates applying for admission to graduate study. The Graduate Policy Handbook is available online at www.emporia.edu/grad/docs/policyhandbook.pdf.

Application for admission must be made on a form provided by the Graduate School. Official transcripts of all college credit must be supplied. (Transcripts must include the baccalaureate degree and all transfer credit that is to be applied to the master's degree.)

Upon satisfactory completion of the graduate school and departmental admission requirements, the candidate will be admitted to the program of the degree being sought and will be assigned an advisor. Candidates shall continuously demonstrate personal characteristics appropriate to the profession and maintain a 3.0 GPA or better throughout their program.

Time Requirements

All work must be completed within a seven-year period. The seven-year period begins with the semester in which the first course applied to the degree was taken.

Degree Requirements

Master Elementary Education degree requires the completion of 33 graduate hours.

MASTER OF SCIENCE – INSTRUCTIONAL SPECIALIST

Degree Procedures and Requirements

Candidates must follow the graduate degree procedures of the Department of Elementary Education/Early Childhood/Special Education and the Graduate School. The departmental requirements for admission include the following:

- Minimum of 3.0 GPA on last 60 hours
- Copy of Teaching License (Reading Licensure program)
- Two References
- Two Advanced Candidate Assessment of Dispositions
- Disposition Statement

Additional information regarding any of the stated criteria is available upon request. Candidates are urged to begin immediately to make arrangements or complete details to gain degree candidacy. **APPLICANTS FOR ADMISSION TO DEGREE CANDIDACY MUST HAVE ALL REQUIREMENTS COMPLETED.**

Admission and Retention Policies

Knowledge and compliance with the requirements for any graduate degree are primarily the responsibility of the candidate. Consequently, careful reading and study of the Graduate Policy Handbook should be a self-imposed prerequisite for all candidates applying for admission to graduate study. The Graduate Policy Handbook is available online at www.emporia.edu/grad/docs/policyhandbook.pdf.

Application for admission must be made on a form provided by the Graduate School. Official transcripts of all college credit must be supplied. (Transcripts must include the baccalaureate degree and all transfer credit that is to be applied to the master's degree.)

Upon satisfactory completion of the graduate school and departmental admission requirements, the candidate will be admitted to the program of the degree being sought and will be assigned an advisor. Candidates shall continuously demonstrate personal characteristics appropriate to the profession and maintain a 3.0 GPA or better throughout their program.

Time Requirements

All work must be completed within a seven-year period. The seven-year period begins with the semester in which the first course applied to the degree was taken.

Degree Requirements

Master Instructional Specialist degrees requires the completion of 35 graduate hours.

If courses listed below were taken as an undergraduate, they must be replaced by additional advisor-approved advanced electives.

MASTER OF SCIENCE – INSTRUCTIONAL SPECIALIST – ELEMENTARY CONTENT CONCENTRATION

The Instructional Specialist program is intended for the teaching practitioner in settings from early childhood through adolescence and young adulthood. A candidate for this program is typically an educator that intends to remain in a general education classroom or work as an instructional specialist/team leader in the school setting. The candidate will learn to deal more effectively with diverse student learners and move from theory to best practice in the field. The Elementary Content concentration is designed for educators who wish to improve their teaching, management, and assessment skills. A capstone project will be completed during EL829, Leadership and Coaching Practicum.

Introductory Core Courses (17 hours)

EL 751	Applications of Developmental Theories	3 hours
EL 810	Information Literacy	3 hours
EL 725	Differentiating Instruction	2 hours
EL 828	Instructional Leadership and Coaching	2 hours
ED/EL 892	Teaching/Learning Models	3 hours
ER 752	Analysis of Research	3 hours
EL 829	Leadership and Coaching Practicum	<u>1 hour</u>
Total		17 hours

Concentration (12 hours)

Student choice (from other strands)	6 hours	
EL 802	Best Practices in Elementary Math	3 hours
EL 803	Best Practices in Elementary Science	<u>3 hours</u>
Total	12 hours	

Electives (6 hours)

Possible electives: EL 821, EL 854, EL 801, EL 804, ED 837, EL 815, EL 759, ED 837, EL 750 (or other advisor approved course)

Total Electives **6 hours**

Total Hours For Degree **35 hours**

ELEMENTARY STEM CERTIFICATE

Core Courses (12 hours)

EL 726	Elementary Engineering and Robotics	3 hours
EL 784	Trends in Elementary STEM Education	3 hours
EL 802	Best Practice in Elementary Mathematics	3 hours
EL 803	Best Practice in Elementary Science	3 hours
Total Required hours:		12 hours

Other Considerations:

- Entry points each semester (fall, spring, summer)
- Credits may be applied toward graduate degree programs in various Teachers College departments pending advisor approval.
- No more than 3 credit hours of transfer work from another institution or program for required casework may be considered.

MASTER OF SCIENCE – INSTRUCTIONAL SPECIALIST – READING SPECIALIST K-12 CONCENTRATION

The Instructional Specialist Reading, a program based on the International Reading Association standards, is intended for the teaching practitioner in settings from early childhood through adolescence and young adulthood. The candidate will learn to deal more effectively with diverse learners and move from theory to best practice in the field. The Reading Specialist PK-12 serves practicing teachers, elementary or secondary, who wish to acquire initial reading specialist licensure with a master's degree in Kansas.

The Master's Degree does not require Kansas state licensure completion and is open to out-of-state applicants. A capstone project will be completed during EL829, Leadership & Coaching Practicum.

Introductory Core Courses (17 hours)

EL 751	Applications of Developmental Theories	3 hours
EL 810	Information Literacy	3 hours
EL 725	Differentiating Instruction	2 hours
EL 828	Instructional Leadership and coaching	2 hours
ED/EL 892	Teaching/Learning Models	3 hours
ER 752	Analysis of Research	3 hours
EL 829	Leadership/Coaching Practicum	1 hour

Concentration (12 hours)

EL 721	Reading Theory and Literacy Practices: Elementary	3 hours
EL 723	Reading Theory and Literacy Practices: Secondary	3 hours
EL 823	Analysis of Reading Assessment and Instruction I	3 hours
EL 825	Analysis of Reading Assessment and Instruction II	3 hours

*Electives (6 hours)

The candidate, with assistance and approval from the advisor, will select 6 additional credits of electives. *To apply for the Kansas Professional Reading Specialist License, candidates must include the following hours in their elective choices:

EL 821	Curriculum and Standards in the Literacy Environment	1 hour
EL 827	Assessing and Instructing Learners	3 hours
EL 854	Action Research in the Classroom	2 hours

Total Hours **35 hours**

Reading Specialist Licensure Only

Application for admission as a non-degree seeking candidate must be made on a form provided by the Graduate School. Licensure only is for candidates who have already completed a master's degree which is related and acceptable (as determined by the department program committee). Minimum of 3.0 GPA on last 60 hours, as evidenced by official transcripts.

Courses are listed in preferred sequence.

EL 721	Reading Theory and Literacy Practices: Elementary	3 hours
EL 723	Reading Theory and Literacy Practices: Secondary	3 hours
EL 821	Curriculum and Standards in the Literacy Environment	1 hour
EL 823	Analysis of Reading Assessment and Instruction I	3 hours
EL 825	Analysis of Reading Assessment and Instruction II	3 hours
EL 827	Assessing and Instructing Learners	3 hours
EL 828	Instructional Leadership and Coaching	2 hours
EL 829	Leadership and coaching Practicum	1 hour
Total Hours		19 hours

MASTER OF SCIENCE – INSTRUCTIONAL SPECIALIST – ELEMENTARY STEM CONCENTRATION

This 35-credit hour online program is intended for the licensed *K-6 teacher interested in science, technology, engineering, and mathematics (STEM). It is designed to provide the graduate student with coursework including educational foundations and all areas of STEM, with opportunities for customization of the program through STEM electives.

- graduates from this program will develop their:
- content knowledge in STEM fields for grades K-6
- awareness of current trends and opportunities in STEM fields for grades K-6
- teaching skills in STEM fields that engage students in investigation and critical thinking
- coach and leadership skills in order to support teachers

*This program does not lead to a teaching license

Introductory Core Courses (17 hours)

EL 751	Applications of Developmental Theories	3 hours
EL 810	Information Literacy	3 hours
EL 725	Differentiating Instruction	2 hours
EL 828	Instructional Leadership and Coaching	2 hours
ED/EL 892	Teaching/Learning Models	3 hours
ER 752	Analysis of Research	3 hours
EL 829	Leadership and Coaching Practicum	1 hour
Total		17 hours

EL 803	Best Practices in Elementary Science	3 hours
IT 727	Integrating Educational Technology in Teaching	3 hours
EL 726	Elementary Engineering and Robotics	3 hours
EL 802	Best Practices in Elementary Mathematics	3 hours
Total		12 hours

Electives (6 hours)

May take electives from current Elementary Education, Math, Science, Technology, and Literacy classes with advisor approval.

Total Electives	6 hours
Total Hours for Degree	35 hours

MASTER OF SCIENCE -- EARLY CHILDHOOD UNIFIED

Admission/Eligibility Requirements

In addition to the requirements of the Graduate School, a formal letter, with admission requirement material, will be mailed to you. All candidates are admitted on a probationary status, pending successful completion of these admission requirements:

(Admission points are earned based on each item.)

- Minimum of 3.00 GPA on Last 60 hours
- Copy of Teaching License
- Two References
- Two Advanced Candidate Assessment of Dispositions
- Disposition Statement

All materials are due February 15 for summer enrollment, June 1 for fall enrollment or September 1 for spring enrollment.

Degree Candidacy

Candidacy is the formal approval for pursuit of a graduate degree after it is determined that all specified preliminary requirements have been met. Requirements for degree candidacy are as follows:

- 1) The candidate must have met the admission requirements.
- 2) The advisor must have filed the candidate's degree plan with the Graduate School.
- 3) The candidate must have completed at least six hours of course work **but no more than 12 hours of course work** on the graduate program.
- 4) When all steps above are completed (1-3), the advisor will inform the Graduate School, and the candidate will be removed from probation.

Clinical Experiences

There are two Clinical Experiences in the Early Childhood Unified Graduate Program:

CD 841: Center-Based Clinical Experience
CD 861: Home Based Clinical Experience

Each Clinical Experience requires completion of 150 clock hours in an approved center-based program (CD 841) or home-based program (CD 861) over a period of at least five weeks.

Permission to Participate in the Clinical Experiences

Even though students are admitted to degree candidacy, enrollment in the two clinical experiences required in this program is not automatic. Permission from the instructor is required for enrollment in the two clinical experiences. Candidates will be evaluated on knowledge, skills and dispositions required for success in the two clinical experiences, CD 841 and CD 861. Students will be given a copy of the dispositions rating form after acceptance into the program. If a student does not meet expectations, they will not be allowed to enroll in the Clinical Experiences.

Graduation Requirements

In order to receive a master's degree in early childhood education, candidates must accomplish the following:

- 1) Complete the program of study outlined below.
- 2) A grade of B or better must be earned in all Early Childhood courses. This includes prerequisite courses, in order to move forward in the program.
- 3) Maintain at least 3.00 overall grade point average.
- 4) Demonstrate dispositions of professional/ethical standards throughout the program

Degree Requirements

Core Courses (30 hours)	Hours
CD 730 Characteristics of Inclusive Early Childhood Education	3 hours
CD 832 Observation, Assessment and Screening in Inclusive Early Childhood Programs	3 hours
CD 737 Collaboration in Inclusive Early Childhood Programs	3 hours

EARLY CHILDHOOD UNIFIED LICENSURE PROGRAMS (B-K or B-8)**Admission Procedures**

Application for admission as a non-degree-seeking candidate must be made on a form provided by the Graduate School. Minimum of 3.0 GPA on Last 60 hours, as evidenced by official transcripts. A plan of study will be developed with the assistance of an advisor. It is the candidate's responsibility to follow the plan to be certain all requirements for licensure are met.

In addition to the requirements of the Graduate School the following documents must also be submitted:

- Copy of Teaching License
- Two References
- Two Advanced Candidate Assessment of Dispositions
- Disposition Statement

All materials are due March 1st for summer and fall enrollment or September 1st for spring enrollment.

Degree Requirements

Core Courses (30 hours)	Hours
CD 730 Characteristics of Inclusive Early Childhood Education	3 hours
CD 832 Observation, Assessment and Screening in Inclusive Early Childhood Programs	3 hours
CD 838 Advanced Methods of Inclusive Early Childhood Education	3 hours
CD 841 Clinical Experience: Inclusive Early Childhood Practicum: Center Based	3 hours
CD 842 Family Involvement in Inclusive EC Programs	3 hours

CD 861 Clinical Experience: Inclusive Early Childhood Practicum: Home Based	3 hours
CD 865 Capstone: ECU Validation of Teaching Experience B-K/B-8	3 hours
Total Hours for Degree	24 hours

PROCEDURE FOR TEACHER CERTIFICATION (B-K or B-8)

Upon completion of the requirements, the candidate is responsible for applying for licensure by contacting the Teacher Licensing Officer of Emporia State University. The candidate must also pass the Educational Testing Service content exam for Early Childhood Unified. The Teacher Licensing Officer then recommends to the Kansas State Department of Education that the candidate be licensed in the appropriate area.

The department will recommend a candidate for full licensure when all of the requirements for the program have been completed. A grade of B or better must be earned in practicum courses to receive a recommendation.

MASTER'S DEGREE -- SPECIAL EDUCATION**Admissions Requirements**

To gain admission to the High Incidence Concentration and the Gifted, Talented and Creative concentration :

- Minimum of 3.00 GPA on Last 60 hours, as evidenced by official transcripts
- Copy of Teaching License (for the Licensure Program)
- Two References
- Two Advanced Candidate Assessment of Dispositions
- Disposition Statement

If a candidate has previously received a grade of B or better in a required course, the advisor may approve the substitution of graduate level, degree appropriate electives.

All candidates must be accepted into the degree program before starting the first practicum.

Degree Candidacy Requirements

Candidacy is the formal approval for pursuit of the master's degree after it is determined that all specified criteria have been met. Upon completion of no more than twelve hours, candidates should make application through their advisor. Requirements for degree candidacy are as follows:

1. Degree plan filed through candidate's advisor.
2. Maintain a B average with no grade lower than B in core courses is required in all courses for the High Incidence Program.

The candidate must apply for degree candidacy upon completion of at least 6 hours of coursework but no more than 12 hours of course work. A candidate must be a degree candidate before enrolling in thesis or the second practicum.

Other Requirements for Special Education

For applicants who have been denied admission: Before reapplying for a graduate program, an applicant must (1) complete all background deficiencies.

Graduation Requirements

In order to receive a master's degree from this department the candidate must accomplish the following:

1. Complete an approved program of study as developed and approved by your faculty advisor.
2. Be admitted to Degree Candidacy.
3. Complete a Masters Capstone Project (SD 899).
4. Complete an Intent to Graduate Form (submit to the Graduate School).

MASTER'S DEGREE—SPECIAL EDUCATION, HIGH INCIDENCE CONCENTRATION

Required Hours (36 cr. hrs.)	Hours
SD 700* Characteristics of Students with High Incidence Disabilities	3 hours

NOTE: KSDE requires passing score on the Gifted Praxis Examination Gifted, Talented, and Creative Special Education K-6, 6-12, or PK-12 endorsement.

CERTIFICATE IN AUTISTIC SPECTRUM DISORDERS (ASD)

Prerequisites:

Undergraduate degree in a related field of study and admission to the Emporia State Graduate School.

Required courses:

SD 760	Strategies for Candidates with Autism Spectrum Disorders	3 hours
CE 731	Medical Aspects of Disability	3 hours

Elective courses: (6 hours required from the following options or equivalent as approved by faculty advisor)

SD 805	Advanced Behavior Interventions	3 hours
SD 720	Assistive Technology	3 hours
CE 732	Lifespan Development & Disability	3 hours
CE 702*	Behavior Analysis, Art, and Play with the Child with Autism	3 hours
PY 851	Seminar in Behavior Management	3 hours
PY 722	Theories of Learning	3 hours
SD 703	Special Topics in Special Education	1-3 hours
CD 838	Advanced Methods for Inclusive Early Childhood Education	3 hours
EL 751	Application of Developmental Theories	3 hours
CD 842	Family Involvement in Inclusive Early Childhood Programs	3 hours
Elective Courses		6 hours
Total		12 hours

ENGLISH, MODERN LANGUAGES, AND JOURNALISM

English, Modern Languages, and Journalism

Web: <http://www.emporia.edu/emlj>

Phone: 620-341-5216

Kevin Rabas, Chair

Mel Storm, Graduate Advisor

Graduate Faculty

Professors: Kevin Kienholz, Luisa Perez, Kevin Rabas, Rachelle Smith, Mel Storm, and Amy Sage Webb.

Associate Professors: Dan Colson, Max McCoy, Cynthia Patton, and Gregory Robinson.

Assistant Professors: Michael Behrens, Katherine O'Meara, and Rachel Spaulding.

MA English

Like other English graduate programs throughout North America, the MA program in English at ESU is in a state of constant change and continuous improvement. New critical theories and new approaches to the study of texts and languages are being brought to bear on both canonical and non-canonical works, and on the practices of teaching, research, and writing. We in the Department of English, Modern Languages, and Journalism are proud to offer a graduate program in English in which students are encouraged not just to learn about these developments, but to engage with the faculty in the ongoing dialogue that creates and renews our fields of study.

For some of our recent graduates, the MA in English has led to such nationally-ranked PhD programs as those at the University of Illinois at Urbana-Champaign, the University of Michigan, the University of Minnesota, the University of Southern California, and the University of California at Riverside. Other MA graduates have chosen to pursue corporate and government employment, secondary teaching, and teaching in community colleges. ESU's graduate program in English prepares students for this wide range of career paths by combining a flexible, individually-tailored academic program with opportunities for supervised training and experience in the teaching of composition, and for participation alongside faculty in professional conferences and publications.

Through our small classes, careful advising, and strong mentoring relationships, you will become part of a close-knit and active community of teacher-scholars. On behalf of the entire English faculty, I welcome you to our community and urge you to explore all the avenues for intellectual and professional development that graduate study opens to you.

Admissions Requirements

In addition to the general admissions requirements of the Graduate School, candidates for the Master of Arts degree in English should have earned at least a 2.75 overall grade-point average or a 3.0 in the major. Applicants with baccalaureate degrees in fields other than English are given full consideration, although they may be required to take additional course work.

All applicants should submit the following: 1) a letter of application stating the applicant's reasons for requesting admission and their future plans; 2) three letters of recommendation written by persons with knowledge of the candidate's potential for success in graduate school; and 3) a writing sample--a critical research paper from all applicants and, in addition, a creative work or works from applicants pursuing the creative writing emphasis. Applicants should send GRE scores if they are available, but the GRE is not required.

Applicants who have earned degrees at institutions in countries in which English is not the native language must score at least 575 on the TOEFL (Test of English as a Foreign Language) or equivalent. Examination before being admitted to the MA program in English.

Assistantships, Scholarships, and Fellowships

Most of our full-time graduate students finance their studies by holding graduate teaching assistantships, teaching first-year composition while pursuing their own course work. The department regularly supplements the university's teaching assistant stipends with endowed funds.

Courses of Study

Students in the MA program in English may elect to follow one of three courses of study--in literature, creative writing, or community college/high-school teaching. Candidates following the thesis option complete 34 hours of course work, including 4 hours of EG 899, Thesis, MA. Candidates following the non-thesis option complete 33 hours of course work. While some specific courses may be required, depending on the emphasis elected, students must take at least 60% of their course work at the 700- and 800-levels.

Core Requirements

Regardless of the emphasis selected (see below), all graduate students in English take Introduction to Graduate Study (EG 810). Designed to provide the tools and background necessary to undertake scholarly research in English, this course is offered every fall semester.

Beyond EG 810, there are no specific course requirements. However, to ensure a balance of course work, each MA student is required to fulfill an 18-hour area requirement:

Area A: two courses in literature written before 1830,

Area B: two courses in literature written after 1830,

Area C: two courses in language/rhetoric/criticism.

These requirements may be met with a broad variety of courses; specific detailed course descriptions are available each semester before the registration period begins. To complete the remaining course work, students select one of two options:

Option A: 9 hours of elective courses plus a scholarly thesis (4 credit hours), normally 40-50 pages--incorporating significantly more research than customarily expected of a graduate course paper--or a creative thesis (4 credit hours), a minimum of 40 pages, in which the student places the creative portion of their work within a critical or theoretical framework.

OR

Option B: 12 hours of elective courses, plus either

1) an independent research project (minimum length: 20 pages), customarily derived from previous course work;

OR

2) a 20-minute scholarly paper, customarily derived from previous course work, presented to the public.

Portfolio Assessment

At the end of the final term of study, the candidate will submit a portfolio of work, consisting of (1) an introduction to the contents of the portfolio, including the contexts in which each of the pieces was written (class, semester, instructor, course emphases, etc.); (2) a copy of the writing sample submitted upon application to the program; (3) three papers written for courses in the student's MA program, representing, as nearly as possible, the first, middle, and final semesters of coursework; (4) a copy of the final thesis or project paper completed for Option A or Option B; and (5) an analysis of the portfolio's contents.

Literature Emphasis

Candidates following the thesis option complete 34 hours of course work, including 4 hours of EG 899, Thesis, MA. Candidates following the non-thesis option complete 33 hours of course work. While choices are naturally limited by actual course offerings in any given semester, literature MA students may take a broad range of courses in English and American language and literature. To accommodate special interests and needs, up to 6 hours of course work may be taken outside the Department of English, Modern Languages, and Journalism.

Creative Writing Emphasis

Students who wish to pursue the creative writing emphasis must submit a portfolio of original work (at least 10 pages of poetry or 15 pages of fiction) upon application; a creative thesis is written after completion of course work. Students pursuing the creative writing emphasis may take up to 12 hours of creative writing courses.

Rhetoric/Pedagogy Emphasis

Students who wish to pursue careers as community college teachers or who wish to add to their skill as high-school teachers may follow this emphasis, which includes 18 hours of course work in the history and theory of rhetoric and criticism, and in the history and structure of the English language. They may take up to 12 hours of pedagogical courses, 6 of which must be in courses offered in the Department of English, Modern Languages, and Journalism.

Dual Degree in English and Library Information Management

Students may work toward a dual degree in English and in Library Science and apply up to 6 hours from each degree toward the requirements of the other. This program combines the MA degree with a professional degree (MLS), a combination well suited for careers in business, government, and education.

COURSES

Courses numbered 500-699 are generally intended for advanced undergraduates and for graduate students who need more preparation before going on for more specialized study of an author or area. Courses numbered 700-799 are primarily for graduate students, although advanced undergraduates with special interests and appropriate backgrounds may be permitted to enroll, with the written permission of the instructor. Courses numbered 800-899 are for graduate students only.

Certificate: English

Applicants follow the standard procedures for applying to the ESU English Graduate Program. Applications are submitted online through the ESU Graduate School at <http://www.emporia.edu/grad/admissions/>. The statement of purpose and writing sample are waived for applicants who do not intend to pursue a full master's degree. (At 12 hours non-degree-seeking participants who decide they wish to pursue the MA must provide any application materials not already received.)

Requirements for admission:

Candidates for the Graduate Certificate in English should have earned at least a 2.75 overall grade-point average or a 3.0 in the major.

Time limit:

There is a 7-year time limit for completion of the master's degree and certificate from the time the first class is taken.

Curriculum:

Courses must be at the 700 level or above (six hours of coursework at the 500 level may be applied toward the certificate) and must include the following:

Core: Literature before 1830	3 hours
Core: Literature after 1830	3 hours
Core: Language/Rhetoric/Theory/Pedagogy	6 hours
English electives:	6 hours
Total Hours	18 hours

Grades:

No grade lower than a B- may be counted towards the 18-hour Certificate-program requirement.

Transfer Credit:

Up to six (6) hours of English credit may be transferred from an approved/accredited institution of recognized standing if a grade of B or higher was earned in those credits and if the credit was applicable toward a graduate degree at the university at which the course was taken.

Post-Certificate master's work:

For those who wish to continue, the 18 hours of coursework for Certificate will be automatically credited toward the requirements for the MA, thesis or non-thesis option. Participants who decide to seek a master's may apply toward that degree only 12 hours of credit earned before acceptance into the MA program, so the full MA application should be completed by the time 12 hours have been earned. Complete information about the ESU master's degree can be found and downloaded at <https://www.emporia.edu/contentAsset/raw-data/15250535-dd4d-4ae2-ae3b-1837884fd57e/programPdf>.

HEALTH, PHYSICAL EDUCATION AND RECREATION

Web: <http://www.emporia.edu/hper>

Phone: 620-341-5926

Paul Luebbers, Chair
Vicki Worrell, Graduate Advisor

Graduate Faculty

Professors: Joan Brewer, Mike Butler, Paul Luebbers, Mark Stanbrough, Vicki Worrell

Associate Professors: Shawna Shane, Jennifer Thomas

Assistant Professors: Tyler Goad, Sunnin Keosybounheuang, Hannah Kipfer, Keith Pfannenstiel.

The Department of Health, Physical Education, and Recreation offers graduate work leading to the Master of Science degree in HPER for students interested in advancing their education and opportunities in such areas as teaching, health promotion, coaching, and research.

All of the graduate faculty members in the department have completed doctoral degrees. Many of the faculty members are nationally recognized in their fields. The department is housed in a facility which includes smart classrooms, seminar rooms, five gymnasiums, human performance lab, athletic training lab, eight-lane swimming pool and an adaptive pool, 3 handball-racquetball courts, a spin cycle room, a strength and conditioning room, central office suite and dance studio.

Master Degree Program

The master's degree offered through the Department of Health, Physical Education, and Recreation at Emporia State University is completed entirely online. This unique program was the first fully accredited distance learning master's degree program in Health, Physical Education, and Recreation in the United States.

Admission Requirements

The applicant is expected to have an undergraduate degree in health, physical education or recreation or a minimum of 12 undergraduate theory credits representing the same breadth of preparation required for an undergraduate degree at Emporia State University. Students lacking the prerequisites in their undergraduate preparation are required to complete additional courses as prescribed by the advisor and committee.

Persons wishing to pursue a Masters degree in the Department of Health, Physical Education and Recreation are required to be admitted to the Graduate School and to the Department of Health, Physical Education and Recreation. The graduate committee of the department uses the following criteria for assessing whether or not to recommend an applicant for admission to the department:

- Undergraduate GPA (on a 4.0 scale) of 2.5 overall GPA, as well as a 2.75 GPA in the last sixty credits of college work
- Completed graduate application

- Undergraduate professional preparation in health, physical education, recreation (or related field)
- International students must register as an international student

Information, procedures and forms relevant to these criteria may be obtained on the Department of Health, Physical Education and Recreation web site at <http://www.emporia.edu/hper>.

Students may be admitted on probationary status. They remain on probation until the following conditions are met:

1. All deficiencies are removed.
2. Nine credits of graduate study with a grade-point average of B or higher are completed.
3. All requirements specified by the Graduate School are met (degree plan on file).

Degree Candidacy Requirements

All degree candidacy requirements specified by the Graduate School must be met. The student must have completed at least nine credits of course work in the graduate program of study at Emporia State University to be placed into degree candidacy.

Students may not take any more than 9 CREDITS OF GRADUATE CLASSES without being accepted into HPER graduate program.

INSTRUCTIONAL DESIGN AND TECHNOLOGY

Web: <http://idt.emporia.edu>
Phone: 620-341-5829

Dr. Jim Persinger, Interim Chair

Dusti Howell, IDT Program Director
Cathryn Crosby, TESOL Program Coordinator

Professors: Dusti Howell, Janet Holland.

Associate Professors: Zeni Colorado-Resa, Cathryn Crosby, Manjula Shinge

Assistant Professors: Yeol Huh, Dabae Lee, Sungwoong Lee

The Department of Instructional Design and Technology includes the Instructional Design and Technology (IDT) and Teaching English to Speakers of Other Languages (TESOL) programs. Through these programs, the department offers a Master of Science Degree in Instructional Design and Technology, a Graduate Certificate in eLearning and Online Teaching, a Graduate Certificate in Teaching with Technology, a Master of Arts in TESOL, a Graduate Certificate in TESOL, as well as Endorsement/Licensure in English as a Second Language (ESL) at both the undergraduate and graduate levels.

Master of Science in Instructional Design and Technology

The Instructional Design and Technology Department offers a Master of Science Degree in Instructional Design and Technology that is delivered both on-campus and online, or a blend of the two. This degree prepares individuals for leadership in the design, development, and integration of technology and online learning into teaching and/or private sector training.

Individuals obtaining the IDT degree serve as instructional designers/trainers in business, industry, healthcare, military, and post-secondary institutions; charged with training, development, and eLearning programs within their organizations. Others are practicing P-12 educators who wish to improve the quality of curriculum, instruction, and student learning through appropriate integration of technology into the classroom.

Admission Requirements

Persons wishing to pursue a master's degree in the Department of Instructional Design and Technology are required to be admitted to the Graduate School and to the Department of Instructional Design and Technology. The department graduate committee will use the following criteria for assessing whether or not to recommend an applicant for admission to the department.

- Admission to Emporia State University Graduate School.
- Official transcripts of all college work.
- GPA of 2.75 or more based on the 4-point scale in last 60 hours of college course work for those completing a master's degree or in the last 30 graduate hours from a previously completed master's degree.

Only applicants with completed admission packets will be considered. An IDT admissions committee will meet to review admission materials. Those applicants who are not admitted may request that their names be placed on a waiting list for future consideration by the IDT admissions committee.

**Specific requirements available at the department website: <http://www.emporia.edu/teach/idt>*

***Resume and paper may be submitted electronically as an email attachment to gradinfo@emporia.edu*

Degree Candidacy Requirements

Upon satisfactory fulfillment of the admission criteria and completion of the first 6-12 hours, the student will be admitted to candidacy for the degree sought. Candidacy is the formal approval for pursuit of a graduate degree after it is determined that all specified admission criteria have been met. Students are expected to continuously demonstrate personal characteristics appropriate to the profession, maintain a 3.0 GPA or better through their MS program, and file a degree plan with their advisor.

Graduation Requirements

In order to receive a master's degree from this department, students must accomplish the following:

- Complete the program of study outlined below.
- Maintain a B average (a grade lower than a C cannot be used).

Master of Science Degree in Instructional Design and Technology

As part of the degree requirements, students will complete a comprehensive project or thesis. Upon successful completion of program requirements and other requirements outlined in the Graduate Catalogs and on this sheet, the student will be awarded the degree Master of Science in Instructional Design and Technology.

Non-Thesis Option

Required Courses	Hours
IT 700 Foundations of Instructional Design & Technology	3 hours
IT 710 Web Design	3 hours
IT 800 Instructional Design	3 hours

Other considerations:

- Entry points each semester (fall, spring, summer)
- 10 months or less for certificate completion
- Credits may be applied toward graduate degree programs in various Teachers College departments (and beyond).
- No transfer credit will be accepted toward this certificate

Master of Arts in TESOL

The Master of Arts graduate program in **Teaching of English to Speakers of Other Languages (TESOL)** is designed to serve the increasing need for teaching English as a second and/or foreign language nationally at the college and public school levels and internationally in private and public institutions. This program prepares its graduates to fill many jobs in this area and is the first of its kind in the state of Kansas.

The program offers 36 hours of in-depth graduate study in the areas of applied linguistics. Some of the courses offered are TESOL Methodology, Language Assessment and Evaluation, Sociolinguistics, Second Language Acquisition, Cross-cultural Communication, TESOL Research Methods, Computer-Assisted Language Learning in TESOL, Individual Differences in Second Language Learning, Composition Theory and Rhetorics, and Literacy/Reading Theory and Practice.

Admission Requirements

The following are admission requirements for MA TESOL degree seeking students:

- Admission to Emporia State University Graduate School.
- Official transcripts of all college work.
- GPA of 2.75 or more based on the 4-pointing scale in last 60 hours of college course work for those completing a master's degree or in the last 30 graduate hours from a previously completed master's degree.

Degree Candidacy Requirements

Students who have met the admission requirements, submitted an approved degree plan/advisement form, and completed a minimum of six credit hours of course work in the graduate program will be admitted to degree candidacy.

Program Completion Requirements

1. Successful completion of all 21 Core Course credits.
2. Successful completion of all 12 Program Electives credits. **(Students who choose to do the 6-hour thesis will take only 9 credit hours from Program Electives and will NOT take any Open Elective credit hours).**
3. Successful completion of 3 Open Elective credits (unless the candidate chooses the thesis option).
4. Successful completion of the TESOL Content PRAXIS Exam (Code 5362) with a score of 149 or higher. Information about this exam is available at: <http://www.ets.org/praxis/ks>.
5. All candidates must complete the degree with a total GPA of 3.0 (grades of C will have to be balanced with As' and Bs' to achieve an overall 3.0 GPA). Otherwise, the candidate will be advised to re- take a class (or classes) to meet this condition.
6. A total of 36 credit hours must be completed for both thesis and non-thesis option candidates.
7. When a candidate is *conditionally* admitted, they are given a list of courses in which they **MUST** earn a grade of "B" or better before they are officially admitted to the program.
8. All candidates must file an "Intent to Graduate Form" with the Graduate School by the following deadlines: March 1st for summer graduation, July 1st for fall, and November 1st for spring. Please visit the following website to complete and submit this form <http://www.emporia.edu/grad/graduating-students/intent-to-graduate.html>. Please note that this form is to be completed the semester before you anticipate graduation.
9. **Required practicum** – After a candidate has successfully completed Admission to Program of Study requirements and has been approved by the appropriate chair or graduate TESOL advisor, and also completed all practicum pre-requisite courses, the candidate is permitted to participate in practical field experience in TS735 (either section A or Section B, depending on whether they are education majors eligible to obtain a Kansas ESOL licensure or not). Candidates who are eligible to seek an

ESOL licensure are supervised by ESU and school supervisors and are placed in a public school setting through ESU's Office of Field Placement and Licensure. Otherwise, they will take section B of TS735 which will prepare them with practical and hands-on experiences in, for example, the Intensive English Program at ESU or a similar program. Placement process and approval is done by the TESOL program director and faculty supervising this type of TESOL practicums.

10. **For students seeking a Kansas teaching license** through their MA TESOL program (in TS735 Section A) and based on the candidate's performance and input from the University supervisor and off-campus supervisor, the University supervisor assigns a grade for the field experience. The candidate is required to have a minimum grade of "B" in the field experience before being allowed to proceed to the Program Pre-completion decision point.
11. **For students who are NOT seeking a Kansas teaching license** in their MA TESOL program, based upon the candidate's performance and input from the University Practicum Supervisor (in section B) and off-campus supervisor, the instructor assigns a grade for the hands-on experience. The candidate is required to have a minimum grade of "B" in the field experience before being allowed to proceed to the Program Pre-completion decision point.

Master of Arts in Teaching English to Speakers of Other Languages (TESOL)

MA TESOL CURRICULUM

Core Courses:

TS 719	Language Assessment and Evaluation	3 hours
TS 734	Teaching ESL	3 hours
TS 700	Linguistics for Language Teachers	3 hours
TS 720	Second Language Acquisition	3 hours
TS 735	Practicum in TESOL	3 hours
TS 730	Cross Cultural Communication	3 hours
TS 701	Introduction to Graduate Research in TESOL	3 hours

Total Core Courses Credit Hours: 21 hours

Electives: 15 Credit Hours

TS 710	Sociolinguistics	3 hours
TS 760	Literacy Instruction for Second Language Learners	3 hours
TS 770	Individual Differences in SL	3 hours
TS 780	Structure of the English Language	3 hours
TS 790	Media-Assisted Language Learning	3 hours
ED 535*	Cultural Awareness for Educators	3 hours
TS 732	Special Topics in TESOL	1-3 hours

Thesis:

TS 800	Thesis Hours	6 hours
--------	--------------	---------

Total Required Credits:

36 hours

NOTE:

- *Students who choose not to do the 6-hour Thesis will take only 9 hours from Electives.*
- **Students pursuing a state licensure through the MA TESOL program must take ED535.*

English As A Second Language (ESL) Licensure Endorsement

The ESL program is designed to provide a means whereby in-service teachers may obtain Kansas State licensure endorsement in this area. The courses making up the licensure endorsement curricula provide skills needed to assure effective special English language and content instruction to students identified as limited-English proficient under U.S. Department of Education criteria.

English As A Second Language (ESL) Licensure Endorsement Curriculum

The ESL program is designed to provide a means whereby in-service teachers may obtain Kansas State endorsement in this area. The courses making up the endorsement curricula provide skills needed to assure effective special English language and content instruction to students identified as limited English proficient under U.S. Department of Education criteria.

This curriculum requires 15 hours of specialized course work, including a 3-hour practicum.

TS 700	Linguistics for Language Teachers	3 hours
TS 734	Teaching English as a Second/Foreign Language	3 hours
ED 535	Cultural Awareness for Educators	3 hours
TS 719	Language Assessment & Evaluation	3 hours
TS 735	Practicum in Teaching English as a Second/Foreign Language	3 hours

CONCENTRATION IN INSTRUCTIONAL DESIGN AND TECHNOLOGY

(9 credit hours will count toward elective hours)

IT 700	Foundations of Instructional Technology	3 hours
IT 800	Instructional Design	3 hours
IT 820	Designing and Developing Web-Based Instruction	3 hours
Total		9 hours

CERTIFICATE – Teaching English to Speakers of Other Languages (TESOL)

TS 734	Teaching ESL/EFL	3 hours
TS 700	Linguistics for Language Teachers	3 hours
TS 719	Language Assessment & Evaluation	3 hours
TS 730	Cross Cultural Communication	3 hours
TS 735	ESL Practicum	3 hours
Total		15 hours

NOTE:

- This graduate TESOL certificate may be applied towards the MA TESOL program and should not be confused for the Kansas state TESOL licensure which is designed for Kansas licensed teachers only. The TESOL graduate certificate is designed for non education majors.
- Transfer Credit cannot be applied toward this certificate.

DEPARTMENT OF INTERDISCIPLINARY STUDIES

Chair: Alfredo Montalvo

Graduate Faculty

Professors: Rich Sleezer

Assistant Professors: Bekah Selby, Paul Zunkel, Deborah Hann

Instructors: Keith Rocci

Graduate School Application Process for Master of Science in Informatics

Academic requirements are a BA or BS degree from an accredited four-year institution with an undergraduate GPA of 3.0 for full admissions. Applicants with a GPA under 3.0 may be considered for probationary admission. Applicants are expected to demonstrate competence in written and oral communication.

It is essential that applicants apply and receive acceptance into the ESU Graduate School prior to being considered for acceptance by Interdisciplinary Studies. Following acceptance by the ESU Graduate School, prospective students should begin the Interdisciplinary Studies admission process.

- For the Master of Science in Informatics, your degree objective is MS with a major in Informatics (INF). If you have a postgraduate degree or have taken graduate course work, you must list those institutions as well. You must apply for admission online at <http://www.emporia.edu/grad/appinstr.htm>.
- Transcripts. Arrange to have an official transcript from each institution attended sent directly to the Graduate Office (see address above or on application). The grade point average that is used for admission purposes is always based on your bachelor's degree. Students are expected to have a grade point average of 3.0 overall or in the last 60 hours of course work toward the initial bachelor's degree. We consider a post-graduate degree, or graduate courses taken, to give us a full picture of your academic record.
- Letter of reference from two people who know you and your work (academic and/or community work) that address your intellectual capability, ability to express thoughts orally, ability to express thoughts in writing, maturity, and motivation. The letters should also include how long the writers have known you and their relationship to you (teachers, colleague, co-worker, etc.). References may be sealed or open.
- Current resume.
- An advising interview.
- A written two-page statement of objectives, double-spaced.

Each application will be considered by applying the admissions criteria on an individual basis. Academic requirements, for instance, may be waived in favor of applicants of unusual ability and background where rationale for that waiver can be demonstrated. However, only those applicants showing strong evidence of intellectual promise and leadership potential will be admitted.

MASTER OF SCIENCE IN INFORMATICS

The M.S. in Informatics is a 36-credit hour graduate degree program. It is a collaboration of the College of Liberal Arts and Sciences with the School of Library and Information Management and is administered by the Department of Interdisciplinary Studies. The program can be taken entirely online or be a mixture of online and on campus courses. Students have the following prerequisites in preparation for the master's program:

- Bachelor's degree from an accredited 4-year institution
- At least one course in statistics
- At least one course in computer programming (e.g., Fortran, Visual Basic, C++, Perl, Python, R)

Required Core Courses - 15 Credit Hours:

LI 800	Introduction to Informatics	3 hours
ID 745	Programming and Data Analysis for Informatics	3 hours
ID 810	Informatics Capstone Seminar	3 hours
LI 844	Database Design	3 hours
LI 819	Information Retrieval	3 hours

Electives – 6 Credit Hours

ID 871	Directed Research	3 hours
ID 872	Practicum	3 hours
ID 873	Internship	3 hours
ID 874	Thesis	3 hours

Total Hours **36 hours**

MASTER OF SCIENCE IN INFORMATICS WITH GEOINFORMATICS CONCENTRATION

The M.S. in Informatics is a 36-credit hour graduate degree program. It is a collaboration between the School of Library and Information Management, the School of Business, and the College of Liberal Arts and Sciences and is administered by the Department of Interdisciplinary Studies. The program can be taken entirely online or be a mixture of online and on campus courses.

Required Informatics Core Courses - 21 Credit Hours

Required Core Courses – 15 credit hours

LI 800	Introduction to Informatics	3 hours
LI 844	Database Design	3 hours
LI 819	Information Retrieval	3 hours
ID 745	Programming and Data Analysis for Informatics	3 hours
ID 810	Informatics Capstone Seminar	3 hours

Capstone – 6 Credit Hours

ID 871	Directed Research	3 hours
ID 872	Practicum	3 hours
ID 873	Internship	3 hours
ID 875	Thesis	3 hours
GE 573	Internship in Geographic Information Systems	3 hours

Geoinformatics Concentration – 15 Credit Hours

Geoinformatics Core – 10 Credit Hours

GE 572	GIS Applications	3 hours
ES 555	Small-Format Aerial Photography	3 hours
ES 771	Remote Sensing	4 hours

Geoinformatics Electives

Any Earth Science (ES), Geology (GO), or
Geography (GE) courses approved by advisor 5 hours

Total Hours 36 hours

Pre-requisites

- Bachelor of Science in Geography, Geology, Earth Science or closely related field.
- At least one course in geographic information systems (GIS)
- At least one course in Cartography
- At least one course in Statistics
- At least one course in Computer Programming (Fortran, Visual Basic, C++, Perl, Python, R, etc.)

Master of Science in Informatics Program with Quantitative Economics Concentration

The M.S. in Informatics Quantitative Economics Concentration is a 36-credit hour graduate degree program. It is a collaboration with the School of Library and Information Management, the School of Business, and the College of Liberal Arts and Sciences and is administered by the Department of Interdisciplinary Studies. Program can be taken entirely online or be a mixture of online and on campus courses.

Required Informatics Core Courses – 21 credit hours**Required Core Courses – 15 credit hours**

LI 800 Introduction to Informatics	3 hours
ID 745 Programming and Data Analysis for Informatics	3 hours
ID 810 Informatics Capstone Seminar	3 hours
LI 844 Database Design	3 hours
LI 819 Information Retrieval	3 hours

Capstone – 6 Credit Hours

ID 871 Directed research	3 hours
ID 872 Practicum	3 hours
ID 873 Internship	3 hours
ID 875 Thesis	3 hours

Quantitative Economics Concentration – 15 Credit Hours**Economics Core - 12 Credit Hours**

EC 710 Econometrics I 3 hours

or

EC 711 Econometrics II 3 hours

and

EC 712 Economic Theory 3 hours

and two of the following:

Seminars in Quantitative Economics 3 hours

EC 741 Health Economics 3 hours

EC 731 Economics of Crime 3 hours

EC 727 Industrial Organization 3 hours

EC 737 Game Theory 3 hours

EC 751 Labor Economics 3 hours

EC 713 Mathematical Economics 3 hours

Quantitative Economics Elective – 3 Credit Hours

EC 797 Graduate Internship in Economics	1-3 hours
EC 798 Directed Research in Economics	1-3 hours
EC740 Business Cycles and Forecasting	3 hours
BC 807 Managerial Economics	3 hours
MA 532 Mathematical Statistics I	3 hours
MA 581 Mathematical Modeling	3 hours
MA 731 Statistics Using SAS	3 hours
MA 732 Categorical Data Analysis	3 hours
MA 733 Mathematical Statistics II	3 hours
MA 763 Simulation Techniques	3 hours
MA 764 Regression Analysis	3 hours

Any 500+ Economics (EC or BC), Math (MA), Science (ES, GO, PH, CH) or Geography (GE) course 1-3 hours

Total Hours 36 hours

Pre-requisites

- A bachelor's degree with a major, minor or concentration in economics, mathematics, statistics, sciences, social science or related field.
- At least one course in economics (or equivalent)
- At least one course in statistics (or equivalent)
- At least one course in calculus (or equivalent)

MATHEMATICS AND ECONOMICS

Web: <http://www.emporia.edu/mathecon>

Phone: 620-341-5281

Brian Hollenbeck, Chair

Chad Wiley, Graduate Coordinator

Graduate Faculty

Professors: Marvin Harrell, Brian Hollenbeck, Connie Schrock, and Qiang Shi.

Associate Professors: Essam Abotteen, Rob Catlett, Daniel Miller, Larry Scott, and Chad Wiley.

Assistant Professors: Adelaide Akers, Thomas Mahoney, Bekah Selby.

The graduate program in mathematics is designed to promote a high level of competence and understanding in the field of mathematics. The graduate course offerings are such that an individualized program may be designed emphasizing various areas of mathematics, mathematics education, statistics.

This program is beneficial to teachers in secondary schools and community colleges, persons interested in applying mathematics or statistics to problems in industry or government, and those preparing for further graduate study or research in these areas.

Admission Requirements

To be accepted in the graduate program in mathematics, a student must present work essentially equivalent to 20 hours of undergraduate mathematics, including at least two semesters of calculus and one course with a substantial focus on mathematical proofs, or gain consent of the graduate committee.

MS Degree, Mathematics

Students receiving the Master of Science degree in mathematics must have successfully completed MA 701 Mathematical Proofs and at least two courses in each of the following areas:

Algebra:	Hours
MA 727 Groups, Rings and Fields	3 hours
MA 728 Vector Spaces	3 hours
MA 740 Number Theory	3 hours
MA 741 Group Theory	3 hours
MA 742 Ring Theory	3 hours
MA 743 Field Theory	3 hours
MA 746 Computational Algebraic Geometry	3 hours
Or any approved graduate level course in this area	

Analysis:

MA 715 Topology	3 hours
MA 734 Complex Variables	3 hours
MA 735 Advanced Calculus I	3 hours
MA 736 Advanced Calculus II	3 hours
Or any approved graduate level course in this area	

Statistics and Applied Mathematics:

MA 532 Mathematical Statistics I	3 hours
MA 581 Math Modeling	3 hours
MA 731 Statistics Using SAS	3 hours
MA 732 Categorical Data Analysis	3 hours
MA 733 Mathematical Statistics II	3 hours

MA 738 Applied Differential Equations	3 hours
MA 739 Applied Analysis	3 hours
MA 758 Wavelets	3 hours
MA 764 Regression Analysis	3 hours
MA 760 Numerical Analysis	3 hours
MA 762 Optimization Techniques	3 hours
MA 763 Simulation Techniques	3 hours
MA 765 Numerical Linear Algebra	3 hours
Or any approved graduate level courses in this area	

No more than six hours of graduate work can be counted from outside the standard mathematics curriculum and this is subject to the approval of the graduate committee. Students in this degree program can select either a thesis option or a non-thesis option.

The Thesis Option

To fulfill the requirements for this option the student must complete 32 hours of acceptable graduate work including a thesis. The thesis will be worth either 3 or 5 credit hours, MA 850, Thesis Requirement.

The Non-Thesis Option

The student must take 34 hours of acceptable graduate work including at least one hour of MA 810, Seminar in Mathematics, which would involve the presentation of a seminar.

Written Examination

All students are required to take a written final examination to complete the program. The examination can be taken after 18 hours of graduate work, but no later than the fourth week of the final semester (or the second week if the final semester is a summer semester.) For the non-thesis option the examination will be over four graduate courses that the student has completed in the Department of Mathematics, and Economics. Under the thesis option, in addition to a defense of the thesis, the student will also be required to take an examination over three courses. Under either option the student will select the courses for the examination, but the selection must include at least one course from each of the three areas of algebra, analysis, and statistics/applied mathematics and is subject to the approval of the Graduate Committee.

Certificate in Mathematics

This certificate is designed primarily for students who require 18 hours of graduate mathematics content in order to teach at the community college level or to teach dual-credit courses at the secondary level.

Course Requirements

Course Requirements	Hours
MA 701 Mathematical Proof	3 hours
*Any course in the algebra area	3 hours
**Any course in the analysis area	3 hours
***Any course in the statistics and applied mathematics area	3 hours

Two additional graduate mathematics courses, which must be approved by the advisor and the Graduate Committee. 6 hours

Total **18 hours**

*Algebra courses include:

*Algebra courses include:	Hours
MA 728 Vector Spaces	3 hours
MA 740 Number Theory	3 hours
MA 741 Group Theory	3 hours
MA 742 Ring Theory	3 hours
MA 743 Field Theory	3 hours
MA 746 Computational Algebraic Geometry	3 hours
Special topics courses approved by the graduate committee	

**** Analysis courses include:**

MA 715	Topology	3 hours
MA 734	Complex Variables	3 hours
MA 735	Advanced Calculus I	3 hours
MA 736	Advanced Calculus II	3 hours

Special topics courses approved by the graduate committee

***** Statistics and applied mathematics courses include:**

MA 532	Mathematical Statistics I	3 hours

Phone: 620-341-5431

Allan Comstock, Chair, Graduate Music Performance Advisor
Andrew Houchins, Coordinator of Graduate Studies
Gaile Stephens, Coordinator of Music Education, Graduate Music Education Advisor

Graduate Faculty

Professor: Allan Comstock, Martín Cuéllar, Tracy Freeze, Andrew Houchins, Dawn McConkie, Gary Ziek.

Associate Professors: Penelope Speedie, Gaile Stephens.

Assistant Professors: Ramiro Miranda, Robert Ward, Scott Michael, William Woodworth.

Instructors: Catherine Bergman, Ezgi Karakus, Terrisa Ziek.

Graduate education in music at Emporia State University is based upon a tradition that nurtures scholarship, promotes performance, and encourages creativity. Graduate programs in music seek to address the professional and practical needs of post-baccalaureate students and prepare them for active careers and post-graduate study in music. Emporia State University offers the Master of Music with a Concentration in Music Education or a Concentration in Music Performance.

Admission Requirements

In addition to the general admission requirements listed by the Graduate School, the Department of Music requires all new prospective graduate students to submit a resume. Prior to admission to the Department of Music, students wishing to pursue the M.M. Performance Emphasis will submit a repertoire list and present a live audition of approximately 20 minutes in length. If a live audition creates an undue hardship, a DVD may be submitted, but a live audition will be required at the beginning of the first semester of study. Students wishing to pursue the M.M. Music Education Emphasis will submit a DVD of their classroom teaching, student teaching, or conducting and submit a formal statement of their music education philosophy. The M.M. Music Education Emphasis does not lead to certification by the State of Kansas.

First Semester Requirements

All applicants for graduate study in music shall demonstrate at least a baccalaureate-level competence in those areas common to all undergraduate music study. Competence in those areas shall be determined by first semester graduate students completing the entrance assessments listed below:

Entrance Assessments

Music History
 Music Theory

Assessment Results

Music History

Students not passing the required entrance assessment in Music History will be required to enroll in MU 628 and/or MU 629, independent upon the deficiency noted by the assessment results. MU 628 and MU 629 will not fulfill the Music History/Literature requirements.

Music Theory

Students not passing the required entrance assessment in Music Theory will be required to enroll in MU 618. This course will not fulfill the Music Theory requirements.

Degree Candidacy

Degree candidacy in the Department of Music is formal approval to pursue the Master of Music degree. This approval cannot be sought until all departmental first semester requirements in Music Theory and Music History have been met.

Following the completion of 12 - 14 hours of study which include the completion of departmental preliminary Music Theory and Music History requirements as stated above, the graduate student will make application for Degree Candidacy to the Master of Music program. The application process will include the following:

- Letter to Department of Music Graduate Committee requesting degree candidacy;
- Statement of educational philosophy or professional goals;
- Interview with the Music Graduate Committee.

The Music Graduate Committee will review the materials submitted, the student's grades and degree progress, and the student's potential for program completion. The committee will make one of the following recommendations:

- Approval of Degree Candidacy and recommendation of members of student's Graduate Committee.
- Denial of Degree Candidacy.

Graduation Requirements

All graduate students in music must complete the Graduate Comprehensive Exam:

The Graduate Comprehensive Examination will consist of 6 questions solicited from the candidate's committee; 3 from the major professor, and 1 from each of the areas of history, theory, and research. The candidate must pass 5 out of 6 of the questions. This examination will be administered during the final semester of graduate study.

Music Theory or music History Elective – **3 hours**

Music Education – 11 hours

MU 839 Research in Music Education	3 hours
MU 846 History and Philosophy of Music Education	3 hours
MU 848 Learning Theories in Music	3 hours
MU 880 Capstone Research	2 hours

Music Education Computer Proficiency – select one

MU 810 Digital Audio Techniques	2 hours
MU 812 Navigating Computers in Music	2 hours

Capstone – 2 hours – select one

MU 882 Graduate Instructional Practicum	2 hours
MU 879 Thesis	2 hours
MU 871 Special Project	2 hours

Elective Studies– **6 hours**
Applied music not to exceed 2 hours

Total Hours for Degree **32 hours**

Certificate in Music Performance

This certificate is designed, primarily, for graduate international students with an undergraduate degree in music wishing to pursue graduate level studies in the United States. Duration of the course is one year and any studies undertaken during that year can apply toward completion of a Master of Music degree at Emporia State University.

Course Requirements:

800 level Applied Music	4 hours
700-800 levels Performance area literature course	3 hours
600-800 levels Music electives	5 hours
Total	12 hours

Note: Students can enroll in applied music courses (Applied Piano) for repeated semesters. These courses are a one-to-one instructional setting; each student continues to progress individually following the course content.

Prerequisite:

Undergraduate degree or its equivalent in a field of music.

Application Process:

- A basic performance audition of intermediate to advance literature.
- A letter of application addressing personal goals for the certificate.
- Completion of ESU admission requirements.

International Student Music Performance Certificate

This certificate is designed to provide international graduate students with an opportunity to study music and further develop English skills in the United States.

Prerequisites

TOEFL score meeting ESU requirements
Permission of applied instructor

Course Requirements:

Semester 1 **6 hours**

Intensive English courses as needed
Applied Music at 800 level
Music Elective

Semester 2 **6 hours**

Applied Music at 800 level
Music Literature Course in applied area
Music Elective

Total Hours for certificate **12 hours**

NOTE: Students can enroll in applied music courses for repeated semesters. These courses are a one-to-one instructional setting; each student continues to progress individually following the course content.

NURSING

Web: <https://www.emporia.edu/nursing/>

Phone: 620-341-4441

Chair: Linda Adams-Wendling, Ph.D.

Graduate Faculty

Professor: Linda Adams-Wendling, Ph.D.

Associate Professors: Mary Mitsui, Ph.D.

The Emporia State University Master of Science in Nursing (MSN) degree provides three options to meet specific professional goals of graduate students. The three online options will include: Nursing Health Care Management, Nursing Education and a blended online option entitled Nursing Health Care Management/Education.

For successful completion of the MSN degree, students must successfully complete 32 hours of graduate semesters hours, routinely over four semesters. Each of the three options have a total of 32 graduate credit hour requirements all completed within the Department of Nursing. Up to nine semester hours of current graduate-level courses may be transferred from another accredited institution with the approval of the Chair of the Nursing program.

Admission Requirements

Students seeking the Master of Science in Nursing degree will have a Bachelor of Science in Nursing degree from a nationally accredited program (ACEN or CCNE). The applicant will have a cumulative undergraduate GPA of 3.0 to 4.0. Applicants with less than a 3.0 will be considered on an individual basis. Applicants should demonstrate a strong track record of professional service and leadership in their practice area.

The following steps are required to complete the ESU Department of Nursing application procedure:

1. **Application to ESU:**
Students should apply for admission and be admitted to Emporia State University before applying to Nursing.
2. **Application to Department of Nursing:**
(submitted to the Department office) May 1st is the deadline for submitting the ESU Department of Nursing Office to request an application packet. Applicants should contact the Department office to verify that the application form and application fee have been received. A nursing department application fee of \$5 must accompany the complete Department of Nursing application form. Checks should be made payable to the Department of Nursing. These fees are non-refundable.
3. **Official Transcripts:**
(other than ESU transcriptions)
Official transcripts from all colleges and universities previously attended (other than ESU) must be received by the registrar's office **prior to June 1. It is the responsibility of the student to ensure that all transcripts have been received by the Graduate School office prior to June.1.**
4. **Reference Letters:**
Three letters of reference from a nursing academic professor or academic nurse administrator must accompany the application.

5. **Personal Interview**

A personal interview may be requested by the ESU Department of Nursing admission committee.

6. **Submit all Department of Nursing application materials to:**

ESU Department of Nursing
1127 Chestnut Street
Emporia, KS 66801

7. All application materials (application form, application fee and transcripts) become the property of Emporia State University and cannot be returned.

Degree Candidacy and Graduate Requirements

The ESU Department of Nursing adheres to the graduate school requirements (refer to the graduate school requirements).

Masters in Nursing

Track A – Healthcare Management

Track B – Education

Track C – Blended Management/Education

Sample Course Sequencing per Semester

Total Hours (32 hours)

Core Requirements (14 hours)

(**Semester 1)

NU 800	Theories, Leadership, Role Transition-Advance Practice Role	3 hours
NU 801	Health Care Systems-Population Health And Policy	3 hours
NU 802	Nursing Law, Ethics, and Quality Improvement	3 hours

(**Semester 2)

NU 803	Health Care Informatics	2 hours
NU 804	Translation and Integration of Scholarship To Practice-Project	3 hours

Track Option Requirements

Track A- Healthcare Management (18 hours)

(**Semester 3)

NU 805	Health Care Budgeting, Finance, and Economics	3 hours
NU 806	Health Care Operational Management	3 hours
NU 807	Health Care Strategic Planning and Marketing	3 hours

(**Semester 4)

NU 808	Human Resources and Organizational Behavior	3 hours
NU 809+	Nursing Health Care Management Internship	6 hours

OR

Track B – Nursing Education (18 hours)

(**Semester 3)

NU 810	Curriculum/Program Planning	3 hours
NU 811	Assessment and Evaluation Strategies	3 hours
NU 812	Pharmacology, Pathophysiology, and Health Assessment – for Nurse Educators	3 hours

(Semester 4)**

NU 813	Teaching and Learning Strategies	3 hours
NU 814+	Nursing Educator Internship	6 hours

OR**Track C – Blended Option****(Health Care Management/Education)**

(18 of the following hours which includes one internship must be completed)

NU 810	Curriculum/Program Planning	3 hours
NU 811	Assessment and Evaluation Strategies	3 hours
NU 812	Pharmacology, Pathophysiology, and Health Assessment-for Nurse Educators	3 hours
NU 813	Teaching and Learning Strategies	3 hours
NU 814	Nursing Educator Internship	6 hours
NU 805	Health Care Budgeting, Finance and Economics	3 hours
NU 806	Health Care Operational Management	3 hours
NU 807	Health Care Strategic Planning and Marketing	3 hours
NU 808	Human Resources and Organizational Behavior	3 hours
NU 809	Nursing Health Care Management Internship	6 hours
NU 815	Topic (s) in Graduate Nursing (elective)	1-5 hours

+ **requires the internship to be completed in a nursing program or health care facility with a preceptor.**

** All courses may be taken on a flex path sequence, **excluding the internship courses.**

PHYSICAL SCIENCES

Web: <http://www.emporia.edu/physci>

Phone: 620-341-5330

Rich Sleezer, Chair

Eric Trump, Graduate Advisor for Chemistry

Michael A. Morales, Graduate Advisor for Earth Sciences

Jorge L. Ballester, Graduate Advisor for Physics

Claudia Aguirre-Mendez, Graduate Advisor for Physical Sciences (teaching)

Graduate Faculty

Professors: Jorge Ballester, Robert Jones, Marcia Schulmeister, Richard Sleezer, Kenneth Thompson.

Associate Professors: Michael Morales, Christopher Pettit, Eric Trump, Kim Simons.

Assistant Professors: Claudia Aguirre-Mendez, Alivia Allison, Jason Applegate, Bindu KC, Andrea Luthi, Mingjing Sun, Qiyang Zhang, Paul Zunkel.

Introduction

Graduate study with concentrations in chemistry, earth science, physics, and physical sciences is offered within the Master of Science degree.

The requirements for each of these concentrations are described separately. Each is designed to promote a high level of competence and understanding of the subject matter. These concentrations prepare a student to continue graduate studies at the doctoral level and obtain or maintain employment in the chosen field with government agencies, industry or education.

General Admission Requirements and Placement Examination

At the time of application, which includes a completed Department questionnaire, a degree aspirant's previous academic work is evaluated. Upon admission to the program any existing deficiencies are identified and recommendations are made to address them by the graduate advisor for the applicant's program concentration of choice. Placement exam requirements vary depending on the program concentration; therefore, students should consult with their graduate advisor for details. Admission requirements specific to the various concentrations within the Physical Sciences are outlined under the **Admission Requirements** headings for each concentration (Chemistry, Earth Science, Physics, and Physical Sciences).

RESEARCH DEGREE OPTIONS

General Degree Requirements

The degree program concentrations require that the student write either a thesis or a research report addressing a selected topic. The thesis option requires successful completion of a minimum of 30 semester hours of approved graduate work. The research report option requires successful completion of a minimum of 32 semester hours of approved graduate work. Both options require successful completion of 15-25 semester hours in the major field(s). Specific course requirements will be determined by the individual candidate in consultation with the candidate's advisor and graduate committee. Due to prerequisites, more than 30 or 32 hours may be required to complete the graduate degree. Per University Graduate School guidelines, a student must earn an overall 3.0 grade point average. A minimum of 60 percent of the credit hours must be in course numbered 700 or higher on the degree plan. For complete graduate

requirements, consult the current graduate policies at <http://www.emporia.edu/grad/graduate-policies>

Thesis Option	Hours
Thesis and Research	3-8
Thesis	3-6
Research	0-5
Major field courses (see each concentration)	15-25
Approved electives	5-10
Total (minimum)	30

Research Report Option	Hours
Graduate Research	3-6
Major field courses (see each concentration)	15-25
Approved electives	5-12
Total (minimum)	32

Candidacy Requirements

Prior to completion of two semesters of study, the student will identify a research advisor, complete a degree plan, and have a research proposal formally approved by the graduate student's advisor and Department Chair. Once the proposal and plan are completed, the student is admitted to degree candidacy. The research proposal and degree plan are both subject to change after approval as needed by the student in consult with the research advisor.

Final Examination

Prior to graduation, the student will submit a satisfactory written thesis or report to the members of the committee and the Department Chair. At a minimum, the research committee will be composed of the research advisor, an additional faculty member of the discipline, and one faculty member outside the discipline. The final examination is the public oral presentation of the research and response to questions posed by the committee. The student must be enrolled in coursework or independent study during the semester of graduation.

COURSEWORK & EXAM DEGREE OPTION

Non-Thesis Coursework & Examination Option	Hours
Major field courses:	18-26 hours
Elective courses:	6-14 hours
Internship or Research courses:	0-6 hours
Non-Thesis Total	32 hours

Non-Thesis Coursework Option Requirements:

Advance to Candidacy with completed: (1) degree coursework plan approved by the student's research mentor and the chair of the department, and (2) 16 credit hours that count towards degree.

Internship or research: Is recommended for students working with a private company, government agency, or non-profit organization related to the student's area of interests. A report or presentation must be completed for the internship or research hours to be included.

Final exam is a comprehensive examination over all courses taken towards the degree. The written exam has a three-hour time limit. Students will have up to two chances to pass the final exam with a score of 70% or more correct.

Examination committee is a minimum of three persons, each of whom taught one or more courses the student took. At least two of the committee must be from within the discipline; persons from outside the discipline may be included. The committee members develop and grade the Final Exam.

MS Degree, Physical Science, CHEMISTRY CONCENTRATION

The MS concentration in chemistry is designed to prepare graduates for employment in industrial or governmental sectors, for continued graduate work at the doctoral level, or for teaching. Program variations may be tailored to emphasize biochemistry/biotechnology, environmental chemistry or chemistry education in addition to a more traditional chemistry curriculum.

Admission Requirements

Accepted applicants must have completed a bachelor's degree (BA or BS) from an accredited college or university with a major in chemistry or closely related field. If an applicant does not have a major in chemistry, then course work equivalent to six lecture courses and four laboratory courses in chemistry are expected. Exceptions will be considered on an individual basis, and applicants may be admitted on a provisional status.

Placement Examinations Requirement

Each student must complete a placement examination for general chemistry (full-year sequence of introductory chemistry) and analytical chemistry. Other placement examinations will be taken as needed before entrance into upper-level chemistry courses.

Core Requirements

	<i>Total of 8 hours</i>
CH 728 Chemical Literature	2 hours
CH 730 Chemistry Seminar (taken first and last semester)	2 hours
CH 676 Analytical Chemistry (If the student's record includes successful completion of an undergraduate course in quantitative analysis, including laboratory, and the student passes the departmental Analytical Chemistry Placement Examination, the student will be awarded passing credit on the transcript for CH 676.)	4 hours

Three of the five principal areas of chemistry (analytical, biochemical, inorganic, organic, and physical) must be covered on the degree contract by >700-level content-based courses. Other chemistry courses may be considered for inclusion in a student's program on an individual case basis.

Major field courses (regularly offered)

CH 660 Biochemistry I	3 hours
CH 661 Laboratory Methods in Biochemistry	2 hours
CH 662 Biochemistry II	3 hours
CH 720 Physical Chemistry I	3 hours
CH 721 Physical Chemistry Laboratory	2 hours
CH 722 Physical Chemistry II	3 hours
CH 725 Advanced Inorganic Chemistry	3 hours
CH 726 Advanced Inorganic Chemistry Laboratory	1-3 hours
CH 745 Nuclear Techniques	3 hours
CH 760 Nucleic Acids Biochemistry	3 hours
CH 777 Instrumental Methods of Analysis	5 hours

Chemistry courses and approved electives will be decided by the graduate student and the student's graduate advisor.

Approved electives for the thesis and research report options.

Up to 6 hours of cognate courses (numbered 500 and above) relevant to a student's educational goals may be included in the MS degree plan. Such courses may be selected from those offered in earth science, geology, physics, physical science, biological sciences, mathematics, computer science, education, or other disciplines. The selection of Cognate Electives must be approved by the student's academic advisor, graduate committee, and Chair of the Department prior to enrollment in the cognate course.

MS Degree, Physical Science, EARTH SCIENCE CONCENTRATION

The graduate earth science concentration is designed to provide a broad, flexible, and interdisciplinary background in the earth, environmental, and geological sciences. It is especially well-suited for candidates with career goals in government service, teaching, and/or industry. It can also prepare one for entry into doctoral study.

Admission Requirements

The minimum expected undergraduate preparation in earth science is course work equivalent to the BSE degree with certification in earth/space science, or a BA or BS degree with an earth science, physical geography, geology, or physical science major. Deficiencies in course background may be addressed concurrent with degree program course work.

Application for Admission

To apply for admission to the earth science concentration, applicants are required to do the following:

- 1) Submit an application for admission; see <http://www.emporia.edu/grad/admissions/> for an electronic application form.
- 2) Provide official transcripts from each undergraduate institution attended. Transcripts must be sent to: Graduate School, Campus Box 4003, Emporia State University, Emporia, Kansas, 66801.
- 3) Provide a statement of relevant background, fields of interest in earth science, and career goals. This should be sent to: Graduate Advisor, Earth Science Department, Campus box 4030, Emporia State University, Emporia, KS, 66801.
- 4) The priority date to submit applications for the upcoming academic year is March 1. Later applications may be considered.
- 5) A faculty committee will review applications and select candidates for admissions. Each candidate will be matched with a prospective faculty advisor.

Presentation of Research

A student is expected to present their research at a professional scientific conference or meeting. The presentation may take the form of a poster display, oral lecture, field-trip guide, workshop or other suitable format.

MS Degree, Physical Science, PHYSICAL SCIENCE CONCENTRATION

The physical science concentration is an option for in-service teachers or non-teaching professionals. If an in-service teacher, the physical science concentration is designed to provide graduate work to enhance the chemistry, earth/space science, physics and/or

physical science background of a licensed teacher. This concentration can also be preparatory for additional graduate work at the doctoral level in science education. A non-teaching physical science concentration is designed to provide graduate work to those professionals for whom a broad foundation in the physical sciences is appropriate.

Admission Requirements

For in-service teachers, the required undergraduate preparation is completion of course work equivalent to the Departments of Physical Sciences undergraduate requirements for secondary teaching licensure in one of chemistry, earth/space science, physics, or closely allied field. For non-teaching professionals, the required preparation is a bachelor's degree with similar preparation from an accredited institution.

Program Option A is designed for those individuals who want to take the maximum number of hours of course work within the disciplines and who will be full-time graduate students during the academic year.

Required Courses/Degree Requirements	Hours
Physical Sciences (CH, ES, GO, PH, or PS)	5-25 hours
PS 730 Nature of the Scientific Enterprise	2 hours
CH, PH, ES, PS Thesis hours	3-5 hours
OR	
CH, PH, ES, PS Research hours	3-5 hours
Thesis Option A	30 hours

Program Option B is designed for those individuals who want to do course work within the disciplines and also gain additional competence in science education techniques and curriculum development. This program is specifically designed to be completed during summer sessions, and potentially augmented with academic-year course work.

Required Courses/Degree Requirements	Hours
PS 730 Nature of the Scientific Enterprise	2 hours
PS 768 Workshop in Physical Science Teaching	1-3 hours
PS 801 Modern Developments in the Physical Sciences	3 hours
ER 851 Research Design & Writing	3 hours
OR	
ER 752 Analysis of Research	3 hours

Approved Electives	Hours
First Physical Science Discipline	12 hours
Second Physical Science Discipline	6 hours
Research Option B	32 hours

MS Degree, Physical Science, PHYSICS CONCENTRATION

The physics concentration is designed to serve the needs of those planning to advance in a teaching career, enter industrial or governmental work, or continue graduate education at the doctoral level. Students benefit from small classes, a student-oriented faculty, research opportunities, and a flexible curriculum.

Admission Requirements

For admission to the physics concentration program, the applicant must have completed at least two physics courses for which introductory physics is a prerequisite and must have a demonstrated proficiency in calculus. Students may be admitted on a provisional status, and will be informed upon admission of any specific deficiencies, which must be addressed.

Required Courses

A master's degree program with a physics concentration requires a minimum of 15 credit hours in physics courses. Advanced-level courses in classical mechanics, electromagnetism, and an advanced laboratory course are required as a common core for all graduate students, e.g., PH 760, Mechanics I and PH 762, Electricity and Magnetism I are required. The advanced laboratory requirement can be met with any physics laboratory course at the 500-level or above. The degree program will include additional hours of approved electives to meet the minimum number of hours required.

Seminar Participation

Students are expected to attend and participate in scheduled physics seminars during the entire period of full-time graduate study, whether enrolled in such seminars for credit or not. A maximum of two credit hours in seminar may be applied toward the degree.

MS Degree, Forensic Sciences, CHEMISTRY CONCENTRATION, Accelerated Undergraduate/Graduate Program

Using a link between undergraduate and graduate programs, well-prepared students will be able to complete the programs in 4+1 years rather than the typical 4+2 years. At the end, the student will have B.S. Chemistry and M.S. Forensic Science degrees from ESU.

Admission Requirements

Following the third year of undergraduate studies, the student must apply to the graduate school. The student needs to be in good academic standing. See the graduate school requirements for more details.

Required Courses

During the fourth year of studies, the student will take FO 702 Biological & Forensic Evidence, FO 770 Research Seminar, and FO 720 Toxicology for graduate credit. The course CH 560 Fundamentals of Biochemistry, CH 708 Drug Design, CH 777 Instrumental Analysis, and CH 779 Advanced Instrumental Analysis will be exempted from graduate study. A sample plan of study is available from the Department of Physical Sciences.

PSYCHOLOGY

Web: <http://www.emporia.edu/psych>
Visser Hall 327, Campus Box 4031,
Phone: (620)341-5317, Fax: (620) 341-5801

Chair: Dr. James D. Persinger

Graduate Faculty

Professors: James D. Persinger, (School/Educational Psychology), Kenneth A. Weaver (Cognitive Psychology), John Wade (Clinical Psychology).

Associate Professors: Cathy A. Grover (Behavioral Neuroscience), Kaira Hays (School Psychology).

Assistant Professors: Kelly McEnerney (Developmental Psychology)

Instructors: Tracy Wechselblatt (Clinical Psychology), Kylea Shoemaker (School Psychology/Therapeutic Science).

The Department of Psychology has a rich and distinguished history dating back to the late 1800s and Dr. Norman Triplett, who published the first experiment in social psychology. Modern laboratory facilities including a newly overhauled vivarium are equipped for a variety of human and animal research projects with computer labs and smart classrooms continues this established tradition of high impact learning practices.

The Department of Psychology offers programs of study leading to the Master of Science (M.S.), majors in Clinical Psychology, and School Psychology, and an Ed.S. in School Psychology. Ed.S. studies lead to the terminal degree and (with Praxis score) a license in school psychology EC-12, including for candidates in our respecialization program, who enter with an M.S. in a related field. The respecialization program began in 2001 and is one of the oldest and largest in the country.

Information outlining requirements, as well as an application for admission and assistantships, are available from the department office, Room 327, Visser Hall, 620-341-5317 or on the department's web page located at <http://www.emporia.edu/psych>

All Psychology applicants are reviewed by a committee as soon as their applications are complete and will be notified within 2 weeks of the committee's decision.

Graduate Teaching Assistantships (GTA)

If you wish to apply for a GTA position you should have at least 24 hours of undergraduate psychology and should include a one-two page essay indicating your teaching interest as well as your qualifications and rationale for wanting to be a GTA. A short (5-10 min) video displaying the applicant teaching a psychology lecture is also a requirement. The letter should be included with your other application materials. Application materials are due by March 15th. (<http://www.emporia.edu/grad/graduateassistants/graduate-assistant-application.html>)

Requirements for All Degrees

Students completing the thesis option select a thesis committee consisting of two faculty members from the student's field and one member outside the field. Students selecting the thesis option are required to complete both a proposal and defense meeting with their thesis committee. Psychology-Industrial/Organizational students must complete a thesis.

Non-degree seeking students may not apply more than 9 graduate hours taken as a non-degree student to a graduate program in the department. In addition, these courses must also meet the seven year time limit established by the Graduate Council.

For letters of recommendation, at least two must be from faculty who had you in class, conducted research with you, and/or are familiar with your academic performance.

Applicants who have been rejected for admission must complete all background deficiencies and repeat undergraduate courses to raise their undergraduate GPA on the last 60 hours to a 3.25 or a cumulative GPA of 3.00 before reapplying.

Degree Candidacy Requirements

A degree program must be completed and approved before the second term of enrollment. The student should apply for degree candidacy after completing 15 hours of course work. A student must be a degree candidate before enrolling in thesis, practicum, internship or sitting for the comprehensive examination

CLINICAL PSYCHOLOGY ADMISSION REQUIREMENTS

The following requirements must be met for admission into the Clinical Psychology program:

- 1) An overall 3.00 grade-point average on a four-point scale or 3.25 on the last 60 semester hours for the undergraduate degree.
- 2) Three letters of recommendation.
- 3) Graduate Record Examination or Miller Analogies Test scores.
- 4) A B.S., B.A., B.F.A., or B.S.E. degree.
- 5) A personal letter that addresses the following: research experience (presentations, lab work, conference attendance), work/volunteer experience especially jobs relating to your area of interest in psychology, why you want to pursue a Master's degree, and your future plans with your Master's degree.
- 6) A minimum of 24 semester hours of background work in psychology (beyond an Introductory Psychology course) including: developmental psychology, statistics, abnormal psychology, theories of personality, foundations of psychology, and any additional Psychology course. Courses taken to fulfill undergraduate deficiencies may not be counted toward the Master's degree. International Students must have a satisfactory English.
- 7) International Students must have a satisfactory English proficiency test score submitted as part of their application to be admitted into the program and before they will be allowed to take classes. The following English proficiency tests will be accepted so long as the listed minimum test score (or higher) is obtained: 1) TOEFL = 567, 2) TOEFL iBT = 86, 3) TOEFL CBT = 227, or 4) IELTS = 6.5

M.S. DEGREE, CLINICAL PSYCHOLOGY—Thesis Option

The degree requires a minimum of 60 credit hours.

Required Courses

I. ASSESSMENT COURSES (12 hours)		Hours
PY 806	Personality Assessment and Report Writing	3 hours
PY 807	Projective Assessment and MMPI	3 hours
PY 827	Seminar in Psychopathology	3 hours
PY 841	Assessment of Intelligence	3 hours
Total		12 hours

II. TREATMENT (28 hours)

PY 846	Culture, Assessment, and Treatment	3 hours
PY 847	Techniques of Psychotherapy	3 hours
PY 848	Family and Group Systems Psychotherapy	3 hours
PY 849	Ethics and Professional Practice	3 hours
PY 858	Interdisciplinary Referral and Collaboration	3 hours
PY 859	Internship in Clinical Psychology	6 hours
PY 851	Behavior Modification	3 hours
Electives		4 hours
Total		28 hours

III. SCIENTIFIC FOUNDATIONS 9 hours**IV. RESEARCH (11 hours)**

ER 851	Research and Design and Writing	3 hours
ER 857	Statistics Methods for Education and Psychology II	3 hours
PY 800	Thesis	5 hours
Total		11 hours

TOTAL Hours Required 60 hours**M.S. DEGREE, CLINICAL PSYCHOLOGY—
Non- Thesis Option**

The degree requires a minimum of 60 credit hours.

Required Courses**I. ASSESSMENT COURSES (12 hours) Hours**

PY 806	Personality Assessment and Report Writing	3 hours
PY 807	Projective Assessment and MMPI	3 hours
PY 827	Seminar in Psychopathology	3 hours
PY 841	Assessment of Intelligence	3 hours
Total		12 hours

II. TREATMENT (28 hours)

PY 846	Culture, Assessment, and Treatment	3 hours
PY 847	Techniques of Psychotherapy	3 hours
PY 848	Family and Group Systems Psychotherapy	3 hours
PY 849	Ethics and Professional Practice	3 hours
PY 858	Interdisciplinary Referral and Collaboration	3 hours

PY 851	Behavior Modification	3 hours
Electives		9 hours
Total		33 hours

III. SCIENTIFIC FOUNDATIONS 9 hours**IV. RESEARCH (11 hours)**

ER 851	Research and Design and Writing	3 hours
ER 857	Statistics Methods for Education and Psychology II	3 hours
Total		6 hours

TOTAL Hours Required 60 hours**The Clinical Internship**

The internship experience is considered to be an integral and valuable component of the clinical program. The internship placement is a minimum of 750 clock hours in length and serves to provide the student with a wide variety of first-hand experiences in the clinical setting.

SCHOOL PSYCHOLOGY (M.S.)**ADMISSION REQUIREMENTS**

Students seeking acceptance into the graduate degree programs for Master of Science/Specialist in Education in School Psychology must first be admitted to the Graduate School of the University.

This occurs by meeting the following requirements:

- Submission of an "Graduate Admission to Graduate Study" form online at <http://www.emporia.edu/grad/admissions>.
- Submission of all undergraduate and graduate transcripts.
- Completion of a bachelor's degree from a regionally accredited college or university.
- A grade point average of not less than 3.0 overall, or a 3.25 on the last 60 semester hours for the master's program, and 3.50 on the master's program coursework for admission to the Education Specialist degree.
- Course prerequisites: A minimum of 20 semester hours of background courses in undergraduate psychology (not including introductory psychology), or the content of those courses completed via course equivalents as determined by core program faculty. This must include work in statistics, descriptive and/or experimental methods, developmental, history/foundations, personality theory, and learning theory (or a cognitive or educational psychology equivalent to a learning theory course). Abnormal psychology and psychological testing courses are suggested as part of this background, but are not required. In addition, a 3 semester hour Survey of Exceptionality (sometimes called Introduction to Special Education) course is needed. It is not uncommon that some prerequisite course work is missing for applicants; certain aspects may be met concurrently with School Psychology Program studies.
- Documented supervised work experience in working with, supervising, and/or caring for children and youth in a supervised setting is a required part of the application process for all licensure programs approved in the state of Kansas. Required documentation forms with instructions are available in the Appendix.
- Three letters of recommendation (form in Appendix) from professionals who can comment on the applicant's potential for completing advanced graduate studies. Additional letters (e.g., from friends or family members), which address issues you believe relevant may also be submitted, but the application is not complete without the three letters from professionals that provide the information requested in the form.
- International Students must have a satisfactory English proficiency test score submitted as part of their application to be admitted into the program and before they will be allowed to take classes. The following English proficiency tests will be accepted so long as the listed minimum test score (or higher) is obtained: 1) TOEFL = 567, 2) TOEFL iBT = 86, 3) TOEFL CBT = 227, or 4) IELTS = 6.5
- Completion of an admissions interview, which may be done via phone, with a member of the School Psychology Program faculty.

- Although applications are accepted year-round, in order to offer applicants an assurance that an admissions decision and enrollment may begin on the desired schedule, applications should meet specified deadlines. Applications should be completed by March 1 to assure that a program of study may begin during the fall semester, and October 1st for a program of study which begins during the spring semester. Materials arriving after those dates will be given due consideration, but an admissions decision may not be completed in time for enrollment during the desired semester.
- Applicants must include a statement of purpose or letter of intent with their materials. Its purpose is to introduce you to the committee. What do you want to study? Why do you want to study it? What experience or background do you have that is relevant to this area? What do you plan to do with this degree once you have it? It should also explain anything in the application materials that you believe should be elaborated upon, make clear you understand and care about the professions of school psychology, and demonstrate that you have the academic background, maturity, and diligence to succeed in the program. Some helpful suggestions as to what such a letter might contain can be seen at <http://www.unm.edu/~olit/pdf/letterOfIntentGuidelines.pdf>. Applications are not accepted without a letter of intent, as providing one helps the admission committee understand the context of the application and can facilitate admissions decisions.

SCHOOL PSYCHOLOGY (Ed.S.)

ADMISSION REQUIREMENTS

Admission requirements for the Ed.S. program are the same as M.S. above except 20 instead of 24 hours of undergraduate psychology course work is required including either Experimental Psychology or Foundations of Psychology. If applicants are not licensed as a regular classroom teacher, they must complete the Survey of Exceptionality course and an approved field experience with exceptional students concurrently while taking course work in the MS program. Admission to the Ed.S. program requires the following:

- A master's degree from an accredited college or university with a GPA of 3.5 on the most recent master's degree.
- A letter of educational goals and professional interests unless written for a School Psychology master's degree at ESU.
- One recommendation for graduate study by an individual who can attest to the candidate's capacity for advanced study.
- Achieve a state of Kansas passing score on the Praxis II series School Psychologist examination. Full results, including subscores for all content areas, must be made available to the Program Director.
- International Students must have a satisfactory English proficiency test score submitted as part of their application to be admitted into the program and before they will be allowed to take classes. The following English proficiency tests will be accepted so long as the listed minimum test score (or higher) is obtained: 1) TOEFL = 567, 2) TOEFL iBT = 86, 3) TOEFL CBT = 227, or 4) IELTS = 6.5

A grade of "B" or above must be earned on the entire Ed.S. School Psychology program to receive a recommendation to the Kansas State Department of Education for certification as a school psychologist.

Other Requirements for School Psychology

A degree program must be completed and approved before the second term of enrollment.

A thesis committee consisting of two faculty members from the student's field and one member outside the field will need to be selected. Students are required to take an oral examination over their thesis area and research. Candidates who choose the non-thesis option must select a school psychology faculty member to serve as an Ed.S. project advisor prior to enrolling in the PY 844 Ed.S. project option.

For Non-Degree Seeking Students: A student may not apply more than 12 graduate hours taken as a non-degree student to a graduate program in the department. In addition, these courses must also meet the seven year time limit established by the Graduate Council.

Applicants who have been rejected for admission must complete all background deficiencies and repeat undergraduate courses to raise the GPA on the last 60 hours to 3.25 before reapplying to the graduate program.

Degree Candidacy Requirements

The student must apply for degree candidacy after completing between 6 and 15 hours of course work. A student must be a degree candidate before enrolling in thesis, practicum, or internship.

M.S. DEGREE, SCHOOL PSYCHOLOGY

Required Courses	Hours
ER 851 Research Design & Writing OR	3 hours
ER 752 Analysis of Research	3 hours
PY 722 Theories of Learning OR	3 hours
EA 773 Advanced Educational Psychology for Teachers	3 hours
PY 812 Foundations of Assessment in Special Education and Student Support	3 hours
PY 835 Seminar in School Psychology	3 hours
PY 836 School-Based Prevention and Intervention	3 hours
PY 841 Assessment of Intelligence	3 hours
PY 860 Leading Processes to Meet Diverse Student/Needs	3 hours
SD 700 Characteristics of High Incidence Disabilities	3 hours
PY 714 Assessing Young Children with Special Needs	3 hours
PY 801 School Psychological Consultation	3 hours
CE 708 Multicultural Counseling OR	3 hours
ED 535 Cultural Awareness for Educators *Educational Administrative Elective	3 hours 3 hours
TOTAL	36 hours

*Must select one of the following Educational Administrative Electives:

EA 830 School Leadership Theory	3 hours
EA 849 Educational Law/Regulations	3 hours
ED 833 Beliefs, Values, Issues in Education Practices	3 hours

Ed.S. DEGREE, SCHOOL PSYCHOLOGY

Required Courses	Hours
EL 751 Application of Developmental Theories OR	3 hours
PY 811 Seminar in Human Growth/Development	3 hours
PY 520 Statistics I	3 hours
OR	
ER 857 Statistical Methods for Education and Psychology II	3 hours
PY 820 Response to Intervention in School Psychology	3 hours
PY 843 PsychoEducational Assessment.	3 hours
PY 838 Supervised Practice in School Psychology	6 hours
PY 844 Project, EdS (project track)	3 hours
SD 850 Characteristics of the Gifted.	3 hours
*Counselor Education Elective	3 hours
Required Elective Course	3 hours
TOTAL	30 hours

***Must select one of the following Counselor Education Electives:**

CI 801 Crisis Counseling and Trauma-Informed	3 hours
CE 825 Counseling Theories	3 hours
CE 830 Group Processes in Counseling	3 hours

Internship (4 hours required post EdS)

PY 910 Internship in School Psychology I.	2 hours
PY 920 Internship in School Psychology II	2 hours
TOTAL	4 hours

The certificate program is meant for teaching professionals in community colleges and secondary settings who teach college level courses and who need to meet the 18 hour coursework requirements to meet highly qualified requirements of the Higher Learning Commission.

CERTIFICATE: Psychology of Learning

Required Courses	Hours
PY 722 Theories of Learning	3 hours
PY 805 Psychology of the Adult Learner	3 hours
PY 811 Seminar in Human Growth/Development	3 hours
PY 812 Foundations of Assessment in Special Education and Student Support	3 hours
PY 860 Leading Processes to Meet Diverse Student/Needs	3 hours
PY 820 Response to Intervention in School Psychology	3 hours
TOTAL	18 hours

These courses or approved equivalents or substitutes must be taken. If equivalent courses were completed at the undergraduate level, graduate courses must be taken to fulfill the graduate hour requirements.

One academic year of supervised experience (internship) is required before the student may be recommended for full licensure as a school psychologist. The student may be given recommendation for provisional licensure as a school psychologist after completion of

the Ed.S degree. This includes completion of all MS and Ed.S course requirements. If a provisionally licensed student takes a position as a school psychologist in a school system that also employs a fully licensed and experienced school psychologist, this year may serve as a paid internship. This arrangement is possible only if the student takes a position in Kansas where adequate supervision can be maintained by the university. At least 50% of the internship must be completed in a public school setting.

Procedure for Licensure

Recommendation to the State Department of Education is made by Emporia State University. Recommendation for initial approval cannot be obtained until all courses except the internship on the degree and certification plan have been completed. Grades of B or above must be earned to receive the recommendation. Final approval for full licensure requires the completion of one school year's internship.

Non-Degree Early Childhood School Psychology (licensure only)

This licensure program is only for licensed kindergarten through 12th grade school psychologists who want to add the early childhood level to their certification. Applicants should contact the school psychology faculty for specific requirements.

SCHOOL LEADERSHIP/MIDDLE & SECONDARY TEACHER EDUCATION

Web: <http://www.emporia.edu/slmste>
Phone: 620-341-5776

Dan Stiffler, Department Chair
Megan O'Brien, Graduate Student Advisor

Graduate Faculty

Professors: Nancy Albrecht, Paul Bland, Edwin Church, Jerry Will.

Associate Professors: Kirsten Limpert, Neal Luo, Tim Marshall, John Morton, Dan Stiffler

Assistant Professor: Amanda Lickteig.

Graduate Programs

The graduate programs in the department of School Leadership/Middle & Secondary Teacher Education are designed to prepare personnel to assume leadership roles as lead teachers, building-leadership team members, coordinators, supervisors, principals, superintendents, and other central office personnel.

The Master of Science and licensure programs in Educational Administration qualify students for Building-Level Leadership licensure and District-Level Leadership licensure.

The Master of Science degree in Curriculum and Instruction offer three concentrations to prepare teachers to become staff development coordinators, curriculum specialists, and practitioners. Specific concentrations are 1) Curriculum Leadership, 2) Effective Practitioner, 3) National Board Certification and 4) Instructional Coach/Teacher Leader.

The Master of Education in Teaching degree provides two options: 1) a master's program for those who are already licensed teachers or are in another teaching profession outside of public education. 2) a master's program for those pursuing Restricted Licensure in Kansas. Students pursuing Restricted Licensure must be degree seeking students in the M.Ed. program – Option 2.

Admission and Retention Policies

Application for admission to all graduate programs listed must be initiated online at www.emporia.edu/grad/admissions Graduate Admission Application. Copies of official transcripts of all college credit must be provided by degree-seeking students. Students are expected to continuously demonstrate personal characteristics appropriate to the profession and, maintain a 3.0 GPA or better through their program. Degree seeking students must file a degree plan within their first year in the program and notify the Graduate School office of their intent to graduate during the semester preceding their semester of expected graduation.

COMPLETION OF THE ABOVE STANDARDS DOES NOT NECESSARILY GUARANTEE ADMISSION TO A DEGREE OR LICENSE/LICENSURE PROGRAM AT EMPORIA STATE UNIVERSITY.

Admission Requirements for Master of Science and Licensure Only for Educational Administration:

1. Admission to graduate study by the ESU Graduate School.
2. GPA of 2.75 on the last 60 hours of college course work for degree-seeking students or last 30 graduate hours for non-degree building level administration. GPA of 2.75 on the first 30 hours of graduate work for district level administration.
3. The applicant must be certified as a teacher/administrator (to perform a professional role in public school district level applicants, must be eligible for licensure as a building administrator). Students outside of Kansas are advised to contact their state departments of education to determine specific state licensing requirements.
4. The applicant must have a minimum of five years of accredited professional experience, to be eligible for the state building-level license.

Program Requirements:

Educational Administration – Building Leadership Level Pre-K12

Masters of Science and/or Licensure –Only Programs

Required Courses	Hours
ER 753 Research in Education	3 hours
ED 833 Beliefs, Values & Issues in Educational Practice	3 hours
ED 820 Curriculum Leadership: Models and Strategies	3 hours
ED 835 Cultural Influences & Educational Practice	3 hours
EA 811 Supervision and Evaluation	3 hours
ED 810 Supporting Technology Integration for School Leaders	3 hours
EA 830 School Leadership Theory	3 hours
EA 849 Educational Law & Regulations	3 hours
EA 888 School Systems Management	3 hours
EA 894 Field Experiences in Educational Administration: Building Level	3 hours
EA 895 Practicum in Educational Administration: Building Level	<u>3 hours</u>
Total	33 Hours

Program Requirements:

Educational Administration - District-Level Licensure- Only Program

Required Courses	Hours
EA 941 Business Administration in School Leadership	3 hours
EA 984 Educational Buildings and Facilities	3 hours
EA 986 District School Leadership	3 hours
EA 942 Leadership of Special Programs	3 hours
EA 997 Practicum I in Educational Administration District Level- Fall	3 hours
EA 998 Practicum II in Educational Administration: District Level-Spring	3 hours
Total	18 hours

Upon completion of the program requirements, the student is responsible for applying for licensure by contacting the Licensure Office of Emporia State University. Pending successful completion of all requirements, the Licensure Officer then recommends to the Kansas State Department of Education that the student be endorsed in the appropriate area.

Applicants for the district-level license must have completed 60 approved graduate hours beyond the bachelor's degree to qualify for licensure as a district administrator, but is not required to have all graduate hours completed as part of admission or completion of the district program at ESU.

Admission Requirements for Master of Education- Teaching (Option 1-non-licensure):

1. Admission to graduate study by the ESU Graduate School.
2. GPA of 2.75 on the 60 hours of college course work for those completing a master's degree.
3. Official transcripts of all college work.

Admission Requirements for Master of Education-Teaching (Option 2 – Restricted Licensure):

1. Admission to graduate study by the ESU Graduate School.
2. GPA of 2.75 on the 60 hours of college course work.
3. Receipt of official transcript showing award date of Bachelor's degree two or more years prior to application for admission
4. Documentation of a current, signed teaching contract for an appropriate* teaching position in the state of Kansas
5. Verification of passing scores for Praxis II content exam (prior to Aug. 1 for Fall or Dec. 1 for Spring) Sch Co./Lib Media take within first year of Restricted Licensure.
6. Official Transcript Review**
7. Verified Supervised Practical Experience (40 hours or more)
*Contract must be with a state accredited school and within the discipline of degree awarded, as well as meet requirements and regulations for restricted licensure within the state of Kansas
**Transcript review with ≤ 9 hours of content deficiencies. (For School Counseling and lab-based sciences ≤ 12 hours.)

MASTER OF EDUCATION – IN TEACHING

Emporia State University's Master of Education in Teaching (M.Ed.) helps teachers, library/media specialists, and school counselors develop their skills and knowledge of teaching. M.Ed. is a 36 credit hour program which completed online. Classes are available online during the spring, fall, and summer semesters. The M.Ed. is for any teacher, or person in a related field, who desires to obtain a master's degree. Option 1 of the degree does not lead to a teaching license or endorsement. Option 2 of the degree is associated with the Restricted Licensure program and leads to licensure. Option 2 requires the student to have a current teaching contract in the state of Kansas.

MASTER OF EDUCATION – TEACHING (Option 1-non-licensure)

Required Coursework (24 hours)

ED 886	Designing Instructional Programs	3 hours
ED 879	Classroom Management Through Positive Reinforcement	2 hours
SD 550	Survey of Exceptional Child	3 hours
OR

AND		
Library Media Electives		3 hours
Total Credit Hours Option 2		36 hours

Admission Requirements for Master of Science Degrees in Curriculum & Instruction and Master of Education in Teaching:

1. Admission to graduate study by the ESU Graduate School.
2. Official transcripts of all college work.
3. GPA of 2.75 on the 60 hours of college course work for those completing a master's degree or 2.75 on the last 30 graduate hours from a previously completed master's degree.

MASTER OF SCIENCE – CURRICULUM AND INSTRUCTION

The Curriculum & Instruction (C & I) Master's degree is a 34 credit hour program intended for individuals who teach or lead programs in all levels of public and private education. The C & I Master's Degree accommodates various areas of interest through four areas of concentration Curriculum Leadership, Effective Practitioner, National Board Certification or Instructional Coach/Teacher Leader. Classes are available online during the spring, fall, and summer semesters. Practicum is completed during the final fall or spring semester of the program.

Program Requirements

Master of Science in Curriculum & Instruction

ED 835 Cultural Influences & Educational Practice	3 hours
ED 810 Supporting Technology Integration for School Leaders	3 hours
ED 820 Curriculum Leadership: Models and Strategies	3 hours
ED 833 Beliefs, Values & Issues in Educational Practice	3 hours
ED 880 Contemporary Teaching & Learning Strategies	3 hours
ED 887 Developing Authentic Assessments	3 hours
ER 753 Research in Education	3 hours
ED 895 *Practicum in Curriculum & Instruction	3 hours
Total	24 hours

Students will select one of four areas of concentrations (9 hours).

Curriculum Leadership Pre-K-12

(9 credit hours from the following options)

EA 830 School Leadership Theory	3 hours
ED 865 Advanced Theory & Practice in Teaching	3 hours
ED 886 Designing Instructional Programs	3 hours
ED 837 Brain Based Learner	3 hours
Total	9 hours

Effective Practitioner Pre-K-12

(9 credit hours from the following options)

ED 837 Brain Based Learner	3 hours
IT 727 Integrating Technology into the Classroom	3 hours
EA 830 School Leadership Theory	3 hours
EA 811 Supervision and Evaluation	3 hours
ED 865 Advanced Theory & Practice in Teaching	3 hours
Total	9 hours

National Board Certification Pre-K-12

(9 credit hours)

NBC website:

<http://www.emporia.edu/jones/nbpts/process.html>

ED 842 National Board Certification Portfolio Development	3 hours
ED 844 National Board School Based Project I	3 hours
ED 846 National Board School Based Project II	3 hours
Total	9 hours

*All coursework is to be completed prior to the practicum.
Completion of NBPTS School Site Portfolio
Completion of NBPTS Assessment Center Exercises

Instructional Coach/Teacher Leader

(9 credit hours from the following options)

ED 818 Professional Development	3 hours
ED 819 Mentoring & Coaching	3 hours
EA 830 School Leadership Theory	3 hours
ED 865 Advanced Theory & Practice in Teaching	3 hours
ED 886 Designing Instructional Programs	3 hours
ED 837 Brain-Based Learning	3 hours
Total	9 hours

Total Required Course Credit Hours

24 hours

Concentration Elective Credit Hours

9 hours

Total Hours in Degree

33 hours

Transfer Credit: Up to nine credit hours can be authorized for degree-seeking students. Requests for transfer credit must be approved by department chair. The University of Transfer must be fully accredited. Workshops do not qualify. Before making any determination concerning transfer credits, ESU requires a transcript explanation, normally found on the back of official transcripts. All courses counted towards the degree must be completed within a 7-year period. University policy prohibits the transfer of courses where a grade of "C" or lower was obtained.

For full rules and restrictions regarding transfer credit visit

Wooseob Jeong, Dean

Kathie Buckman, Director, Emporia MLS Program
Elizabeth Hoffman, Director, South Dakota MLS Program

Dale Monobe, Director, Utah MLS Program
Pierina "Perri" Parise, Director, Oregon MLS Program
Jennifer Beckley, Director, Overland Park MLS Program

David Willis, Director, Colorado of MLS Program
Deana Brown, Director, Idaho MLS program

Graduate Faculty

Professors: Mirah Dow, Wooseob Jeong.

Associate Professors: Andrew Smith, Sarah Sutton.

Assistant Professors: Bobbie Bushman, Brendan Fay, Jinxuan Ma, Sandra J. Valenti, Emily Vardell, Michael Widdersheim.

SLIM Mission Statement

Educating successful library and information professionals with imagination, creativity, and innovation.

SLIM Vision Statement

Embracing an interdisciplinary culture of collaboration and diversity for the common good.

EMPORIA STATE UNIVERSITY has been teaching library science since 1902 and is the only library school in Kansas accredited by the American Library Association. SLIM began regional MLS programs in 1987 at the request of library professionals in areas of the country without schools of library and information studies. SLIM programs provide a flexible delivery method that enables the completion of a Master of Library Science degree in two years.

Unique attributes of all SLIM programs are current interest courses that feature trips to international locations funded by scholarships, a partnership with the Kansas Leadership Center that focuses on developing leaders in information organizations, and practicum courses that provide opportunities to apply skills learned in classes.

SLIM currently offers MLS programs in Emporia and Overland Park, Kansas; Denver, Colorado; Salt Lake City, Utah; Sioux Falls, South Dakota, Las Vegas, Nevada; Boise, Idaho and Portland, Oregon. Each program is offered in a unique combination of face-to-face, weekend-intensive classes combined with online learning. Although a number of fully-online courses are available, it is not possible to complete the program entirely online.

Each MLS program uses a cohort model. Students are recruited for a particular starting date at a specific location and move through the curriculum together in a six-semester cycle. Classes meet two

weekends per course, on Friday evenings and all-day Saturday. Although all of SLIM's courses are delivered through a web-based course management system, SLIM faculty commute to the various program locations for face-to-face weekend instruction. Each MLS program location has a Regional Director who serves as a student advisor and is available in person for consultation during class weekends, by telephone and e-mail, and during office hours for individual appointments. The Regional Director also facilitates practicums, works as an advocate in the local area for students, and shares employment information.

The rewards for students in the SLIM Regional Education Program are the opportunities to earn the MLS and to develop a network of friends and colleagues. The rewards for SLIM come from the participation and perspective of many more students from multiple backgrounds, cultures, and ways of life than would be possible if the student body were limited only to those able to attend classes on the home campus.

THE MASTER OF LIBRARY SCIENCE CURRICULUM

The SLIM Master of Library Science program curriculum presents a dynamic mix of theory, tools and application courses, and context-sensitive electives. The curriculum reflects an essential core of knowledge for information professionals, including:

- a professional philosophy and ethic of service;
- an understanding of human behavior in terms of information seeking and social interaction;
- an understanding of the information transfer process—how information and knowledge is created, recorded, disseminated, organized, diffused, utilized, preserved, and destroyed;
- comprehension of information engineering—the theories supporting the organization of information for effective use;
- a working knowledge of management theory to enable leadership of an information agency; and
- knowledge of the global information infrastructure as it interfaces with local, regional, and national networks.

The theoretical base and working knowledge of information management tools prepares the student to apply their learning in elective courses designed for various career paths within the field of library and information management. A capstone course provides an opportunity to synthesize the educational experience in preparation for entering the field.

Required Courses

LI 801 Foundations of Library and Information Science	3 hours
LI 802 Information-Seeking Behavior and Reference Services	3 hours
LI 804 Organization of Information	3 hours
LI 805 Management in Information Organizations	3 hours
LI 810 Research in Library and Information Science	3 hours
LI 855 Collection Development and Management	3 hours
LI 880 Capstone Course: Assessing the MLS Experience	1 hour

Total

19 hours

Technology Requirement – select one:

LI 815 Information Technology	3 hours
LI 843 Web Design and Development	3 hours
LI 844 Database Design	3 hours
Or	
Another approved Technology course	

Total 3 hours

Elective Course Credit Hours: 14 hours

Total Course Credit Hours for MLS Degree 36 hours

MASTER OF LIBRARY SCIENCE WITH A CONCENTRATION

In addition to the core courses, students may choose various courses in special topics, based on their interest and career goals. Some topics have been formalized into nine-credit-hour concentrations, and students may elect to complete a concentration as part of their MLS program. Upon successful completion of the requirements for a particular concentration, a statement is added to the student's transcript that shows the concentration completed under the degree awarded. (For example: Master of Library Science, Major: Library Science, Concentration: Youth Services.) Only one concentration can be added to a student's transcript.

The following concentrations are currently available:

MASTER OF LIBRARY SCIENCE— CONCENTRATION IN ARCHIVES STUDIES

Required Courses and Course Credit Hours:

LI 809 Introduction to Archives	3 hours
LI 818 Archival Arrangement and Description	3 hours
LI 827 Preservation Strategies	3 hours

Total Course Credit Hours for Concentration in Archive Studies 9 hours

MASTER OF LIBRARY SCIENCE – CONCENTRATION IN INFORMATICS

Required Courses

LI 800 Introduction to Informatics	3 hours
------------------------------------	---------

Must take 2 of the following courses:

LI 819 Information Retrieval	3 hours
LI 844 Database Design	3 hours
LI 887 System Analysis and Design	3 hours

Total Course Credit Hours for Concentration in Informatics 9 hours

MASTER OF LIBRARY SCIENCE— CONCENTRATION IN LEADERSHIP AND ADMINISTRATION

Required Courses

LI 850 Leadership in Information Organizations	3 hours
--	---------

Select two (6 hours)

LI 811 Community Needs Analysis	3 hours
LI 825 Multicultural Resources and Services for Libraries	3 hours
LI 833 Resources and Services for Diverse Populations	3 hours
LI 859 Project Management in Information Organizations	3 hours
LI 863 Current Issues in Management in Information Organization	1-3 hours
LI 868 Advocacy and Information Organizations	3 hours
LI 870 Practicum	1-3 hours
LI 893 Seminar in Administrative Theory	3 hours

Total Course Credit Hours for Concentration in Leadership and Administration 9 hours

MASTER OF LIBRARY SCIENCE— CONCENTRATION IN YOUTH SERVICES

Required Courses and Course Credit Hours:

LI 829 Resources and Services for Early Learners	3 hours
LI 831 Resources and Services for Children	3 hours
LI 832 Resources and Services for Young Adults	3 hours

Total Course Credit Hours for Concentration in Youth Services 9 hours

MLS PROGRAM OBJECTIVES

SLIM MLS program outcomes that are related to teaching and learning are based on what students are to know and be able to do as a result of their course work. SLIM's web site states specifically that graduates of the SLIM Master of Library Science degree program will be able to:

1. Articulate a philosophy of ethical and client-centered information services for the library and information professions.
2. Explain and implement the development, maintenance, and management of collections and resources to meet specific information needs.
3. Explain, use, maintain, and develop systems to organize and retrieve recorded knowledge.
4. Employ current and emerging technologies effectively for communication, and to search for, identify, repackage, and deliver information resources.
5. Retrieve, evaluate, and synthesize information resources to fulfill an information needs assessment; evaluate the usefulness of these resources to the user.
6. Evaluate, critique, and discuss new research in the field; assess library or information problems and identify an appropriate research method.
7. Demonstrate a commitment to lifelong learning by participating in professional development activities and disseminating new information to colleagues and patrons.
8. Aid in effective and appropriate change in library and information services through collaboration, communication, and collegiality.

ARCHIVE STUDIES CERTIFICATE

The Certificate in Archives Studies requires 18 credit hours of coursework, including three credit hours of practical experience via a practicum or internship. Although it is encouraged to apply for the Archives Studies Certificate program while enrolled in the MLS

degree or immediately following its completion, the MLS degree or any other master's degree is not required for admission to the Archives Studies Certificate program.

Required Course Credit Hours (9 hours)

LI 809 Introduction to Archives	3 hours
LI 818 Archival Arrangement and Description	3 hours
LI 827 Preservation Strategies	3 hours

Electives Course Credit Hours (9 hours)

LI 848 Issues in Preservation, Access, and Digitization	3 hours
LI 849 Records and Information Management	3 hours
LI 873 Archives Studies Certificate Practicum	3 hours
LI 885 Bibliographic and Research Methods in Archives	3 hours
MLS Elective Courses totaling 3 credit hours approved by the faculty	3 hours

Total Course Credit for Archive Studies Certificate 18 hours

INFORMATICS CERTIFICATE

Required Courses:

LI 800 Introduction to Informatics	3 hours
LI 819 Information Retrieval	3 hours
LI 844 Database Design	3 hours
	9 hours

Must select 3 of the following:

LI 887 System Analysis and Design	3 hours
LI 888 Information Technology Project Management	3 hours
LI 889 Knowledge Management	3 hours
LI 874 Informatics Practicum	3 hours

Total Course Credit Hours for Informatics Certificate 18 hours

INFORMATION, TECHNOLOGY, AND SCIENTIFIC LITERACY CERTIFICATE

Required Courses:

LI 791 or PS 791 Science, Technology, Engineering, and Mathematics Classrooms and Competitions: Asking Questions, and Defining Problems	3 hours
LI 792 or PS 792 Key Literacy Connections in STEM Subjects: Conducting Investigations, Analyzing, And Interpreting Data	3 hours
LI 793 or PS 793 Advancing and Defending New Ideas: Engaging an Argument from Evidence	3 hours
LI 794 or PS 794 STEM Skills for a Deep Technical Workforce: Obtaining, Evaluating, and Communicating Information	3 hours

Total Course Credit Hours for Information, Technology And Scientific Literacy Certificate 12 hours

LEADERSHIP AND ADMINISTRATION IN INFORMATION ORGANIZATIONS CERTIFICATE

(Students with previous masters-level management course)

Required Courses:

LI 850 Leadership in Information Organization	3 hours
---	---------

Select fifteen-hours of credit from any of the following courses:

LI 811 Community Needs Analysis	3 hours
LI 825 Multicultural Resources and Services for Libraries	3 hours
LI 833 Resources and Services for Diverse Populations	3 hours
LI 859 Project Management in Information Organizations	3 hours
LI 863 Current Issues in Management in Information Organizations	1-3 hours
LI 868 Advocacy and Information Organization	3 hours
LI 870 Practicum	1-3 hours
LI 893 Seminar in Administrative Theory	3 hours

Total Course Credit Hours for Certificate in Leadership and Administration in Information Organizations 18 hours

(Students with no previous masters-level management course)

Required Courses:

LI 805 Management in Information Organization	3 hours
LI 850 Leadership and Information Organizations	3 hours

Select twelve-hours of credit from any of the following courses:

LI 811 Community Needs Analysis	3 hours
LI 825 Multicultural Resources and Services for Libraries	3 hours
LI 833 Resources and Services for Diverse Populations	3 hours
LI 859 Project Management in Information Organizations	3 hours
LI 863 Current Issues in Management in Information Organizations	1-3 hours
LI 868 Advocacy and Information Organizations	3 hours
LI 870 Practicum	1-3 hours
LI 893 Seminar in Administrative Theory	3 hours

Total Course Credit Hours for Certificate in Leadership and Administration in Information Organizations 18 hours

YOUTH SERVICES CERTIFICATE

Required Courses:

LI 825 Multicultural Resources and Services for Libraries	3 hours
LI 829 Resources and Services for Early Learners	3 hours
LI 830 Current Issues in Youth Services.	2 hours
LI 831 Resources and Services for Children	3 hours
LI 832 Information Resources and Services for Young Adults	3 hours

Select one:

LI 755 Special Topics: School Library Media Summer Institute	1 hour
LI 857 Advanced Programming for Youth Services	1 hour

Select one:

LI 822 Multiple Literacies in Libraries	3 hours
LI 870 Practicum	3 hours

Required Course Credit Hours 14 hours
Elective Course Credit Hours 4 hours
Total Course Credit Hours for Youth Services Certificate 18 hours

DUAL DEGREE PROGRAMS

To satisfy the need for library and information management professionals with subject specializations, SLIM has developed coordinated dual master's degree programs utilizing some courses taken for one degree as electives for a second degree at Emporia State University. For information about cooperative degrees in history, music, business, and English, contact SLIM at 1-800-552-4770 (toll free) or 620-341-5203. Students interested in obtaining dual degrees should discuss their plans with advisors in the respective programs as early as possible to coordinate their schedules effectively.

SCHOOL LIBRARY MEDIA LICENSURE

SLIM and The Teachers College at Emporia State University are authorized by the Kansas State Department of Education to prepare teachers who hold a state Kansas Teaching License to become licensed School Library Media Specialists. School Library Media Licensure requires 29 hours of selected courses within the Master of Library Science curriculum. The admission requirements are the same as for the MLS degree.

Required Courses and Course Credit Hours:

LI 801 Foundations of Library and Information Management	3 hours
LI 802 Information-Seeking Behavior and Reference Services	3 hours
LI 804 Organization of Information	3 hours
LI 815 Information Technology	3 hours
LI 831 Resources and Services for Children	3 hours
LI 832 Resources and Services for Young Adults	3 hours
LI 851 Managing the School Library Media Center	3 hours
LI 855 Collection Development and Management	3 hours
LI 858 Information Literacy and Instructional Collaboration in School Libraries	2 hours
LI 876 School Library Media Elementary Practicum	1 hour
LI 877 School Library Media Secondary Practicum	2 hours

Required School Library Media Courses and Course Credit Hours **29 hours**

THE MASTER OF LIBRARY SCIENCE WITH SCHOOL LIBRARY MEDIA LICENSURE

One of the Kansas State Department of Education's requirements to become a School Library Media Specialist, in addition to holding a Kansas State Teaching License and completing the School Library Media Licensure 29-credit-hour program, is to complete a master's degree in library science, education, or other approved academic program. To fulfill this requirement, many School Library Media Licensure students choose to complete their Master of Library Science (MLS) degree concurrently with their School Library Media Licensure program.

To complete SLIM's MLS, students must complete the following requirements in addition to the 29 credit hours of the School Library Media Licensure program:

Required Courses

LI 810 Research in Library and Information Science	3 hours
LI 880 Capstone	1 hour

Required School Library Media Courses Credit Hrs	29 hours
Elective Course Credit Hours	3 hours
Required MLS Course Credit Hours	4 hours
Total Course Credit Hours for MLS Degree with School Library Media Licensure	36 hours

DOCTOR OF PHILOSOPHY— LIBRARY AND INFORMATION MANAGEMENT

Overview:

The doctoral program enables students to conduct research that will contribute to society's understanding of the creation, diffusion, and utilization of information. The program also places special emphasis on developing effective teachers. The program draws upon the strengths of SLIM's academically diverse faculty, a unique curriculum designed for today's working scholar, and an environment of faculty-student interaction.

The SLIM doctorate does not require a traditional residency on campus; instead, students meet residency requirements by attending weekend-intensive classes that meet two times per course for a total of 10 hours each weekend. The classes are held at Emporia State University-Kansas City in Overland Park (Kansas City area), Kansas. Scholarships to cover travel expenses are available.

DOCTOR OF PHILOSOPHY CURRICULUM

The doctoral curriculum is a five-tier process. Coursework in the first tier introduces students to library and information science research and theory. In the second and third tier courses, students examine fields related to their research interests in greater depth. Student may take courses from the three tiers simultaneously. Fourth tier courses prepare students for the qualifying to create research proposals and dissertations, and teaching. Upon successful completion of the qualifying exam and selection of the dissertation chair, students will advance to the fifth tier. The fifth tier is dedicated to proposing and writing the dissertation. After approval of the research proposal, students advance to Ph.D. candidacy status.

Tiers one and two course sequences are:

LI 900 – First fall semester
LI 903 – First fall semester
LI 892 – First fall semester
LI 890 – First spring semester
LI 891 – First spring semester
LI 904 – Second fall semester
LI 893 – Second fall semester
LI 905 – Second spring semester
LI 894 – Second spring semester
LI 940 – Second summer semester

Tier three courses provide opportunities for students to 1) customize their studies to deepen their knowledge of information science via additional SLIM graduate courses; 2) include concentrations in Instructional Design Technology and Information Systems; or 3) develop an approved specialized course of study. Tier four is preparation for the dissertation proposal on a student-centered schedule, which allows enrollment in directed readings for up to nine credit hours. Tier five is dedicated to developing the proposal and writing the dissertation under the guidance of the dissertation committee chair.

Tier 1: Introduction to Research and Theory

LI 890	Advanced Research Strategies	3 hours
LI 900	Introduction to Doctoral Studies	1 hour
LI 903	Research Philosophy	3 hours
LI 904	Research Strategies: Quantitative Methods and Theory	3 hours
LI 905	Research Strategies: Qualitative Methods and Theory	3 hours
Total Course Credit Hours		13 hours

Tier 2: Foundational courses

The four foundational fields of the curriculum are: Information Psychology, Information Transfer, Information Organization, and Administrative Theory. Students are required to take all four foundational courses in Tier 2 to ground their doctoral research in theoretical frameworks that support contemporary professional practice.

LI 891	Seminar in Information Transfer	3 hours
LI 892	Seminar in Information Psychology	3 hours
LI 893	Seminar in Administrative Theory	3 hours
LI 894	Seminar in Organization of Information	3 hours

Total Course Credit Hours **12 hours**

Tier 3: Advanced work in concentrations

To meet qualifications for the two pre-determined concentrations, students may choose 12 credit hours from the courses offered in this section (below) for Instructional Design Technology or Information Systems. For students who do not elect to pursue one of the two defined concentrations, their transcripts will state "Doctor of Philosophy in Library and Information Management." For students who elect to pursue one of the two defined concentrations, the transcript will also state "with a concentration in Instructional Design Technology" or "with a concentration in Information Systems," as appropriate. Students who elect to take 12 credits of 800-level SLIM courses, 700-and-above-level ESU graduate courses from other ESU departments (except Instructional Design Technology or Information Systems), or 700-and-above-level graduate programs in other accredited institutions of higher learning, will not have a concentration on the diploma; however, the concentration will be evident on their transcripts. Courses chosen for Tier 3 must be appropriate for the student's doctoral studies and approved by the doctoral coordinator and the SLIM dean in advance of registration. Credits and available courses for the Instructional Design Technology Concentration and Information Systems concentrations are listed below:

Instructional Design Technology**(choice of 12 credit hours)**

IT 800	Instructional Design	3 hours
IT 810	Multimedia Design	3 hours
IT 820	Designing/developing Web-based Instruction	3 hours
IT 830	Contemporary Issues in Distance Education	3 hours
IT 850	Implementation of Corporate Learning Systems	3 hours

Information Systems Concentration**(choice of 12 credit hours)**

IS 805	Special Topics in Computer Information Systems	1-3 hours
<i>Prerequisite: permission of instructor.</i>		
IS 813	Information Technology Project Management	3 hours

IS 823	Systems Analysis and Design	3 hours
<i>Prerequisite: IS213.</i>		
IS 843	Electronic Commerce	3 hours
<i>Prerequisite: Background in Information Technology.</i>		
IS 872	Information Systems for Managerial Decision Making	3 hours
<i>Prerequisite: background in computing.</i>		

**Informatics Concentration
(choice of 12 credit hours)**

LI 800	Introduction to Informatics	3 hours
LI 819	Information Retrieval.	3 hours
LI 887	Systems Analysis and Design	3 hours
LI 889	Knowledge Management	3 hours

Tier 4: Teaching, readings, and examination

LI 940	Teaching and Learning in Organizations	3 hours
LI 946	Directed Readings	1 hour
Directed readings prepare students for qualifying exams and proposal/dissertation research. Students are required to take at least one credit of LI 946. Directed readings may include concentration areas of studies.		

Total **4 hours**

Tier 5: Proposal and Dissertation (15 hours)

Upon successful completion of the qualifying examination units and selection of the dissertation chair or co-chairs, the student will enroll in LI 947 to write the proposal under the supervision of the committee chair/co-chairs. After the proposal has been presented publicly and accepted by the student's committee and the SLIM dean, the student will advance to degree candidacy and will enroll in LI 950 to write the dissertation under the supervision of the committee chair/co-chairs. The dissertation must be approved by the dissertation committee and the SLIM dean prior to being scheduled for public presentation.

LI 947	Dissertation Proposal	3 hours
LI 950	Dissertation	12 hours

Students must complete at least 12 hours of dissertation credit and enroll in at least three credits each semester until the dissertation is completed or until eight years after admission to the doctoral program has expired. Dissertations are expected to contribute new Knowledge to the field through high quality research. Dissertations will be supervised by a committee of at least three qualified members of the doctoral faculty, one of whom must be from outside the School of Library and Information Management and may be from a different university. Students must submit a Thesis/Dissertation Committee Declaration Form from the Graduate School. Students who have a concentration in Instructional Design Technology or Information Systems will have a committee member from that department; students with an approved concentration from another institute of higher education will also have a representative committee member from that discipline/institution. Upon completion of the dissertation, all students will present their research during an oral examination conducted and evaluated by the dissertation committee and open to the public.

Continuous Enrollment

Students must be enrolled in graduate courses in fall and spring semesters at ESU or other approved institutions or be enrolled in LI 949 Continuous Enrollment under the direction of the coordinator or committee chair.

LI 949 Continuous Enrollment 1 hour

Overview of Doctoral Course Requirements

The Graduate School requires that Ph.D. students complete 90 credit hours; 34 credits will be accepted from previous graduate degrees from accredited institutions.

Tier 1	13 credit hours
Tier 2	12 credit hours
Tier 3	12 credit hours
Tier 4	4 credit hours
Tier 5	15 credit hours
Total	56 credit hours

ADMISSIONS

To begin your studies in the School of Library and Information Management, you must be admitted to the Graduate School at Emporia State University.

Please send all materials directly to the ESU Graduate School at:

Graduate School
Emporia State University
1 Kellogg Circle
Campus Box 4003
Emporia, KS 66801-5087

Graduate School Application Process for MLS program, School Library Media Licensure, Archive Certificate, and Master of Science in Informatics

Academic requirements are a BA or BS degree from an accredited four-year institution with an undergraduate GPA of 3.0 for full admissions. Applicants with a GPA under 3.0 may be considered for probationary admission. Applicants are expected to demonstrate competence in written and oral communication.

It is essential that applicants apply and receive acceptance into the ESU Graduate School prior to being considered for acceptance by SLIM. Following acceptance by the ESU Graduate School, prospective students should begin the SLIM admission process.

1. For the Master of Library Science, your degree objective is MLS with a major in Library Science (LIS). For the Archives Studies Certificate, your degree objective is CRT with a major in Archives Studies (ARC). For the Library Media Specialist Licensure, your degree objective is LIC with a major in Library Media Specialist (LM). If you have a postgraduate degree or have taken graduate course work, you must list those institutions as well. You must apply for admission online at <http://www.emporia.edu/grad/admissions/>

2. Transcripts. Arrange to have an official transcript from each institution attended sent directly to the Graduate Office (see address above or on application). The grade point average that is used for admission purposes is always based on your bachelor's degree. Students are expected to have a grade point average of 3.0 overall or in the last 60 hours of course work toward the initial bachelor's degree. We consider a post-graduate degree, or graduate courses taken, to give us a full picture of your academic record.
3. Letter of reference from two people who know you and your work (academic and/or community work) that address your intellectual capability, ability to express thoughts orally, ability to express thoughts in writing, maturity, and motivation. The letters should also include how long the writers have known you and their relationship to you (teachers, colleague, co-worker, etc.). References may be sealed or open.
4. Current resume.
5. An advising interview.
6. A written two-page statement of objectives, double spaced (details may be found on the SLIM web site <http://www.emporia.edu/slim> under Programs: Master of Library Science).

Each application will be considered by applying the admissions criteria on an individual basis. Academic requirements, for instance, may be waived in favor of applicants of unusual ability and background where rationale for that waiver can be demonstrated. However, only those applicants showing strong evidence of intellectual promise and leadership potential will be admitted.

Graduate School Application Process for Doctoral Students

It is essential that applicants apply and receive acceptance into the ESU Graduate School prior to being considered for acceptance by SLIM. Following acceptance by the ESU Graduate School, prospective students should begin the SLIM admission process.

The application form is available at <http://www.emporia.edu/grad/admissions/>. For the doctoral program application, your degree objective is PhD and the major is LIM (Library and Information Management). You must apply for admission online at <http://www.emporia.edu/grad/admissions/>. Other documents to send to the Graduate School are:

Other documents to send to the Graduate School are:

- GRE scores (combine score of 304 or more on the verbal and quantitative exam portions)
- Official transcripts sent from each institution you have attended
- TOEFL scores as evidence of fluency in English, when appropriate (score of 650) (international students only)

Following admission to the Graduate School, you must submit additional material to the Graduate School for consideration by the SLIM doctoral faculty:

- A sample of written work that demonstrates your scholarly writing ability (published journal article, graduate research paper, etc.)
- A 200-300 word statement outlining your career goals and research interests.
- Current resume

In some cases, an applicant who does not meet the above criteria may be admitted on academic probation. Academic probation allows a student the opportunity to demonstrate their ability to succeed with graduate level course work.

SLIM has specific hardware, software and network requirements for all students that are specified on the SLIM website at <http://tinyurl.com/SLIMtechnology> Computer technology is integrated throughout the curriculum, including the use of Canvas, ESU's learning management system, and use of video-conferencing software. All students must have their own devices, high-speed Internet access, and current software for home use by the beginning of all SLIM programs. Full program participation requires extensive study and participation. It is not usually possible to complete the program successfully relying only on equipment and resources at work or in a library.

Check with the financial aid office for full details about possible funding for purchase of computer equipment at <https://www.emporia.edu/finaid/>

SOCIAL SCIENCES

Web: <http://www.emporia.edu/socsci/>

Michael Smith, Department Chair
Amanda Miracle, Graduate Program Director
Shannon Hall, Post-Baccalaureate Teacher Certification,
Teachers College

Graduate Faculty

Professors: Charles Brown, C. Edward Emmer, Philip Kelly, Ellen Hansen, Christopher Lovett, Darla Mallein, Gregory Schneider, Michael Smith, Joyce Thierer.

Associate Professors: John Barnett, Amanda Miracle.

Assistant Professors: , Deborah Hann, Maire Johnson.

The Department of Social Sciences offers the Master of Arts (MA) in History with concentrations in thesis, non-thesis exams, and social sciences education. We also offer a program for post-baccalaureate teacher licensure in Social Sciences. All graduate programs are available online.

MA Degree, History

The MA program in History at Emporia State University is designed to transform students of history into historians. The program is intended to both broaden and to sharpen students' study of the subject. The MA degree may be obtained by following three degree concentrations: thesis, non-thesis (exams), and social sciences education. Those who successfully complete this program are highly motivated, interested in the factual and theoretical aspects of the field, and able to demonstrate through a variety of written and oral forms their commitment to excellence. Working together, the faculty and students create an atmosphere in which the requisite skills in critical thinking, research, and writing are taught, explained, nurtured, and evaluated. The program produces graduates who attain a level of performance and expertise that allows them to move on to additional graduate studies, teaching, archival work, public history, or other activities related to the discipline.

Admission Requirements

Minimum admission requirements (NOTE: meeting these minimums does not guarantee admission.)

- bachelor's degree with overall GPA of 3.0;
- at least 12 hours of coursework in history, with 3.0 GPA in these courses;
- writing sample deemed "Satisfactory" by Graduate Committee.

Applicants for the MA program in History must submit to the Graduate School:

- a completed application form;
- a 1- to 2-page statement of purpose;
- 2 letters of recommendation from college instructors or employers addressing the applicant's aptitude for graduate study;
- thesis, or non-thesis, option: a writing sample;
- social sciences education option: a sample lesson plan.
- The statement of purpose should briefly discuss the applicant's career goals and scholarly interests. The applicant should explain how these scholarly interests align with faculty expertise in the department.

- The writing sample will be evaluated for basic writing

competence, analytical ability, and engagement with primary and secondary historical sources. Any one of the following examples can be used to fulfill this application requirement:

- Paper of 4–10 pages from an upper-division college course, preferably in history, though papers from humanities or social sciences courses are also acceptable.
- Book review (3–6 pp., 1000–2000 words): Summarize and evaluate a recent history study of your choosing. History journals and scholarly sites such as H-Net list new books as they are published. H-Net's Review Guidelines (<http://www.h-net.org/reviews/guidelines.php>) provide a standard overview of history book reviews.
- Research proposal (4–6 pp. including brief bibliography, 1500–2000 words): Develop a proposal for a research project suitable for a scholarly article of 25–30 pages or for a thesis of 60–90 pages using library and/or online resources. Submit a brief proposal a) defining your research question, b) explaining its significance, and c) listing no more than 5 primary and 5 secondary sources.
- The sample lesson plan must be tied to state standards. It should include behavioral objectives, materials needed to teach the lesson, an introductory activity, detailed procedures that explain the learning activities, and a description of how the objectives will be assessed. Applicants should also provide a rationale for their objectives, activities, and assessment.
- Applicants may use the same letters of recommendation for GTA applications (see below).
- The Graduate Committee will evaluate the applicant's capacity for advanced study in history based on writing ability, overall GPA, history GPA, and recommenders' comments. The Graduate Committee will also consider whether the applicant's scholarly interests align with those of faculty in the department. If the applicant does not meet the minimums outlined above, the Graduate Committee can consider up to 12 hours of graduate coursework in history taken at ESU under non-degree-seeking status or 9 hours of graduate coursework in history taken at another institution.
- Each member of the Committee will independently evaluate the applicant's admission file, rating the writing sample as "Satisfactory" or "Unsatisfactory" and recommending rejection, full admission, conditional admission, or probationary admission.
 - full admission: no restrictions
 - conditional: used for graduating seniors, who must obtain a bachelor's degree before admission. Their final GPA must be evaluated, and if necessary they will be admitted on a probationary basis.
 - probationary: students must achieve a 3.0 GPA in their first 6 or first 9 hours of study. The Graduate Committee members should indicate a level of probation in their recommendation.
- The Graduate Committee will then make a decision about the applicant's status. Members may collectively decide to override the requirement of 12 hours in History or other aspects of the minimum requirements. The Graduate Committee will propose a course of action, which all members will vote upon. The proposed course of action must receive at least 2 out of 3 votes to pass. The Graduate Program Director will notify the Graduate Office and the applicant of the Committee's decision.

Graduate Assistantship Awards and Renewals

- The Department of Social Sciences offers teaching assistantships to students in the History MA program. Graduate Teaching Assistants (GTAs) usually work with faculty teaching introductory courses in geography, US history, or world history. Assistantships may extend through the full academic year (fall and spring semesters) or for one semester only. The number of positions and the salary amounts are dependent on annual funding; typically the department has five to six openings per academic year. GTAships are generally limited to 4 semesters and must be renewed each academic year.
- GTAs must hold a bachelor's degree (BA, BS, or BSE) from an accredited college or university at the time they take up their duties. In addition to other policies stipulated by the Graduate Policy Handbook, they must be admitted, enrolled full-time in the History MA program, and available to work in person at the Emporia campus for the duration of their appointment.
- Award and renewal decisions on Graduate Teaching Assistantships are made every spring semester for the fall and spring semesters of the next academic year.
 - Returning GTAs should notify the MA Coordinator by February 1 if they wish to renew their position. Renewal applications should include a self-reflective letter and a letter of recommendation from a professor who has supervised their assistantship. These materials will be made available to all tenured and tenure-track History faculty.
 - New applicants should submit assistantship applications to the Graduate School by March 15. Applications received after this date will be considered if positions remain unfilled.
- The Graduate Committee will review renewal and new applications by April 1.
 - The Graduate Committee will consider each renewal application on the basis of the applicant's graduate coursework and teaching record. They will then vote on each renewal request, which must receive a plurality of votes to be granted.
 - The Graduate Committee will consider each new application on the basis of the student's undergraduate record and graduate record, if any. Each committee member shall rank new applicants. The Graduate Program Director will tabulate the rankings and distribute them to committee members, who will then vote on which applicants will receive full-year or part-year positions. They will also vote on a ranked list of alternates.
 - The Graduate Program Director, in consultation with faculty who supervise GTAs, will assign GTAs for the upcoming academic year.
- If a GTA's semester GPA falls between 2.5 and 3.0, the Graduate Committee will determine on a case-by-case basis whether that GTA may retain their position. If the semester GPA falls below 2.5, the Graduate School will automatically terminate the position, as per their official Graduate Policy Handbook.
- All GTAs are required to attend the department orientation session held just prior to the start of classes in August.

Program Structure

- Graduate students elect to pursue a concentration within the MA program. Beyond the stipulations below, they will have latitude in choosing classes that meet their interests and career goals, with the approval of the Graduate Program Director.

- All students must take the following courses in their first 12 hours of graduate study:
 - 1 readings seminar (HI 710 or HI 740, 3 hours);
 - HI 701, US Historiography to 1877 (3 hours) or HI 702, US Historiography since 1877 (3 hours)
- At least 22 hours must be earned in courses numbered 700 and above.
- Other coursework can include additional readings seminars, research seminars, directed readings courses, or internships.
- Students may apply a maximum of 6 hours of directed readings to their degree plan. These classes function like an independent study: students find an instructor who agrees to oversee their work in a 1- or 2-credit course. In exceptional circumstances, students may ask the Graduate Program Director for permission to take a 3-credit directed readings.
- Students must obtain approval from the Graduate Program Director before enrolling in courses from outside the department or in 3-credit directed readings courses.
- When students complete 12 hours of graduate study, they reach a decision point for the three degree options.
 - All students must apply to the Graduate Committee for degree candidacy, indicating their chosen degree option and their advisory committee. Students may not enroll for classes beyond these 12 hours until they have filed the form.
 - The 3 faculty members on the advisory committee will evaluate the student's thesis/project and defense or written and oral exams. Students select the members with guidance from the Graduate Program Director. Only full-time tenured or tenure-track History faculty may serve as chairs.

MA in History—Thesis Option: No Concentration

Historiography seminars 6 hrs. required;

HI 701	3 hours
HI 702	3 hours

Research seminars 6 hours required:

HI 815	3 hours each (<i>may be repeated if course has different topics</i>)	6 hours
--------	--	---------

Readings seminars 6 hours required:

HI 710	3 hours
HI 740	3 hours

(each may be repeated if course has different topics)

First year elective 3 hours

One 500-level History course taken with advisor's approval in the first year	3 hours
--	---------

Electives 9 hours

*Other Electives (may include graduate Courses outside history)	9 hours
---	---------

Thesis:

HI 890	6 hours
--------	---------

Total Required

36 hours

*Students work with advisor to choose appropriate coursework outside history.

MA in History—Non-Thesis Option: No Concentration

Historiography seminars 6 hrs. required:

HI 701	3 hours
HI 702	3 hours

Research seminars 6 hours required:

HI 815	3 hours each (may be repeated if course has different topics)	6 hours
--------	---	---------

Readings seminars 6 hours required:

HI 710	3 hours
HI 740	3 hours

(each may be repeated if course has different topics)

First year elective 3 hours

One 500-level History course taken with advisor's approval in the first year

3 hours

*Other electives (*may include graduate courses Outside history*)

14 hours

Master's Exam 1 hour required:

HI 895	1 hour
--------	--------

Total Required

36 hours

*Students work with concentration advisor to choose appropriate course work outside history.

MA in History – Social Sciences Education Concentration – Non Thesis Only

Historiography Seminars (6 hours required):

HI 701	3 hours
HI 702	3 hours

Readings seminars (6 hours required)

HI 710	3 hours
HI 740	3 hours

*Specialty area(s)

12 hours

SS 740	3 hours
ED/EL 865	3 hours
IT 700	3 hours

MA Project

HI 894	3 hours
--------	---------

Total Required Hours

36 hours

HISTORY CERTIFICATE

Required:

American Historiography Seminars (6 hours required):

HI 701	3 hours
HI 702	3 hours
Electives	12 hours

(Elective Reading courses both in American and World History)

Total Required Hours

18 hours

PUBLIC HISTORY CERTIFICATE

Core (3 hours)

HI 701: US Historiography Through Reconstruction	3 hours
HI 702: US Historiography Since Reconstruction	3 hours

Electives (9-11 hours)

HI 701: US Historiography Through Reconstruction	3 hours
HI 702: US Historiography Since Reconstruction (if <i>not</i> taken to satisfy core requirement)	3 hours
HI 530: Santa Fe Trail	*1-2 hours
HI 595: Preserving the Past Through Performance	*3 hours
HI 710: Readings in World History	**3 hours
HI 740: Readings in US History	**3 hours
HI 892: Museum Internship	3-6 hours
AN 701: Anthropology of Great Plains	1-3 hours
PO 510: Nonprofit Management	*3 hours

Capstone (1-3 hours)

HI 790: Directed Readings I	1-3 hours
-----------------------------	-----------

*Courses offered at both the undergraduate and graduate level must be taken at the graduate level to count toward the graduate certificate

**HI 710 and HI 740 may each be repeated if not the same topic.

Total:

15 hours

Satisfactory Progress

- Satisfactory progress entails a minimum GPA of 3.0. For all graduate courses at all levels, B- or above constitutes a passing grade while a C+ or below constitutes a failing grade. If a student earns a failing grade in a required course, the course must be retaken.
- After students admitted on probation have completed a minimum of 6 hours of graduate study, the Graduate Committee will decide if they are making satisfactory progress so that probationary status can be repealed.
- Students who fail to achieve a minimum GPA of 3.0 in any semester will be put on probationary status by the Graduate School.
- In all cases of probationary status, that status must be repealed before candidacy can be granted.

Graduation Requirements

- Courses taken to fulfill undergraduate deficiencies do not count toward graduate program requirements.
- Students completing a thesis must select 3 faculty members for their advisory committee when they have completed 12 hours of graduate study and apply for degree candidacy. They submit a thesis/ proposal when they have completed 18 hours of graduate study.
 - When the student has produced a satisfactory version of the thesis, the student and the advisory committee chair will establish a timetable for its defense and final revision. The student will then submit thesis copies to the remaining members of the committee.
 - Committee members will meet with the student for an oral defense of the student's research, historiographical framework, methodology, and argument. All committee members may suggest final changes for the thesis.
 - The advisory committee will evaluate the thesis individually by commenting on the above areas. They will then vote as a group on whether to accept the thesis/project pending revisions. At least 2 of the 3 members must vote that the thesis was satisfactory.
 - The committee will then submit their completed Thesis/Project/Exam Assessment forms on the thesis/project and defense to the Graduate Program Director. The student must also complete a Graduating Candidate Survey and submit it to the Graduate Program Director or the Department Chair. At that point, the Graduate Program Director will file the thesis signature page (approved either by advisory committee members or by the Department Chair) and a Final Examination card with the Graduate School, indicating that the student has concluded all necessary steps for the degree.
- Non-thesis students will take 4 examinations (3 written and 1 oral) from the members of their advisory committee in their last semester of study to demonstrate their mastery of content, historiography, and research methodology.
 - Students select 3 faculty members for their advisory committee when they have completed 12 hours of graduate study and apply for degree candidacy.
 - By the sixth week of the semester, each member of the advisory committee will submit several questions for these examinations to the committee chair, who will forward them to the student. Before each written exam, the faculty member responsible for that exam will choose 1 question from those submitted; other questions may be reserved for the oral exam.
 - Students will have 3 hours to complete each written exam, to be taken in the tenth week of the semester. Each member of the advisory committee will evaluate all written exams individually on a Thesis/Project/Exam Assessment form before the oral examination, commenting on the student's performance in terms of content, critical thinking, knowledge of historiography, and clarity of expression.
 - The advisory committee will then vote on the student's written performance. At least 2 of the 3 members must vote that the student's performance was satisfactory and that the student may proceed to the oral examination. If the student's performance was not satisfactory, the student may retake any unsatisfactory written examination once, either in that semester or in a later semester, and the committee will re-evaluate as above.
- Students will have one hour to complete the oral examination, to be taken no later than fourteenth week of the semester. Committee members may ask students to expand upon their written answers and/or ask questions that were not selected for a written exam. Then the advisory committee will evaluate the student's performance as a group by vote; at least 2 of the 3 members must vote that the student's performance was satisfactory. The committee will also individually complete Thesis/Project/Exam Assessment forms and submit these evaluations to the Graduate Program Director. If the student's performance was not satisfactory, the student may retake the oral examination once, either in that semester or in a later semester, and the committee will re-evaluate performance as above.
- Students must pass both types of exams to receive the degree. They must also complete a Graduating Candidate Survey and submit it to the Graduate Program Director or the Department Chair. At that point, the Graduate Program Director will file a Final Examination card with the Graduate Office, indicating that the student has concluded all necessary steps for the degree.
- Social science education students complete a pedagogical project and a portfolio.
 - The student and Graduate Program Director will select members of the advisory committee when the student applies for degree candidacy upon completion of 12 hours of graduate study. The GPD will serve as the chair; the student may select the other 2 members of the committee. The members of the committee must represent the student's specialty area(s); e.g. if American history and geography are selected as the specialty areas, then the student must choose a committee member from each of those areas. If the student has only one specialty area, at least one committee member must be from that subject area. The faculty members on this committee will approve the project proposal and evaluate the student's oral defense of their research project.
 - Students choose a topic and prepare a project proposal when they have completed 18 hours of graduate study. The advisory committee must approve this proposal. When the student has produced a satisfactory version of the proposal, the student and the DGP will establish a timeline for the project's completion, defense, and final revision. Students must pass an oral defense on their project when they near completion of the degree. At the time of the oral defense, committee members will vote as a group whether or not to accept the project pending recommended revisions. At least 2 of the 3 committee members must vote that the project was satisfactory. The DGP will be responsible for submitting the committee's final evaluation to the Chair of the Social Sciences.
 - Students must also compile a portfolio that contains at least 7 papers and/or projects: 4 from their specialty area(s), 1 from Seminar in Teaching Social Sciences, 1 from ED865, and 1 from the required technology course. Students will submit the portfolio on the day of defense. Included in the portfolio will be a self-reflective letter that demonstrates an understanding of the integration of the social sciences and describes how the student has met the goals of the program, i.e., how the student has improved their skills as a Critical Thinker, Creative Planner, and Effective Practitioner.

- The student must also complete a Graduating Candidate Survey and submit it to the Graduate Program Director or the Department Chair. At that point, the Graduate Program Director will file a Final Examination card with the Graduate Office, indicating that the student have concluded all necessary steps for the degree.

Revalidation of Courses

Graduate students have 7 years to complete their MA degrees. Under exceptional circumstances, students may petition for a 1-year extension. The program will not revalidate courses that fall outside this 8-year deadline.

Dual Degree with Library & Information Management

Students simultaneously pursuing a History MA and an M.L.S. at ESU's School of Library and Information Management (SLIM) can apply up to 6 hours of SLIM coursework toward the History MA and up to 6 hours of history coursework toward the M.L.S., but the total number of hours shared between the two programs cannot exceed 10 hours.

Archives and Museum Internship

- Students interested in internships should contact the appropriate instructor at least 24 weeks (1.5 semesters) before the semester in which they intend to start the internship. The instructors need advance notice to place students at an appropriate facility; instructors, internship supervisors at the facility, and students must also agree upon the course parameters.
- Students must earn a passing grade in Intro to Public History before taking an internship.
- Students may apply no more than a total of 6 internship hours from Emporia State University or any other accredited institution toward degree requirements.

Post-baccalaureate Teacher Licensure

Post-baccalaureate students desiring to teach social sciences in the secondary schools should contact Andra Baldwin, the Licensure Officer in the Teachers College.

SPECIAL PROGRAMS AND COURSES

COLLEGEWIDE

CW 001. WRITING COMPETENCY EXAMINATION

0 HRS.

The examination is part of the University-Wide Basic Skills Assessment Program. All students of junior classification (60-89 hours) are required to pass the Writing Competency Examination. Counseling, tutoring, and course offerings are available for students who wish to improve their writing skills.

CW 002. READING COMPETENCY EXAMINATION

0 HRS.

The examination is part of the University-Wide Basic Skills Assessment Program. All students of junior classification (60-89 hours) are required to pass the Reading Competency Examination. Counseling, tutoring, and course offerings are available for students who wish to improve their reading skills.

CW 003. MATHEMATICS COMPETENCY EXAMINATION

0 HRS.

The examination is part of the University-Wide Basic Skills Assessment Program. All students of junior classification (60-89 hours) are required to pass the Mathematics Competency Examination. Counseling, tutoring, and course offerings are available for students who wish to improve their mathematics skills.

CW 014. CORE WRITING

0 HRS.

This course fulfills the minimum Writing competency requirement for students' seeking a baccalaureate degree as stated in section 4C.08 of the University Policy Manual. This course serves to fulfill admittance requirements into The Teachers College Teacher Education Programs Block 1 and Phase I.

CW 015. CORE READING

0 HRS.

This course fulfills the minimum Reading competency requirement for students' seeking a baccalaureate degree as stated in section 4C.08 of the University Policy Manual. This course serves to fulfill admittance requirements into The Teachers College Teacher Education Programs Block 1 and Phase I.

CW 016. CORE MATHEMATICS

0 HRS.

This course fulfills the minimum Mathematics competency requirement for students' seeking a baccalaureate degree as stated in section 4C.08 of the University Policy Manual. This course serves to fulfill admittance requirements into The Teachers College Teacher Education Programs Block 1 and Phase I.

CW 050. CULTURAL CURRENTS OF THE UNIVERSITY

1 HR.

A course designed to induct students, through attendance at cultural events of the university, into the variety of intellectual experiences integral to the university; and to encourage students, through the keeping of a journal, to reflect and write on those experiences.

CW 099. PRINCIPLES OF LEARNING AND TEACHING EXAMINATION

0 HRS.

Passing this examination is a graduation requirement for teacher education.

CW 101. FIRST-YEAR SEMINAR

1 HR.

This course will help orient first-year students to an academic environment, including such aspects as the value of the general education program, learning resources, and support services. It will also include such topics as time and money management, study skills, self-exploration, wellness, decision making, and career planning.

CW 102. FIRST-YEAR SEMINAR II

1 HR.

This is second semester course to CW101 First-Year Seminar; it is designed to continue to orient First Year Students to the academic environment. The course offers students the opportunity to extend their learning of essential skills for creating success in college. It will include such topics as increasing self-motivation, maximizing learning, exploring campus resources, and improving creative and critical thinking skills.

CW 109. KANSAS REGENTS HONORS ACADEMY (I)

3 HRS.

Enrollment limited to students selected for and participating in the Kansas Regents Honors Academy. Broad, innovative, interdisciplinary course work in the liberal arts and sciences that is approachable without extensive prerequisite background. Accepted as general education and honors program credit.

CW 110. KANSAS REGENTS HONORS ACADEMY (II)

3 HRS.

Enrollment limited to students selected for and participating in the Kansas Regents Honors Academy. Broad, innovative, interdisciplinary course work in the liberal arts and sciences that is approachable without extensive prerequisite background. Accepted as general education and honors program credit.

CW 111. HONORS SEMINAR I

3 HRS.

The Honors Program Seminar is required of all incoming first year students accepted into the Honors Program. The course (offered in the fall semester only) is interdisciplinary in structure and the topic will be changed each year. Professors from various disciplines will discuss how the selected topic applies to their particular field.

CW 130. SPECIAL TOPICS

1-5 HRS.

A course for the study of special topics and experimental course offerings designed for a general audience.

CW 152. INTRODUCTION TO HEALTH CARE CAREERS

3 HRS.

(Prerequisite, Pre-nursing major or consent of instructor) This theory course introduces content that is essential to health care careers.

CW 186. COOPERATIVE EDUCATION PREPARATION

1 HR.

(Prerequisite, completion of a minimum of 15 semester hours, GPA of 2.5, and consent of instructor.) This course is designed to prepare students with the transition from classroom environment to the Cooperative Education work environment. An overview of the career development process including self-assessment, career investigation, job search skills and professional behavior.

CW 201. SECOND-YEAR SEMINAR

1 HR.

(Prerequisite: Consent of instructor.) The Second-Year Seminar course is designed to assist students in a successful transition to their second year of college both academically and personally. The course encourages a sense of social belonging, promotes engagement in the learning process, assists students to clarify their purpose and direction, and helps students assume responsibility for their own success.

CW 210. INTRODUCTION TO LATIN AMERICA 3 HRS.

The course examines various topics that are important to students gaining an understanding of Latin America. Students will learn about the physical characteristics of the region and the diversity of landscapes within Latin America, explore the extraordinary variety of cultural expressions, and examine how the region's history shapes the possibilities for its future. The course focuses mainly on Mexico, Central America and South America.

CW 261. THE GREAT PLAINS IN FILMS 3 HRS.

A survey of cinematic images of the Great Plains. The course will focus on the variety of ways in which the Great Plains has been portrayed in films. From early westerns to such contemporary works as *The Last Picture Show*, the course will attempt to distinguish between stereotypical and accurate presentations of the region.

CW 280. PARAPROFESSIONAL IN STUDENT RECRUITMENT 1-3 HRS.

(Required for students selected to be ESU Ambassadors.) This course is designed to train and educate students about the history, traditions, and current procedures of ESU departments and offices so that they can better inform alumni, prospective students and their parents. Students will be required to research assigned office(s) on campus, present the information to the class and be tested on their reports. Instructors will facilitate discussion and will teach time management, teamwork, and leadership skills.

CW 286. INTERNSHIP 0-6 HRS.

(Prerequisite, completion of 24 hours earned at Emporia State University at a 2.5 GPA or better or at the discretion of the course instructor.) This course provides students the opportunity to: 1. gain practical work experience under professional supervision, 2. apply theories and principles to specific situations in a business setting, 3. observe and analyze professional behavior and 4. identify and develop marketable skills for long-term employment.

CW 300. SPECIAL STUDIES IN: () 1-3 HRS.

This interdisciplinary course is designed for the study of various special topics and for experimental course offerings at the undergraduate level.

CW 311. HONORS SEMINAR II 1 HR.

(Prerequisite, CW 111 or permission of instructor.) A seminar centered on themes dealing with the nature of liberal education, interdisciplinary connections, and the relevance of participation in the Honors Program and in Honors courses to each student's major field, or fields, 222 of study.

CW 444. HONORS INTERDISCIPLINARY SEMINAR 2 HRS.

(Prerequisites, strictly designed and targeted for junior and senior Honors.) An interdisciplinary seminar on various topics providing an opportunity for advanced students to participate in an exchange with students and faculty from other disciplines on a topic of common interest. A minimum of two faculty members, from different disciplines will instruct. May be taken for credit a maximum of three times if each of the topics is different.

CW 486. INTERNSHIP 0-6 HRS.

(Prerequisite, completion of 60 hours or demonstrated work experience at the discretion of the course instructor with a GPA of 2.5 or better.) This course provides students the opportunity to: 1. gain practical work experience under professional supervision, 2. apply theories and principles to specific situations in a business setting, 3. observe and analyze professional behavior and 4. identify and develop marketable skills for long-term employment.

CW 495. HONORS CAPSTONE 1 HR.

A senior seminar in which the student will reflect on the nature of liberal education, select examples of work in previously taken courses to include in a portfolio, and compose a reflective essay that evaluates the relevance to their major field, or fields, of study in light of participation in the Honors Program and in Honors courses. The course concludes with a symposium in which each student participates, giving an oral presentation of their reflective essay and conclusions.

CW 499. SENIOR HONORS THESIS 3-6 HRS.

This course is the capstone intellectual experience for the honors student. The thesis is a one year, independent project guided by two faculty mentors. A proposal is prepared, and once approved by the Honors Council, the work/research is conducted.

CW 500. GREAT PLAINS WORKSHOP 1 HR.

An intense capsule view of a topic which has contributed to the culture and heritage of the Great Plains. Topics from literature, biology, geography, geology, politics, economics, etc. will be presented with the needs of the target audience dictating what the topic will be. Each workshop consists of a minimum of five five-hour days. Evaluation based on active participation and written assignments.

CW 501. SPECIAL STUDIES: () 1-3 HRS.

This interdisciplinary course is designed for the study of various special topics and for experimental course offerings at the 500 level. Not for graduate credit.

CW 510. COMMUNITY ENGAGEMENT PRACTICUM HONORS 1-3 HRS.

The purpose of this practicum is to provide Honors College students with the opportunity to practice civic leadership by designing, implementing and completing a community enhancement project for a community in Kansas or beyond. Students will be required to use civic leadership skills as well as academic material gleaned from their major or minor programs of study or the General Education Program to complete this project.

CW 740. COLLEGE TEACHING FOR GTA'S 2 HRS.

This course is designed for graduate teaching assistants who teach independent courses, discussion or lab sections of larger course units, or facilitate sections in the freshman seminar. The course will focus on a small number of topics that are relevant to the student's current work at ESU and for possible teaching assignments in the future. This is a basic introduction to college teaching skills that relies on the student's own initiative for perfecting those skills.

GREAT PLAINS

Additional Great Plains-related courses are included with the listings of various departments.

GP 200. CULTURES OF THE GREAT PLAINS 2 HRS.

This course entails the study of the diversity of Great Plains society with selected units on minorities that have contributed to the cultural texture of the region. The antecedents, migration, and influence of minorities on regional life are presented in the course. Great Plains minorities are examined in both a historical and contemporary context through the perspectives of history, sociology, anthropology, and literature.

GP 701. SEMINAR IN REGIONAL GEOGRAPHY 1-3 HRS.

A seminar on the physical and cultural patterns and interrelationships existing in selected political regions with emphasis upon the distribution of human activities and effects of various environments upon man and national economic development.

GP 722. PRO-SEMINAR IN AMERICAN HISTORY 1-3 HRS.
(Prerequisite, consent of instructor.) Selected main events, trends, and interpretations in American history will be examined through readings, reports, and discussion. Designed to introduce the important literature on significant historical topics.

CW 261. THE GREAT PLAINS IN FILMS 3 HRS.
A survey of cinematic images of the Great Plains. The course will focus on the variety of ways in which the Great Plains has been portrayed in films. From early westerns to such contemporary works as *The Last Picture Show*, the course will attempt to distinguish between stereotypical and accurate presentations of the region.

CW 500. GREAT PLAINS WORKSHOP 1 HR.
An intense capsule view of a topic which has contributed to the culture and heritage of the Great Plains. Topics from literature, biology, geography, geology, politics, economics, etc. will be presented with the needs of the target audience dictating what the topic will be. Each workshop consists of a minimum of five five-hour days. Evaluation based on active participation and written assignments.

UNIVERSITY LIBRARIES & ARCHIVES

UL 100. RESEARCH SKILLS, INFORMATION, AND TECHNOLOGY 3 HRS.
An introduction to the concepts and skills needed to locate, evaluate and use information in a manner that contributes to academic, professional, and civic success. This course emphasizes critical thinking skills through an examination of: finding and evaluating information, ethical issues in information, and using information to create new knowledge.

UL 242. RESEARCH SKILLS IN THE INFORMATION AGE 2 HRS.
This course will introduce information literacy concepts and provide foundational skills for library-based research across the disciplines. Students will learn the concepts of access, retrieval, utilization, and evaluation of information in a variety of electronic, print and other formats.

UL 742. DISCIPLINE-BASED INFORMATION LITERACY 2 HRS.
Students will receive an overview of the way in which information is disseminated, retrieved, utilized, and evaluated in the different disciplines. Subject-specific resources in print and electronic forms will be examined in terms of their relative value, use, and future roles in their respective disciplines. Basic and advanced search strategies will be covered, as well as the ethical use of information and influence of the Internet.

UL 745. BUSINESS INFORMATION: ITS LOCATION, USE AND EVALUATION 2 HRS.
This course is designed to assist graduate business students in accessing, using and evaluating business information. Students will become familiar with the "tricks of research". Skills learned in this course will enable students to achieve better results in future courses and business projects.

COURSE LISTINGS

▶ This course is approved by the Kansas Board of Regents for guaranteed transfer among all Kansas public postsecondary institutions. Additional courses may also be eligible for transfer. Please visit the Emporia State Registrar to learn more.

Visit Kansas Board of Regents Transfer and Articulation website for more information.

AB 110. ARABIC LANGUAGE & CULTURE I 5 HRS.
Emphasis will be placed on the basics of Arabic language communication and its culture. The four skills of the language both spoken and written, handwriting, spelling and vocabulary will be presented. Offered every fall.

AB 210. ARABIC LANGUAGE & CULTURE II 5 HRS.
This course will be a continuation of AB 110 Arabic Language & Culture I with emphasis placed on the basics of the Arabic language communication and its culture. The four skills of the language both spoken and written, handwriting, spelling, and vocabulary will be presented sufficiently. Offered every Spring.

AB 300. INTRODUCTION TO THE ARAB WORLD 3 HRS.
This class will introduce students of Arabic language and other Humanities disciplines (history, sociology, English, etc.) to the society, politics and culture in the Arab World. The major patterns of social change, modernization of states and political revolutions in the 20th Century will be studied. The course includes an examination of the historical process that the Arab World has gone through in relation to its different societies, cultures, religions, etc.

ACCOUNTING

AC 205. SPECIAL TOPICS IN ACCOUNTING 1-5 HRS.
This course is for the study of various special topics and experimental course offerings at the undergraduate level in the Accounting program

AC 223. FINANCIAL ACCOUNTING ▶ 3 HRS.
(MA110 is a prerequisite or co-requisite) An introduction to financial accounting concepts with emphasis on financial statements, their components, and their inter-relationships. Accounting for corporations, non-corporate organizations, and financial statement analysis are introduced.

AC 231. COMPUTERIZED ACCOUNTING 1 HR.
(Prerequisites, AC 223 and IS 113.) The accounting cycle is presented as a general model for collecting and processing financial information. Emphasis will be placed on using popular accounting software to prepare and analyze financial reports.

AC 233. MANAGERIAL ACCOUNTING ▶ 3 HRS.
(Prerequisites: AC 223 and IS 113) An introduction to the concepts and tools associated with providing accounting information to management. Major topics include: cost behavior, cost estimation, cost accumulation and assignment; budgeting, responsibility accounting, and the uses of accounting information for control.

AC 302. PROFESSIONAL DEVELOPMENT & LEADERSHIP FOR ACCOUNTING MAJORS **1 HRS.**
(Pre or Co-Requisite for AC 313 Intermediate Accounting II) The course is designed to introduce students to the accounting profession. The primary objectives of the course are to allow the students to learn about the role of accounting in business, learn about career opportunities in accounting, and learn about job search strategies and preparation.

AC 304. INTERMEDIATE ACCOUNTING I **4 HRS.**
(Prerequisites, MA 110, AC 223, AC 233, or the equivalent of these courses, and junior standing.) A study of the conceptual and technical aspects of financial accounting theory and the procedures of application. A comprehensive review of the accounting cycle including manual and electronic practice sets is included. Attention is given to the theory and procedures of financial statements, cash, receivables, inventories, tangible and intangible fixed assets and revenue recognition.

AC 313. INTERMEDIATE ACCOUNTING II **3 HRS.**
(Prerequisites, AC302 or concurrent enrollment, AC304 and junior standing.) This course provides the student with an in-depth study of accounting concepts, principles and procedures. Areas to be studied include stockholders, equity, long-term investments, current and long-term liabilities, statement of cash flows, pensions, leases, accounting for income taxes, accounting changes and analysis of errors.

AC 333. COST ACCOUNTING **3 HRS.**
(Prerequisites, AC 233, MA 110, and junior standing.) This course provides an analysis of cost accounting principles and procedures. Topics include: terminology, cost accumulation systems, cost allocation, budgeting, and cost-volume profit analysis.

AC 353. ACCOUNTING INFORMATION SYSTEMS **3 HRS.**
(Prerequisites, AC 233, IS 213, and junior standing.) This course is designed to provide an introduction to the objectives, concepts, techniques, tools, and controls of accounting-focused information systems. Emphasis will be placed on the ability of the system to capture, process and summarize accounting information for decision-making and financial statement preparation.

AC 413. AUDITING **3 HRS.**
(Prerequisites, AC 304, AC 353, BU 255.) This course is a study of basic theory and underlying principles of auditing financial statements for the purpose of rendering an opinion on the fairness of representations made therein. The purposes and procedures of tests of transactions and balances are presented. The scope of these procedures is considered in relation to the assessment of internal controls and audit risk.

AC 423. FEDERAL INCOME TAX ACCOUNTING I **3 HRS.**
(Prerequisites, AC 223 and junior standing.) This course introduces the study of federal tax law as it applies to individuals and various business entities (including C Corporations, S Corporations and Partnerships). Emphasis is placed on the determination of income, deductions, and credits, and the tax consequences of property transactions.

AC 490. INDEPENDENT STUDY IN ACCOUNTING **1-4 HRS.**
(Prerequisites, Completion of a minimum of 12 hours of accounting including AC 304, and permission of the Department Chair.) This course provides an opportunity to develop more extensive, in-depth knowledge of a topic than is available through the existing accounting curriculum. Students desiring to do an independent study in accounting should provide the Department Chair with a well developed proposal or the study including an outline of the work to do done and the learning activity to be completed from the project including sources of information to be used.

AC 500. INTERNSHIP IN ACCOUNTING **1-4 HRS.**
(Prerequisites, completion of 21 hours of accounting, a 3.0 in accounting courses and overall GPA, and senior standing.) Qualified students work full-time for public accounting firms, businesses or governmental agencies gaining valuable experience. Work progress is coordinated through visitation, discussion, and writings.

AC 505. SPECIAL TOPICS IN ACCOUNTING **1-5 HRS.**
A course for the study of special topics and experimental course offerings in the accounting program.

AC 523. INCOME TAXATION OF CORPORATIONS & OTHER ENTITIES **3 HRS.**
(Prerequisite, AC 423.) This course introduces the federal tax law as it applies to the taxation of corporations, subchapter S corporations, limited liability companies, and partnerships. Tax issues associated with formation, operation, distributions, redemptions, liquidations, reorganizations, and selected special topics are included.

AC 533. GOVERNMENTAL AND NOT-FOR-PROFIT ACCOUNTING **3 HRS.**
(Prerequisite, AC304) This course is an introduction to accounting and reporting standards for local governmental units and not-for-profit entities. Entities to be covered include municipal and state governments and various non-profit organizations. The objective of this course is to provide the student with an understanding of Generally Accepted Accounting Principles for governmental and not-for-profit entities. Students should develop an understanding of the basic concepts of fund accounting, be able to contrast accounting concepts of governmental and non-profit organizations with that of for-profit organizations, and have a basic knowledge of state and local government financial reporting requirements. In addition, students should have a basic awareness of the different requirements for local governments in Kansas.

AC 563. ADVANCED FINANCIAL ACCOUNTING **3 HRS.**
(Prerequisites, AC 313 or concurrent enrollment with AC 313.) This course covers the financial accounting topics of business combinations; international accounting transactions and translations; and fund accounting. Other special topics are included to meet current business requirements.

AC 723. FEDERAL INCOME TAX ACCOUNTING II **3 HRS.**
Advanced study of taxation as it applies to sole proprietorships, C and S Corporations, partnerships, limited liability entities, and fiduciaries including the tax implications of forming, operating, and dissolving such entities. Also covers advanced topics such as financial tax accounting concepts, employee compensation, related party transactions, and tax planning.

AC 734. GOVERNMENTAL AND NOT FOR PROFIT ACCOUNTING **3 HRS.**
This course is an introduction to accounting and reporting standards for local governmental units and not-for-profit entities. Entities to be covered include municipal and state governments and various non-profit organizations.

AC 773. FOUNDATIONS OF ACCOUNTING AND FINANCE **3 HRS.**
An introductory study of the accounting and finance function of business firms from a manager's point of view. Emphasis is placed on the basic understanding of financial statements, accounting cycle, financial accounting vs managerial accounting, time value of money, and cash flows analysis.

AC 801. ACCOUNTING BACKGROUND IDENTIFIER 0 HRS.
This zero credit hour course will serve as an indicator of completion of a bachelor degree with a major or equivalent coursework in accounting to fulfill graduate level accounting prerequisites.

AC 805. SPECIAL TOPICS IN ACCOUNTING 1-3 HRS.
(Prerequisite, permission of instructor.) This course is for the study of various special topics and experimental course offerings at the graduate level by the accounting program.

AC 820. ADVANCED INCOME TAXATION 3 HRS.
(Prerequisite, AC 801.) Advanced study of taxation as it applies to sole proprietorships, C and S corporations, partnerships, limited liability entities, and fiduciaries including the tax implications of forming, operating, and dissolving such entities. Advanced topics such as financial tax accounting concepts, employee compensation, related party transactions, and tax planning are also included.

AC 821. TAX PLANNING AND RESEARCH 3 HRS.
(Prerequisite: AC 423.) This course introduces the fundamental aspects of conducting tax research combined with the study of federal estate and gift taxation and various aspects of family business tax planning. Emphasis is placed on creative tax planning techniques used for individuals and businesses.

AC 830. FRAUD EXAMINATION 3 HRS.
(Prerequisite, AC 801.) This course is a study of concepts of fraud examination and forensic accounting related fraud, asset theft and financial statement misstatements. Topics covered include: the nature of fraud, fraud prevention, detection methods, investigation procedure, and types of fraud.

AC 833. ADVANCED AUDITING 3 HRS.
(Prerequisite, AC 801.) Study of how an external audit is performed by a team of auditors. This includes the documentation, testing and evaluation of internal controls, and the design and implementation of corroborative substantive tests. In addition to external auditing, other topics include governmental, internal, and operational auditing as well as issues of current interest in the auditing literature.

AC 840. ADVANCED MANAGEMENT ACCOUNTING 3 HRS.
(Prerequisites, AC 801.) This course deals with advanced management accounting issues. Topics covered include: cost behavior, activity-based costing, budgeting, pricing, strategic cost management, activity-based management, the Balanced Scorecard, quality cost management, environmental cost management, capital investment, inventory management, and ethical control.

AC 843. ACCOUNTING INFORMATION FOR MANAGEMENT 3 HRS.
(Prerequisite, AC 801.) The case method is used for a comprehensive review of financial and managerial accounting from a user's perspective. Topics include financial statement preparation and analysis, cash management, product costing, decision analysis, operational budgeting, capital budgeting, and management control systems. Computer spreadsheets are developed, and communication skills emphasized.

AC 850. INTERNATIONAL ACCOUNTING 3 HRS.
(Prerequisite, AC 801) The objective is to understand international accounting issues from a strategic decision point of view and to practice problems with an ERP system in an international setting.

AC 853. ACCOUNTING THEORY 3 HRS.
(Prerequisites, AC 801.) This course examines the conceptual basis of generally accepted accounting principles within the context of policy setting and the

economics of financial reporting regulation. The course will discuss the theoretical rationale for the treatment of elements of the financial statements.

AC 860. ADVANCED ACCOUNTING INFORMATION SYSTEMS 3 HRS.
(Prerequisite, AC 801.) This course is an advanced accounting systems class and seeks to examine the linkages between information systems and accounting and to prepare students to be a trusted business advisor. The course provides an overview of how to understand, analyze, and control computerized information systems.

ANTHROPOLOGY

AN 101. INTRODUCTION TO ANTHROPOLOGY 3 HRS.
An introduction to the basic assumptions and objectives of anthropology.

AN 200. FIELD ARCHAEOLOGY 1-3 HRS.
A research participation course in which the student gathers archaeological data in the field. Field techniques such as excavation, note-taking, mapping, and photography are emphasized.

AN 210. CONTEMPORARY CULTURES 3 HRS.
A survey of how anthropologists make sense of our global diversity and shared humanity. This course will review anthropological explanations for such universally held phenomena as culture, language, economy, political organization, family, identity, religion, and the modern world system, while also discussing the reasons for our unique group differences across societies. Case studies from different societies are used to illustrate such cultural variation and commonality.

AN 300. TOPICS IN ANTHROPOLOGY 1-3 HRS.
Investigations into selected areas of anthropological thought. Can be repeated with the permission of the instructor.

AN 302. INTRODUCTION TO ARCHAEOLOGY 3 HRS.
An introduction to the methods and major conclusions of archaeological research.

AN 310. ANTHROPOLOGY OF WOMEN 3 HRS.
This course will explore the dramatic differences in women's lives, primary focus will be Third World women.

AN 315. FAMILY IN CROSS-CULTURAL PERSPECTIVE 3 HRS.
(Prerequisite, AN 210) An introduction to kinship studies in Anthropology that surveys kinship beliefs and practices around the world and reveals the socio-economic factors that help to shape our globally diverse family structures.

AN 319. ETHNOGRAPHIC FIELD SCHOOL 1-3 HRS.
(Consent of instructor needed.) The course offers an introduction to the ethnographic research method through first-hand experiences with American Indian Tribes of Oklahoma.

AN 320. HUMAN EVOLUTION AND CIVILIZATION 3 HRS.
This course provides an introduction to physical anthropology. Focus will be to explore the causes and consequences of human evolutionary history.

AN 325. NATIVE PEOPLES OF NORTH AMERICA 3 HRS.
A culture history of the indigenous peoples of North America from the Pleistocene migration to the present. Topical areas include North American archaeology and ethnography, the impact of European colonialism and expansion, and the more recent effects of American Indian policy.

AN 330. WOMEN, CULTURE, DEVELOPMENT 3 HRS.

This course will explore the dramatic changes occurring in women's lives in response to development and modernization. Emphasis placed on understanding the context in which development occurs, the efforts of development on women, and the effects of women on development.

AN 331. FOLKLORE AND URBAN LEGENDS 3 HRS.

The course investigates urban legends as cultural phenomena from the perspective of Folklore Studies. Prominent legends are compared cross-culturally and historically to demonstrate the contextual nature of such legends and what each can tell us about the particular culture in which they persist. Students will collect, analyze and report on an urban legend using methodology learned in the course.

AN 334. FORENSIC ANTHROPOLOGY 3 HRS.

A laboratory supplemented introduction to the anthropological study of human skeletal remains resulting from an unexplained death.

AN 336. MAGIC, WITCHCRAFT AND RELIGION 3 HRS.

This course provides an introduction to the anthropological study of religion and beliefs in the supernatural. Course material and instruction approaches the topics from a cross-cultural and relativistic perspective.

AN 355. ARCHAEOLOGICAL ANALYSIS 3 HRS.

A research participation course in which the student analyzes and interprets archaeological data.

AN 356. ARCHAEOLOGICAL FIELD METHODS 1-3 HRS.

A research participation course in which the student gathers archaeological data in the field. Field techniques such as excavation, note-taking, mapping and photography are taught. Students are expected to gain an understanding of the problems of archaeological research strategies.

AN 408. GLOBAL WOMEN'S HEALTH 3 HRS.

Through reading, thinking, talking, and writing about a series of articles and ethnographic monographs, students in this course will gain broad exposure to a number of significant global women's health concerns, issues of qualitative and visual methods in health research, and the interdisciplinary theorizing of feminist, anthropological, sociological, and public health scholars. In particular, the course is designed to explore in an in-depth fashion the social status of "gender" and its relationship to health.

AN 410. CROSS-CULTURAL STUDIES 3 HRS.

The application of cross-cultural methods to the explanation of cultural differences and similarities.

AN 425. NATIVE PEOPLES OF THE PLAINS 3 HRS.

The course surveys the cultures and histories of the American Indians of the Great Plains. Course instruction is organized historically into the four periods: Pre-Contact, European Trade and Conquest, Reservation Era and the Self-determination Era. Emphasis is placed on both anthropological and tribal perspectives.

AN 430. RACE AND IDENTITY 3 HRS.

An exploration of human diversity and its sociopolitical implications. The course will focus on the anthropological understandings of race and the multiple ways in which race intersects with other forms of identity while applying such models to the diverse ways in which race is made meaningful around the world.

AN 445. CULTURE AND PERSONALITY 3 HRS.

An investigation of the relationship between personality and culture.

AN 471. INDEPENDENT STUDY 1-3 HRS.

(Prerequisites, six hours of anthropology, plus consent of instructor.) Special project or reading on a topic initiated by the student and approved by the instructor.

AN 472. ANTHROPOLOGY INTERNSHIP 1-6 HRS.

(Prerequisites, 6 hours of Anthropology course work.) The student is placed with an anthropology-focused agency to gain practical experience in anthropological activities, planning, and leadership.

AN 540. TOPICS IN ANTHROPOLOGY 3 HRS.

A course in Anthropology offered periodically to cover topics which are important to the discipline but which cannot be taught on a regular basis.

AN 701. ANTHROPOLOGY OF THE GREAT PLAINS 1-3 HRS.

This course examines prehistoric and historic Great Plains cultures. The special focus of the course is on how different groups viewed the Great Plains, and how this influenced their adaptations to the environment. Content and assignments will vary according to the number of credit hours for which the course is being offered.

AN 750. SEMINAR IN ANTHROPOLOGY 1-3 HRS.

(Prerequisites, six hours of anthropology and permission of instructor.) In-depth concentration of specialized areas in anthropology for more advanced students.

AN 810. RESEARCH PROBLEM IN ANTHROPOLOGY 1-6 HRS.

(Prerequisites, six hours of anthropology, plus consent of instructor.) Special research problem or readings on a topic initiated by the student and approved by the instructor.

ART**AR 095. FIRST YEAR EXPERIENCE SEMINAR 1 HR.**

This course for all incoming first-year students in the Art Department will consist of eight discussion-based meetings during the fall semester. Each one-hour meeting will center on a different topic relevant to the experience of incoming art students. The purpose of this course is to inform students of Art Department policies, campus resources, and possible art related career choices, as well as build students' creative problem solving and time management skills.

AR 098. MID-PROGRAM PORTFOLIO REVIEW 1 HR.

The successful completion of AR 098, Mid-Portfolio Review, is required of all BSE, BFA, BS and BA majors. All Art Majors' work will be reviewed after completion of 18-24 studio hours. The purpose of the review is to evaluate the student's progress and to afford an opportunity for the student to reflect on their knowledge acquisition and artistic development. Assessment is based on the quality of both presentation and work. Students receive a grade of "S" or "U".

AR 099. ART FORUM 1 HR.

Art Forum is designed to expose students to the work of active professional artists and people working in related fields, in order to gain an understanding of their influences, thinking processes, and methods of working. Students must take Art Forum every semester they are declared as an Art major (up to eight semesters) in order to graduate. Art Forum is taught on a Satisfactory/Unsatisfactory basis.

AR 101. BASIC DRAWING 3 HRS.

The fundamental approach to all kinds of drawing including freehand drawing, perspective, specimen drawing, drawing from the imagination, object drawing, techniques involving the use of a variety of art media.

AR 102. TWO-DIMENSIONAL DESIGN 3 HRS.
Introduction to the elements and principles of design and the theory of color. Projects are directed toward the application of these theories to practical and aesthetic problems in composition.

AR 103. THREE-DIMENSIONAL DESIGN 3 HRS.
Study of the application of the principles of design and color with an introduction to three dimensional problems and related media.

AR 105. ART APPRECIATION 2 HRS.
The course discusses how and why art is made. The class covers how art is produced, discusses the visual principles involved in looking at art and the aesthetics of art, and covers some of the highlights of the history of art.

AR 202. DRAWING II 3 HRS.
(Prerequisite, AR 101.) Course outcomes will include the continued mastery of drawing skills and concepts learned in Drawing I, as well as the learning of advanced approaches to drawing. Creative projects will be used to introduce new media, concepts, and approaches as each student transitions towards more self-directed avenues of inquiry.

AR 225. ART HISTORY: PREHISTORIC TO RENAISSANCE 3 HRS.
A survey of the development of art from pre-history to the Middle Ages, with emphasis on the cultures of Egypt, Western Asia, Greece, Rome, and medieval Europe.

AR 235. ART HISTORY: RENAISSANCE TO MODERN 3 HRS.
A survey of the major monuments of Western art and architecture from the fourteenth through the twentieth century.

AR 240. GRAPHIC DESIGN PROCESSES 3 HRS.
(Prerequisites, AR 101, AR 102, AR 103, and AR 305.) Introduction level graphic design course to be concerned with fundamental issues and topics in graphic design. Basic, traditional and contemporary (digital) aspects of profession-oriented design composition, design preparation, design production, and time-based media will be included in the course.

AR 300. WORKSHOP: (SUBJECT TITLE) 1-3 HRS.
(Supply fee.) A course designed to give the undergraduate student an intensive experience of a specific nature within a studio area.

AR 302. GLASS FORMING I 3 HRS.
(Prerequisites, AR 101, AR 102, and AR 103 or permission of instructor.) This is a beginning level course which introduces glass as a fluid material for artistic expression. The student will be guided in familiarizing themselves with various material properties of glass and basic methods for manipulating the material and translating into a visual image. Emphasis will be on the development of original and personal imagery made from molten glass.

AR 305. INTRODUCTION TO DIGITAL DESIGN 3 HRS.
This course introduces students to computers, related hardware, and general vocabulary relevant to the art world; to the development of pixel-based and vector-based imagery; to the use of computers as a tool to develop artwork in other media; and to the importance of the web. This course will begin with assignments designed to develop specific skills in generating ideas as well as knowledge of current hardware and software. By mid-semester, students should be sufficiently equipped to pursue their own ideas and interests through the examination of information from various viewpoints.

AR 309. ENGRAVING I 3 HRS.
(Prerequisites: AR 101, AR 102, and AR 103.) Engraving I is an introductory course designed to develop specific skills and basic techniques in the area of engraving. Areas covered within the course include an introduction to engraving and the history of engraving, metal engraving in several styles, fine wood carving, glass engraving, inlay, and carving and engraving on a variety of other materials.

AR 310. PAINTING I 3 HRS.
(Prerequisites, AR 101, AR 102, and AR 103 or permission of instructor.) This course involves problems in painting based on historical and contemporary concerns in art. Students will learn the fundamentals of working with oil paint and will apply these techniques to specific aesthetic problems with an emphasis on mastery of skills and developing individual expression.

AR 312. GLASS FORMING II 3 HRS.
(Prerequisite, AR 302.) A second level glass forming class wherein the student is directed to develop competencies in glass forming procedures. The main focus of the student's efforts will be directed towards glass forming skills and appropriate decorative processes.

AR 313. PRINTMAKING I 3 HRS.
(Prerequisites, AR 101, AR 102, and AR 103 or permission of instructor.) This course is designed to be an introduction to the fine art of printmaking. Major printmaking processes are discussed and explored, with emphasis on woodcut, etching, and monotype techniques. At least seven different prints will be made during the semester.

AR 314. INTRODUCTION TO HANDBUILDING WITH CLAY 3 HRS.
(Prerequisites, AR 101, AR 102, and AR 103 or permission of instructor.) This is a rigorous beginning level course in the design and construction of functional and sculptural forms in clay. Course work includes the study of clay body composition, glaze research and wheel and hand forming processes.

AR 315. B&W PHOTOGRAPHY 3 HRS.
(Prerequisites, AR 101, AR 102, and AR 103.) This course examines the aspects of camera use in film-based black and white darkroom photography. Classroom discussions include technical, historical, and artistic topics. Assignments are designed to teach camera functions with an emphasis on developing the visual language of photography.

AR 316. INTRODUCTION TO WHEELTHROWING 3 HRS.
(Prerequisite, AR 101, AR 102, and AR 103 or permission of instructor.) Study in the design and construction of functional and sculptural ceramic forms through focused skill development on the pottery wheel. Surface design techniques will be explored along with the fundamentals of clay, glazes, firing, and safe ceramics studio maintenance.

AR 317. DIGITAL PHOTOGRAPHY & LIGHTING 3 HRS.
(Prerequisite, AR 305 and AR 315) This course introduces the student to digital, fine-art photography, with an emphasis on using computer software to edit final image quality. The controlled lighting studio is introduced, and color theory and professional digital printing techniques are also addressed, as they relate to the medium of photography.

AR 319. GRAPHIC DESIGN COLOR PRODUCTION 3 HRS.
The primary areas of study are the areas of color reproduction, plating and proofing techniques, graphic reproduction procedures using offset printing, and related binding and finishing. Students have the opportunity to spend additional time in an area of choice.

AR 320. CONTEMPORARY TRENDS IN PHOTOGRAPHY**3 HRS.**

(Prerequisite, AR 315 and AR 317, or consent of instructor) This course is a continuation of the development of visual content and creative thinking by exploring and emulating some of the traditional genres of photography and the directions that contemporary photographers are pushing the medium. Students may work in either analogue or digital formats. The course will also further develop an understanding of contemporary theory.

AR 322. LIFE DRAWING**3 HRS.**

(Prerequisites, AR 101, AR 102, and AR 103. This course will help the student in developing technical and perceptual life drawing skills, along with a basic understanding of human anatomy. The student will use a variety of drawing media, while focusing on proportion, composition, and technique. Consent of instructor.

AR 323. SCULPTURE I**3 HRS.**

(Prerequisites, AR 101, AR 102 and AR 103 or permission of instructor.) The course explores and experiments with the possibilities of three-dimensional work. Students will learn the fundamentals of multiple sculptural techniques with an emphasis on mastery of skills and developing individual expression.

AR 324. ELEMENTARY ART EDUCATION**2 HRS.**

(Prerequisite, AR 105.) A study of the nature of creative growth and development as it is related to art education and to general elementary school education. Also includes laboratory experiences with media and analysis of such problems as instructional techniques and general organization of the art program.

AR 326. PRINTMAKING II**3 HRS.**

(Prerequisites, AR 313 or permission of instructor.) This course builds on intaglio, relief and monotype techniques learned in Printmaking I, with an emphasis on combining printmaking processes and color printing while pushing student image making, subject matter, theme and style.

AR 327. INTERMEDIATE DRAWING**3 HRS.**

(Prerequisites, AR 101, AR 102, and AR 103 or permission of instructor.) Course outcomes will include the continued mastery of drawing skills and concepts learned in Basic Drawing, as well as the learning of advanced approaches to drawing. Creative projects will be used to introduce new media, concepts, and approaches as each student transitions towards more self-directed avenues of inquiry.

AR 329. ENGRAVING II**3 HRS.**

(Prerequisite, AR 309.) Engraving II is designed to enable students to develop advanced specific skills and basic techniques in the area of engraving. Areas covered within the course include metal engraving in several styles, fine wood carving, glass engraving, inlay, and carving and engraving on a variety of other materials.

AR 330. PAINTING II**3 HRS.**

(Prerequisites, AR 310 or permission of instructor.) This course is intended to expand the students' experience with paint and lead them in gaining awareness of the creative process. Assignments allow for the application of traditional and contemporary methods of painting. Students are expected to apply their own creative ideas to these problems in conjunction with solid design skills.

AR 333. SCULPTURE II**3 HRS.**

(Prerequisite, AR 323.) Advanced work in sculpture, specialization in two or more media for semester projects, continuing emphasis on mastery of skills in sculpture and further developing individual expression.

AR 334. SECONDARY ART EDUCATION**3 HRS.**

(Prerequisite, 20 hours of art classes.) A basic background for secondary art teaching via participation and seminars. Curriculum, establishment and maintenance of an art program, roles of the art teacher, history of art education, creativity, art trends, and controversies are studied.

AR 340. TYPE AND DESIGN**3 HRS.**

(Prerequisite, AR 240.) Application of design and type principles to the development of symbology. Selected topics in design; i.e. perception, figure ground, shape, visual dynamics, Gestalt Principles, and fundamentals of design.

AR 341. WEB DESIGN**3 HRS.**

(Prerequisites, AR 240, AR 305 and AR 340.) This course will develop an understanding of digital technology as it relates to Visual Communications, as well as an understanding of web terminology, language, and process related to current design applications.

AR 345. 20th CENTURY ART: 1880-1945**3 HRS.**

(Prerequisites, AR 225 or AR 235.) Study of the major movements in avant-garde art from the late 19th century to World War II in Western Europe and the United States, with particular emphasis on the impact of social, intellectual, and political developments on the art of the period. Consent of instructor.

AR 346. HISTORY OF GRAPHIC DESIGN**3 HRS.**

(Prerequisites, AR 227, AR 235, and AR 240 or AR 305.) Intermediate-level graphic design lecture/readings/discussion course to be concerned primarily with effectively building depths of understanding concerning formal, conceptual, and historical issues and topics in graphic design. Primary course objectives will be to assess design movements relative to cultural significance, evaluate and determine designs' function in visual communications, and analyze the impact of technology and commerce on the development of new media.

AR 347. INTERMEDIATE CERAMIC TOPICS**3 HRS.**

(Prerequisites: AR 314, 316, or permission of instructor.) Intermediate investigation of various ceramics construction processes, surface design/glazing techniques, firing methods, material studies, and studio practices, building on fundamentals from Introduction to Handbuilding with Clay and Introduction to Wheelthrowing. Historical and contemporary themes and approaches will be addressed.

AR 350. ALTERNATIVE PHOTOGRAPHIC PROCESSES**3 HRS.**

(Prerequisites, AR 101, AR 102, and AR 103) This course explores various historical and contemporary approaches to alternative processes in photography through the use of analog and digital technologies, while building skills in idea development, critical thinking, and expressive uses of the photographic medium.

AR 355. ART SINCE 1945**3 HRS.**

This course is an introduction to the major artists, movements, and cultural contexts of art produced in the second half of the 20th century in Western Europe and the US. We will look not only at the artists' activities, but also the changing critical and interpretive frameworks of this period, with emphasis on the ideological constructions of modernism and postmodernism. AR 235 is recommended.

AR 360. CHILD ART METHODS**2 HRS.**

This course examines concepts, issues, and practices related to current theories of child artistic development.

AR 361. THEORY AND PRACTICE IN ART EDUCATION**3 HRS.**

This course examines curriculum theories and pedagogical practices related to art education.

- AR 400. ART HISTORY: (Special Topic Title) 3 HRS.**
(Prerequisite: Consent of instructor) In this course, students will explore the work of significant artists related to a specific topic in art history.
- AR 409. PROJECTS IN ENGRAVING 3 HRS.**
(Prerequisite, AR 309.) Projects in Engraving is designed to enable Students to develop advanced skills and techniques in the area of engraving.
- AR 411. PAINTING III 3 HRS.**
(Prerequisite, AR 330.) Individual painting problems.
- AR 412. PROJECTS IN GLASS FORMING 3 HRS.**
(Prerequisite, AR 312.) An advanced glass forming class wherein the student is guided into highly personalized projects. The main focus of the student's creative endeavors will be directed towards two distinct series of glass forms.
- AR 440. ADVANCED TYPOGRAPHY 3 HRS.**
(Prerequisites, AR 341.) Advanced-level graphic design studio course to be concerned primarily with issues and topics in professional typographic conceptualization, composition, and execution. The course, building upon course work from *Graphic Design Processes*, *Graphic Design Systems*, and *Graphic Design Formats* will cover a very basic history of graphic design with special application to typographic design and visual communication design.
- AR 441. ART DIRECTION I 3 HRS.**
(Prerequisite, AR 341 and AR 440.) Advanced, team-oriented graphic design studio course, concerned primarily with professional issues and topics in visual communication. Part I of a sequential year-long capstone project. Coursework will necessarily build upon both conceptual and pragmatic understandings developed in the courses *Graphic Design Processes*, *Web Design*, *Type and Design*, and *Advanced Typography*. Coursework will involve design studio business issues and topics.
- AR 450. PROJECTS IN PHOTOGRAPHY 3 HRS.**
(Prerequisites, permission of instructor) This class emphasizes the creation of individual projects in the medium of photography through concept development and experimentation. Professional practices are addressed, as they pertain to the medium. The student and instructor will devise an agreeable plan for the semester's outcomes that focus on either analog, digital, or alternative processes.
- AR 460. CONTEMPORARY ISSUES IN ART EDUCATION 3 HRS.**
This course explores the ways in which contemporary issues in art, education, and society influence theories and practices in art education.
- AR 489. INTERNSHIP IN (SUBJECT TITLE) 1-6 HRS.**
(Prerequisites, permission of instructor) The art internship course involves self-directed, independent professional development in coordination with a faculty sponsor and client(s), in which the student participates in the production of a designated, professionally executed product or project on a timeline specified by involved parties. Processes such as design, fabrication, communication, budgeting, promotion, or other business practices may be emphasized as they relate to the art discipline.
- AR 490. INTERNSHIP IN GRAPHIC DESIGN 1-6 HRS.**
(Prerequisites, AR 340 and AR 341) Advanced level graphic design course concerned with fundamental issues and topics in the professional world of graphic design. Basic, traditional and contemporary (digital/web) aspects of profession-oriented design composition, preparation, and production will be applied in real-world projects. Students will work under the supervision of a representative from the partnering agency hosting the internship and/or a professor. The work may be independent or collaborative but always to serve the client and art director.
- AR 491. PROJECTS IN PAINTING 3 HRS.**
(Prerequisite, AR 411.) Advanced problems for individual development in painting.
- AR 493. PROJECTS IN SCULPTURE 3 HRS.**
(Prerequisite, AR 333 or permission of instructor.) Advanced work in sculpture, specialization in two or more media.
- AR 494. PROJECTS IN FIBERS 2-3 HRS.**
(Prerequisites, AR 204.) A course designed to allow the student to explore an area of weaving or fibers in depth.
- AR 495. INDEPENDENT STUDY 1-6 HRS.**
(Prerequisite, permission of instructor.) Advanced work in a field of specialization for which the student can show sufficient background. Prior to enrollment, student must obtain approval of the instructor under whom they wish to work, and together should devise an agreeable plan for the semester's outcomes.
- AR 496. PROJECTS IN CERAMICS 2-3 HRS.**
(Prerequisite, permission of instructor.) Individual projects in ceramics with emphasis on research and experimentation.
- AR 497. PROJECTS IN PRINTMAKING 3 HRS.**
(Prerequisite, AR 326.) Advanced work in the print medium of the student's choice.
- AR 499. PROJECTS IN METALS 3 HRS.**
(Prerequisites, AR 306 or permission of instructor.) Advanced projects involving exploration of historical motifs, development of series in form or media, in the areas of metalsmithing.
- AR 500. WORKSHOP: (SUBJECT TITLE) 1-3 HRS.**
(Special stipulations, if any, will vary depending on the nature of the workshop subject.) A course designed to give the upper division undergraduate student an intensive experience of a specific nature within a studio area.
- AR 501. ADVANCED DRAWING 3 HRS.**
(Prerequisite, AR 322 or AR 327.) The advanced levels of drawing are centered on each student's personal development through individually established aesthetic "problems." Open studio work with periodical group critiques are used to deal with the evolution and resolution of these problems within a series of drawings.
- AR 514. ART EDUCATION 2-3 HRS.**
(Prerequisite, permission of instructor.) Individual problems in art education. *Not for graduate credit.*
- AR 540. ART DIRECTION II 3 HRS.**
(Prerequisites, AR 440 and AR 441) Advanced, senior-level *Graphic Design* studio course to directly follow *Art Direction I*, as the second half of a yearlong capstone project. Course will culminate in exhibiting student artwork. It will necessarily build upon both conceptual and pragmatic understandings developed in the courses *Graphic Design Processes*, *Web Design*, *Type and Design*, *Advanced Typography*, and *Art Direction I*. Each student will propose and develop an approved, in-depth, professional quality visual communications concept. Not for graduate credit.
- AR 560. PROFESSIONAL DEVELOPMENT IN ART EDUCATION 3 HRS.**
This course addresses professional development, organization and preparation knowledge, and professional materials meant to prepare preservice art education students to enter the field of teaching.

AR 595. ADVANCED STUDIO (SUBJECT TITLE) 2-3 HRS.
(Prerequisite, permission of instructor.) A course designed to expand the student's conceptual range, capacity for criticism and personal vision within a specific studio area. Open studio work with periodic group critiques. Work in a studio area of art may be selected from the following: ceramics, drawing, metalry, painting, photography, printmaking, sculpture and weaving.

AR 599. SENIOR EXHIBITION 1-3 HRS.
This is a capstone studio course developed to demonstrate advanced level student achievement. The course will include the development of a cohesive body of work that is shown in a senior exhibition as a final project under the guidance of a faculty thesis committee and the major professor in the area of the student's BFA concentration. It will also result in the completion of a final portfolio. It is not intended for graduate credit.

AR 700. WORKSHOP: (SUBJECT TITLE) 1-3 HRS.
(Special stipulations, if any, will vary depending on the nature of the workshop subject.) A course designed to give the graduate student an intensive experience of a specific nature within a studio area.

AR 701. ADVANCED DRAWING II 2-3 HRS.
(Prerequisite, AR 501.) The more advanced resolution of the problems established in AR 501 form the continuation in these levels.

AR 704. PHILOSOPHY OF ART EDUCATION 3 HRS.
Designed to acquaint school administrators and teachers with the nature and purpose of art programs on all levels of public education. Includes a brief study of creative growth and development, the importance of art in school and community life, and problems related to staff, equipment, and finances.

AR 708. PROBLEMS IN ART FOR RELATED PROFESSIONS: (SUBJECT TITLE) 1-3 HRS.
(Prerequisites, AR 101 and AR 102; permission of instructor.) Course utilizes individual studio experiences as research for a term paper applicable to the academic program of the student. Work in a studio area of art may be selected from the following: ceramics, metalry, painting, printmaking, sculpture, and fibers. Course is designed to strengthen the art background of people in the professions related to art such as various therapists, counselors, and activity directors. May be repeated.

ASIAN

AS 110. CHINESE LANGUAGE & CULTURE I 5 HRS.
This course has a two-fold purpose: to enable students to speak and understand Mandarin Chinese at the beginning level, and to help students recognize and write the often-used 200 Chinese characters. It is designed to prepare students for real-world language experiences. Offered every fall.

AS 210. CHINESE LANGUAGE & CULTURE II 5 HRS.
This course is a continuation of AS 110 Chinese Language & Culture I and is designed to prepare students for real-world language experiences. The two-fold purpose of enabling students to speak and understand Mandarin Chinese at the beginning level will be continued. Students will learn to recognize and write the often-used 200 Chinese characters. Offered every Spring.

AS 310. EAST ASIAN CULTURE STUDIES 3 HRS.
This course is an introduction to the traditional cultures of China and Japan until 1600. Students will gain an overall knowledge of history, geography, social structure, politics, religions, languages and literature of these two countries. Students are encouraged to explore their thoughts and feelings about these cultures through papers, presentations,

and class discussions. In addition to the regular lectures and reading assignments, guest speakers will be invited to meet with the class and several educational films will be offered.

AS 313. CHINESE LANGUAGE & CULTURE III 4 HRS.
This course will enable students to speak and understand Mandarin Chinese at the intermediate level, help them recognize and write 200 new Chinese characters, and read simple Chinese text. Offered every Fall.

AS 314. CHINESE LANGUAGE & CULTURE IV 3 HRS.
This is a course in spoken Chinese. Its purpose is to enable the student to speak and understand Mandarin Chinese. Students will acquire the ability to orally express thoughts, and react appropriately to others' oral behavior. Students will learn to do this both automatically and with authenticity. Offered every Spring.

AS 320. INTRODUCTION TO MODERN ASIA 3 HRS.
This course will be an introduction to the modern cultures of China, Japan, and Korea. Topics will include government and politics, social structures, business and economics, and art and culture. Offered every spring.

ART THERAPY

AT 708. ART MEDIA AND MATERIAL USE IN ART THERAPY 3 HRS.
This course is an advanced seminar providing opportunities for art therapy graduate students to explore media and its applications within the context of art therapy practice. The use and exploration of diverse media in art therapy will emphasize Kagin and Lusebrink's Expressive Therapies Continuum (ETC) Model. The course will engage students in experiential learning, both in and out of class, and will underscore studio art practices within the context of art therapy and specific to application with clinical populations. Venue and cultural implications, as well as ethical and safety issues, of media and its use will be explored. The course presents opportunities for students to plan for self-care through art making, both as graduate art therapy students and in future professional practice. Finally, the course engages students in art-based community service learning experiences.

AT 800. ART THERAPY FOUNDATIONS 3 HRS.
Designed for graduate art therapy students, this course will introduce the theoretical and practical applications of art therapy, some of which parallel approaches studied in prerequisite courses, as well as an historical overview of the field. Students will be introduced to the Expressive Therapies Continuum (ETC) and acquire introductory knowledge in the areas of graphic development, clinical properties of art media, treatment modalities and techniques, and the use of art therapy with special populations.

AT 801. GROUP DYNAMICS AND SPECIAL POPULATIONS 2 HRS.
Students will gain an understanding of group dynamics, learn about needs and approaches for various special populations and settings, and acquire sufficient knowledge of theory and practical applications to plan and facilitate art therapy groups. The course will be both didactic and experiential and will require outside reading and class participation.

AT 802. DEVELOPMENTAL TREATMENT MODELS IN ART THERAPY 3 HRS.
The course explores models of developmental psychology to address the entire lifespan, along with art therapy methods pertinent to the various life stages. Students learn about the universal developmental path of artmaking through childhood and adolescence and about variations that may occur. The course will be both didactic and experiential and will require outside reading and class participation.

AT 804. ART THERAPY ADVANCED ASSESSMENT TECHNIQUES IN RELATIONSHIPS AND FAMILIES 3 HRS.

This advanced art therapy course will introduce art therapy and psychological projective assessments their roles in client evaluation and treatment planning, and will provide a clinical understanding of family art therapy assessment and approaches, with a focus on structural and narrative family art therapy. An emphasis on experiential learning will foster critical thinking in the application of methods and tools relevant to art therapy practice. Assessments covered include Sentence Completion, Draw-A-Person, Kinetic House-Tree-Person, Kinetic Family Drawing, Draw a Story, Person Picking an Apple from a Tree, Diagnostic Art Interview, and Family Art Assessments by Kwiatkowska and Landgarten.

AT 810. INTRODUCTION TO ART THERAPY RESEARCH 2 HRS.

This course will provide an introduction to art therapy research. Existing literature in the art therapy field will be explored and discussed. The class will be introduced to basic research terminology and concepts, formats in proposals in research, problems in art therapy and research design. Students are expected to gain an understanding of current research, pitfalls in research, ethics and multicultural considerations. The student will formulate and complete two research proposals. The instructor will aid in research ideas, as needed. Additionally, students will complete pertinent literature reviews and participate regularly in class discussions.

AT 812. APPLIED ART THERAPY RESEARCH 2 HRS.

This course will provide an advanced review of research design and implementation in the art therapy field. The class will review research terminology and concepts, formats in conducting research, research problems in art therapy and research design. Students are expected to research, design and complete a research project in conjunction with the SPSS class. The instructor will aid in research ideas, as needed. Additionally, students are expected to complete critical reviews of research and participate regularly in class discussion.

AT 835. ART THERAPY INTERNSHIP 1-6 HRS.

This course is an advanced art therapy seminar providing supervision and peer consultation specific to internships and clinical practice. Formal and brief case presentations incorporating theoretical framework (including technique), diagnosis, assessment and treatment, and relevant ethical issues will be presented and discussed. Students will examine their performance at their current internship site(s), contribute regularly, provide and receive feedback, and engage in discussions regarding case studies presented in class. Professional issues and opportunities will be presented, discussed, and pursued. Additionally, the course includes an experiential learning component; learners will engage in media exploration and appropriate application (as well as contra-indication) with clinical populations. Full participation in class dialogue is essential; peer feedback, critical thinking, and idea sharing are viewed as intellectual exercises.

AT 849. ART THERAPY MASTERS PROJECT 3 HRS.

(Prerequisite, consent of advisor.) This course allows students to create an original independent project for the professional advancement of the art therapy field within a structured format supervised by art therapy faculty. The scope of the work could include the creation of instructional manuals, videotapes, or CD-ROMS; categorization of patient art; collaborative community art projects; or other similar projects.

AT 850. ART THERAPY THESIS 1-3 HRS.

This course is an advanced art therapy seminar providing mentoring and peer consultation specific to the creation of a Master's Thesis. Students are expected to be proficient in APA style writing. Students will design

and implement research within a structured format, supervised by art therapy faculty and a Thesis Committee. Students will prepare for committee proposal and defense of their work, as well as future presentation and publication.

ATHLETIC TRAINING**AX 711. ATHLETIC TRAINING PRINCIPLES 3 HRS.**

The course is designed to provide introductory information in athletic training aligned with current NATA Athletic Training Education Competencies. Concepts of professional development and responsibilities, risk management, pathology of sports injury, management skills, and general medical conditions will be presented. Students will learn skills related basic concepts of prevention, evaluation, first aid, therapeutic treatment, and rehabilitation.

AX 717. CLINICAL EDUCATION I 2 HRS.

Students are assessed for competency on acute care and immediate emergent management, emergency stabilization and transportation, wound care, and basic taping and wrapping techniques. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 250 clinical hours.

AX 727. CLINICAL EDUCATION II 2 HRS.

(Prerequisites: Admission to the Athletic Training Program, and AX 717, AX 737, and AX 781.) Students are assessed for competency on environmental injury/illness, bracing, padding, anthropometric screening, and ambulatory aids. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 250 clinical hours.

AX 737. ASSESSMENT OF LOWER EXTREMITIES 3 HRS.

This course provides the student with information and basic skills used to evaluate physical injuries and special problems of the lower body. Students will acquire a basic understanding and skills in palpation methods, neurological and special tests. They will also learn pathological and etiological information for a variety of injuries relating to the lower body. Students will also have an opportunity for out of class experiences with medical professionals and surgical observations.

AX 747. ASSESSMENT OF UPPER EXTREMITIES 3 HRS.

(Prerequisites: ZO 362 and ZO 363, and admission into the Athletics Training Program or Permission of Program Director.) This course provides the student with information and basic skills used to evaluate athletic injuries and special problems of the upper body. Students will acquire a basic understanding and skills in palpation methods and neurological and special tests. They will also learn pathological and etiological information for a variety of injuries relating to the upper body. Students will have the opportunity to participate in experiences outside of class with medical professionals and surgical observations.

AX 781. MODALITY USAGE IN ATHLETIC TRAINING 3 HRS.

(Prerequisites: Admission to Athletic Training Program, ZO 362 and ZO 363.) The purpose of this course is to provide you with guidance and knowledge to learn the theory and application of therapeutic modalities for athletic injuries. Understanding of the appropriate reasons for modality usage, guidelines for proper application, and individualization will be trained and tested through curriculum and application of the NATA Athletic Training Educational Competencies.

AX 782. REHABILITATION IN ATHLETIC TRAINING 3 HRS.
(Prerequisites: ZO 362 and ZO 363, and admission into the Athletic Training Program or Permission of Program Director.) The purpose of this course is to provide students with guidance and knowledge to build, apply, and progress rehabilitation programs for physical injuries. Understanding of the appropriate rehabilitation process, guidelines for progression, and individualization will be trained and tested through curriculum and application of the NATA Athletic Training Education Competencies.

AX 838. CLINICAL EDUCATION III 2 HRS.
(Prerequisites: Successful completion of AX 727, AX 747 and AX 782.) Students will be assessed for competency on therapeutic modalities, postural and gait analysis (lower body), and evaluation of lower body injuries. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 350 clinical hours.

AX 848. CLINICAL EDUCATION IV 2 HRS.
(Prerequisites: Successful completion of AX 838, AX 883 and AX 866.) Students will be assessed for competency on general medical assessment, postural analysis (upper body), and evaluation of upper body injuries. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 350 clinical hours.

AX 866. ORGANIZATION AND ADMINISTRATION IN ATHLETIC TRAINING 3 HRS.
(Prerequisite: Permission of AT Program Director.) The course is an introduction to administration and organization of athletic training. The course includes both the theoretical basis of management as well as administrative task, organizational task, and problem solving techniques. The intent of the course is to prepare prospective athletic trainers to effectively develop concepts of healthcare management as well as learn the values in healthcare administration consistent with the Code of Ethics of the National Athletic Trainers' Association and the Standards of Practice for Athletic Trainers.

AX 883. MEDICAL ISSUES IN ATHLETIC TRAINING 3 HRS.
(Prerequisite: Admission into the Athletic Training Program or Permission of Program Director.) This course will cover current and special topics in Sports Medicine as well as recognition, evaluation, management, and prevention of the most common non-orthopedic medical conditions that affect athletic participation..

ECONOMICS (BUSINESS)

BC 103. PRINCIPLES OF ECONOMICS I 3 HRS.
An introduction to important economic concepts and applications of these concepts to current economic problems in the areas of individual and public welfare, business organization, and the role of government. This macroeconomics course devotes considerable emphasis to national income analysis and the functions of money in facilitating economic processes.

BC 104. PRINCIPLES OF ECONOMIC II 3 HRS.
(Prerequisite, BC 103.) Basic micro-economic theory applied to the analysis of prices, markets, production, wages, interest, rents and profits. Attention also is given to international trade and finance and to current economic problems.

BC 353. MONEY AND BANKING 3 HRS.
(Prerequisites, BC 103 and BC 104 or equivalent and junior standing.) This course examines the theory of money and credit. Particular emphasis is placed upon the role of banks in money supply expansion

and upon the impact of changes in the quantity of money on other economic aggregates, i.e. national income, employment, and the general level of prices.

BC 361. CURRENT ECONOMIC PROBLEMS 1-3 HRS
(Prerequisites, BC 103 and BC 104 or equivalent and junior standing.) This course is designed to aid students in understanding economic principles in relation to current economic problems and forces within the framework of a free enterprise economy. Students are introduced to the economic literature that is relevant to current problems and controversies.

BC 450. CONCEPTS OF INTERNATIONAL ECONCOMICS 3 HRS.
(Prerequisites: BC 103 and BC 104 or equivalent and junior standing) The causes and consequences of the international movement of goods and services. Comparative advantage, the terms of trade, welfare effects, factor price and resource mobility implications are considered. The economics of tariffs, quotas and other artificial barriers to trade are considered. A consideration of international finance includes: the balances of payments, foreign exchange markets, international financial arrangements and the adequacy of international reserves and system of payments.

BC 807. MANGERIAL ECONOMICS 3 HRS.
This course is an extension of microeconomic analysis to enterprises in the private and public sectors of the economy. Major emphasis is placed on the application of statistics and economic theory to decision making in the firm. Background in Economics (Micro and Macro) and background in Statistics, and graduate standing are required for this course.

BC 810. RESEARCH PROBLEM IN ECONOMICS 1-3 HRS.
(Prerequisites, six hours of Economics, plus consent of instructor and the department chair.) Special research problem or readings on a topic initiated by the student and approved by the instructor.

BC 820. INTERNATIONAL ECONOMICS 3 HRS.
(Prerequisites, BC103 and BC104.) Discuss the causes and consequences of the international movement of goods and services. Comparative advantage, the terms of trade, welfare effects, factor price and resource mobility implications are considered. The economics of tariffs, quotas and other artificial barriers to trade are considered.

BUSINESS EDUCATION

BE 300. SPECIAL TOPICS IN BUSINESS EDUCATION 1 -5 HRS.
(Prerequisite, junior standing.) A course for the study of special topics and experimental course offerings at the undergraduate level in the Business Education program.

BE 303. MULTIMEDIA APPLICATIONS FOR BUSINESS 3 HRS.
(Prerequisites, IS 113 and junior standing.) A course designed to introduce basic graphic design principles; provide hands-on experience with desktop publishing, photo-editing and web editor software; and use digital cameras to create images. Using various multimedia technologies, students will create both printed and web-based documents.

BE 344. OFFICE SYSTEMS APPLICATIONS 3 HRS.
(Prerequisites, IS 113 and junior standing.) This course is designed to provide future office systems managers with practical experience in using office systems technologies (hardware and software). It provides an opportunity to evaluate and analyze office systems software through experiential activities.

BE 505. SPECIAL TOPICS IN BUSINESS**EDUCATION****1-5 HRS.**

This course is for the study of various special topics and experimental course offerings by the Business Education program.

BE 540. ELECTRONIC COMMUNICATIONS**3 HRS.**

(Prerequisite, junior standing.) A course designed to develop an understanding of the role of electronic communications in office systems as the integrator of office systems technologies. Topics include communications media, telephone systems, protocols, network architectures, local area networks, audio and video conferencing, and telemarketing.

BE 573. BUSINESS CURRICULUM AND TEACHING METHODS**3 HRS.**

(Prerequisites, Junior level standing and admittance to the School of Business.) This course will focus on the business curriculum development process, state and federal funding and program approval processes as well as principles of teaching accounting and basic business courses such as accounting, entrepreneurship, marketing, business law, and personal finance. Current business curricula curricular issues, and trends related to business education will be covered. Teaching and assessment methods and resources in the business field will also be included. Educational opportunities and careers in business and computer fields will be reviewed.

BE 583. TRAINING AND DEVELOPMENT**3 HRS.**

(Prerequisites, IS 113 and junior standing.) Essential training principles covered include adult learning theory, needs assessment, development of training objectives, selection of training methods and resources, creation and sequencing of learning materials, and training assessment. Instructional strategies and assessment techniques for teaching computer and information technology courses in the information technology career cluster are also covered.

BE 682. LEGAL REQUIREMENTS FOR CAREER/ TECHNICAL PROGRAMS**1 HR.**

(Prerequisite, upper-division or graduate standing.) Develops the competencies needed to plan, manage, control, and evaluate career and technical education programs. Special emphasis is placed on developing program proposals and completing forms and reports.

BE 683. COORDINATION OF BUSINESS/EDUCATION PARTNERSHIPS**1 HR.**

(Prerequisite, upper-division or graduate standing.) Develops the competencies needed to plan and manage cooperative education, in-house training, and apprenticeship programs. Selection of training materials and training sites as well as evaluation of students will be covered.

BE 684. METHODS AND MATERIALS IN MARKETING EDUCATION**1 HR.**

(Prerequisite, seniors or graduate standing.) This course will develop knowledge of the learning process, select and use the most appropriate learning materials and methods for vocational education, write behavioral objectives, understand the learning system, provide for individual differences, plan related study, develop curriculum and courses of study, and evaluate student achievement.

BE 701. PC TROUBLESHOOTING**1 HR.**

This course covers ordinary problems that teachers may have with computers in the classroom. The course covers troubleshooting problems on PCs, laser printers, WINDOWS, LANs, PC to LCD panel connections including identification of components, preventive maintenance, memory problems, power supplies, and diagnostic software.

BE 702. METHODS OF TEACHING COMPUTER STUDIES**2 HRS.**

This course will assist students in reviewing computer textbooks and other instructional materials, teaching appropriate applications software, reading computer periodicals for current trends and information, securing instructional materials for teaching secondary computer studies courses, creating lesson plans for computer courses, and writing a unit plan.

BE 705. SPECIAL TOPICS IN BUSINESS EDUCATION**1-5 HRS.**

(Prerequisite, graduate standing.) A course for the study of special topics or experimental offerings in the field of business education.

BE 710. DESIGNING COMPUTER PRESENTATIONS**2 HRS.**

Students will design charts, transparencies, slides, and presentation software. The course covers evaluation of media for various target audiences, advantages and disadvantages of various presentation methods/media, principles of design, and analysis of cost and quality of presentations.

BE 711. ENTREPRENEURSHIP EDUCATION**2 HRS.**

Entrepreneurship education will be directed toward educators who will develop and teach entrepreneurship courses on the secondary, post-secondary, and adult levels. It will be a summary of the background information, curricula options, and teaching techniques for entrepreneurship.

BE 721. WINDOWS FOR TEACHERS**1 HR.**

Provides teachers with an understanding of the basic functions of Windows software and appropriate methods of teaching Windows software. Through hands-on instructions, students will learn to run software programs, open and close windows and use windows accessories, utilities, and many other functions. Appropriate content for unit plans will also be covered as well as preventive maintenance and rudimentary troubleshooting procedures.

BE 740. PRACTICUM IN BUSINESS AND INDUSTRY**3 HRS.**

(Prerequisite, graduate standing in business.) Students will interact with industry through planned semester-length experiences in order to research, observe, and otherwise study developing industry technology and management practices. These experiences are designed to aid in the improvement of teaching and learning for business and industry training programs.

BE 743. BUSINESS REPORT WRITING**2 HRS.**

(Prerequisite, graduate standing.) A study of the basic techniques in writing clear, concise, convincing and correct business reports. Preparation of memoranda, informational, analytical, periodical, conference, convention, and other common business reports. Includes a study of different report writing styles and formats.

BE 760. IT PATHWAYS**3 HRS.**

(Undergraduate or Graduate standing) The purpose of the course is to examine the Information Technology (IT) Career Cluster, corresponding pathways and course offerings through the lenses of a business educator. The course will explore each of the four Kansas State Department of education IT pathways which include: Information support & Services, Network Systems, Programming & Software Development, and Web & Digital Communications. Within each of the four pathways, the course offerings, technology competencies, and teaching requirements will be analyzed.

BE 798. WORKSHOP IN BUSINESS**EDUCATION****1-6 HRS.**

Emphasizes the development of current teaching methods and materials in business education. Group organization and planning, followed by the selection of projects for individual and group study. Lectures, demonstrations, committee work, individual conferences.

BE 805. SPECIAL TOPICS IN BUSINESS**EDUCATION****1-5 HRS.**

(Prerequisite, graduate standing.) A course for the study of special topics or experimental offerings in the field of business education.

BE 830. TECHNOLOGY TOOLS FOR**EDUCATION/ BUSINESS****3 HRS.**

(Prerequisite, graduate standing.) A course for students to study the use of technology in schools and business using an experimental approach. Students will be provided with fundamental knowledge of interactive video (teleconferencing/distance learning, computer hardware and software selection, multimedia hardware and software, LANs, electronic mail, modems and bulletin boards, and scanners.

BE 840. INSTRUCTIONAL TECHNOLOGY**SELECTION AND FACILITIES DESIGN****3 HRS.**

Students will review guidelines for installation & use of instructional technologies in classrooms. The course will also cover the selection of various types of technologies including computer networks, computer work stations, scanners, and other peripheral devices. Students will design a facility that includes various instructional technologies.

BE 850. EMERGING ISSUES IN BUSINESS AND**COMPUTER EDUCATION****3 HRS.**

Students will investigate and analyze issues found in literature related to computer and business education. A seminar approach will be utilized including group research, discussion, and oral and written reports.

BE 861. EDUCATION/TRAINING PROGRAM**DESIGN****3 HRS.**

Development of competencies in various job analysis methods in order to develop both firm and industry wide training programs. Emphasis will be upon manpower planning, developing program objectives, content, learning activities, and evaluation techniques. Also included will be program articulation, budgeting, and public relations.

BE 882. COMPUTER & BUSINESS CURRICULUM**DEVELOPMENT****3 HRS.**

A study of the growth, development and present status of business and computer education. Evaluation of present curricular practices and trends. Principles and practices involved in curriculum construction as applied to the elementary, intermediate, secondary, and post-secondary schools.

BE 883. FIELD STUDY**1-6 HRS.**

Independent study in business and business education. Opportunities for special study or experience in area of the student's special interest. The amount of credit granted depends upon the nature and extent of the study.

BE 884. BUSINESS EDUCATION TEACHING**METHODS****3 HRS.**

(Prerequisite, graduate standing.) This course covers new methodologies for teaching marketing, accounting, business law, computer applications, desktop publishing, multimedia, entrepreneurship, e-commerce, international business, and web application development courses. Designed for inservice teachers, students will apply research findings to teaching methodologies, compile sources for teaching materials, and create course syllabi, lesson plans, and unit plans.

BE 885. BUSINESS EDUCATION/TRAINING**PROGRAM MANAGEMENT****3 HRS.**

This course is a study of basic management theory as it applies to program supervision. The management functions of planning, organizing, staffing, directing, and controlling are applied through the case problem method to managing a business education program at all school levels.

BE 890. RESEARCH IN BUSINESS AND**COMPUTER EDUCATION****3 HRS.**

A review of research in business and computer education, study of research methods and techniques, and the determination of a research proposal. The completion of the first two chapters of a research project, the procedures for data gathering and writing, the summary conclusions and recommendations, and the evaluation of completed research problems.

BE 897. RESEARCH PROJECT IN BUSINESS**EDUCATION****1-3 HRS.**

(Prerequisite, BE 890 or equivalent.) The development and completion of a research project in business education.

BE 898. THESIS M.S.**1-5 HRS.**

(Prerequisite, BE 890 or equivalent.) An independent investigation of a problem or project in business or business education. Optional requirement for the masters degree.

BOTANY**BO 159. SPECIAL TOPICS IN BOTANY****1-3 HRS.**

(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of botany.

BO 212. BIOLOGY OF PLANTS**3 HRS.**

(Prerequisite, GB 140 or equivalent.) A study of anatomical and physiological problems, growth and development, ecology and evolution of plants.

BO 213. BIOLOGY OF PLANTS LAB**1 HR.**

(Prerequisite, GB 140 or equivalent.) A study of anatomical and physiological problems, growth and development, ecology and evolution of plants.

BO 259. SPECIAL TOPICS IN BOTANY**1-3 HRS.**

(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of botany.

BO 338. TREES AND SHRUBS**2 HRS.**

(Prerequisite, GB 100 or equivalent, or permission of instructor. BO 339 must be taken concurrently.) Lectures and discussion concerning the study of the trees and shrubs, particularly those adapted to the urban environment, their ecology, selection, and techniques of identification and cultures.

BO 339. TREES AND SHRUBS LAB**1 HR.**

(Corequisite, must be taken concurrently with BO 338.) Laboratory and field experiences emphasizing the ecology, identification and diagnostic characters of woody plants, both native and cultivated.

BO 409. BOTANY PROJECTS**1-3 HRS.**

(Prerequisite, consent of instructor.) The student works independently, with aid and advice of one or more members of the staff, on a project in an area of botany in which they have some interest and competence.

BO 430. ECONOMIC BOTANY **3 HRS.**
(Prerequisites, BO 212 and BO 213 or equivalent.) Lecture/ laboratory dealing with plants of economic importance to humans, ranging from lumber, food, medicine, spices, fibers, oils, resins, and ornamental plants to plants providing materials for industrial uses. Historical origins and implications of many of these plants and plant products are also emphasized.

BO 459. SPECIAL TOPICS IN BOTANY **1-3 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of botany.

BO 542. PLANT TAXONOMY **2 HRS.**
(Prerequisite, BO 212 or equivalent. BO 543 must be taken concurrently.) Lecture and discussion on the taxonomy, ecology, techniques of identification and economics of flowering plants. Emphasis is placed upon the characteristics of families and orders.

BO 543. PLANT TAXONOMY LAB **2 HRS.**
(Prerequisite, BO 542 must be taken concurrently.) This course is designed to introduce the student to field techniques, ecology of flowering plants in the area, and identification and recognition of both native and cultivated taxa.

BO 552. PLANT KINGDOM **2 HRS.**
(Prerequisites, BO 212 and BO 213.) Designed for undergraduate biology majors and beginning graduate students. Lecture work on non-vascular plants and living and fossil vascular plants, with emphasis upon morphology and evolutionary trends.

BO 553. PLANT KINGDOM LAB **2 HRS.**
(Prerequisites, BO 212 and BO 213, concurrent enrollment in BO 552.) Designed for undergraduate biology majors and beginning graduate students. Laboratory work on non-vascular plants and living and fossil vascular plants with emphasis upon morphology and evolutionary trends.

BO 748. RANGE MANAGEMENT AND LAB **4 HRS.**
(Prerequisites; BO 212 and BO 213, and EB 480). This is a course in the application of basic plant ecology to the management of range and pasture lands. The course includes grassland ecology, animal husbandry, management practices, range improvements, range evaluation and management.

BO 750. PLANT ANATOMY AND PHYSIOLOGY **2 HRS.**
(Prerequisite, BO 212 and 213 or equivalent. Must be taken concurrently with BO 751.) Lectures dealing with structure and function of vascular plant cells, tissues, and organs. Concepts covered will include meristems, cambium, primary and secondary growth, photosynthesis, respiration, xylem and phloem, nutrition and water relations.

BO 751. PLANT ANATOMY AND PHYSIOLOGY LABORATORY **2 HRS.**
(Prerequisite, BO 212 and 213 or equivalent. Must be taken concurrently with BO 750.) Microscopic and gross anatomical studies and experiments to illustrate the basic concepts of the physiology of vascular plants. The laboratory is designed to complement the lecture material and is correlated with the lecture as much as possible.

BO 765. GRASSES **2 HRS.**
(Prerequisite, BO 542-543 or equivalent. BO 766 must be taken concurrently.) Lectures and discussion emphasizing taxonomy, morphology, and ecology of the grasses, sedges, and rushes. Special emphasis is placed upon the generic units of classification.

BO 766. GRASSES LAB **2 HRS.**
(Prerequisite, must be taken concurrently with BO 765.) This course is designed to introduce the student to field techniques, ecology of grasses and identification and recognition of both native and cultivated taxa.

BO 809. GRADUATE PROJECT IN BOTANY **1-3 HRS.**
(Prerequisite, consent of instructor.) The student works independently, with the advice and aid of one or more members of the staff, on a project in which they have some interest or competence.

BO 859. SPECIAL TOPICS IN BOTANY **1-4 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of botany.

BO 885. GRADUATE RESEARCH IN BOTANY **2-3 HRS.**
(Prerequisites, graduate standing and at least three hours credit in graduate-level independent study.) Investigation of problems in botany by students who have demonstrated research ability at the graduate level.

BUSINESS

BU 099. MAJOR FIELD TEST IN BUSINESS **0 HR.**
(Prerequisite, Major Field Test in Business co-requisite MG 473.) An "S" grade in this course indicates the student has achieved an acceptable score on the Major Field Test in Business consistent with The School of Business requirements for all students receiving the Bachelor of Science in Business degree.

BU 102. BUSINESS DYNAMICS **3 HRS.** 
The purpose of the course is threefold: (1) to prepare students to deal effectively with the challenges of contemporary life, including business-society relationships, business history, worked events, economic implications, and future expectations; (2) to help students to develop the skills they need to understand the principles and processes of every day business life; and (3) to introduce students to the academic opportunities and activities offered by the School of Business.

BU 105. SPECIAL TOPICS IN BUSINESS **1-6 HRS.**
This course will serve as an umbrella course on the lower division level so that students may enroll in special topics or experimental courses in business.

BU 202. BUSINESS COMMUNICATION **3 HRS.**
(Prerequisites: BU 102, EG 102, and sophomore standing.) This course will cover a range of communication used in business ranging from written and oral communication to non-verbal communication. The course will help students develop a personal brand, develop their ability to write and speak with confidence in business settings, and develop their nonverbal communication skills (professional attire and body language). This course will also discuss how to appropriately communicate with people from different cultures, generations, disciplines, and backgrounds. The skills develop with be applicable for internship searches and job interviews.

BU 241. PERSONAL FINANCE **3 HRS.** 
Designed for business and non-business majors. This course is concerned with the personal financial choices of the individual consumer. Areas of study include personal financial planning and managing, purchasing, insuring, investing, protecting and controlling resources.

BU 255. BUSINESS STATISTICS 3 HRS.
(Prerequisite, MA 110 with grade of C or higher, MA 161, or MA 165.) A course designed to introduce the student to both descriptive and inferential statistics as applied to business. Includes the use of descriptive measures, probability, discrete and continuous distributions, sampling distributions, estimation, hypothesis testing, and regression. A statistical software package is utilized.

BU 260. INTRODUCTION TO ENTREPRENEURSHIP 3 HRS.
This course provides an experiential study of the activities and skills needed to successfully create, launch, run, and harvest an entrepreneurial endeavor. Emphasis is placed on ideation, creativity, collaboration, pitch, financing, lean startup, and considerations that impact launching, maintaining, and harvesting a start-up.

BU 302. BUSINESS PROFESSIONALISM 1 HR.
(Prerequisite: BU 202 and junior standing.) The course is designed to introduce students to the professional environment. The primary objectives of the course are to allow the students to learn about the role of professional behavior in business, to learn about career opportunities in business, and to learn about networking, job search strategies, and negotiating a job offer.

BU 305. SPECIAL TOPICS IN BUSINESS 3 HRS.
(Prerequisite, junior standing.) A course for the study of special topics and experimental course offerings at the undergraduate level in business programs. Students must earn a minimum of a "C" grade to meet major requirement.

BU 353. PRINCIPLES OF BUSINESS LAW 3 HRS.
(Prerequisite, junior standing.) An overview of the U.S. Legal system and laws that apply to business activities. The areas of law covered include the court system, constitutional law, contract law, tort law, product liability, international law, agency law, law of corporations, antitrust and securities law, plus several other areas. The class also includes coverage of ethical principles, both separately and as part of several other topics. Students must earn a minimum of a "C" grade to fulfill degree requirements.

BU 393. ETHICAL DECISION-MAKING IN ORGANIZATIONS 3 HRS.
This course investigates, analyzes, and applies the various theories or frameworks that frame ethical and sustainable decision-making, tactics, and strategies within organizations. Students will learn the benefits of and will use critical thinking skills to avoid rationalizations and logical fallacies that impede ethical decision-making. Students will evaluate the role ethics and sustainable practices have in the success and longevity of an organization and the well-being of the common good. Throughout the course, students will examine topics such as compliance, governance, corporate culture, core practices, workplace relationships, leadership styles, whistleblowing, sustainability, bribery and corruption, stakeholder theory, and shareholder theory. Students must earn a minimum of a "C" grade in BU 393 to fulfill major/minor requirements.

BU 490. INDEPENDENT STUDY 1-3 HRS.
(Prerequisites, junior standing, consent of chair.) Business students are given an opportunity to develop in depth a problem relating to business discovered in a previous business class. Students must have a topic in mind before enrolling in the course and a developed plan with supervising instructor.

BU 505. SPECIAL TOPICS IN BUSINESS 1-5 HRS.
(Prerequisite, senior or graduate standing.) A course for the study of special topics and experimental course offerings in business. Students must earn a minimum of a "C" grade in BU 505 to fulfill major/minor requirements.

BU 520. ADVANCED BUSINESS STATISTICS 3 HRS.
(Prerequisite, BU 255 and senior or graduate standing.) This is an advanced course dealing with the application of quantitative procedures to business decision making. It includes the business application of analysis of variance, multiple regression analysis, covariance and decision theory. Students must earn a minimum of a "C" grade in BU 520 to fulfill major/minor requirements.

BU 528. INTERNSHIP IN BUSINESS 1-5 HRS.
(Prerequisites, senior or graduate standing.) Professional employment experience in a business occupation coordinated through visitations, discussions, and written analysis. Students are employed by business firms, government offices, and nonprofit organizations. Student and employer and supervising instructor develop plan. Students must earn a minimum of a "C" grade in BU 528 to fulfill major/minor requirements.

BU 530. BUSINESS, LAW AND SUSTAINABILITY 3 HRS.
(Prerequisite, Senior or graduate standing.) This course reviews the legal measures taken by governments in the United States to promote a sustainable business environment; explores how and why businesses adopt sustainability as a measure of performance; and analyzes selected industry sectors with the objective of identifying barriers to and opportunities for achieving sustainable growth, emphasizing the legal environment within which these industries operate.

BU 540. BUSINESS AND SOCIETY 3 HRS.
(Prerequisite, senior or graduate standing.) A study of the history, philosophy, and social responsibility of business; the relationship between business and a dynamic social, political, and economic environment; and the issues of poverty, ecology, and consumerism. Students must earn a minimum of a "C" grade in BU 540 to fulfill major/minor requirements.

BU 543. ADVANCED BUSINESS COMMUNICATIONS 3 HRS.
(Prerequisites: Junior Standing) A course designed to develop writing and communications competencies in handling internal business communications situations. Areas to be covered: abstracts/summaries, objectives, proposals, reports, non-written communications, and electronic/technological communications.

BU 550. PRINCIPLES OF INTERNATIONAL BUSINESS LAW 3 HRS.
(Prerequisite, senior or graduate standing.) A law-based course that explores the legal environment a business person will encounter in international business transactions, including various legal systems and the International Code on the Sale of Goods. Students must earn a minimum of a "C" grade in BU 550 to fulfill major/minor requirements.

BU 573. LAW OF COMMERCE 3 HRS.
(Prerequisite, senior or graduate standing.) This class covers, in detail, the common law of contracts, sale law (UCC), negotiable documents, secured transactions, property law, bailments, trusts and estates, and bankruptcy law. The class is intended to give students more detailed coverage of important areas of law for businesses and to prepare accounting majors for the CPA exam. Students must earn a minimum of a "C" grade in BU 573 to fulfill major/minor requirements.

BU 705. SPECIAL TOPICS IN BUSINESS 1-5 HRS.
A course for the study of special topics or experimental offerings in the field of business.

BU 758. BUSINESS CASE STUDY 1-3 HRS.
(Prerequisite, consent of chair.) To provide an opportunity for research into a felt, sensed, or known business problem under academic supervision. Designed to give the graduate student an insight into the ways in which principles and theories studied have actuality and reality in business situations.

BU 770. OPERATIONS RESEARCH 3 HRS.
(Prerequisite, BU 255.) Utilization of quantitative methods as a basis for allocation of resources. An analysis of quantitative models such as Program Evaluation and Review Technique, transportation linear programming, simplex linear programming, and Bayesian statistics.

BU 773. FOUNDATIONS OF ECONOMICS AND STATISTICS 3 HRS
An introductory study of the accounting and finance function of business firms from a manager's point of view. Emphasis is placed on the basic understanding of financial statements, accounting cycle, financial accounting vs managerial accounting, time value of money, and cash flows analysis.

BU 820. QUANTITATIVE ANALYSIS FOR BUSINESS DECISIONS 3 HRS.
Quantitative Analysis for Business Decisions is a graduate course designed to introduce the student to quantitative approaches in business decision making. It includes decision analysis, regression analysis in forecasting, linear and integer programming, transportation, assignment and transshipment problems, project scheduling, inventory management, simulation, and multi-criteria decision problems. The software packages Management Scientist, Excel, and/or SAS/SPSS are used to solve quantitative business analysis problems.

BU 858. BUSINESS CASE STUDY 1-3 HRS.
(Prerequisite, consent of chair.) A study of an actual case in business and the development of a practical solution to the situation.

EARLY CHILDHOOD

CD 121. INTRODUCTION TO CHILD DEVELOPMENT 2 HRS.
Introductory level course designed for present and future child care workers. Information about child development from conception to age 5 will be studied with the purpose of using this information in the child care setting. Understanding development in physical, cognitive, social/emotional and communication abilities and its cultural variations is essential for effective teaching of young children.

CD 160. EARLY CHILDHOOD LEARNING ENVIRONMENT AND CURRICULUM I 2 HRS.
(Prerequisite, CD 121, concurrent, CD 161.) Introductory level course designed for present and future child care workers and builds on the skills acquired in CD 121. Emphasis is on the importance and design of the classroom environment and how it supports children's learning.

CD 161. EARLY CHILDHOOD LEARNING ENVIRONMENT PRACTICUM I 1 HR.
(Concurrent, CD 160.) This practicum is designed to support and is taken concurrently with CD 160 and provide opportunity to observe key characteristics of typical development. Students will be directed to focus on various observation and participation assignments. Students are expected to be an active, contributing member of a child care center or home staff.

CD 170. OBSERVATION AND ASSESSMENT OF YOUNG CHILDREN 1 HR.
(Prerequisites, CD 121, CD 160.) An introductory level course designed for present and future child care workers. Emphasis is placed on the basic importance of observation in most other activities in the childhood classroom. Observation techniques will be covered and demonstrated through assignments in the real classroom. The tie between observation and each of the following will be covered: assessment, curricular planning, classroom management and parent conferences.

CD 260. EARLY CHILDHOOD LEARNING ENVIRONMENT AND CURRICULUM II 2 HRS.
(Prerequisites, CD 160, CD 161; concurrent, CD 261.) Introductory level course designed for present and future child care workers and builds on the information in CD 160 and experiences in CD 161. Emphasis is on planning developmentally appropriate learning activities for children ages birth through five and how to develop them into an integrated curriculum.

CD 261. EARLY CHILDHOOD LEARNING ENVIRONMENT PRACTICUM II 2 HRS.
(Concurrent, CD 260.) Designed to support the content of CD 260 and provides a setting for curriculum planning as assigned in companion class. Students will be evaluated on emerging professional skills and quality of work in the early childhood classroom.

CD 262. EARLY CHILDHOOD INTERMEDIATE PRACTICUM 2 HRS.
(Prerequisite, CD 260; concurrent, CD 274.) The student will be able to implement curricular planning skills gained in CD 260 as well as provide a setting for supporting positive interactions among the children. In this higher level practicum, students will be evaluated on professional skills and quality work in the early childhood classroom.

CD 272. WORKING WITH FAMILIES AND COMMUNITIES 2 HRS.
Introductory level course designed for present and future child care workers. Information will be provided on the key links among families, school and the community. Emphasis will be placed on communication within the unique teacher-family relationship and how to keep that partnership open, viable and productive. Exploring the resources available within communities, how to access them and how to build partnerships will be included.

CD 273. HEALTH, SAFETY AND NUTRITION OF YOUNG CHILDREN 2 HRS.
An introductory level course designed for present and future child care workers. Emphasis is placed on the latest developments in health, safety and nutrition and their application to the child care setting. The role child care professionals play in fostering preventive health concepts and helping young children establish good habit attitudes and lifelong responsibility for good health is also included.

CD 274. INTERACTIONS WITH YOUNG CHILDREN 2 HRS.
(Prerequisite, CD 121.) An introductory level course designed for present and future child care workers. Emphasis is placed on understanding appropriate interactions with children developing positive relationships, promoting self awareness and self esteem, setting limits, and fostering self discipline. In addition, the role that curriculum and physical setting have in classroom management will be addressed.

CD 275. EARLY CHILDHOOD ASSOCIATE PRACTICUM 2 HRS.
(Prerequisites, CD 161, CD 261, CD 262.) The final practicum in a series of four designed for the present or future child care worker to demonstrate all acquired skills and abilities to design and implement quality developmentally appropriate care and education for young children. The student must either be in a full-time child care setting to have access to one.

CD 310. INTRODUCTION TO EARLY CHILDHOOD EDUCATION PRACTICUM 1 HR.
A course designed to give students directed experiences in observing and recording the development of young children. Students complete worksheets while observing children participating in a variety of activities.

CD 321. EARLY CHILDHOOD DEVELOPMENT AND EMERGING SPEECH AND LANGUAGE 3 HRS.

The course is designed to fully explore the normal growth and development of children, especially language development from prenatal stages through age 8. Theoretical background of general and language development is discussed including Piaget, Skinner, Chompsky, Maslow and Bronfenbrenner. There is a thorough examination of each stage of growth within the context of motor, cognitive and language development. The child as a whole is emphasized with attention to the inter-connectedness of skills and abilities; and the importance of the interplay between the environment and the individual child. Exceptional development and its impact on the child and their family will also be discussed.

CD 322. EDUCARE FOR INFANTS AND TODDLERS 3 HRS.

This course provides an in-depth look at alternative care for infants and toddlers of normal, special and diverse populations. Major emphasis is placed on how to provide quality care to meet the physical, emotional, cognitive and social needs of infants and toddlers. The class also provides information on administrative requirements, health and safety needs, effective use of equipment, and cooperation with parents that is unique to infant-toddler programs. The class builds on and adds to pre and post-natal development and influences that can adversely or positively affect developmental processes. Current promising practices will also be reviewed.

CD 323. ADMINISTRATION OF PROGRAMS FOR YOUNG CHILDREN 3 HRS.

This course provides an in-depth study of the administrative role in programs for young children. The scope of knowledge and skills required to effectively orchestrate an early childhood program is the focus of this course. This includes information about program philosophy, licensing standards, accreditation procedures, curriculum materials, space and equipment, health and safety issues, fiscal and time management, personnel management, parent involvement, and community relations.

CD 324. INTERDISCIPLINARY COLLABORATION ON EARLY CHILDHOOD PROGRAMS 3 HRS.

The student will examine trends that promote interagency and interdisciplinary approaches to serving the needs of children and families. The role of the teacher (or other education-focused entity of a program) will be examined in terms of primary service providers and in terms of team membership at local, state and federal levels. The acquisition of grant/contract funds will be highlighted in the context that all professionals, particularly those working in consortium with other agency representatives, are eligible, able and do acquire monies for start-up program, program enhancements, and program continuations. Skills that foster communication and cooperation between families, communities and service agencies will be studied, as will the involvement of parents and parenthood education.

CD 326. INTRODUCTION TO INCLUSIVE EARLY CHILDHOOD EDUCATION 2 HRS.

(Prerequisites, CD 321 and EL 310, with a grade of "C" or better in each.) This course emphasizes developmentally appropriate/inclusive practices in assessment and adaptive planning to practice responsible inclusion of children with special needs. Assignments will include observations, assessment and individualized planning/implementing learning experiences, IEP/IFSP/Rehab 504 plans, and transition plans for children with special needs.

CD 327. METHODS OF INCLUSIVE EARLY CHILDHOOD EDUCATION I 2 HRS.

(Prerequisite, CD 326; concurrent with CD 328.) This course emphasizes developmentally appropriate/inclusive practices and environments in the field of early childhood education from birth to age 8. This course addresses integrated curriculum planning and implementation for all children, including those with special needs and/or diverse cultural or socioeconomic backgrounds. Curriculum areas of language, music/movement, and art are included. The transition from child observation to reflection on curriculum planning is emphasized.

CD 328. PRACTICUM IN INCLUSIVE EARLY CHILDHOOD EDUCATION I 1 HR.

(Prerequisite, CD 326 and concurrent with CD 327.) Students are required to spend 60 hours in a practicum setting for preschool-age children. Participation in the center/preschool activities is expected. Students are expected to work effectively as a member of the instructional team under the direction of the teacher/director. Assignments will include observations, assessments and planning, implementing learning experiences.

CD 343. SPECIAL STUDIES IN EARLY CHILDHOOD EDUCATION 1-3 HRS.

(Prerequisite, consent of instructor.) This course offers an in-depth study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed.

CD 344. SPECIAL STUDIES IN EARLY CHILDHOOD EDUCATION 1-3 HRS.

This undergraduate level course is used for current topics and special studies in early childhood education. Topics will vary from semester to semester. Student work will be graded on a pass/no credit basis.

CD 429. METHODS OF INCLUSIVE EARLY CHILDHOOD EDUCATION II 2 HRS.

(Prerequisites, CD 327, CD 328, and concurrent with CD 430.) This course includes the curricular domains of literacy, mathematics, science, health, and social studies. In addition, transitions, scheduling, guidance and classroom management will be included.

CD 430. PRACTICUM IN INCLUSIVE EARLY CHILDHOOD EDUCATION II 2 HRS.

(Prerequisite, concurrent with CD 429.) Students will spend 100 hours in a pre-K setting and are expected to participate in all classroom activities and work collaboratively as a member of the instructional team. Students will teach under the direction of the teacher/director and an early childhood intern, if appropriate. Assignments will include observation, assessment and implementing the learning experiences planned in CD 429.

CD 451. INDEPENDENT STUDY IN EDUCATION 1-3 HRS.

(Prerequisite, consent of the chair of the department.) Students will carry out individual projects under the guidance of selected staff members.

CD 730. CHARACTERISTICS INCLUSIVE EARLY CHILDHOOD EDUCATION (BIRTH TO AGE EIGHT) 3 HRS.

The purpose of this course is to provide an overview of early childhood special education, including historical perspectives; rationale; normal and exceptional development (including learning disabilities; attention deficit-hyperactivity disorder; emotional and behavior disorders; intellectual and developmental disabilities; speech and language disorders; deafness and hearing loss; visual impairments; autism spectrum disorders; physical and health disabilities; severe and multiple disabilities; gifted and talented); etiology; identification and assessment; service delivery approaches; educational considerations/accommodations/modifications; program models; teaming; working with families, including culturally diverse populations; research; and current issues in ECSE and ECU. Working with infants and toddlers with special needs and their families (Part C of the Individuals with Disabilities Education Act - IDEA); Individualized Family Service Plans (IFSP), as well as Individual Education Plans (IEP), and on preschoolers age 3-5 with special needs (Part B, Section 619 of the IDEA), the course also includes information on children age 6-8 with disabilities (Part B for children and youth 6-21). This is due to the fact that early childhood encompasses a huge developmental spread--from birth to age eight, yet part B of IDEA covers age 3-21.

CD 737. COLLABORATION IN INCLUSIVE EARLY CHILDHOOD PROGRAM 3 HRS.

This course is one of the core courses required for licensure in inclusive early childhood programs. This course focuses on creating the critical thinker, creative planner and effective practitioner, by emphasizing collaboration and teaming within developmentally appropriate/inclusive programs in the field of early childhood education from birth to age eight. Candidates will engage in early childhood and creativity theory-based effective practice and decision making when working with children, their families and teams (CF:P3). Skills that foster communication, cooperation and collaboration between families, communities, service agencies and inclusive early childhood programs will be addressed. Recognizing the family as a system, and supporting families with sensitivity to family culture/diversity will be emphasized. Resources for families are explored and implementation of interactive teaming will be illustrated.

CD 743. SPECIAL STUDIES IN EARLY CHILDHOOD EDUCATION 1-3 HRS.

(Prerequisite, consent of instructor.) To provide in-depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction, evaluation of curriculum. Topics will vary from semester to semester.

CD 744. SPECIAL STUDIES IN EARLY CHILDHOOD EDUCATION 1-3 HRS.

(Prerequisite, consent of instructor.) This is a graduate level course used for current topics and special studies in early childhood education. Topics will vary from semester to semester. Student work will be graded on a pass/no credit basis.

CD 745. GRADUATE ASSISTANT TRAINING 1 HR.

This course is mandatory for any newly appointed GTA/GA in the department. The student will work directly with the instructor to become fully informed about the scope of the position held. In addition, special emphasis will be placed on instructional strategies as appropriate for the position. Students will be expected to meet with the instructor and prepare assignments for a minimum of 15 hours during the first eight weeks of the semester.

CD 764. ADMINISTRATION OF PRESCHOOL FACILITIES 3 HRS.

(Enrollment is not permitted in this course if previously enrolled in CI 351 or CI 838.) A self-paced course to help the potential child care

facility director or administrator gain an understanding and expertise in the areas of administration and record keeping, including business skills and staff supervision. The format of this self-paced course enables students on and off campus to enroll.

CD 780. MANAGEMENT AND SUPERVISION IN EARLY CHILDHOOD PROGRAMS 3 HRS.

This course prepares students as potential child care facility directors. Students gain expertise and understanding in the areas of administration and personnel management. Emphasis is placed on effective supervision of family involvement, practicum students, and other volunteers. Further, focus is on formulating and articulating a philosophy for a center-based program, as well as, choosing and monitoring effective curriculum.

CD 785. INTEGRATING CREATIVE ARTS INTO INCLUSIVE EARLY CHILDHOOD EDUCATION 3 HRS.

This course will focus on creativity and artistic creativity of children birth to age eight. This elective would be for Early Childhood & Master Teacher graduate credit. Psychology, Rehabilitation/Counseling and Art Therapy graduate students might be interested. This would also work well for recertification credits.

CD 832. OBSERVATION ASSESSMENT AND SCREENING IN INCLUSIVE EARLY CHILDHOOD PROGRAMS 3 HRS.

(Prerequisite, CD 730) This course is designed to provide students with opportunities to acquire the knowledge and skills necessary to implement developmentally appropriate screening and assessment for young children in home- and center-based programs. In addition, effective team membership, home visiting, and data collection using a variety of methods will be emphasized.

CD 838. ADVANCED METHODS FOR INCLUSIVE EARLY CHILDHOOD EDUCATION 3 HRS.

(Prerequisite, CD 832.) This course emphasizes methods and materials for working with young children (birth to five) with special needs and their families. Topics include IEPS/IFSPS, instructional strategies, current service delivery approaches, program models, curriculum development and transition.

CD 841. CLINICAL EXPERIENCE: INCLUSIVE EARLY CHILDHOOD PRACTICUM: CENTER BASED 3 HRS.

(Prerequisite, CD730, CD737, CD831, CD832, CD838 and consent of instructor.) This course provides students with 150 hours experience in an early childhood special education preschool setting. Assessment and program planning are included.

CD 842. FAMILY INVOLVEMENT IN INCLUSIVE EARLY CHILDHOOD PROGRAMS 3 HRS.

(Prerequisite, CD 730, CD 832, CD 838, and CD 841.) This course is designed to address recruiting and involving families, developing effective communication skills for working with families and others in the community and promoting family input in planning. Students will become familiar with commercially prepared parenting program materials and with the skills required to facilitate family and parent groups.

CD 843. WORKING WITH INFANTS AND TODDLERS WITH AND WITHOUT SPECIAL NEEDS AND THEIR FAMILIES 3 HRS.

(Prerequisites: CD730, CD737, CD831, CD832, CD835, CD838, CD841, and CD842.) This course will discuss how to implement effective family-centered services for infants and toddlers with special needs and their families. Major emphasis will be on the IFSP process, case management, planning activities for infants and toddlers, implementing home-based programs and family-focused intervention.

CD 845. AN INTEGRATIVE APPROACH WITH INFANTS AND YOUNG CHILDREN WITH SEVERE DISORDERS OF RELATING AND COMMUNICATING 3 HRS.

This course is designed to give students and practitioners the knowledge base from which to make informed, appropriate recommendations, within an interdisciplinary team setting, regarding appropriate intervention for children with this disorder; base those decisions on individual profiles; form an alliance with families to properly carry out assessment and intervention; and to evaluate the effectiveness of each child's intervention program.

CD 850. RESEARCH PROBLEM IN EARLY CHILDHOOD EDUCATION 3 HRS.

(Prerequisites, ER 752 and consent of instructor.) Under individual direction, the student will select and pursue the investigation of special problems not ordinarily covered by regular courses in Early Childhood Education.

CD 853. RESEARCH PROBLEMS IN EDUCATION 1-6 HRS.

(Prerequisite, permission to enroll must be approved by the chair of the department.) Under individual direction, the student will select and pursue the investigation of special problems.

CD 861. CLINICAL EXPERIENCE: INCLUSIVE EARLY CHILDHOOD PRACTICUM: HOME BASED PRACTICUM BIRTH TO 3 YEARS 3 HRS.

(Prerequisite, CD 843 and consent of instructor.) This course provides the opportunity for the student to work with families who have young children (birth to three) with disabilities or are at risk for disabilities. This field experience provides the opportunity to demonstrate competency in IFSP/IEP writing, selection and utilization of curriculum materials, instructional techniques, working with families and the ability to serve as a member of a multi-disciplinary team.

CD 865. CAPSTONE: ECU VALIDATION OF TEACHING EXPERIENCE B-K/B-8 3 HRS.

CD865 allows B-8 Candidates to meet the validation portfolio requirements for teaching children K-8. This course will have a dual purpose including the Validation Portfolio as well as completing Capstone requirements for completion of the program. The instructor of this course will monitor, provide guidance, and scoring of the B-8 Validation of Elementary Teaching Experience Portfolio. While the actual experience may be with only one grade level, the knowledge and application must span the age range. This will be completed in a manner that allows the Candidate to demonstrate skills and understandings gained in the Early Childhood Unified (ECU) core course requirements and apply this content to their professional philosophy and advocacy as an Early Childhood Educator. The Candidate's portfolio must provide evidence of knowledge and performance of teaching children with and without special needs. It is completed in consultation with the course instructor.

COUNSELOR EDUCATION

CE 646. PSYCHOPHARMACOLOGY 3 HRS.

This is an introductory course to psychopharmacology for non-medical, helping professionals at the undergraduate level. Emphasis is placed on the basic principles of pharmacology, the effects of drugs on the human central and peripheral nervous systems and particularly psychoactive drug effects on human cognitive, behavioral and affective domains. It will provide an overview of pharmacological classification systems and various interventions frequently used. Students will become familiar with pharmacological lexicon and the benefits/consequences and side effects of drug use and abuse. The implications for rehabilitation services and counseling will be examined.

CE 670. SUBSTANCE ABUSE IN COUNSELING 3 HRS.

This course provides a theoretical and practical orientation to a broad range of topics in substance abuse counseling, including: etiological theories; substances of abuse; assessment and diagnosis; treatment planning; ethical and legal issues; individual, group and family modalities; the continuum of care; and clinical considerations for special populations and diverse cultures. Special focus will be on predominant approaches including Motivational Interviewing and the Stages of Change model.

CE 694. ASSESSMENT & EMPLOYMENT OF PERSONS WITH DISABILITIES 3 HRS.

(Prerequisites, Upper level undergraduates must complete RE290, RE291 or concurrent.) An orientation to occupations, occupational assessment, assessment instruments, assessment techniques, and interpretation as utilized in various vocational rehabilitation settings. Consideration will also be given to various theoretical approaches to career choice and vocational planning, as well as the impact of theory in practice. Students will learn about factors that influence successful employment of people with disabilities in the current labor market, with an emphasis on meeting the needs of both the worker with a disability who is seeking employment and the employer who creates employment opportunities for workers. In addition, strategies for doing employer development, job development, and job placement in public and proprietary sectors are examined. Students will learn job seeking skills and how to design employment supports for workers with disabilities.

CE 702. BEHAVIOR ANALYSIS, ART, & PLAY WITH THE CHILD WITH AUTISM 3 HRS.

This course concentrates on the use of Applied Behavior Analysis, Creative Arts Therapies and Play Therapy with individuals with diagnoses on the Autism Spectrum. Additionally it will explore the history of these disciplines, their application to working with individuals with Autism and combinational use of these techniques. This course is a broad overview and will not qualify students as practitioners of any of the disciplines, however it will provide students with tools that can be used in their professional interaction with individuals with Autism.

CE 708. MULTICULTURAL COUNSELING 3 HRS.

This course is designed to meet the growing demand for culturally competent counseling and human service providers by providing graduate students with a foundation in multicultural counseling. The text provides interpretation, examination, and information on a broad range of cultures and potential views of therapy and treatment. Students are expected to comprehensively evaluate their own ethnic upbringing and belief systems, as well as a broad range of other cultural value systems to enhance their level of awareness, knowledge, and skills. Course material will be experienced through a variety of teaching and learning methods, including: reading, discussion, didactics, class presentation, and experiential activities. This course includes the use of imagery and metaphor within counseling and art therapy settings. Non-verbal symbol systems in arts-based interventions can prove to be extremely effective with diverse cultures and persons with disabilities.

CE 720 SPECIAL TOPICS IN COUNSELING 1-3 HRS.

The purpose of this course is to provide in-depth studies in the specific dimensions of addictions, mental health, rehabilitation counseling, and related disciplines. Topics to be covered will vary from semester to semester.

CE 731. MEDICAL ASPECTS OF DISABILITY 3 HRS.

Provides medical information about disabling conditions and introduces students to medical terminology. Includes knowledge of the etiology, prognosis, methods of treatment, effects of disabling conditions and implications for the rehabilitation professional. Relationships of other health related personnel to medical services and comprehensive rehabilitation are also emphasized.

CE 732. LIFESPAN DEVELOPMENT & DISABILITY 3 HRS.

This course focuses on neurobiological, psychological, cognitive, emotional, and social development throughout the lifespan, and the effects of disability upon individuals and their families at any developmental stage during the lifespan. Learning, personality, and adjustment theories will be addressed. The impact of developmental crises, onset of disability, substance use, psychopathology, and the environment as it relates to psychosocial development and typical human behavior will be explored.

CE 735. INTEGRATED TREATMENT OF CO-OCCURRING DISORDERS 3 HRS.

This course presents an integrated perspective on working with persons experiencing co-occurring disorders. It includes a whole-person approach to psychopharmacological interventions, provision of employment supports, awareness of cultural diversity in the treatment population, and recovery-oriented counseling approaches, such as psychoeducational groups.

CE 751. CASE MANAGEMENT IN ADDICTIONS & REHABILITATION 3 HRS.

This course integrates rehabilitation principles, knowledge, and skills using systematic and sequential planning and management. Topics will include: (1) the goals and models of case management in rehabilitation; (2) client/consumer interviewing and assessment; (3) planning for appropriate and effective intervention strategies, services, and benefits, included in a rehabilitation plan; (4) plan implementation, program monitoring, and evaluation; and (5) placement and closure. The course will address several key components including effective documentation, process and relationships, health care management, community resources and supports, service delivery, psychosocial interventions, conflict resolution and problem-solving processes, and management techniques. It will focus on facilitating the consumer's quality of life, maximum functioning in the environment of choice, and making desired vocational or employment decisions.

CE 770. RELATIONSHIP & FAMILY COUNSELING 3 HRS.

(Prerequisites: 9 graduate hours in Art Therapy Counseling, Clinical Counseling, Rehabilitation Counseling, School Counseling. Permission required.) This course serves as an introduction to marriage and family counseling. This course presents the basic theories, history, issues and procedures followed in marriage and family counseling. In addition, this course focuses on giving the student experience in completing relevant documentation and appraisal instruments pertinent to marriage and family counseling. The ethical, legal, and related professional issues as well as implications of socio-cultural and lifestyle diversity relevant to the field will be covered. Major approaches will be demonstrated and discussed.

CE 801. CRISIS COUNSELING AND TRAUMA-INFORMED CARE 3 HRS.

This course is designed to help counselors work with individuals, families, or groups who have experienced crisis and trauma from a catastrophic event. This course focuses on the understanding of crisis events, crisis responses, and crisis counseling for individuals responding to crises in their immediate aftermath, and sometimes months or years later. This course also examines how society responds to crises and the psychological aftermath of crises when catastrophic events are at an all-time high. Providing knowledge and skills that will lead to competent and effective crisis counseling by professional counselors in schools and mental health settings is the major focus of this course. Intervention strategies and models for developmental and situational crisis situations, as well as, disaster trauma will be discussed. Physiological and psychological reaction to stress, the continuum of crisis response, diagnosis and lethality, and specifics of various crises will be discussed. The mode of instruction for the course will be a mixture of lecture, online postings and discussion, and small group work. Additionally, videos and guest speakers will be used to supplement course material.

CE 802. FOUNDATIONS OF PROFESSIONAL COUNSELING 3 HRS.

This course serves as the basic introduction of students to the theoretical and historical framework within which a professional counselor functions. The student will develop an understanding of the roles and professional identity of professional counselors, as well as develop an understanding of relevant professional organizations, primarily the American Counseling Association. The student will be introduced to various counseling professions and to the interfacing of all mental health professions. The student will develop an understanding of professional credentialing and accreditation practices and standards, and the effects of public policy on these issues. Methods of instruction include lecture, guest speakers, small group work, video, and class discussion. Students are expected to participate in class activities.

CE 804. CLINICAL SUPERVISION 3 HRS.

(Prerequisites: CE810 and CE898 or SC871) This course offers advanced graduate students an introductory conceptual and experiential framework for the practice of clinical supervision. The basic tenets of clinical counseling supervision will be presented along with the roles, expectations, and functions of the supervisor/supervisee. Students will participate in both didactic and laboratory activities.

CE 810. COUNSELING & MICROSKILLS DEVELOPMENT 3 HRS.

This course involves an experiential study of the characteristics, skills, and techniques, essential for creating professional counseling relationships. The course will provide the opportunity for personal growth and the development of competency and judgment in utilizing basic interactional skills and techniques. This will be accomplished through a discussion, demonstration, role-play, dyadic practice, recording and critiquing mock counseling sessions, and learning from improvement feedback provided by peers and instructor, and may include clinical note taking. Additionally, student progress in developing professional dispositions will be evaluated through the formal assessment procedures of the department.

CE 811. ADVANCED COUNSELING APPLICATIONS 3 HRS.

(Prerequisites, CE810, CE830, CE833, CE893 or concurrent) Designed to build upon skills, techniques, and knowledge already obtained, the course covers a variety of topics relevant to clinical mental health counseling. Foundations, contextual dimensions, and practice of clinical mental health counseling are discussed. Issues addressed include wellness principles, advocacy, legislation and government policy, ethical considerations, case conceptualization, and applied techniques in group and individual counseling. The course places heavy emphasis on experiential activities such as practicing counseling skills, small-group work, and student led discussions.

CE 820. CAREER COUNSELING AND DEVELOPMENT 3 HRS.

(Prerequisites, CE810 or concurrent.) An introduction to career counseling with various types of clientele. The theoretical emphasis is on the development aspects of career decision making from childhood through adulthood. Attention is given to various information sources and techniques for counselors to use in assisting clients with appropriate approaches to decision making.

CE 825. COUNSELING THEORIES 3 HRS.

(Prerequisites, CE 810 or concurrent.) This course provides students with an overview of foundational counseling theories: psychodynamic, phenomenological, cognitive-behavioral, and post-modern approaches. Students reflect on their values and beliefs to identify the counseling theories that best fit their worldviews. The application of theory to client concerns in education, private practice, public rehabilitation, and community settings is introduced and modeled. Videos demonstrating how theory and techniques can be used are presented weekly.

CE 830. GROUP PROCESSES IN COUNSELING 3 HRS.
(Prerequisites: 9 graduate hours in Art Therapy Counseling, Clinical Counseling, Rehabilitation Counseling, School Counseling or permission required.) This course provides an understanding of group dynamics, stages of group development, group leadership styles, group counseling methods and skills, and presents group process theories and methods applicable in all group counseling settings. Specifically, this course is designed to provide experiential techniques and intervention strategies essential for counselors treating mental disorders in therapeutic groups in mental health settings. Part of this course provides students the opportunity to participate in brief counseling groups facilitated by the professor during which techniques and interventions reflecting various group counseling theorists and group processes are implemented.

CE 833. DIAGNOSIS AND TREATMENT OF MENTAL DISORDERS 3 HRS.
This course provides an overview of the diagnostic criteria utilized in the diagnosis of mental illness. Assessment, psychopharmacology, treatment and rehabilitation modalities will be explored. Using lecture and case studies, students will be provided with experience in diagnosing mental disorders and developing appropriate treatment/rehabilitation plans.

CE 835. THEORY AND PRACTICE OF APPRAISAL IN COUNSELING 3 HRS.
This course focuses on the theory, standardization, and application of various assessment instruments necessary for conducting a comprehensive Mental Health Evaluation and doing mental health counseling. These assessment instruments include projective and standardized personality tests, aptitude, intelligence, achievement, and interest inventories. Administering, analyzing, and interpreting the findings of assessment instruments and the writing of comprehensive mental health evaluations is the major emphasis of this course.

CE 884. THESIS IN CLINICAL COUNSELING 3 HRS.
(Prerequisite, permission required). A student completes an important research study appropriate to Clinical Counseling.

CE 893. PROFESSIONAL, ETHICAL & LEGAL ISSUES IN COUNSELING 3 HRS.
This course will examine foundations of counseling and the development of professional attitude and identity in relation to codes of ethics, professional behavior, ethical issues, credentialing, practice and research, clinical supervision and legal and liability concerns facing practitioners working in community, agency, school, and art therapy settings. Comparison of ethical codes and similar issues will be made within the counseling disciplines and art therapy. Particular emphases are placed on issues of confidentiality, child abuse, elder abuse, and ethical dilemmas associated with dual-role relationships, as well as the use of creative arts within art therapy and counseling settings. Other topics include issues associated with psychotherapy, multiculturalism, research, advertising, and challenges related to specific work settings. Decision-making models used by art therapists and counselors for addressing ethical issues are explored through experiential exercises, written assignments, and presentations.

CE 898. SUPERVISED PRACTICUM IN COUNSELING 3 HRS.
(Prerequisites, CE810, CE825, CE833, CE893, and/or concurrently, CE830. Permission required.) This supervised practicum will assist students to improve their counseling skills through counseling sessions with clients. The course provides opportunities for students to obtain supervised practice in the area of group counseling, as well as experience in preparing case notes, consulting with other professionals, and critiquing audio and video tapes of counseling sessions. Students receive one hour of individual and one and one-half hours of group

supervision each week. Liability insurance coverage is required. Methods of instruction include tutorial forms of instruction consisting of discussion of students' video/audio tapes of clients and case analysis of diagnosis and treatment of students' clients. Instructor and/or students will present materials on topics pertinent to client issues, including diversity, ethical and legal considerations.

CE 899. COUNSELING INTERNSHIP 1-6 HRS.
(Prerequisite, Completion of CE898 with a grade of "B" or better and instructor permission.) After the successful completion of CE898 (Supervised Practicum in Counseling), students will complete 600 clock hours of supervised counseling experience earning 6 credit hours of academic credit. Each academic credit requires 100 hours of client contact (40 direct/60 indirect). Typically, students enroll in 1-2 credits per academic semester while completing the remainder of their program of study.

CHEMISTRY

CH 105. PREPARATION FOR CHEMISTRY 3 HRS.
(Prerequisite or co-requisite: MA 110 College Algebra) Designed for students without a strong background in chemistry and math, the course demonstrates active learning strategies, reviews scientific calculations, develops techniques to solve real-world problems, and covers the fundamental models of atoms, molecules, reactions, and solutions. A grade of C or better is required to take CH 120 General Chemistry or CH 123 Chemistry I.

CH 110. CHEMISTRY FOR TODAY'S WORLD 4 HRS.
(Corequisite, CH 111.) A chemical science course for the nonscientist. The necessary scientific background is established in order to consider aspects of the energy crisis, nuclear chemistry, chemical consumer products, and health-related chemical topics. (This course is not a substitute for CH 123.)

CH 111. CHEMISTRY FOR TODAY'S WORLD LABORATORY 1 HR.
(Corequisite, CH 110.) The laboratory emphasizes that chemistry is a "real-world" experience. Each laboratory is designed to provide understanding of some aspect of the chemical sciences.

CH 120. GENERAL CHEMISTRY 3 HRS.
(Corequisite, CH121.) Introduction to some basic concepts and principles of chemistry and their theoretical, practical, and mathematical interrelationships. Three lecture periods a week. (A one semester course which is designed for health-related professionals, and is not designed to substitute for CH 123.)

CH 121. GENERAL CHEMISTRY LAB 2 HRS.
(Corequisite, CH 120.) Laboratory to accompany CH 120.

CH 122. GENERAL CHEMISTRY RECITATION 1 HR.
Recitation class to accompany CH 120 and CH 121.

CH 123. CHEMISTRY I 3 HRS.
(Prerequisite, MA110 or equivalent or higher. Corequisite, CH 124.) Fundamental principles and concepts of chemistry, including atomic structure and chemical bonding, chemical stoichiometry, reaction types, thermochemistry, phases of matter and solutions.

CH 124. CHEMISTRY I LAB 1-2 HRS.
(Corequisite, CH 123.) Laboratory to accompany CH 123.

CH 126. CHEMISTRY II † **3 HRS.**
(Prerequisite, CH 123 or equivalent. Corequisite, CH 127.) A continuation of Chemistry I with emphasis on equilibria and properties of elements and compounds. Three lecture periods a week.

CH 127. CHEMISTRY II LAB † **1-2 HRS.**
(Corequisite, CH 126.) Laboratory to accompany CH 126.

CH 310. ENGINEERING MATERIALS **2 HRS.**
(Prerequisites, CH 123 and PH 190 or concurrent enrollment.) Engineering requirements of materials; arrangements of atoms in materials; metallic and ceramic phases and their properties; polymers; multiphase equilibrium and non-equilibrium relationships; modification of properties through changes in microstructure; thermal behavior in service; corrosion; effect of radiation on materials. Two lectures per week.

CH 370. GENERAL ORGANIC CHEMISTRY **3 HRS.**
(Prerequisite, CH 126. Corequisite, CH 371.) Organic chemistry covering all important functional groups; also sugars and carbohydrates, fats and oils, amino acids and proteins, polymers, drugs. Nomenclature, molecular structures and common chemical reactions are stressed. Three lecture periods per week.

CH 371. GENERAL ORGANIC CHEMISTRY LAB **2 HRS.**
(Corequisite, CH 370.) A specially developed set of classical experiments with some non-classical experiments involving polymers, dyes, chromatography, sugars, amino acids and proteins, enzymes, fats and oils.

CH 376. QUANTITATIVE ANALYSIS **3 HRS.**
(Prerequisites, CH 126 and CH 127. Corequisite, CH 377.) The course is laboratory oriented. Development of good analytical technique is stressed. Includes the determination of quantitative data by volumetric, gravimetric and simple instrumental techniques. Areas discussed are acid-base reaction, oxidation-reduction, complex formation, solubility equilibrium and spectroscopy.

CH 377. QUANTITATIVE ANALYSIS LAB **2 HRS.**
(Corequisite, CH 376.) Laboratory to accompany CH 376.

CH 479. UNDERGRADUATE RESEARCH **1-4 HRS.**
(Prerequisite, consent of instructor.) For students wanting to conduct investigative study or do creative work of the type not covered by other courses. The student works independently under the supervision of a faculty member on a project in an area of chemistry in which they have an interest. Utilized as capstone course for chemistry majors.

CH 480. CAPSTONE REPORT AND SEMINAR **1 HR.**
Permission of instructor is required to enroll. CH480 is the final capstone research semester course for the chemistry and biochemistry/molecular biology majors. Students complete the final draft of the written report and present an oral report of their capstone research.

CH 500. TOPICS IN CHEMISTRY (*) **1-5 HRS.**
Permission of instructor required to enroll. Selected topics in chemistry for undergraduate and graduate students. The topic(s) to be covered will be announced in the enrollment schedule. Lecture, laboratory, and/or discussion will be utilized depending on the topic(s). Topic(s) will be chosen by the department. *The blank will be filled with an appropriate short description on the student's transcript to indicate the subject area studied.

CH 506. ENVIRONMENTAL CHEMISTRY **3-4 HRS.**
(Prerequisites, CH 126 and CH 127.) Sources, transport, reactions and effects of chemical species in the hydrosphere, the lithosphere and the atmosphere.

CH 508. INDUSTRIAL CHEMISTRY **1-3 HRS.**
(Prerequisite, CH 574.) Intended to form a bridge between the academic education of chemists and the chemical industry. Field trips are an integral part of this course.

CH 525. DESCRIPTIVE INORGANIC CHEMISTRY **3 HRS.**
(Prerequisites, CH 126 and CH 127 or equivalent.) The properties and reactions (descriptive chemistry) of inorganic elements and their compounds and the principles, trends, and patterns of inorganic chemistry are studied. These trends are useful for predicting and explaining how and why reactions occur involving inorganic species in areas such as biochemistry, and geochemistry.

CH 560. FUNDAMENTALS OF BIOCHEMISTRY **3 HRS.**
(Prerequisites, CH370 or CH574) Provides a survey of the common biological molecules, their metabolism, and their roles in life-sustaining processes. Topics include special features of the aqueous environment, structures of basic biological macromolecules, protein and nucleic acid biosynthesis, protein structure and function, enzyme mechanisms and kinetics, energetics, and metabolism of carbohydrates, lipids, and amino acids. Three lecture periods per week. (Concurrent enrollment in CH661 is strongly recommended.)

CH 561. FUNDAMENTALS OF BIOCHEMISTRY LABORATORY **2 HRS.**
(Taken concurrently with CH560.) A laboratory course that serves as an introduction to several of the major experimental techniques and methodologies used in the study of biochemical systems. Topics may include buffers, protein determination, chromatography, enzyme kinetics, protein-ligand binding interactions, electrophoresis, DNA analysis, and use of biomolecular databases. One four-hour laboratory and a one-hour recitation per week.

CH 572. ORGANIC CHEMISTRY I **3 HRS.**
(Prerequisite, CH 126. Corequisite, CH 573.) Chemistry of the more important classes of carbon compounds including both aliphatic and aromatic series, stereochemistry, IR and NMR spectroscopy. Three lecture periods per week.

CH 573. ORGANIC CHEMISTRY I LAB **2 HRS.**
(Corequisite, CH572) Laboratory to accompany CH 572.

CH 574. ORGANIC CHEMISTRY II **3 HRS.**
(Prerequisite, CH 572. Corequisite, CH 575.) A continuation of CH 572, Organic Chemistry I. Three lecture periods a week.

CH 575. ORGANIC CHEMISTRY II LAB **1-2 HRS.**
(Corequisite, CH 574.) Laboratory to accompany CH 574.

CH 578. WATER ANALYSIS **3 HRS.**
(Prerequisites, CH 376 and CH 377.) Lecture and laboratory covering analysis of water for inorganic substituents including pH, Oxygen, metal ions, and nutrients. Methods include volumetric, spectrophotometric, and electrochemical analysis. Interpretation of laboratory results is included.

CH 620. ELEMENTS OF PHYSICAL CHEMISTRY **3 HRS.**
(Prerequisites, MA 165, PH 140, and PH 343.) A one-semester course covering the areas of physical chemistry. Some of the areas include thermodynamics, chemical and ionic equilibrium, kinetics, solutions and phase equilibrium.

CH 627. INTERMEDIATE CHEMISTRY **3 HRS.**
(Prerequisites, CH 126 or consent of instructor.) Topics include inorganic, organic, analytical and physical chemistry. The course is intended to serve as a review of chemistry for students who require additional study of basic concepts before continuing into advanced courses. Three lecture periods per week.

CH 660. BIOCHEMISTRY I 3 HRS.
(Prerequisite, CH574 or CH370) The first half of a year-long biochemistry sequence that provides an in-depth look at the chemistry that occurs in living organisms. The course content will focus on the structure-function relationships as they pertain to the major classes of biomolecules. Central to this theme will be a detailed examination of protein function, enzyme kinetics, bioinformatics, and the molecular basis of nucleotide and protein synthesis. The basic structure and function of nucleic acids, lipids, and carbohydrates will also be examined. Concurrent enrollment in the lab is required for B.S. Biochemistry and Molecular Biology and the Biochemistry concentration within the Chemistry degrees.

CH 661. LABORATORY METHODS IN BIOCHEMISTRY 2 HRS.
The laboratory course to complement the Biochemistry lecture courses (CH560 or CH660). An emphasis will be placed on gaining experience with the primary methods of biochemical analysis in the laboratory. Students will learn both theory and practice of working with proteins, nucleotides, lipids and carbohydrates.

CH 662. BIOCHEMISTRY II 3 HRS.
(Prerequisite, CH 660.) The second half of a year-long biochemistry sequence that provides an in-depth look at the chemistry that occurs in living organisms. Topics covered include anabolic and catabolic pathways of metabolism, including photosynthesis, as well as the organization and utilization of genetic information. Students should be aware that CH560 is not considered to be an appropriate prerequisite for this course.

CH 676. ANALYTICAL CHEMISTRY 4 HRS.
(Prerequisite, CH127 or equivalent.) Three hours of lecture and 6 hours of laboratory per week. This is a lecture and laboratory course designed to teach technique, theory, and the interpretation of the quantitative results. A variety of techniques will be covered, including volumetric, gravimetric, spectroscopic, and electro analytic methods.

CH 700. ADVANCED TOPICS IN CHEMISTRY (*) 1-5 HRS.
Permission of instructor required to enroll. Selected advanced topics in chemistry for graduate students. The topic(s) to be considered will be announced in the enrollment schedule. Lecture, laboratory, and/or discussion will be utilized depending on the topic(s). Topics will be chosen by the department. *The parenthesis will be filled with an appropriate short description on the student's transcript to indicate the subject area studied. May be repeated for credit.

CH 708. DRUG DESIGN 3 HRS.
(Prerequisites: CH 370 or 572 and MC 540, CH 560 or CH 660.) A one-semester course covering the pharmaceutical sciences. Exploring the intersection of medicinal chemistry, pharmacodynamics and pharmacokinetics, the course will examine the process of drug design, drug testing and clinical studies. The focus is the design of drugs including the role of computational resources and biochemical screening. Ethical and drug case studies are included.

CH 720. PHYSICAL CHEMISTRY I 3 HRS.
(Prerequisites, CH 376, MA 262, and PH 393.) Topics covered include thermodynamics, one component systems, phase equilibria, colligative properties, and chemical statistics. Three lecture periods a week.

CH 721. PHYSICAL CHEMISTRY LABORATORY 2 HRS.
(Prerequisites, CH 376, CH 720, MA 262, and PH 393.) Physical Chemistry Laboratory is designed to reinforce an understanding of general physical chemistry principles in the area of error analysis, behavior of gases, thermodynamics, phase behavior, electrochemistry, kinetics, and spectroscopy.

CH 722. PHYSICAL CHEMISTRY II 3 HRS.
(Prerequisite, CH 720. Concurrent with CH 721.) Topics covered include kinetics, electromotive force, quantum theory, spectra and molecular structure. Three lecture periods a week.

CH 723. ADVANCED PHYSICAL CHEMISTRY LABORATORY 2 HRS.
(Prerequisites, CH 376, CH 720, CH 721, CH 722, MA 262, and PH 393.) Advanced Physical Chemistry Laboratory is designed to familiarize students with advanced chemistry laboratory techniques through research projects and computational experiments.

CH 724. TOPICS IN PHYSICAL CHEMISTRY: (*) 3 HRS.
(Prerequisite, CH 722.) A topic in physical chemistry will be chosen from among those topics of interest to students and faculty. Examples include quantum chemistry, statistical mechanics, thermodynamics, surface chemistry, and estimation of physical properties. *Topic to be considered is announced in the enrollment schedule. May be repeated for credit.

CH 725. ADVANCED INORGANIC CHEMISTRY 3 HRS.
(Prerequisites, CH 525 and CH 720.) A systematic study of the elements and their compounds emphasizing the relationships between the properties of substances and their atomic and molecular structures and the positions of the elements in the periodic table. Three lecture periods a week.

CH 726. ADVANCED INORGANIC CHEMISTRY LABORATORY 1-3 HRS.
(Prerequisite or corequisite, CH 725.) Synthesis and characterization of typical inorganic compounds employing methods and techniques which are unique to inorganic chemistry.

CH 728. CHEMICAL LITERATURE 1 or 2 HRS.
(Prerequisite, consent of instructor.) Use of chemical literature. A study of assorted chemical and related publications, reference books, and other sources of information. One-hour class period and one 2-hour library assignment per week.

CH 729. RESEARCH PROBLEM IN CHEMISTRY 1-3 HRS.
(Prerequisite, graduate standing and consent of instructor.) Individual studies by advanced students of problems of special interest in chemistry. Training in methods of research.

CH 730. SEMINAR IN CHEMISTRY 0-2 HRS.
(Prerequisite, consent of instructor.) Seminars are given by students, outstanding chemists from other institutions, and faculty. May be repeated for credit.

CH 745. NUCLEAR TECHNIQUES 4 HRS.
(Prerequisites: PH393 or PH343 and CH126.) Theory and applications of radioactive tracer techniques in chemistry.

CH 760. NUCLEIC ACIDS BIOCHEMISTRY 3 HRS.
(Prerequisite, CH 560 or CH 662.) A comprehensive coverage of the chemistry and biochemistry of nucleic acids. Topics include DNA and RNA structure, DNA replication and fidelity, DNA damage and repair, protein-DNA and drug-DNA interactions, biochemical aspects of modern molecular biology, and other current areas of interest from the literature. Three hours of lecture per week.

CH 765. ADVANCED BIOCHEMISTRY LABORATORY 2 HRS.
(Prerequisites, CH661) A project-based course designed to allow students to learn and practice the major laboratory methods of inquiry used in biochemistry-related areas of research. Techniques covered may include library screening, gene cloning, PCR, protein expression and purification, bioinformatics, and protein characterization. An emphasis is placed on using these techniques and skills in an integrated way to address a semester-long project.

CH 772. TOPICS IN ORGANIC CHEMISTRY: (*) 1-3 HRS.
(Prerequisites, CH 574 and CH 720.) Selected topics in organic chemistry. *The topic to be covered is announced in the enrollment schedule. Some examples of areas are: industrial organic chemistry, reaction mechanisms, organic synthesis and organic polymers. May be repeated for credit.

CH 773. QUALITATIVE ORGANIC ANALYSIS 3 HRS.
(Prerequisite, CH 574.) Identification of unknown organic compounds using both instrumental and wet chemical methods. The analytical correlation of structure with instrumental and chemical information is stressed. Two lecture periods a week with laboratory by arrangement.

CH 776. TOPICS IN BIOCHEMISTRY: (*) 1-3 HRS.
(Prerequisite, CH 560.) Advanced studies of selected aspects of biochemistry for the student with previous background in the area. The area of study will be selected prior to the first class meeting. *The topic to be considered will be announced in the class schedule. May be repeated for credit.

CH 777. INSTRUMENTAL METHODS OF ANALYSIS 5 HRS.
(Prerequisite, CH 376 or CH 676) The use of instruments to obtain qualitative, quantitative, and structural data is discussed. Basic theory, fundamental principles, and limitations underlying the techniques are included. Laboratory experiments acquaint the student with the operation of the instruments and the interpretation of data. Techniques drawn from the areas of atomic and molecular analysis include mass spectrometry, ultraviolet, visible, infrared, Raman, fluorescence, phosphorescence, atomic absorption, and atomic emission spectroscopy, and nuclear magnetic resonance.

CH 778. TOPICS IN ANALYTICAL CHEMISTRY: (*) 1-3 HRS.
(Prerequisite, CH 376.) Selected topics in analytical chemistry. *The topic to be covered is announced in the enrollment schedule. Some examples of areas are applied analytical methods, absorption spectroscopy, flame emission and atomic absorption spectroscopy, and electrochemical methods. May be repeated for credit.

CH 779. ADVANCED INSTRUMENTAL METHODS OF ANALYSIS 5 HRS.
(Prerequisite, CH777.) The course concentrates on the use of instruments to obtain qualitative, quantitative, and structural data and the application of these techniques to forensic evidence. Basic theory, fundamental principles, and limitations underlying the techniques are included. Techniques drawn from the areas of chromatography methods, spectroscopy and mass spectrometry. This course covers use of these techniques to analyze biological evidence (toxicology). Documentation, reporting, and testifying about analyses conducted will be emphasized.

CH 801. TRENDS IN HIGH SCHOOL CHEMISTRY CURRICULA 3 HRS.
(Prerequisites, graduate standing.) Designed for in-service physical science teachers. In depth investigation by class participants of current chemical education curricula to determine trends. Diagnostic study of these trends by the class to determine their relative significance, cost of implementation, and methods of integration into an existent or a new course. Laboratory investigations will be used as advisable.

CH 802. MODERN DEVELOPMENTS IN CHEMISTRY 3 HRS.
(Prerequisites, graduate standing.) Designed for in-service physical science teachers. A study of recent advances in the fields of analytical, inorganic, physical, organic and biochemistry.

CH 826. TOPICS IN INORGANIC CHEMISTRY: (*) 1-3 HRS.
(Prerequisite, CH 725.) A treatment of a specific area of inorganic chemistry to be chosen from among the following topics: physical

methods, coordination chemistry, stereochemistry and symmetry of inorganic compounds, kinetics and mechanisms of inorganic reactions, aspects of metal chemistry and nonmetal chemistry. *The topic to be covered will be announced in the enrollment schedule. May be repeated for credit.

CH 829. GRADUATE RESEARCH 1-5 HRS.
(Prerequisites, graduate standing.) Investigative research on a problem in an area of chemistry selected by the student after consultation with and under the supervision of a chemistry faculty member. Permission of instructor required to enroll.

CH 871. TOPICS IN ADVANCED PHYSICAL CHEMISTRY 1-3 HRS.
(Prerequisites, CH 722 and consent of instructor.) Each semester a topic in physical chemistry will be chosen and pursued at an advanced level of study. Some of the topics covered will be the same as those covered in CH 724, but at a different level of presentation. May be repeated for credit.

CH 875. THESIS M.S. 1-5 HRS.
(Prerequisite, consent of instructor.) Required for the 30-hour degree, Master of Science with a major in chemistry. Research in an approved area of chemistry and the preparation of a thesis.

COMPUTER SCIENCE

CS 115. ELEMENTS OF COMPUTER SCIENCE 3 HRS.
(Prerequisites, 1 year of high school algebra, MA 098, or permission.) This course covers the computer and computer applications at the introductory level. Topics include the history of computing, hardware, components, software, problem solving, data types and structures, acquisition and selection of equipment and software, social and economic implications, and careers in computing. The course is designed for students who will utilize the computer in other disciplines and students desiring general information about computers and their applications.

CS 201. CURRENT TOPICS IN COMPUTER SCIENCE 1-3 HRS.
This course will provide a study of selected topics in computer science not currently found in other computer science courses. It may be repeated with different topics for a maximum of six credits. See Schedule of Classes for specific topics.

CS 220. INTRODUCTION TO COMPUTER SCIENCE 3 HRS.
(Prerequisite, high school algebra.) An overview of the discipline of Computer Science. Topics to be covered will consist of introductions to the "traditional" areas of computer science such as data structures, assemblers and compilers, theory of computing, artificial intelligence, theory of data bases, and programming languages. This is intended as a first course for computer science majors.

CS 234. SOFTWARE IMPLEMENTATION AND UTILIZATION 3 HRS.
(Prerequisites, MA 130 and CS 220.) This course will introduce the secondary education student to use of software technologies and provide a framework for utilizing software products in an educational setting. The course will provide its participants with strategies for employing these technologies to assist the secondary classroom teacher and learning community.

CS 250. INTRODUCTION TO COMPUTER PROGRAMMING 3 HRS.
(Prerequisite, MA 110.) This course is designed to introduce students to the discipline of computer science. Major emphasis will be placed on problem solving by decomposition top-down design of algorithms, elementary control and record structures, array, string, and file processing, recursion and pointer variables.

CS 260. PROGRAMMING AND PROBLEM SOLVING 3 HRS.
(Prerequisite, MA 110 or CS 220.) This course is designed to introduce students to the discipline of computer science. Major emphasis is placed on problem solving and program development skills. Students write computer programs in a high-level language. Major topics include program design, control structures, subprograms, arrays, pointers, and class construction.

CS 301. FLUENCY WITH INFORMATION TECHNOLOGY 3 HRS.
An overview of Information Technology and its relation to society. Through a hands-on approach, students will learn fundamentals of computer architecture, operating systems, computer communications, an overview and limitation of programming languages, and applications software. Students will have the opportunity to reflect on the integration of computer technology and society (past/present/future.)

CS 315. JAVA PROGRAMMING 3 HRS.
(Prerequisites, CS 260 or instructor permission.) Java is an object-oriented language that has become an important language for use on the Internet. This course will give an introduction to programming in Java.

CS 340. ALGORITHMS AND DATA STRUCTURES I 3 HRS.
(Prerequisites, CS 260.) Basic concepts of data structures and algorithms. Design and analysis of algorithms and analysis of the data structures which are appropriate to the implementation of particular algorithms. The effect of data structures and algorithms on program development, efficiency and maintenance will be covered. Applications of data structures such as lists, strings, arrays, trees, stacks, queues, and graphs in file processing and bulk data storage will be covered.

CS 341. PRINCIPLES OF COMPUTER ORGANIZATION 3 HRS.
(Prerequisite: CS 340 or equivalent.) This course introduces the basic organization and operation of computers. Topics include representation of information, hardware arithmetic, memory structure, registers, addressing techniques, input/output, control unit, instruction sets, interrupts and multitasking. Hands on experience will include assembly language programming.

CS 355. UNIX 3 HRS.
(Prerequisite, CS 220.) This course provides an overview of the commands, utilities and supporting architecture used in the 1 operating system. This course provides the student with skills needed to operate UNIX-based computers on the Internet and perform file/system operations on graphics workstations and servers. Topics include installation, common utilities, making files, creating and manipulating databases, servers, editors, and the C, Bourne, and Korn shells.

CS 360. PROGRAMMING AND PROBLEM SOLVING II 3 HRS.
(Prerequisite: CS 260 or equivalent.) The second course in problem solving and programming provides coverage of more advanced topics with high-level language. Major topics include: multi-dimensional arrays, inheritance and polymorphism, exception handling, recursion, and Standard Template Library. Elementary data structures(linked lists, stacks, and queues) are introduced to solve application problems.

CS 386. INTERNSHIP: COMPUTER SCIENCE 1-3 HRS.
(Prerequisite, 20 hours in computer science courses.) An academic course to provide students with an opportunity to gain field experience in computer science through professional experience. The academic experience is developed jointly by the student and the faculty advisor. No more than 3 hours in CS 386 may be counted toward the computer science major.

CS 410. SEMINAR IN COMPUTER SCIENCE 1-4 HRS.
(Prerequisite, permission of mathematics department.) A seminar involving various topics in computer science.

CS 433. OPERATING SYSTEMS 3 HRS.
(Prerequisite: CS 341 and MA 240.) This course introduces the basic concepts and core principles used to develop computer operating systems. Topics include introduction and history of operating systems, concepts of processes, processor management, storage management, deadlock, device management, file management, UNIX/Linux operating system as a case study.

CS 444. DATABASE ORGANIZATION 3 HRS.
(Prerequisite, CS 260 or instructor permission.) Investigations of strategies for deploying database application. Overview of database architectures, including the Relational, Hierarchical, Network and Object Models. Database interfaces, including the SQL query language. Issues such as security, integrity, and query optimization. Database design using the Entity-Relationship Model. Develop familiarity with modeling, design and implementation techniques used in the construction of database applications.

CS 472. TEACHING COMPUTER SCIENCE 2 HRS.
(Prerequisites, MA 130 and CS 115.) A methods course to aid the prospective computer science teacher in high school and junior high school with aspects of hardware and software selection and evaluation; use of the computer in other disciplines and in the home; organization of computer topics for presentation; design of computer projects; careers in the computer science field; computer architecture; practicum in the teaching of computer science.

CS 480. INDEPENDENT STUDY COMPUTER SCIENCE 1-4 HRS.
(Prerequisite, permission of mathematics department. Open only to qualified juniors and seniors.) Topics of special interest in some area of computer science study not included in regularly listed courses.

CS 501. ADVANCED COMPUTER PROGRAMMING 1-3 HRS.
(Prerequisite, CS 260 or consent of instructor.) Elementary and advanced programming techniques for a particular language will be studied along with applications of the language. The student will have many opportunities to learn these skills through frequent programming assignments. Course may be repeated for credit.

CS 520. MICROCOMPUTER PROJECTS 3 HRS.
(Prerequisites, MA 161 or MA 165 and MA 130 or instructor's permission.) This course is designed to introduce students to additional features and capabilities of microcomputers, such as cassette tape or floppy disk storage and retrieval, used to solve scientifically oriented problems. With minimal instruction, students are required to complete advanced projects, primarily using the programming language BASIC, on each of the available micro-computers.

CS 523. ARTIFICIAL INTELLIGENCE 3 HRS.
(Prerequisites, CS 501 and CS 340, or equivalent course work.) This course includes problem solving methods, game playing, and knowledge representation.

CS 545. DATABASE THEORY 3 HRS.

(Prerequisites, MA 240, CS 340.) This course will provide a rigorous treatment of database theory and the implementation of database structures. Topics will include: data modeling, relational algebra, relational calculus, dependencies and normalization theory, and external implementations of data structures such as B-Trees and hash tables.

CS 552. COMPUTER SCIENCE CAPSTONE 3 HRS.

(Prerequisite, CS 501.) This course provides students the opportunity to integrate the knowledge that they have gained from previous courses to complete a comprehensive software project. The project emphasizes team effort and involves the use of multiple programming languages. At the end of the semester, students must show their work in the form of written reports and oral presentations

CS 554. PRINCIPLES OF COMPUTER ARCHITECTURE 3 HRS.

(Prerequisites, CS 340 and MA 542.) A lecture-laboratory course where students will learn the hierarchical structure of computer architecture. A hands on experience will be included.

CS 561. SYSTEMS PROGRAMMING 3 HRS.

(Prerequisite, CS 340.) Organization of a computer system. Internal representation of data. Memory management, input/output and interrupts. Utilizing system software in order to program the system via assembling, linking, and debugging.

CS 563. COMPUTER ATTACK ESSENTIALS 3 HRS.

When talking about Network Security, we have to acknowledge that all systems have vulnerable points. This course examines the fundamental and historical perspective of hacking methodology and psyche. The hacking topics are explored in order to examine the current systems associated with these vulnerable points. This course researches and studies the techniques and tools to detect and evaluate these vulnerable points of known exploits in network and operating systems. Types of hackers include those that snoop around networks, vandalize websites or even steal proprietary information by the use of well-known schemes, such as viruses, worms, Trojan horses, denial-of-service attacks and buffer overflows.

CS 564. NETWORK DEFENSE AND COUNTERMEASURES 3 HRS.

Network Defense and Countermeasures focuses on students' understanding of the architecture for network defense. Students will work with layered network defense structures and implement firewalls on various platforms. Students will also gain a working knowledge of Virtual Private Networks and Intrusion Detection Systems, perform packet and signature analysis, identify different methods of risk analysis, and create a security policy.

CS 565. COMPUTER FORENSICS 3 HRS.

(Prerequisite: CS 557 or equivalent.) This course examines procedures and tools for identifications, preservation, and extraction of electronic evidence, auditing and investigation of network and host system intrusions, analysis and documentation of information gathered, and preparation of expert testimonial evidence.

CS 569. DATA SECURITY PRACTICUM 3 HRS.

This course takes a practical look at using good security practices in software. We take a broad look at the issues of correctly implementing security strategies, including why some strategies fail. Students will apply concepts from software engineering, cryptography, and security theory. Students will study state-of-the-art implementation techniques and learn appropriate conditions under which these techniques apply (or not). Students will implement a non-trivial project that will stress correct secure programming techniques.

CS 570. THEORY OF COMPUTATION 3 HRS.

(Prerequisite, MA 542.) This course covers the basic theoretical principles of computer science embodied in finite automata, context free grammars, computability, and computational complexity.

CS 575. COMPILER DESIGN 3 HRS.

(Prerequisites, CS 433.) (Prerequisite: CS 433.) This course is designed to explore the theory of compiler construction and introduce techniques and tools for building a compiler. Specifically, an emphasis is placed on a programming project that applies the techniques and tools to implement a compiler for a language.

CS 576. FILE STRUCTURES 3 HRS.

(Prerequisite: CS 340.) This course covers file concepts, basic file operations, basic physical characteristics of peripheral storage devices, file organization and processing methods for sequential, hashing and direct, indexed, list, and tree structured file organizations. Sorting and searching techniques. Performance analysis and elements of advanced data base systems are also provided.

CS 580. INTRODUCTION TO COMPUTER NETWORKS 3 HRS.

(Prerequisite, CS 340, MA 161.) An introductory examination of the Open System Interconnection Reference Model (OSI). Special emphasis will be given to real world implementations of the various sub-levels of the OSI model.

CS 584. RAPID APPLICATION DEVELOPMENT 3 HRS.

This course introduces the student to Rapid Application Development Languages as well as the theory and practice of using these programs to access the internet.

CS 620. COMPUTER NETWORKS AND INTERNETS 3 HRS.

(Prerequisite, MA 110.) This course answers the basic question "How do computer networks and internets operate?" in the broadest sense. The course provides a comprehensive, self-contained tour through all of networking from the lowest levels of data transmission and wiring to the highest levels of application software.

CS 625. HTML PROGRAMMING 3 HRS.

This course provides the student with the information necessary to create HTML documents for the World Wide Web. The course will cover syntax and design issues as well as techniques and technologies which promote information transmission across the Internet.

CS 810. SEMINAR IN COMPUTER SCIENCE 0-3 HRS.

Directed reading and research in Computer Science.

DRIVER EDUCATION**DE 703. GENERAL SAFETY EDUCATION 3 HRS.**

A study of the fundamentals of safe living including the philosophy of safe human behavior, accident prevention, fire prevention and protection with special emphasis for home and family, public safety, traffic safety and school safety.

DE 713. DRIVER EDUCATION I 3 HRS.

A basic course for the preparation of teachers of driver training for the public schools. A study of course content, material, special projects, teaching methods, psycho-physical traits, traffic rules, and principles of road testing. Selected films on driving practices and automobile construction shown at appropriate intervals. Student must possess a valid drivers license prior to start date.

DE 723. DRIVER EDUCATION II 3 HRS.
(Prerequisites, DE 703 and DE 713.) Practice of classroom instruction, simulator instruction, behind-the-wheel training, and road skill testing with beginning drivers. Problems of organization and administration of driver education on the secondary level; emphasis on scheduling, public relations, and techniques for development of the skills, understanding and attitudes required for safe driving. Student must possess a valid drivers license and have completed DE703 and DE713 prior to start date.

DE 740. RESEARCH PROBLEMS IN DRIVER EDUCATION 1-3 HRS.
Investigation of special problems not covered by regular courses.

EDUCATIONAL ADMINISTRATION

EA 743. SPECIAL STUDIES IN EDUCATIONAL ADMINISTRATION 1-3 HRS.
(Prerequisite, course scheduled by arrangement and intended for use in advanced stages of a program. Consent of instructor required.) Course permits individualized approach to study of current educational administrative problems of local concern. Process includes written identification of problem, approach and findings of the study concluded by final oral examination.

EA 750. TECHNOLOGICAL APPLICATIONS IN SCHOOL LEADERSHIP 1 HR.
This course will focus on making appropriate leadership decisions regarding the use and applications of technology in schools. Included in this course are several topics such as hardware and software requirements and the elements needed to successfully integrate technology to enhance both teaching and learning and the critical importance of adequate staff training for successful integration.

EA 773. ADVANCED EDUCATIONAL PSYCHOLOGY FOR TEACHERS AND ADMINISTRATORS 3 HRS.
An advanced course in educational psychology focusing upon those issues of particular importance to school administrators and curriculum leaders. Topics to be covered include human development, cognitive and personality development, learning theory, behaviorism, cognitivism, intelligence, diversity, teaching models and motivation.

EA 811. SUPERVISION AND EVALUATION 3 HRS.
Supervision and Evaluation is a required graduate level course focusing on criteria for effective instruction, techniques for effective supervision which promotes teacher professional growth, and teacher evaluation.

EA 830. SCHOOL LEADERSHIP THEORY 3 HRS.
This course contains an overview of the research, theory and practice that relate to a school leader's responsibility to develop and maintain healthy organizations and to create an organizational culture that promotes creativity and performance. Topics include major contemporary theorists, leadership and empowerment, leadership and diversity issues, leadership for change, schools as unique social systems and complex organizations, and issues related to the changing values and attitudes of professionals and the community about schools.

EA 849. EDUCATIONAL LAW AND REGULATIONS 3 HRS.
A detailed study of Kansas school law and regulations will be made as they apply to education. Consideration is given to statutes, court decisions, and case law that effect changing administrative procedures and patterns.

EA 853. RESEARCH PROBLEMS IN EDUCATION ADMINISTRATION 1-6 HRS.
(Prerequisite, course scheduled by arrangement and intended for use in advanced stages of program. Approval of project and consent of advisor/committee is required.) With individual direction student selects and pursues the investigation of special problems in educational administration not ordinarily studied in regular courses.

EA 875. BUILDING LEADERSHIP INTERNSHIP I IN EDUCATIONAL ADMINISTRATION 1-2 HRS.
This course will present an opportunity for those in first-year, building-level administration positions to reflect on new job experiences, interact with peers, and actively seek professional improvement on each of the six identified leadership standards. Students successfully completing all aspects of the internship will be recommended for professional licensure in the state of Kansas. EA875 is the first (Fall) of a two semester practicum. Student must complete EA Building Leadership Non-Degree program and secure employment as a building level administrator prior to enrollment in EA 875.

EA 876. BUILDING LEADERSHIP INTERNSHIP II IN EDUCATIONAL ADMINISTRATION 1-2 HRS.
(Prerequisites, EA 875.) This course will present an opportunity for those in first-year, building level administration positions to reflect on new job experiences, interact with peers, and actively seek professional improvement on each of the six identified leadership standards. Students successfully completing all aspects of the internship will be recommended for professional licensure in the state of Kansas. EA 876 is the second (Spring) of a two semester practicum. Student must complete EA Building Masters or Non-Degree Leadership program and EA 875 Building Level Internship I in Educational Administration prior to enrolling in this course.

EA 877. PROGRAM LEADERSHIP INTERNSHIP I IN EDUCATIONAL ADMINISTRATION 1-2 HRS.
This course will present an opportunity for those in first-year, program-level administration positions to reflect on new job experiences, interact with peers, and actively seek professional improvement on each of the six identified leadership standards. Students successfully completing all aspects of the internship will be recommended for professional licensure in the state of Kansas. EA 877 is the first (Fall) of a two semester practicum. Student must complete EA Program Leadership Non-Degree program and secure employment in the license area prior to enrollment in EA 877.

EA 878. PROGRAM LEADERSHIP INTERNSHIP II IN EDUCATIONAL ADMINISTRATION 1-2 HRS.
(Prerequisite, EA877.) This course will present an opportunity for those in first-year, program-level administration positions to reflect on new job experiences, interact with peers, and actively seek professional improvement on each of the six identified leadership standards. Students successfully completing all aspects of the internship will be recommended for professional licensure in the state of Kansas. This class is the second (Spring) of a two semester practicum. Student must complete EA877 Program Leadership Internship I in Educational Administration prior to enrolling in this course.

EA 885. HUMAN RELATIONS AND GROUP PROCESSES IN EDUCATION 2 HRS.
This course is designed to provide educators with essential interpersonal skills for success in relating to others, encouraging productive participation in decision making, and managing conflict effectively.

EA 888. SCHOOL SYSTEMS MANAGEMENT 3 HRS.
This course will focus on methods and areas on managing today's schools. Particular attention will be given to each distinct subsystem within the school and district organization. Managerial skills that are inherent in day-to-day practices will also be studied.

EA 894. FIELD EXPERIENCE IN EDUCATIONAL ADMINISTRATION: BUILDING LEVEL 3 HRS.
Enrollment in this course is concurrent with specified core courses in the educational administration program. Students will be engaged in field projects and experiences associated with the primary areas of content under the supervision of a mentor administrator and a university supervisor. An integral part of the field experiences will place emphasis on application, analysis and synthesis and will evaluate levels of learning through a variety of activities. Students must be near completion of the EA Building Leadership program and secure department chair approval prior to the course start date.

EA 895. PRACTICUM IN EDUCATIONAL ADMINISTRATION: BUILDING LEVEL 3 HRS.
Enrollment in this course is concurrent with specified core courses in the educational administration program. Students will be engaged in field projects and experiences associated with the primary areas of content under the supervision of a mentor administrator and a university supervisor. An integral part of the field experiences will place emphasis on application, analysis and synthesis and will evaluate levels of learning through a variety of activities. Students must be near completion of the EA Building Leadership program and secure department chair approval prior to the course start date.

EA 896. PRACTICUM I IN EDUCATIONAL ADMINISTRATION: BUILDING LEVEL—FALL 1-4 HRS.
Enrollment in this course is concurrent with specified core courses in the educational administration program. Students will be engaged in major field projects and experiences associated with the primary areas of content under the supervision of a mentor administrator and a university supervisor. An integral part of the field experiences will place emphasis on application, analysis, synthesis, and evaluate levels of learning through simulated activities. Student must complete EA Building Leadership program and secure advisor or department chair approval prior to August start date.

EA 897. PRACTICUM II IN EDUCATIONAL ADMINISTRATION: BUILDING LEVEL—SPRING 1-4 HRS.
(Prerequisite, EA896.) Enrollment in this course is concurrent with specified core courses in the educational administration program. Students will be engaged in major field activities and will develop a specific practicum project associated with the primary areas of content under the supervision of a mentor administrator and a university supervisor. An integral part of the field experiences will place emphasis on application, analysis, synthesis, and evaluate levels of learning through reflection and discussion. Student must complete EA Building Level Leadership program and EA 896 Practicum I in Educational Administration: Building Level—Fall prior to enrolling in this course.

EA 941. BUSINESS ADMINISTRATION IN SCHOOL LEADERSHIP 3 HRS.
This course is concerned with basic principles accepted in the fiscal and business management of all aspects of the administration of education. Consideration is given to sources of fiscal support, methods of management, program accounting and cost accounting. Course required for students in District Level Leadership licensure program.

EA 942. LEADERSHIP OF SPECIAL PROGRAMS 3 HRS.
This course will provide those enrolled with the opportunities to study the principles, processes, practices, and issues related to administering and supervising special programs in education. Specific emphasis will be placed on special education. An overview of different at-risk, vocational, and early childhood education programs will be included for study.

EA 983. SEMINAR IN EDUCATIONAL ADMINISTRATION 1-3 HRS.
This course is designed primarily for in-service training of practicing administrators and students in advanced stages of degree work. Instruction will treat topics of current interest and concern through seminar and workshop method.

EA 984. EDUCATIONAL BUILDINGS AND FACILITIES 3 HRS.
A study of the basic principles of educational facility planning. Particular emphasis is given to the relationship between the educational facilities and the educational programs they must accommodate. An examination is made of the broad steps necessary to logically plan, construct, and occupy new educational facilities. Field trips are incorporated as an integral part of course. Course required for students in District Level Leadership licensure program.

EA 986. DISTRICT SCHOOL LEADERSHIP 3 HRS.
Course designed for aspiring chief school administrators. Includes theory and practice of district-level administrative leadership, school board-administrator relationships, stakeholder involvement, strategic planning, and fiscal accounting. Course required for students in District Leadership Level licensure program.

EA 995. DISTRICT LEADERSHIP INTERNSHIP I IN EDUCATIONAL ADMINISTRATION 1-2 HRS.
This course will present an opportunity for those in first-year, district-level administration positions to reflect on new job experiences, interact with peers, and actively seek professional improvement on each of the six identified leadership standards. Students successfully completing all aspects of the internship will be recommended for professional licensure in the state of Kansas. EA 995 is the first (Fall) of a two semester internship. Student must complete EA District Level Leadership Non-Degree program and secure employment as a district administrator prior to enrollment in EA 995.

EA 996. DISTRICT LEADERSHIP INTERNSHIP II IN EDUCATIONAL ADMINISTRATION 1-2 HRS.
(Prerequisite, EA 995.) This course will present an opportunity for those in first-year, district-level administration positions to reflect on new job experiences, interact with peers, and actively seek professional improvement on each of the six identified leadership standards. Students successfully completing all aspects of the internship will be recommended for professional licensure in the state of Kansas. EA 996 is the second (Spring) of a two semester internship. Student must complete EA District Level Leadership Non-Degree program and EA 995 District Leadership Internship I in Educational Administration prior to enrolling in this course.

EA 997. PRACTICUM I IN EDUCATIONAL ADMINISTRATION: DISTRICT LEVEL-FALL 3 HRS.
The primary areas of content will focus on communication, planning, organizing and facilitating, problem solving, decision making and conflict management. Secondary emphasis will be placed on content covered in leadership courses leading to the practicum experience. Students will engage in major field projects and experiences associated with the primary and secondary areas of content under the supervision of a mentor administrator and a university supervisor. Seminars are an integral part of the field experiences and will place emphasis on application, analysis, synthesis, and evaluative levels of learning. Student must complete EA District Level Leadership Non-Degree program and secure advisor or department chair approval prior to August start date.

EA 998. PRACTICUM II IN EDUCATIONAL ADMINISTRATION: DISTRICT LEVEL-FALL 3 HRS.
(Prerequisite, EA 997.) The primary areas of content will focus on communication, planning, organizing and facilitating, problemsolving, decision making and conflict management. Secondary emphasis will be placed on content covered in leadership courses leading to the practicum experience. Students will engage in major field projects and experiences associated with the primary and secondary areas of content under the supervision of a mentor administrator and a university supervisor. Seminars are an integral part of the field experiences and will place emphasis on application, analysis, synthesis, and evaluative levels of learning. Student must complete EA District Level Leadership Non-Degree program and EA 997 Practicum I in Educational Administration: District Level-Spring prior to enrolling in this course.

ECOLOGY & BIODIVERSITY

EB 159. SPECIAL TOPICS IN ECOLOGY AND BIODIVERSITY 1-3 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide an in- depth consideration of specialized topics in the various areas of ecology and biodiversity.

EB 259. SPECIAL TOPICS IN ECOLOGY AND BIODIVERSITY 1-3 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide an in- depth consideration of specialized topics in the various areas of ecology and biodiversity.

EB 341. WETLAND ENVIRONMENTS 3 HRS.
(Prerequisites, general education courses in biological, physical, and social sciences.) An interdisciplinary overview of physical, biological, and cultural aspects of wetlands. Definitions, classification, origins, and natural processes of wetland environments. Wetlands in boreal, temperate, and tropical climatic settings. Human impact, exploitation and management of wetland resources. Lectures, exercises and field trips. A student may not earn credit in more than one of EB 341, ES 341, or GE 341.

EB 351. INTRODUCTION TO GEOSPATIAL ANALYSIS 3 HRS.
(Prerequisites, one general education course in each of biological, physical, and social sciences; or consent of instructor.) Introduction to geographic information systems (GIS) and remote sensing techniques as applied to documenting, mapping, interpreting, and managing natural and cultural resources. Types of GIS data, computer hardware and software used for geospatial analysis, basic cartography, and global positioning systems. Lectures, laboratory exercises, and field trip.

EB 353. ENVIRONMENTAL BIOLOGY ♣ 3 HRS.
(Prerequisite, GB 100; consent of instructor.) A course for people interested in expanding their understanding of the causes, consequences and possible solutions for the major global and national environmental problems. The historical, socioeconomic and techno-scientific aspects of these problems are examined in lectures and discussions and by the use of video and printed materials. Summer and on demand.

EB 409. ECOLOGY & BIODIVERSITY PROJECTS 1-3 HRS.
(Prerequisite, consent of instructor.) The student works independently, with the aid and advice of one or more members of the staff, on a project in an area of ecology and biodiversity in which they have some interest and competence.

EB 459. SPECIAL TOPICS IN ECOLOGY AND BIODIVERSITY 1-3 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide in- depth consideration of specialized topics in the various areas of ecology and biodiversity.

EB 470. INTERNSHIP IN GEOSPATIAL ANALYSIS 3 HRS.
(Prerequisites, GE 371, EB/ES 351; recommended, ES 551.) The internship provides an opportunity for undergraduate students enrolled in the GSA program to apply their mapping and geospatial analysis skills to practical problems. In addition to performing tasks outlined by the internship agency, each student will complete an end- of-semester written report, which will discuss various aspects of the internship. A student may not earn credit in more than one of EB 470, ES 470 or GE 470.

EB 474. FISHERIES MANAGEMENT 2 HRS.
(Prerequisites, ZO 214/215 and EB 480 or equivalents. Ichthyology/Lab and Field Ecology or equivalents recommended but not required. EB 475 must be taken concurrently.) Principles, methods, and human dimensions of fisheries management.

EB 475. FISHERIES MANAGEMENT LAB 2 HRS.
(Prerequisites, ZO 214/215 and EB 480 or equivalents. Ichthyology/Lab and Field Ecology or equivalents recommended but not required. EB 474 must be taken concurrently.) Introduction to the tools used by fisheries managers in the field and lab, including gear and methodology for sampling local waters. Identification of selected Kansas forage, rough, and game fishes. Field trips to organizations active in fisheries management.

EB 480. PRINCIPLES OF ECOLOGY 3 HRS.
(Prerequisites, BO 212-213, ZO 214-215, and MC 316-317 or equivalent. This course is to be taken concurrently with or as a prerequisite to EB 481.) Lectures and discussions of basic principles concerning population growth and interactions, regulatory mechanisms, community succession and structure, and energy relationships of ecological systems.

EB 481. FIELD ECOLOGY 2 HRS.
(Prerequisite, EB 480.) Students experience the process of ecological science through instruction and their own research. Material covered includes basic principles of experimental and sampling design, sampling methods for estimating the distribution and abundance of organisms, data analysis, and communication of proposed and completed projects in written and oral form.

EB 496. STREAM ECOLOGY AND LAB 4 HRS.
(Prerequisites, GB 140, GB 141, ZO 214, ZO 215, EB 480, EB 481, or equivalent college-level courses.) Provides opportunities for undergraduate students to: 1. gain an overview of the structure and function of running waters; 2. explore various lotic habitats in the Emporia area; and 3. learn field and laboratory techniques for sampling and characterizing stream ecosystems. Class will often consist of both lecture and laboratory activities on a given day, but some sessions will be either entirely lecture or lab.

EB 536. WILDLIFE POPULATIONS AND CONSERVATION 2 HRS.
(Prerequisite, EB 480. EB 537 must be taken concurrently.) Theories and principles of ecology and conservation biology as they apply to the management of terrestrial and wetland-dwelling animal populations. Contemporary conservation issues and management practices are covered, with an emphasis on consequences of habitat manipulations.

EB 537. WILDLIFE POPULATIONS AND CONSERVATION LAB **2 HRS.**
(Prerequisites, EB 480. EB 536 must be taken concurrently.) Survey and evaluation of techniques used for analyzing and managing wildlife populations, including exposure to computer models, management planning, and field work.

EB 538. NATURAL RESOURCE POLICIES **2 HRS.**
(Prerequisites, GB 100 or GB 140, or equivalent.) The art of managing natural resources within a historical, economic, political, and sociological framework. Conservation planning, organizations, ethics, and laws pertinent to natural resource conservation are discussed.

EB 736. WORKSHOP IN ECOLOGY AND BIODIVERSITY **1-5 HRS.**
(Prerequisite, 12 completed semester hours of biology or consent of instructor is required.) Preparation of materials and exercises for teaching science concepts using investigative procedures. Individual and group activities, techniques and procedures for studying and teaching ecology and biodiversity by utilizing subjects and materials available in natural areas. Field experiences included.

EB 798. LIMNOLOGY **2 HRS.**
(Prerequisite, concurrent with EB 799.) An introduction to the physical, chemical, and biological characteristics of aquatic communities, history and theory of energy flow and nutrient cycling in lakes and streams, and major water pollution problems.

EB 799. LIMNOLOGY LAB **2 HRS.**
(Prerequisite, concurrent with EB 798.) Laboratory and field techniques for measurement of physicochemical features of aquatic communities, sampling techniques and identification of aquatic organisms, lake mapping, and measurement of primary productivity and community respiration.

EB 809. GRADUATE PROJECT IN ECOLOGY AND BIODIVERSITY **1-3 HRS.**
(Prerequisite, consent of instructor.) The student works independently, with the advice and aid of one or more members of the staff, on a project in an area of ecology and biodiversity in which they have some interest or competence.

EB 859. SPECIAL TOPICS IN ECOLOGY AND BIODIVERSITY **1-4 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in depth consideration of specialized topics in the various areas of ecology and biodiversity.

EB 874. FISHERIES MANAGEMENT **2 HRS.**
(Prerequisites, ZO 214/215 and EB 480 or equivalents. Ichthyology/Lab and Field Ecology or equivalents recommended but not required. EB 875 must be taken concurrently.) Principles, methods, and human dimensions of fisheries management.

EB 875. FISHERIES MANAGEMENT LAB **2 HRS.**
(Prerequisites, ZO 214/215 and EB 480 or equivalents. Ichthyology/Lab and Field Ecology or equivalents recommended but not required. EB 874 must be taken concurrently.) Introduction to the tools used by fisheries managers in the field and lab, including gear and methodology for sampling local waters. Identification of selected Kansas forage, rough, and game fishes. Field trips to organizations active in fisheries management.

EB 885. GRADUATE RESEARCH IN ECOLOGY AND BIODIVERSITY **2-3 HRS.**
(Prerequisites, graduate standing and at least three hours credit in graduate level independent study.) Investigation of problems in ecology and biodiversity by students who have demonstrated research ability at the graduate level.

EB 896. STREAM ECOLOGY AND LAB **4 HRS.**
(Prerequisites, GB 140, GB 141, ZO 214, ZO 215, EB 480, EB 481, or equivalent college-level courses.) Provides opportunities for graduate students to: 1. gain an overview of the structure and function of running waters; 2. explore various lotic habitats in the Emporia area; and 3. learn field and laboratory techniques for sampling and characterizing stream ecosystems.

ECONOMICS

EC 101. BASIC ECONOMICS **3 HRS.**
This course is for non-business majors and provides a basic understanding of the economic ideas and institutions. Introductory topics from micro, macro, and international economics are covered in the course.

EC 102. HONORS ECONOMICS **1 HR.**
(Prerequisite, concurrent enrollment in EC 101 is expected unless the student is repeating this class.) This course complements a regular section of EC 101 Basic Economics. It goes into additional depth on selected topics and covers topics which are not covered in the EC 101. Its coverage extends microeconomics, macroeconomics, and international economics.

EC 300. TOPICS IN ECONOMICS **1-4 HRS.**
(Prerequisites, EC 101 or BC 104.) This course focuses on economic topics not covered in existing economics classes. The seminars may also involve field experience or civic engagement associated with the American Democracy Project at ESU.

EC 301. GLOBALIZATION **1-3 HRS.**
This pro-seminar style course poses scholarly questions associated with the integration of economic, political, and cultural systems around the world. It attempts to address these key questions as it explores issues related to trade, migration, development, energy, gender, culture, technology, health, education, the environment, and others with research, presentations, and discussion.

EC 305. INTERMEDIATE MICROECONOMICS **3 HRS.**
(Prerequisites, EC 101 or BC 104.) This course is an intermediate level course in microeconomic theory. Particular emphasis is placed upon the theory of the consumer and firm. Market equilibrium conditions under perfect and imperfect competition are discussed.

EC 306. INTERMEDIATE MACROECONOMICS **3 HRS.**
(Prerequisites, EC 101 or BC 104.) This course is a study of aggregate economic analysis from the perspective of different schools of thought. Consideration is also given to the effects of monetary and fiscal policy on such aggregate economic variables as income, prices, and economic growth.

EC 313. MATHEMATICAL APPLICATIONS FOR ECONOMICS **3 HRS.**
(Prerequisites, EC 101 or BC 104 and MA 110.) An introduction to the applications of mathematical techniques to economic analysis. The mathematical tools used will be selected from the areas of matrix algebra, linear programming, game theory and calculus. Specific computational procedures will be introduced and used to analyze economic relationships.

EC 327. INDUSTRIAL ORGANIZATION **3 HRS.**
(Prerequisites, BC103 and BC104 or EC101.) For students with some background in microeconomics, this course will examine how the performance of an industry is related to its structure. The approach used here includes the traditional structure-conduct-performance approach in addition to the latest advances in microeconomic theory, including game theory, contestability, and information theory.

EC 351. LABOR ECONOMICS **3 HRS.**
(Prerequisites, EC 101 or BC 104.) This is an analytical and quantitative course beginning with the derivation of the demand for labor in different market structures and the supply of labor using indifference analysis. It explores productivity, profit maximization, regulation, collective bargaining, and social welfare implications. Part of the course is devoted to the macroeconomics of labor, focusing on employment, unemployment, the labor force, and related topics.

EC 370. INTRODUCTORY ECONOMETRICS **3 HRS.**
(Prerequisites, BC 104 or EC 101 and MA 380.) This course provides an introduction to modern methods of analyzing data used economics, business, and other social sciences. The course typically follows a course in statistics and the level of mathematics required for a complete understanding of all the material in the course is algebra. Topics include estimating techniques, tests of significance, prediction and forecasting.

EC 375. COMPARATIVE ECONOMIC SYSTEMS **2-3 HRS.**
(Prerequisites, EC 101 or BC 104.) A comparative study of capitalism, socialism, and communism. Theoretical differences among these economic systems, together with their strengths and weaknesses, are examined.

EC 410. INTERNSHIP IN ECONOMICS **1-6 HRS.**
(Prerequisite, EC 101 or BC 104.) An academic offering that provides special employment for students who wish to gain career-related experience before graduation. Students are placed in supervised positions and assigned faculty advisors who design job-related academic projects.

EC 471. INDEPENDENT STUDY **1-3 HRS.**
(Prerequisites, EC 101 or BC 104.) Special project or readings on a topic initiated by the student and approved by the instructor.

EC 499. ECONOMICS CAPSTONE **1-4 HRS.**
(Prerequisites, EC 305, EC 306, and statistics.) This course is intended to present students with the opportunity to work as a team on a real world project in economics and expose them to some areas of economics not covered with a complete course in their program of study. Beyond the exposure to different areas of economics, it is intended to expose the student to model building and economic analysis using quantitative techniques.

EC 501. HISTORY OF ECONOMIC THOUGHT **2-3 HRS.**
(Prerequisites, EC 101 or BC 104.) A survey of the growth and development of economics from ancient times to the present.

EC 541. HEALTH ECONOMICS **3 HRS.**
This course explores topics related to the economics of health and health care. It introduces various economic explanations of health behaviors, ranging from investments in health – such as doctor visits, sleep, and diet – to risky health choices such as smoking and drug abuse. The course also explores the labor market for medical professionals, discuss the impact of competition on hospitals, and discusses the relevant issues related to the pharmaceutical industry. The course introduces the theory behind insurance and how public policies affect health care markets.

EC 554. PUBLIC FINANCE **3 HRS.**
(Prerequisites, EC 101 or BC 104.) This course extends economic theory to the public sector of the economy. In particular, it develops an economic theory of public expenditures and taxation at the federal, state, and local levels.

EC 560. ECONOMIC DEVELOPMENT **3 HRS.**
(Prerequisites, EC 101 or BC 104 or equivalent.) An introductory course concerning the characteristics, obstacles, and problems of economic

development facing the less-developed or less-industrialized countries of the world. Certain problems involved in the relation of the less-industrialized countries to the more-industrialized countries are examined. Designed to acquaint the student with the theory, history and policy of economic development.

EC 581. TEACHING ECONOMICS: GROSS DOMESTIC PRODUCT **1 HR.**
(Prerequisite: Graduate Standing. Corequisite: Simultaneous registration for the companion course materials offered by the Federal Reserve Bank of St. Louis (FRBSL) at no charge to you. In addition, teaching a compatible course in high school (or middle school) is required.) This is an online course offered in conjunction with the Federal Reserve Bank of St. Louis for educators who wish to develop, expand, or enhance their ability to teach about Gross Domestic Product.

EC 582. TEACHING ECONOMICS: INFLATION **1 HR.**
(Prerequisite: Graduate Standing. Corequisite: Simultaneous registration for the companion course materials offered by the Federal Reserve Bank of St. Louis (FRBSL) at no charge to you. In addition, teaching a compatible course in high school (or middle school) is required.) This is mostly an online course offered in conjunction with the Federal Reserve Bank of St. Louis for educators who wish to develop, expand, or enhance their ability to teach about money.

EC 583. TEACHING ECONOMICS: MONETARY POLICY **1 HR.**
(Prerequisite: Graduate Standing. Corequisite: Simultaneous registration for the companion course materials offered by the Federal Reserve Bank of St. Louis (FRBSL) at no charge to you. In addition, teaching a compatible course in high school (or middle school) is required.) This is an online course offered in conjunction with the Federal Reserve Bank of St. Louis for educators who wish to develop, expand, or enhance their ability to teach about monetary policy.

EC 584. TEACHING ECONOMICS: MONEY **1 HR.**
(Prerequisite: Graduate Standing. Corequisite: Simultaneous registration for the companion course materials offered by the Federal Reserve Bank of St. Louis (FRBSL) at no charge to you. In addition, teaching a compatible course in high school (or middle school) is required.) This is an online course offered in conjunction with the Federal Reserve Bank of St. Louis for educators who wish to develop, expand, or enhance their ability to teach about money.

EC 585. TEACHING ECONOMICS: UNEMPLOYMENT **1 HR.**
(Prerequisite: Graduate Standing. Corequisite: Simultaneous registration for the companion course materials offered by the Federal Reserve Bank of St. Louis (FRBSL) at no charge to you. In addition, teaching a compatible course in high school (or middle school) is required.) This is an online course offered in conjunction with the Federal Reserve Bank of St. Louis for educators who wish to develop, expand, or enhance their ability to teach about Unemployment.

EC 701. SEMINAR IN ECONOMICS **3 HRS**
(Prerequisites, EC 101 or BC 104.) Selected main events, trends and interpretations in economics will be examined through readings, reports and discussions. Designed to introduce the important literature on significant economic topics.

EC 705. ECONOMIC EDUCATION **1-6 HRS.**
You must be a certified Kansas teacher who has a contract (or will have a contract) to teach in a K-12 classroom in the next academic year to be eligible for a Kansas Council on Economic Education scholarship for this course. This class is a series of seminars that focus on economic topics. The seminars also involve field experience in gathering useful examples for classroom teachers.

EC 710. ECONOMETRICS I 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the statistical toolkit used by economists studying behaviors of individuals in a market. The methods discussed in this course supplement those in the companion course, EC 711: Econometrics II. This course focuses on topics of linear regression, hypothesis testing, and econometric models commonly used with large panel data sets. Students will utilize statistical software to apply material to real world data.

EC 711. ECONOMETRICS II 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the statistical toolkit used in macroeconomic analysis. The methods discussed in this course supplement those in the companion course, EC 710: Econometrics I. This course focuses on methods and issues involved in the analysis of time-series data. Students will utilize statistical software to apply material to real-world data.

EC 712. ECONOMIC THEORY 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the foundational theory in microeconomics and macroeconomics essential for informed analysis of economic data at the graduate level. This course can be waived given sufficient background in economic theory.

EC 713. SEMINAR IN MATHEMATICAL ECONOMICS 3 HRS.
(Prerequisites: Coursework in economics and mathematics.) This course provides the mathematical tools utilized in various fields in economics including concepts from linear algebra, calculus, and differential equations. This course will also include discussions of current research in mathematical economics and students will present research papers in a seminar format.

EC 727. SEMINAR IN INDUSTRIAL ORGANIZATION 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the theoretical and empirical framework for analysis of imperfectly competitive markets and behavior of firms with a focus on current research in these fields. The course will challenge students to analyze and discuss modern methods and topics in industrial organization, implement advanced statistical methods to analyze and simulate data, and prepare high-quality research products.

EC 731. SEMINAR IN THE ECONOMICS OF CRIME 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the theoretical and empirical framework for analysis of criminal justice markets and criminal behavior, with a focus on current research in these fields. The course will challenge students to analyze and discuss modern methods and topics in the economics of crime, implement a range of statistical methods to analyze data, and prepare high-quality research products.

EC 737. SEMINAR IN GAME THEORY 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the theoretical foundation for analysis of strategic behaviors between agents in the economy. The course will challenge students to analyze and discuss seminal and modern theory in game theory. Students will be challenged to identify real world situations of strategic behavior, develop predictions of behavior, and present findings to the class as well as a variety of audiences.

EC 740. BUSINESS CYCLES AND FORECASTING 3 HRS.
(Prerequisites, EC 101 or BC 104 or equivalent.) An analysis is made of the nature and causes of business fluctuations. Methods are developed to measure and predict changes in business activity.

EC 741. SEMINAR IN HEALTH ECONOMICS 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the theoretical and empirical framework for analysis of healthcare markets and health behavior with a focus on current research in these fields. The course will challenge students to analyze and discuss modern methods and topics in health economics, implement a range of statistical methods to analyze health market data, and prepare high-quality research products.

EC 751. SEMINAR IN LABOR ECONOMICS 3 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course provides the theoretical and empirical framework for analysis of labor markets with a focus on current research in these fields. The course will challenge students to analyze and discuss modern analytical methods and topics in labor economics, implement a range of statistical methods to analyze labor market data, and prepare high-quality products to distribute research results.

EC 797. GRADUATE INTERNSHIP IN ECONOMICS 1-6 HRS.
(Prerequisites: Coursework in economics, statistics, or related field(s).) This course allows students to apply expertise by participating in an internship or practicum. Typically, this involves work with an organization in either a paid or unpaid role on projects related to the concentration informatics, econometrics, or related area

EC 798. DIRECTED RESEARCH IN ECONOMICS 1-6 HRS.
(Prerequisites: Coursework in economics and statistics or related field(s).) This course requires students to apply methods in economic research to current issues. This requires students to obtain, manage, analyze, and present data to answer specific research questions in their field(s) of interest. This course also requires students to read and analyze modern literature in economics, concisely discuss these papers, and discuss how their findings deviate from existing research. This course is designed to supplement the seminar courses in economics where students will be asked to develop novel research questions.

EDUCATION

ED 220. INTRODUCTION TO TEACHING ▸ 0- 2 HRS.
(Prerequisite, sophomore standing.) A survey of education from colonial times to the present including the history and philosophy of education. This course includes an analysis of the role of the local, state, and federal government in educational policy; an examination of the social forces that influence schools; ethical and legal issues involving the educational process; and multicultural/diversity issues in American education. There is a required field experience in the public or private schools.

ED 332. EDUCATIONAL PSYCHOLOGY 2 HRS.
(Co-requisites ED333 and ED334.) The course is for candidates who have been admitted to teacher education and enrollment concurrent with ED334 and ED333 in the same section is required. This course is part of the first phase of professional education and is designed to teach the relationships between psychological principles and the educative process. Practical experiences are related to classroom organization, management and learning activities. Adolescent development is treated through application of learning theories, research design and behavioral objectives. This professional education course integrates with the other courses in Phase I to provide a theoretical and practical base for teaching.

ED 333. PRINCIPLES OF SECONDARY EDUCATION 4 HRS.
(Corequisites, ED334 and PY334.) The course is for candidates who have been admitted to teacher education and enrollment concurrent with ED334 and PY334 in the same section is required. Candidates completing ED333 will demonstrate the ability to conduct curriculum development, including decision-making, planning for all learners, instruction, and assessment skills and reflection required of effective middle level and secondary teachers. An extensive field experience is required; this field experience is called the internship and is designed to have the candidate gain first-hand experience in classroom operations and in working with students in a school setting. Candidates will demonstrate critical thinking skills in their internship in a school, as they work with individuals, small groups, and the whole class. Candidates will also describe basic elements associated with current reform movements. Candidate must secure advisor and teacher education admission director approval prior to enrollment.

ED 334. CLASSROOM MANAGEMENT 3 HRS.
(Corequisites, ED333 and PY334) The course is for candidates who have been admitted to teacher education and enrollment concurrent with ED333 and PY334 in the same section is required. The course is designed to develop the following skills: organizing the secondary classroom; conducting lessons geared toward students of differing backgrounds and abilities; conducting lessons involving problem solving, group work, active engagement and self-motivation; developing a climate which fosters creative inquiry; developing skills for keeping students on task; and developing classroom management and discipline strategies. Candidate must secure advisor and teacher education admission director approval prior to enrollment.

ED 335. OBSERVATION AND PARTICIPATION (SECONDARY) 1 HR.
Candidate must secure advisor and teacher education admission director approval prior to enrollment.

ED 340. USING ASSESSMENT AND DATA IN THE SECONDARY CLASSROOM 3 HRS.
Using data to make classroom-based decisions involves collecting, managing, evaluating, and applying data in a critical manner. The focus of this course is to develop skills in the assessment of students and in the reasoning ability that is necessary to create, select, and administer assessments; analyze the assessment results; and apply concepts to make decisions about teaching and other professional activities based on data of all kinds. Assignments and projects tying this course content to the student's own teaching field are course requirements. Major topics include: selecting and developing assessments; reliability and validity; standardized testing and interpreting score reports (percentile scores); collecting and analyzing assessment data; using data of all kinds to improve student learning; value added measurement; using data to compare schools, states, and nations; correlation and the correlates of effective teaching.

ED 343. SPECIAL STUDIES IN EDUCATION 1-3 HRS.
(Prerequisite, consent of instructor.) This course offers an in-depth study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed.

ED 347. VOLUNTEER TUTORING PROGRAM 1 HR.
Provides the opportunity for students to gain supervised experience in the schools tutoring children in a variety of subjects, an assigned by classroom teachers. Students will work one-on-one with children, in small groups, or on various projects with the teachers. Placements are available for all levels of public school. This is a commitment for the entire semester and at least 50 hours of volunteer time is expected. The recommended amount of time is 2-24 hours per week. This can count toward the 100 hours contact time required to enter Phase I education classes.

ED 431. PERFORMANCE ASSESSMENT FOR STUDENT TEACHING 0 HRS.
Students will successfully complete the Kansas Performance Teaching Portfolio (KPTP), a requirement for program completion. The KPTP is also a requirement for licensure in the state of Kansas.

ED 451. INDEPENDENT STUDY IN EDUCATION 1-3 HRS.
Students will carry out individual projects under the guidance of selected staff members. Consent of instructor or department chair is needed prior to enrollment. Candidate must secure advisor and teacher education admission director approval prior to enrollment.

ED 535. CULTURAL AWARENESS FOR EDUCATORS 3 HRS.
(Prerequisite, junior standing.) This course is designed to prepare students to effectively educate culturally, ethnically, racially different and differently abled students. Major components are: to explore personal biases and methods of overcoming them; explore the basic principles underlying multicultural education and to develop appropriate teaching strategies, activities and materials; to adapt an evaluate curricula for use in culturally diverse, as well as homogenous, classrooms.

ED 700. CLINICAL TEACHING: TEACHER BEHAVIOR DECISIONS 1 HR.
An introductory course focusing on elements of the teaching model developed by Dr. Madeline Hunter of UCIA. Topics covered in this class include: expectations for student success, student motivation, increasing productive student behavior, helping students remember and transfer what they have learned, practice theory, and brain function.

ED 701. CLINICAL TEACHING: CONTENT AND LESSON DESIGN DECISIONS 1 HR.
An introductory course focusing on elements of the teaching model developed by Dr. Madeline Hunter of UCLA. Topics covered in the course include: diagnosis of student entry levels, task analysis, grouping for effective learning, and the seven step lesson plan.

ED 702. APPLYING CLINICAL TEACHING 1 HR.
A course designed to help students apply their knowledge of the Madeline Hunter model to actual teaching situations and to compare the model with selected research-based teaching models with similar content.

ED 711. INTRODUCTION TO AMERICAN EDUCATION FOR INTERNATIONAL STUDENTS 1 HR.
An orientation to Education at Emporia State University and in the United States. Opportunity to discuss graduate procedures and requirements, comparative organization and practices of education in other nations and the United States, recent developments in some aspect of a student's field. Each student observes concurrently, makes a report to the class, and discusses experience gained in public school settings.

ED 725. TEACHING READING TO DIVERSE LEARNERS 1 HR.
This course is designed to help elementary, middle, or secondary school teachers critically explore diversity issues to better prepare them to address the literacy needs of all learners. This course is also designed to help promote equality, equity, and excellence among all learners. The overall goal is helping elementary, middle, and secondary school teachers develop a deeper understanding of and respect for the multiple literacies that affect teaching and learning of the different homogenous or heterogenous students inside classrooms in the Midwest and across America.

ED 730. COMPARATIVE EDUCATION SEMINAR 3-6 HRS.
Historical foundations, rise and development of national educational systems of western European nations and their impact upon developing and emerging nations. Comparison and contrast of philosophic and educational components used in individual and group activities.

ED 731. HISTORICAL FOUNDATIONS OF EDUCATION 3 HRS.
The historical and philosophical foundations of western education emphasizing those aspects of education that have been influential in the development of education in America. Includes the critical investigation of the contributors to educational thought such as Plato, Aristotle, Quintilian, Augustine, Comenius, Rousseau, Herbart, Froebel, Pestalozzi, Locke, Spencer, Mann and Dewey.

ED 743. SPECIAL STUDIES IN EDUCATION 0-6 HRS.
To provide in depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction and evaluation of curriculum. Topics will vary from semester to semester. Consent of instructor or department chair is needed prior to enrollment.

ED 744. SPECIAL WORKSHOPS IN EDUCATION 0-2 HRS.
To provide in depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction, evaluation of curriculum. Topics will vary from semester to semester. This course is offered only by pass/no credit.

ED 750. CLASSROOM MANAGEMENT, STUDENT MOTIVATION AND DISCIPLINE 2 HRS.
This course is designed for both the practicing and pre-service teacher. It studies the problems related to classroom management, student motivation and discipline. Procedures and practices for managing school classrooms are reviewed with attention given to appropriate classroom teaching methodology and needs of the student. Some individualization of instruction will be offered to the students as they establish their personal plan for classroom and student management.

ED 805. RESTRUCTURING CLASSROOMS WITH TECHNOLOGY 2-3 HRS.
This course is designed to prepare teachers to integrate diverse educational technologies in K-12 classrooms in ways that reflect a theoretical, research based, and practical understanding of curriculum development and the effective uses of technology. Course content will explore the role of educators as agents of reform and progress regarding uses of technology. The course emphasizes practical ways to integrate technology into everyday instruction including content-area knowledge acquisition, inquiry, communication, critical thinking, and problem solving.

ED 806. ADVANCED STUDIES IN CURRICULUM LEADERSHIP 3 HRS.
Students successfully completing this course will have conducted research or evaluative activities on some aspect of a field-based project associated with curriculum, instruction, or the assessment of student learning--or--will have created a field-based developmental program associated with the improvement of curriculum, instruction, or the assessment of student learning. Students will prepare a full report of findings (research/evaluation) or actions (developmental program), using accepted report formats (research) or a format agreed upon with the instructor (development) at the beginning of the course. Students may be required to share findings or actions with other graduate students in order to fulfill course requirements.

ED 810. SUPPORTING TECHNOLOGY INTEGRATION FOR SCHOOL LEADERS 3 HRS.
This course is designed to prepare school leaders (teachers, instructional coaches, administrators, etc.) for the integration and application of

diverse educational technologies into classrooms and schools in ways that reflect a theoretical, research based, and practical understanding of curriculum development and the effective uses of technology. Course content explores practical ways to integrate technology into both teaching and learning and the critical importance of adequate training and professional development for successful integration.

ED 813. SECONDARY SCHOOL CURRICULUM 3 HRS.
Foundations of secondary curriculum development, analysis of current operations and theories and projects related to personal and vocational needs of students.

ED 815. FOUNDATIONS OF CURRICULUM DEVELOPMENT, K-12 3 HRS.
Investigation of acceptable curriculum practices and patterns in the modern elementary and secondary schools. Designated to assist experienced school personnel in obtaining an understanding of historic perspectives and present influences, issues, and trends affecting curriculum in the schools of today with a view toward implementing programs of improvement in their own school situations.

ED 816. IMPROVEMENT OF INSTRUCTION IN THE JUNIOR HIGH OR MIDDLE SCHOOL 3 HRS.
Examination of learning theories appropriate to junior high school or middle school levels. Research conducted with respect to the latest trends in teaching the early adolescent according to their needs and interests, physical, mental and social. Intended for teachers and administrators.

ED 817. IMPROVEMENT OF INSTRUCTION IN SECONDARY SCHOOLS 3 HRS.
Current materials, programs, and teaching techniques. Self-evaluation and self-improvement. Speakers on instructional evaluation, and current trends within specific disciplines included.

ED 818. PROFESSIONAL DEVELOPMENT AND THE ADULT LEARNER 3 HRS.
This foundational course in professional development will provide Teacher Leaders an introduction of knowledge, skills, attitudes, behaviors, and aspirations that a Teacher Leader will use in designing, facilitating, implementing, and assessing high-quality professional development. Additionally, principles and practices to leading adult learners will be integrated throughout the course.

ED 819. MENTORING AND COACHING 3 HRS.
This course is designed to prepare graduate students who aspire to educational leadership responsibilities to advance the professional skills of colleagues by demonstrating and applying expertise in observational skills and in providing feedback in order to support reflective practice focused on improving curriculum, instruction and assessment.

ED 820. CURRICULUM LEADERSHIP: MODELS AND STRATEGIES 3 HRS.
Students completing this course will, as current or future educational leaders (teachers and administrators), explain and work effectively with the design and management of academic programs, grades Pre-K-12. They will interpret past, current, and emerging curriculum initiatives, and describe their intended impact on school curricula, teachers, and students. Students will also explain and demonstrate in simulated settings processes for creating, implementing, and managing local academic programs in the context of those reform initiatives. Students will be asked to apply their knowledge in four projects which gauge how students can successfully apply what they have learned in a variety of curriculum related settings.

ED 833. BELIEFS, VALUES, & ISSUES IN EDUCATIONAL PRACTICE**3 HRS.**

Differing values and issues in education are addressed, as are the philosophical, historical, and social forces that create the issues. Students will be challenged to investigate the historical and cultural antecedents of modern education, and to examine their own belief systems with regard to the institution of education and to the role and function of the teacher and the school leader.

ED 835. CULTURAL INFLUENCES & EDUCATIONAL PRACTICE**3 HRS.**

This course is designed to prepare students to effectively educate culturally, ethnically, racially different, and differently abled students. Major components are: to explore personal biases and methods of overcoming them; explore the basic principles underlying multicultural education and to develop appropriate strategies for teaching, leading, and other functions of the school and its community.

ED 836. TOPICS AND ISSUES IN EDUCATION**1-3 HRS.**

The study of contemporary topics and issues of relevance to today's educators. The instructor, guest presenters, and students will address and investigate current best practice, examine issues, and review recommendations for the improvement of education.

ED 837. BRAIN-BASED LEARNING FOR EDUCATORS**2-3 HRS.**

Brain-compatible classrooms are brain-friendly places in which the teaching/learning process is based on how the brain functions and the mind learns. We will use brain science and cognitive science to examine and reshape how, where, what, and when we teach. Brain compatible classrooms are designed with challenging, creative, safe, enriched environments that balance direct instruction with hands-on authentic constructivist learning. Brain-friendly strategies include teaching for, of, with, and about thinking/reflection. Course curriculum includes ways to recognize the diverse conditions that confront learners and how to address specific learning needs of diverse, at-risk students, including those who are hard to reach.

ED 840. MANAGING A CLASSROOM**2 HRS.**

This course is designed to help new teachers and school specialists learn how to maintain appropriate student behavior through instructional strategies and communication skills. A classroom management plan will be created with procedures and student expectations.

ED 841. ESSENTIALS OF CURRICULUM DESIGN**3 HRS.**

The purpose of this course is to learn the design down method for unit planning. Students will create a course purpose along with a unit that includes measurable unit outcomes, lesson outcomes, lesson plans and aligned assessments that fulfill State or Common Core Standards.

ED 842. NATIONAL BOARD CERTIFICATION PORTFOLIO DEVELOPMENT**3 HRS.**

This course is designed to provide teachers with the basic requirements for portfolio development as designed by the National Board for Professional Teaching Standards (NBPTS). Students will have an opportunity to review and study the current portfolio manuals and standards document in their respective disciplines/developmental levels, and examine other relevant publications from the NBPTS. Students will also receive guidance and consultation that will be helpful in gathering and organizing the supportive professional documentation required for the NBPTS assessment procedures.

ED 843. NATIONAL BOARD CERTIFICATION SCHOOL BASED PROJECT**6 HRS.**

(Prerequisite, ED/EL 842.) This course is for teachers who are candidates for advanced certification as designed by the National Board

for Professional Teaching Standards (NBPTS). Provides professional support and guidance for teachers during the academic year they are completing the two components of the NBPTS assessment process--the school-site portfolio, and the written assessment center exercises.

ED 844. NATIONAL BOARD CERTIFICATION SCHOOL BASED PROJECT I**3 HRS.**

This course is for teachers who are candidates for advanced certification as designed by the National Board for Professional Teaching Standards (NBPTS). This course provides professional support and guidance for teachers during the academic year they are completing the components of the NBPTS process relating to differentiation of instruction and the written center exercises.

ED 845. MEETING DIVERSE LEARNING NEEDS**2-3 HRS.**

This course is designed to help teachers better respond to the increasingly diverse needs of all learners to achieve maximum success in the mixed-ability classroom. This course will help teachers address students' individual needs in standards-based instruction.

ED 846. NATIONAL BOARD CERTIFICATION SCHOOL BASED PROJECT II**3 HRS.**

This course is for teachers who are candidates for advanced certification as designed by the National Board for Professional Teaching Standards (NBPTS). This course provides professional support and guidance for teachers during the academic year they are completing the components of the NBPTS process relating to self-analysis of teaching and assessment data, and professional learning

ED 853. RESEARCH PROBLEMS IN EDUCATION**1-5 HRS.**

(Prerequisite, permission to enroll must be approved by the chair of the department.) Under individual direction, the student will select and pursue the investigation of special problems.

ED 855. THESIS, M.S.**1-6 HRS.**

(Prerequisite, permission to enroll must be approved by the chair of the department.) The thesis is designed for graduate students working toward the degree, Master of Science, and specializing in professional education.

ED 862. ADVANCED OBSERVATION AND PARTICIPATION (SECONDARY)**2-4 HRS.**

(Prerequisite, permission to enroll must be approved by the chair of the department.) Graduate students, under individual arrangements, will observe, teach, and do research work in a laboratory situation.

ED 865. ADVANCED THEORY AND PRACTICE IN TEACHING**3 HRS.**

A course uniting the research on instruction with practical applications by students. It is designed to provide educational leaders with data, information on trends, innovations, and solid teaching practices while focusing on the learner and the learning process.

ED 866. SUPERVISION OF STUDENT TEACHING**1-3 HRS.**

For cooperating teachers in public schools who supervise student teachers. Methods used in orientation, supervision and evaluation of student teachers at secondary school levels.

ED 872. HIGHER COGNITIVE QUESTIONING**2 HRS.**

This course is a mastery learning course designed to help teachers improve the quality of student responses to questions on analysis, synthesis and evaluation taxonomical levels. Specific questioning strategies are also presented.

ED 874. ROLE PLAYING IN THE CLASSROOM**2 HRS.**

This course is a mastery learning course designed to help teachers acquire the skill of facilitating role playing as a teaching strategy in the classroom.

ED 875. DISCUSSING CONTROVERSIAL ISSUES 2 HRS.

This course is a mastery learning course designed to help teachers develop moderator skills and techniques for improving student participant skills in discussing controversial issues at the secondary level.

ED 876. ORGANIZING INDEPENDENT LEARNING: INTERMEDIATE LEVEL 2 HRS.

This course is a mastery learning course designed to help teachers develop skills necessary to help a student learn independently. Focus is upon the learning contract.

ED 877. CLINICAL SUPERVISION OF STUDENT TEACHERS 1 HR.

Clinical supervision is a methodology which improves the skills and attitudes of preservice and in-service teachers. This course will apply the principles of clinical supervision to the supervision of student teachers.

ED 878. DIVERGENT THINKING 2 HRS.

This course is a mastery learning course designed to help teachers develop skills for facilitation of problem-solving through divergent-convergent techniques. Brainstorming, categorizing, setting of criteria and evaluation are covered.

ED 879. CLASSROOM MANAGEMENT THROUGH POSITIVE REINFORCEMENT 2 HRS.

This course is a mastery learning course designed to help teachers develop skills required to use positive classroom management techniques in the learning environment. Students will also respond to student behavior descriptions based upon what they have learned in the course. In addition, students will examine a variety of classroom management theories and will as a culminating project, develop an individual classroom management plan for their individual classrooms.

ED 880. CONTEMPORARY TEACHING & LEARNING STRATEGIES 3 HRS.

This course will examine classroom and instructional organization practices that promote effective teaching, student learning, and applications of that learning and student engagement. Students through the course will examine a variety of teaching structures, assessing their potential impact on learning and will develop a teaching and learning template applicable to their content areas and classroom management and teaching styles.

ED 881. STUDENT ACTIVITIES IN THE SECONDARY SCHOOL 3 HRS.

The organization, administration, growth and development of interschool activities in the secondary school. An overview of athletic, music, speech, and debate programs. The philosophy and purpose of the activities program and its governing standards. The role of sponsors, coaches, directors, and administrators working with student activities.

ED 884. DETERMINING EDUCATIONAL GOALS 3 HRS.

This course is a mastery learning course designed to develop competencies in the process of deriving curriculum and instructional objectives from an educational philosophy.

ED 885. COOPERATING TEACHER ACADEMY 2 HRS.

This is an elective course designed to prepare cooperating teachers to work effectively with student teachers. The course will improve teacher skills in assessing good teaching, recording data, conferencing with appropriate strategies, and remediation. After completing the course, cooperating teachers will be better prepared to supervise student teachers.

ED 886. DESIGNING INSTRUCTIONAL PROGRAMS 3 HRS.

Students will learn the design down method for curriculum writing. This involves creating a course with a course purpose and high achievement unit outcomes fulfilling state, national, or Common Core standards. Students will write measurable outcomes and create lesson plans from the outcome components. They will also align assessments to unit outcomes and critique alignment of curricula.

ED 887. DEVELOPING AUTHENTIC ASSESSMENTS 2-3 HRS.

This course focuses on authentic assessment as a means of equitable student evaluation. Students will differentiate assessment, evaluation, grading, and reporting. Approaches to assessment products, performances, processes, tests, and student self-reflection and self-evaluation are explored in this course. Through triangulation students will create a balanced assessment plan for one course they teach. Participants will create rubrics for one summative assessment and observation instruments for use in evaluating processes. Students may choose to create instructions for portfolio assessment.

ED 888. PRACTICUM/ACTION RESEARCH (MEd) 3 HRS.

(Master of Education in Teaching students only; taken during their last or second to last semester of coursework.) This course involves projects that are fulfilled in a school or business classroom setting focusing on aspects of teaching. Students will create a project, interview and shadow teachers, research instructional strategies and assessments, review and critique a curriculum, complete an action research project and reflect on their learning from the projects.

ED 889. SELF AND INTERPERSONAL COMMUNICATIONS 2 HRS.

This course is a mastery learning course designed to aid teachers in developing knowledge and skills of communications. Behaviors such as face-to-face communications, style of communication and group factors which effect communication are covered.

ED 890. TEACHING INTERNSHIP 12 HRS.

Only for those accepted in the Post Baccalaureate for Alternate Route Program and who are admitted into Phase II Student Teaching. ED890 Teaching Internship Participation, under supervision, in teaching at the secondary school level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment consists of full-time teaching for one semester or the equivalent. Specific assignment is made by the student teaching office.

ED 891. SUPERVISION OF INSTRUCTION 3 HRS.

This course is a mastery learning course designed to help educators improve the process of supervision. Competencies are developed using clinical supervision models.

ED 892. TEACHING/LEARNING MODELS 3 HRS.

This course is a mastery learning course designed to examine the classroom application of modern learning and teaching models. Primarily cognitive learning theories (i.e., information processing, social, etc.) and teaching models that utilize cognitive theories (i.e., Hunter, Gagne, etc.) will be examined.

ED 893. INTERNSHIP I 6 HRS.

This course is for Alternate Route Program students during their first year of teaching. This course involves evaluation of students in their first semester of teaching by both their mentor and university supervisors. Students participate in discussions and submit reflective journals on Blackboard in addition to attending seminars at ESU.

ED 894. INTERNSHIP II **6 HRS.**
This course is for Alternate Route Program students during their first year of teaching. This course involves evaluation of students in their second semester of teaching by both their mentor and university supervisors. Students participate in discussions and submit reflective journals on Blackboard in addition to attending seminars at ESU.

ED 895. PRACTICUM IN CURRICULUM & INSTRUCTION **1-3 HRS.**
The purpose of this course is to provide the opportunity to the candidate to develop and demonstrate their abilities as a teacher-leader in one or more areas to be selected in collaboration with the university advisor and the practicum field supervisor from among the following topics: leadership in curriculum development and assessment development, leadership in faculty development, site-based council management, leadership on school building leadership teams, etc. Student must complete majority of C&I program and secure advisor or department chair approval prior to practicum start date.

ED 898. PRACTICUM IN INSTRUCTIONAL LEADERSHIP **3 HRS.**
The Instructional Leadership practicum helps students who have completed core coursework for the Master of Education Degree to practice and demonstrate proficiency in skills learned in previously taken classes. While this degree program is designed to expand knowledge areas and skills with regard to academic and instructional processes, its purpose is especially focused on leadership.

ELEMENTARY EDUCATION

EE 311. ELEMENTARY PLANNING AND ASSESSMENT **1 HR.**
(Prerequisite, admission to Block 2.) This course details planning and assessment to meet Kansas state standards. Planning instruction includes instructional experiences that meet the needs of diverse learners.

EE 313. ELEMENTARY READING METHODS I **3 HRS.**
(Prerequisite, admission to Elementary Block 1.) This methods course in the teaching of elementary reading is designed to give an overall understanding of the complex nature and interaction of the cognitive, linguistic and social factors that influence the development process of reading, especially with more focus on the intermediate reader. Candidates will develop a deep understanding of the critical concepts and principles of their discipline and, by completion, will be able to use discipline-specific practices flexibly to advance the learning of K-6 students toward attainment of college and career readiness standards.

EE 314. ELEMENTARY SOCIAL STUDIES METHODS **3 HRS.**
(Prerequisite, admission to Elementary Block 1.) This course introduces the prospective elementary school teacher to methodology for teaching elementary social studies, by primarily focusing on the four disciplines emphasized in the Kansas State Department of Education Standards; history, geography, civics, and economics. Emphasis will be on examining resources and strategies for teaching these four discipline areas.

EE 315. ELEMENTARY ENGLISH LANGUAGE ARTS METHODS **3 HRS.**
(Prerequisite, admission to Elementary Block 2.) The course is designed for the prospective elementary teacher and covers methodology related to reading/writing, listening/speaking and representing/presenting skills. Theory and practice are linked when candidates apply the skills learned in class to lessons with students in the PDS K-6 classroom.

EE 316. ELEMENTARY SCIENCE METHODS **3 HRS.**
(Prerequisites, GB 303 and PS 115, and admission to Elementary Block 1.) The primary goal of this course is to assist preservice teachers in acquiring the knowledge and skills necessary to effectively teach elementary science. Elementary preservice teachers will achieve this goal through active classroom participation, which will include but is not limited to, classroom discussion, scientific investigation, and classroom simulations. A secondary goal of this course is to assist the elementary preservice teacher in their developing understanding of science content including the Kansas science standards. Learning experiences will provide preservice teachers with opportunities to explore physical, life, and earth sciences.

EE 317. ELEMENTARY MATHEMATICS METHODS **3 HRS.**
(Prerequisites, EL 350 and admission to Elementary Block 2.) This elementary mathematics methods course provides hands-on, real-life experiences to prepare teacher candidates to effectively plan, assess, and teach elementary mathematics. While teaching elementary children, they will use recommended instructional strategies, materials, and standards that develop conceptual mathematics understanding, and meet the diverse needs of elementary children.

EE 318. ELEMENTARY CLASSROOM MANAGEMENT **3 HRS.**
(Prerequisite, admission to Elementary Block 2.) An introduction for the preservice teacher to the various tasks of classroom management in diverse elementary school classrooms. The focus will be on promoting the learning and development of K-6 students by creating inclusive classroom communities, preventing management problems, utilizing appropriate interventions when necessary, and communicating effectively with parent and family members.

EE 320. OBSERVING LEARNING/TEACHING MODELS **3-5 HRS.**
(Prerequisite, admission to Elementary Block 2.) Designed to provide preservice elementary teachers the opportunity to observe various teaching models and practice their application in elementary classrooms. Additional seminars with the observation supervisor are required and include lecture, guest speakers, viewing video tapes, and discussions.

EE 375. ETHICS AND LAW IN ELEMENTARY CLASSROOM **1 HR.**
(Prerequisite: Admission to Elementary Block 1.) This course introduces prospective elementary school teachers to the Kansas Code of Conduct designed by the Kansas State Department of Education. Teacher candidates will learn about responsibilities to students, district and profession. Emphasis will focus on ethical behavior of teachers and laws they may encounter as an elementary teacher.

EE 413. ELEMENTARY READING METHODS 2 **3 HRS.**
(Prerequisite, EE 313, admission to Elementary Block 2.) This course is designed to extend the understanding of the teaching of reading started in EE 313. Special emphasis is placed on diagnostic assessment procedures and instructional strategies for children in grades K-6. Attention will be given to collecting and analyzing data to develop appropriate plans to meet a student's needs. Approaches, methods, materials, teaching aids, classroom organization, and grouping for reading instruction will be addressed. Multi-cultural aspects of various learners will also be a topic for the course.

EE 414. ELEMENTARY READING PRACTICUM **1 HR.**
(Prerequisite, EE 313, admission to Elementary Block 2.) This course is designed to provide clinical experiences through case studies of primary and intermediate learners in a practicum setting demonstrating the candidate's understanding of student learning and appropriate instructional needs. The candidate will apply assessment procedures learned in EE 313 and EE 413; EE 414 is offered concurrently with EE 413.

EE 431. PERFORMANCE ASSESSMENT FOR STUDENT TEACHING 0 HRS.

Students will successfully complete the Kansas Performance Teaching Portfolio (KPTP), a requirement for program completion. The KPTP is also a requirement for licensure in the state of Kansas.

ENGLISH**EG 001. BASIC WRITING 3 HRS.**

(For students whose placement tests or other information indicate a need for review of the basic principles of English composition. Credit earned may not be applied to the 124 hours needed for graduation.) A review of the basic elements of composition, with extensive guided practice in writing, revising, and editing.

EG 100. COMPOSITION WORKSHOP 1 HR.

Offers intensive, individualized instruction in writing beyond, or as a supplement to, regular English Composition offerings (EG 001, EG 101, EG 102). Working in a lab or workshop situation, the student will concentrate on solving particular writing problems: e.g., spelling, vocabulary development, basic grammar, paragraph development. EG 100 may not be used to fulfill Part I or Part II of the General Education Requirements. It may be repeated for a maximum of three credit hours.

EG 101. COMPOSITION I 3 HRS.

(Required of all First-year students, unless enrolled in EG 103, or exempted. Prerequisite, EG 001 or satisfactory ACT and/or writing diagnostic scores. Grade of C or better required for general education credit.) Emphasizes fundamental principles of written English and rhetorical modes available to the writer. The emphasis is on functional rhetoric. Students write essays that grow from their reading and their experiences in the context of issues pertinent to their immediate situation.

EG 102. COMPOSITION II 3 HRS.

(Required of all First-year students, unless enrolled in EG 104, or exempted. Prerequisite EG 101, or credit for EG 101 by examination. Grade of C or better for general education credit.) A continuation and development of EG 101. The topical/thematic orientation of the course permits the student both a broad study of writing problems and practical experiences with an in-depth study of a particular area in the range of their own interests. Problem solving approach is used.

EG 103. HONORS COMPOSITION I 3 HRS.

(Superior pre-college preparation in English.) Comparable in intent to EG 101 and specifically designed for students whose entrance scores suggest superior pre-college preparation in English.

EG 104. HONORS COMPOSITION II 3 HRS.

Comparable in intent to EG 102 and specifically designed for students who demonstrate superior performance in English Composition I or Honors Composition I.

EG 105. ENGLISH FOR THE TECHNICAL PROFESSIONS 3 OR 5 HRS.

(To be offered only at Flint Hills Technical College. Does not fulfill ESU general education requirements.) English for the Technical Professions is a variable-credit course, designed specifically for Flint Hills Technical College students who are pursuing a career in a technical field. The course emphasizes writing clear, coherent, and accurate texts for the technical workplace. Students who need extra help with basic writing skills will take two additional hours per week of intensive tutorial.

EG 206. INTRODUCTION TO FILM STUDIES 3 HRS.

This course is designed to introduce students to the study of film, which includes film history and the aesthetics of cinema. Topics of reading and discussion will include film history and criticism, film aesthetics and technology, and theories and ideologies about film. The class will view selected films, film clips, and cinema profiles, and will learn to write critically about film.

EG 207. LITERARY PERSPECTIVES 3 HRS.

(Prerequisites, EG 101 and EG 102.) Readings, analyses, and discussion of the major genres of literature. Short stories, poetry, and drama from various critical perspectives. A general education course.

EG 210. INTRODUCTION TO LITERARY STUDY 3 HRS.

(Prerequisite, EG 101.) An introduction to the critical background, knowledge, and tools necessary for reading, analyzing, and interpreting literature.

EG 220. EARLY WORLD LITERATURE 3 HRS.

(Prerequisite, EG 102 or EG 104.) A survey of world literature through the seventeenth century.

EG 221. LATER WORLD LITERATURE 3 HRS.

(Prerequisite, EG 102 or EG 104.) A survey of world literature from the eighteenth century to the present day.

EG 230. EARLY BRITISH LITERATURE 3 HRS.

(Prerequisite, EG 102 or EG 104.) A survey of the literature of Great Britain from the early Middle Ages through the eighteenth century.

EG 231. LATER BRITISH LITERATURE 3 HRS.

(Prerequisite, EG 102 or EG 104.) A survey of the literature of Great Britain from the beginning of the nineteenth century until the present.

EG 240. EARLY AMERICAN LITERATURE 3 HRS.

(Prerequisite, EG 102 or EG104.) A survey of the literature of the U.S. from the beginnings until 1865.

EG 241. LATER AMERICAN LITERATURE 3 HRS.

(Prerequisite, EG 102 or EG104.) A survey of the literature of the U.S. from 1865 until the present.

EG 280. INTRODUCTION TO CREATIVE WRITING 3 HRS.

(Prerequisite, EG 101 or concurrent enrollment.) A course designed to acquaint students with the fundamentals of writing as a craft, reading as writers, and the workshop format.

EG 301. ADVANCED COMPOSITION 3 HRS.

(Prerequisites, EG 101 and EG 102 or their equivalents.) Focus on advanced techniques and structures in the writing of expository and argumentative prose.

EG 305. TECHNICAL WRITING 3 HRS.

(Prerequisites, EG101 and EG102.) Focus on the special problems involved in writing for technical audiences and about technical subjects for non-specialists.

EG 310. LITERARY CRITICISM 3 HRS.

An introduction to a variety of critical approaches to literature that can be used to guide the reading of and writing about literary texts.

EG 338. SHAKESPEARE: TRAGEDIES AND COMEDIES 3 HRS.

A survey of Shakespeare's tragedies and comedies. The course may include studies of the sonnets and epic poems.

EG 339. SHAKESPEARE: HISTORIES AND ROMANCES 3 HRS.

A survey of Shakespeare's histories and romances. The course may include studies of the sonnets and epic poems.

EG 350. FOLKLORE 3 HRS.

(Prerequisites, completion of 24 credit hours of college coursework before enrollment in EG 350, including EG 101 and EG 102 or equivalents.) An introduction to the types and methods of collection and analysis of folklore.

EG 355. MYTHOLOGY 3 HRS.

(Prerequisites, completion of 24 credit hours of college coursework before enrollment in EG 355, including EG 101 and EG 102 or equivalents.) An investigation of the myths and belief systems of past and present civilizations and cultures.

EG 360. TOPICS IN LITERATURE BY WOMEN WRITERS 3 HRS.

(Prerequisites, completion of 24 credit hours of college coursework, including EG 101 and EG 102 or equivalents.) Focus on literature written by women and the role of woman as character and author.

EG 365. ETHNIC LITERATURES 3 HRS.

An introduction to ethnic literatures, typically emphasizing texts by U.S. writers.

EG 370. LANGUAGE AND GRAMMARS 3 HRS.

(Prerequisite, EG 102.) An investigation of the principles that characterize human language in general and the characteristics and conventions of the English language in particular.

EG 375. GRAMMAR FOR WRITERS 3 HRS.

(Prerequisites, EG102 or EG104.) A survey and review of traditional grammar and its application in writing standard edited American prose.

EG 383. FICTION WRITING 3 HRS.

(Prerequisite: EG 280) Through writing exercises, students in this course will learn to elements of fiction including characterization, narration, dialogue, and plot. They will produce original short fiction and flash fiction. Students should expect to read and discuss contemporary short fiction, to write prose exercises and their own original short stories, and to learn about and participate in work shopping.

EG 385. POETRY WRITING 3 HRS.

(Prerequisite, EG 280.) A course designed to strengthen student poetry and workshop skills, reinforcing understanding of particular genres through poetry assignments, poetry analysis, and workshops.

EG 390. TEACHING WRITING: ONE-ON-ONE CONFERENCING 1 HR.

(Prerequisites, EG 101 and EG 102. May be taken concurrently with EG 102 with the instructor's permission.) A practicum course designed to present and reinforce methods of teaching writing on a one-on-one basis. Course includes readings on writing and consulting theories. Students observe and then consult with peers in a supervised lab situation, applying skills and assessing students' progress.

EG 490. TEACHING ENGLISH IN THE MIDDLE-LEVEL AND SECONDARY SCHOOL 3 HRS.

(Required of all English majors preparing to teach in junior or senior high schools.) A course designed to train prospective English teachers to teach English language arts in grades 5-12 and to update experienced teachers in English methods.

EG 491. TECHNOLOGY IN THE ENGLISH AND JOURNALISM CLASSROOM 2 HRS.

Students will learn to use technology in the English and Journalism classroom, gain knowledge of and evaluate instructional technologies as they create multimedia presentations, use a variety of electronic resources, and understand the laws that govern technology. Students may not earn credit for both JO 491 and EG 491.

EG 501. TOPICS IN PROFESSIONAL WRITING 3 HRS.

Offers topics that provide instruction and guided practice in a specific area of professional writing. Specific course descriptions are available in the Department of English office before registration begins.

EG 510. STUDIES IN CRITICISM 3 HRS.

Studies in specific topics in the history and theory of criticism. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 515. STUDIES IN RHETORIC 3 HRS.

Studies in specific topics in the history and theory of rhetoric. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 520. STUDIES IN WORLD LITERATURE 3 HRS.

Studies in specific topics in world literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 530. STUDIES IN BRITISH LITERATURE 3 HRS.

Studies in specific topics in British literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 540. STUDIES IN AMERICAN LITERATURE 3 HRS.

Studies in specific topics in American literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available from the Department of English office before registration begins. May be repeated for credit with different topics.

EG 550. STUDIES IN FOLKLORE 3 HRS.

Studies in specific topics in folklore. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 555. STUDIES IN MYTHOLOGY 3 HRS.

Studies in specific topics in mythology. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 560. STUDIES IN WOMEN'S LITERATURE 3 HRS.

Intensive studies of major women writers or major themes and images of women in literature. The course may include such topics as women in drama, images of women in medieval literature, major women novelists, contemporary American women poets, and women in western American literature. May be repeated more than once with a change of subject matter.

EG 565. STUDIES IN ETHNIC LITERATURES 3 HRS.

Studies in specific topics in ethnic literatures. Topics addressed will vary from semester to semester; specific detailed descriptions are available from the Department of English Office before registration begins. May be repeated for credit with different topics.

EG 570. STUDIES IN LANGUAGE AND LINGUISTICS 3 HRS.
 Studies in specific topics in language and linguistics. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 575. HISTORY OF THE ENGLISH LANGUAGE 3 HRS.
 The course traces the development of the English language through Old, Middle, Early Modern, Mature Modern, and American English, examining the various stages of the language in the light of shifting patterns of linguistic, social, and cultural influence.

EG 583. ADVANCED FICTION WRITING 3 HRS.
 (Prerequisites, EG 383.) Designed to build upon basic story-crafting techniques covered in EG 383, this course surveys story and narrative techniques of literary movements such as Romanticism, Realism, and Modernism. Writers learn the history and tenets of several genres of short fiction, such as horror, love story, and magical realism, to see how techniques from those genres can inform their own contemporary fiction.

EG 585. ADVANCED POETRY WRITING 3 HRS.
 (Prerequisites, EG 280 and EG 385.) Helps develop individual poetry writing voice through in-depth study of poetics, writing and workshops.

EG 587. TOPICS IN CREATIVE WRITING 3 HRS.
 A seminar-format course devoted to one specific form of writing, such as scriptwriting for drama, scriptwriting for television, the personal essay, or genre writing. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 588. STUDIES IN CREATIVE WRITING 3 HRS.
 A multi-genre course that assumes students' commitment to writing and understanding of the workshop format. Often designed around a theme, the course is structured to help develop student writing toward professional quality. Specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 589. INTERNSHIP/FIELD STUDY IN CREATIVE WRITING 1-3 HRS.
 This course is designed to provide undergraduate creative writers, particularly students minoring in Creative Writing, with the opportunity for applied learning experiences, particularly internships, field studies, and professionalization activities in creative writing and literary arts. This course will engage students in writing and publishing opportunities in literary arts and community engagement. The course will align individual field studies and internships with larger questions of literary citizenship with a goal of helping all students to gain greater knowledge and skill for working within and advocating for the literary arts. The credit hours for the course will be determined by the instructor of the course as appropriate to the activities of the internship or field study.

EG 592. STUDIES IN YOUNG ADULT LITERATURE 3 HRS.
 An introduction to young adult literature, with a special emphasis on how to use it in the English/Language Arts classroom.

EG 594. STUDIES IN LITERARY GENRES 3 HRS.
 Studies in specific literary genres. Genres addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 596. STUDIES IN LITERARY TRADITIONS 1-3 HRS.
 Studies in specific topics in literary traditions. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 598. STUDIES IN MAJOR AUTHORS 3 HRS.
 Detailed study of a specific author. The author studied will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 680. UNDERGRADUATE SEMINAR IN CREATIVE WRITING 3 HRS.
 (Prerequisite, EG 580 or EG 585.) As the most advanced undergraduate writing curriculum at Emporia State, this course challenges writers to expand their knowledge and writing styles by compiling and revising the work they have generated in previous creative writing classes into publishable quality. The course provides students with directed readings in material relevant to their writing projects. Students revise and edit work for a final portfolio which is applicable for use in applying to M.A. or M.F.A. programs, and which students can also use to assess their own progress and learning in creative writing.

EG 710. SEMINAR IN CRITICISM 3 HRS.
 (Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in literary criticism and theory. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 715. SEMINAR IN RHETORIC 3 HRS.
 (Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in rhetoric and composition. Topics addressed will vary from semester to semester, including such topics as History of Rhetoric, Modern Rhetoric, Classical Rhetoric, and Introduction to Composition Studies. May be repeated for credit with different topics.

EG 720. SEMINAR IN WORLD LITERATURE 3 HRS.
 (Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in world literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 730. SEMINAR IN BRITISH LITERATURE 3 HRS.
 (Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in British literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 740. SEMINAR IN AMERICAN LITERATURE 3 HRS.
 (Prerequisite, graduate standing or permission of the instructor.) Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 750. SEMINAR IN FOLKLORE 3 HRS.
 (Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in folklore. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 755. SEMINAR IN MYTHOLOGY 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in mythology. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 760. SEMINAR IN WOMEN'S LITERATURE 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in women's literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 765. SEMINAR IN ETHNIC LITERATURES 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in ethnic literatures. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 770. SEMINAR IN LANGUAGE AND LINGUISTICS 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in language and linguistics. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 780. GRADUATE SEMINAR IN CREATIVE WRITING 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) A workshop for advanced students interested in writing fiction, poetry, or both. Topics the class will investigate will be determined by the interest and needs of the students who comprise the workshop. Additional emphasis will be on the problems of teaching creative writing.

EG 783. ADVANCED FICTION WRITING 3 HRS.

Designed to provide graduate creative writers with historical context for literary movements and genres, this course surveys story and narrative techniques of literary movements such as Romanticism, Realism, and Modernism. Writers learn the history and tenets of several genres of short fiction, such as horror, love story, and magical realism, to see how techniques from those genres can inform their own contemporary fiction.

EG 785. ADVANCED POETRY WRITING 3 HRS.

Designed to build upon basic poetry writing techniques covered in EG 385, but fit for anyone who wants to advance their poetic craft, this course surveys poetry and poetry writing modes, such as narrative, lyric, confessional, and meditative modes. Writers learn the modes of poetry writing to see how these approaches can inform their own creative work. Writers create, revise, and compile into a portfolio several of their own original poems. Poems are critiqued in open class workshops and by the instructor. Texts include an instructional and inspirational text with writing exercises, poetry theory handouts, and readers of modern and contemporary poetry.

EG 787. TOPICS IN CREATIVE WRITING 3 HRS.

This three-credit-hour workshop-oriented class will focus on the craft and process of playwriting from a play's initial draft to its advanced revision and performance. Likewise, for screenwriting, the class will focus on the craft and process from the screenplay's initial draft to its eventual pitch or filming. Students will write short stage and screen plays. Class readings will be used to demonstrate classical and modern

forms, current writing styles, and issues relating to form and aesthetic. Class time will be spent discussing craft, analyzing the assigned readings, and critiquing student writing. Time permitting, the class will also conduct script-in-hand productions of selected class stage plays.

EG 788. STUDIES IN CREATIVE WRITING 3 HRS.

This course is designed to provide graduate creative writers with directed studies in particular aspects of creative writing and literary publishing.

EG 789. INTERNSHIP/FIELD STUDY IN CREATIVE WRITING 1-3 HRS.

This variable credit course is designed to provide graduate creative writers with academic supervision and rigor for applied learning experiences, particularly internships, field studies, and professionalization activities in creative writing and literary arts. Students undertake individual field studies and internships while learning about literary citizenship, with a goal of helping all students to gain greater knowledge and skill for working within and advocating for the literary arts. The credit hours for the course will be determined by the instructor of the course as appropriate to the activities of the internship or field study.

EG 790. TEACHING COLLEGE COMPOSITION 3 HRS.

(Prerequisite, graduate standing) This course provides an introduction to teaching composition at the college level, including an overview of current theoretical approaches to teaching writing, with special attention to ESL and multicultural issues. Instruction will include designing and sequencing writing assignments, creating grading rubrics and other assessment strategies, as well as practical advice for managing day-to-day classroom issues, like how to conduct group work. will include attention to how first-year composition courses contribute to the overall goals for General Education, especially in terms of writing skills.

EG 792. SEMINAR IN YOUNG ADULT LITERATURE 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in young adult literature. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 794. SEMINAR IN LITERARY GENRES 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in specific literary genres. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 796. SEMINAR IN LITERARY TRADITIONS 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Studies in specific topics in specific literary traditions. Topics addressed will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 798. SEMINAR IN MAJOR AUTHORS 3 HRS.

(Prerequisite, graduate standing or permission of the instructor.) Detailed study of a major author. The author studied will vary from semester to semester; specific detailed descriptions are available in the Department of English office before registration begins. May be repeated for credit with different topics.

EG 810. INTRODUCTION TO GRADUATE STUDIES 3 HRS.

A seminar providing graduate students with the tools and background necessary to undertake scholarly research in English.

EG 890. MASTER'S SEMINAR IN ENGLISH 3 HRS.
Specialized topics in language and literature that vary from offering to offering. Specific course offerings and descriptions are available in the Department of English office before registration begins.

EG 895. TEACHING PRACTICUM 3 HRS.
This course is designed to provide graduate teaching assistants with the fundamentals necessary to teach Composition I and II in the composition program at Emporia State University. The course will provide students with both theory and practical applications in the effective teaching of writing. Students will be expected to work collaboratively, as well as individually, to produce detailed teaching plans prior to classroom implementation.

EG 899. THESIS, M.A. 1-6 HRS.
(Required for the M.A. degree in English.) Independent study and research in an approved subject. Frequent conferences with the directing professor.

ELEMENTARY

EL 072. IMPROVEMENT IN READING SKILLS 2 HRS.
Consists of individual practice in reading laboratory. Reading survey and diagnostic tests are administered. Emphasis is placed upon increasing depth and rate of comprehension, expanding vocabulary, and developing study techniques. Selected readings, mechanical pacers, and students' textbooks are used.

EL 100. SPECIAL TOPICS IN READING 1 HR.
Offers intensive individualized instruction in reading beyond, or in conjunction with, regular course work. Working in a lab situation, the student will have the opportunity to improve skills in particular areas of reading, e.g., speed reading, study skills, vocabulary development, comprehension improvement, critical reading, etc.

EL 150. INTRODUCTION TO THE ELEMENTARY EDUCATION MAJOR 1 HR.
The main objective of this seminar is to introduce students to the Elementary Education major at Emporia State University. It will familiarize and orient students to the program, expectations, and career options in the field of education. This is a one-credit hour course.

EL 220. INTRODUCTION TO TEACHING 2 HRS.
(Prerequisite, sophomore standing.) A survey of education from colonial times to the present including the history and philosophy of education. This course includes an analysis of the role of the local, state, and federal government in educational policy; an examination of the social forces that influence schools; ethical and legal issues involving the educational process; and multicultural/diversity issues in American education. There is a required field experience in the public or private schools.

EL 230. CHILDREN'S LITERATURE 3 HRS.
This course introduces students to a wide range of literature for children. Course topics include selecting appropriate literature to meet the diverse cultural, interest and learning needs of all children. Strategies are included for integrating literature into instruction in the K-6 classroom.

EL 250. INTRODUCTION TO ELEMENTARY EDUCATION MAJOR 2 1 HR.
The main objective of this seminar is to continue to connect students to the major, and introduce them to Hornet Connected Learning. This is a one-credit hour course.

EL 310. ADAPTING CURRICULUM FOR DIVERSE LEARNERS 2 HRS.
An overview of issues which affect curriculum planning and developmentally appropriate interactions with students, parents and support personnel. Provides opportunities for students to examine their personal cultural background and the potential effects of their culture on teaching behaviors and decisions. The course also introduces the laws governing education of children with special needs and the role of the classroom teacher in implementing recommended practices.

EL 312. INTEGRATING ELEMENTARY ENGLISH LANGUAGE ARTS 3 HRS.
(Prerequisite, EL 230.) This course introduces candidates to the theoretical aspects of reading and writing. It provides experiences with methods and strategies of integrating reading and writing activities across the elementary curriculum, especially for the emergent and beginning learner. Candidates are expected to demonstrate proficiency with language arts skills and develop technology experiences to enrich their literacy learning.

EL 319. LITERACY IN THE MULTICULTURAL CLASSROOM 1 HR.
This course focuses on the literacy development, research, and effective teaching practices that support emerging bilinguals (EBs) becoming literate in the elementary schools as well as how to effectively and equitably teach diverse populations.

EL 343. SPECIAL STUDIES IN ELEMENTARY EDUCATION 0-3 HRS.
(Prerequisite, consent of instructor.) This course offers an in-depth study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed.

EL 344. SPECIAL STUDIES IN ELEMENTARY EDUCATION 0-3 HRS.
(Prerequisite, consent of instructor.) To provide in-depth study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed. This course is offered only by pass/no credit.

EL 350. MATHEMATICAL APPLICATIONS FOR THE ELEMENTARY CLASSROOM 4 HRS.
(Prerequisite: must have a grade of 'C' or higher in College Algebra). This course provides experiences to prepare teacher candidates to effectively teach elementary mathematics. Students will learn and apply the Kansas Math Content Standards as well as best practice strategies to teach these topics in elementary mathematics classrooms.

EL 353. PROFESSIONAL PORTFOLIO IN TEACHER EDUCATION 1 HR.
(Prerequisite, consent of instructor.) Students are expected to show involvement in their own learning and self-assessment by gathering, reflecting upon and organizing their work throughout their teacher preparation courses. The portfolio provides the student and prospective employers a broad and deep picture of what the student can do and their philosophical approach to teaching.

EL 416. INTEGRATING LITERACY STRATEGIES**ACROSS THE SECONDARY CONTENT 2 HRS.**

This course addresses the need for literacy instruction at the middle and secondary levels designed to help adolescents become more skillful with reading, writing, speaking, listening, viewing, and performing in all content areas. Prospective teachers will gain knowledge about useful techniques and effective strategies for teaching students how to understand content materials; the process of reading to learn; the comprehension and vocabulary demands of subject-matter classrooms; definition of text and textbook evaluation; informal and formal assessment; evaluation of the students' reading skills; the accommodation of individual differences; integrating literacy standards into their specific content disciplines; and planning effective strategic lessons.

EL 451. INDEPENDENT STUDY IN EDUCATION 1-3 HRS.

(Prerequisite, consent of the chair of the department.) Students will carry out individual projects under the guidance of selected staff members.

EL 464. STUDENT TEACHING, ELEMENTARY 6 HRS.

(Prerequisites, SD 550, EE 313, 314, 315, 316, 317, 318 and EE 320. Admission to teacher education. Senior standing.) Participation, under supervision, in teaching at the elementary school level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment to consist of full-time teaching for one half of a semester or the equivalent.

EL 466. STUDENT TEACHING, ELEMENTARY 12 HRS.

(Prerequisites, SD 550, EE 313, 314, 315, 316, 317 318 and 320. Admission to teacher education. Senior standing.) Participation, under supervision, in teaching at the elementary school level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment to consist of full-time teaching for one full semester or the equivalent.

EL 516. READING LAB PRACTICUM 2-3 HRS.

(Prerequisite, EE 313 for elementary majors.) A course designed for elementary education majors who desire additional training and help in assisting individuals with various reading needs. Under supervision and direct instruction, the student would work on a regular basis in the University Reading Lab or the Flint Hills Technical College Learning Center.

EL 535. CULTURAL AWARENESS FOR EDUCATORS 3 HRS.

(Prerequisite, junior standing.) This course is designed to prepare students to effectively educate culturally, ethnically, racially different and differently abled students. Major components are: to explore personal biases and methods of overcoming them; explore the basic principles underlying multicultural education and to develop appropriate teaching strategies, activities and materials; to adapt and evaluate curricula for use in culturally diverse, as well as homogenous, classrooms.

EL 716. ASSESSMENT TRAINING FOR READING RECOVERY**1 HR.**

(Prerequisite, acceptance into the Reading Recovery Program.) Participants in this course will learn to administer, interpret, and apply procedures for assessment and instruction as specified in the Reading Recovery Program.

EL 717. READING RECOVERY TEACHER TRAINING I**4 HRS.**

Participants in this course will learn to interpret and apply procedures for instruction as specified in the reading Recovery Program which is an early intervention designed to help young children who are having

difficulty learning to read and write. Participants learn to administer, interpret, and apply procedures for assessment and instruction as specified in Reading Recovery. Participants enrolled in this course will simultaneously teach four children daily in Reading recovery lessons for the purpose of developing an in-depth understanding of the program and the concept of accelerated progress. Participants will be prepared to implement the program within their school or district. Class sessions will involve the use of a one-way glass for demonstration teaching and observation. Enrollment is limited to those teachers who have been accepted for training by the Jones Institute for Educational Excellence at Emporia State University.

EL 718. READING RECOVERY TEACHER TRAINING II**3 HRS.**

(Prerequisites, acceptance into the Reading Recovery Program and successful completion of EL 717.) Participants in this course will extend and enhance procedures for assessment and instruction as specified in the Reading Recovery Program.

EL 721. READING THEORY AND LITERACY PRACTICES: ELEMENTARY**3 HRS.**

Emphasis is placed on the teaching of reading and its relationship to the language arts (reading, writing, speaking, listening, and viewing). The content includes an overview of theories and learning models that have influenced the teaching of reading. Discussions will focus on the importance of a literacy-rich environment both in the classroom and home. Prominent research in reading education will be reviewed and applied to the student's own learning situation.

EL 723. READING THEORY AND LITERACY PRACTICES: SECONDARY**3 HRS.**

This course is designed to help middle/secondary school teachers view reading as an integrated part of the school curriculum. Issues to be explored include elements of reading/learning styles, techniques for teaching vocabulary, comprehension, study skills, special approaches for adapting instruction to all types of learners, motivation for lifelong reading and learning, and technology/reading. Emphasis is on reading (and writing) as an interactive and developmental process.

EL 725. DIFFERENTIATING INSTRUCTION 2 HRS.

The term differentiation is currently used in the educational world to describe implementation of instruction that encompasses diverse learners. The content of this course focuses on diversity under a broader term - differentiating instruction. This better describes the personalization of a student's instruction and the content of the course.

EL 726. ELEMENTARY ENGINEERING AND ROBOTICS**3 HRS.**

This on-line course engages students in sequential scientific discussion activities that will increase your competence in (1) problem-solving process skills in engineering and robotics and (2) planning, teaching, and evaluating the effectiveness of science lessons for children in the elementary school setting. The course is designed on a competency-based, mastery model. Throughout the course, students practice using logic, cognitive processing skills, and strategies from recently developed activity based K-8 science curricula including strategies for enriching a more conventional, textbook-oriented curriculum.

EL 740. STEM CONCEPTS THROUGH FICTION AND NONFICTION**3 HRS.**

An exploration of children's literature, fiction and nonfiction, with a focus on ways both print and digital texts can be used to create interest in and to teach STEM concepts. Course content is appropriate for K-12 educators, including classroom teachers, library media specialists, support teachers, as well as public librarians who focus on youth services.

EL 742. ADVANCED RESEARCH AND DEVELOPMENT**3 HRS.**

This course is designed to develop the educators' knowledge and skills in appropriate research techniques with the participants developing an independent study project that will be implemented in the fall and spring semesters. Students will produce a research proposal and then complete a final paper that reports the outcome of the proposed research activity.

EL 743. SPECIAL STUDIES IN EDUCATION**1-3 HRS.**

(Prerequisite, consent of instructor.) To provide in-depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction, evaluation of curriculum. Topics will vary from semester to semester.

EL 744. SPECIAL WORKSHOPS IN EDUCATION**1-2 HRS.**

To provide in depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction, evaluation of curriculum. Topics will vary from semester to semester. This course is offered only by pass/no credit.

EL 745. GRADUATE ASSISTANT TRAINING**1 HR.**

This course is mandatory for any newly appointed GTA/GA in the department. The student will work directly with the instructor to become fully informed about the scope of the position held. In addition, special emphasis will be placed on instructional strategies as appropriate for the position. Students will be expected to meet with the instructor and prepare assignments for a minimum of 15 hours during the first eight weeks of the semester.

EL 750. CLASSROOM MANAGEMENT, STUDENT MOTIVATION AND DISCIPLINE**2 HRS.**

This course is designed for both the practicing and pre-service teacher. It studies the problems related to classroom management, student motivation and discipline. Procedures and practices for managing school classrooms are reviewed with attention given to appropriate classroom teaching methodology and needs of the student. Some individualization of instruction will be offered to the students as they establish their personal plan for classroom and student management.

EL 751. APPLICATION OF DEVELOPMENT THEORIES**3 HRS.**

This course is for students who are practitioners in any educational setting from pre-K through secondary school. Course covers the main theories currently used as the foundation for quality education, pre-K through late adolescence and young adults. Effective practitioners can articulate the theoretical bases for teaching goals and strategies.

EL 784. TRENDS IN ELEMENTARY STEM EDUCATION**3 HRS.**

This course is designed to develop the educators' knowledge and skills in appropriate research techniques and topics in elementary STEM education. Students will develop a research project that will be implemented in their school/classroom. Students will produce a research proposal and then complete a final paper that reports the outcome of the research.

EL 801. BEST PRACTICES IN ELEMENTARY LANGUAGE ARTS**3 HRS.**

The skills, understandings, and values developed through the teaching of oral and written communication in the elementary school. Tools for communication and self-expression included in spelling, manuscript, and cursive writing, grammar, listening, speaking vocabulary, and creative expression will be reviewed.

EL 802. BEST PRACTICES IN ELEMENTARY MATHEMATICS**3 HRS.**

This course is designed to develop prospective and in-service elementary teachers' knowledge and skill in teaching mathematics. Course focus will include relevant research and standards, applicable to the effective teaching of mathematics content to elementary school students. Concepts and material developed in the class will be related to actual classroom situations.

EL 803. BEST PRACTICES IN ELEMENTARY SCIENCE**3 HRS.**

This course is designed to develop prospective and in-service elementary teachers' knowledge and skills in teaching problem solving and inquiry based science. Course focus will include relevant research and standards, including STEM integration, to the effective teaching of elementary science content. Concepts and material developed in the class will be related to actual classroom situations.

EL 804. BEST PRACTICES IN ELEMENTARY SOCIAL STUDIES**3 HRS.**

Designed to assist prospective and in-service teachers in understanding procedures for teaching social studies, content and materials appropriate for social studies at the various levels, and present influences and trends affecting the teaching of elementary social studies. Concepts and material developed in the class will be related to actual classroom situations.

EL 807. INTEGRATING READING IN THE CONTENT AREAS**2 HRS.**

This course will be an elective for students in the master teacher programs. The course will promote how reading cueing systems directly impact content area comprehension (mathematics, science, and social studies) and provide a systematic approach for using reading cueing systems to teach these content areas effectively to elementary students. Students in the master teacher programs will complete the course which will able them to promote content area comprehension in their own classrooms and schools.

EL 809. SUPPORTING TECHNOLOGY INTEGRATION FOR SCHOOL LEADERS**3 HRS.**

This course is designed to prepare school leaders (teachers, instructional coaches, administrators, etc.) for the integration and application of diverse educational technologies into classrooms and schools in ways that reflect a theoretical, research based, and practical understanding of curriculum development and the effective uses of technology. Course content explores practical ways to integrate technology into both teaching and learning and the critical importance of adequate training and professional development for successful integration.

EL 810. INFORMATION LITERACY**3 HRS.**

This course focuses on the process of becoming web literate or finding, understanding, and using information from the web. A foundation will be built from what we know about reading, learning, and effective teaching practices with print text in order to understand the benefits and challenges of reading on the web. Course projects will encourage participants to actively use models of inquiry with the web to pursue answers to their own questions and learn ways to guide students through the online inquiry process.

EL 812. READING FOR INDIVIDUALS WITH SPECIAL NEEDS**3 HRS.**

This course is designed to provide the special educator with a background in reading theories, assessment and diagnostic teaching procedures for primary through secondary students. The course will address the student, the context and the text.

EL 815. FOUNDATIONS OF CURRICULUM**DEVELOPMENT, K-12 3 HRS.**

Investigation of acceptable curriculum practices and patterns in the modern elementary and secondary schools. Designed to assist experienced school personnel in obtaining an understanding of historic perspectives and present influences, issues, and trends affecting curriculum in the schools of today with a view toward implementing programs of improvement in their own school situations.

EL 819. PRACTICUM EXPERIENCE: MASTER OF SCIENCE ELEMENTARY EDUCATION**1-2 HRS.**

A practicum is a practical course of study. This practicum course is designed to provide an opportunity for the Candidate to integrate and demonstrate skills acquired in method's coursework. The Candidate will have opportunities to self-monitor personal teaching and classroom roles and responsibilities (including daily observation/participation, planning and teaching of lessons).

EL 821. CURRICULUM AND STANDARDS IN THE LITERACY ENVIRONMENT**1 HR.**

Teachers of reading must be familiar with current theory, research and exemplary practices in the field of reading. This course explores current issues related to reading curriculum planning with an emphasis on strategies and techniques for instruction. Students will plan instructional strategies and reflect on their own reading curriculum.

EL 823. ANALYSIS OF READING ASSESSMENT AND INSTRUCTION I**3 HRS.**

(Prerequisites, EL 721) This course is designed to provide the reading specialist or classroom teacher with the knowledge, skills and processes necessary to assess, analyze and instruct the reading performance of beginning readers (pre-reader through 3rd grade level.)

EL 825. ANALYSIS OF READING ASSESSMENT AND INSTRUCTION II**3 HRS.**

(Prerequisites, EL 723 and EL 823.) This course is designed to provide the reading specialist or classroom teacher with the knowledge, skills and processes necessary to assess, analyze and instruct the reading performance of intermediate and advanced level readers (4th-12th grade levels).

EL 827. ASSESSING AND INSTRUCTING LEARNERS 3 HRS.

Students are required to apply the knowledge and skills gained from EL 823 and EL 825 to work with a disabled reader. The student will be expected to gather background information, test to determine strengths and needs, plan objectives and materials, tutor for a minimum of 20 hours, and write a diagnostic/prescriptive summary upon the completion of the tutoring sessions. The total number of documented hours, including assessment time, must be 30 hours. The course instructor will serve as the supervisor. Upon completion of the course, the materials will be turned into the course instructor for review.

EL 828. INSTRUCTIONAL LEADERSHIP AND COACHING**2 HRS.**

This course focuses on the theory and instruction of leadership and coaching across all disciplines. Course activities and assignments will allow students to broadly view effective roles of the coach/leader in the schools and apply the content to a specific subject area (literacy, math, STEM, etc.). This course is a prerequisite for EL829, Literacy and Coaching Practicum.

EL 829. LEADERSHIP/COACHING PRACTICUM**1 HR.**

(Prerequisite: EL 828) Each student will participate in a practical experience related to professional leadership and coaching roles in the selected field of study. The course serves as a capstone for the instructional specialist degree.

EL 833. FOUNDATIONS OF EDUCATION 3 HRS.

A study of the philosophical, historical, and social foundations of American education with special attention to the interaction of school and culture. The student will be challenged to investigate the values of contemporary society, to review the historical and cultural antecedents of modern education, and to examine their own relationships to the institution of education and to the role and function of the teacher.

EL 842. NATIONAL BOARD CERTIFICATION PORTFOLIO DEVELOPMENT**3 HRS.**

This course is designed to provide teachers with the basic requirements for portfolio development as designed by the National Board for Teaching Standards (NBPTS). Students will have an opportunity to review and study the current portfolio manuals and standards document in their respective disciplines/developmental levels, and examine other relevant publications from the NBPTS. Students will also receive guidance and consultation that will be helpful in gathering and organizing the supportive professional documentation required for the NBPTS assessment procedures.

EL 843. NATIONAL BOARD CERTIFICATION SCHOOL BASED PROJECT**6 HRS.**

(Prerequisite, ED/EL 842.) This course is for teachers who are candidates for advanced certification as designed by the National Board for Professional Teaching Standards (NBPTS). Provides professional support and guidance for teachers during the academic year they are completing the two components of the NBPTS assessment process--the school-site portfolio, and the written assessment center exercises.

EL 853. RESEARCH PROBLEMS IN EDUCATION 1-6 HRS.

(Prerequisite, permission to enroll must be approved by the chair of the department.) Under individual direction, the student will select and pursue the investigation of special problems.

EL 854. ACTION RESEARCH IN THE CLASSROOM 2 HRS.

(Prerequisite, consent of advisor.) This course is designed to develop the educators' knowledge and skills in appropriate action research techniques with the participants developing an action research project that will be implemented in their school/classroom. Students will produce a research proposal and then complete a final paper that reports the outcome of the proposed research activity.

EL 855. THESIS, M.S.**1-6 HRS.**

(Prerequisite, permission to enroll must be approved by the chair of the department.) The thesis is designed for graduate students working toward the degree, Master of Science, and specializing in professional education.

EL 860. PDS MENTOR TRAINING**1 HR.**

Provide the training for PDS mentors on the web.

EL 861. ADVANCED OBSERVATION AND PARTICIPATION (ELEMENTARY)**2-4 HRS.**

(Prerequisite, permission to enroll must be approved by the chair of the department.) Graduate students, under individual arrangements, will observe, teach, and do research work in a laboratory situation.

EL 865. ADVANCED THEORY AND PRACTICE IN TEACHING**3 HRS.**

A course uniting the research on instruction with practical applications by students. It is designed to provide educational leaders with data, information on trends, innovations, and solid teaching practices while focusing on the learner and the learning process.

EL 866. SUPERVISION OF STUDENT TEACHING 1-3 HRS.

For cooperating teachers in public schools who supervise student teachers. Methods used in orientation, supervision and evaluation of student teachers at elementary school levels.

EL 875. CLINICAL EXPERIENCE: MASTER OF SCIENCE ELEMENTARY EDUCATION 4 HRS.

A clinical experience is designed to create a shadowing/residency type setting for Candidates. This course is designed to provide an opportunity for the Candidate to integrate and demonstrate professional teaching skills. The Candidate will have opportunities to self-monitor personal teaching and classroom roles and responsibilities (including daily teaching routines, planning and teaching of lessons, classroom management, and meeting the needs of all learners in a PK-6 classroom setting).

EL 877. CLINICAL SUPERVISION OF STUDENT TEACHERS 1 HR.

Clinical supervision is a methodology which improves the skills and attitudes of preservice and inservice teachers. This course will apply the principles of clinical supervision to the supervision of student teachers.

EL 879. CLASSROOM MANAGEMENT THROUGH POSITIVE REINFORCEMENT 2 HRS.

This course is a mastery learning course designed to help teachers develop skills required to use positive reinforcement in the learning environment.

EL 880. CLINICAL TEACHING AND SUPERVISION 3 HRS.

This course is intended for teachers and teacher educators who work with student teachers, serve as peer coaches, or serve as mentors for new teachers. Learners will analyze strategies for assessment of student learning, effective instruction, and classroom management and identify these strategies in their own professional practice. Using these strategies, learners will apply principles for effective supervision of instruction to specific instructional situations.

EL 885. COOPERATING TEACHER ACADEMY 2 HRS.

This is an elective course designed to prepare cooperating teachers to work effectively with student teachers. The course will improve teacher skills in assessing good teaching, recording data, conferencing with appropriate strategies, and remediation. After completing the course, cooperating teachers will be better prepared to supervise student teachers.

EL 886. DESIGNING INSTRUCTIONAL PROGRAMS 3 HRS.

This course is a mastery learning course designed to develop competencies in materials construction that facilitates individualized, criterion referenced instruction.

EL 887. DEVELOPING AUTHENTIC ASSESSMENTS 3 HRS.

This course focuses on authentic assessment as a means of equitable student evaluation. Students will differentiate assessment, evaluation, grading, and reporting. Approaches to assessment products, performances, processes, tests, and student self-reflection and self-evaluation are explored in this course. Through triangulation students will create a balanced assessment plan for one course they teach. Participants will create rubrics for one summative assessment and observation instruments for use in evaluating processes. Students may choose to create instructions for portfolio assessment.

EL 892. TEACHING/LEARNING MODELS 3 HRS.

This course will provide educators the opportunity to examine and apply research-based instructional strategies that positively affect student learning and achievement.

EL 915. ADVANCED ASSESSMENT TRAINING 1 HR.

(Prerequisite, acceptance into the Reading Recovery Teacher Leader Program.) This course is designed for reading recovery teacher leaders and is the initial reading recovery course. This course will prepare the teacher leaders-in-training in the administration, scoring, and interpretation of An Observation Survey of Early Literacy Achievement.

EL 916. OBSERVING AND RESPONDING TO YOUNG READERS 4 HRS.

(Prerequisite, acceptance into the Reading Recovery Teacher Leader Program.) Participants in this course will develop expertise in teaching reading recovery children, training reading recovery teachers, and will also develop an understanding of the theoretical base of reading recovery.

EL 917. OBSERVING AND RESPONDING TO YOUNG READERS, ADVANCED 3 HRS.

(Prerequisite, successful completion of EL 916.) Participants in this class will extend and enhance professional skills in teaching children in the reading recovery program.

EL 918. RESEARCH AND THEORETICAL FOUNDATION OF LITERACY 3 HRS.

(Prerequisite, acceptance into the Reading Recovery Teacher Leader Program.) This course is intended for reading recovery teacher leaders-in-training. There are two major strands throughout this course, (1) literacy acquisition for all children, and (2) issues related to children with reading difficulties.

EL 919. RESEARCH AND THEORETICAL FOUNDATIONS, ADVANCED 3 HRS.

(Prerequisite, successful completion of EL 918.) This course is intended for reading recovery teacher leaders-in-training. The two major strands for this course are, (1) reading and writing process, and (2) reading difficulties. These two strands run concurrently and continually relate the theories and research to practice.

EL 920. LEADERSHIP AND IMPLEMENTATION 3 HRS.

(Prerequisite, acceptance into the Reading Recovery Teacher Leader Program.) Participants in this course will become aware of relevant reading recovery issues in program implementation and how to successfully create positive skills while teaching adults and working with administrators, parents, classroom teachers, and other school personnel.

EL 921. ADVANCED LEADERSHIP AND IMPLEMENTATION 4 HRS.

(Prerequisite, successful completion of EL 920.) Participants in this course will construct an understanding of the complex role of teacher leaders as they teach children and participate in the training of reading recovery teachers in the field.

EL 925. READING RESEARCH STUDIES 3 HRS.

(Prerequisite, EL 827 or its equivalent.) An exploration of major sources reporting reading research. Major research studies in the field are discussed and interpreted. Time is also spent on developing the skills necessary for conducting reading research.

EL 927. ADVANCED PRACTICUM IN READING 4 HRS.

(Prerequisite, EL 827 or its equivalent.) This course is designed to give graduate students training to be reading specialists an opportunity to apply their knowledge of diagnostic and remedial techniques in a group setting. Students will test, tutor, develop case studies and lesson plans for a group of at least three children. A total of thirty clock hours will be spent working with the children.

EDUCATIONAL RESEARCH**ER 752. ANALYSIS OF RESEARCH 3 HRS.**

An introductory graduate level course in research methodology designed to allow the student to function as a knowledgeable and critical consumer of scholarly research in their field of endeavor.

ER 753. RESEARCH IN EDUCATION 3 HRS.
This is an introductory graduate level course in research methodology designed to allow the student to function as a knowledgeable and critical consumer of scholarly research in their field of endeavor. The course will also emphasize the use of action research for program improvement.

ER 810. STATISTICS AND METHODOLOGY 1 HR.
The purpose of this course is to strengthen the relevant skills needed to be successful in a graduate statistics course. The course is offered online only within a self-paced format. Course content is devoted to basic descriptive statistics, inferential statistics at an introductory level, and a brief overview of experimental methodology.

ER 851. RESEARCH DESIGN AND WRITING 3 HRS.
Develop competencies in designing research proposals and writing of research work. Introduction to theoretical concepts and research. Investigate, evaluate and discuss various types of research studies and designs. A study of variables related to research problems and hypotheses. Development of first three chapters of thesis or research problem.

ER 857. STATISTICS METHODS FOR EDUCATION AND PSYCHOLOGY, II 3 HRS.
(Prerequisite, an introductory course in applied statistics.) An intermediate level course in applied statistics. The major statistical methods studied are regression, independent analysis of variance (ANOVA), repeated ANOVA, analysis of covariance (ANCOVA), mixed design ANOVA, as well as introduction to formal research design.

EARTH SCIENCE

ES 110. INTRODUCTION TO EARTH SCIENCE 4 HRS.
(Corequisite, ES 111.) This course may be used for general education requirements and also serve as the first course for those majoring or pursuing a teaching field in earth science. An introduction to the earth sciences through combined lecture and laboratory experiences in the areas of astronomy, geology, meteorology, and oceanography.

ES 111. INTRODUCTION TO EARTH SCIENCE LAB 1 HR.
(Corequisite, ES110) Laboratory to accompany ES 110.

ES 237. GEOLOGIC ENVIRONMENTS OF THE GREAT PLAINS 2 HRS.
The geological attributes and geologic history of the Great Plains region of North America are intimately involved, directly and indirectly, with its boundaries, scenery, resources, and hazards. Attention will focus on these relationships and on the coexistence of mankind. Aspects of geologic history will be examined for their impact on the present, and the interrelations of the geo-environmental factors of topography, soils, water, mineral resources, and climate will be illustrated and related to human activities.

ES 254. PHYSICAL GEOGRAPHY 3 HRS.
Primarily for majors and minors in geography, the physical and biological sciences, and others interested in physical geography. Systematic study of the elements of climate, landforms, water resources, vegetation, soil, and minerals.

ES 314. PROJECT DESIGN SEMINAR 1 HR.
(Prerequisite, earth science major or BSE candidate with earth/space science teaching field, at least junior standing.) The course is an introduction to strategies and techniques of research. Progressive definition of a problem and devising means to solve it will be emphasized. Supporting techniques of library use and conventions of scientific proposal and report writing will also be surveyed.

ES 319. METEOROLOGY 3 HRS.
(Prerequisite, ES110 and ES111.) The physical processes underlying weather phenomena are studied through the construction and analysis of various surface and high level atmospheric charts, cross sections and graphs.

ES 320. SEVERE AND UNUSUAL WEATHER 3 HRS.
(Prerequisites, ES110, ES111, and ES319.) The focus of this course will be weather phenomena that are considered to be severe and/or unusual. This would include blizzards, ice storms, thunderstorms, lightning, hail, flooding rains, tornadoes, hurricanes, droughts, and many other weather events that can affect our lives. The major emphasis will be placed on weather that affects the United States. Particular attention will be given to supplying students with a basic understanding of each weather phenomenon, its causes, its hazards, and information needed to predict, survive or avoid these hazards and to mitigate against their effects. It is also intended to be a follow-up course to our existing meteorology course (ES319).

ES 331. ICE AGE ENVIRONMENTS 3 HRS.
(Prerequisite, ES 110 and ES111.) An introduction to geology, landscapes, glaciers, climate, and biology of the Ice Ages. The relationship of Ice Age events to modern environments, the nature of climatic and environmental change, and the role of man. Three hours lecture per week and field trips.

ES 333. ENVIRONMENTAL GEOLOGY 3-5 HRS.
(Prerequisite, ES 110 and ES111.) Focus on natural operations of systems and cycles involved with geologic hazards and resource distribution/production. Beneficial and disastrous consequences of man's involvement with natural operations will be analyzed and applied to land use planning. Course appropriate for those interested in environmental studies, but also agriculture, civil engineering, construction, economics, planning, science education.

ES 341. WETLAND ENVIRONMENTS 3 HRS.
(Prerequisites, ES110 and ES111.) An interdisciplinary overview of physical, biological, and cultural aspects of wetlands. Definitions, classification, origins, and natural processes of wetland environments. Wetlands in boreal, temperate, and tropical climatic settings. Human impact, exploitation and management of wetland resources. Lectures, exercises and field trips. A student may not earn credit in more than one of EB 341, ES 341, or GE 341.

ES 351. INTRODUCTION TO GEOSPATIAL ANALYSIS 3 HRS.
(Prerequisite, ES110 and ES111.) Introduction to geographic information systems (GIS) and remote sensing techniques as applied to documenting, mapping, interpreting, and managing natural and cultural resources. Types of GIS data, computer hardware and software used for geospatial analysis, basic cartography, and global positioning systems. Lectures, laboratory exercises, and field trip.

ES 365. WORLD REGIONAL CLIMATOLOGY 2-3 HRS.
(Prerequisites, ES110 and ES 111 or ES254 or GE254.) A study of the world climatic regions based upon a systematic classification system. The investigations of the cause of climatic variations and the effect of climate on man's natural environment.

ES 366. NATURAL HAZARDS 3 HRS.
(Prerequisites, ES110/111.) Natural hazards are Earth processes that are harmful to humans and their property. Natural hazards can be as spectacular as volcanic eruptions and as subtle as soil creep. This course provides a detailed discussion of natural hazards with emphasis placed on understanding the processes that cause natural hazards to occur and the factors that increase risk for humans and their property.

ES 367. TOPICS IN EARTH SCIENCE (*) 1-3 HRS.

A general introduction to topics in the earth sciences for which no regular course is available, but adequate texts, library holdings, and laboratory resources exist. Examples of possible areas of study include relevant or timely problems in earth science such as global environmental change, energy and water resources. It is designed for non-majors or entry-level earth science majors, and resumes no prerequisites. *The parentheses will be filled with an appropriate short description on the student's transcript to indicate the subject area studied.

ES 439. INDEPENDENT STUDY IN EARTH SCIENCE 1-4 HRS.

(Prerequisite, consent of instructor.) For students wishing to conduct an investigative study or to do creative work in some area of the earth sciences. May be repeated.

ES 470. INTERNSHIP IN GEOSPATIAL ANALYSIS 3 HRS.

(Prerequisites, GE371 and ES351 or EB351 or ES 551.) The internship provides an opportunity for undergraduate students enrolled in the GSA program to apply their mapping and geospatial analysis skills to practical problems. In addition to performing tasks outlined by the internship agency, each student will complete an end-of-semester written report, which will discuss various aspects of the internship. A student may not earn credit in more than one of EB 470, ES 470 or GE 470. Permission of instructor required to enroll.

ES 475. SENIOR THESIS IN EARTH SCIENCE 1-5 HRS.

(Prerequisites, earth science major, senior standing.) Advanced undergraduate research conducted on a specific project in climatology, earth-systems science, geology, meteorology, paleontology, planetary science, remote sensing, or related subjects. Students will work with a faculty member to design, carry out, and present the thesis project. Permission of instructor required to enroll.

ES 518. SPACE SCIENCE 3 HRS.

(Prerequisites, PS214 and PS215, or ES110 and ES111.) Studies include observational evidence for the heliocentric model of the solar system; the solar system with concentration upon the moon and lunar exploration; techniques for studying and physical characteristics of remote stellar bodies; and current concepts regarding the nature and dynamacy of the universe as a system.

ES 529. OCEANOGRAPHY 3 HRS.

(Prerequisite: ES 110/111 or equivalent with a grade of "C" or higher or consent of instructor.) This course is an introduction to the physical, chemical, geologic, and biologic characteristics of the oceans and coastal areas. Emphasis will be placed on the role of the oceans as a component of the global environment.

ES 539. SOIL SCIENCE AND LABORATORY 4 HRS.

(Prerequisites, ES110/111, CH123 and GB100 or GB140.) Lectures, laboratory, and field trips covering soil classification, determination of soil physical and chemical properties such as particle size analysis, bulk density, cation exchange capacity, nutrient analysis, and soil conservation.

ES 545. GEOMORPHOLOGY 3 HRS.

(Prerequisites, ES110 and ES111.) The processes that have shaped the Earth's surface are studied with the aid of topographic maps and aerial photographs. The influence that rock type and geologic structure has in producing land forms is stressed.

ES 546. FIELD GEOMORPHOLOGY 2-5 HRS.

(Prerequisites, ES110 and ES111.) Study of landforms and landscape development in the field. Techniques for description, surveying, mapping, and interpretation of landforms in a natural setting. Practical application of geomorphology to terrain analysis.

ES 551. COMPUTER MAPPING SYSTEMS 3 HRS.

(Prerequisite, ES351.) Theory and use of computer systems for capture, storage, analysis, and plotting of spatial information. Vector and raster geographic information systems, digitizing data, and spatial analysis. Practical applications of computer mapping systems. Two hours lecture and two hours laboratory per week, plus field trips.

ES 555. SMALL-FORMAT AERIAL PHOTOGRAPHY 3 HRS.

(Prerequisite, ES351.) Techniques of small-format aerial photography. Acquisition of air photos with conventional cameras as well as compact digital cameras. Low-altitude, large-scale photography from airplanes, kites and balloons. Handling, scanning, processing, interpretation, enhancement, and display of analog and digital aerial images. Practical field and laboratory exercises. Course is designed for students in the geospatial analysis program.

ES 566. NATURAL HAZARDS AND DISASTERS 3 HRS.

(Prerequisites: ES110/111 or consent of instructor) Natural hazards are Earth processes that are potentially harmful to people and/or their property. Natural hazard phenomena includes events such as volcanic eruptions, earthquakes, tsunamis, coastal erosion, severe weather, mass wasting, flooding, wildfires, and asteroid impacts. This course provides a detailed discussion of natural hazards with an emphasis placed on understanding the processes that cause natural hazards to occur, and the factors that increase the risk for humans and their property. Special emphasis will be given to comparing and contrasting natural hazards, natural disasters, and natural catastrophes. Damage mitigation techniques, as well as ethical and legal issues concerning these dynamic Earth processes, will also be explored in this course.

ES 567. TOPICS IN EARTH SCIENCE (*) 1-4 HRS.

(Prerequisites, ES110 and ES111.) The student may concentrate in an area of the earth sciences for which no regular course is available if there are adequate texts, library holdings, and laboratory resources. Examples of the possible areas of study are: Vertebrate Paleontology, Invertebrate Paleontology, Crystallography, Structural Geology, Economic Geology, Ground Water Geology, Environmental Geology, Optical Mineralogy, and Geophysics. *The blank will be filled with an appropriate short description on the student's transcript to indicate the subject area studied.

ES 703. SEMINAR IN PHYSICAL GEOGRAPHY 1-3 HRS.

(Prerequisites, ES110 and ES111, or ES254, or GE254.) The seminar is designed to provide an opportunity for in-depth examination of selected topics of physical geography. It is a geographical analysis of the spatial characteristics of one or more factors that constitute the physical environment. The seminar specifically treats such subjects as climate, soils, landforms, and biogeography.

ES 721. SOIL MECHANICS 3 HRS.

(Prerequisites: ES110/111 or consent of instructor.) Soil Mechanics is designed to introduce students to the dynamic Earth material of soil and how it can be used to both build on and with as a construction medium. Students will learn how to perform and evaluate standard soil tests, and report those test results in a technical, written format. Soil tests explored are those that are routinely conducted at construction sites or during the course of geotechnical projects, including soil moisture determination, Atterberg limits, mechanical grain size analysis, hydrometer analysis, permeability tests, and the standard Proctor compaction test. Lecture topics will also include soil genesis, soil properties, and soil classification.

ES 722. GEOARCHAEOLOGY 3 HRS.
(Prerequisites: ES110/111 or consent of instructor.) Ge archaeology is the study of archaeology from a geological perspective with the application of both geological and archaeological investigative methods. This multidisciplinary course will focus on the processes involved for collecting ge archaeological data, investigating field techniques and methodologies, exploring how past environments have influenced various human processes, and how artifacts and other material remains can tell us about ancient peoples and cultures. The subfields of archaeoseismology and paleoseismology will also be explored in this course

ES 730. GEOLOGIC TOPICS OF THE GREAT PLAINS 1-3 HRS.
(Prerequisites, ES110, ES111, and GO325.) The unique combination of natural forces both present and prehistoric have made the Great Plains region unlike any other on the North American continent. The extreme diversity of weather elements, the remote location relative to geologic orogenic upheavals, and the long inundation of prehistoric shallow seas sets this part of the continent apart from the rest. Various aspects of the physical distinctiveness of the Great Plains will be examined in this course.

ES 739. RESEARCH PROBLEM IN EARTH SCIENCE 1-3 HRS.
(Prerequisite, consent of instructor.) Junior, senior, or graduate students wishing to work on research problems of special interest in the field of earth science.

ES 740. HYDROPOLITICS AND WATER RESOURCES IN THE 21ST CENTURY 3 HRS.
(Prerequisite: ES 110 or consent of instructor.) This course will examine historical and modern issues surrounding the supply and management of water. Complex social, economic, and political case studies will be explored in detail. Fundamental hydrologic, geologic, and environmental concepts will be introduced, along with the importance of data-driven decision-making.

ES 747. FIELD STUDIES IN EARTH SCIENCE 1-6 HRS.
(Prerequisite, designed for teachers K-12. Permission of instructor.) Designed for teachers K-12, who do not have a strong background in earth science. One credit hour for each week of field/laboratory work. An experience oriented field course for Kansas teachers. The course is designed to help each individual explore their geological environment in a field setting. Permission of instructor required to enroll.

ES 767. TOPICS IN EARTH SCIENCE (*) 1-4 HRS.
(Prerequisite, permission of instructor.) The student may concentrate in an area of the earth sciences for which no regular course is available if there are adequate texts, library holdings, and laboratory resources. *The blank will be filled in with an appropriate short description on the student's transcript to indicate the subject area studied. Permission of instructor required to enroll.

ES 769. WORKSHOP IN EARTH SCIENCE 2-6 HRS.
(Prerequisite, consent of instructor.) Curriculum development in the field of earth science for elementary, junior high, and high school teachers. Lectures, laboratory, and field experience in geology, astronomy, meteorology, and related topics.

ES 771. REMOTE SENSING 4 HRS.
(Prerequisite, ES351.) Remote sensing of the Earth's surface utilizing the electromagnetic spectrum. Techniques of photography, multispectral scanning, and microwave imagery from airplane, satellite, and manned spacecraft platforms. Image interpretations, practical applications in earth science, and use of remotely sensed data in geographic information systems. Two hours lecture and four hours lab per week plus field trips.

ES 775. ADVANCED IMAGE PROCESSING 3 HRS.
(Prerequisite, ES 771 or consent of instructor.) Advanced techniques of image processing and analysis for remotely sensed digital data. Topics include enhancement, spectral analysis, classification, and change detection. Interdisciplinary applications in Earth resources and environmental conditions; practical exercises based on satellite datasets and other forms of remotely sensed data. Course is designed for advanced students in the geospatial analysis program.

ES 875. THESIS M.S. 1-5 HRS.
(Prerequisite, consent of instructor.) Required for the 30-hour degree, Master of Science in Physical Sciences, with an emphasis in earth science. Research in an approved area of earth science and the preparation of a thesis.

FINANCE

FI 301. FINANCIAL MANAGEMENT 3 HRS.
(Prerequisite: AC 223, BU 255, junior standing.) An introductory study of the finance function of business firms from an internal point of view. Emphasis is placed on the financial systems, time value of money, risk and return, working capital, cash management, capital budgeting, cost of capital, and short-and long-term financing. Students must earn a minimum of a "C" grade in FI 301 to fulfill BSB degree and major/minor requirements.

FI 303. PERSONAL FINANCIAL PLANNING 3 HRS.
(Prerequisite, junior standing.) This course is an in-depth study of the process of personal financial planning undertaken by a professional for consumers or families to help determine their financial objectives; consider alternatives; consider alternate plans for accomplishing those objectives; and help select, implement, review, and adjust those plans. Students must earn a minimum of a "C" grade in FI 303 to fulfill major/minor requirements.

FI 313. PERSONAL INVESTING 3 HRS.
(Prerequisite, junior standing.) This course provides the student with an understanding of the investment decision and a description of available investment securities. Special emphasis is given to the use of mutual funds to provide for the needs of the individual investor. The course is intended for non-finance majors as well as an elective course for finance majors. Students must earn a minimum of a "C" grade in FI 313 to fulfill major/minor requirements.

FI 346. RISK MANAGEMENT 3 HRS.
(Prerequisites, FI 301 and junior standing.) The purpose of this course is to acquaint the student with the nature and uses of insurance. This shall include the structure, management and regulation of types of insurance carriers, economic risks, and the principles of personal, property, life, and casualty insurance. Students must earn a minimum of a "C" grade in FI 346 to fulfill major/minor program requirements.

FI 390. INTERMEDIATE FINANCIAL MANAGEMENT 3 HRS.
(Prerequisites, FI 301 and junior standing.) Second-level course in financial management to provide more depth in the study of asset pricing corporate valuation, capital structure, dividend policy, working capital management, growth through mergers, and leasing. Emphasis is on the development of problem solving and financial decision making capabilities to prepare students for Advanced Corporate Finance and Bank Management. Students must earn a minimum of a "C" grade in FI 390 to fulfill major/minor program requirements.

FI 410. INTERNSHIP IN FINANCE 1-6 HRS.

(Prerequisites, FI 301 and junior standing.) An academic offering that provides special employment for student who wish to gain career-related experience before graduation. Students are placed in supervised positions and assigned faculty advisors who design job-related academic projects. Students must earn a minimum of a "C" grade in FI 410 to fulfill major/minor program requirements.

FI 433. CONCEPTS IN INTERNATIONAL FINANCE 3 HRS.

(Prerequisites, FI 301 and junior standing.) This course provides students with an understanding of the impact of international transaction on financial decisions. Special emphasis is placed on the need to control exchange rate risk using such alternatives as exchange rate options and futures. Students must earn a minimum of a "C" grade in FI 433 to fulfill major/minor program requirements.

FI 446. BANK MANAGEMENT 3 HRS.

(Prerequisites, FI 301 and junior standing) This course is designed to provide students with an understanding of bank management. The course prepares students for the internal management of banks. The course provides the fundamental principles underlying the management of commercial banks; capital funds; assets and liability management; value maximization; regulation, legal and operational constraints. Students must earn a minimum of a "C" grade in FI 446 to fulfill major/minor program requirements.

FI 448. FINANCIAL INSTITUTIONS AND MARKETS 3 HRS.

(Prerequisites, FI 301 and junior standing.) This course is designed to provide students with an understanding of what the various financial institutions active in the United States do and why they play their particular roles in the economy. The course blends the internal management approach with the macro approach. Students must earn a minimum of a "C" grade in FI 448 to fulfill major/minor program requirements.

FI 449. INVESTMENT ANALYSIS 3 HRS.

(Prerequisites, FI 301 and junior standing.) This course provides the student with an understanding of the investment analysis process. The student will examine the basis of financial theory as applied to investment theory, study financial markets, and study the process of investment analysis. The student will be required to engage in the process of investment analysis. Students must earn a minimum of a "C" grade in FI 449 to fulfill major/minor program requirements.

FI 505. SPECIAL TOPICS IN FINANCE 1-5 HRS.

(Prerequisites, FI 301 and senior or graduate standing.) A course for the study of special topics and experimental course offerings in the finance area. Students must earn a minimum of a "C" grade in FI 505 to fulfill major/minor requirements.

FI 805. SPECIAL TOPICS IN FINANCE 1-3 HRS.

(Prerequisite, FI 301.) A course at the graduate level for the study of special topics and experimental course offerings in the finance discipline.

FI 850. ADVANCED FINANCIAL MANAGEMENT 3 HRS.

An MBA-level course that examines the finance function of a firm from the viewpoint of the internal financial manager. The course emphasizes the conceptual and quantitative tools used to accomplish financial analysis, financial planning and control, management of working capital and long-term assets, determining cost of capital and planning financial structures.

MODERN LANGUAGE**FL 010. BEGINNING ENGLISH SKILLS 0 HRS.**

(Placement determined by institutional tests.) A non-credit intensive English course designed to help limited English speakers improve their abilities in listening, speaking, grammar and reading.

FL 095. STUDY ABROAD 1-12 HRS.

(Prerequisite, consent of International Student Exchange Program (ISEP) Coordinator/Director.) Enrollment in this course indicates that a student is currently participating in an ESU-sanctioned academic program abroad. Course fee: \$25 per semester or summer session.

FL 100. SPECIAL PROJECTS IN FOREIGN LANGUAGES 1-5 HRS.

The course is designed to provide flexibility in scheduling introductory foreign language courses on a trial basis without their being identified with specific catalogue titles and course descriptions, which might possibly establish them as permanent course offerings.

FL 300. PROFESSIONAL TEACHER PORTFOLIO 1 HR.

(Prerequisite, permission of instructor; Modern Language majors only; must be admitted to Phase 2 {student teaching}.) This one hour course will give student teachers credit for the work that they are doing in developing, analyzing and evaluating their own portfolios. The portfolios are used in showcasing their achievements as student teachers and for career placement in teaching.

FL 475. INDEPENDENT STUDY IN FOREIGN LANGUAGES 1-4 HRS.

(Prerequisite, permission of instructor/Chair of Modern Languages.) Independent study for language study other than French, German or Spanish.

FL 479. FOREIGN LANGUAGE ACQUISITION 3 HRS.

(Requirement for BSE students with single or double teaching fields.) Students will acquire the ability to demonstrate the knowledge, skills, and dispositions to give evidence of acceptable classroom performance in Spanish or French. This is a practical methods course where students will learn more about the target language content (oral and written skills) and its respective culture as well as how to teach it in PK-12. Language Acquisition Methods will include the Teacher Work Sample, oral presentations, story-telling, music, films, hands-on audio-visual teaching materials construction, and the use of smart classrooms. This course is required for BSE students. Offered every spring.

FL 495. SPECIAL TOPICS IN FOREIGN LANGUAGES 2-3 HRS.

Special topics such as Spanish or French art, bilingualism or foreign language curriculum.

FL 499. FOREIGN LANGUAGE CAPSTONE SEMINAR 1 HR.

Required for all graduating seniors pursuing the B.A. in French, German, and Spanish. Students will compile a portfolio with examples of graded work and a reflective essay as well as a project to be presented orally in the target language to the department faculty. This course is intended to mark the completion of their undergraduate degree. Offered every semester.

FL 513. HISPANIC CULTURE AND ITS**EDUCATIONAL IMPLICATIONS****3 HRS.**

(Primarily for education majors and educators seeking bilingual-multicultural endorsement, but may be taken by others with instructor's permission.) This course is designed to help educators understand and appreciate Latin American/Hispanic culture and value systems and how these compare with those common in Anglo-American society. Primary focus is upon how various culture-based traditions, values and customs affect Latin American/Hispanic pupils' perception, behavior and learning capabilities in their native society and in their adaptation to classrooms in the United States. This course is part of the bilingual-multicultural education endorsement, and elementary education bilingual/bicultural specialization curricula.

FL 540. FOREIGN LANGUAGE TEACHING**METHODOLOGY****3 HRS.**

This course provides theory and practice of teaching a modern language (such as French, Spanish, or German) in the USA. Emphasis is placed on the pedagogical aspects of modern language teaching and the preparation of teaching materials and tests for classroom use. As outlined in the ACTFL Guidelines/standards, the class provides training in the major methodologies and techniques of teaching listening, speaking, reading, writing and culture of a modern language. This class calls for a highly constructive class participation and very responsible out-of-class reading and assignment preparation. Using technology critically to support language instruction is required. Offered every fall.

FORENSIC**FO 459. SPECIAL TOPICS IN FORENSIC SCIENCE 1-3 HRS.**

Special topics in forensic science include those topics that are typically covered by experts in their respective disciplines in forensic science such as photography, postmortem toxicology, or crime scene processing. These are courses that may not be offered on a regular basis because of the need for the course or the availability of suitable instructors.

FO 702. BIOLOGICAL AND PHYSICAL EVIDENCE 3 HRS.

(Prerequisite, graduate standing in the Department of Biological Sciences or Department of Physical Sciences.) This course provides an introduction to the problems encountered and the techniques used in the scientific examination of physical and biological evidence. Topics include crime scene procedures, physical evidence documentation, application of the scientific method in crime scene investigation, scientific and legal integrity of physical evidence, ethical issues, professional standards, and expert. This course will be a core required class in the Master of Science in Forensic Science program and will serve to help the program meet the requirements for accreditation through Forensic Science Education Programs Accreditation Commission.

FO 710. FORENSIC MICROSCOPY**3 HRS.**

This course emphasizes the fundamental principles used in the analysis and evaluation of physical evidence, including microscopy and microchemistry of trace evidence such as controlled substances, glass, and fibers. Documentation skills are developed. Students will begin to develop their ability to critically assess forensic situations and testify about their results in moot court.

FO 711. FORENSIC MICROSCOPY LABORATORY 2 HRS.

(Co-requisite, FO 710.) Laboratory course to accompany FO 710. Microscopic and microchemistry techniques are emphasized, as well as documentation and reporting.

FO 720. TOXICOLOGY**3 HRS.**

(Prerequisites, GB 140 Principles of Biology and CH 123 Chemistry I and CH 126 Chemistry II or equivalent, and CH 370/371 or equivalent. Co-requisite, CH 779.) This course serves as an introduction to the basic principles of forensic toxicology. This course emphasizes the common drugs/poisons that are encountered by a practicing forensic toxicologist and the approach to determining their medico-legal role in establishing the cause of death and disease. Topics include the pharmacology and pharmacokinetics of drugs, impairment versus intoxication, and the interpretation of drug effect in the criminal court setting. The science of ethanol and other drugs of abuse, along with other important agents (sports doping drugs, therapeutic drugs, CO, etc.) are discussed as they relate to toxicology. An introduction to the basic applied methods of forensic toxicology is also presented, including biological samples, analytical schemes, and some of the special problems commonly encountered in forensic toxicology.

FO 770. GRADUATE RESEARCH SEMINAR**1 HR.**

A practicum covering the various aspects of designing and delivering the types of presentations typical of a professional scientist. Students are required to attend and critique presentations throughout the semester and deliver a public departmental seminar.

FO 771. FORENSIC SCIENCE SEMINAR**1 HR.**

A course to inform students of the research interests of invited forensic scientists, faculty, and graduate students. This course is graded on a pass/no credit basis.

FO 803. CURRENT RESEARCH IN FORENSIC SCIENCE**3 HRS.**

(Prerequisite, consent of instructor.) A course designed to allow students to develop an independent research project of their choosing in a classroom setting.

FO 809. GRADUATE PROJECT IN FORENSIC SCIENCE**1-3 HRS.**

(Prerequisite, consent of instructor.) Independent student work with the advice and aid of one or more members of the staff on a project in which they have some interest or competence.

FO 850. MOLECULAR TECHNIQUES FOR FORENSIC SCIENTISTS**3 HRS.**

This laboratory course will acquaint students with various molecular techniques applicable to forensic science. Students will gain hands-on experience isolating DNA from samples and performing various DNA fingerprinting techniques utilizing both PCR and non-PCR based methods. Lecture over the different methodologies will be used to complement laboratory exercises.

FO 859. SPECIAL TOPICS IN FORENSIC SCIENCE 1-3 HRS.

Special topics in forensic science include those topics that are typically covered by experts in their respective disciplines in forensic science such as photography, postmortem toxicology, or crime scene processing. These are courses that may not be offered on a regular basis because of the need for the course or the availability of suitable instructors.

FO 886. INTERNSHIP: FORENSIC SCIENCES**1-6 HRS.**

(Prerequisite, consent of instructor.) A course to provide students with an opportunity to gain field experience in one of the forensic sciences. Successful completion of the course includes a research project that is developed jointly by the student, the faculty advisor, and the supervising practitioner. May serve as a substitute for FO 809 or FO 890 at the discretion of the student's graduate committee.

FO 890. THESIS, MSFS 1-6 HRS.
(Prerequisite, consent of instructor.) Independent study and research in an approved field in biological or physical sciences.

FRENCH

FR 100. SPECIAL PROJECTS IN FRENCH 1 HR.
Topics of general interest to non-French majors will be studied and some basic pronunciation characteristics of French will be introduced. Topics may be fashion, cuisine, tourism, medical terms, etc.

FR 110. FRENCH LANGUAGE & CULTURE I **5 HRS.**
Fundamentals of pronunciation. Vocabulary building. Practice in understanding and speaking simple phrases. Elementary reading, writing and grammar. Some study of the culture of the Francophone countries. Offered every fall.

FR 120. INTRODUCTION TO THE FRANCOPHONE WORLD 1 HR.
Cultural similarities and differences between French-speaking peoples and Americans. Taught in English. Lecture and discussion.

FR 210. FRENCH LANGUAGE & CULTURE II **5 HRS.**
Continuation and expansion of French Language & Culture I with further emphasis on understanding, speaking, reading, and writing. Study of the culture of Francophone countries continued. Offered every spring.

FR 313. FRENCH LANGUAGE & CULTURE III 4 HRS.
Continuation of Beginning French II. Expanded understanding and speaking with greater emphasis on reading and writing. Study of the culture of French-speaking countries continued. Offered every Fall.

FR 314. FRENCH LANGUAGE & CULTURE IV 3 HRS.
Continuation of French Language & Culture III and completion of the basic program. Expanded understanding and speaking with added emphasis on writing and reading. Study of the culture of Francophone countries continued. Offered every Spring.

FR 339. READING AND CONVERSATION 3 HRS.
(Prerequisite, FR 314 or equivalent.) This course is designed to promote further development of reading and speaking skills as well as to enhance the student's knowledge of contemporary culture of Francophone countries. Phonetics and pronunciation will be emphasized as well. Offered every fall.

FR 359. ADVANCED GRAMMAR AND COMPOSITION 3 HRS.
(Prerequisite, FR 314 or equivalent.) This course is intended to further develop the student's abilities in composition. Deeper analysis of French grammar, morphology and other aspects of linguistics will be emphasized. Offered in the spring of even numbered years.

FR 365. INTRODUCTION TO LITERATURE 3 HRS.
This is a "bridge" course, designed to prepare students to proceed from the intermediate level to advanced literature and culture courses in French by giving them solid foundations in reading. These foundations are two-pronged. First, students will learn strategies for reading any modern-language text, strategies such as guessing from context, overcoming the desire to read too quickly and to understand every word, and transferring the ability to predict. Second, we will be dealing primarily with literary texts, and therefore students will learn a critical vocabulary for that reading to count as "critical analysis." At the end of the semester, time permitting, we will map these skills onto images as well.

FR 379. CIVILIZATION OF FRANCOPHONE COUNTRIES 3 HRS.
(Prerequisite, FR 339 or FR 359 or permission of instructor.) Culture, history, geography and economy of Francophone countries. Offered in the spring of odd numbered years.

FR 419. INTRODUCTION TO FICTION 3 HRS.
(Prerequisite, FR 339 or FR 359 or permission of instructor.) Study of selected novels or short stories in French.

FR 429. INTRODUCTION TO DRAMA 3 HRS.
(Prerequisite, FR 339 or FR 359 or permission of instructor.) Reading and discussion of representative plays in French.

FR 435. SURVEY OF FRENCH LITERATURE I 3 HRS.
(Prerequisite, FR 339 or FR 359 or permission of instructor.) Survey of French literature from the eleventh century through the eighteenth.

FR 445. SURVEY OF FRENCH LITERATURE II 3 HRS.
(Prerequisite, FR 339 or FR 359 or permission of instructor.) Survey of French literature from the nineteenth century to the present.

FR 455. FRENCH AND FRANCOPHONE WOMEN WRITERS 3 HRS.
French and Francophone women writers have been some of the first—and most influential—women writers in history, often breaking new ground and paving the way not only for women writers in English and other languages, but for their male counterparts as well. In this course, cross-listed with ESU's Ethnic and Gender Studies program, we will read works of fiction and poetry written in French by women from the twelfth through the twentieth centuries, many expressing feminist or proto-feminist viewpoints. This class is open to non-majors, as the discussion will be held in English. French majors do all reading and writing in French.

FR 475. INDEPENDENT STUDY 1-4 HRS.

FR 495. SPECIAL TOPICS IN FRENCH 2-3 HRS.
Topics selected from French literature, language, or culture.

FR 604. MODERN FRENCH FICTION 3 HRS.
(Prerequisite, 17 hours college French or equivalent.) Nineteenth and twentieth-century prose writers. Collateral reading and reports.

FR 635. DIRECTED STUDIES IN FRENCH 1-3 HRS.
(Prerequisite, upper-division undergraduate or graduate.) Topics selected from French literature, language, or culture.

FR 835. RESEARCH PROBLEMS IN FRENCH 1-4 HRS.
(Prerequisite, 24 hours college French or equivalent.) Studies by graduate students of problems of special interest in the field of French language or literature. Course planned to meet individual needs.

FR 855. SEMINAR IN FRENCH 1-4 HRS.
(Prerequisite, 24 hours college French or equivalent.) Projects at the graduate level based on individual need.

GENERAL BIOLOGY

GB 100. GENERAL BIOLOGY **3 HRS.**
Designed as a general education course for students majoring in fields other than science. Lectures are concerned with basic understanding of living processes in animals, plants, and microorganisms. Major emphasis is placed on concepts which will prepare students to become informed citizens in today's society.

GB 101. GENERAL BIOLOGY LABORATORY † **1HR.**
(Pre- or corequisite, GB 100; GB 101 is optional.) Designed as a general education course for non-science students. Through the use of biological examples, the laboratory presents science as a general method of generating hypotheses and testing those hypotheses against observed data.

GB 102. GENERAL BIOLOGY: FIELD BIOLOGY **4 HRS.**
Designed as a general education course for students majoring in fields other than science. This course combines traditional classroom lectures and laboratory activities with field trips to ESU Natural Areas. Lectures and field trip activities provide the student with a basic understanding of living processes in animals, plants, and microorganisms. Major emphasis is placed on concepts that will prepare students to become informed citizens in modern society. GB102 is offered as an alternative to both GB100 and GB101.

GB 140. PRINCIPLES OF BIOLOGY † **3 HRS.**
(For prospective biology majors.) Lecture and discussion concerned with basic biological principles: cellular biology and biochemical processes, genetics, organismic biology and physiological processes, ecology, evolution and continuity of life. This course is designed for students who will major in biology and the health-related areas. The emphasis is placed on preparing students for advanced biology courses.

GB 141. PRINCIPLES OF BIOLOGY LABORATORY † **1 HR.**
(For prospective biology majors, to be taken concurrently with GB 140.) Laboratory exercises designed to familiarize students with the scientific process and to demonstrate basic biological principles and techniques. Includes gathering of data, observational techniques, and making inferences from data. Designed to prepare students for advanced biology courses.

GB 159. SPECIAL TOPICS IN BIOLOGY **1-3 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various biological disciplines.

GB 170. HONORS BIOLOGY & LAB **4 HRS.**
(Prerequisites, ACT of 23 or better, consent of instructor.) Designed as a general education course for students who wish to explore biology through the honors format. Major emphasis is placed in developing the student's ability to evaluate critically events in today's society concerning cellular biology and biochemical processes, genetics, organismal biology and physiological processes, ecology, evolution, and continuity of life.

GB 259. SPECIAL TOPICS IN BIOLOGY **1-3 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various biological disciplines.

GB 303. FIELD AND LAB BIOLOGY **3 HRS.**
(Prerequisite, GB 100.) Laboratory and field experiences in biology especially appropriate for elementary education majors. Non elementary education majors may enroll for general education credit with consent of instructor.

GB 325. BIOSCIENTIFIC TERMINOLOGY **1 HR.**
An informal seminar-format course that meets one time per week, in which students work with Greek and Latin bases, prefixes, and suffixes that provide much of the foundation of modern bioscientific terminology found in all branches of science.

GB 385. NUTRITION † **3 HRS.**
(Prerequisite, one laboratory science in chemistry or biology.) A study of the relationship of nutrition to health of the individual as related to food and the ability of the body to utilize it. Emphasis is on normal nutrition and the interrelationships of nutrients. Application is made to nutritional requirements of infancy, childhood, adolescence, the reproduction period, and later years. Emphasis on nutrition problems of the college student is made through a personal dietary and activity record planned and evaluated by each student.

GB 386. INTERNSHIP: BIOLOGICAL SCIENCES **1-3 HRS.**
An academic course to provide students with an opportunity to gain field experiences in one of the biological sciences through professional experiences. The academic experience is developed jointly by the student and the faculty advisor. No more than 3 hours in GB 386 may be counted toward the 45 hours of biology credit.

GB 409. BIOLOGY PROJECTS **1-3 HRS.**
(Prerequisite, consent of instructor.) The student works independently, with the aid and advice of one or more members of the staff, on a project in an area of general biology in which they have some interest and competence.

GB 425. GENERAL GENETICS **3 HRS.**
(Prerequisite, GB 140 and MA 110 or equivalents with C's or better, or consent of instructor.) Lecture material in the basic areas of general genetics including both Mendelian and molecular concepts. Biology majors must take the laboratory, GB 426, in conjunction with the lecture.

GB 426. GENERAL GENETICS LAB **1 HR.**
(Prerequisite, GB 140 and MA 110 or equivalents with C's or better, or consent of instructor.) Laboratory material involving basic genetic experiments in animals, plant, and microorganisms.

GB 450. INTERDISCIPLINARY STUDIES: BIOLOGY **3 HRS.**
In this interdisciplinary course students & faculty will collaborate to conduct quantitative research on biological systems. Weekly meetings will entail group discussions in which we will identify potential questions, design experiments to investigate those questions, and interpret the results of the experiments. With the use of sophisticated computer technologies we will analyze phenomena that were previously too fast, slow, small or large to be investigated with quantitative precision. Digital video and image processing techniques will be used to measure properties of biological systems. A variety of mathematical and statistical software will be used to measure properties of biological systems. A variety of mathematical and statistical software will be used to analyze and model the observations. Students will develop written reports of their investigations, students will make public presentations of their findings at university seminars, and possibly at professional meetings.

GB 459. SPECIAL TOPICS IN BIOLOGY **1-3 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various biological disciplines.

GB 460. FIELD BIOLOGY OF MEXICAN VERTEBRATES **2 HRS.**
The purpose of this course is 1) to provide an introduction to the basic field methods that are involved in the study of vertebrates and their populations and 2) to serve as a vehicle for intercultural exchange among Mexican scientists and students and U.S. scientists and students. The field portion of the class will be conducted in Mexico in conjunction with faculty from the Universidad de Morelos and Murray State College in Oklahoma. The class will be conducted in both Spanish and English, with lectures given in either language.

GB 470. UNDERGRADUATE RESEARCH SEMINAR 1 HR.
Required course for BMB majors. A practicum covering the various aspects of designing and delivering the types of presentations typical of a professional scientist. Students will be required to attend and critique presentations throughout the semester and deliver a public departmental seminar.

GB 471. BIOLOGY SEMINAR .5 HRS.
A course to inform students of the research interests of invited biologists, biology faculty and graduate students.

GB 480. SENIOR EXPERIENCE IN BIOLOGY 1 HR.
(Prerequisite, 35 hours of biology credit.) This course is designed for students to learn and practice the skills for applying to graduate schools, professional schools, or a job and to complete the departmental assessments of student learning. Activities include producing a resume or CV, crafting a personal statement of goals and purpose, and completing the university and departmental assessments.

GB 510. AQUATIC BIOLOGY 2 HRS.
(Prerequisite, BO 212, BO 213, ZO 214, ZO 215 or equivalents.) Basic ecology and taxonomy of the plants and animals inhabiting Great Plains lakes and streams. Emphasis is on the life cycles and ecological importance of common macrophytes, phytoplankton, zooplankton, and benthic macroinvertebrates.

GB 511. AQUATIC BIOLOGY LAB 2 HRS.
(Prerequisite, must be taken concurrently with GB 510.) Field and laboratory techniques for sampling and identifying aquatic organisms and assessing basic physicochemical conditions are introduced. Experience is gained in interpretation of quantitative data.

GB 539. SOIL SCIENCE AND LABORATORY 4 HRS.
(Prerequisites; CH 123, BO 212 and BO 213, and EB 480 (Ecology)). Lectures, Laboratory, and field trips covering soil classification, determination of soil physical and chemical properties, such as bulk density, cation exchange capacity, soil-plant interrelations, including xylem pressure potential, nutrient analysis, and soil conservation.

GB 584. BIOLOGY EDUCATION 3 HRS.
(Prerequisite, BO 212 and 213, ZO 214 and 215, or permission of instructor.) This course summarizes the open-ended nature of biology; students practice developing reality-based experiences in biology teaching at all levels of instruction. Includes preparation of biological materials; production and use of instructional media in biology including interfacing with microscopes, etc.; laboratory and field procedures and safety; and appropriate selection and use of computers and software in biology education. Review of laws relevant to copyright of printed and off-air materials, metrication, sex education, evolution, and lab liability. Evaluation of effectiveness of biology education in classroom, laboratory and field settings. Surveys professional journals in biology education worldwide as well as biology and biology education organizations; examines national and international biology curricula, textbooks, and informal education venues (museums, etc.). Management of controversy on animal rights, creationism, sex education, cloning and science fraud.

GB 700. GREAT PLAINS BIOLOGY: SPECIAL TOPICS 1-3 HRS.
(Prerequisite, consent of instructor.) Special topics in Great Plains ecology, zoology, botany, human biology, and microbiota are examined. Although the Great Plains share some biological features with other regions, they have a distinct ecology, including species of plants and animals not found elsewhere. Emphasis is on the distinct aspects of the Great Plains, e.g., Ethnobotany. This course is designed primarily for in-service teachers. Content and assignments will vary according to the number of credit hours for which the course is offered.

GB 709. HUMAN REPRODUCTIVE BIOLOGY EDUCATION 3 HRS.
(Prerequisites, ZO 362-363 or equivalent; in-service teachers only.) Studies human reproductive anatomy and physiology, sexual response, diseases and disorders, menstruation, conception, in-vitro fertilization, pregnancy and childbirth, birth control, sex differentiation, sex preselection, STD's including AIDS, bioethical issues related to human reproductive biology, etc. Participants will practice delivering this information and utilizing appropriate labwork, media and resource personnel.

GB 725. EVOLUTION 3 HRS.
(Prerequisite, GB 425, MC 540, or Biochemistry, or equivalents.) The factors in the continuity and modification of life through time; hereditary basis of evolution; effect of environmental change; diversity and origin of species; theories of the origin of life on earth.

GB 750. RESEARCH DESIGN AND ANALYSIS 3 HRS.
A study of the basic experimental and comparative design applicable to biological research. The student will gain experience in the use of statistical methods most often used by biologists and gain experience in the interpretations of results.

GB 752. SCIENTIFIC WRITING 2 HRS.
The student will be introduced to the primary literature (search methods for locating the literature as well as experience in reading and discussing the literature), the process of constructing a scientific paper (from figures and tables to the written product), writing and presenting a review article and a research proposal.

GB 759. SPECIAL TOPICS IN BIOLOGY 1-3 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various biological disciplines.

GB 770. GRADUATE RESEARCH SEMINAR 1 HR.
A practicum covering the various aspects of designing and delivering the types of presentations typical of a professional scientist. Students will be required to attend and critique presentations throughout the semester and deliver a public departmental seminar.

GB 771. BIOLOGY SEMINAR 1 HR.
A course to inform students of the research interests of invited biologists, biology faculty and graduate students. This course is graded on a pass/no credit basis.

GB 801. MODERN DEVELOPMENTS IN BIOLOGY I 3 HRS.
(Prerequisite, consent of instructor.) Designed for in-service biology teachers. Progress in terms of understandings of fundamental concepts and principles, with special emphasis on recent developments in cytology, ecology, evolution, genetics, metabolism, and radiation biology.

GB 802. MODERN DEVELOPMENTS IN BIOLOGY II 3 HRS.
A continuation of GB 801.

GB 809. GRADUATE PROJECT IN BIOLOGY 1-3 HRS.
(Prerequisite, consent of instructor.) The student works independently, with the advice and aid of one or more members of the staff, on a project in which they have some interest or competence.

GB 859. SPECIAL TOPICS IN BIOLOGY 1-4 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of general biology.

GB 880. RESEARCH PROBLEMS IN BIOLOGY 1-3 HRS.
(Prerequisite, consent of instructor.) Individual studies by graduate students working toward the M.S. degree, 35-hour program, of problems of special interest in the field of biology.

GB 885. GRADUATE RESEARCH IN BIOLOGY 2-3 HRS.
(Prerequisites, graduate standing and at least three hours credit in graduate-level independent study.) Investigation of problems in biology by students who have demonstrated research ability at the graduate level.

GB 886. GRADUATE INTERNSHIP: BIOLOGICAL SCIENCES 1-3 HRS.
A graduate level internship course that provides graduate students with an opportunity to gain applied learning experiences in one of the biological sciences through planned and supervised professional experiences. The internship plan and the internship provider must be approved by the graduate committee of the student. No more than 2 hours of GB 886 may be counted toward the M.S. or M.A. programs. No more than 7 hours of non-thesis research or GB 886 internship credits combined may count toward the M.S. degree; no more than 6 hours of research or GB 886 internship credit combined may count toward the M.A. degree.

GB 890. THESIS, M.S. 1-5 HRS.
(Required for 30-hour degree, Master of Science, with major in biology.) Independent study and research in an approved field of biology.

GEOGRAPHY

GE 101. WORLD REGIONAL GEOGRAPHY 3 HRS.
This course examines issues relevant to people and environments in the world's regions, using geographic approaches to illustrate human connections to place, and relations between people and places across the globe. The focus of the course is on the dynamism of the world's regions as they rapidly change, growing more diverse ethnically, politically, economically, and culturally and at the same time more connected as globalizing forces cross borders to blend cultures, economies, industries and other activities with global reach, as the world becomes ever-more connected through instant communication and travel. Students will learn about the elements of culture that link peoples of different regions as growing human populations consume resources from all over the world.

GE 200. INTRODUCTION TO GEOGRAPHY 3 HRS.
This course provides an introduction to the basic themes of geography. Students will explore the physical and human characteristics of the Earth in order to comprehend the complex character of our world. Topics include the study of natural and cultural landscapes as well as landforms, climate, demography, migration, culture, political geography, economically productive activities, and urban areas. Map reading skills are a basic geographic tool and using maps to illustrate the relationships between people and our environments is an important component of the course.

GE 254. PHYSICAL GEOGRAPHY 3 HRS.
Primarily for majors and minors in geography, the physical and biological sciences, and others interested in physical geography. Systematic study of the elements of climate, landforms, water resources, vegetation, soil, and minerals.

GE 300. TOPICS IN GEOGRAPHY 1-3 HRS.
Investigations into selected areas of Geography.

GE 325. GEOGRAPHY OF THE US & CANADA 3 HRS.
This course examines the regions that make up the two majority Anglo countries of North America. In the study of each region, geographic themes such as urbanization, economy, landscape, population, and regional identity are explored. A special emphasis is placed on the integration of historical and physical factors in shaping regions and the two countries as a whole.

GE 327. GEOGRAPHY OF THE GREAT PLAINS 3 HRS.
This course examines the region that encompasses the Great Plains of the United States from a geographic perspective beginning with an effort to meaningfully define the region, its history, and the changes that have shaped the land and the lives of people who live there. Consideration is given to the region's ecology, particularly human-environment interactions; the growing ethnic diversity of the region's population; economic and political issues that affect the region and tie it to the larger national and international context.

GE 333. KANSAS 3 HRS.
This course is a regional geography of Kansas, from prehistory to the present, with emphasis on geographic themes such as human settlement, land use, physical geography, the nature of places, economy, population, cultural diffusion, social institutions, change over time, and contemporary issues and tensions.

GE 341. WETLAND ENVIRONMENTS 3 HRS.
(Prerequisites, general education courses in biological, physical, and social sciences.) An interdisciplinary overview of physical, biological, and cultural aspects of wetlands. Definitions, classification, origins, and natural processes of wetland environments. Wetlands in boreal temperate, and tropical climatic settings. Human impact, exploitation and management of wetland resources. Lectures, exercises and field trips. A student may not earn credit in more than one of EB 341, ES 341, or GE 341.

GE 342. MIDDLE EAST AND NORTH AFRICA 3 HRS.
In the 21st century this region has emerged as a focus of attention for the United States and the rest of the world as it is the center of ongoing military and ethnic/religious conflict. The course will examine not only religion, nationalism and the roots of conflict, but will also focus on important environmental issues, particularly water and agricultural production; gender roles and ideologies; diversity within Islam; and other contemporary regional issues.

GE 351. INTRODUCTION TO GEOSPATIAL ANALYSIS 3 HRS.
(Prerequisite, one general education course in each of biological, physical, and social sciences or consent of instructor.) Introduction to geographic information systems (GIS) and remote sensing techniques as applied to documenting, mapping, interpreting, and managing natural and cultural resources. Types of GIS data, computer hardware, and software used for geospatial analysis, basic cartography, and global positioning system. Lectures, laboratory exercises, and field trip.

GE 355. AFRICA 3 HRS.
Africa is among the least-known regions among Americans. This course will introduce students to the history, culture, politics, and conflicts in Africa, with an emphasis on the countries south of the Sahara Desert. The lingering legacy of European colonialism (trade relations, ethnic conflicts, e.g.), the impact of the HIV/AIDS epidemic on much of the region, land tenure, and other contemporary issues will be examined.

GE 356. MIDDLE AND SOUTH AMERICA 3 HRS.
An exploration of the diverse countries of the region encompassing the territory from the U.S.-Mexico border south to the tip of South America. The course covers the region's physical environment as it has shaped and continues to influence its history (especially the period since 1492), its diverse population and many varied cultures, and its changing and varied status within the global community.

GE 357. EUROPE**3 HRS.**

This course is a survey of Europe in its role as advancing world power in the contemporary context of globalization. The history and expansion of the European Union, and its meaning in global economies and culture, are analyzed. The course will explore how Europe's physical geography has affected the region and its position in the world in the past and present. European countries' roles in colonialism and post-colonialism are analyzed. The course introduces the diversity of peoples, resources, physical and cultural features, and analyzes their part in advancing Europe's development goals.

GE 358. GEOGRAPHY OF EAST ASIA**3 HRS.**

East Asia is of growing importance to the lives of people around the world. The course is an in-depth exploration of the cultural, economic, and political geography of the countries of East Asia, including China, Japan, North and South Korea, and Taiwan. The focus of study is on the current status of the countries, the relations between them, and their place in the world's increasingly interconnected economy and culture.

GE 359. RUSSIA AND CENTRAL ASIA**3 HRS.**

This course focuses on the recent history of the region, from the late 20th-century fall of the Soviet Union to the present, emphasizing the region's transition from a centrally-planned economy to a free-market economic system and the accompanying socio-cultural changes that have accompanied it. The relationships between the Russian Federation and the Central Asian Republics will be a focus, as will Russia's changing place in the global political system and economy, particularly in terms of energy production and environmental issues.

GE 360. AUSTRALIA, NEW ZEALAND, AND THE PACIFIC**3 HRS.**

This course is a regional geography of the countries located in the South Pacific. Attention is given to the unique physical and biological characteristics of the region; indigenous cultures, legacies of colonialism, ongoing indigenous-settler relations; and more usual geographic themes including population, urbanization, economic and political geographies, historical influences, cultural landscapes, and more. Contemporary issues and tensions are also examined.

GE 365. WORLD REGIONAL CLIMATOLOGY**2-3 HRS.**

A study of the world climatic regions based upon a systematic classification system. The investigations of the cause of climatic variations and the effect of climate on man's natural environment.

GE 371. CARTOGRAPHY**3 HRS.**

Course covers the appropriate use of map elements, map design, projections, types of maps, and thematic mapping of different kinds of data. Class time is divided between lecture and computer lab, where most of the hands-on work is done.

GE 415. URBAN GEOGRAPHY**3 HRS.**

For the first time in human history, more than half of the world's population lives in urban areas, and rural-to-urban migration is changing the face of countries around the world. This course examines the increasing importance of cities; the impact of urban areas on non-urban; the structures of urban areas and how they differ among the world's regions. It also considers how residence in urban areas is conditioned by race, class, and gender in small as well as large cities, and explores urban cultural landscapes. The course reviews the origin and growth of cities, and focuses on recent changes in urban areas.

GE 425. RURAL GEOGRAPHY**3 HRS.**

The course is concerned with the characteristics of rural residence, land-use and settlement patterns. Focus is on rural areas in the United States, with comparison of rural issues in other parts of the world as appropriate. Issues examined include the changing nature of agricultural

production in the region and concurrent economic and social change; human-environment interactions; the impact of rural-to-urban migration on sending areas; the social structures of importance to rural residents, including issues related to ethnic change, gender roles, and class status.

GE 430. GENDER, PLACE, AND CULTURE**3 HRS.**

This course examines the important role of gender in structuring culture, and how gender roles and ideologies vary around the world. Gender and place are studied as key components of culture; the influence of place on culturally constructed differences such as gender, class and ethnicity is examined at scales from personal space and roles within the family and larger society, to the manners in which international leaders make decisions about distribution and control of resources that shape men's and women's lives in different regions and countries.

GE 438. GEOGRAPHIES OF INTERNATIONAL DEVELOPMENT**3 HRS.**

This course explores what the concept of development means for various countries of the world. The term "international development" is used to mean economic growth that provides better living circumstances for the people whose economy is growing. The focus of this course is on the uneven impacts of economic development and on the importance of other sorts of globalizing trends that affect people's lives in addition to economics. Clearly, not everyone benefits equally from a growing economy. Even within local areas, some people gain from economic progress while others continue to fall behind. The course will be framed by overarching geographic concepts such as gender and ethnicity, as well as geopolitics, war and civil unrest, cultural and economic globalization, uneven access to the benefits of growth and change, and the detriments and the advantages that may result from attempts at development.

GE 453. CONSERVATION OF NATURAL RESOURCES**3 HRS.**

A survey of the world's natural resources, with a focus on the United States in global context. Philosophies of resource protection, conservation and preservation are considered in the context of increasing global demands for energy, water, food, and other critical resources. The global economic, cultural and physical impacts of resource use, depletion, and conservation are analyzed from a geographic perspective, as are the global impacts of pollution, waste production and disposal, cultural-economies of resource conservation are emphasized in the context of human-environment interactions, as important themes of geographic study.

GE 454. CULTURAL GEOGRAPHY**3 HRS.**

This course uses the tools of geography to explore patterns of human culture. Themes may include cultural aspects of settlement, migration and diffusion, population, human-environment interactions, landscape, and more. Emphasis on human cultural expression at a variety of scales and in a range of locations.

GE 456. ECONOMIC GEOGRAPHY**3 HRS.**

This course emphasizes the present global patterns of production, distribution and consumption of the world's goods; the major areas and types of technological production, agricultural production, and extractive production; the global trade and communication patterns; the growth in power in nations accompanying their increases in industrialization; and the extreme difference in living standards throughout the world. These themes are analyzed as a background for interpreting contemporary economic, social and political problems.

GE 457. POLITICAL GEOGRAPHY**3 HRS.**

An introduction to the scope and content of political geography; the application of geographic information and techniques in analyzing politically significant regions of the world. Every attempt is made to keep the course up to date and the areas studied will be determined by their geopolitical significance at the time the course is given.

GE 460. HISTORY OF CARTOGRAPHY 3 HRS.

This course examines the way that humans use and communicate spatial information. The scope of the course ranges from prehistory to the computer age, and is cross-cultural, examining Asian, African, Islamic, and indigenous mapping as well as the Western cartographic tradition. At the end of the course students should gain an appreciation of this most basic geographic tool as the complex social and cultural phenomenon that it is.

GE 498. INDEPENDENT STUDY IN GEOGRAPHY 1-3 HRS.

(Prerequisites, three hours of geography, plus consent of instructor.) Special project or readings on a topic initiated by the student and approved by the instructor.

GE 500. SPECIAL TOPICS IN GEOGRAPHY 1-3 HRS.

Investigations into selected areas of geography.

GE 551. COMPUTER MAPPING SYSTEMS 3 HRS.

(Prerequisites, GE 371 or ES 545.) Theory and use of computer systems for capture, storage, analysis, and plotting of spatial information. Vector and raster geographic information systems, digitizing data, and spatial analysis. Practical applications of computer mapping systems. Two hours lecture and two hours laboratory per week, plus field trips. Students may not receive credit for both ES 551 and GE 551. Students should have a minimum math background of trigonometry; those without the prerequisites should consult with the professor before enrolling in the course.

GE 572. GIS APPLICATIONS 3 HRS.

(Prerequisites, GE/EB/ES 351, GE/EB/ES 551.) Provides students enrolled in the GSA program an opportunity to apply their GIS skills to a variety of practical projections and research issues, combining classroom and laboratory work. Students should already be comfortable using ESRI software.

GE 573. INTERNSHIP IN GEOGRAPHIC INFORMATION SYSTEMS 3 HRS.

(Prerequisites, GE572, GE/EB/ES351, GE/EB/ES551.) Provides students enrolled in the GSA program an opportunity to apply and develop their GIS skills through practical work in association with an approved internship agency. In addition to performing tasks as directed by that agency, the student will complete a written report for the supervising faculty member.

GE 701. SEMINAR IN REGIONAL GEOGRAPHY 1-3 HRS.

A seminar on the physical and cultural patterns and interrelationships existing in selected political regions with emphasis upon the distribution of human activities and effects of various environments upon man and national economic development.

GE 702. SEMINAR IN CULTURAL GEOGRAPHY 1-3 HRS.

In-depth study of topics related to geographic diffusion and distribution of elements of human culture, including migration and settlement, geopolitics, religions, economies, labor, popular culture, human-environment interactions, and other aspects.

GE 703. SEMINAR IN PHYSICAL GEOGRAPHY 1-3 HRS.

The seminar is designed to provide an opportunity for in depth examination geographical analysis of the spatial characteristics of one or more factors that constitute the physical environment. The seminar specifically treats such subjects as climate, soils, landforms, and biogeography.

GE 704. SEMINAR IN GREAT PLAINS GEOGRAPHY 1-3 HRS.

This course includes the methodology of regional analysis and delineates the Great Plains as a distinctive region. It examines

geographical features of the region's physical environment and human adaptation to it. Cultural landscape topics include agriculture, settlement patterns, ethnicity, transportation, historical geography, and other social and economic phenomena. Content and assignments will vary according to the number of credit hours for which the course is offered.

GE 710. SEMINAR IN KANSAS GEOGRAPHY 1-3 HRS.

A study of the physical, cultural, economic, and regional significance of Kansas as a state and its spatial interaction within the nation.

GE 810. RESEARCH PROBLEM IN GEOGRAPHY 1-3 HRS.

(Prerequisite, six hours of Geography, plus consent of instructor.) Special research problem or readings on a topic initiated by the student and approved by the instructor.

GEOLOGY**GO 231. PHYSICAL GEOLOGY 3 HRS.**

A descriptive study of the physical and chemical processes occurring on and within the Earth and the associated structures and features produced by these processes. The study and identification of minerals and rocks, topographic maps, and geologic maps. Field trips are required.

GO 324. ROCKS AND MINERALS 3 HRS.

(Prerequisites, ES110 and ES111.) An introduction to recognition, terminology, and classification of minerals, rocks, and sediments. Properties and genesis of rocks and minerals. Emphasis on sight identification and description using simple field and laboratory equipment. Lectures, laboratory exercises, and field trips.

GO 325. EARTH HISTORY 3 HRS.

(Prerequisites, ES110 and ES111.) The history of the Earth from primeval beginning to the emergence of modern man, as deduced from rocks, fossils, and sediments of the Earth's continents and oceans. Analysis of modern geologic and cosmic processes and their relationship to past, present, and possible future events on Earth. Geologic history of central North America. Two lecture hours and two lab hours per week, plus field trips.

GO 326. PLATE TECTONICS 3 HRS.

(Prerequisite, GO 325.) A study of the new global theory of plate tectonics as a unifying geological theory, which explains continental and oceanic geology of the past and present. Scientific development of plate tectonic theory over the past decades, as well as unsolved problems and possible future research. Two hours lecture and two hours lab per week.

GO 336. MINERALOGY 4 HRS.

(Prerequisites, ES110 and ES111.) The study of minerals of the Earth's crust with respect to their internal structure, chemistry, physical properties, and identification. The occurrence of these minerals in rocks will be related to the physical and chemical classification of rocks of the earth's crust. A background with introductory chemistry is highly desirable.

GO 340. GEMSTONES AND GEMOLOGY 2-3 HRS.

(Prerequisites, ES110 and ES111.) An introductory course that includes gem definitions, identification techniques, synthesis, imitations, enhancements, and precious metals. Gem identification techniques will be emphasized. Two-credit section, lecture only; three-credit section, lecture plus lab.

GO 506. ENVIRONMENTAL GEOCHEMISTRY 3 HRS.
(Prerequisite: CH 123 and CH 124.) A comprehensive look at sources, transport, reactions, and effects of chemical species in the hydrosphere, the lithosphere, and the atmosphere. This course may be taken for either Earth Science or Chemistry credit. Possible Field Trip.

GO 521. HISTORY OF GEOLOGY 2-3 HRS.
(Prerequisites, ES110 and ES111.) The historical development of geology as a scientific discipline from ancient civilizations to the modern space age. Historical context and cultural basis of major geological theories regarding the origin of the Earth and processes that have influenced the Earth's development. The lives and contributions of individuals whose ideas have shaped scientific thought and public opinion. Scientific technology, exploration, and the changing role of earth science through time. History of European, North American, and Kansan geology.

GO 533. ECONOMIC GEOLOGY 3 HRS.
(Prerequisites, ES110 and ES111.) The study of economic mineral deposits with respect to genesis, prospecting techniques, and physical characteristics.

GO 536. OPTICAL MINERALOGY 3 HRS.
(Prerequisite, GO336.) A three-hour lecture-laboratory course designed to acquaint the student with the use of the polarizing microscope and its applications to the study of rocks and minerals in thin section.

GO 547. FIELD GEOLOGY 5 HRS.
(Prerequisite, GO 325.) A five- week laboratory and field experience for geologists and earth science teachers designed to acquaint the student with the tools of geology and their application to the solution of geological problems. Offered alternate summers. Permission of instructor required to enroll.

GO 548. FIELD STRATIGRAPHY 2 HRS.
(Prerequisite, GO325.) The identification and interpretation of Upper Paleozoic strata in Eastern Kansas through field experiences. This course requires that the student be free most weekends of early fall.

GO 568. STRUCTURAL GEOLOGY 3 HRS.
(Prerequisites, MA112 and GO326.) Structural Geology deals with description and analysis of deformations produced within the Earth on all scales from the microscopic to the global. Topics investigated include: behavior of rocks and sediments under stress; nature of earthquakes; origin of mountain belts; and significance of ocean ridges, rifts, fracture zones, and trenches.

GO 569. INVERTEBRATE PALEONTOLOGY 3 HRS.
(Prerequisites, ES110 and ES111, or GB100 and GB101, or GB140 and GB141.) Attention in this course is focused on the structure and classification of fossil invertebrate animals. A study of the evolutionary trends and geological distribution of these animals also helps to emphasize their stratigraphic usefulness. This is accomplished through one one hour lecture and two two hour labs a week. In the lab the student works with actual fossil specimens of the various invertebrate phyla.

GO 570. SEDIMENTATION AND STRATIGRAPHY 3 HRS.
(Prerequisites, GO 325 and GO 324.) The origin and interpretation of stratified sequences of ancient sedimentary rocks and modern sediments. Methods used to study sedimentary rocks. Comparison of modern and ancient sedimentary environments. Two lecture hours and two lab hours per week, plus field trips.

GO 571. HYDROGEOLOGY 4 HRS.
(Prerequisites, ES110/111 or consent of instructor.) Geologic, hydrologic, and chemical factors controlling the distribution, abundance, quality, and development of surface water and groundwater. Surface and groundwater in the central U.S.A. will be emphasized. Two lecture hours per week and two lab hours per week, plus possible field trips.

GO 572. CONTAMINANT HYDROGEOLOGY 3 HRS.
(Prerequisites, ES571 and CH110/111 or CH123/124.) The distribution, behavior, and fate of contaminants in natural hydrologic systems are addressed as they relate to current environmental practices. Approaches to characterizing and monitoring contaminated groundwater, and strategies for remediation of contamination are emphasized.

GO 580. ENVIRONMENTAL FIELD METHODS 3 HRS.
(Prerequisites, GO 571 or equivalent.) This course provides an introduction to various tools and techniques used in the assessment of hydrogeologic investigations. Through a series of field exercises, students obtain practical "hands-on" experience with tools and equipment used by environmental industry practitioners and researchers. Data obtained in each exercise are analyzed and evaluated using relevant commercially available software, and presented in technical report writing style.

GO 766. PETROLOGY AND PETROGRAPHY 4 HRS.
(Prerequisite, GO336.) A study of rocks and minerals of the Earth's crust as natural chemical systems in which the mineral phases are in dynamic equilibrium with changing temperatures and pressures on and within the Earth's crust. Three hours lecture and three hours laboratory each week.

GO 769. VERTEBRATE PALEONTOLOGY 3 HRS.
(Prerequisites, ZO214 and ZO215.) The course will focus on the fossil record and evolution of vertebrate (backboned) animals through geological time. Origins, adaptive radiations, and extinctions of all major vertebrate groups will be covered, along with the utility of fossil vertebrates in stratigraphic correlations, analysis of depositional environments, paleobiogeography, and questions of evolutionary biology. The course is designed for students in Earth Science and Biology who have an interest in vertebrate evolutionary history. Permission of instructor required to enroll if specified prerequisite is not met.

GO 773. APPLIED HYDROGEOLOGY SEMINAR 2 HRS.
(Prerequisite GO 571.) This graduate seminar will explore real-world applications of hydrogeologic principles introduced in the introductory hydrogeology course (GO 571). Ongoing and new graduate and undergraduate student research projects will be considered in depth.

GERMAN

GR 100. SPECIAL PROJECTS IN GERMAN 1 HR.
Topics of general interest to non-German majors will be studied and some basic pronunciation characteristics of German will be introduced. Topics may be business, technical fields, music, tourism, etc.

GR 110. GERMAN LANGUAGE & CULTURE I 5 HRS.
Fundamental principles of pronunciation and grammar. Dictation, reading, simple speaking, and writing. Offered every fall.

GR 210. GERMAN LANGUAGE & CULTURE II 5 HRS.
Conversation, reading for comprehension, German life and culture. Offered every Spring.

GR 305. SUMMER STUDY ABROAD IN GERMANY 4 HRS.

(Prerequisite, GR 213 or permission of instructor.) Four-week course in Würzburg, Germany offered in July. Combines daily intensive classroom instruction with organized cultural activities and excursions. Emphasis on strengthening conversational and compositional skills, expanding vocabulary, and deepening cultural awareness.

GR 313. GERMAN LANGUAGE & CULTURE III 4 HRS.

Continuation of German Language & Culture II. Expanded understanding and speaking with greater emphasis on reading and writing. Study of the culture of German-speaking countries continued. Offered every Fall.

GR 314. GERMAN LANGUAGE & CULTURE IV 3 HRS.

Continuation of German Language & Culture III and completion of the basic program. Expanded understanding and speaking with added emphasis on writing and reading. Study of the culture of German-speaking countries continued. Offered every Spring.

GR 339. READING AND CONVERSATION 3 HRS.

(Prerequisite, GR 214 or equivalent.) This course is designed to promote further development of reading and speaking skills as well as to enhance the student's knowledge of contemporary culture of German-speaking countries.

GR 359. GERMAN LANGUAGE PAST AND PRESENT 3 HRS.

(Prerequisite, GR 314 or equivalent.) History of the German language, deeper analysis of grammar, and other aspects of linguistics will be emphasized. This course is intended to further develop the student's abilities in composition.

GR 365. INTRODUCTION TO LITERATURE 3 HRS.

(Prerequisite, GR 339 or GR 359 or permission of instructor.) General introduction to the principles and vocabulary of literary study in German. Works of German, Austrian, and Swiss German literature will be read to illustrate these principles.

GR 379. CIVILIZATION OF GERMAN-SPEAKING COUNTRIES 3 HRS.

(Prerequisite, GR 339 or GR 359 or permission of instructor.) Culture, history, geography, and economy of German-speaking countries.

GR 389. STUDIES IN THE CULTURE OF GERMAN-SPEAKING COUNTRIES 3 HRS.

(Prerequisite, GR 379.) An in-depth study of issues in Central European cultures. Content will vary from year to year with possible emphases on history, film, politics, racial and ethnic issues, etc.

GR 435. SURVEY IN GERMAN LITERATURE 3 HRS.

(Prerequisite, GR 365.) An introduction to prominent issues, themes, and writers in German literature from the medieval period through the 20th century.

GR 445. READINGS IN GERMAN LITERATURE 3 HRS.

(Prerequisite, GR 365.) In-depth study of issues, writers, and genres in German literature.

GR 475. INDEPENDENT STUDY 1-4 HRS.

(Prerequisite, permission of instructor.)

GR 495. SPECIAL TOPICS IN GERMAN 2-3 HRS.

(Prerequisite, GR 214 or equivalent.) Topics selected from German literature, language, or culture.

HISTORY**HI 101. WORLD CULTURES TO 1500 † 3 HRS.**

An introductory survey covering the origins of settled societies around 3000 B.C.E., the rise of classical Greek and Roman cultures in Europe and their contact with other civilizations in Asia, and the development of medieval Europe and its interaction with nonwestern peoples.

HI 102. MODERN WORLD CIVILIZATION † 3 HRS.

An introductory survey covering world history from 1500 to the present, with an emphasis on the forces that have shaped the contemporary world. Special attention is given to the Reformation, the age of Louis XIV of France, the rise of modern Germany, Soviet Russia, and the two world wars.

HI 111. U.S. HISTORY TO 1877 † 3 HRS.

An introductory survey of early American history from the colonial period through the Civil War and Reconstruction.

HI 112. U.S. HISTORY SINCE 1877 † 3 HRS.

An introductory survey of the United States since the Reconstruction era.

HI 300. TOPICS IN WORLD HISTORY 1-3 HRS.

Explores important issues in world history at the undergraduate level. Each semester, instructors select different topics of importance for political, cultural, social, ethnic, and/or gender history.

HI 301. TOPICS IN U.S. HISTORY 1-3 HRS.

Explores important issues in U.S. history at the undergraduate level. Each semester, instructors select different topics of importance for political, cultural, social, ethnic, and/or gender history.

HI 302. INTRODUCTION TO HISTORY 3 HRS.

This course introduces students to the discipline of history and how it is practiced professionally across the globe. Students examine historiography, methodology and the varying types of history, including social, cultural, political, biographical, gender, memory and interdisciplinary approaches. Throughout the course students will engage in the reading, research, and writing of history.

HI 303. TEACHING WITH PRIMARY SOURCES 3 HRS.

This course will provide secondary social science education majors a framework for teaching with primary sources in the middle and secondary social studies classroom and provide an opportunity for preservice teachers to create and teach topic-specific, content informed lessons that integrate primary sources and exemplify effective instructional practices.

HI 310. PRE-CLASSICAL AGE, 3000-500 B.C.E. 3 HRS.

Explores the formation of civilizations in Mesopotamia, Egypt, the Mediterranean, the Indus Valley, and China from 3000 B.C.E. to 500 B.C.E. It focuses on the foundations of settled societies, trade networks between these peoples, and cultural borrowing.

HI 311. ANCIENT GREECE, 800-200 BCE 3 HRS.

Explores Hellenic and Hellenistic history from the rise of the city-state to the decline of Alexander's empire, focusing on political and social developments, philosophical responses, and attitudes toward non-Greeks as city-states move from defensive to offensive military stances and as Alexander spreads Hellenic culture throughout his empire.

HI 312. ROMAN WORLD, 500 BCE-500CE 3 HRS.

Explores political, social, and religious developments in the Roman Republic, the Principate, and the Dominate, emphasizing reactions to shifts in government, the creation of the empire, borrowing from previous and contemporaneous cultures, the rise of Christianity, and increasing challenges to state authority by the fourth century.

HI 313. MEDIEVAL EUROPE, 500-1500 3 HRS.

Explores culture, government, and society in the Middle Ages, with special emphasis on religious movements such as the crusades, intellectual movements such as scholasticism and humanism, social responses to the rise of cities, and attitudes towards Jews and Muslims in Christian Europe.

HI 314. EARLY MODERN EUROPE, 1350-1650 3 HRS.

Explores the intense intellectual, religious, and social changes Europe experienced from the late Middle Ages through the Renaissance/Reformation era. Special attention will be paid to the rise of powerful monarchies, the breakdown of religious unity, reactions to the voyage of discovery, and the Scientific Revolution.

HI 316. AGE OF REVOLUTIONS, 1760-1848 3 HRS.

Explores revolutionary agitation in Europe and the Western Hemisphere during the eighteenth and nineteenth centuries. The course will examine the causation of the revolutions in America, France, and Haiti in the eighteenth century as well as the Industrial Revolution and the revolutions of 1820, 1830, and 1848.

HI 317. AGE OF EMPIRE, 1848-1914 3 HRS.

Explores political and social situations in Europe and the world from the Crimean War until the outbreak of World War I. The course will review imperialism in Africa and China, as well as the situation of women, workers, and minorities struggling for political rights in the late nineteenth century.

HI 318. AGE OF TOTAL WAR, 1900-1945 3 HRS.

Explores the shifting balance of world power in the twentieth century: World War I, the Russian Revolution, inter-war turmoil, and World War II, including an emphasis on diplomatic policies that failed to avert the coming of World War II and the Cold War.

HI 319. THE WORLD SINCE 1945 3 HRS.

Explores events, trends, and interpretations in world history since World War II, including the end of colonialism in Asia and Africa, the Cold War and its worldwide impact, the Maoist Revolution in China, the Korean War, third-world revolutions, the Arab-Israeli conflict, and the breakdown of bipolar alliances after 1989.

HI 333. KANSAS 3 HRS.

Explores the history of Kansas from 1541 to the present, with emphasis on approaches to state history and a special focus on geographic influences in the state's history and culture.

HI 340. ORIGINS OF COLONIAL AMERICA 3 HRS.

Explores the interactions between various European and tribal powers leading to the creation of multicultural enclaves and empires within the New World. Special attention will be paid to Spanish, French, and English colonial efforts and the responses of Native Americans as their cultures faced unprecedented challenges.

HI 341. AMERICAN REVOLUTION, 1763-1789 3 HRS.

Explores political, military, economic, and social transformation from the colonial period through revolution to the ratification of the Constitution. The course will highlight key leaders and major events, but it will also examine the Revolution's effect on women, Native Americans, and African Americans.

HI 342. EARLY REPUBLIC, 1789-1848 3 HRS.

Explores the United States from the writing of the Constitution to the end of the Mexican War, focusing on the development of political parties, women in American Society, the Market Revolution, the nation's westward expansion, and tensions regarding slavery and native Americans.

HI 343. CIVIL WAR ERA, 1848-1877 3 HRS.

Explores origins of the Civil War, the war itself, and Reconstruction, with emphasis on related political, military, economic, and social changes. Special attention will be paid to the centrality of slavery and emancipation, the transforming power of the war for individuals and institutions, and the difficulties of reunion.

HI 344. RECONSTRUCTION & THE GILDED AGE, 1865-1900 3 HRS.

Explores the United States from 1865 to 1920, focusing on social movements concerning immigration, labor unions, Jim Crow laws, treatment of Native Americans, women's reforms, world's fairs, and utopian movements, as well as the broader trends of population, progressivism, big business, socialism, and imperialism.

HI 345. UNITED STATES, 1900-1945 3 HRS.

Explores American society after World War I, with special attention on the nature of politics, culture, and economics during the 1920s, the Great Depression, the presidencies of Herbert Hoover and Franklin Roosevelt, the origins of World War II, and the effects of the war.

HI 346. UNITED STATES, 1945-1974 3 HRS.

Explores American society from the end of World War II to the resignation of Richard Nixon, covering domestic liberalism, the Cold War, McCarthyism, the civil rights movement, the 1960s, Vietnam, and the rise of conservatism.

HI 347. UNITED STATES SINCE 1974 3 HRS.

Explores recent American history, focusing on the decline of liberalism, the rise of conservatism, the end of the Cold War, the Gulf War, and the war on terrorism through the presidencies of Ronald Reagan, George Bush, Bill Clinton, and George W. Bush.

HI 401. CURRENT HISTORY 1 HR.

Explores the complexities of the modern world by reviewing the news, as well as analyzing the fundamental cultural, political, and social forces that divide the world today. The pressing issues of globalization, terrorism, and war will be discussed.

HI 410. HISTORY OF ISLAM TO 1500 3 HRS.

Explores the origins of Islam, its early doctrinal splits, and expansion; the Umayyad, Abbasid, and Ottoman caliphates; cultural and intellectual developments; interaction between Muslims and peoples of other faiths.

HI 411. MEDIEVAL CRUSADES AND CRUSADERS 3 HRS.

Explores the origins of crusading in the eleventh century, early crusades and their effects on Byzantine and Islamic power players in the Levant, expansion of the crusading movement within Europe, and the effects on medieval European society.

HI 412. MODERN MIDDLE EAST 3 HRS.

Explores the Middle East from the Ottoman Empire of the fifteenth century through its waning in the eighteenth and nineteenth; European imperialism in the region and its redrawing of boundaries following World War I, with an emphasis on Arab nationalism, the Gulf War, and terrorism.

HI 414. WESTERN THOUGHT, 800-1500 3 HRS.

Explores intellectual developments in European society and their historical context, focusing on medieval theology and philosophy, the social and political environment in which these ideas emerged, and their effects (if any) on these societies. Special attention will be paid to scholasticism and humanism and reactions to non-Christian ideas.

HI 416. ANATOMY OF REVOLUTIONS 3 HRS.

Explores the causes of revolutions from the sixteenth to the twentieth century, focusing on historical context, ideological positions, exportation of revolutionary ideas, the foreign policy of revolutionary states, and the role of revolutions and revolutionaries in world affairs.

HI 418. IMPERIAL RUSSIA 3 HRS.

Explores Russian history under autocratic tsars from Peter the Great until Nicholas II, focusing on geographical expansion; reforms initiated by Alexander II; the rise of Nihilism and the People's Will; the impact of industrialization and worker unrest; imperial policies and popular reactions culminating in revolution.

HI 419. SOVIET UNION 3 HRS.

Explores the history of modern Russia with a particular emphasis on the nineteenth-century background of the Communist Revolution, the revolution itself, the Stalin era, and changes after World War II.

HI 423. WAR AND SOCIETY 3 HRS.

Explores war and its effect on history from the ancient world to the twenty-first century, focusing on the quest for national security, as well as the cultural and technological factors, social transformations, and influence on art, music, and popular culture.

HI 424. WORLD WAR I 3 HRS.

Explores the war's origins and effects on world history, focusing on transformations that led to other conflicts in the twentieth century. Special attention will be paid to diplomatic and military components, reactions by the intelligentsia, and the experiences of women and ordinary soldiers during and after the war.

HI 425. WORLD WAR II 3 HRS.

Explores the diplomatic background, military operations, domestic developments, and peace settlements of the war. Special attention will be paid to its causes, social and economic change related to the war, scientific and technological achievements, the clash of ideology, and the war's influence on world history since 1945.

HI 426. THE HOLOCAUST 3 HRS.

Explores the Holocaust's historical origins from the time of Christ to the development of modern anti-Semitism, focusing on cultural and social factors that allowed genocide of state-designated "undesirables" in Germany, comparison with other similar movements in the twentieth century, and reactions by world powers.

HI 427. VIETNAM 3 HRS.

Explores the political, social, and military developments in Vietnam focusing on the country's desire for independence, international commitments of support, and the war itself. Special attention will be paid to social forces in Vietnam, Europe, and the United States that shaped the conflict on the battlefield and at home.

HI 428. RISE AND FALL OF COMMUNISM 3 HRS.

This course will review the rise and fall of the major communist regimes in Russia and Eastern Europe from 1917 through 1991. The class will examine the failures of the Soviet experiment and the struggle to establish Communist states in Europe and Asia following World War II. The course will also place considerable emphasis on the surviving communist regimes in Asia and the Caribbean that weathered the democratic impulse following the fall of the Iron Curtain.

HI 429. MODERN EUROPE 3 HRS.

The course will focus on the comparative development of France, Germany, Great Britain, and Eastern Europe from the French Revolution through the Cold War. An additional emphasis will be placed on Europe's political and cultural development in the formative decades following Germany's defeat in 1945.

HI 430. COUNTRY FOLK AND THE LAND 3 HRS.

Explores the interconnection between Americans and land through the effects of agricultural developments on U.S. policy and culture and the impact of national or international affairs on the rural sector.

HI 431. GREAT PLAINS HISTORY 3 HRS.

Explores peoples, agriculture, town development, and politics in the Great Plains region, all of which have contributed to a unique regional identity as both the Great American Desert and the Breadbasket of the U.S.

HI 432. WESTERN EXPANSION TO 1860 3 HRS.

Explores U.S. territorial growth from the colonial period through Reconstruction, focusing on the various peoples who migrated and their interaction with those already living in newly opened territories; local, national, and international events and their impact; the effects of expansion on national affairs.

HI 435. AMERICAN MILITARY HISTORY 3 HRS.

Explores the genesis and development of the U.S. military tradition from the colonial period to the present, focusing on the experiences of the common soldier, the major military campaigns, postwar military adjustments on the home front, and the major military leaders and personalities throughout American History.

HI 439. AMERICAN RELIGIOUS HISTORY 3 HRS.

Explores the role of religion in shaping American history and culture, focusing on colonial development, witchcraft, the Great Awakenings, war, fundamentalism, spiritualism, the occult, Islam and terrorism and the current state of religion in America.

HI 440. SEX AND VIOLENCE IN 19TH CENTURY AMERICA 3 HRS.

This course introduces the history of sex and violence in the nineteenth century, focusing on racial and gender violence rooted in concepts of masculinity and femininity. Students will explore several different types of violence; racial violence; the concept of honor and how men used violence to assert their dominant male identity; sexual violence, particularly with the rampant murder of prostitutes in major cities and how women struck back at abusive men; violence through warfare; and mob violence. Students will examine racial and gender identity. Sex and violence are tools used to examine and better understand how racial, ethnic, class and gender identities formed throughout the nineteenth century, one of the most violent in American History.

HI 441. THEMES IN AMERICAN INDIAN HISTORY 3 HRS.

Explores some enduring themes in Native American history, such as cultural contact and interaction, patterns of resistance and adaptation, and conflicting views about the very nature of history and control of access to information.

HI 443. AFRICAN AMERICAN HISTORY 3 HRS.

Explores African Americans from the colonial period to the present, focusing on the burden of and resistance to slavery; the meaning of freedom in the United States, the Civil Rights movement, and the current status of African Americans.

HI 444. SOUTHERN HISTORY TO 1865 3 HRS.

Explores the political, economic, and social development of the antebellum South, focusing on slavery, southern society and culture, and governmental changes from settlement through the Civil War.

HI 445. SOUTHERN HISTORY SINCE 1865 3 HRS.

Explores the political, economic, and social development of the post-bellum South, focusing on race relations from Reconstruction through the Civil Rights movement, southern society and culture, and governmental changes to the present.

HI 446. POLITICAL PARTIES, 1789-1896 3 HRS.

Explores political parties in the United States, emphasizing the founding fathers' attitudes, political parties throughout the nineteenth century, and political culture. Special attention will be paid to elections, party formation and structure, platforms, third party movements, and movements outside of parties.

HI 447. POLITICAL PARTIES SINCE 1896 3 HRS.

Explores political history in the twentieth century focusing on political parties, the electorate, and changes in the party system. Special attention will be paid to crucial presidential elections and the ideologies that determined their outcomes.

HI 448. AMERICAN DIPLOMATIC HISTORY 3 HRS.

Explores major issues and events from the revolutionary period to the present in American diplomacy, emphasizing western expansion, imperialism, the world wars, the Cold War, nuclear issues, and Third World relations.

HI 450. AMERICAN INTELLECTUAL HISTORY 3 HRS.

Explores American thought from the colonial period to the present, focusing on ideas about religion, politics, writing, the arts, and philosophy in their historical context.

HI 451. HISTORY AND FILM 3 HRS.

Explores historical films, which academic historians often fault for inaccuracy, and the version of history they portray. Students will consider whether traditional written histories are more or less true than those film makers create by comparing documentaries, art films, and Hollywood productions to narrative texts.

HI 452. HISTORY, MYTH, AND MEMORY 3 HRS.

Explores the relationships and interaction between personal memories, cultural myths, and interpretations of the past, focusing on the dynamics between what people remember—history—and why they might remember it in particular ways.

HI 453. HISTORY OF BASEBALL 3 HRS.

Baseball has long been considered America's national pastime. The course examines the history of the game and how baseball reflects American cultural and social norms, focusing on baseball as a microcosm of American society, from its humble beginnings to the multi-billion dollar empire it has become. Students will study the mythology that has shaped our view of baseball, separating fact from fiction by scrutinizing how baseball reflects and directs social changes from the late 19th century to today.

HI 454. HISTORY AND BIOGRAPHY 3 HRS.

Explores biography as a branch or sub-discipline of history, emphasizing the historiography and theory of biographical writing as well as the practice of biography. Special attention will be paid to problems in writing biographies of women, minorities, and the marginally famous.

HI 457. HISTORY OF IMMIGRATION 3 HRS.

Explores immigration to the United States from the migrations of native peoples to the present day, focusing on social history and adaptive strategies of various ethnic groups. Special attention will be paid to nineteenth- and twentieth-century immigration by the Irish, eastern and southern Europeans, Asians, and Hispanics.

HI 461. ENGLAND SINCE 1660 3 HRS.

Explores developments in English political, social, and intellectual traditions since 1660 and the spread of British influence throughout the modern world.

HI 462. ENGLAND IN FILM 1 HR.

Explores English history since 1660 through American and British films, focusing on historical accuracy and the artistic choices of the film makers. Students will view and discuss the films' content and context.

HI 463. HISTORY OF IRELAND 3 HRS.

Explores Ireland and Irish people from prehistoric time to the present, with an emphasis on medieval Irish religion and culture, the famine of the 1840s, and relations with Great Britain in the twentieth century.

HI 464. IRELAND IN FILM 1 HR.

Explores representation of modern Ireland through films, focusing on artistic choices and historical accuracy. Students will view films and discuss their content and context.

HI 473. HISTORY OF TERRORISM 3 HRS.

This course is designed for students interested in the historical origins of political terrorism as well as state-sponsored terrorism and non-state terrorist actors such as al-Qaeda. Students will examine the evolution of terrorism from ancient and medieval times with a focus on the 19th, 20th, and 21st centuries, when political violence has been perceived as a method of creating political change. The course will assess national responses to terrorism, from repression and curtailment of civil liberties, to the creation of new government agencies, to construction of walls to keep terrorists at bay. Students will consider the political, social, and economic factors, as well as modern technologies and weapons that make terrorism possible.

HI 474. CHINA TO 1800 3 HRS.

Explores Chinese history and thought from prehistoric times until western contact began to transform the country, focusing on central elements in intellectual movements, government, religion, personalities, and major events.

HI 475. MODERN CHINA 3 HRS.

Explores Chinese history from 1800 to the present, emphasizing the impact of the West in the nineteenth and twentieth centuries, war and revolution in modern China, and the impact of communism.

HI 476. COLONIAL LATIN AMERICA 3 HRS.

Explores Latin America from pre-Columbian times to 1910, focusing on major events, historical processes, individuals, cultural, and religious norms, and interaction between Amerindians, Africans, and Europeans in the region.

HI 477. MODERN LATIN AMERICA 3 HRS.

Explores political, economic, and social history in Latin America from the late nineteenth century to the present, focusing on internal and international processes that have shaped change or reinforced continuity in this region.

HI 479. CONSPIRACY THEORIES 3 HRS.

Conspiracy theories have shaped popular perceptions involving major historical events. The course will review how conspiracy theories are used and the purpose they serve in galvanizing support for specific political agendas. The class will examine the Protocols of the Elders of Zion, and how it is even used today, as well as the Lincoln, Kennedy, and King assassinations and Pearl Harbor, the Red Scare, the tragedy of Oklahoma City and the events concerning 9/11.

HI 480. INTRODUCTION TO WOMEN'S STUDIES 3 HRS.

Explores issues, themes, theories, and application of women's studies as they contribute to women's experiences in many spheres. The course will focus primarily on common experiences of women in the United States and the differences created by race, class, ethnicity, sexual orientation, and age.

HI 483. AMERICAN WOMEN'S HISTORY 3 HRS.

Explores women's lives from the colonial period to the present, focusing on their common experiences as girls, wives, mothers, slaves, workers, and activists, while noting differences determined by region, religion, ethnicity, and class. Special attention will be paid to advances in education, employment, and political and social equality.

HI 484. EARLY AMERICAN WOMEN 3 HRS.

Explores women's experiences from the colonial period to 1890, focusing on ethnic differences affecting women's roles in the colonies; the effects of political and social reform, war, immigration, and labor movements; women's reactions to marriage and legal inequality in the nineteenth century.

HI 485. WOMEN OF THE OLD WEST 3 HRS.

Explores women's history in the westward expansion of the nineteenth century, focusing on shared experiences as pioneers, wives, mothers, single women, workers, and native peoples while noting the differences determined by region, race, religion, ethnicity, and social class. Special attention will be paid to myths and stereotypes of western women.

HI 486. MODERN AMERICAN WOMEN 3 HRS.

Explores women's history from 1890 through the present, focusing on women's roles in the Depression, two world wars, the Fifties, the Women's Liberation Movement, and recent political and social issues confronting women. Special attention will be paid to race and ethnicity as major factors in women's experiences.

HI 487. GAY AND LESBIAN HISTORY 3 HRS.

Explores Gay and Lesbian Americans from the colonial era through the present, focusing on the evolution of sexual identity and acceptance, the crisis of conformity, Stonewall and the Civil Rights era, and the current status of being gay in America.

HI 488. SEXUALITY IN EARLY AMERICA 3 HRS.

This class will explore both how restrictions on the practice of sex in early America changed and how various people used the concept of gender to justify access (or denial) to a woman's body—and this in turn reinforced and justified a variety of policy decisions regarding slavery, rape, and marriage to name a few.

HI 498. INDEPENDENT STUDY IN AMERICAN HISTORY 1-3 HRS.

Special project or readings on a topic initiated by the student and approved by the instructor. Consent of instructor required.

HI 499. INDEPENDENT STUDY IN WORLD HISTORY 1-3 HRS.

Special project or readings on a topic initiated by the student and approved by the instructor. Consent of instructor required.

HI 501. PHILOSOPHY & WRITING OF HISTORY 3 HRS.

Designed to acquaint the history major with major historians and their writings from Herodotus to the present, and make the student aware of methods of research and analysis, bibliography, and source criticism. Required of undergraduate history majors and of those graduate students who have not had a comparable course at the undergraduate level.

HI 502. FIELD STUDY IN HISTORY 1-3 HRS.

(Prerequisite, consent of instructor.) Travel in the United States and abroad to encounter first-hand the history and artifacts of another culture and time period. Visits to historical sites, parks, neighborhoods, and museums are included. Offered in conjunction with a related history course (not required), field study courses incur separate expenses beyond tuition.

HI 503. RESEARCH SEMINAR IN HISTORY 3 HRS.

(Prerequisites, consent of instructor and senior standing.) In this course, students will complete a research project on an historical topic. The project involves formulating an historical question, then analyzing primary and secondary sources to craft an original argument that situates the topic within relevant historiography.

HI 504. INTRODUCTION TO GRADUATE STUDIES 1-3 HRS.

This course orients graduate students to the requirements of the History M.A. program. It explores all aspects of graduate study: faculty expectations of graduate students, decision points for thesis and non-thesis options, options for further study and/or history-related jobs after the M.A. By the end of the course, graduate students should know how different aspects of the M.A. program will best help them pursue their career goals; undergraduates should be better prepared to excel in graduate school if they decide on further study.

HI 505. PROFESSIONAL DEVELOPMENT FOR HISTORIANS 1-3 HRS.

HI 505 is the course for history students to help them market their training, abilities, and experience. We will focus on professional development skills such as writing application materials (résumés and vitae, cover letters, and other materials you may need to submit), preparing for and "selling" oneself in interviews, and giving sample job talks or presentations.

HI 506. HISTORY CAPSTONE 1 HR.

The history capstone course is intended to celebrate the culmination of the history degree. Students participate in critical reading and thinking exercises, discuss controversial historical issues, and assess their experience in the history degree program. The course meets on one Saturday in spring semester and is facilitated by different members of the faculty each year.

HI 510. READINGS IN WORLD HISTORY 1-3 HRS.

(Prerequisite, consent of instructor.) Involves readings and discussions on selected topics of major historical significance in European and world history.

HI 530. SANTA FE TRAIL SYMPOSIUM 1-2 HRS.

For one hour, students will attend conference style sessions and trail trips in conjunction with the Santa Fe Trail Association. Location varies, alternating years between the Rendezvous in Kansas and the symposium that is held at some designated trail site. For additional credit hours the students will do additional research and writing components.

HI 540. READINGS IN U.S. HISTORY 1-3 HRS.

(Prerequisite, consent of instructor.) Involves readings and discussions on selected topics of major historical significance in U.S. history.

HI 550. CONSTITUTIONAL HISTORY 3 HRS.

The development of constitutional government in the United States from principles incorporated in the colonial charters to the constitutional breakdown of the Civil War. Consent of instructor required.

HI 590. INTRODUCTION TO PUBLIC HISTORY 3 HRS.

Explores the historical profession as practiced outside the classroom, focusing on the career opportunities within public history and their various methodologies and skills. Special attention will be paid to the importance of historical memory and how people use it.

HI 591. LOCAL HISTORY 3 HRS.

An investigation of historical memory in communities, where students explore various aspects of local history using appropriate research techniques and methods on diverse sources such as architecture, rituals, local heroes, or customs. Designed for students going into public history.

HI 592. ARCHIVAL MANAGEMENT 3 HRS.

(Prerequisite, HI 590.) An introduction to the principles, skills, and theory of archival management, including digitization and preservation, which can be applied in a wide variety of settings such as libraries, museums, and corporations to documents, artwork, and artifacts. Designed for students going into public history. Consent of instructor required.

HI 593. MUSEUM INTERNSHIP 1-3 HRS.

(Prerequisite, HI 590.) A hands-on experience for senior history majors interested in public history. The faculty supervisor and student will discuss goals and specific skills, then the student will intern in a museum or historic site for 120 hours and complete at least one project demonstrating mastery of internship objectives. Consent of instructor required.

HI 594. ARCHIVAL INTERNSHIP 1-3 HRS.

(Prerequisite, HI 590.) A hands-on experience for senior history majors interested in public history. The faculty supervisor and student will discuss goals and specific skills, then the student will intern at an archive for 120 hours and complete at least one project demonstrating mastery of these objectives. Consent of instructor required.

HI 595. PRESERVING THE PAST THROUGH PERFORMANCE 1-3 HRS.

Introduces the methodologies which lead to successful first person Chautauqua-style historic interpretation. Students will select a historic personage or composite character, research the person and historical context, create a script, and perform for classmates. Additional credit will involve further research, gaining enough confidence to take questions in character and as a scholar, and developing a study guide.

HI 701. U.S. HISTORIOGRAPHY THROUGH RECONSTRUCTION 3 HRS.

This course is designed to introduce graduate students to some of the central historical questions and interpretations of American history from roughly 1600-1877. In addition, our exploration of historical literature and scholarship is designed to shed light on the processes through which historians interpret the past as well as engage each other in debate.

HI 702. U.S. HISTORIOGRAPHY SINCE RECONSTRUCTION 3 HRS.

This course is designed to introduce graduate students in History to broad themes and topics in the History of the United States from 1877 to the present. The focus will be on treatment of major problems which emerged in the history of the United States during that era and how historians have debated and discussed such topics.

HI 710. READINGS IN WORLD HISTORY 1-3 HRS.

Selected main events, trends, and interpretations in World history will be examined through readings, reports, and discussion. Designed to introduce the important literature on significant historical topics.

HI 740. READINGS IN U.S. HISTORY 1-3 HRS.

Selected main events, trends, and interpretations in American history will be examined through readings, reports, and discussion. Designed to introduce the important literature on significant historical topics.

HI 790. DIRECTED READINGS I 1-3 HRS.

Special research problems or readings on a topic initiated by the student and approved by the instructor. Consent of instructor required.

HI 791. DIRECTED READINGS II 1-3 HRS.

Special research problems or readings on a topic initiated by the student and approved by the instructor. Consent of instructor required.

HI 801. SPECIAL TOPICS IN HISTORY 3 HRS.

Selected main events, trends, and interpretations in history will be examined through readings, reports, and discussion. Designed to introduce the important literature on significant topics in history. Emphasis may be given to techniques of analysis as well as to the nature of the problems examined.

HI 815. RESEARCH SEMINAR 3 HRS.

Designed to give graduate students experience in conducting research in history. Required for those graduate students concentrating in American or World history who are pursuing the 36-hour master's program.

HI 890. THESIS, M.A. 1-6 HRS.

Candidates for the Master of Arts in History will enroll for this course and be assigned by the Graduate Committee of the department to an appropriate member of the department faculty for guidance.

HI 891. ARCHIVAL INTERNSHIP 3-6 HRS.

(Prerequisite, permission to enroll must be approved by program adviser no later than three months prior to the time actual work is to begin.) Supervised archival or museum experience. Students are expected to live in the area of the museum or archive where work is conducted.

HI 892. MUSEUM INTERNSHIP 3-6 HRS.

(Prerequisite, HI 590.) A hands-on experience for senior history majors interested in public history. The faculty supervisor and student will discuss goals and specific skills, then the student will intern in a museum or historic site for 120 hours and complete at least one project demonstrating mastery of internship objectives. Consent of instructor required.

HI 894. MA PROJECT 3 HRS.

Candidates for the Master of Arts in History with a concentration in Public History or Social Sciences Education will complete a Master's Project under the guidance of a faculty member in the Department of Social Sciences. Guidelines for the MA Project are found in the department's graduate policies and procedures manual.

HI 895. HISTORY MA EXAMS 1-3 HRS.

(Prerequisite, Permission of Instructor.) This course coordinates the exam portion of the Master of Arts in History non-thesis option. Students must be enrolled in this course the semester they plan to take the written exam and work with the MA Coordinator to arrange exams.

HEALTH**HL 143. GENERATING OPPORTUNITIES THROUGH ACADEMIC AND LIFE SKILLS (GOALS) 2 HRS.**

This course is designed to assist students in the development of strategies essential to a successful academic career. Additionally, students will gain an informative view on how drugs affect the mind, and body performance. Ultimately, students will be encouraged to implement a strategic plan that will help them to achieve success in athletics, academics and careers.

HL 150. CRITICAL HEALTH ISSUES AND DECISIONS IN SOCIETY 3 HRS.

Critical Health Issues and Decisions in Society examines underlying health and wellness issues and recommendations and the theory and practice of implementing health enhancement strategies. In addition, the relationship between health and larger cultural and societal issues are analyzed. This course encourages students to confront the broad issues that link health to political and social policies. Risk assessment and behavior change strategies will be addressed.

HL 155. FIRST AID AND PERSONAL SAFETY ▶ **2 HRS.**
Theory and practice in the American National Red Cross Standard, First Aid, Personal Safety, and Cardiopulmonary Resuscitation.

HL 250. INTRODUCTION TO HEALTH & HUMAN PERFORMANCE **3 HRS.**
This course is designed to provide students with the foundational concepts and processes used to plan successful health education and health promotion programs in corporate, clinical, private, community and academic settings.

HL 251. CONSUMER HEALTH **2 HRS.**
Investigation of health-related products and services, as well as of the American health care system. Promotion of consumer understanding that will result in the making of intelligent health decisions.

HL 252. DRUGS AND HUMAN HEALTH **2 HRS.**
This course provides a framework for basic understanding of the classifications of various drugs as well as distinguishing the drugs according to schedules, prescription requirements and addictive properties. The course will also determine the differences between drug use, misuse and abuse. The positive aspects of drug use as well as alternative remedies will be addressed.

HL 340. VIOLENCE PREVENTION STRATEGIES **2 HRS.**
This course addresses effective violence prevention strategies used by teachers and school staff in the school environment. Emphasis will be on developing teacher skills and strategies for organizing and implementing comprehensive violence prevention programs in the school classroom and environment.

HL 344. MODIFYING HEALTH BEHAVIOR **3 HRS.**
This class targets professionals who are interested in health behavior change as a technique in the overall prevention or treatment of health problems. Emphasis is given to definitions and origins of traditional behavior change, behavior change theory and techniques for making changes in behaviors. An integration of educational, organizational and environmental interventions will be presented that are designed to enhance individual and community health.

HL 350. HEALTH RISK FACTORS **3 HRS**
(Prerequisite, HL 150.) This course allows students to obtain, interpret and understand basic health information and services. The class will examine the major concepts, ideas, research and teaching strategies related to health risk behaviors. Future professionals will also learn basic curriculum and lesson plan development and complete practical teaching experiences.

HL 353. COMMUNITY HEALTH PROGRAMS AND SERVICES **3 HRS.**
Principles and practices of community health programs and voluntary health agencies. Identification of the relationship between local, state, and national community health programs. Organization and administration of community health programs and voluntary health agencies.

HL 354. ENVIRONMENTAL HEALTH AND HUMAN DISEASES **3 HRS.**
Survey of basic environmental health problems such as air, water, solid waste, noise, and radiation pollution with special consideration given to population-related issues. Included will be a study of pollution factors related to causality of diseases and the human body's ability to resist certain pathogens.

HL 355. HEALTH PROMOTION PROTECTION MANAGEMENT **3 HRS.**
(Prerequisite, HL 150.) This course is an overview of the most common chronic and preventable diseases currently in the United States. A significant amount of time will be devoted to learning the most effective methods of preventing these diseases and how to effectively educate assorted at-risk populations regarding these methods.

HL 356. HEALTH FITNESS INSTRUCTION AND LEADERSHIP **2 HRS.**
The purpose of this course is to provide students with the basic knowledge and skills needed to lead group exercise sessions. A variety of topics will be covered including rhythm and cuing, stretching and toning, floor aerobics, and step aerobics as well as other forms of group exercise. Information on training principles, safety issues and contra-indicated exercises is also included. Students will participate in a variety of teaching and observation experiences.

HL 370. PRACTICUM IN HEALTH & HUMAN PERFORMANCE I **1 HR.**
This health promotion practicum is designed to familiarize the health promotion major with the diverse settings in which health promotion professionals practice and potential career paths they can pursue for Practicum II (HL570), internship (HL580) and jobs upon entering the workforce. This practicum experience offers the student an opportunity to become cognizant of the scope of knowledge, skills and responsibilities often expected of health promotion professionals in a variety of work settings, including hospitals, school districts, corporations and fitness facilities. It offers the students a glimpse into what they will be assisting with or performing during their Practicum II experience.

HL 435. STRENGTH AND CONDITIONING FOR THE PERSONAL TRAINER **2 HRS.**
(Prerequisites, ZO200, ZO201 and PE320) This course examines advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance. This course is intended to build upon students' current level of knowledge in preparation for a career in personal training.

HL 450. SCHOOL HEALTH PROGRAMS **3 HRS.**
(Prerequisite, HL 350.) This course will prepare and train students in developing the skills that will enable them to be the professional critical thinker, creative planner, and effective practitioner teacher candidate, in accordance with the mission of the Teachers College at Emporia State University. The objective is for all teacher candidates to be prepared with essential knowledge, skills, and dispositions in the field of health education. This course specifically focuses on developing an understanding of the comprehensive school health program and provides information on strategic interventions of advocating, planning, implementing, and assessing the components of healthy schools.

HL 454. STRENGTH & CONDITIONING FOR TEAM & SPORT **3 HRS.**
This course will provide the student with an advanced understanding of the principles and methods necessary to design and implement comprehensive strength and conditioning programs that enhance fitness and performance for athletes and teams.

HL 455. INSTRUCTOR'S COURSE IN FIRST AID AND PERSONAL SAFETY **2 HRS.**
Theory and practice of the American National Red Cross Instructor's Course in First Aid and Personal Safety. (Designed to meet American National Red Cross requirement for the Instructor's Certificate.)

HL 456. DEATH AND DYING 2 HRS.

Exploration of knowledge about and attitudes toward death and dying. Emphasis placed upon the death of family, friends, and self as well as on suicide prevention and intervention.

HL 457. HUMAN SEXUALITY EDUCATION 2 HRS.

This course provides a comprehensive introduction to the biological, psychosocial, behavioral and cultural aspects of sexuality. An emphasis will be placed on learning basic human sexuality concepts and exploration of various cultural perspectives that relates to individuals, as well as societal, issues.

HL 458. TEACHING HUMAN SEXUALITY EDUCATION 3 HRS.

This course is designed to introduce future teachers to the various approaches of delivering comprehensive human sexuality information, including HIV/AIDS, in the classroom setting. Emphasis will be given to learning human sexuality content, legalities of teaching human sexuality, and to organizing and delivering age appropriate teaching strategies, which provide students an opportunity to make responsible choices regarding relationships and personal sexual behavior.

HL 465. WORKSITE HEALTH AND PRODUCTIVITY MANAGEMENT 3 HRS.

This course provides an introduction to worksite health promotion with an emphasis on program development and design. The focus will be on planning, defining, implementing and evaluating corporate and community interventions for health including behavioral/educational, organizational and environmental change strategies.

HL 490. SPECIAL TOPICS IN HPER 1-3 HRS.

The purpose of this course is to allow the department to provide students the opportunity to study various special and current topics that cannot be presented in other formal classes. In addition, it will provide the vehicle for offering and listing new/experimental courses within the Department of HPER.

HL 524. NUTRITION FOR SPORT AND PERFORMANCE 3 HRS.

(Prerequisites, HL 150, GB 385, ZO 200 and ZO 201.) The purpose of this course is to allow students to gain insight into dietary ergogenic issues related to physically active populations. Students will interact with physically active populations to assess dietary, physical and performance standards in order to develop alternative plans for healthy, active lifestyles. This course will also assist the student in becoming a critical thinker, creative planner, and effective practitioner.

HL 550. HEALTH EDUCATION IN THE ELEMENTARY SCHOOL 3 HRS.

Justification for and dynamics of health instruction in the elementary school. Exposure to a wide range of health education content information, methods, materials, and resources which pertain specifically to health instruction in the elementary school.

HL 559. METHODS OF TEACHING HEALTH 4 HRS.

(Prerequisite, HL 350 and HL 450.) Principles of PreK-12 school health instruction with emphasis upon curriculum construction, instructional strategies and materials, lesson plan development, actual teaching experiences, and evaluative techniques.

HL 560. SPECIAL PROBLEMS IN HEALTH AND SAFETY EDUCATION 1-3 HRS.

(Prerequisites, permission of instructor.) The purpose of this course is to allow students the opportunity to complete in depth study of health education/health promotion related topics.

HL 565. STRATEGIES IN HEALTH & HUMAN PERFORMANCE 4 HRS.

(Prerequisites, HL 465 and HL 250.) This course is designed as a laboratory for improving the organization, delivery and evaluation skills of the students in the following levels of interventions found in community and worksite health promotion: 1) Communication and awareness programs; 2) Screening and assessment programs; 3) Education and lifestyle programs and 4) Behavior change support systems.

HL 566. EXERCISE TESTING AND PRESCRIPTION 4 HRS.

(Prerequisite, HL 435 and PE 360.) This course is designed to prepare students to accurately assess apparently healthy individuals and those with controlled disease in a variety of areas of physical fitness. Students will practice interpreting and applying the results of these assessments for the purpose of exercise prescription/programming. Testing and programming for special populations will also be addressed throughout the course.

HL 570. PRACTICUM II IN HEALTH & HUMAN PERFORMANCE 2 HRS.

(Prerequisite, HL 370.) The health promotion practicum is designed to prepare the health promotion major with skills and abilities to successfully compete in the quest for an internship and a professional job. The practicum experience offers the student an opportunity to gain further insight into health education content, problems, issues and skills previously studied. It offers the student opportunities to apply these during this practicum experience. A well-conducted practicum can be mutually rewarding for the student as well as the supervising organization.

HL 580. INTERNSHIP IN HEALTH & HUMAN PERFORMANCE 12 HRS.

(Prerequisites, HL 570, HL 344, HL 465, HL 565, and HL 566.) The internship course provides experience in health-related agencies to enable the student to utilize basic knowledge and demonstrated ability of health promotion skills within a health promotion setting. A minimum of 480 hours and/or 12 weeks at the internship site is required. In addition, the student is required to submit a midterm and final report, including an intern portfolio.

HL 620. STRESS MANAGEMENT 1 HR.

(Prerequisite, HL 150.) This course is designed for people interested in prevention and control of stress through various relaxation and stress management techniques. Particular emphasis will be on personal techniques for managing stress in a wide variety of situations.

HL 700. CURRENT DEVELOPMENTS IN HEALTH EDUCATION 1-4 HRS.

Designed to provide an opportunity for performance analysis, direct discussion and observation of new trends, methods, and techniques in health education.

HL 701. SPECIAL WORKSHOPS IN HEALTH 1-2 HRS.

This course offers the opportunity for students to experience a variety of intensive courses concerned with health topics.

HL 710. ADVANCED CRITICAL ISSUES IN HEALTH 3 HRS.

This health knowledge-based course for health educators will focus on tools and strategies to use with individuals in educational settings for enhancing their health knowledge and behavioral lifestyle motivations will also be presented as part of the course's approach to the pursuit toward optimum health.

HL 720. CURRICULUM DEVELOPMENT IN HEALTH EDUCATION 3 HRS.

This course will examine health education curriculum in regards to various pro-active skills and strategies which enhance the success of health educators/professionals in reaching this population of students. There is an emphasis on the critical lifestyle choices that are made and patterns of behavior that are established by adolescents which affect their immediate future health.

HL 735. INSTRUCTIONAL STRATEGIES IN HUMAN SEXUALITY EDUCATION 3 HRS.

This course will provide instructional strategies in the various areas of human sexuality education. The course will also focus on terminology, legal issues, cultural differences and relationships as they apply to human sexuality education. This course is most appropriate for those who teach at the K-12 grade levels.

HL 751. LEADERSHIP/MANAGEMENT IN HEALTH AND WELLNESS PROGRAMS 3 HRS.

Overview of organization and administration of health and wellness programs: administrative theories, management by objectives; budgeting, grantsmanship, contracts, strategies, consultation, and art of leadership.

HL 780. SCHOOL HEALTH ISSUES AND TRENDS 3 HRS.

This course is application of current school health instruction with emphasis upon curriculum construction, instructional strategies, lesson plan development, use of appropriate assessments and reflection practices. Additional focus on health content in a multi-disciplinary approach within a school setting, exploring community involvement and an increase awareness on global diversity.

HL 800. APPLIED RISK BEHAVIOR EDUCATION AND STRATEGIES 3 HRS.

This course provides an opportunity for identification and analysis of current issues and trends as applied to the risk behaviors that cause health problems, as cited by research related to the field of health education. Emphasis is placed on basic concepts, teaching strategies, debating current health issues, and writing and defending topic viewpoints.

HL 820. INSTRUCTIONAL METHODS OF HEALTH EDUCATION 3 HRS.

This course is application of current school health instruction with emphasis upon curriculum construction, instructional strategies, lesson plan development, use of appropriate assessments and reflection practices. Additional focus on health content in a multi-disciplinary approach within a school setting, exploring community involvement and an increase awareness on global diversity.

HL 850. WELLNESS CONCEPTS AND PREVENTION STRATEGIES 3 HRS.

This course is designed to identify the various factors influencing health decisions and behaviors. The development of strategies for effective use of health information and research in educational settings is discussed.

INTERDISCIPLINARY STUDIES**ID 301. ISSUES IN ETHNIC AND GENDER STUDIES 3 HRS.**

(Required for the minor in Ethnic and Gender Studies.) Introduces students to the academic study of race, class, ethnicity, and gender; this course is excellent preparation for further study in history, sociology, anthropology, geography, communication, and other disciplines. The course is an option in the "Multicultural Perspectives" section of the General Education program and is required for a minor in Ethnic and Gender Studies.

ID 302. INTRODUCTION TO INTERDISCIPLINARY STUDIES 3 HRS.

This course is only for students majoring in Interdisciplinary Studies. This course is an orientation to the Bachelor of Interdisciplinary Studies degree. Students will explore the richness of multiple disciplines and the importance of taking charge of their own educations. The course will enable students to make connections between different academic fields of study and will prepare them to work with their advisors in designing customized and rigorous degree programs for themselves. The course will also prepare students to develop their senior capstone projects which they will complete towards the end of their degree program.

ID 400. TOPICS IN INTERDISCIPLINARY STUDIES 1-3 HRS.

Investigations into selected areas of Interdisciplinary Studies. Topics will vary.

ID 401. INTRODUCTION TO WOMEN'S STUDIES 3 HRS.

This course introduces students to a broad range of concepts and issues in the discipline of women's and gender studies. Students will gain knowledge of the field of women's studies and women's lives in the U.S., primarily, focusing on work, family and households, life cycles, sexuality, religion, politics, and the law. Using an interdisciplinary approach (e.g., history, literature, media, psychology, government, biology, the arts, and philosophy), students examine women's lived experiences and the changes in American society brought on by feminist activism in the 20th century. Finally, the course will explore women's issues globally as well as the future of women, gender, and women's studies.

ID 489. INTEGRATED STUDIES CAPSTONE PROJECT 1-6 HRS.

(Prerequisite, Must be student of Integrated Studies program whose portfolio has been evaluated.) Students will demonstrate a synthesis of knowledge and skills in a portfolio project based on their educational and professional experiences. The portfolio will provide the basis for evaluation by the faculty director and program advisor. No more than 6 credit hours per semester up to a maximum of 12 hours on the Program of Study.

ID 490. INTERDISCIPLINARY STUDIES CAPSTONE 3 HRS.

(Prerequisites, ID 302 with a grade of at least C.) Every interdisciplinary studies student has gained knowledge in multiple fields and disciplines through course work in a variety of interest areas. The most important skill an interdisciplinarian has is the ability to approach a problem, challenge, or need from multiple perspectives and to propose solutions or responses that a single disciplinary approach cannot encompass. This skill is at the heart of interdisciplinary studies. Students will demonstrate the ability to apply knowledge from different disciplines to create a project proposal with an interdisciplinary focus.

ID 491. ETHNIC AND GENDER STUDIES PORTFOLIO 0 HRS.

For Ethnic and Gender Studies minors only. The portfolio is documentation of the student's coursework and activities in Ethnic and Gender Studies. It will contain the syllabus and a written work from each of the six courses completed for the minor; a section documenting attendance at eight approved events relevant to ethnicity and/or gender (usually lectures, films, or performances, on or off campus); and an essay reflecting on the experience of completing the minor. Prior to graduation, the student presents the portfolio to a committee of the instructors of three courses taken for the minor and the Director of Ethnic and Gender Studies.

ID 492. GENERAL STUDIES CAPSTONE 1 HR.
All students completing the general studies major will enroll in a one credit hour course in the last semester of their studies. The course will be flexible in terms of requirements, in that students may complete the course in a variety of ways, from writing an original essay to completing a practicum or volunteer service. The course will support the program outcomes of the new general studies major.

ID 510. INTERDISCIPLINARY STUDIES INTERNSHIP 1-6 HRS.
(Prerequisite, permission of instructor.) An internship course within Interdisciplinary Studies (IDS). Course Description: This course provides students the opportunity to gain practical work experience under professional supervision; to identify and develop marketable skills in their area of interest; and to explore interdisciplinary approaches to issues and problems in the workplace. Generally, each semester credit hour of internship equals 45 hours of work over the semester in the internship site.

ID 745. PROGRAMMING AND DATA ANALYSIS FOR INFORMATICS 3 HRS.
This introductory informatics course introduces students to the software and programming languages basic to finding, querying, acquiring, manipulating and analyzing data. Students will learn to use appropriate technology to write programming scripts, to collect and manage data, and to create datasets in their focus areas within the program. The course is divided into modules that will allow students to work with faculty in their area of concentration. Each student will design, complete and present a research project in their interest area.

ID 810. INFORMATICS CAPSTONE SEMINAR 3 HRS.
As a part of the MS Informatics program, all students must complete a capstone project before graduation. Every student in the program has gained knowledge in multiple fields and disciplines. Students with this interdisciplinary background develop the skills to approach a problem from multiple perspectives and to propose solutions or responses that a single disciplinary approach cannot encompass. The informatics capstone seminar is intended to provide students with the opportunity to demonstrate these core skills. Throughout the semester, they will engage with material from the disciplines that represent their area of concentration. To do this, each student will work closely with their major professor to design a project that draws on their studies within their concentration. The project will be one that addresses a problem, challenge, or need that can best be addressed by solutions provided by studies in informatics.

ID 871. DIRECTED RESEARCH 3 HRS.
Students will work closely with an instructor in their concentration area to become familiar with relevant research tools and current trends in research. They will design and begin a research project in their area of specialization. The course is intended to serve as the basis of the project required for the Informatics Capstone Seminar as the culmination of the Informatics degree program.

ID 872. PRACTICUM 3 HRS.
The practicum provides students with the opportunity to observe professionals using informatics tools and skills in a real world setting. Students will gain an understanding of the requirements of professions available in informatics by shadowing those working in the field. Depending on the nature of the practicum as arranged by the student, their professor, and the practicum supervisor in the workplace, students may be active observers but may not necessarily perform workplace tasks. Students will communicate regularly with their professor and will submit a written report upon completion of the practicum.

ID 873. INTERNSHIP 3 HRS.
The internship provides an opportunity for students in the MS Informatics to apply their data collection, analysis and management

skills to answer questions and resolve problems in the context of a real world situation. Under supervision of a faculty member, the student intern will work with a supervisor at the internship agency/workplace, staying in close touch with the faculty member through weekly communications via email or face-to-face visits. At the end of the semester, the supervisor will evaluate the student's performance and the student will present a written report discussing the internship and what was learned.

ID 875. THESIS 3 HRS.
Students may choose to prepare a Master's thesis as their final project, to be completed in the Informatics Capstone course. Working closely with a faculty member, the student will design and complete a research project and write a significant research report/thesis. The thesis will be presented to the student's thesis committee in a public forum in which the student will demonstrate an understanding of the interdisciplinary nature of the tools and skills demanded by the informatics program.

INTENSIVE ENGLISH

IE 001. INTERMEDIATE STRUCTURE 0-3 HRS.
A non-credit intensive English course designed to improve the mastery of English grammatical structure of non-English-speaking students.

IE 002. INTERMEDIATE SPEAKING/ UNDERSTANDING 0-3 HRS.
A non-credit intensive English course designed to improve listening comprehension and spoken English of non-English-speaking students.

IE 003. INTERMEDIATE WRITING 0-3 HRS.
A non-credit intensive English course designed to improve English writing skills of non-English-speaking students.

IE 004. INTERMEDIATE READING 0-3 HRS.
A non-credit intensive English course designed to improve reading skills of non-English-speaking students.

IE 005. ADVANCED STRUCTURE 0-3 HRS.
An intensive English course for advanced level non-English-speaking students to help them improve their command of English grammatical structure.

IE 006. ADVANCED SPEAKING/UNDERSTANDING 0-3 HRS.
A non-credit intensive English course designed to improve listening and speaking skills of advanced level non-English-speaking students.

IE 008. ADVANCED READING 0-3 HRS.
A non-credit intensive English course designed to improve the reading skills of advanced level non-English-speaking students.

IE 009. ADVANCED WRITING 0-3 HRS.
An intensive English course for advanced level non-English-speaking students to help them improve their English writing skills.

IE 011. BEGINNING STRUCTURE 0-3 HRS.
An intensive English course will concentrate on the basics of English grammar. Beginning structure will focus on teaching the essential elements of English structure so a student learning English as a second language will have a firm foundation upon which to build language skills.

IE 012. BEGINNING SPEAKING AND UNDERSTANDING 0-3 HRS.
An intensive English course will concentrate on the fundamentals of speaking English and listening to spoken English. Beginning Speaking and Understanding will provide students with practice in developing oral communication skills and provide different formats for improving their listening skills.

IE 013. BEGINNING WRITING 0-3 HRS.

An intensive English course will focus on the most basic elements of writing English. Beginning Writing will start at the sentence level and work toward a goal of writing a 10–12 sentence paragraph by the end of the semester.

IE 014. BEGINNING READING 0-3 HRS.

An intensive English course will concentrate on vocabulary and reading comprehension. Beginning reading will focus on teaching the essential elements of learning vocabulary and developing reading skills so a student learning English as a second language will have a firm foundation on which to understand written English.

IE 075. COMMUNICATION SKILLS FOR INTERNATIONAL STUDENTS 0-3 HRS.

Required for international graduate students with TOEFL scores below 575; international students only. This course focuses on helping international graduate students improve their oral fluency and comprehensibility, develop strategies to use in participating and making presentations in academic classes, and refine their writing skills by analyzing and responding to academic writing, studying the basic conventions of the research paper, and practicing research skills.

IE 076. INTERNATIONAL STUDENT ORIENTATION 0-1 HR.

International Student Orientation will orient new international students to the ESU campus and university life in the U.S.

IE 077. TOPICS IN AMERICAN CULTURE 0-3 HRS.

Topics in American culture would introduce international students to important elements of American culture while the students refine their overall English language skills.

IE 078. ADVANCED ENGLISH PRONUNCIATION 0-3 HRS.

Advanced English Pronunciation is a practical course on American English pronunciation including pronunciation, fundamental rhythm and intonation patterns, basic stress patterns, and achieving advanced fluency when speaking in American English.

IE 101 ADVANCED ACADEMIC ENGLISH SKILLS 2-3 HRS.

The primary focus of this course will be on reading and writing. The class will use various outside reading materials to sharpen critical reading skills, develop critical thinking skills, expand vocabulary, and write essays. Students will also work on speaking and listening skills by giving oral presentations and leading class discussions. There will be no textbook for the course. Instead, the class will rely on outside readings that correspond to the four academic topics. The four working topics which the class will explore include the Humanities, Science, the Arts, and Business.

INFORMATION RESOURCE STUDIES**IR 301. INTRODUCTION TO INFORMATION RESOURCE STUDIES 3 HRS.**

An overview of the information resource studies field, including a definition of the areas of study, the impact of information and technology on society, and the role of the information professional. Ethical and legal issues will be examined, as well as the student's philosophical and professional aptitudes for the field.

IR 302. INFORMATION USE IN TODAY'S SOCIETY 3 HRS.

The impact of culture and other social differences on individual use of information is studied, along with theories of learning and information use. Examines our information society and how information is created, recorded, mass produced, disseminated, and used by individuals and groups.

IR 410. INTRODUCTION TO INFORMATION SOURCES AND SERVICES 3 HRS.

A study of the processes necessary to select, acquire, and use appropriate information sources. An overview of administration of information services.

IR 460. CURRENT TOPICS IN INFORMATION RESOURCE STUDIES 1-3 HRS.

This course provides in-depth examination of specialized topics and current issues in information resource studies. A sub-title will be assigned for each special topic. Students may repeat the class with different topics to a maximum of six credits. In addition, the course may be used to offer and list new or experimental courses within the major. Permission of instructor required prior to enrollment.

IR 470. PRACTICUM IN INFORMATION RESOURCE STUDIES 3-6 HRS.

(Prerequisites, IR 301 and IR 302; permission of instructor.) A supervised field experience with seminars. Students will secure, in coordination with the instructor, placement in an organization with the opportunity to provide information service to individuals and groups.

IR 472. INDEPENDENT STUDY 1-3 HRS.

Special reading and/or research in an area of information resource studies not included in the regularly listed courses. Students must develop a topic and plan of study with the instructor before enrolling. Permission of instructor required prior to enrollment.

INFORMATION SYSTEMS**IS 110. MICROCOMPUTER APPLICATION LAB 0 HRS.**

(Prerequisite, concurrent enrollment in IS 113. The computer lab section requirement for IS 113 Introduction to Micro-Computer Applications.) This course is designed to help students learn technology concepts and essential business applications through a combination lecture and hands-on lab setting. Students will develop proficiency in the latest Microsoft Office products. Students will apply business logic and software expertise to solve real world business problems. This three credit hour course is delivered with a one hour lecture (IS 113) and two one hour lab format (IS 110). The lectures and labs are coordinated with all course credit deriving from the lecture portion of the course. The syllabus describes the course requirements that are delivered through both the lectures and labs.

IS 113. INTRODUCTION TO MICROCOMPUTER APPLICATIONS 3 HRS.

This course is designed to help students learn basic computer concepts and microcomputer applications in the Microsoft Windows environment. Students will utilize word processing, spreadsheet, database and presentation graphics software to solve realistic business problems. Students will also be exposed to Internet access and navigation, ethical concepts and security.

IS 205. SPECIAL TOPICS IN COMPUTER INFORMATION SYSTEMS 1-5 HRS.

This course is for the study of various special topics and experimental course offerings at the undergraduate level in the Information Systems program.

IS 213. MANAGEMENT INFORMATION SYSTEMS CONCEPTS 3 HRS.

(Prerequisite, IS 113.) This course provides an understanding of information systems utilized to manage an enterprise. Topics include the importance of computer and information literacy, an overview of system development methodologies, types of information systems, telecommunications, social and ethical issues, relational databases and other personal productivity tools.

IS 253. INTRODUCTION TO DECISION ANALYSIS 3 HRS.
(Prerequisites: IS 213 or equivalent and BU 255 or equivalent or concurrent enrollment.) This course emphasizes hands-on application and interpretation of quantitative business models to support decision analysis in organizations. The course introduces students to data preparation as well as descriptive and predictive analytics. Consequently, it covers topics such as, but not limited to, data preparation and exploration, descriptive statistics, regressions and trends, forecasting, data mining, and building models using spreadsheets other readily available business decision making software tools.

IS 283. INTRODUCTION TO PROGRAMMING 3 HRS.
(Prerequisite, IS 113 or CS 220.) This course examines procedures and tools for identifications, preservation, and extraction of electronic evidence, auditing and investigation of network and host system intrusions, analysis and documentation of information gathered, and preparation of expert testimonial evidence.

IS 333. BUSINESS COMPUTER SYSTEMS ANALYSIS 3 HRS.
(Prerequisites, IS 213 or CS 220, and junior standing or instructor permission.) This course deals with the development of information systems through SDLC. The primary focus is to solve business problems through traditional and current methodologies. The course also emphasizes team-oriented projects to foster an understanding of how systems development is conducted in the business world.

IS 343. WEB-BASED BUSINESS APPLICATIONS 3 HRS.
(Prerequisite, IS 213 or IS 253 or IS 283) Students will design and create web-based applications. Content will consist of hands-on experience with web technologies including programming languages, application frameworks, markup languages, and presentation languages. Topics will include the development of applications for the internet.

IS 373. PRINCIPLES OF ELECTRONIC COMMERCE 3 HRS.
(Prerequisite, IS 213.) This course explores the role of ICT to support electronic commerce in organizations. Consequently, it focuses on B2B and B2C interactions that occur through electronic communications enabled, mainly, by the Internet. The course covers the importance of understanding revenue models, legal, and technical factors when planning, designing and implementing e-commerce systems.

IS 393. ADVANCED WEB-BASED APPLICATIONS 3 HRS.
(Prerequisite, IS 343.) Students will design and create advanced web-based applications. Content will consist of hands-on experience with advanced web and mobile- first technologies including programming languages, application frameworks, markup languages, and presentation languages. Topics will include the development of applications to provide web-based interfaces for relational databases.

IS 413. DATABASE CONCEPTS 3 HRS.
(Prerequisites, IS 333 or concurrent enrollment with IS333 and junior standing.) The basic objectives of this course are to develop an understanding of database development including data modeling, normalization, and implementation in the relational model using SQL, to develop an understanding of database administration, and to explore other database models including the object-orientated model and client-server implementations.

IS 423. MODERN LANGUAGE PROGRAMMING 3 HRS.
(Prerequisite, a programming language.) An introduction to modern language programming for use in the development of business information applications. Emphasis will be given to the development of object oriented programs and programs that use shared databases, with an emphasis on web enabled platforms.

IS 453. BUSINESS INTELLIGENCE 3 HRS.
(Prerequisite, IS 253.) This course centers in perspectives about the use of data, statistical analysis, quantitative methods, and computer-based models to support decision making within business environments. Students will learn on the collection, organization, and reporting of data. Always looking to help managers transforming data into actionable information, improving their business operations by making better fact-based decisions and achieving an enhanced business insight.

IS 463. ENTERPRISE SYSTEMS 3 HRS.
(Prerequisite, IS 213.) A study of the management of information technology as it is practiced in organizations today. Traditional organizations are moving toward a more interconnected or networked business environment. A major focus is understanding the role and use of complex technology in the support of individual, workgroup, enterprise, inter-enterprise and international computing. This course will utilize case studies and business problem solving techniques.

IS 473. TELECOMMUNICATIONS AND NETWORKING APPLICATIONS 3 HRS.
(Prerequisite, IS 213 and junior standing.) This course focuses on fundamentals of telecommunication and networking concepts. This course provides insight into why different networks are structured the way they are today. The focus is given on understanding network structure, design, and security. Some of the topics discussed include: layered network architecture, basic network design, network protocols, switching, routing, and network security.

IS 490. INDEPENDENT STUDY IN INFORMATION SYSTEMS 1-4 HRS.
(Prerequisites, Senior standing, completion of a minimum of 12 hours of information systems including IS 333.) This course provides an opportunity to develop more extensive, in-depth knowledge of a topic than is available through the existing information systems curriculum. Students desiring to do an independent study in information systems should provide the Department Chair with a well-developed proposal for the study including an outline of the work to do done and the learning activity to be completed from the project including sources of information to be used.

IS 493. INFORMATION SYSTEMS DESIGN AND PROJECT MANAGEMENT 3 HRS.
(Prerequisites, IS 333 and IS 413.) This is the capstone course for IS majors. Students will utilize the skills and knowledge from their previous IS courses, and their general business education. In the course, students will build a complete and working system in a realistic environment utilizing project management techniques.

IS 500. INTERNSHIP IN COMPUTER INFORMATION SYSTEMS 1-4 HRS.
(Prerequisites, IS 333 and any programming course.) Work experience in computer information systems coordinated through visitation, discussion, and written analysis. Students are employed by business firms, government offices, and nonprofit organizations.

IS 504. DATA MINING 3 HRS.
(Prerequisites: BU 255 and IS 453 or equivalent courses.) This is an introduction to data mining. The course focuses on developing an understanding of the application of data mining and predictive modeling in a business context for the systematic analysis of data and support of organizational decision making. Consequently, the course will work in the application of data mining to data sets that mimic real world situations to develop the analytical thinking and criteria required to properly apply data mining techniques. Predictive modeling (e.g., regression, logistic regression, tree induction, neural networks), model fitting, clustering, and issues on data mining are covered.

IS 505. SPECIAL TOPICS IN COMPUTER INFORMATION SYSTEMS **1-5 HRS.**

This course covers various special topics and experimental course offerings.

IS 514. BIG DATA ANALYTICS **3 HRS.**

(Prerequisites: IS 504 or concurrent enrollment with instructor approval.) This course examines methods, processes, and frameworks that facilitate organizations to work with large volumes of data streamed at high speed and from multiple sources. It presents business and financial value of big data analytics, reducing threats and increasing opportunities for organizations applying big data tools and best practices.

IS 524. CLOUD COMPUTING **3 HRS.**

(Prerequisites: CS 355 or IS 473) This course plan to give students an overview of the field of Cloud Computing, its enabling technologies, and main building blocks. Students will gain hands-on experience solving relevant problems through projects that will utilize existing public cloud tools. Students will develop broader skills needed to become a practitioner in this field.

IS 534. DATA-DRIVEN DECISION MAKING **3 HRS.**

(Prerequisites: IS 504) This course examines the role of quantitative data in managerial and entrepreneurial decision-making. The course draws upon quantitative tools, analyses and data from several disciplines, especially, statistics, economics, accounting, and finance. The course study demonstrates the usefulness of these tools and analyses in providing optimal technical options in decision-making situations. The emphasis of the course is on the interpretation and translation of data into beneficial information, thus helping with decision-making.

IS 805. SPECIAL TOPICS IN COMPUTER INFORMATION SYSTEMS **1-3 HRS.**

(Prerequisite, permission of instructor.) This course covers various special topics and experimental course offerings at the graduate level.

IS 813. INFORMATION TECHNOLOGY PROJECT MANAGEMENT **3 HRS.**

This course will present project management techniques, potential problems, and overall decision making associated with software development projects. Specific topics will address planning, organizing, scheduling, and controlling information technology projects, current tools and techniques, and the roles and responsibilities of project managers.

IS 823. SYSTEMS ANALYSIS AND DESIGN **3 HRS.**

(Prerequisite: graduate standing.) This course provides an in-depth study of SDLC. Emphasis is placed on the tools and techniques that a project leader and systems analyst uses to analyze, design, document, and manage information systems projects. The traditional structured approach to systems analysis is explained. Hands-on assignments are used to provide students with opportunities to apply communication and problem-solving skills and to formulate solutions that address scenarios faced by systems analysts in the business world.

IS 824. DATABASE MANAGEMENT **3 HRS.**

(Prerequisites: IS 823 or concurrent enrollment) The objective of this course is to develop an understanding of advanced database concepts including data modeling, normalization, data warehousing, big data, and data security. This course also focuses on to explore various database models including object-orientated model, client-server models, cloud-based model, and NoSQL model as well as to apply these concepts to solve business problems.

IS 825. CLOUD COMPUTING AND MANAGEMENT **3 HRS.**

(Prerequisite: IS 823) This course plan to give students an in-depth understanding of the field of Cloud Computing, its enabling technologies, and main building blocks. Students will gain hands-on experience solving relevant problems through projects that will utilize various public cloud tools. The objective of this course is that students will develop the skills needed to become a practitioner or carry out research projects in this domain.

IS 826. APPLICATION PROGRAMMING **3 HRS.**

(Prerequisite: Graduate standing) This course introduces students to programming with Python. Due to its extraordinary combination of power and ease of use, Python has become the tool of choice for developing user-friendly applications in the business world. In this course students will learn the essentials of this object-oriented/event-driven language. Students will also be introduced to the use of python in building applications.

IS 827. ADVANCED APPLICATION PROGRAMMING **3 HRS.**

(Prerequisite: IS 826) This course introduces students who already know python basics to a variety of topics used in practice for real-world applications. In addition to the topics on regular expressions, Internet/network programming, GUIs, threading and Web development, it also presents students brand new material on Django, Google App Engine, etc.

IS 828. ENTERPRISE ARCHITECTURE **3 HRS.**

(Prerequisite: IS 823) This course provides students with the CIO-level management perspective and skills of an enterprise architect. Students will learn that enterprise architectures are best developed incrementally, by system development projects that are aligned with strategic goals and the enterprise architecture. The course provides students with the understanding and skills needed to define and implement successful enterprise architectures that provide real value to organizations, such as substantially reducing IT costs while improving performance, agility and alignment of information technology to business goals.

IS 833. KNOWLEDGE MANAGEMENT **3 HRS.**

(Prerequisite, Background in computing.) Knowledge Management encompasses a broad range of activities in an organization and is firmly dependent upon the human factor for the enhancement and success of knowledge use. Knowledge is used to improve the decision making of individuals in an organization. KNOWLEDGE, AT THE RIGHT TIME, IN THE RIGHT PLACE is required for more effective decision-making. This course will review the breadth of activities associated with knowledge from the organizational level to the individual knowledge worker level. These activities include knowledge transfer from an inter- and intra-organizational perspective, IT enhanced knowledge transfer, knowledge capability enhancement and knowledge sharing cultural perspectives.

IS 834. NURSING AND HEALTHCARE SYSTEMS TECHNOLOGY INTEGRATION **3 HRS.**

Information technology and information efficiency are studied across multiple aspects of patient care delivery within a healthcare organization. Particular attention will be focused on how participants of the healthcare system interact with the use of technology to improve healthcare efficiency and health outcomes. The themes of privacy, confidentiality, and information security are woven throughout the course content.

**IS 835. NURSING AND HEALTHCARE
INFORMATICS APPLICATIONS****3 HRS.**

(Prerequisite, IS834.) This applications course integrates informatics concepts with tools used in nursing & healthcare informatics practice. The focus will be on the development and construction of software applications and website user interface design in nursing & healthcare settings. The development and construction will be in the context of critiquing existing tools and using development tools for conceptual modeling and data presentation. Topics include web applications, website design, data presentation, concept mapping, workflow analysis, and solution modeling.

IS 843. ELECTRONIC COMMERCE**3 HRS.**

(Prerequisite: graduate standing.) This course provides an in-depth study of the role of information and communication technology to support electronic commerce in organizations and focuses B2B and B2C interactions. The course covers the importance of understanding revenue models, the use of consumer data, legal, ethical, and technology factors that must be considered when planning, designing and implementing e-commerce systems.

IS 853 BUSINESS ANALYTICS**3 HRS.**

(Prerequisite: graduate standing.) This course is designed to enhance and expand the knowledge and skill of students interested in careers in Business Analytics. Concepts, methods, and models used in business analytics will be considered toward the improvement of business decisions. Data, statistical analysis, quantitative methods and computer-based models will be used to gain deeper and broader business insights and better fact-based decision making.

**IS 863. ENTERPRISE RESOURCE PLANNING
FOUNDATIONS (ERP)****3 HRS.**

This course serves as an introduction to the world of Enterprise Resource Planning and also provides a solid foundation for many disciplines in common business processes and how they are supported by modern information systems. By studying both successful and unsuccessful implementation examples, students examine how and why an ERP system is implemented and how it is integrated with existing business processes. Students examine the impact of ERP on the organization and how change can be managed. An ERP system such as SAP will be used to experience several business processes and the software first hand. Consent of Instructor.

**IS 873. INFORMATION SYSTEMS FOR
MANAGERIAL DECISION MAKING****3 HRS.**

A study of the management of information technology as it is practiced in organizations today. Traditional organizations are moving toward a more interconnected or networked business environment. A major focus will be understanding the role and use of complex technology in the support of individual, workgroup, enterprise, inter-enterprise, and international computing. A background in Information Technology is required.

**IS 883. ENTERPRISE RESOURCE PLANNING
CONFIGURATION (ERP)****3 HRS.**

(Prerequisite, IS 863.) The objective of this course is to allow students an opportunity to gain experience in configuring an ERP system such as SAP. Emphasis is placed on data needs and understanding complex organizational structures. Students learn to configure business rules and policies into the ERP system. Once they each have a company configured, they work in groups to process Business-to-Business (B2B) transactions. Configuration topics such as business process integration are also covered in the class.

IS 893. SAP TERP10 CERTIFICATION ACADEMY**3 HRS.**

(Prerequisite, IS 883) The SAP TERP10 Certification Academy is a means for students to acquire SAP Certification. The course provides an overview of how to navigate through the SAP system, how to enter and

extract data and reports, how to push a process forward in an IS environment and how different functions use the same system in different contexts in ways that are similar but tailored towards specific requirements. This course shows that each business function is integrated into a cohesive whole so that one business area can directly gain access to relevant information created by another business area. Emphasis is placed on data needs and understanding complex organizational structures.

INSTRUCTIONAL TECHNOLOGY**IT 143. SPECIAL STUDIES IN EDUCATION****1-3 HRS.**

This course offers a study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed from semester to semester.

IT 144. SPECIAL STUDIES IN EDUCATION**1-3 HRS.**

This course offers a study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed from semester to semester. This course is offered only by pass/no credit.

**IT 325. INSTRUCTIONAL TECHNOLOGY
FOR EDUCATORS****3 HRS.**

Designed to supplement and enhance basic competencies in current instructional technologies. Focused toward preservice teachers, content is related to the field of education and is delivered through hands-on activities. Planning and integrating technology into the curriculum are emphasized with computer systems, Internet tools, evaluation tools, and software applications for classroom use.

IT 343. SPECIAL STUDIES IN EDUCATION**1-3 HRS.**

(Prerequisite, consent of instructor.) This course offers an in-depth study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed.

IT 344. SPECIAL STUDIES IN EDUCATION**1-3 HRS.**

This course offers a study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed from semester to semester. This course is offered only by pass/no credit.

**IT 360. INSTRUCTIONAL TECHNOLOGY FOR
SECONDARY EDUCATORS****3 HRS.**

(Prerequisite: Secondary Education Majors) This course will help secondary education students develop fundamental technology integration skills by providing hands-on introduction to various technology devices and applications, with an emphasis on interdisciplinary uses of technologies in classroom teaching. Students will have an opportunity to develop lesson plans using technologies, discuss issues related to digital citizenship and become familiar with and integrate the standards to design and assess technology projects.

**IT 371. ADVANCED INSTRUCTIONAL
TECHNOLOGY FOR EDUCATORS****3 HRS.**

(Prerequisite, IT 325.) The design, development, authoring, and evaluation of multimedia instructional units, using digital media and interactive technologies. The course builds upon content, expertise, and skills in presentation software, web development, and applications obtained in Instructional Technology.

IT 451. INDEPENDENT STUDY IN EDUCATION**1-3 HRS.**

(Prerequisite, consent of the chair of the department.) Students will carry out individual projects under the guidance of selected staff members.

IT 543. SPECIAL STUDIES IN EDUCATION 1-3 HRS.

This course offers a study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed from semester to semester.

IT 544. SPECIAL STUDIES IN EDUCATION 1-3 HRS.

This course offers a study in specific dimensions of teaching or to offer new knowledge and content emerging in the field of study. Topics will vary as needed from semester to semester. This course is offered only by pass/no credit.

IT 572. ADVANCED TECHNOLOGY USES IN INSTRUCTION 3 HRS.

This course is intended to equip educators with the ability to integrate advanced uses of technology in the classroom. Skills and information learned here will allow students to become technology leaders in instructional environments. This course presents a systematic method for the planning and development of instructional programs as well as an overview of the use of multimedia instructional programs in education. Material covered includes advanced instructional media development and application in a final multimedia project.

IT 573. ELECTRONIC PORTFOLIO AND WEBPAGE DEVELOPMENT 3 HRS.

(Prerequisites, IT 325 and IT 371.) Students will be taught how to collect and display materials electronically, including using webpage development software. They will construct a multimedia portfolio in a format suitable for either web distribution or copied to a CD-ROM disk.

IT 574. INTERNET USES IN K-12 EDUCATION 3 HRS.

(Prerequisites, IT 325 and IT 371.) This computer class will focus on using the information superhighway (Internet) for teaching and learning in the K-12 school. Topics will include finding and using lesson plans, using online and cooperative education with K-12 students, subscribing to listserv lists in education, joining appropriate "field trips" finding K-12 resources, using ERIC online, accessing and employing web search engines in education, handling files, and webpage design.

IT 575. INTERNSHIP IN INSTRUCTIONAL TECHNOLOGY 1-3 HRS.

(Prerequisites, IT 325, IT 371, and consent of advisor.) Designed as a practical experience where the student is assigned duties in a school or professional setting. The student typically assists professionals in applying their knowledge in instructional technology to real world issues. A written explanation is required. A minimum of 45 clock hours is required for each credit hour. Class may be repeated. Graded Pass/No Credit.

IT 700. FOUNDATIONS OF INSTRUCTIONAL DESIGN & TECHNOLOGY 3 HRS.

This course is intended to provide students with a clear picture of the field of instructional design and technology, the trends and issues that have affected it in the past and present, and those trends and issues likely to affect it in the future.

IT 710. WEB DESIGN 3 HRS.

This course is an introductory level webpage design course. As you progress through the class you will be introduced to the basic commands that will get you started in designing a web page for instruction, training or corporate use. This course will provide you with theoretical and practical understanding of the various applications of website design and development. The course will help you to develop fundamental computer literacy skills using website application software, with an emphasis on acquiring problem solving and high-level critical thinking skills. Knowledge will be gained in website design and development through readings, discussions, and hands-on activities.

IT 712. MOODLE LEARNING MANAGEMENT SYSTEM TRAINING 3 HRS.

Moodle, an open source learning management system, is rapidly being deployed in K-12 schools, community colleges, universities and corporate training environments around the world. Through this course, participants will experience Moodle's features first hand as a learner. Then, as a course creator, course participants will use Moodle to build their own course. Course discussion will include tool selection; effective course design; and facilitating a collaborative, constructive learning environment.

IT 713. DIGITAL GAME-BASED LEARNING 2-3 HRS.

The digital game revolution has spawned an entertainment industry that is bigger than the movie and music industry. It is now starting to impact education in a major way. In this course, after analyzing this evolving revolution, we will identify how games teach and why they work. Case studies and examples of game-based learning programs will be reviewed. The roles of teachers and trainers in implementing digital game-based instruction will be addressed. Students will then create a digital game-based instructional program.

IT 714. TEACHING AND LEARNING WITH MOBILE DEVICES 2-3 HRS.

This course provides a comprehensive look at the possibilities and potentials of integrating mobile devices into teaching and learning. The goal of this course is to empower teachers and instructional designers to use mobile devices for both professional and instructional use. In this course, students will research and evaluate the use of, as well as integrate, mobile devices into teaching and learning. Students will identify challenges and opportunities involved with teaching and learning with mobile devices, explore and evaluate mobile applications and systems, as well as design mobile technology-enhanced instruction.

IT 718. POWERFUL PRESENTATIONS IN POWERPOINT AND PREZI 2-3 HRS.

Take your presentations to the next level by creating captivating slides, animation effects, and graphics with presentation software. Learn how to create custom designed slides, format pictures and graphics, illustrate ideas with SmartArt, display data with charts and graphs, develop sophisticated animation sequences, use advanced drawing tools and create slides that encourage audience interactivity. We will also investigate basic design principles, delivery techniques and strategies from master presenters.

IT 719. TEACHING AND LEARNING WITH PHOTOSHOP 2-3 HRS.

Learn cool special effects using Adobe Photoshop Elements, jazz up your instructional images for enhancing learning whether in the classroom or a corporate setting. Do you know ineffective image use can actually depress learning? Find out how to use proven instructional design strategies based on current research and theory. Plan, design and evaluate effective visuals for maximizing learning potential and performance. Use graphics to support the application of knowledge and skills through visual design, psychological functions, surface features, instructional communication functions, and the communication environments. The course will include both theory and practical instructional design applications.

IT 720. DIGITAL STORYTELLING 3 HRS.

Digital Storytelling takes the timeless art of storytelling to a new level by using easy to learn software to create and tell captivating stories. After learning the basic elements of powerful script writing and storyboarding, students will translate these into digital media that speak to the emotions. This powerful new way of communicating is a great way to reach out and share stories with a growing "YouTube" Generation."

IT 723. VISUAL LITERACY**3 HRS.**

This course will aid students in the interpretation of visual messages and application of basic principles of visual literacy to communication and problem solving, especially, but not limited to, the educational setting. There will be class discussions to reflect upon the theory of visual literacy and share responses to various activities. The culmination of the class will be a usable student-generated project involving visual literacy skills.

IT 726. ACCESSIBILITY AND UNIVERSAL DESIGN FOR LEARNING**3 HRS.**

Students in this course will design and develop a project that includes the essential elements of the Universal Design for Learning (UDL) using technology. The course will include a review of the literature specifically related to accessibility and UDL. Students will be able to identify learner needs and plan curriculum that will include accessibility for all.

IT 727. INTEGRATING EDUCATIONAL TECHNOLOGY INTO TEACHING**2-3 HRS.**

This course is designed to enhance and extend the technology skills of practicing educators, apply those skills in innovative ways, and create lesson plans that support collaborative, project-based learning. It examines the theoretical and philosophical underpinnings required to transition to a technology-rich classroom. Practical ideas, suggestions and lesson plans to ensure successful technology integration will be provided.

IT 728. ACTIVE LEARNING WITH MAKER SPACES**3 HRS.**

This course is intended to provide a philosophical basis for an understanding of learning, thinking and teaching as well as provide practical guidance for setting up effective digital-age learning and “making” environments.

IT 743. SPECIAL STUDIES IN EDUCATION**1-3 HRS.**

(Prerequisite, consent of instructor.) To provide in-depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction, evaluation of curriculum. Topics will vary from semester to semester.

IT 744. SPECIAL STUDIES IN EDUCATION**1-3 HRS.**

To provide in-depth studies in specific dimensions of teaching, such as techniques of questioning, evaluation of instruction, evaluation of curriculum. Topics will vary from semester to semester. This course is offered only by pass/no credit.

IT 790. LEARNING THEORIES IN INSTRUCTIONAL DESIGN AND TECHNOLOGY**3 HRS.**

This course prepares IDT graduate students to translate the theoretical basis of instructional design to the practice of designing and developing technology-based instruction/technology-rich instruction. It examines the application of foundational theories for instructional design that includes learning theories and instructional theories.

IT 795. RESEARCH IN INSTRUCTIONAL DESIGN AND TECHNOLOGY**3 HRS.**

This course will provide the student with an understanding of research methods with particular emphasis on the field of Instructional Design and Technology (IDT). Students will apply their understanding of research methods to significant research articles in IDT; thus, expanding their understanding of key areas of research in the field of IDT.

IT 800. INSTRUCTIONAL DESIGN**3 HRS.**

This course presents a systematic method for the planning and development of instructional programs. Students will examine the research, theory, and principles supporting contemporary methods of

instructional design as well as analyze and apply instructional design principles to specific instructional design problems. In addition, the course will culminate with a final project that applies instructional design principles, including the evaluation for instruction and the evaluation of instructional programs.

IT 810. MULTIMEDIA DESIGN**3 HRS.**

This course presents a review of the systematic design of instruction as well as an overview of the use of multimedia instructional programs in education. The primary focus of the class is the application of instructional design principles to the development of a multimedia instructional program using a variety of presentation media.

IT 820. DESIGNING/DEVELOPING WEB-BASED INSTRUCTION**3 HRS.**

This course focuses on the technology and design of websites to communicate effectively online. Examined, will be crucial features of what is needed to generate quality content for training or instruction in e-learning environments. Students will have the opportunity to design and develop a training or instructional website related to a professional area of interest.

IT 830. CONTEMPORARY ISSUES IN DISTANCE EDUCATION**3 HRS.**

Offers an overview of the current issues in the three broad areas of distance education, K-12, post secondary, and business/corporate/government/military. The course addresses the trends and overall resources available for delivering education via virtual classrooms. Accreditation, benchmarks, assessment, and limitations of distance education will be covered.

IT 850. CORPORATE eLEARNING**3 HRS.**

This course will concentrate on the application of instructional design principles and eLearning development tools for the corporate eLearning environment. This will include application of theory in settings that demand communication skills and teamwork to develop corporate eLearning education. Examples include designing and developing educationally unique approaches to compliance, job specific, and other directed types of corporate training.

IT 853. RESEARCH PROBLEMS IN EDUCATION**1-5 HRS.**

(Prerequisite, permission to enroll must be approved by the chair of the department.) Under individual direction, the student will select and pursue the investigation of special problems.

IT 875. INTERNSHIP**1-3 HRS.**

(Consent of instructor or department chair.) This course is designed as a practical experience where the student is assigned duties in a professional setting. Students apply their knowledge and skills in instructional design and technology by assisting a professional with “real world” issues in the field. A minimum of 50 clock hours is required per credit hour. An internship agreement and additional course work is required. Graded Pass-No Credit.

IT 895. THESIS IN INSTRUCTIONAL DESIGN AND TECHNOLOGY**1-6 HRS.**

(Prerequisites: IT 800 or permission of instructor or department chair.) This course is designed to facilitate the completion of the thesis for the Master of Science in Instructional Design and Technology. Completion of the thesis will require the student to defend in an open forum the culminating Instructional Design thesis. The thesis will be conceptualized in consultation with the advisor, approved by the advisor and thesis committee, updated, and refined as the student during the course of study. The final thesis will form a coherent paper integrating the student’s instructional design and technology experiences and research. The Thesis Concentration requires 6 hours of IT 895.

IT 899. MASTERS PROJECT IN INSTRUCTIONAL DESIGN & TECHNOLOGY 3 HRS.
(Prerequisite, IT 800 and consent of instructor or department chair.) This course is designed to facilitate the completion of the capstone project. Completion of the project will require the student to demonstrate in an open forum the culminating Instructional Design project. The project will be conceptualized in consultation with the course instructor and advisor, updated, and refined as the student completes class work during the course of study. The final project will form a coherent package integrating the student's instructional design and technology experiences and research related to anticipated or ongoing professional responsibilities.

JOURNALISM

JO 200. MASS COMMUNICATION 3 HRS.
A survey of the history, scope, influence, and problems of the mass media: books, newspapers, magazines, movies, television, radio, public relations, and advertising.

JO 301. NEWS REPORTING 3 HRS.
Students will learn the basics of news reporting for print, broadcast, and convergence journalism, with an emphasis on professional and ethical conduct. Students will cover events on campus, interview people at the university, and develop news and feature articles of interest to the Emporia State community.

JO 302. ADVANCED REPORTING 3 HRS.
(Prerequisite, JO 301.) The course extends the skills learned in Elements of News Reporting, covering computer-assisted reporting, in-depth news, and analysis.

JO 304. MEDIA CONVERGENCE 3 HRS.
This class is designed to take a look at some less-technical ways media were produced not too long ago and how the dispersal of news is shaped today by the technology it travels on, over and through in seconds. Students will become media critics as they create their class-exclusive blogs, explore the mini-blogging world of Twitter, create their own LinkedIn portfolio to be peer edited, delve into the life stream world of Tumblr and discuss the ethics of crowdsourcing, wikis and open platforms. Students will be expected to maintain a blog account, a Twitter account, to write reports over websites and do oral presentations in class. The class will explore how all the pieces of the puzzle fit together in the changing world of media social media, journalism, online media, print, broadcast, blogging and ethics.

JO 305. PUBLICATION DESIGN 3 HRS.
(Prerequisite, JO 301) Students will learn Adobe InDesign, a publication layout program. They will master the skills necessary to lay out newspaper pages before moving on to magazine and newsletter design and other publications design including brochures and advertisements.

JO 306. PHOTOJOURNALISM 3 HRS.
Photojournalism is capable of moving people in ways that few other media can. Some photos have changed the way we see the world and sometimes have changed the world itself-in the 150 years since photography became a practical method of reporting. While taste and technology change, a truthful and well-executed image is timeless and remains essential to the discipline. The emphasis in this class will be on digital photojournalism, as practiced in newsrooms and magazines across the country, including Photoshop. We will also discuss the legal and ethical issues that confront photojournalists on a daily basis, and study best practices advocated by the National Press Photographers Association and other groups. Students will complete a variety of assignments, including news, sports, features, and the photo essay.

JO 307. SPORTS WRITING 3 HRS.
This course offers extensive practice in the writing of sports stories with emphasis on local community sporting events. This course requires significant out-of-classroom time during times not normally scheduled for classes.

JO 308. OPINION WRITING 3 HRS.
This course covers the fundamentals of opinion writing for print, broadcast, and convergent media. Students will learn how to write a variety of opinion pieces including personal columns, editorials, blogs, and reviews.

JO 403. HISTORY AND PRINCIPLES OF AMERICAN JOURNALISM 3 HRS.
(Prerequisite, JO 305) Traces journalism in American from its colonial roots to current technological advances, with special attention to the names and trends that shape media through the centuries.

JO 490. TEACHING JOURNALISM IN THE MIDDLE-LEVEL AND SECONDARY SCHOOL 3 HRS.
This course is designed to train prospective journalism teachers to teach in grades 5-12 and to update experienced teachers in journalism methods.

JO 491. TECHNOLOGY IN THE ENGLISH AND JOURNALISM CLASSROOM 2 HRS.
Students will learn to use technology in the English and Journalism classroom, gain knowledge of and evaluate instructional technologies as they create multimedia presentations, use a variety of electronic resources, and understand the laws that govern technology. Students may not earn credit for both JO 491 and EG 491.

JO 501. LAW AND ETHICS OF JOURNALISM 3 HRS.
(Prerequisite, JO 305.) The history, the development, and the future of the First Amendment and the Fourth Estate and ethical concerns that journalists face daily.

JO 502. EDITING 3 HRS.
(Prerequisite, JO 301) Teaches students how to edit copy according to Associated Press style. Reviews high-level grammar skills. Develops the skills necessary to edit sorties to make the written work more correct, concise, consistent, complete and legal. Students will also learn to write headlines and cut lines and trim stories.

JO 505. STUDIES IN JOURNALISM 1-3 HRS.
Studies in special topics in Journalism. Specific topics vary with each offering and may be repeated for credit with different topics.

JO 506. MAGAZINE JOURNALISM 3 HRS.
(Prerequisite, JO 301) This course will introduce students to marketing researching, and writing professional nonfiction for magazine publication. Emphasis is given to narrative techniques, journalistic, ethics, and a familiarity with current markets. Also, students will gain an appreciation of the history of literary journalism, from Mark Twain to Tom Wolfe.

JO 507. INVESTIGATIVE REPORTING 3 HRS.
(Prerequisite, JO 301) This is an intensive course that explores the advanced research and reporting skills needed for investigative journalism. An emphasis is placed on analytical and critical reasoning, the use of Open Records (such as campaign finance data), and how to conduct sometimes confrontational interviews with those in public office or who otherwise represent powerful interests.

JO 509. INTERNSHIP IN JOURNALISM 1-3 HRS.
Supervised pre-professional experience in the field of journalism. Student and faculty advisor will develop internship goals and assessment plan in consultation with workplace supervisor. May be repeated for credit.

LABORATORY EXPERIENCES:**LE 462. STUDENT TEACHING, ELEMENTARY 3 HRS.**

(Prerequisites, EE 313, 314, 315, 316, 317, 318, and EE 320, admission to Block 3 Teacher Education. Senior standing.) Participation, under supervision, in teaching at elementary level in approved public school or equivalent. Provides special subject area emphasis for students qualifying to teach art, music, physical education, or foreign language at both elementary and secondary school levels and/or for teaching in the self-contained classroom. Observation stressed during initial part of course with responsible teaching emphasized as course progresses. Assignment consists of one-quarter-time teaching for half a semester or equivalent. Specific assignment is made by student teaching office.

LE 463. STUDENT TEACHING, ELEMENTARY 6 HRS.

(Prerequisite, admission to Block 3 Teacher Education. Consent of advisor.) Participation, under supervision, in teaching at the elementary level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment consists of full-time teaching for one-half of a semester or the equivalent. Specific assignment is made by the student teaching office.

LE 480. STUDENT TEACHING, MIDDLE LEVEL 3-12 HRS.

(Prerequisite, admission of Phase II Teacher Education. Consent of instructor.) Participation, under supervision, in teaching at the middle grades (5-9) in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment consists of full-time teaching for one-fourth of a semester to a full semester or the equivalent. Specific assignment is made by the student teaching office.

LE 481. STUDENT TEACHING, EARLY CHILDHOOD 6 HRS.

(Prerequisite, admission to Block 3 Teacher Education. Consent of advisor.) Participation, under supervision, in teaching at the kindergarten or Pre-K level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment to consist of full-time teaching for one-half of a semester or the equivalent. Specific assignment is made by the student teaching office and is usually taken concurrently with EL464.

LE 485. STUDENT TEACHING, EARLY CHILDHOOD SPECIAL EDUCATION 6 HRS.

(Prerequisites, consent of advisor, CD 730, admission to Block 3 Teacher Education.) Participation, under supervision, in teaching in an early childhood special education self-contained or integrated with typical peers at the Pre-K level in an approved public school or the equivalent. Observation/participation is stressed during the initial part of the course with increased responsible teaching emphasized as the course progresses. Assignment to consist of full-time teaching for one half of a semester or the equivalent. Specific assignment is made by the student teaching office.

LE 487. STUDENT TEACHING, SECONDARY 12 HRS.

(Prerequisite, admission to Phase II Teacher Education.) Participation, under supervision, in teaching at the secondary school level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment to consist of full-time teaching for one semester or the equivalent. Specific assignment is made by the student teaching office.

LE 490. STUDENT TEACHING, SECONDARY 6 HRS.

(Prerequisite, admission to Phase II Teacher Education.) Participation, under supervision, in teaching at the secondary school level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment consists of full-time teaching for one-half of a semester or the equivalent. Specific assignment is made by the student teaching office.

LE 493. STUDENT TEACHING, SECONDARY 3 HRS.

(Prerequisite, admission to Phase II Teacher Education.) Participation, under supervision, in teaching at the secondary school level in an approved public school or the equivalent. Observation is stressed during the initial part of the course with responsible teaching emphasized as the course progresses. Assignment consists of one-quarter time teaching for one-half of a semester or equivalent. Specific assignment is made by the student teaching office and usually taken concurrently with LE 462.

LIBRARY INFORMATION**LI 755. SPECIAL TOPICS 1-3 HRS.**

This course provides the opportunity for intensive study of a current topic relating to the library and information profession. It may be taken by seniors.

LI 791. SCIENCE, TECHNOLOGY, ENGINEERING & MATHEMATICS CLASSROOMS AND COMPETITIONS: ASKING QUESTIONS AND DEFINING PROBLEMS 3 HRS.

(Prerequisite: consent of instructor.) The course develops knowledge and skills Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians need to collaborate as instructional partners teaching 4-12 grade level students in science classrooms and competitions. The course provides opportunities for identifying questions and problems from complex texts and in life situations that address local, national, and global STEM related-issues such as sufficient energy; prevention and treatment of illness and disease; maintain clean food and water; and global environmental change.

LI 792. KEY LITERACY CONNECTIONS IN STEM SUBJECTS: CONDUCTING INVESTIGATIONS, ANALYZING, AND INTERPRETING DATA 3 HRS.

(Prerequisite: consent of instructor.) Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians collaborate as instructional partners to prepare to teach 4-12 grade level students to systematically plan and carry out STEM-related investigations making key literacy connections. Students learn techniques to make use of efficient and effective strategies for accessing, evaluating, and using information from diverse sources; presenting data in multiple formats; and analyzing and interpreting data through tabulating, graphing, and/or statistical analysis.

LI 793. ADVANCING AND DEFENDING NEW IDEAS: ENGAGING AN ARGUMENT FROM EVIDENCE 3 HRS.

(Prerequisite: consent of instructor.) The course explores the process of argument necessary for advancing and defending new ideas or explanations of STEM-related phenomena. STEM teachers and school librarians learn the norms for using evidence to construct and defend viable arguments, and to compare and contrast different sources in the process of creating a coherent understanding of phenomena, concepts, or design solutions. Emphasis is on teaching 4-12 grade level students reading, writing, and speaking grounded in evidence.

LI 794. SKILLS FOR A DEEP TECHNICAL WORKFORCE: OBTAINING, EVALUATING, AND COMMUNICATING INFORMATION **3 HRS.**

(Prerequisite: consent of instructor.) This course gives Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians the opportunity to learn strategies to develop 4-12 grade level students' abilities to: access and organize information for practical application; integrate new information; practice ethical information behavior; produce and communicate information and ideas using intellectual skills, cognitive abilities, scientific reasoning, and problem solving skills. The focus is on abilities and skills necessary for intellectual curiosity and for STEM-related 21st century jobs and careers.

LI 800. INTRODUCTION TO INFORMATICS **3 HRS.**

This is an introduction to information and systems theories, information technologies, analysis and design of information systems, information problem identification and practical problem solving, and supporting decision making. The course covers both conceptual building blocks and practical dimensions of informatics, and students are introduced to statistical analysis and simple programming. Information processing applications to solve real world problems in broad domains are emphasized.

LI 801. FOUNDATIONS OF LIBRARY AND INFORMATION SCIENCE **3 HRS.**

Recommended for all new MLS students in their first semester. An introduction to information agencies and professions, this course examines the philosophical and ethical underpinnings, roles and societal contexts, and current issues of the global information society. Students explore the role of information in society, change as reflected in paradigm shifts, the theory and processes of information transfer, and the characteristics of information professionals and professional practices. (Required)

LI 802. INFORMATION-SEEKING BEHAVIOR AND REFERENCE SERVICES **3 HRS.**

(Prerequisite, LI 801 or concurrent enrollment.) This course is an introduction to user-centered reference services and the application of theories of information behavior. Students are introduced to models of information seeking, retrieval and sharing; student accommodations for the selection, evaluation, and use of appropriate resources; information literacy, learning styles, and best practices in providing user-centered reference services. (Required)

LI 804. ORGANIZATION OF INFORMATION **3 HRS.**

(Prerequisites, LI 801 or concurrent enrollment.) In this introduction to the individual, social, and institutional perspectives of organizing information, students examine the assumptions, practices, issues, and tools commonly associated with information organization systems in various types of information agencies. The impact of different approaches to accessing information is emphasized. (Required)

LI 805. MANAGEMENT IN INFORMATION ORGANIZATIONS **3 HRS.**

(Prerequisite, LI 801 or concurrent enrollment.) Students learn the foundations and basic skills necessary for the management of information organizations. Students examine and apply management skills, including planning, organizing, leading, and influencing. (Required)

LI 809. INTRODUCTION TO ARCHIVES **3 HRS.**

Students are introduced to the archival profession and to archives and manuscripts in multiple formats. The course explores the functions of selection, appraisal, acquisition, arrangement and description, reference services and access, preservation and protection, outreach, advocacy, promotion, management, and professional ethical and legal responsibilities.

LI 810. RESEARCH IN LIBRARY AND INFORMATION SCIENCE **3 HRS.**

(Prerequisite: LI 801 or concurrent enrollment.) This course provides an introduction to qualitative and quantitative research methods and their applications in library and information science. Principles and procedures for analyzing and evaluating research are introduced and students learn to be better consumers and critics of published research literature. (Required)

LI 811. COMMUNITY NEEDS ANALYSIS **2 HRS.**

This course surveys and applies the tools, resources, and research methods used for analyzing, designing, implementing or modifying, and evaluating library and information systems and services. Students study community analysis, needs assessment, and other tools of analysis and assessment. Recommended: LI 810. (Approved 3/9/2015)

LI 813. ADVANCED REFERENCE SERVICES **3 HRS.**

(Prerequisite: LI 802) This course offers an introduction to a wide variety of print and electronic reference sources and current issues in the provision of reference services. Students learn effective ways to select information retrieval tools and resources, develop search strategies, and evaluate search results. Evaluation of print and electronic sources is also addressed.

LI 814. CATALOGING AND CLASSIFICATION **3 HRS.**

Students are introduced to the terms, concepts, and tools used to describe and organize information in information organizations. Topics covered include: bibliographic description, choice of entry, subject analysis, classification systems, and creating bibliographic records. Recommended: LI 804.

LI 815. INFORMATION TECHNOLOGY **3 HRS.**

Information Technology provides an introduction to the concepts and skills necessary for library and information professionals. Students learn to facilitate the use of information technology; to evaluate and select technology solutions; to understand and keep abreast of technological change, both personally and institutionally; and to deploy technology effectively. Policy issues surrounding technology use, including privacy, copyright and legal concerns are also considered. (Required)

LI 816. LEGAL INFORMATION RESEARCH AND RETRIEVAL **2 HRS.**

Students are introduced to the sources of the law; to the structure, organization, and access of legal information, to legal research methods, and their application in solving legal information problems.

LI 818. ARCHIVAL ARRANGEMENT AND DESCRIPTION **3 HRS.**

Students are introduced to the theories, terms, concepts, principles, and methods of arrangement and description of documents and materials in archives. The history and evaluation of arrangement and description, finding aids, websites for archives, and the practical and administrative issues of arrangement and description are addressed. Recommended: LI 809.

LI 819. INFORMATION RETRIEVAL **3 HRS.**

This is an introduction to the theory, organization, implementation, and evaluation of information retrieval systems. The course covers document and query representation, retrieval models, matching, filtering, evaluation techniques, user interfaces, data mining, and non-text retrieval. Students learn to employ evaluation techniques to assess information retrieval systems.

LI 822. MULTIPLE LITERACIES IN LIBRARIES 3 HRS.
Students apply knowledge of educational, media, and sociocultural theories to the design of readers' advisory services, library programs, and literacy activities in academic, public, and school library settings. Emphasis is given to meeting the recreational, cultural, informational, and educational needs of children, young adults, and adults through the integration of visual, digital, textual, and technological literacy methods.

LI 825. MULTICULTURAL RESOURCES AND SERVICES FOR LIBRARIES 3 HRS.
The course introduces a wide range of multicultural resources in all formats. Students apply knowledge of educational theories to the design of readers' advisory services, library programs, and literacy activities in academic, public, and school library settings. Emphasis is given to meeting the recreational, cultural, informational, and educational needs of African American, Asian American, Latina/o, Native American, and bi/multiracial children, young adults, and adults.

LI 827. PRESERVATION STRATEGIES 3 HRS.
This course introduces the strategies, techniques, processes, and applications involved in the preservation of library materials. Students learn the history of the production of library materials; the causes of physical and chemical deterioration; the accepted approaches to conservation; and preventive measures such as environmental control, proper handling of materials, and effective approaches to disaster preparedness and response.

LI 829. RESOURCES AND SERVICES FOR EARLY LEARNERS 3 HRS.
This course explores the recreational, cultural, informational, and educational needs of 21st century early learners. Students apply knowledge of child development and language acquisition to the design of reader's advisory services, library programs, and literacy activities in public and school library settings. Emphasis is given to the selection of resources in all media formats to reflect awareness of, and sensitivity to, the social and cultural needs of all early learners.

LI 830. CURRENT ISSUES IN YOUTH SERVICES 2 HRS.
The course focuses on selected topics of current significance within the context of Youth Services. Each course may focus on topics relevant to early learners, children or young adults, as appropriate, or may examine issues across the whole spectrum of youth services.

LI 831. RESOURCES AND SERVICES FOR CHILDREN 3 HRS.
This course explores the recreational, cultural, informational, and educational needs of 21st century children. Students apply knowledge of child development theories to the design of reader's advisory services, library programs, and literacy activities in public and school library settings. Emphasis is given to the selection of resources in all media formats to reflect awareness of, and sensitivity to, the social and cultural needs of all children.

LI 832. RESOURCES AND SERVICES FOR YOUNG ADULTS 3 HRS.
This course explores the recreational, cultural, informational, and educational needs of 21st century young adults. Students apply knowledge of adolescent development theories to the design of reader's advisory services, library programs, and literacy activities in public and school library settings. Emphasis is given to the selection of resources in all media formats to reflect awareness of, and sensitivity to, the social and cultural needs of all young adults.

LI 833. RESOURCES AND SERVICES FOR DIVERSE POPULATIONS 3 HRS.
This course provides an overview of the design and implementation of library and information services for all segments of society. Special

emphasis is placed on ethics and equity of access to information in all media formats. Recommended: LI 810 & LI 811.

LI 835. INFORMATION SERVICES FOR ACADEMIC LIBRARIES 2 HRS.
Students are introduced to the design and implementation of library and information services for the academic disciplines of the humanities, sciences, and social sciences within educational and research institutions. Special emphasis is placed on understanding the components of the academic libraries that serve the information needs of higher education communities. (Approved 3/9/2015)

LI 837. LIBRARY INSTRUCTION AND INFORMATION LITERACY 3 HRS.
This course provides an overview of concepts and theories relating to library instruction and the teaching of information literacy in all libraries and information agencies. Students will learn about key differences in traditional vs. online education and develop strategies for delivering content in a number of different settings, from one-shot instructional sessions and library workshops to semester long academic college courses. Students will also master skills in areas fundamental to instructional librarianship such as classroom management, course design, and assessment. Recommended: LI 802 (Approved 11/14/2018)

LI 838. GOVERNMENT RESOURCES 2 HRS.
Students study government patterns for creating, producing, disseminating, organizing, diffusing, and utilizing information at the international, national, and state levels. Examples of government information resources are examined, as well as tools for government information retrieval.

LI 839. HISTORY OF LIBRARIES 2 HRS.
This course offers an historical approach to the study of libraries, librarianship, and the information professions from antiquity to the 21st century. Students explore the history of Western library and information professions in the context of international developments and examine the evolution of libraries, archives, and information and documentation centers as antecedents of today's information agencies.

LI 842. INDEXING AND ABSTRACTING 2 HRS.
This course introduces the principles, concepts, and basic processes of indexing and abstracting. Students explore the means by which information can be represented by indexes and abstracts, and construct indexes and abstracts that meet client information retrieval needs.

LI 843. WEB DESIGN AND DEVELOPMENT 3 HRS.
This course offers an introduction to the basic principles, processes, and technologies of website design and construction, including HTML programming, cascading style sheets, JavaScript, and other web design tools. Students examine the issues of web usability, accessibility, web standards compliance through the creation of websites for real-world applications.

LI 844. DATABASE DESIGN 3 HRS.
The course provides an introduction to the fundamentals of database design, including analyzing information requirements, developing an entity-relationship model, organizing data into a relational database, and querying the database. The focus is on database applications and assessing designs to determine efficient database access for various clients.

LI 848. ISSUES IN PRESERVATION, ACCESS AND DIGITIZATION 3 HRS.
This course examines issues related to access, digitization, and preservation of information, focusing on the impact of technology on these processes, including future accessibility, authorship, authority, ethics, legitimacy, authenticity, management, preservation, and control. Students examine strategies for managing these issues in a dynamic and competitive information environment.

LI 849. RECORDS AND INFORMATION MANAGEMENT**3 HRS.**

This course examines the process of creating and maintaining the corporate and cultural memory of an organization through its records. Students study the concepts and principles of records and information management, applications and best practice, the history of the field and current issues affecting the profession.

LI 850. LEADERSHIP IN INFORMATION ORGANIZATIONS**3 HRS.**

Prerequisite: LI 805 Management in Information Organizations. Students study the effects of organizational design on the work and leadership of information organizations. Traditional and contemporary leadership theories and practices are examined in depth.

LI 851. MANAGING THE SCHOOL LIBRARY MEDIACENTER**3HRS.**

(Prerequisites, LI 801, LI 802, and LI 804.) Students explore management techniques related to organizing and circulating library materials as well as staffing, budgeting, and day-to-day operations of the school library, including issues relevant to strategic planning, goal setting, and program design. Special emphasis is given to the school librarian's role as instructional leader, collaborative planner, and team teacher.

LI 855. COLLECTION DEVELOPMENT AND MANAGEMENT**3 HRS.**

This course examines the principles, policies, and procedures associated with evaluating, selecting, and acquiring materials and resources. Students learn about developing, managing, and organizing collections in libraries and information organizations, paying attention to the ethical, philosophical, social, and political contexts in which these collections exist. (Required)

LI 856. ELECTRONIC RESOURCES MANAGEMENT**3 HRS.**

An in-depth exploration of the selection, acquisition, licensing, accessibility, linking, branding, evaluation, cost control, and preservation of licensed electronic resources in information organizations. This course covers the management of e-content types used in a variety of information organizations including books, serials, audio, video, citation indexes, and large data sets, as well as aggregating technologies and the management systems used to control the administrative metadata for electronic resources. Students explore current trends, problems, and issues related to managing licensed electronic resources in information organizations such as licensing, legal issues, scholarly publishing, open access, open-source technology, purchasing models, and assessment models.

LI 857. ADVANCED PROGRAMMING FOR YOUTH SERVICES**1 HR.**

Examination of the principles, policies, and procedures associated with creating, planning and implementing library programs for early and middle childhood and young adults. Students also learn about staffing, managing, evaluating and advocating for these programs, and study best practice in recruiting and collaborating with external partners to provide sustainable programs that foster reading and information literacy within the community.

LI 858. INFORMATION LITERACY AND INSTRUCTIONAL COLLABORATION IN SCHOOL LIBRARIES**2 HRS.**

Students explore the teaching of information literacy and instructional collaboration with classroom teachers in K-12 school settings. The course also examines the role of the school library media specialist in addressing state and national standards, in authentic assessment, and in establishing professional collaborative relationships across the entire learning community.

LI 859. PROJECT MANAGEMENT IN INFORMATION ORGANIZATIONS**3 HRS.**

This course examines the theory and practice of project management within information organizations. Students study the roles and responsibilities of project managers and learn a practical approach to managing projects in information organizations. The course covers all aspects of the project life-cycle (initiating, planning, executing, monitoring/controlling, and closure), and addresses staffing, workflow, communication and team-building, tools and techniques, and software.

LI 860. CURRENT ISSUES IN GLOBAL INFORMATION INFRASTRUCTURE**1-3 HRS.**

This course is designed to allow students to explore timely issues arising from the dynamics of global interactions of information technology, government policies, the structure of knowledge, and the operations of libraries, archives and information organizations.

LI 861. CURRENT ISSUES IN INFORMATION TRANSFER**1-3 HRS.**

The course focuses on selected topics of current significance in the information transfer model, including the creation, dissemination, organization, diffusion, utilization, preservation, and destruction of information.

LI 862. CURRENT ISSUES IN TECHNOLOGY**1-3 HRS.**

The course focuses on selected topics of current significance within the context of information technology. Students analyze technology issues in the context of libraries and information agencies, including hardware and software and the dynamic relationships among computers, audio, video and telecommunications, mass storage, social media, and users.

LI 863. CURRENT ISSUES IN MANAGEMENT IN INFORMATION ORGANIZATIONS**1-3 HRS.**

The course focuses on selected topics of current significance within the context of management of information organizations. Students investigate current issues related to the management of people, information resources, services and systems in library and information agencies.

LI 865. INDEPENDENT STUDY**1-3 HRS.**

(Prerequisite, permission of instructor.) This course provides for individual study of an issue in library and information management or information systems design, under the direction of a faculty member.

LI 866. INTRODUCTION TO COPYRIGHT**1 HR.**

This course explores the historical, legal, ethical, and practical aspects of copyright and licensing law from a library perspective. Students study best practice in applying these principles to libraries and information agencies.

LI 868. ADVOCACY AND INFORMATION ORGANIZATIONS**3 HRS.**

Students learn to apply advocacy tools and practices to build and create stakeholder support for the information organization's goals and resource needs. Students explore marketing, public relations, and development techniques for use in information organizations.

LI 870. PRACTICUM**1-3 HRS.**

(Prerequisite, consent of instructor.) The practicum is a supervised, advanced professional experience in a library or information center. Students engage in professional activities; apply theories, principles, and skills learned in professional courses; and discuss problems and relevant topics associated with professional practice.

LI 873. ARCHIVES STUDIES CERTIFICATE PRACTICUM**3-6 HRS.**

(Prerequisite, consent of instructor.) Students gain practical and professional work experience in a supervised setting through the application of theories, principles, and skills learned in archives studies courses. Students must follow the guidelines set forth in the Archives Studies Certificate (ASC) Practicum Handbook.

LI 874. INFORMATICS PRACTICUM**3 HRS.**

(Prerequisites: Successful completion of 30 credit hours in informatics core and concentration courses.) The practicum course provides opportunities for students, under the supervision of informatics faculty, to apply synthesized content from informatics core and concentration courses in designing solutions for information and communication needs in real-world environments. Students prepare proposals to address identified domain needs that reflect knowledge of information structures, information processes, and information technology; demonstrate knowledge of appropriate professional standards and scope of practice; and contribute to improved client outcomes.

LI 876. SCHOOL LIBRARY MEDIA ELEMENTARY PRACTICUM**1 HR.**

(Prerequisite, consent of instructor.) The school library media specialist elementary practicum is a supervised field experience where students apply theories and techniques of information organization and retrieval, collection development and management, information literacy, instructional collaboration, information technology, and the management of information organizations to the elementary school setting.

LI 877. SCHOOL LIBRARY MEDIA SECONDARY PRACTICUM**2 HRS.**

(Prerequisite, consent of instructor.) The school library media specialist secondary practicum is a supervised field experience where students apply theories and techniques of information organization and retrieval, collection development and management, information literacy, instructional collaboration, information technology, and the management of information organizations to the secondary school setting. Students also create an electronic practicum notebook, which includes both elementary and secondary policy, management, and instructional materials, and a comprehensive reflection on the practicum experience.

LI 880. CAPSTONE COURSE: ASSESSING THE MLS EXPERIENCE**1 HR.**

This course gives students the opportunity to reflect on their growth and development over the course of their MLS experience. Students finalize their assessment portfolio through the selection and analysis of assignment artifacts, the creation of reflective essays on the portfolio content, and a self-assessment of the extent to which they meet the MLS program outcomes. (Required)

LI 883. INTRODUCTION TO METADATA**1 HR.**

(Prerequisite: LI804 or permission of instructor.) This is an introduction to the concepts, principles, and terminology required for work with metadata in information agencies such as libraries, museums, and archives. Students explore existing metadata schemas, application profiles, and standards in context. The course builds on concepts from LI804 and includes analysis, comparison, and evaluation of existing metadata and encoding schemas as well as the creation of metadata records.

LI 884. ADVANCED METADATA APPLICATIONS**2 HRS.**

(Prerequisite, LI883 or concurrent enrollment.) This course examines the theory, practice, and current issues in the application of metadata in information agencies. Students explore current issues in metadata application, including approaches to creating metadata schemas and application profiles, designing and documenting metadata and encoding schemas, and learning associated metadata tools and technologies.

LI 885. BIBLIOGRAPHIC AND RESEARCH METHODS IN ARCHIVES**3 HRS.**

This course examines the relationship between historical events, the creation and maintenance of archival records, and the construction of collective memory. In addition to an examination of the literature related to memory and recorded information, students gain familiarity with the use and interpretation of varied sources of documentation, including public records, genealogical records, museum displays, oral histories, maps, and artifacts.

LI 887. SYSTEM ANALYSIS AND DESIGN**3 HRS.**

This course provides a detailed analysis of the System Development Life Cycle (SDLC). Emphasis is placed on the tools and techniques that a project leader and systems analyst would use to analyze, design and document an information systems with the object-oriented approach as well as traditional approach. The course will also emphasize the importance of various skills, which the systems analyst should possess, including: communication, problem solving and project management. Team-oriented projects are utilized to aid in understanding how systems concepts are developed in the business world.

LI 888. INFORMATION TECHNOLOGY PROJECT MANAGEMENT**3 HRS.**

This course will present project management techniques, potential problems, and overall decision making associated with software development projects. Specific topics will address planning, organizing, scheduling, and controlling information technology projects, current tools and techniques, and the roles and responsibilities of project managers.

LI 889. KNOWLEDGE MANAGEMENT**3 HRS.**

Knowledge Management encompasses a broad range of activities in an organization and is firmly dependent upon the human factor for the enhancement and success of knowledge use. Knowledge is used to improve the decision making of individuals in an organization. KNOWLEDGE, AT THE RIGHT TIME, IN THE RIGHT PLACE is required for more effective decision-making. This course will review the breadth of activities associated with knowledge from the organizational level to the individual knowledge worker level. These activities include knowledge transfer from an inter- and intra- organizational perspective, IT enhanced knowledge transfer, knowledge capability enhancement and knowledge sharing cultural perspectives.

LI 890. ADVANCED RESEARCH STRATEGIES**3 HRS.**

Building on LI 810, this course focuses on comparing and contrasting the philosophical foundation and research strategies of studies that use qualitative, quantitative, and mixed-method approaches to investigate problems in LIS. Students assess various methodological tools and approaches to investigating research questions, and practice evaluating LIS research studies. Recommended: LI 810.

LI 891. SEMINAR IN INFORMATION TRANSFER**3 HRS.**

Students examine the theoretical constructs, concepts, research and practices of the transmission and processing of symbolic, verbal, and/or recorded messages for the creation, diffusion, and utilization of knowledge in society. Recommended: LI 801 and LI 810.

LI 892. SEMINAR IN INFORMATION PSYCHOLOGY**3 HRS.**

Students explore the theories, models, and insights into information seeking and information use offered by cognitive psychology, behavioral psychology, social psychology and psychoanalytic theory. Recommended: LI 802.

LI 893. SEMINAR IN ADMINISTRATIVE THEORY**3 HRS.**

This course examines a series of theories, models, and concepts that provide insight into the management of organizations, the people and tasks of an organization, and the work, activities, and processes within an organization. Recommended: LI 805

LI 894. SEMINAR IN ORGANIZATION OF INFORMATION**3 HRS.**

Students examine theories, models, and aspects of organization of information, including those that provide an understanding of knowledge organization systems, the representation and organization of information in digital forms, and effective methods of information access and retrieval. Recommended: LI 804.

LI 899. THESIS**1-4 HRS.**

This course provides the opportunity for intensive investigation of a problem in the library and information professions, under the direction of a faculty committee. Permission of Dean required.

LI 900. INTRODUCTION TO DOCTORAL STUDIES**1 HR.**

This is an introduction to the SLIM doctoral program, to doctoral work, and to the culture of the researcher. Students explore their respective research interests and draft their Ph.D. program plans.

LI 903. RESEARCH PHILOSOPHY**3 HRS.**

This course examines various constructs of science in society. Emphasis is placed on identifying assumptions about human nature, defining a researcher's view of the social world, and identifying basic paradigms that serve as a foundation for inquiry.

LI 904. RESEARCH STRATEGIES: QUANTITATIVE METHODS AND THEORY**3 HRS.**

Students explore the theory and application of quantitative research methods that they might use to investigate research questions as part of the dissertation. The course emphasizes the rules, procedures, statistics and general research protocols that are foundational to the researcher's role.

LI 905. RESEARCH STRATEGIES: QUALITATIVE METHODS AND THEORY**3 HRS.**

Students explore the theory and application of qualitative research methods that they might use to investigate research questions as part of the dissertation. The course addresses the issues of designing and implementing qualitative research, as well as the gathering and interpreting of qualitative data and of ensuring rigor in the research design and execution.

LI 940. TEACHING AND LEARNING IN ORGANIZATIONS**3 HRS.**

This course focuses on teaching and learning, curriculum development, the roles of the faculty member in the university and in the profession, as well as the structure of educational institutions for adults.

LI 946. DIRECTED READINGS**1-3 HRS.**

Students undertake a program of directed readings, under faculty supervision, in preparation for qualifying exams or the dissertation proposal. Students may enroll three times in this course.

LI 947. DISSERTATION PROPOSAL**3 HRS.**

(Prerequisite, LI 890.) Students complete all aspects of the dissertation proposal, including developing the problem statement and research questions, preparing the literature review and conceptual framework, establishing the design logic and procedures, the identification of ethical issues, securing IRB approval, conducting the pilot study, and writing the proposal document.

LI 949. CONTINUOUS ENROLLMENT**1 HR.**

Students work, under faculty supervision, through a particular part of the doctoral program, requiring research and reading activities.

LI 950. DISSERTATION**3-15 HRS.**

(Prerequisite, LI 947.) Students must complete a minimum of 15 hours of dissertation credit and enroll in at least three credits each semester until the dissertation is completed or until eight years after admission to the doctoral program has expired. Dissertations are expected to contribute new knowledge to the field through quality research, and are supervised by a committee of at least three qualified members of the graduate faculty, one of whom must be from outside the School of Library and Information Management and may be from outside the university. Upon completion of the dissertation, all students defend their research during an oral examination conducted and evaluated by the dissertation committee and open to the public.

LEADERSHIP**LR 280. LEADERSHIP IN A DIVERSE SOCIETY****3 HRS.**

(Prerequisite, sophomore standing.) This course will focus on the development of the awareness, knowledge, and skills necessary in the study of leadership to promote culturally relevant interaction with people from backgrounds which differ from the student's own. Modern approaches to leadership are studied through a survey of contemporary leadership theories. Throughout the seminar socially-constructed identities in American society are examined to increase understanding of and effective leadership within diverse groups. This course emphasizes self-knowledge and uses methods of experiential and didactic learning.

MATHEMATICS**MA 049. ARITHMETIC SKILLS IMPROVEMENT****2 HRS.**

This course is for students whose Gateway, a required departmental examination for MA307, scores indicate a need for improving arithmetic skills prior to reenrolling in MA307 or enrolling in MA308. Course content includes arithmetic skills, including addition, subtraction, multiplication, and division of fractions and decimals; percentages and their applications; and geometric concepts such as area and perimeter.

MA 091. TOPICS IN MATHEMATICS**1-6 HRS.**

The course offers selected topics in mathematics not currently found in other mathematics courses. See Schedule of Classes for specific topic and prerequisites when offered.

MA 095. BEGINNING ALGEBRA**3 HRS.**

(Prerequisite, for students whose ACT scores and/or departmental screening examination indicate basic need for computational and algebraic skills prior to enrollment in the proper general education course.) Review of computational skills in the arithmetic of whole numbers, fractions, and decimals. Review of proportion and percent concepts. Review of basic algebra skills including signed numbers, algebraic expressions and simplification, laws of algebra, factoring, equation solving, graphing, and formula usage. Computer aided instruction will enhance skills development.

MA 097. BEGINNING AND INTERMEDIATE ALGEBRA**4 HRS.**

(Prerequisite: for students whose ACT score and/or Algebra Evaluation indicate basic need for computational and algebraic skills prior to enrollment in the proper general education course.) Review of computational skills in the arithmetic of whole numbers, fractions, and decimals. Review of proportion and percent concepts. Review of basic algebra skills including signed numbers, algebraic expressions and simplification, laws of algebra, factoring, equation solving, graphing, and formula usage. Review of linear and quadratic equations, exponents and radicals.

MA 098. INTERMEDIATE ALGEBRA 3 HRS.

(Prerequisite, MA 095 or appropriate ACT score or appropriate score on the math placement exam.) A thorough review of the fundamentals of elementary algebra, linear and quadratic equations, exponents and radicals.

MA 110. COLLEGE ALGEBRA † 3 HRS.

(Prerequisite MA097 or, MA 098, or appropriate ACT score or appropriate score on the Algebra Evaluation.) This course provides a review of the concepts and skills of algebra with an emphasis on functions. Topics include linear, quadratic, rational, exponential, and logarithmic functions, as well as solving equations and inequalities.

MA 111. COLLEGE ALGEBRA WITH REVIEW 5 HRS.

(Prerequisites: MA 097 or MA098 or appropriate ACT math score or appropriate score on the Algebra Evaluation.) This course provides a review of the concepts and skills of algebra with an emphasis on functions. Topics include linear, quadratic, rational, exponential, and logarithmic functions, as well as solving equations and inequalities. This course proceeds at a pace that allows for review and practice of prerequisite skills and concepts. Note: if a student has completed both MA110 and MA111, only the more recent grade will be counted towards the student's GPA.

MA 112. TRIGONOMETRY † 2 HRS.

(Prerequisite, MA 110 or equivalent.) Trigonometric functions, identities, graphs, trigonometric equations, radian measure, complex numbers, polar coordinates, solving triangles, applications.

MA 120. ELEMENTARY STATISTICS † 3 HRS.

(Prerequisite, High school Algebra or MA 095 is highly recommended.) This course is designed to introduce students to basic statistics, and Statistical inference. Topics include: descriptive statistics, summarizing univariate data, correlation and regression for bivariate data, concepts of probability, probability distributions, simulation, sampling distributions, estimation, and hypothesis testing. Some uses of statistical software will be incorporated into this course.

MA 125. INTRODUCTION TO MATHEMATICS 1 HR.

(Prerequisite, course will be required for all students with Math or Math Ed. Majors, who are new to the program, whether first-year students or transfer students.) This course introduces incoming majors to the math department, the world of mathematics and the college environment. It addresses goals, expectations, responsibilities, math classes, decision making, study skills, problem solving and the joy of doing mathematics, as well as career choices in mathematics.

MA 130. PROBLEM SOLVING WITH COMPUTERS 3 HRS.

(Prerequisite, one year of high school algebra.) An introductory study of problem solving using computers. Basic programming skills and efficient techniques for setting up problems applicable for computer solution are stressed. The primary response of the student is to solve problems by writing programs, testing them, and obtaining the results on the computers.

MA 156. PRINCIPLES OF MATHEMATICS † 3 HRS.

(Prerequisite, MA 097 or MA 098 or appropriate ACT score or appropriate score on the Mathematics Placement examination.) A course in mathematics for the non-technically oriented student. Problem solving skills and critical thinking skills are developed through a selection of interesting and unique mathematical content and topics. Previously learned skills in algebra and geometry are enhanced and improved as students develop a greater awareness of and appreciation for mathematics.

MA 160. PRECALCULUS 4 HRS.

(Prerequisites, MA 097 or MA098 or ACT math score of 22 or higher.) This course provides the background in algebra and trigonometry that is necessary for calculus. It focuses on functions as mappings, associations, and ordered pairs; graphs of algebraic, absolute value, greatest integer, logarithmic, trigonometric, and exponential functions; and operations on and inverses of functions.

MA 161. CALCULUS I † 5 HRS.

(Prerequisite, MA 110 and MA 112 or equivalent, or appropriate ACT score.) Calculus is the mathematics of change. This course focuses on the differential calculus of one variable. It includes the study of limits, differentiation, implicit differentiation, the Mean Value Theorem, optimization, related rates; it illustrates applications from other fields.

MA 162. CALCULUS HONORS 1 HR.

(Prerequisite, either completed or currently enrolled in MA 161, Calculus I.) In this one hour class, students do investigative projects on calculus topics which align with the content in the five hour, Calculus I course. These projects are designed to enrich the students' conceptual understanding of the fundamental calculus I topics.

MA 165. BASIC CALCULUS † 5 HRS.

(Prerequisite, MA 110 or equivalent.) A course designed for non-math majors which emphasizes the application of calculus procedures to Economics, Business, Social Sciences, Life Sciences, and other areas. Topics include limits, derivatives, and integrals.

MA 191. TOPICS IN MATHEMATICS 1-6 HRS.

The course offers selected topics in mathematics not currently found in other mathematics courses. See Schedule of Classes for specific topic and prerequisites when offered.

MA 223. ELEMENTARY LINEAR ALGEBRA 3 HRS.

This course is an introduction to linear algebra. The topics include systems of linear equations, vectors, matrices, determinants, linear transformations and applications. We will focus on techniques of solving systems of linear equations, matrix arithmetic and basic proof writing skills.

MA 225. MATHEMATICS AS A DECISION MAKING TOOL 3 HRS.

(Prerequisite, MA 110.) This course is designed for non-mathematics majors. The focus of this course is to develop quantitative skills, and reasoning ability necessary to help students read critically and make decisions in our technical information society. A project tying this course to the student's own interests is a course requirement. Major topics include: collecting and describing data, inferential statistics and probability; geometric similarity, geometric growth, symmetry and patterns.

MA 229. PROBLEM SOLVING WITH MATHEMATICS 3 HRS.

This course stresses the connection between contemporary mathematics and modern society. Students in this course will examine the use of mathematics to solve a wide range of problems found in the managerial sciences, voting and social choice, fairness and game theory, the digital revolution, and size and growth. Problems that are related to specific mathematical models or whose foundations are rooted in mathematics will be investigated in this course. Such problems may include the use of Euler and Hamiltonian circuits, minimal-cost spanning tree, linear programming, various voting methods, fair division, apportionment, game theory, bar coding and encryption, binary codes, cryptography, geometric similarities, symmetry and patterns, and tilings.

MA 240. DISCRETE MATHEMATICS 3 HRS.
(Prerequisites, MA 161, MA 165, or permission of the instructor.) Discrete mathematics is the study of relationships between finite and countable sets as well as the analysis of processes involving a finite number of steps. This course will introduce and emphasize the concept and methods of proof, while studying topics such as sets, logic, functions and relations, mathematical induction, and recursion.

MA 262. CALCULUS II 5 HRS.
(Prerequisite, MA 161 or equivalent.) As a continuation of Calculus I, this course emphasizes integration. Topics include techniques of integration, improper integrals, numerical integration, basic differential equations, sequences, infinite series; applications to other fields are illustrated throughout the course.

MA 291. MATHEMATICAL MODELING 3 HRS.
(Prerequisite, MA 161 or MA 165.) Mathematical modeling is the "art" of using math to help understand, describe, and forecast real-world phenomena. Topics include the modeling process, model fitting, optimization, experimental modeling, simulation, and modeling using the derivative.

**MA 307. MATHEMATICS FOR THE ELEMENTARY/
MIDDLE SCHOOL TEACHER 3 HRS.**
(Prerequisite, must have a grade of "C" or higher in MA 110 or MA 111.) This course will prepare prospective elementary and middle school teachers to know, understand, and use the basic principles and concepts of mathematics involving sets, whole numbers, integers, rational numbers, and real numbers. Each student enrolled in this course must complete a departmental arithmetic proficiency exam. This exam is a significant part of the course grade and to receive any points a score of 80% or above must be achieved. This exam will be given three times and will be completed in the first half of the semester. For further details, contact the Department of Mathematics and Economics at 620-341-5281.

**MA 308. MATHEMATICS FOR ELEMENTARY/
MIDDLE SCHOOL TEACHER II 3HRS.**
(Prerequisite, must have a "C" or higher in MA 307.) This course will prepare prospective elementary and middle school teachers to know, understand, and use the basic principles and concepts of mathematics involving probability, statistics, measurement, and geometric concepts, such as properties of two and three-dimensional shapes, congruency, similarity, and transformations.

**MA 309. STRATEGIES FOR THE MATHEMATICS
CLASSROOM WITH DIVERSE LEARNERS 3 HRS.**
Preservice mathematics teachers in this course will examine effective instructional strategies for the teaching of mathematics to diverse learners in grades 5-12. Numerous instructional models will be investigated to help bridge the gaps between a student's current mathematical abilities to the desired levels of proficiency. In addition, preservice teachers will examine the role of differentiated instruction for meeting the needs of all students, including the student who is talented in the area of mathematics. As a capstone project to the course, students will develop an instructional plan to work with a student in grades 6-12 with a particular physical, behavioral, or cognitive disability.

**MA 312. ALGEBRA FOR THE ELEMENTARY/
MIDDLE SCHOOL TEACHER 3 HRS.**
(Prerequisite, MA 225 or equivalent.) Algebraic concepts needed for today's elementary/middle schools including properties of the field of real numbers, algebraic and graphic solutions of equations and of inequalities. Concrete models, such as algebra tiles, will be examined in the teaching and learning of algebra.

**MA 313. GEOMETRY FOR THE ELEMENTARY/
MIDDLE SCHOOL TEACHER 3 HRS.**
(Prerequisite, MA 309.) Geometric concepts needed for today's elementary/middle schools including geometric constructions, experimental geometry, and a study of congruences, similarity, and measurement.

MA 322. INTRODUCTION TO LINEAR ALGEBRA 3 HRS.
(Prerequisites, MA 240 or permission of instructor.) This course provides additional experience with proof while introducing the methods and applications of solving systems of linear equations. Topics include: elementary vector arithmetic and matrix arithmetic, Gaussian Elimination and the Reduced Echelon Form, linear transformations, linear independence, basis, dimension, range, null space, rank, and determinants.

MA 331. THE MATHEMATICS OF FINANCE 3 HRS.
(Prerequisite, two years high school algebra or equivalent.) Simple and compound interest and discount, present value and accumulated value of annuities, bonds, amortizations, sinking funds, depreciation, life annuities and life insurance. Introduction to linear programming for solution of problems of business and industry.

MA 335. DIFFERENTIAL EQUATIONS 3 HRS.
(Prerequisite, MA 262.) Differential equations are essential in modeling various phenomena in the world since the rates at which quantities change are of great interest when trying to understand or forecast future results. The course involves the basic qualitative and quantitative analysis of the solutions of ordinary differential equations. Topics covered include: direction fields, first order differential equations, higher order linear differential equations, basic numerical approximation techniques, and series solutions. Several applications are demonstrated throughout the course.

**MA 341. INTRODUCTION TO PROBABILITY
AND STATISTICS 3 HRS.**
(Prerequisites, MA 110 or equivalent.) An introductory study of probability and statistics for students who wish to apply statistics to their field of study. The course includes methods of presenting and interpreting data. Topics include frequency distributions, measures of central tendency, measures of dispersion, probability, probability distributions, normal distributions, sampling distributions, confidence intervals for large and small samples, and hypothesis testing of means for large and small samples.

MA 352. INTRODUCTION TO BIostatISTICS 3 HRS.
(Prerequisite, MA 110.) This course is designed to provide the background in statistics for various fields in Biology. This course focuses on the use of statistics to help answer biological questions. Students will learn how to use relevant statistical software. Topics include statistics and samples, displaying data, describing data, estimations with uncertainty, probability, hypothesis testing, analyzing proportions, fitting probability models to frequency data, categorical variables, the normal distribution, t-tests and confidence intervals, paired t-test, two-sample t-test, and correlation and regression.

MA 363. CALCULUS III 3 HRS.
(Prerequisite, MA 262 or equivalent.) Multivariable calculus, double integral, triple integral and partial derivatives. Vectors, polar coordinates, parametric equations, and vector valued functions.

MA 380. PROBABILITY AND STATISTICS 3 HRS.
(Prerequisite, MA 262 or consent of instructor.) The study of probability and statistics provides methods to analyze data. This course is an introduction to basic probability and counting techniques as well as statistical methods using distribution theory, confidence intervals, significance tests, and sampling.

MA 386. INTERNSHIP: MATHEMATICS 1-3 HRS.
(Prerequisite, 20 hours in mathematics courses.) An academic course to provide students with an opportunity to gain field experience in mathematics through professional experience. The academic experience is developed jointly by the student and the faculty advisor. No more than 3 hours in MA 386 may be counted toward the mathematics major.

MA 391. TOPICS IN MATHEMATICS 1-6 HRS.
An in-depth study of selected topics in mathematics not currently found in other mathematics courses. See schedule of classes for specific topic and prerequisites when offered.

MA 410. SEMINAR IN MATHEMATICS 0-4 HRS.
(Prerequisite, permission of mathematics department.) A seminar involving various topics in mathematics.

MA 421. COLLEGE GEOMETRY 5 HRS.
(Prerequisites, MA 240.) This course is designed to help students learn the axiomatic development of Euclidean Geometry using conjectures, models, constructions and proofs. Transformations, coordinate geometry, and technology (dynamic geometric systems) are explored. Included is an introduction to Non-Euclidean geometries such as: Finite, Hyperbolic, Elliptical and Projective.

MA 425. ABSTRACT ALGEBRA 3 HRS.
(Prerequisite, MA 322 or permission of instructor.) Foundations of deductive mathematical reasoning and proof. Basic concepts of abstract algebra including symbolic logic, proof strategies, sets, relations mapping and binary operations. A study of some algebraic structures including groups, rings, integral domains and fields.

MA 450. INTERDISCIPLINARY SCIENCES: MATHEMATICS 3 HRS.
(Prerequisite, permission of instructor.) In this interdisciplinary course students and faculty will collaborate to conduct quantitative research on biological systems. Weekly meetings will entail group discussions in which we will identify potential questions, design experiments to investigate those questions, and interpret the results of the experiments. With the use of sophisticated computer technologies we will analyze phenomena that were previously too fast, slow, small or large to be investigated with quantitative precision. Digital video and image processing techniques will be used to measure properties of biological systems. A variety of mathematical and statistical software will be used to analyze and model the observation. Students will develop written reports of their investigations; students will make public presentations of their findings at university seminars and possibly at professional meetings.

MA 460. HISTORY OF MATHEMATICS 1 HR.
(Prerequisites, MA 161 or MA 165 or permission of instructor.) This course explores the historical development of mathematics from Ancient times through Calculus. Contributions of different cultures and individuals as well as problems of historical significance are investigated.

MA 470. TEACHING MATHEMATICS IN THE MIDDLE/HIGH SCHOOL 2-3 HRS.
(Prerequisite, at least junior standing or permission of instructor.) Students enrolled in this course examine multiple approaches to helping middle and high school students learn mathematics. Attention is given to current research, state and national standards, ELL and IEP'd students, assessment, and technology. Experiences are provided in a mathematics classroom.

MA 480. INDEPENDENT STUDY (MATHEMATICS) 1-4 HRS.
(Open only to qualified juniors and seniors.) Topics of special interest in some area of mathematical study not included in regularly listed courses.

MA 510. TECHNOLOGY IN MATHEMATICS 3 HRS.
(Prerequisite MA 262 or graduate standing.) Provides an introduction to the latest technologies that are used for the teaching, learning, and presenting of mathematics.

MA 532. MATHEMATICAL STATISTICS I 3 HRS.
(Prerequisite, MA 262 and MA 380.) Fundamental principles of a random variable and its distribution; the binomial, normal, the F, the Student-t, and Chi-Square; testing hypotheses, estimation, and applications.

MA 542. DISCRETE STRUCTURES 3 HRS.
(Prerequisites: MA240 Discrete Mathematics.) Computer oriented course. Theory and applications with regard to trees, graphs, partial orders, lattices, Boolean algebra, finite groups, and combinatorics.

MA 570. TEACHING COLLEGE MATHEMATICS 1 HR.
(Prerequisite, graduate standing.) This course provides an introduction to the current techniques, methods and technologies that are used in the teaching of undergraduate college mathematics through both classroom observation and supervised teaching. This course is intended for graduate students only.

MA 581. MATHEMATICAL MODELING 3 HRS.
(Prerequisite, MA262.) Mathematical modeling is the study of the use of mathematics to describe and forecast real-world phenomena. A variety of modeling techniques are introduced. The course includes a review of relevant topics from algebra, trigonometry, calculus, statistics, and differential equations. The prerequisite can be overridden by the consent of the department.

MA 591. TOPICS IN MATHEMATICS 1-3 HRS.
(Prerequisites will vary with topic) An in-depth study of selected topics in mathematics not currently found in other mathematics courses. May be repeated with different topics. See schedule of classes for specific topic and prerequisites when offered.

MA 592. TOPICS IN ELEMENTARY/MIDDLE SCHOOL MATHEMATICS 1-3 HRS.
(Prerequisites will vary with topic, possibly including but not limited to MA 312 or MA 313.) A course designed to enrich and supplement the teaching of elementary/middle school mathematics. May be repeated with different topics for credit. See Schedule of Classes for specific topic (and prerequisites) when offered.

MA 701. MATHEMATICAL PROOFS 3 HRS.
(Prerequisite, MA322) This course focuses on a review of methods of mathematical proof and proof writing techniques. Students' proof skills are exercised through a review of set theory and logic and their applications to other areas of mathematics. The prerequisite can be overridden by the consent of the department.

MA 707. NUMBER, ALGEBRA AND FUNCTIONS FOR ELEMENTARY MATHEMATICS SPECIALIST 3 HRS.
This course is designed to help students learn and explore the concepts of number, algebra and functions as it relates to the content in the elementary classroom. Special emphasis will be placed on fractions and the multiple models of fractions.

MA 708. GEOMETRY/MEASUREMENT AND DATA ANALYSIS/PROBABILITY FOR ELEMENTARY MATHEMATICS SPECIALIST**3 HRS.**

The purpose of this course is to develop in-depth knowledge that elementary mathematics specialist need when working with teachers of students in grades K-6 in the areas of geometry/measurement and data analysis/probability. More specifically, the content of this course will address content recommended by the Association of Teachers of Mathematics Education in the Standards for Elementary Mathematics Specialist: A reference for Teacher Credentialing and Degree Programs.

MA 714. KNOT THEORY**3 HRS.**

A course on the basic concepts of knot theory, including definitions, know equivalence, numerical invariants, polynomial invariants, and braids.

MA 715. TOPOLOGY**3 HRS.**

(Prerequisite, consent of mathematics department.) Theory of point sets with applications to analysis. Topological, metric, and function spaces, sequences, continuity, connectedness, compactness, separation, completions.

MA 721. PROJECTIVE GEOMETRY**3 HRS.**

(Prerequisite, MA 421 or consent of department.) Projective geometry of one and two dimensions, its axiomatic foundation, and the fundamental ideas of the projective plane. Duality, harmonic forms, coordinates, conics, polarities, and a brief introduction to geometry of higher dimensions.

MA 722. NON-EUCLIDEAN GEOMETRY**3 HRS.**

(Prerequisite, MA 421 or consent of department.) A comparison of non-Euclidean geometries with Euclidean geometry. Hilbert's axioms, history of the parallel postulate, elementary theorems of hyperbolic plane geometry and a brief introduction to elliptic geometry.

MA 727. GROUPS, RINGS, AND FIELDS**3 HRS.**

(Prerequisites, MA 322 and MA 425 or consent of the mathematics department.) The properties of groups, rings and fields with emphasis on the algebraic structure and morphisms. Algebraic and transcendental field extensions.

MA 728. VECTOR SPACES**3 HRS.**

(Prerequisite, MA 322 and MA 425 or consent of department.) The structure of vector spaces, algebras and fields. Transformations, linear independence, bases and other topics are studied.

MA 731. STATISTICS USING SAS**3 HRS.**

This course provides an overview of a wide array of concepts and methods of statistical analysis, and how these methods can be implemented using SAS to perform data analysis. Concepts typically covered are graphical summaries of data, populations and samples, measures of central tendency, measures of dispersion and variability, probability, the normal distribution, an introduction to hypothesis testing, assessing normality, simple t-tests, two-sample hypotheses, analysis of variance and multiple comparisons, and modern regression analysis. Programming assignments in SAS are an important component of the course. The course should be of interest to mathematics majors and to graduate students in other disciplines with an interest in statistical analysis of data. It is recommended that students who enroll in this course have already taken at least one course in statistics.

MA 732. CATEGORICAL DATA ANALYSIS**3 HRS.**

(Prerequisite: MA 262) This course covers the most important methods for analyzing categorical data. Topics include Wald, score, and likelihood-ratio inference for binomial parameters, tests of association in two-way contingency tables; measures of association; Cochran-Mantel-Haenzel tests for 3-way tables; generalized linear models; logistic regression; loglinear models.

MA 733. MATHEMATICAL STATISTICS II**3 HRS.**

(Prerequisite, MA 532.) Probability, distributions, expected values, moments, sampling distribution and point estimation. Multivariate normal distribution, maximum likelihood estimation, interval estimation, test of hypotheses, linear regression, experimental design and analysis of variance.

MA 734. COMPLEX VARIABLES**3 HRS.**

(Prerequisite, MA 363.) A study of the complex plane, holomorphic functions, the elementary functions, complex integration. Taylor's series and the Laurent expansion, the calculus of residues and conformal mapping.

MA 735. ADVANCED CALCULUS I**3 HRS.**

(Prerequisite, MA 262 and MA 425 or permission of instructor.) This course rigorously proves the results of Calculus I and II. Topics include an axiomatic characterization of the real numbers, sequences, functions, limits, continuity, differentiation, Riemann integration, and infinite series.

MA 736. ADVANCED CALCULUS II**3 HRS.**

(Prerequisite, MA 735.) As a continuation of Advanced Calculus I, this course provides a rigorous treatment of multi-variable calculus. Topics include topology, convergence, differentiability, and integration on \mathbb{R}^n .

MA 737. FUNCTIONS OF A REAL VARIABLE**3 HRS.**

(Prerequisite: MA 736.) The study of linear sets of points, sequences of functions, upper and lower semi-continuity, equi-continuity, Lebesgue measure, Lebesgue integration, Borel sets, Baire functions and measurable functions.

MA 738. APPLIED DIFFERENTIAL EQUATIONS**3 HRS.**

Prerequisite: MA 335.) Extension of MA 335 and an introduction to systems of differential equations and partial differential equations applications.

MA 739. APPLIED ANALYSIS**3 HRS.**

This course examines applications of analysis through the use of partial differential equations and Fourier series. The heat and wave equations are analyzed under various conditions and coordinate systems. Other topics include the Fourier Transform and its applications.

MA 740. NUMBER THEORY**3 HRS.**

(Prerequisite, MA 425 or consent of department.) Properties of numbers, prime and composite, Euclid's algorithm, indeterminate problems. Diophantine problems, congruences and residues, Euler's Theorem, Fermat's Theorem, classical problems.

MA 741. GROUP THEORY**3 HRS.**

(Prerequisite, MA 425 or MA 701.) An introduction to the theory of groups. Topics include are properties of groups, cyclic and abelian groups, homomorphisms and isomorphisms, types of subgroups and factor groups.

MA 742. RING THEORY**3 HRS.**

(Prerequisite: MA 425 or MA 701) This course is designed to serve as an introduction to the basic ideas and techniques of ring theory. The course will include such topics as ideals, isomorphism theorems, types of domains, types of ideals, and polynomial rings.

MA 743. FIELD THEORY**3 HRS.**

(Prerequisite: MA 425 or MA 701) This course is designed to serve as an introduction to the basic ideas and techniques of Field Theory. The course will include such topics as finite and infinite field extensions, algebraic numbers, and solvability by radicals.

MA 745. VECTOR ANALYSIS **3 HRS.**
(Prerequisite, MA 363.) Fundamental principles of vector analysis, algebra and calculus of vectors, applications of vectors to geometry and physics.

MA 746. COMPUTATIONAL ALGEBRAIC GEOMETRY **3 HRS.**
This course is an introduction to algebraic geometry with an emphasis on computational aspects of the subject. Concepts studied include varieties, polynomial ideals, Grobner bases, the Hilbert basis theorem, elimination theory, and the Hilbert Nullstellensatz.

MA 750. DIFFERENTIAL GEOMETRY **3 HRS.**
(Prerequisite: MA 363 Calculus III) A study of curves and surfaces in Euclidean space. Frenet formulas, curvature, geodesics, and fundamental forms.

MA 757. GRAPH THEORY **3 HRS.**
The study of graphs, which are comprised of a set of vertices and a set of edges joining pairs of vertices. Topics include subgraphs, trees, cycles, digraphs, independent sets, matchings, bipartite graphs, connectivity, vertex coloring, planarity, and Hamiltonian graphs. Heavy focus on proof writing and problem solving.

MA 758. WAVELETS **3 HRS.**
(Prerequisites: MA 262 Calculus II and MA 322 Linear Algebra, or consent of instructor.) This course will examine discrete wavelets and how they are applied to some practical problems of image processing. Some of the underlying ideas go back to Joseph Fourier (1768-1830) and Alfred Haar (1885-1933). During this course students will begin to develop an understanding of the wavelet transformations and their modern applications.

MA 760. NUMERICAL ANALYSIS **3 HRS.**
(Prerequisite, MA 262) Most real world applications of mathematics involve the implementation of numerical algorithms to approximate the solutions to well-known types of mathematical problems. Therefore this course includes the study of types of numerical errors, precision versus efficiency considerations, and methods of detecting when a numerical solution is unacceptably inaccurate. Mathematical areas for numerical algorithms include solving nonlinear equations, interpolation, polynomial approximation and differentiation and integration.

MA 762. OPTIMIZATION TECHNIQUES **3 HRS.**
(Prerequisites: MA 322, MA 262, and CS 260) Computer oriented course. Mathematical development of optimization techniques, linear programming, transportation problems, game theory.

MA 763. SIMULATION TECHNIQUES **3 HRS.**
(Prerequisites: MA 262 and MA 332, and CS 260) Computer oriented course, simulation of complex problems, queing, models, Monte-Carlo techniques.

MA 764. REGRESSION ANALYSIS **3 HRS.**
(Prerequisite, MA 380 or equivalent.) Computer oriented statistics methods course. Topics include estimating parameters, testing hypotheses, analysis of variance, and multiple linear and nonlinear regression methods.

MA 765. NUMERICAL LINEAR ALGEBRA **3 HRS.**
(Prerequisite or taken concurrently, MA322) The solution of systems of linear equations is an important component of solving many applications in a wide variety of fields. A central part of the course features how this is done efficiently and accurately when using a calculator or computer to solve the system. Topics include LU factorization and iterative methods, along with modern techniques for approximating eigenvalues and eigenvectors.

MA 791. TOPICS IN MATHEMATICS **1-3 HRS.**
(Prerequisites will vary with topic.) An in-depth study of selected topics in mathematics not currently found in other mathematics courses. May be repeated with different topics. See Schedule of Classes for specific topic and prerequisites when offered.

MA 792. TOPICS IN ELEMENTARY/MIDDLE SCHOOL MATHEMATICS **1-3 HRS.**
(Prerequisite, in-service teacher or consent of department.) A course designed to enrich and supplement the teaching of elementary/middle school mathematics. May be repeated with different topics for credit. See Schedule of Classes for specific topic (and prerequisites) when offered.

MA 793. TOPICS IN SECONDARY SCHOOL MATHEMATICS **1-3 HRS.**
(Prerequisite, in-service teacher or consent of department.) A course designed to enrich and supplement the teaching of secondary school mathematics. May be repeated with different topics for credit. See Schedule of Classes for specific topic (and prerequisites) when offered.

MA 810. SEMINAR IN MATHEMATICS **0-4 HRS.**
Directed reading and research in a selected field.

MA 847. RESEARCH PROJECTS IN MATHEMATICS **1-5 HRS.**
Independent study and research in mathematics. Allowed on master's degree program with consent of mathematics department.

MA 850. THESIS, MA, or MS **1-6 HRS.**
Required for the Master of Arts degree with a major in Mathematics. Independent study and research in an approved field. Frequent conferences with the instructor.

MICROBIAL AND CELLULAR BIOLOGY

MC 159. SPECIAL TOPICS IN MICROBIAL AND CELLULAR BIOLOGY **1-3 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in various areas of microbial or cellular biology.

MC 259. SPECIAL TOPICS IN MICROBIAL AND CELLULAR BIOLOGY **1-3 HRS.**
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in various areas of microbial or cellular biology.

MC 316. MICROBIOLOGY **3 HRS.**
(Prerequisites, GB 100 and Chemistry I or equivalent. MC 317 must be taken concurrently.) Lectures and demonstrations concerning the cell structure, genetics and physiology of microorganisms and the role microorganisms play in the world around man. The course is intended for students not intending to major in microbiology.

MC 317. MICROBIOLOGY LAB **1 HR.**
(Prerequisites, GB 100 and Chemistry I or equivalent. MC 316 must be taken concurrently.) Laboratory experiences in the techniques common to microbiological procedures and exercises intended to illustrate phenomena peculiar to microorganisms. Exercises intended to illustrate fundamental principles of immunology and virology are also performed. Representative fungi, bacteria, protozoa and viruses are observed by the students.

MC 350. MOLECULAR AND CELLULAR BIOLOGY 3 HRS.
(Prerequisite, Chemistry I or equivalent and GB 140 or equivalent. MC 351 must be taken concurrently.) Lectures and discussions concerning introductory cellular chemistry, structure, physiology, and genetics. Basic concepts in recombinant DNA techniques also presented.

MC 351. MOLECULAR AND CELLULAR BIOLOGY LABORATORY 1 HR.
(Co-requisite MC 350 must be taken concurrently.) Laboratory exercises designed to complement topics covered in MC 350.

MC 409. MOLECULAR AND CELLULAR BIOLOGY PROJECTS 1-3 HRS.
(Prerequisite, consent of instructor.) The student works independently, with the aid and advice of one or more members of the staff, on a project in an area of molecular or cellular biology in which they have some interest and competence.

MC 459. SPECIAL TOPICS IN MICROBIAL AND CELLULAR BIOLOGY 1-3 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of microbial or cellular biology.

MC 520. MOLECULAR GENETICS 3 HRS.
(Prerequisites, MC 316 or GB 425, and General Organic Chemistry, or equivalent.) Basic concepts of the structure, replication, and function of the DNA and RNA. Includes fundamental principles of the genetic code, gene transfer and recombination, mechanisms causing infidelity in the transfer of genetic information and regulatory mechanisms. Basic concepts frequently illustrated by evidence from studies in microbial genetics.

MC 540. CELL BIOLOGY 3 HRS.
(Prerequisites, MC 350 or consent of instructor.) Lectures and discussions regarding functions of cellular components. Topics to be considered include protein structure and function, control of gene expression, membrane transport, protein transport, cell signaling and cell division.

MC 541. CELL BIOLOGY LAB 2 HRS.
(Prerequisite, concurrent or prior enrollment in MC 540 or CH 561.) Laboratory work designed to develop laboratory, research and communication skills. The lab will involve extensive training and practical experience using techniques for studies in the area of cell biology. These may include cell culture, cell viability assays, protein purification and analysis and gene expression analysis.

MC 549. IMMUNOLOGY 3 HRS.
(Prerequisites, MC 350, GB 425 strongly recommended.) Lectures and discussions regarding physiological, genetic and molecular aspects of immunity.

MC 550. IMMUNOLOGY LAB 2 HRS.
(Prerequisite; concurrent or prior enrollment in MC 549.) Laboratory work designed to develop laboratory, research and communication skills. Procedures include work with laboratory mice and cell culture experimental models.

MC 560. HEMATOLOGY 2 HRS.
(Prerequisite, ZO 362. Must take MC 561 concurrently. MC 549 is highly recommended.) A course, including lecture and laboratory, designed to introduce students to the basic facts and concepts concerning human blood with emphasis on the maturation and function of blood cells and the related disorders. Also included will be the consideration of blood typing and hemostasis.

MC 561. HEMATOLOGY LAB 1 HR.
(Prerequisite, must take concurrently with MC 560.) An introduction to the basic laboratory methods used to examine the blood and the blood forming tissues.

MC 562. PATHOGENIC MICROBIOLOGY 3 HRS.
(Prerequisites, CH 370.) This course will explore the various mechanisms operating to result in a microbial disease. Also covered will be the major aspects of the biology, isolation and identification of pathogenic bacteria, viruses, protozoa and fungi. Topics such as epidemiology, and public health will be interspersed throughout the course.

MC 563. PATHOGENIC MICROBIOLOGY LABORATORY 2 HRS.
(Prerequisite, must be taken concurrently with MC 562.) Laboratory techniques are dealt with for isolating and identifying major pathogenic microorganisms of humans.

MC 701. VIROLOGY 3 HRS.
(Prerequisites, MC 549, and MC 540 is strongly recommended.) Lecture dealing with the basic concepts of virology with emphasis on viral structure, viral replication, and viral diseases.

MC 702. VIROLOGY LAB 1 HR.
(Prerequisite, MC 701.) Techniques useful in study of viral replication, isolation, and identification.

MC 703. MYCOLOGY 3 HRS.
(Prerequisite, BO 212 or equivalent, MC 704 must be taken concurrently.) Lectures and demonstrations concerning the taxonomy, morphology and ecology of fungi and a consideration of medical and industrial mycology.

MC 704. MYCOLOGY LAB 1 HR.
(Prerequisite, BO 212 or equivalent, MC 703 must be taken concurrently.) Laboratory exercises concerning the taxonomy, morphology and ecology of fungi. Students perform projects that provide experiences in the isolation and identification of single species and their potential application to industrial utilization.

MC 760. CANCER BIOLOGY 3 HRS.
(Prerequisite; MC540 Cell Biology or CH562 Fundamentals of Biochemistry or CH 660Biochemistry I or CH 662 Biochemistry II.) A lecture/discussion course applying molecular, cellular and genetic principles to understand the basic underlying principles of cancer pathogenesis. Extensive readings and discussions on topics related to Growth/Anti-growth signaling, Apoptosis, Immortalization, Angiogenesis and Metastasis.

MC 765. ADVANCED CELLULAR/MOLECULAR BIOLOGY LABORATORY 2 HRS.
(Prerequisites, consent of instructor.) A project-based course designed to allow students to learn and practice the major laboratory methods of inquiry used in biochemistry- and molecular biology-related areas of research. Techniques covered may include library screening, gene cloning, PCR, protein expression and purification, bioinformatics, microarray analysis, and protein characterization. An emphasis is placed on using these techniques and skills in an integrated way to address a semester-long project.

MC 809. GRADUATE PROJECT IN MICROBIAL AND CELLULAR BIOLOGY 1-3 HRS.
(Prerequisite, consent of instructor.) The student works independently, with the aid and advice of one or more members of the staff, on a project in which they have some interest or competence.

MC 859. SPECIAL TOPICS IN MICROBIAL AND CELLULAR BIOLOGY 1-4 HRS.
(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of microbial or cellular biology.

MC 885. GRADUATE RESEARCH IN MOLECULAR AND CELLULAR BIOLOGY 2-3 HRS.
(Prerequisite, graduate standing and at least three hours credit in graduate-level independent study.) Investigation of problems in molecular and cellular biology by students who have demonstrated research ability at the graduate level.

MANAGEMENT

MG 301. PRINCIPLES OF MANAGEMENT 3 HRS.
(Prerequisite: Junior standing.) This course introduces the functions of management in business organizations as well as the behavior of individuals and groups in organizational settings. Concepts such as authority, decision-making, diversity, power, ethics, responsibility, and accountability are included. Students must earn a minimum of a "C" grade in MG 301 to fulfill BSB degree and major/minor requirements.

MG 305. SPECIAL TOPICS IN MANAGEMENT 3 HRS.
(Prerequisites, MG 301 and junior standing.) This course is designed for undergraduate management majors who have an interest in learning about emerging management concepts and issues. Students must earn a minimum of a "C" grade in MG 305 to fulfill major/minor requirements.

MG 343. SUPERVISORY MANAGEMENT 3 HRS.
(Prerequisites, MG 301 and junior standing.) This course introduces and describes the concept of supervision in today's workplace. It emphasizes the changing role of first-line management in an increasingly complex business environment. Content of the course includes coverage of fundamentals of supervision, continuous quality improvement, teamwork, and interpersonal communication skills. Students must earn a minimum of a "C" grade in MG 343 to fulfill major/minor requirements.

MG 370. SMALL BUSINESS MANAGEMENT 3 HRS.
(Prerequisites, junior standing.) A direct practical study of the activities and skills needed to successfully manage a small independent business. Emphasis is on decision making in the areas of: expenses, price determination, sales promotion, purchasing, essential records, financial management, inventory control, accounts receivable, investment, and considerations in starting or buying a business. Students must earn a minimum of a "C" grade in MG 370 to fulfill major/minor requirements.

MG 410. INTERNSHIP IN MANAGEMENT 1-6 HRS.
(Prerequisites, MG 301 and junior standing.) An academic offering that provides special employment for students who wish to gain career-related experience before graduation. Students are placed in supervised positions and assigned faculty advisors who design job-related academic projects. Students must earn a minimum of a "C" grade in MG 410 to fulfill major/minor requirements.

MG 411. COMPARATIVE MANAGEMENT STUDIES THROUGH INTERNSHIPS 1-3 HRS.
(Prerequisite, MG 301 and junior standing.) An academic offering that provides special employment opportunities for students from foreign universities. Students are placed in supervised positions and assigned faculty advisors who design job-related academic projects. Students must earn a minimum of a "C" grade in MG 411 to fulfill major/minor requirements.

MG 423. OPERATIONS MANAGEMENT 3 HRS.
(Prerequisites, BU 255, MG 301 and junior standing) This course follows a service and/or product from its design to where and how it will be produced using concepts of concurrent engineering, total quality management, and statistical process control ending with an evaluation of the different inventory control systems available. Students must earn a minimum of a "C" grade in MG 423 to fulfill BSB degree and major/minor program requirements.

MG 433. INTERNATIONAL MANAGEMENT 3 HRS.
(Prerequisites, MG 301 and junior standing.) This course is designed as a study of the generating, maintaining, and controlling of international flows of people, information, funds, and goods and services for a commercial purpose. The content takes into account international differences in economics, culture, and value systems. Students must earn a minimum of a "C" grade in MG 433 to fulfill major/minor requirements.

MG 443. ORGANIZATIONAL BEHAVIOR 3 HRS.
(Prerequisites, MG 301 and junior standing.) This course follows the behavior of individuals in an organization, develops the behavior changes found in work groups, the behavior of groups in intergroup conflict and goal setting, and finally how behavior is a consideration of organizational design and organizational change. Students must earn a minimum of a "C" grade in MG 443 to fulfill major/minor requirements.

MG 444. HUMAN RESOURCE MANAGEMENT 3 HRS.
(Prerequisites, MG 301 and junior standing.) A review of human resource management in the organization. Topics include: legal aspects of employment practices, recruitment, training, performance appraisal, compensation and benefits, and collective bargaining. Comparisons include human resource management in small, large, and international firms. Students must earn a minimum of a "C" grade in MG 444 to fulfill major/minor requirements.

MG 459. COMPENSATION AND BENEFITS 3 HRS.
(Prerequisites, MG 301 and junior standing.) This course will examine compensation and benefits programs and how they inter-relate with other strategic programs of the organization. Students will view these programs from both the management and the employee perspective, using both theory and practice to grow in their understanding. Students must earn a minimum of a "C" grade in MG 459 to fulfill major/minor requirements.

MG 473. STRATEGIC MANAGEMENT 3 HRS.
(Prerequisites, completion of all upper-division business and core courses (except MG423) with a minimum of a "C" grade in each course and senior standing. BU 099 is a corequisite. MG 423 is a prerequisite, but can be taken concurrently.) The primary goal of this course is to give students the opportunity to integrate the functions of business by focusing on case problems with particular emphasis on long-range planning. The course is designed to develop conceptual skills through written and oral presentations, and the bridge the gap between theory and practice.

MG 505. SPECIAL TOPICS IN MANAGEMENT 1-5 HRS.
(Prerequisites, MG 301 and senior or graduate standing.) A course for the student of special topics and experimental course offerings in the management area. Students must earn a minimum of a "C" grade in MG 505 to fulfill major/minor requirements.

MG 520. BUSINESS SIMULATION 3 HRS.
(Prerequisites, Must have completed MG301 and one course in at least two of the following areas: marketing, accounting and finance.) This course simulates the experience of managing a manufacturing organization over a period of several years. Working in teams and individually, students consider information about their company and competing firms and make decisions regarding marketing, finance, research and development, productions, etc. Their decisions are evaluated in simulated competition with other firms.

MG 530. SUPPLY CHAIN MANAGEMENT 3 HRS.
(Prerequisites, MK 301 and MG 301, or equivalent.) This course focuses on facility location, inventory management, warehousing and transportation as the basic components of a supply chain system. Supply Chain Management is vital in maintaining and enhancing a firm's competitive advantage.

MG 553. ENTREPRENEURIAL MANAGEMENT 3 HRS.
(Prerequisites, senior or graduate standing.) Analysis of management in the entrepreneurial venture during the start-up phase. Topics include characteristics of entrepreneurs, organization life cycle, the business plan, financial projections, product/service research, and the professional manager in the transition from start-up to growth stage. Students must earn a minimum of a "C" grade in MG 553 to fulfill major/minor requirements.

MG 805. SPECIAL TOPICS IN MANAGEMENT 1-3 HRS.
This course is designed to provide special advanced study in appropriate topics in management theory and/or applications for graduate students.

MG 833. INTERNATIONAL STRATEGIC MANAGEMENT 3 HRS.
This course is designed to provide graduate students with an understanding and experience (simulation) in strategic thinking in the international arena. International business has to do with generating, maintaining, and controlling international flows of people, information, funds, goods, and services for a commercial purpose. Special emphasis will be given to identifying information sources, collecting and analyzing data, strategic planning, implementation and evaluation in the international environment.

MG 841. PLANNING FOR NEW PRODUCT/ SERVICE FACILITIES 3 HRS.
This course is designed to follow a product and/or service from the discovery of a need through its design process. It reconciles the target market, forecasts product volume, and examines requirements for the production processes. This course is designed to provide a cross-functional, concurrent approach to operations management.

MG 845. MANAGEMENT AND ORGANIZATIONAL THEORY 3 HRS.
A graduate course in the theory supporting organization design and structure. Topics include: organization purpose, dimensions, alternative methods and designs, systems theory, the effects of cycle, size, scope, and transition from a domestic to a global organization.

MG 853. BEHAVIORAL ASPECT OF MANAGEMENT 3 HRS.
Behavior of humans--individually, in groups, and in organizations--is examined for managerial aspects. Particular attention is paid to the effects caused by diversity, reorganization, and current environmental conditions.

MG 863. SEMINAR IN HUMAN RESOURCE MANAGEMENT 3 HRS.
An in-depth study of contemporary issues and trends impacting and affecting human resource management in organizations today. An emphasis will be placed on field-based research and professional periodical publications to address the current needs and problems in staffing organizations.

MG 899. STRATEGIC MANAGEMENT 3 HRS.
(Prerequisite, student must be enrolled in the final semester of study for the MBA.) This course provides the graduate student with an understanding of the managerial role in formulating, developing, implementing and evaluating strategies to attain business objectives.

CLINICAL COUNSELING (MENTAL HEALTH)

MH 703. SPECIAL TOPICS IN MENTAL HEALTH COUNSELING 1-3 HRS.
MH703 enables the Mental Health Counseling program to teach on demand a course to provide in-depth consideration of specialized topics and current issues in Mental Health Counseling.

MH 740. COUNSELING THE ADULT AND AGED 2 HRS.
Counseling the Adult and Aged focuses on the issues involved in providing effective counseling for the elderly; the skills needed for counseling the elderly; and knowledge and information related to understanding elderly in our society, their needs, characteristics and special physiological, psychological, and social conditions that affect them. The course is appropriate for persons working with, or planning to work with, the elderly segment of the population.

MARKETING

MK 301. PRINCIPLES OF MARKETING 3 HRS.
(Prerequisites, junior standing.) Introductory course designed to acquaint students with general marketing principles and practices. Emphasis is placed on developing marketing skills and understanding marketing's role in the strategic of the organization. Students must earn a minimum of a "C" grade in MK 301 to fulfill BSB degree and major/minor requirements.

MK 305. SPECIAL TOPICS IN MARKETING 3 HRS.
(Prerequisites, MK 301 and junior standing.) This course focuses on the critical issues and challenges encouraged at different states in the processes of marketing planning and management. Students must earn a minimum of a "C" grade in this course to fulfill major/minor requirements.

MK 410. INTERNSHIP IN MARKETING 1-6 HRS.
(Prerequisite, MK 301 and junior standing.) An academic offering that provides special employment for students who wish to gain career-related experience before graduation. Students are placed in supervised positions and assigned faculty advisors who design job-related academic projects. Students must earn a minimum of a "C" grade in MK 410 to fulfill major/minor requirement.

MK 420. DISTRIBUTION MANAGEMENT 3 HRS.
(Prerequisites, MK 301 and junior standing.) The course is designed to provide an overview of the elements of logistical support necessary for successful marketing. Topics covered in the class will include: customer service, logistics functional areas, logistics information systems, international logistics, and supply chain management. Students must earn a minimum of a "C" grade in MK 420 to fulfill major/minor requirements.

MK 430. RETAIL MANAGEMENT 3 HRS.
(Prerequisite, MK 301 and junior standing.) Provides the student an opportunity to develop knowledge and skills related to the selection, buying, and management of merchandise. Emphasis in retail accounting includes: stock turnover, inventory control, and pricing strategies. Methods of forecasting customer demand, accessing the trade area, retail site analysis, and vendor evaluation. Students must earn a minimum of a "C" grade in MK 430 to fulfill major/minor requirements.

MK 433. INTERNATIONAL MARKETING 3 HRS.
(Prerequisites, MK 301 and junior standing.) A study of marketing products or services beyond the domestic environment into international and global markets. Emphasis will be put on the changing marketing environmental issues such as history, culture, politics, laws, and economic development. Market analysis and marketing strategy development are analyzed in the international context. Students must earn a minimum of a "C" grade in MK 433 to fulfill major/minor requirements.

MK 451. CONSUMER BEHAVIOR 3 HRS.
(Prerequisites, MK 301 and junior standing.) A course designed to study how consumers purchase and use products or services and the influencing factors with emphasis on the components of attitudes, beliefs, information processing, and the decision process. The strategies organizations employ to affect and respond to consumers' decisions are also studied. Students must earn a minimum of a "C" grade in MK 451 to fulfill major/minor requirements.

MK 453. MARKETING RESEARCH 3 HRS.
(Prerequisites, MK 301, BU 255 and junior standing.) A study of the systematic collection, tabulation, analysis, and presentation of marketing information to support decision making in marketing activities. Emphasis will be put on the marketing research environments, the acquisition of data, measurement, and the analysis of data. Students must earn a minimum of a "C" grade in MK 453 to fulfill major/minor requirements.

MK 455. PERSONAL SELLING 3 HRS.
(Prerequisites, MK 301 and junior standing.) A course directed toward the development of selling concepts, skills, knowledge, techniques, and attitudes. Practical sales materials, techniques, and philosophy are used to develop an understanding of sales relationship, the buyer, product knowledge, sales techniques, communications, and persuasion. Students must earn a minimum of a "C" grade in MK 455 to fulfill major/minor requirements.

MK 460. SALES MANAGEMENT 3 HRS.
(Prerequisites, MK 301 and junior standing.) This course is intended to give the student a broad perspective and penetrating understanding of wholesale and industrial selling-its social and economic functions, its role in purchasing and sales, and its relationship to the total business picture. Students must earn a minimum of a "C" grade in MK 460 to fulfill major/minor requirements.

MK 462. INTEGRATED MARKETING COMMUNICATION 3 HRS.
(Prerequisites, MK 301 and junior standing.) A basic course offering insights into the role of promotion and advertising within the context of integrated marketing communications. The course examines the history, social impact, objectives, strategies, and the evaluation of promotional effort. Budget methods, communication techniques, media analysis, and consumer response are developed for national and local campaigns. Students must earn a minimum of a "C" grade in MK 462 to fulfill major/minor requirements.

MK 464. MARKETING MANAGEMENT 3 HRS.
(Prerequisites, MK 301 and senior standing.) Decision-making activities of marketing executives in product planning, market analysis and consumer selection, promotion, sales force management, pricing, and distribution channels. Emphasis is placed on the growing fields of international marketing, new quantitative tools, and behavioral science contributions. Students must earn a minimum of a "C" grade in MK 464 to fulfill major/minor requirements. MK 464 is the marketing major capstone course and is recommended to be taken in the final semester.

MK 505. SPECIAL TOPICS IN MARKETING 1-3 HRS.
(Prerequisites, MK 301 and senior or graduate standing.) An experimental marketing course initiated by the marketing faculty or others with interest. The course will reflect new substantive trends that will enhance the students' skills and competitiveness. Students must earn a minimum of a "C" grade in MK 505 to fulfill major/minor requirement.

MK 510. MARKETING ANALYTICS 3 HRS.
(Prerequisites: BU 255 and MK 301) This course covers essential decision models and strategic metrics that form the cornerstone of marketing analytics. Using the insight gained in the course, students can predict the outcome of marketing plans to boost return on marketing investment (ROMI). The course emphasizes case studies and hands-on learning so students can immediately apply the tools and techniques in their organizations. A variety of relevant topics are discussed, such as market sizing, forecasting and positioning, promotion budget allocation, profit maximization, and communicating to senior executives through data-driven presentations.

MK 521. SERVICES MARKETING 3 HRS.
(Prerequisite, MK 301.) This course integrates the problems and concerns of a services marketing network and will be of interest to students of both product and services marketing. Most product offerings have services that add value and must be marketed and managed in a different way than products. The course content is applied to the service marketer's context, and each student has the opportunity to assist the service marketer and the service marketer helps the student understand the "real world" issue.

MK 530. ELECTRONIC MARKETING 3 HRS.
(Prerequisites, MK 301 and junior standing.) This course explores the emerging business models, rules, tactics, and strategies associated with the Internet medium, stressing integration with other channels and marketing operations in both the business-to-business and business-to-consumer markets.

MK 805. SPECIAL TOPICS IN MARKETING 3 HRS.
This course is an advanced study of key aspects of the marketing function within an organization.

MK 810. MARKETING ANALYTICS 3 HRS.
This course covers essential decision models and strategic metrics that form the cornerstone of marketing analytics. Using the insight gained in the course, student scan predict the outcome of marketing plans to boost return on marketing investment (ROMI).The course emphasizes case studies and hands-on learning so students can immediately apply the tools and techniques in their organizations. A variety of relevant topics are discussed, such as market sizing, forecasting and positioning, promotion budget allocation, profit maximization, and communicating to senior executives through data-driven presentations.

MK 820. MARKETING CHANNELS 3 HRS.
(Prerequisites, MK 301 and graduate standing.) This course will take a systems management approach to the design of logistics functions. Emphasis will be placed on the use of logistics as a means to create a sustainable competitive advantage. Students will be asked to analyze the development of micro and macro logistics systems using both qualitative and quantitative techniques.

MK 830. ELECTRONIC MARKETING 3 HRS.
This course explores the emerging business models, rules, tactics, and strategies associated with the Internet medium, stressing integration with other channels and marketing operations in both the business-to-business and business-to-consumer markets.

MK 833. GLOBAL MARKETING STRATEGIES 3 HRS.
(Prerequisites, MK 301 and graduate standing.) This course will examine the globalization of the marketing environment and the resultant changes in marketing activities. Emphasis will be placed on both a strong cultural understanding of global markets and strategic marketing planning.

MK 851. CONSUMER BEHAVIOR 3 HRS.
Consumer Behavior is designed to build (1) knowledge of different types of customers and their decision-making processes, and (2) skills using this knowledge in analyzing business and consumer markets. As business students, your primary objective for the course is in its marketing applications. You want to better understand customers in order to be able to make better marketing decisions. This course will provide you with a comprehensive understanding of the concepts and theories relating to consumer behavior, and how that understanding can be used in developing marketing strategy.

MK 864. MARKETING STRATEGY 3 HRS.
The tasks of marketing are reviewed and analyzed within the context of a cross-functional and a marketing-oriented organization. Emphasis is placed on the dynamic environment of the organization and marketing with the intent to recognize, understand and integrate changes into the marketing process. Students are required to engage in critical thinking and expository writing.

MUSIC

MU 050-068. APPLIED MUSIC 1-2 HRS.
Private lessons. Voice, piano, organ, fretted instruments (e.g., classical guitar), or orchestral instruments. No special fee for music students.

MU 099. MUSIC CONVOCATION 0 HRS.
Recitals, master classes, and open discussions in seminar format providing opportunities for students to listen to and perform compositions. Master class sessions afford the music student opportunities to perform for and study with a master performer-teacher. Topics relative to music study and performance are also presented in open discussion.

MU 100. INTRODUCTION TO MUSIC STUDIES 1 HR.
This course consists of a series of seminars designed to assist the student to make a successful transition to Emporia State's Department of Music. Topics include an introduction to the White Library and Music resources, setting goals for the practice and learning of music, performance expectations, essential writing skills for musicians and academic advising.

MU 101. MUSIC FUNDAMENTALS FOR MUSICIANS 2 HRS.
The development of basic skill in music theory, including the musical staff, treble, alto, tenor and bass clefs, intervals within the octave, major and minor scales, rhythm, triads and sight singing. The goal of the class will be to bring students to a basic college level understanding of music theory.

MU 108. EAR TRAINING/SIGHT SINGING 1 1 HR.
(Corequisite, Concurrent enrollment in MU 118.) A study of the aural elements of music and sight singing, including dictation of intervals and melodies, harmonic dictation using primary triads, triad and scale identification, and solfege. MIDI based drill software and sight singing software will be available.

MU 109. EAR TRAINING/SIGHT SINGING 2 1 HR.
(Prerequisites, Students must have a minimum grade of C in MU 108 AND EITHER concurrent enrollment in MU 119 or a C or better in MU 119.) A continuation of MU 108, this course has further studies in dictation and solfege based on materials presented in the Music Theory courses with MIDI based drill software and sight singing software available.

MU 118. MUSIC THEORY 1 3 HRS.
(Prerequisites, pass of 80% or higher of the Music Theory Entrance Examination. Students not meeting this requirement must enroll in MU 101. Concurrent enrollment in MU 108 and MU 131.) A study of the written elements of music, including clefs and basic pitch notation, major and minor scales, key signatures, scale degrees, intervals, triads, notation of rhythm, four-part vocal writing, primary triads in all inversions, and secondary triads. Some exercises will be completed using notation software.

MU 119. MUSIC THEORY 2 3 HRS.
(Prerequisites, students must have a minimum grade of C in MU 118.) A continuation of MU 118, further studies of harmony will include harmonization of melodies, diatonic seventh chords, non-harmonic tones, secondary dominant seventh and secondary diminished seventh chords, analysis, and composition exercises using notation software.

MU 121. VOICE CLASS 1 HR.
To introduce students to use of the functional as well as a professional manner; designed for the student who has had no previous training in singing. Emphasis is placed upon performance.

MU 122. COMPOSITION I 3 HRS.
Introduction to formal principles of composition, contemporary techniques, and the range and characteristics of instruments and voices.

MU 123. COMPOSITION I 3 HRS.
(Prerequisite, MU 122.) An extension of MU 122, this course continues to acquaint students with the formal principles of composition and the ranges and characteristics of instruments and voices. It attempts to develop the creative ability of the individual student and increases their facility in writing for various combinations of instruments or voices.

MU 124. BASIC MUSIC 2 HRS.
A beginning course designed for the preparation of the classroom teacher: music fundamentals and the development of eye and ear correlation through the study of vocal music reading on the elementary level, knowledge and use of the piano keyboard, playing of the autoharp, song flutes and resonator bells. Analysis, singing, and conducting of songs.

MU 125. CLASS MUSIC LESSONS 1 HR.
A beginning course for students interested in studying individual musical instruments. The course, taught in group setting, will introduce students to beginning techniques, fundamentals of tone production, intonation, and basic performance skills. Students will also learn about the maintenance appropriate to the selected instrument. This course is intended for the non-music major, or for a music major seeking training on a secondary instrument.

MU 126. PIANO FOR FUN--NEW BEGINNERS 1 HR.
A course for beginners in piano, expressly those non-music majors whose goal is to learn to read music and to apply that skill at the piano.

MU 127. PIANO FOR FUN--ADVANCED BEGINNERS 1 HR.
For non-music majors who wish to improve their skills in scale playing, harmonization of melodies, sight reading, and the preparation of piano literature.

- MU 131. GROUP PIANO 1 1 HR.**
(Prerequisite, concurrent enrollment in MU 118.) A course of study for those students who have had no previous training or study of piano. Students will learn to play major and minor scales, major and minor arpeggios with alternating hands, chord progression, playing of simple tunes by ear, and the transposition of simple melodies.
- MU 132. GROUP PIANO 2 1 HR.**
(Prerequisite, concurrent enrollment in MU 119.) A continuation of the skills learned during MU 131. Students who have had brief periods of study as children are advised to enroll in this course. Course includes scales played hands separately for more than one octave, chord progression I, IV, V, I in inversions, a continuation of transposition skills, and an introduction to accompaniment patterns. Advanced solo literature included.
- MU 133. GROUP PIANO 3 1 HR.**
(Prerequisite, concurrent enrollment in MU 218.) A continuation of skills learned during MU 132. Scales are played hands together, chord progression I, VI, IV, II, V, I with chord roots in the left hand. Beginning work on harmonization, arrangement, and transposition of melodies, continuation of sight reading techniques, and preparation of America in F and G. More advanced literature to include some work with four-part music.
- MU 134. GROUP PIANO 4 1 HR.**
(Prerequisite, concurrent enrollment in MU 219.) Piano Proficiency Requirement Sheets, provided by the Department of Music, outline the content of MU 134. These requirements are the culmination of four semesters of study for those who began their piano study with MU 131. Note: The requirements for vocalists include more areas than for instrumentalists. These adjustments are made during the course of study for the vocal and instrumental students.
- MU 135. GUITAR FOR FUN--NEW BEGINNERS 1 HR.**
A beginning course in guitar, of special interest and value to non-music majors and music specialists with no background in this area. For non music readers and those who have no knowledge of guitar. Includes correct position of hands, selecting the proper guitar, maintaining the instrument, tuning, movements of the right hand, rest strokes, free strokes, chords, arpeggios, coordination of both hands, left and right hand fingering. Emphasis on classical guitar; supplementary materials in folk and rock idioms will be made available.
- MU 136. GUITAR FOR FUN – ADVANCED BEGINNERS 1 HR.**
(Prerequisite, MU 135.) Designed for students who read music but have little or no knowledge of the guitar. Continuation and review of elementary technical aspects of guitar performance that were introduced in MU 135. Includes hand position, diverse movements of right hand, rest strokes, free strokes, chords, arpeggios, coordination of both hands, left hand fingering, right hand fingering, and special effects (e.g., tremolo, harmonics, vibrato, staccato, and dynamics.) Emphasis placed on playing the guitar through suggested songs for practicing chords. Primary chords, strum symbols, right hand strums and picks, strum variations, and playing guitar by ear will be introduced.
- MU 208. EAR TRAINING/SIGHT SINGING 3 1 HR.**
(Prerequisites, students must have a minimum Grade of "C" or higher in MU 109 and either concurrent enrollment in MU 218 or a C or better in MU 218.) A continuation of MU 109, this course has further studies in dictation and solfege based on materials presented in the Music Theory courses with MIDI based drill software and sight singing software available.
- MU 209. EAR TRAINING/SIGHT SINGING 4 1 HR.**
(Prerequisites, Grade of "C" or higher in MU 208 and concurrent enrollment in MU 219.) A continuation of MU 208, this course has further studies in dictation and solfege based on materials presented in the Music Theory courses with MIDI based drill software and sight singing software available.
- MU 210. FOUNDATIONS OF MUSIC EDUCATION 2 HRS.**
Introduction to Music Education is designed as an introduction to the field of music education. The course will provide students with a broad overview and a clear representation of music education and instruction at all levels. Students will become acquainted with the philosophical rationale for music instruction and current trends in Music Education. The course will provide students with concrete applications of these concepts through observations and micro-teaching presentations.
- MU 218. MUSIC THEORY 3 3 HRS.**
(Prerequisites, students must have a minimum grade of C in MU 119.) A continuation of Music Theory, further studies of harmony will include augmented sixth chords, the neapolitan sixth, modulation, post-common practice harmony, analysis, and composition exercises using notation software.
- MU 219. FORM AND ANALYSIS 3 HRS.**
(Prerequisites, students must have a minimum grade of C in MU 218.) Using skills acquired in the previous MU 118, MU 119, and MU 218, MU219 Form and Analysis is a study of form in music by the identification of structural phenomena, structural units, and structural divisions. Some composition exercises using notation software are included.
- MU 220. EMPORIA CHORALE 1 HR.**
The Emporia Chorale is open to all students as well as residents of the community without audition and performs major choral works each semester in a variety of settings.
- MU 222. COMPOSITION II 3 HRS.**
Continuation of MU 122 and MU 123 with special emphasis on polyphonic writing.
- MU 223. COMPOSITION II 3 HRS.**
A continuation of the techniques introduced in MU 222. Expansion of creativity to vocal and instrumental ensembles of varying sizes and mixtures.
- MU 226. MUSIC APPRECIATION 2 HRS.**
A general education course in music appreciation designed to arouse musical interest, enhance aesthetic enjoyment on the part of the listener, and show the relevance music plays in our everyday lives. Course will include a basic vocabulary of musical elements and a summary of the historical periods of music. Course includes sections which emphasize specialized musical topics. Students with both musical and non-musical backgrounds are invited to enroll. Required attendance at live musical events is a course component.
- MU 236. GUITAR FOR FUN - INTERMEDIATES 1 HR.**
(Prerequisite, consent of instructor.) Designed for the guitarist who has prior training in the skill of playing the guitar. The instructor will screen students, allowing only readers of music and those with a good grasp of basic guitar techniques to participate.
- MU 237. APPLIED PIANO FOR VOCAL STUDENTS I 1 HR.**
(Prerequisite, completion of MU 134 with a grade of "C" or better.) This is a course designed to meet the specific requirements of the vocal music education student. It will include accompaniment, sight-reading, score and part reading, and increased piano performance skills.

- MU 238. APPLIED PIANO FOR VOCAL STUDENTS II 1 HR.**
(Prerequisite, completion of MU 237 with a grade of "C" or better.) This is a course designed to meet the specific requirements of the vocal music education student. It will include accompaniment sight-reading, score and part reading, and increased piano performance skills.
- MU 244. HORNET REVUE 1 HR.**
An ensemble which performs at a variety of events. The group is most active during basketball season; however, there are other occasions throughout the year when the ensemble is called upon to perform. A wide array of past and current popular styles make up the fare for this group of entertainers.
- MU 245. MARCHING BAND 1 HR.**
- MU 247. CONCERT BAND 1 HR.**
- MU 250-271. APPLIED MUSIC 1- 4 HRS.**
Private lessons. Voice, piano, organ, orchestral instruments, composition, or digital audio. No fee for music majors.
- MU 301. BEGINNING IMPROVISATION: COMMON PRACTICE HARMONY AND THEORY APPLIED TO IMPROVISATION ON ALL INSTRUMENTS 1 HR.**
The art of extemporizing music upon a harmonic framework; an initial exposure to spontaneous composition in the American jazz idiom. Major, minor, modal, whole-tone, synthetic, and blues scales as applied to jazz improvising are introduced; an overview of the use of three and four part chords (i.e., triads and seventh chords) in the jazz idiom and the mechanics of jazz notations are covered.
- MU 302. INTERMEDIATE IMPROVISATION: COMMON PRACTICE HARMONY AND THEORY APPLIED TO IMPROVISATION ON ALL INSTRUMENTS 1 HR.**
The art of extemporizing music upon a harmonic framework comprising altered chords, ninth chords, eleventh chords, thirteenth chords. Chord sequences, cadences, and scales are related to their appropriate musical style (e.g., Jazz, Dixie, Country and Western, Rhythm and Blues, and the like).
- MU 310. A CAPPELLA CHOIR 1 HR.**
Rehearsal and performance of select choral literature, with and without accompaniment, from various musical periods, often in languages other than English.
- MU 312. OPERA THEATRE 1 HR.**
The course covers the entire gamut of opera from musical preparation to final stage production. Each student is required to learn a role from an opera and to perform it in public; further they participate in the technical development of the production in the ESU Opera Theatre. All students participate in the musical preparation and staging of an operatic work.
- MU 314. SHOWSTOPPERS 1 HR.**
A jazz choir whose members are chosen from versatile singers around campus. Entrance into the ensemble is by audition. Members must enroll for both Fall and Spring Semesters. Attendance is required at all rehearsals, concerts, and the annual tour.
- MU 316. SYMPHONIC WIND ENSEMBLE 1 HR.**
- MU 318. JAZZ ENSEMBLE 1 HR.**
The course promotes the understanding and appreciation of jazz and popular music by rehearsing and performing in big band format and in a variety of ensembles; it fosters the application of jazz principles to music through its artistic execution.
- MU 319. ORCHESTRA 1 HR.**
Performance of the standard orchestral literature from Baroque through 20th century. Activities include two oratorios, concerto program, two symphonic concerts, an opera, and a Broadway show.
- MU 320. VOCAL DICTION I 1 HR.**
This course is an introduction to the International Phonetic Alphabet (IPA) designed to acquaint students with the symbols and sounds necessary for standard singing pronunciation of English and Italian. Not for graduate credit.
- MU 321. VOCAL DICTION II 1 HR.**
(Prerequisite, MU320 Vocal Diction I) This course will provide knowledge and skill development for French and German music vocal texts.
- MU 322. COMPOSITION III 4-5 HRS.**
A study of more complex principles of composition and contemporary techniques. Original writing including larger forms and large ensembles.
- MU 323. COMPOSITION III 4-5 HRS.**
(Prerequisites, MU 322.) A furthering of creativity in larger, more complex forms using mixed instrumental and vocal ensembles of varied sizes.
- MU 324. WORLD MUSIC 3 HRS.**
An introductory course that will help students understand music as a cultural phenomenon by viewing music as a reflection of the culture and tradition of people in other parts of the world. Studying the diverse world of music will lead the student to an understanding of music as an aspect of culture and to recognize that each culture creates the kind of music necessary to reflect values and traditions. In addition to the music sounds of the various cultures, the study will consider society's ideas about music and the events in which music plays a part.
- MU 326. FOCUS ON FIFTEEN CLASSICAL MUSIC COMPOSERS 3 HRS.**
The goal of this music class is to learn to appreciate classical music through studying fifteen famous classical composers and focusing on their most well-known pieces. Through the use of online discussion boards on blackboard, this online class enables students to post their own responses as well as reply to other students. The fifteen composers studied will include: Bingen, Machaut, Josquin, Palestrina, Purcell, Bach, Vivaldi, Haydn, Mozart, Mendelssohn, Smetana, Dvorak, Wagner, Debussy and Schoenberg.
- MU 328. MUSIC HISTORY: CLASSICAL GREECE TO THE BAROQUE PERIOD 3 HRS.**
This course focuses on understanding music of the Western World from its beginning through the Baroque Era (c. 1750). Emphasis is placed on listening to musical examples so that one may gain an aural perspective of the unfolding of the art as it evolved toward a system of major-minor tonality. General consideration is given to sacred and secular monophony and polyphony, Renaissance instrumental music, and the dramatic church and instrumental music of the Baroque Period.
- MU 329. MUSIC HISTORY: THE CLASSICAL PERIOD TO THE 21ST CENTURY 3 HRS.**
This course focuses on understanding the music and musician of the Pre-Classic, Classic, and Romantic eras (1700-1850) to the present through a study of unique styles, contributions, and contemporary and lasting effects on Western music. Topics include the position music held during each period, the socio-economic and artistic standing of the musicians of each.

MU 344. INTEGRATING MUSIC INTO THE ELEMENTARY CLASSROOM 2 HRS.

(Prerequisite, MU 124.) Materials and procedures for teaching music in the elementary school through the following activities: singing, instrumental activity, listening, rhythmic creativity and music reading. Developmental Characteristics and the Planning of Sequential Music Experiences for Early Childhood, Middle Childhood and for Later Childhood. Continued emphasis on the use of the soprano recorder, and the use of rhythmic, melodic and harmonic instruments in the classroom.

MU 350. VOICE METHODS 1 HR.

Designed for music majors who have had limited experience with singing in ensembles or singing solo vocal literature, this course will introduce the student to the basics of healthy singing, how to practice for maximum benefit, how to gain self-confidence as a singer, how to help others sing in a healthy manner, and how to identify and solve basic vocal problems common to secondary school singers.

MU 352. STRING METHODS 1 HR.

This course will prepare the music education major to work with and teach string players in the public schools. In a general way the course introduces the students to stringed instruments and string players – a specific way the students are taught basic beginning techniques of string playing and teaching to enable the prospective teacher to instruct beginning string classes.

MU 354. WOODWIND METHODS 1 HR.

Students are expected to learn and be able to demonstrate, to a reasonable degree, the principles of tone production and basic performance techniques of the flute, oboe, bassoon and clarinet, and to acquire the ability to sight read and perform easy music for each of the instruments. This is achieved through three class sessions per week and individual practice time outside class.

MU 356. BRASS METHODS 1 HR.

This course is designed to give the student a practical working knowledge of the cornet/trumpet, horn, and trombone. The emphasis in this class is on learning how to effectively teach and critically evaluate the brass student as well as developing, as much as possible within the given time frame, the proper playing techniques on each instrument. Each instrument will be studied with the objective of learning the fundamentals of embouchure, tone production, and body position, breathing, articulation, intonation, and care and maintenance.

MU 358. PERCUSSION METHODS 1 HR.

This course is a practical study of and the development of performing proficiency on percussion instruments and a study based upon the use of these instruments in the bands and orchestras of the public schools, with special emphasis upon teaching techniques and procedures. Micro-teaching experience and the use of multi-media technology in these areas is also included.

MU 360. BEGINNING COMPOSITION 1 HR.

(Prerequisite, MU 218.) Class format: listen and analyze techniques of early twentieth composers including Debussy, Holst, Vaugh Williams, Copland, Stravinsky, Bartok, Hindemith. Information gleaned will be used in student's compositional process.

MU 362. INTERMEDIATE COMPOSITION 1 HR.

(Prerequisite, MU 360.) Class format: listen and analyze techniques of middle to late twentieth composers including Schoenberg, Webern, Reich, Cage, Cowell, Gorecki, Part Riley, Crumb, Penderecki, Stockhausen, and Brian Eno. Information gleaned will be used in student's compositional process. Course will explore use of computer with K-11 synthesizer for composition.

MU 371. INDIVIDUAL PROJECTS 1, 2, or 3 HRS.

Designed to allow independent study in areas which arouse a special curiosity for the student or in which the student exhibits a need for intense research. Student will work with a selected faculty expert in the identified field. The student must complete a departmental Independent Study Form during the first week of class.

MU 372. MARCHING BAND METHODS 1 HR.

The course is designed to give the future music educator knowledge and skills needed to teach marching band in the middle and secondary schools. The student will learn through lectures, evaluations, and field experience how to plan, organize, and implement the total marching band program.

MU 373. JAZZ METHODS 1 HR.

The course is designed to give the future music educator the knowledge and skills needed to teach jazz ensemble in the middle and secondary schools. The student will learn through lectures, evaluations, and direct experiences how to plan, organize, and implement the total jazz program.

MU 375. JUNIOR RECITAL 0 HRS.

This course is required of all music performance majors. Music performed should be representative of various style periods appropriate to the student's medium of performance. It must be a full recital and is subject to preview by the Audition Committee.

MU 391. CHAMBER MUSIC 1 or 2 HRS.

The course will give the student opportunity to experience independent part-playing in a small ensemble. The student will analyze, rehearse, and perform the music appropriate to the instrumentation available. Many ensembles will be traditional in make-up, that is string quartets, brass quintets, woodwind quintets, and the like.

MU 410. NAVIGATING COMPUTERS IN MUSIC 2 HRS.

This course will provide an overview of basic computer and electronic resources available to musicians.

MU 412. DIGITAL AUDIO 2 HRS.

This course explores the fundamental concepts of digital audio recording and provides opportunities for practical application.

MU 414. TECHNOLOGY FOR THE CLASSROOM 2 HRS.

This course will discuss possibilities and methods of integrating technology into a curriculum. The following subjects will be discussed within the context of their use in the classroom: use of electronic and web resources in research; developing a basic web page to disseminate information to students; computer assisted instruction; MIDI; music notation; audio; word processing and presentation programs.

MU 415. PROJECTS IN TECHNOLOGY 2 HRS.

This course is a laboratory class in which students will develop specific projects designed to create a music technology curriculum or to integrate various aspects of technology into a music curriculum.

MU 418. PROJECTS IN RECORDING I 2 HRS.

The first of two laboratory courses in which students will develop and begin recording audio projects.

MU 419. PROJECTS IN RECORDING II 2 HRS.

(Prerequisite, MU418 with a minimum grade of "C".) This course is the second of two laboratory classes in which students will develop and begin recording audio projects.

MU 422. COMPOSITION IV 4-5 HRS.
(Prerequisite, MU 323.) To develop the knowledge and skills necessary for music composition, and to help develop the student's own musical imagination in preparation for independent work. Emphasis placed on preparation of student recital of original work.

MU 423. COMPOSITION IV 4-5 HRS.
(Prerequisite, MU 422.) An extension of MU 422, the composer will prepare, organize, and conduct a recital encompassing works representative of the best of their creative skills.

MU 442. PERFORMANCE PRACTICE IN PIANO MUSIC 2 HRS.
A course designed to expose piano students to the body of knowledge and stylistic conventions known as "performance practices" in piano music of all periods.

MU 450-461. APPLIED MUSIC 1-5 HRS.
Private lessons. Voice, piano, orchestral instruments, composition and digital audio. Student must be approved by music faculty for enrollment in this level.

MU 462-470. APPLIED MUSIC 1-5 HRS.
Private lessons. Instruments, composition, or digital audio. Student must be approved by music faculty for enrollment in this level.

MU 474. ELEMENTARY SCHOOL MUSIC METHODS 2 HRS.
(Prerequisites, MU 210.) An elementary music education methods course designed to stimulate critical thinking concerning the teaching profession, and the role of the elementary music instructor as an integral component in the musical, aesthetic, and social development of the elementary child. The course will prepare students with competencies necessary to creatively formulate and plan a thorough elementary music program, and effectively teach and evaluate the elementary music program. The course will include observation, development and refinement of teaching techniques applicable to elementary music instruction, and micro-teaching experiences.

MU 477. BASIC CONDUCTING 2 HRS.
(Prerequisites, completion of MU218 and MU208 with a grade of "C" or better.) An introduction to the skill of conducting and rehearsing. The course stresses score analysis, singing and playing parts, stylistic consideration and interpretation. Skills are developed in a laboratory setting and evaluated through the use of video and audio tapes.

MU 482. CHORAL CONDUCTING 2 HRS.
(Prerequisite, MU 477 with a grade of "C" or better.) This course prepares students for advanced conducting techniques necessary for directing choral ensembles. Course work will include rehearsal experiences in lab settings, score analysis and principles of performance practice.

MU 484. INSTRUMENTAL CONDUCTING 2 HRS.
(Prerequisite, MU 477 with a grade of "C" or better.) This course is designed to give the student an advanced practical knowledge of the conducting art. The emphasis in this class is on learning how to critically study a score, rehearse an ensemble effectively, as well as developing, as much as possible within the given time frame, excellent baton technique. Score study and rehearsal technique will be studied with the objective of practical application in a public school setting. Videotape analysis will aid in the development of baton technique.

MU 486. MUSIC EDUCATION WORKSHOP 1-2 HRS.
Music Education Workshop addresses aspects of teaching and conducting music at all levels of music education from elementary through college. Workshop sessions typically include topics such as

literature, teaching techniques, technology application, working with singers/choirs, pianists, etc. for all education levels. Sessions are led by recognized authorities/teachers/conductors.

MU 488. ORCHESTRATION 2 HRS.
(Prerequisite, grade of "C" or above in MU 219.) An introduction to the techniques of arranging and composing for orchestra. Writing for the orchestral instruments and basic scoring procedures are covered. Studies of orchestral scores from Haydn to the present with emphasis on Classical and early Romantic practice.

MU 489. ORCHESTRATION II 2 HRS.
(Prerequisite, MU 488.) To introduce the student to contemporary orchestration techniques and to equip the student with the knowledge and skills necessary for scoring original works for orchestra, and for reading and interpreting orchestral scores from all periods. Emphasis on 20th century techniques and scoring of original works.

MU 492. CHORAL METHODS 2 HRS.
(Prerequisites, MU 482.) A teaching methods course for secondary vocal music instruction. Choral course work will include demonstration of choral rehearsal techniques and singing skills; teaching strategies; and study and selection of choral literature.

MU 494. INSTRUMENTAL METHODS 2 HRS.
(Prerequisites, MU 210.) This course is designed to introduce the student to various philosophies and pragmatic approaches to managing and teaching music in a secondary instrumental program. The course will also enable the student to develop a working philosophy based upon theoretical research, field based knowledge, and personal experience in secondary instrumental music education.

MU 496. PHILOSOPHY & RESEARCH IN MUSIC EDUCATION 2 HRS.
(Prerequisites, MU 474 and MU 480 or MU 494.) This course is designed to acquaint the upper level music education undergraduate student with aspects of research and philosophy in music education. The primary focus of the course is to provide insight and develop skills which will enhance the knowledge base of the prospective music educator and serve as a good theoretical and practical foundation for meeting the multiple challenges in public school teaching.

MU 501. PIANO MAINTENANCE 2 HRS.
A study of the piano, its construction, and guidelines to its superficial maintenance. Students will become familiar with both upright and grand pianos in order that they can recognize malfunctions in piano action and recommend intelligent maintenance procedures.

MU 502. DOUBLE REED MAKING 1 HR.
The technique of making double reeds (i.e., selecting, gouging, shaping, binding, and adjusting cane) is taught through practical application.

MU 524. VOCAL PEDAGOGY 1 HR.
A survey and analysis of teaching materials appropriate to all levels of advancement of the private and class voice student with emphasis on teaching techniques including demonstration. Not for graduate credit.

MU 530. INTERNSHIP IN MUSIC 3, 6, 9 or 12 HRS.
An academic offering that provides opportunities for the student to utilize knowledge and skills within a professional music-related supervised position. The internship will reflect the interests and academic preparation and focus of the music degree program student. In addition to performing tasks outlined by the internship agency, each student will maintain a journal and a complete a final project paper.

MU 550 to 568. APPLIED MUSIC 1, 2, or 5 HRS.
Private lessons. Voice, piano, organ, orchestral instruments, or classical guitar. No fee for music majors. **Not for graduate credit.**

- MU 569. APPLIED COMPOSITION** **1-2 HRS.**
Applied composition explores the formal principles of composition, contemporary techniques, and the range and characteristics of instruments and voices. Students will become familiar with notation, MIDI, and other appropriate compositional techniques.
- MU 570. APPLIED DIGITAL AUDIO** **1-2 HRS.**
Applied digital audio lessons. Student must be approved by music faculty for enrollment in this level.
- MU 575. SENIOR RECITAL** **0 HRS.**
This course is required of all music majors. Music performance majors are required to present a full recital; all other degree candidates have the option of sharing their recital with another student. Music performed should be appropriate to the student's performance medium. Not for graduate credit.
- MU 580. SENIOR CAPSTONE RESEARCH PROJECT** **1 HR.**
A research-based independent project course that will focus on an identified music concept related to the student's primary applied focus and will serve as a capstone or final degree requirement for the Bachelor of Arts in Music degree. The student will explore through guided research the concept's knowledge base as well as the recent research in the field.
- MU 610. A CAPPELLA CHOIR** **1 HR.**
Rehearsal and performance of select choral literature, with and without accompaniment, from various musical periods, often in languages other than English.
- MU 618. MUSIC THEORY 3** **3 HRS.**
This course will begin with diatonic and dominant seventh chords, higher numbered chords, the binary and ternary song forms, borrowed chords, secondary dominants, augmented sixth chords, chromatic and enharmonic modulations and secondary sub-dominants.
- MU 619. MUSIC THEORY 4** **3 HRS.**
Course will be a study through composition and analysis of styles from the early twentieth century. Styles that will be studied include Impressionism, Modalism, Pan-triadic techniques, Quartal Harmony, Mixed Meters, Pandiatonicism and Polychords.
- MU 620. EMPORIA CHORALE** **1 HR.**
The Emporia Chorale is open to all students as well as residents of the community without audition and performs major choral works each semester in a variety of settings.
- MU 628. MUSIC HISTORY I** **3 HRS.**
A survey of Western music from Ancient Greece through the end of the Baroque Period. The course is designed as a review for graduate students deemed to have deficiencies in their general knowledge of pre-eighteenth century music history.
- MU 629. MUSIC HISTORY II** **3 HRS.**
A survey of Western music from the Classical Period to the present day. The course is designed as a review for graduate students deemed to have deficiencies in their general knowledge of music history from the eighteenth century to the present.
- MU 630. ORCHESTRA** **1 HR.**
Performance of the standard orchestral literature from Baroque through 20th Century. Activities include two oratorios, concerto program, two symphonic concerts, an opera, and a Broadway show.
- MU 635. OPERA WORKSHOP** **1 HR.**
The course covers the entire gamut of opera, from musical preparation to final stage production. Each student is required to learn a role from an opera and to perform it in public; further, the student participates in the technical development of the production in the E.S.U. Opera Theatre. All students participate in the musical preparation and staging of an operatic work.
- MU 645. MARCHING BAND** **1 HR.**
- MU 646. SYMPHONIC WIND ENSEMBLE** **1 HR.**
- MU 647. CONCERT BAND** **1 HR.**
- MU 648. JAZZ ENSEMBLE** **1 HR.**
The course promotes the understanding and appreciation of jazz and popular music by rehearsing and performing in stage band format and in a variety of ensembles; it fosters the application of jazz principles to music through its artistic execution.
- MU 675. ACCOMPANYING** **1 HR.**
An intense experience in the art of keyboard accompanying; the course must include a public performance.
- MU 678. COUNTERPOINT** **3 HRS.**
Through a practical approach, students will explore the sacred polyphonic idioms of the sixteenth-century and the contrapuntal techniques of the eighteenth-century.
- MU 691. CHAMBER MUSIC ENSEMBLE** **1 HR.**
The course will give the student opportunity to experience independent part-playing in a small ensemble. They will analyze, rehearse, and perform the music appropriate to the instrumentation available.
- MU 723. STRING PEDAGOGY** **2 HRS.**
A survey of teaching materials appropriate to all levels of advancement of the private and class string student with emphasis on the analysis of the need of the individual and procedures for selecting the proper material to meet this need.
- MU 724. WOODWIND PEDAGOGY** **2 HRS.**
A survey of teaching materials and teaching methodology of the major and/or related instruments appropriate to all levels of advancement of the private and class woodwind student with emphasis on the analysis of the need of the individual and procedures for selecting the proper material and/or method to meet this need.
- MU 725. BRASS PEDAGOGY** **2 HRS.**
A survey of teaching materials and teaching methodology of the major and/or related instruments appropriate to all levels of advancement of the private and class brass student with emphasis on the analysis of the need of the individual and procedures for selecting the proper material and/or method to meet this need.
- MU 726. PERCUSSION PEDAGOGY** **2 HRS.**
A course designed for the percussionist performer and/or music educator in which basic and advanced methods of teaching percussion instruments are explored. Solo and ensemble literature and the philosophy behind percussion ensembles are examined and discussed. The focus is on the teaching methods, materials, and literature, with particular attention to meeting the need of the individual student. Special interest topics will be included based on the needs and personnel in the class.
- MU 728. PIANO PEDAGOGY I** **2 HRS.**
This course is a survey of the exciting, dynamic field of piano pedagogy, with a concentration on teaching beginning and elementary children (group, individual), teaching techniques, and reviewing selected piano methods and materials. It will also include peer teaching, investigating information sources, and the creation of tools to enhance the student's teaching career.

MU 729. PIANO PEDAGOGY II PRACTICUM 2 HRS.
(Prerequisite: MU 728 Piano Pedagogy I.) A continuation of Piano Pedagogy I (MU 728), MU 729 is designed to provide the pedagogy student with an opportunity to engage in supervised one on one and group teaching of beginning piano students.

MU 730. WORKSHOP IN BAND TECHNIQUES 1-2 HRS.
A workshop for in-service and pre-service band directors. Includes marching band techniques, rehearsal procedures, and literature. Discussion using charts, films, and recordings of outstanding bands.

MU 732. SEMINAR IN MUSIC TEACHING PROBLEMS 1-2 HRS.
Discussions and laboratory experiences using audio-visual aids and laboratory performance groups. Includes analysis of scores and contemporary materials.

MU 733. MUSIC IN THE MEDIEVAL PERIOD 3 HRS.
A comprehensive study of the development of musical styles during the 10th through 14th centuries. Compositions, treatises, notation, instruments, and methods of performance will be covered.

MU 734. MUSIC IN THE RENAISSANCE 3 HRS.
A comprehensive study of the development of musical styles during the Renaissance through an investigation of the forms of the age and a survey of technical and aesthetic reasons for the shape in which they exist.

MU 735. MUSIC IN THE BAROQUE PERIOD 3 HRS.
A study of the trends and characteristics that mark the forms and musical styles of the seventeenth and early eighteenth centuries. The course deals with the disintegration of the Renaissance and the advent of the Baroque spirit through an investigation of the rise of practices and forms that have their roots in the sixteenth century as well as those novel to the Baroque: the monodic style, recitative, thorough-bass, opera, oratorio, ballet, cantata, concerto, suite, and the smaller sacred and secular vocal and instrumental forms.

MU 736. MUSIC IN THE CLASSICAL PERIOD 3 HRS.
This course is designed to give the student a comprehensive overview of music in the Classic Era (c.1750-c.1830). In-depth knowledge of the period will be gained by focusing on the major musical developments, studying the major composers, and analyzing representative works in order to recognize stylistic trends in the context of various geographic regions.

MU 737. MUSIC IN THE ROMANTIC PERIOD 3 HRS.
This course is designed to give the student a comprehensive overview of music in the nineteenth century. The period will be examined in terms of major musical movements, geographic locations, major composers, significant works, and stylistic trends.

MU 738. THE SYMPHONIC ORCHESTRA AND ITS LITERATURE 2 HRS.
The evolution of the symphony orchestra from the Baroque Period to the Modern Era is studied along with an investigation of landmark works for this ensemble. The development of the Symphony as an orchestral form is emphasized.

MU 739. A STUDY OF CHAMBER MUSIC 2 HRS.
A historical study of chamber music literature from 1600 to the present with reference to significant works in the repertoire: string quartet, woodwind quintet, piano trio, and the like; it includes a study of important works of unusual combinations of instruments.

MU 740. PIANO LITERATURE 2 HRS.
A scrutiny of the significant music written for the piano is investigated from three aspects: how the instrument was exploited and the performance techniques expected; how these works related to a composer's entire legacy of creations; and how the works were a statement of the aesthetic ideal of their time.

MU 741. THE ART SONG: IT'S HISTORY & LITERATURE 2 HRS.
A course outlining the history and development of art song in the western world. Standard repertoire of Germany, France, and England, as well as the lesser known contributions of Eastern Europe, Spain, and America will be discussed.

MU 744. MUSIC OF THE 20TH CENTURY 3 HRS.
A technical survey of the music of the major composers and important schools of twentieth-century composition through the critical analyses of representative works. The principal trends in Europe and America are covered: post-romanticism, neo-classicism, twentieth-century nationalism, the twelve-tone school, and electronic music.

MU 746. CANON AND FUGUE 3 HRS.
Through a practical approach, students will explore the techniques of the eighteenth-century canon and fugue.

MU 760. APPLIED COMPOSITION 1 HR.
(Prerequisite, MU 362.) Private Lesson format: study of compositional styles used by composers of the last four centuries. Student will use information gained in composing a major work of three to five minutes in length. A minimum of one composition will be performed during the semester.

MU 775. THEORY PEDAGOGY 3 HRS.
A study of the principles of and the problems in teaching theory at the secondary school and at the lower college levels. Materials for sight-singing, ear-training, keyboard, figured bass, and creative composition are examined.

MU 776. TECHNIQUES OF 20TH CENTURY COMPOSITION 3 HRS.
A study of specific harmonic materials commonly used by 20th-century composers. Emphasis centers upon stimulating class members to create and perform original works that illustrate the styles and techniques studied.

MU 779. CHURCH SERVICE PLAYING 2 HRS.
The playing of liturgical and non-liturgical services and their music.

MU 800. GRADUATE RECITAL 2 HRS.
A full length public recital is required of all candidates for the degree Master of Music in Performance. The course includes selection of appropriate repertoire under the direction of the major professor; Graduate Committee approval of the recital content; preparation, coaching and practice; performance of the entire recital for approval by the Recital Preview Committee; and successful completion of the actual recital in a public performance shortly following the recital preview.

MU 802. GRADUATE CHAMBER RECITAL 1 HR.
An elective course that provides additional coached performance opportunities for Master of Music students. Student must successfully pass the recital preview prior to scheduling this recital performance.

MU 804. GRADUATE PERFORMANCE**RESEARCH PROJECT 2 HRS.**

This course is designed as the capstone project for the Master of Music - Performance Emphasis degree student. It is intended to guide the student through the process of producing a graduate project that demonstrates the student's scholarly understanding of the repertoire intended for performance for the Graduate Recital. This course work will be completed the semester prior to Graduate Recital.

MU 810. NAVIGATING COMPUTERS IN MUSIC 2 HRS.

This course will provide an overview of basic computer and electronic resources available to musicians.

MU 812. DIGITAL AUDIO 2 HRS.

This course explores the fundamental concepts of digital audio recording and provides opportunities for practical application.

MU 814. TECHNOLOGY FOR THE CLASSROOM 2 HRS.

This course will discuss possibilities and methods of integrating technology into a curriculum. The following subjects will be discussed within the context of their use in the classroom: use of electronic and web resources in research; developing a basic web page to disseminate information to students; computer assisted instruction; MIDI; music notation; audio; word processing and presentation programs.

MU 815. PROJECTS IN TECHNOLOGY 2 HRS.

This course is a laboratory class in which students will develop specific projects designed to create a music technology curriculum or to integrate various aspects of technology into a music curriculum.

MU 816. ADVANCED CONDUCTING 2 HRS.

For the graduate student who has experienced training in conducting, the course emphasizes advanced baton techniques, the elements of score reading, interpretation of scores, and form and analysis. The course includes the study of standard nineteenth- and twenty-century choral and instrumental works with special stress placed upon the communicative procedures necessary for the advanced conductor whether the idiom be vocal or instrumental. Students without conducting experience will be expected to audit MU 477—Basic Conducting (2 hrs.).

MU 818. PROJECTS IN RECORDING I 2 HRS.

The first of two laboratory courses in which students will develop and begin recording audio projects.

MU 819. PROJECTS IN RECORDING II 2 HRS.

(Prerequisite, completion of MU818 with a minimum grade of "C".) This course is the second of two laboratory classes in which students will develop and begin recording audio projects.

MU 820. MUSIC EDUCATION WORKSHOP 1-2 HRS.

Music Education Workshop addresses aspects of teaching and conducting music at all levels of music education from elementary through college. Workshop sessions typically include topics such as literature, teaching techniques, technology application, working with singers/choirs, pianists, etc. for all education levels. Sessions are led by recognized authorities/teachers/conductors.

MU 827. INSTRUMENTAL PEDAGOGY 2 HRS.

Survey of band and orchestra literature appropriate for elementary, middle, and high school instrumental groups. Rehearsal procedures, performance problems (e.g., intonation, balance, instrumentation), program building, administration, and public relations are topics for research and discussion.

MU 830. PERFORMANCE PRACTICE IN**PIANO MUSIC 2 HRS.**

A course designed to expose piano students to the body of knowledge and stylistic conventions known as "performance practices" in piano music of all periods.

MU 835. HISTORY AND DEVELOPMENT OF MUSIC EDUCATION 3 HRS.

This course will provide the music education student with a historical foundation for the development of music education in the United States as well as an examination of the important events and concepts crucial to this development. The role of technology and the impact of the National Standards upon music education will be discussed.

MU 836. TECHNIQUES OF ANALYSIS 3 HRS.

This course is designed to develop the tools of music analysis for the graduate student (or upper level undergraduate with the instructor's permission). Through readings, projects, and papers, students will use different theoretical methods to analyze music ranging from chant to impressionism.

MU 838. MUSIC BIBLIOGRAPHY 2 HRS.

An introduction to current methods of research in music. The course will include standard music resources, accepted writing styles, area of research relevant to music performance and music education, basic statistical methods employed in research, and the organization, development, and completion of a formal research project.

MU 839. RESEARCH IN MUSIC EDUCATION 3 HRS.

(Prerequisite, MU 838.) An advanced research course that will focus on traditional and contemporary research methodology as applied to music education. Students will explore the basic concepts, principles, and techniques of qualitative and quantitative music education research. An overview of philosophical and aesthetic inquiry, and historical research will be included. Descriptive and experimental research methods will be explored. The course will also include work with basic statistics as a means to better understand the research.

MU 841. OPERA: HISTORY AND LITERATURE 2 HRS.

An overview of opera from its birth in the Baroque period to present day. The standard works will be studied. Music dramas of historical significance, though not common to the repertoire most performed, will be included. Prominent composers, contributors to the development of music drama, will be covered.

MU 842. HISTORY OF CHORAL MUSIC 2 HRS.

Vocal ensemble and choral literature from 1400 to the present is studied in an historical context. Attention is given to stylistic traits, types of compositions, sources, performance practices and aesthetic considerations.

MU 843. ANALYTIC TECHNIQUES I--CHANT THROUGH PALESTRINA 2 HRS.

The history of music approached through analysis of representative compositions. An understanding of musical style will be developed through historic-analytic examination of musical structures, from Gregorian Chant through the late Renaissance Era (Palestrina).

MU 844. ANALYTIC TECHNIQUES II--PALESTRINA THROUGH WAGNER 2 HRS.

The history of music approached through analysis of representative compositions. An understanding of musical style will be developed through historic-analytical examination of musical structures, from the Baroque era (1600) through the late 19th Century (Wagner).

MU 845. SCORE ANALYSIS, PERFORMANCE & PERFORMANCE PRACTICE 2 HRS.

A course in music history providing a laboratory experience for graduate music students to become familiar with an important segment of literature from various periods through research/analysis and performance (where feasible) of the actual scores of musical works from any but not necessarily all of the major periods (Renaissance through 20th Century); to read and become familiar with important source readings in the area of performance practice; and to investigate special advanced topics in 20th Century music through an assigned project that will consist of an in depth analysis of the score of a particular work. This research assignment will culminate with an in-class presentation that will involve a performance of the work and a discussion of the student's findings.

MU 846. PHILOSOPHY OF MUSIC EDUCATION 3 HRS.

This course will provide the music educator with an historical foundation and knowledge as well as current developments in music education instructional philosophy. Major philosophies as well as current trends and issues in music education will be explored.

MU 847. FOUNDATIONS OF MUSIC EDUCATION 3 HRS.

This course will provide the music education student with a sociological, social psychological and psychological foundation for music instruction.

MU 848. LEARNING THEORIES IN MUSIC 3 HRS.

(Prerequisite, bachelor's degree in music and permission of instructor. A student whose bachelor's degree in music was not in music education and who intends to teach in public school following completion of a masters degree in music education must also complete certification requirements as required by the State of Kansas for the teaching area they have chosen.) This course is designed to examine the psychology of historically significant learning theories and their relationship and applicability to music education in the 20th Century. It will provide the student with the necessary knowledge to better evaluate established theories of learning, as well as "current trends" in the field, and to determine their usefulness in various settings within the music education curriculum. An examination of significant talent and achievement tests will also be addressed.

MU 849. CURRENT ISSUES IN MUSIC EDUCATION 3 HRS.

This course will provide the music education student an opportunity to explore in depth selected current issues in music education. Current educational issues and trends and their impacts upon music education will be examined.

MU 850-869. APPLIED MUSIC 1-2 HRS.

Private lessons. Voice, Piano, Organ, Orchestral Instruments, or Classical Guitar. No fee for music majors.

MU 871. APPLIED DIGITAL AUDIO 1-2 HRS.

Applied digital audio lessons.

MU 872. APPLIED MIDI 1-2 HRS.

This is a practical approach to learning MIDI. Throughout the course, students will be assigned projects to demonstrate their knowledge of specific topics. Topics will include types of MIDI data, assigning and modifying data, software synthesizers, samples, and the basics of MIDI orchestration.

MU 873. SPECIAL PROJECTS 1, 2, or 3 HRS.

Designed to allow independent study in areas which arouse a special curiosity for the student who exhibits a need for intense research. Student will work with a selected faculty expert in the identified field. The student must complete a departmental Independent Study Form during the first week of class.

MU 878. ORATORIO 2 HRS.

Analysis with studio performances of recitatives, arias, and ensembles from standard choral works.

MU 880. CAPSTONE RESEARCH 2 HRS.

(Prerequisites, this course is a prerequisite for MU 882.) An advanced research independent projects course that will focus on an identified music teaching-learning concept. The student will explore through guided research the concept's knowledge base as well as the recent research in the related field. This research will serve as the foundation for the development of the Master of Music – Music Education capstone requirements – instructional practicum (MU 882), graduate project (MU 870), or thesis (MU 879).

MU 882. GRADUATE INSTRUCTIONAL PRACTICUM 2 HRS.

(Prerequisite, MU 880.) This course provides directed experiences of working with students in music classes in the instruction of a semester topic-specific course module. Module curriculum and instructional procedures as developed in the prerequisite course MU 880 will be taught and assessed in one or more grade levels of the Pre K-12 music.

MU 883. GRADUATE PROJECT 1-2 HRS.

(Prerequisite, MU 880.)

MU 884. GRADUATE THESIS 1-5 HRS.

(Prerequisite, MU 880.) Independent investigation into a significant musical topic or subject. The results of this investigation must be presented in a formal paper. Topic must be approved by the Music Graduate Committee.

MU 888. ADVANCED ORCHESTRATION I 2 HRS.

Advanced scoring for full orchestra and other ensembles. Study of orchestral techniques of Classic, Romantic, and Modern periods.

MU 889. ADVANCED ORCHESTRATION II 2 HRS.

Continuation of Advanced Orchestration I, with emphasis on modern orchestral practice and original composition for full orchestra.

MU 891. ADVANCED COMPOSITION 2 HRS.

Selected exercises in different historical styles and forms of composition, including advanced principles of orchestration. Also a survey of 20th Century compositional styles and media -- early, middle, and late 20th Century.

MU 892. ADVANCED COMPOSITION II 2 HRS.

(Prerequisite, MU 891.) Continuation of Advanced Composition I. Selected composition projects in different styles and forms; continued, emphasizing individual student preferences in selecting particular areas of stylistic concentration.

MU 893. ADVANCED COMPOSITION III 2 HRS.

(Prerequisite, MU 892.) Specialization in writing in preferred media, styles, and forms examined in Advanced Composition I and II, culminating in selection of materials, compositions to be written, or a thesis topic for MU 894 (Graduate Composition Project and Recital) or MU 879 (Thesis).

MU 894. GRADUATE COMPOSITION PROJECT AND RECITAL 1-4 HRS.

(Prerequisite, MU 893.) Creation and completion of original compositions for a final composition project of majors in music composition, followed by a public recital of these works in actual performance. The project must be approved by the major professor and the Graduate Music Committee. The final recital of works should be at least 30-35 minutes in length (a half recital). (Note: The project and recital requirement is 4 hours. However, the credit may be divided among two or more semesters, if necessary. By the time the project and recital are complete, the enrollment in MU 894 must total at least 4 hours.

NURSING**NU 206. INTRODUCTION TO PROFESSIONAL NURSING****3 HRS.**

(Prerequisite, Admission to nursing major.) This theory course introduces nursing as a healthcare profession that uses specialized knowledge, skills, and attitudes to contribute to the health and well-being of society. Essential components of professional nursing are discussed including the concepts of nursing, Person, adaptation, health, and environment. The course also reviews the historical evolution of the nursing profession and the development of its body of knowledge.

NU 208. ESSENTIALS FOR PROFESSIONAL NURSING**2 HRS.**

(Prerequisite, Admission to nursing major.) This theory course introduces content that is essential to the practice of professional nursing. Content specific to therapeutic nursing interventions, professional values, and leadership abilities is emphasized. Students must demonstrate proficiency with dosage calculations in this course.

NU 222. NURSING FUNDAMENTALS**3 HRS.**

(Prerequisite, Admission to nursing major.) In this theory course, students learn concepts and technical skills fundamental to professional nursing. Students also learn to apply nursing process when delivering nursing care in the health care system.

NU 223. NURSING FUNDAMENTALS PRACTICUM**2 HRS.**

(Prerequisites, NU 206, NU 208, NU222, GB 385, ZO 362, ZO 363. Concurrent enrollment in NU 306, NU 307.) Students in this practicum course provide fundamental nursing care in a clinical setting by demonstrating the knowledge, skills, and attitudes that were presented in NU 206, NU 208, NU 222.

NU 306. HEALTH ASSESSMENT**2 HRS.**

(Prerequisites, NU 206, GB 385, concurrent enrollment in NU 223 and NU 307.) This theory course pertains to the health assessment of individuals across the lifespan. Normal and common variations of health assessment findings are described. Developmental, cultural, and environmental factors that influence health status are discussed.

NU 307. HEALTH ASSESSMENT LAB**1 HR.**

(Concurrent enrollment in NU 306 required.) In this laboratory course, students demonstrate the cognitive and psychomotor competencies necessary to complete health assessments of individuals across the life span. Students learn the basic methods of conducting a physical examination. Emphasis is placed on the processes of collecting client health histories and completing a physical examination.

NU 308. FOUNDATIONS OF PROFESSIONAL NURSING**3 HRS.**

(Prerequisite, Admission to the nursing major.) This theory course discusses essential components of professional nursing including the concepts of nursing, person, adaptation, health, and environment. The historical evolution of the profession of nursing is reviewed. The development of the nursing body of knowledge is described. Professional values, higher order problem-solving and leadership abilities are explored. Therapeutic communication and formal written communication are described.

NU 310. FUNDAMENTALS OF NURSING**4 HRS.**

(Prerequisite, Admission to nursing major; concurrent enrollment in NU 311 Fundamentals of Nursing Practicum.) In this theory course, students learn concepts and technical skills fundamental to professional nursing. Students also learn to apply nursing process when delivering nursing care in the health care system.

NU 311. FUNDAMENTALS OF NURSING PRACTICUM**3 HRS.**

(Prerequisite, Admission to the nursing major) Students in this practicum course provide fundamental nursing care in a clinical setting by demonstrating the knowledge, skills and attitudes that were presented in NU 206, NU 222.

NU 312. COMPLEMENTARY CARE**1 HR.**

(Prerequisite, admission to nursing major or consent of instructor.) This course provides a theory base for understanding the use of complementary therapies. The content builds on theories and research related to complementary therapies. The mind-body-spirit connection will be explored. The nurse's role in educating patients about complementary therapies will be explored.

NU 314. LPN TRANSITION TO PROFESSIONAL RN ROLE**2 HRS.**

(Prerequisite, Admission to nursing major) This course builds on prior knowledge acquired in a basic practical nursing program and requires the student to self-reflect on previous and future nursing roles. Essential components of professional nursing are discussed including the concepts of nursing, Person, adaptation, health, and environment. Students also learn to apply nursing process when delivering nursing care in the health care system as a professional nurse. The course also reviews the historical evolution of the nursing profession and the development of its body of knowledge. The process involved in establishing a professional identity as a baccalaureate student and graduate are presented.

NU 340. PHARMACOLOGY**3 HRS.**

(Prerequisite, ZO364) In this theory course, students learn specific prototypes of selected drug classifications and their relationships to drug action, use, side effects, and nursing implications. Emphasis is placed on the nurse's role in promoting client adaptation through drug administration, management, and education. Legal, ethical, and professional responsibilities for administering drugs are presented.

NU 352. ROLE TRANSITION**3 HRS.**

(Prerequisite, Admission to nursing major.) This theory course builds on prior knowledge acquired in an associate degree or diploma program and requires the student to self-reflect on previous and future nursing roles. Essential components of professional nursing are discussed including the concepts of nursing, Person, adaptation, health, and environment. The course also reviews the historical evolution of the nursing profession and the development of its body of knowledge. Content specific to therapeutic nursing interventions and leadership abilities is emphasized.

NU 361. MASSAGE AS A THERAPEUTIC NURSING INTERVENTION**1 HR.**

This laboratory class includes current information regarding the use of massage as a therapeutic nursing intervention. Content includes practice of the various techniques appropriate for client situations. The benefits provided by the use of massage are explored.

NU 366. CURRENT TOPICS IN NURSING**1 HR.**

Content of this elective course will address a specific topic that is currently relevant to the nursing profession. Course content will be additional to what has been presented in required nursing courses. The topic, including associated issues, will be reviewed for its impact on the nursing profession and the roles of the nurse.

NU 374. ADULT HEALTH NURSING I**3 HRS.**

(Prerequisites, MC 316, MC 317, ZO 364, NU 208, NU 222, NU 306. Concurrent enrollment in NU 340, NU375.) Concepts essential to adult health nursing care are discussed in this theory course. Nursing care to promote health, reduce risk, and manage specifically identified illnesses and diseases is emphasized. This course is the first of two sequential adult health courses.

NU 375. ADULT HEALTH I NURINSG PRACTICUM 3 HRS.
(Prerequisites, NU 223, NU 307, concurrent enrollment in NU 340, NU 374.) In this practicum course, students demonstrate the knowledge, skills, and attitudes necessary to provide nursing care to adult clients. Theoretical concepts from NU 374 are applied in this course.

NU 376. MENTAL HEALTH NURSING 3 HRS.
(Concurrent enrollment in NU 340 is required.) Concepts essential to mental health nursing care are discussed in this theory course. Nursing care to promote health, reduce risk, and manage mental disorders is emphasized.

NU 377. MENTAL HEALTH NURSING PRACTICUM 1 HR.
(Prerequisites, NU 307, NU 376, or concurrent enrollment.) Students in this practicum course demonstrate the knowledge, skills, and attitudes necessary when providing care to mental health clients. Principles of therapeutic communication as an intervention are emphasized. Theoretical concepts from NU 376 are applied in this course.

NU 379. DECISION MAKING IN NURSING I 1 HR.
(Prerequisites, NU 340, NU 374, NU 376, or concurrent enrollment.) Students in this laboratory course draw from knowledge, skills, and attitudes learned from previously completed courses and/or concurrent nursing courses. This information is synthesized to make decisions that impact the delivery of nursing care with clients. The use of higher order problem solving in making evidence-based decisions is emphasized. This course is the first of two sequential decision making courses.

NU 380. EXPLORING THE SCOPE OF THE NURSE'S ROLE IN ORGAN TISSUE DONATION AND RETRIEVAL 1 HR.
This theory course is designed to explore the nurse's role in organ and tissue donation and retrieval. The legal and ethical requirements established by Kansas and the Federal Required Request Law are explained. The psychosocial and spiritual aspects are explored. Opportunities for role play are provided.

NU 382. GERIATRIC NURSING 1 HR.
(Prerequisites, NU 340, 374, NU 376. Concurrent enrollment in NU 385.) In this theory course, concepts essential to geriatric nursing care are discussed, including aging, chronicity, rehabilitation, loss, grief, and dying. Principles of palliative care are emphasized.

NU 383. ADULT MEDICAL/SURGICAL NURSING PRACTICUM 2 HRS.
(Consent of instructor, Registered Nurses only.) In this practicum course, students demonstrate the knowledge, skills, and attitudes necessary to provide nursing care to adult clients, minus the gerontology component. Theoretical concepts from NU 382 and NU 384 are applied in this course. The course is for licensed registered nurses (RN-BSN) students only.

NU 387. GERIATRIC NURSING CLINICAL 1 HR.
(Prerequisites: Consent of instructor, Registered Nurses only.) In this practicum course, students demonstrate the knowledge, skills, and attitudes necessary to provide nursing care to geriatric clients. Theoretical concepts from NU 382 and NU 384 are applied in this course.

NU 390. SPIRITUAL CARE: THE NURSE'S ROLE 2 HRS.
This course provides a theory base which enables nurses to meet the spiritual needs of children and adults. Spiritual development throughout the lifespan is included. Emphasis is placed on exploration of various ways of spiritual expression. The nursing process, as it relates to spirituality, is the main method of inquiry.

NU 392. END OF LIFE CARE 1 HR.
(Prerequisite, NU 310.) This course presents the principles of palliative care at the end-of-life across the lifespan. The course examines the biological, psychosocial, and spiritual needs of individuals/families at the end-of-life. The content prepares the student to care for individuals/families at the end-of-life.

NU 405. PRACTICUM: CARE AT THE END OF LIFE 1 HR.
This practicum course provides opportunities for the application of concepts presented one end of life. Students will observe and implement nursing care for individuals/families at the end of life.

NU 406. CAMP NURSING 1 HR.
This course provides nursing theory specific to the physical and psychosocial needs of children in a camp setting. The content builds on principles, theories and research related to childrearing families. Topics presented in the course include health promotion, health maintenance and safety measures which can be initiated within a leisure setting. Also addressed are special needs of the family when a family member is a camper.

NU 407. PRACTICUM: CAMP NURSING 1 HR.
(Prerequisites, NU 406 or concurrent enrollment in NU 406, or consent of instructor.) This practicum course in a camp setting provides opportunities for the application of concepts presented in NU 406 Camp Nursing.

NU 408. PEDIATRIC PALLIATIVE CARE 1 HR.
(Prerequisite: Concurrent enrollment in NU428) This elective course presents the principles of pediatric palliative care. The course examines the biological, psychosocial, cultural, spiritual, and ethical dimensions which influence pediatric palliative care. The content prepares the student to care for, support, and advocate for the needs of children and families facing life-threatening illnesses or events so that the children might live out their lives with dignity and die in a manner that is meaningful.

NU 424. ADVANCED DYSRHYTHMIAS 1 HR.
(Prerequisites, NU416 or concurrent enrollment or consent of instructor.) This is an elective course that will expand the student's knowledge of dysrhythmia recognition and treatment. Students will learn the criteria for determining atrial, junctional, and ventricular dysrhythmias and the AV blocks. The nurses' role in the treatment of specific dysrhythmias will be explored. This course is recommended for students who are seriously exploring employment in the emergency or critical care arenas.

NU 426. MATERNAL/NEWBORN NURSING 3 HRS.
(Prerequisites, NU 306, NU 340, NU 385. Concurrent enrollment in NU 428, NU 429, NU 431.) Concepts essential to maternal/newborn nursing care are discussed in this theory course. Aspects of women's health are explained.

NU 428. PEDIATRIC AND FAMILY NURSING 3 HRS.
(Prerequisites, NU 306, NU 340, NU 385. Concurrent enrollment in NU 426, NU 429, NU 431.) Concepts essential to nursing care of children and their families are discussed in this theory course. Principles of growth and development and family nursing are emphasized.

NU 429. MATERNAL/NEWBORN AND PEDIATRIC NURSING PRACTICUM 3 HRS.
(Prerequisites, NU 307 and concurrent enrollment in NU 426, NU 428, NU 431.) In this practicum course, students demonstrate the knowledge, skills, and attitudes necessary to provide nursing care with maternal/newborn and pediatric clients. Theoretical concepts from NU 426 and NU 428 are applied in this course.

NU 430. NURSING RESEARCH 3 HRS.

(Prerequisite, PY 520, or MA 341, or BU 255 or statistics course acceptable to the department of nursing, concurrent enrollment in NU 431.) This theory course focuses on the use of evidence-based practice in nursing and emphasizes the research process as a method of inquiry. Content addresses relationships between nursing or health-related theories and research, identification of nursing problems amenable to research, ethical considerations of research, preliminary steps in the research process, research designs, methods of data collection and analysis, and means of disseminating research findings. Emphasis is given to developing the student's ability to critique evidence and research findings and to make decisions about the utilization of nursing and health related research based findings.

NU 431. DECISION MAKING IN NURSING II 1 HR.

(Prerequisites, NU 379, NU 382, NU 384, NU 385. Concurrent enrollment in NU 426, NU 428, NU 429, NU 430.) Students in this laboratory course draw from the knowledge, skills, and attitudes learned from previously completed courses and concurrent nursing courses. This information is synthesized to make decisions that impact the delivery of nursing care with clients. The use of higher order problem solving in making evidence-based decisions is emphasized. This course is the second of two sequential decision making courses.

NU 450. PHARMACOTHERAPEUTIC ADVANCES IN NURSING 2 HRS.

This nursing elective course explores the nurse's role in administering recently approved medications in the major drug classifications. Issues will be discussed regarding the use of the pharmacotherapeutic advances in promoting adaptive potential. Considerations unique to individuals across the lifespan will be reviewed.

NU 452. INDEPENDENT STUDY 1 HR.

(Prerequisite, consent of instructor.) This elective course is designed to allow independent study in an area of nursing that is of special interest to the student or to allow the student to participate in a faculty-guided research study. The student will be under the instruction or guidance of a faculty member with experience in the nursing area or research study.

NU 454. FACING THE CHALLENGE OF NCLEX 1 HR.

(Prerequisite, NU431) Content of this course focuses on preparation strategies specific to the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Students learn strategies to further develop test taking skills and gain additional experience with computer adaptive testing. Students also learn methods to assess and analyze individual strengths and limitations regarding overall nursing knowledge and to develop a plan of study based on the findings.

NU 484. ADULT HEALTH II NURSING 3 HRS.

(Prerequisites, NU 340, NU 374, concurrent enrollment in NU385.) Concepts essential to adult health nursing care are discussed in this theory course. Nursing care to promote health, reduce risk, and manage specifically identified illnesses and diseases is emphasized. This course is the second of two sequential adult health courses.

NU 485. ADULT HEALTH II NURSING PRACTICUM 3 HRS.

(Prerequisites, NU 375, or concurrent enrollment in NU 382, NU 384.) In this practicum course, students demonstrate the knowledge, skills, and attitudes necessary to provide nursing care to adult clients. Theoretical concepts from NU 382 and NU 384 are applied in this course.

NU 486. PUBLIC, POPULATION, AND GLOBAL HEALTH 4 HRS.

(Prerequisites, NU 431, concurrent enrollment in NU 489.) Concepts essential to public health nursing are discussed in this theory course. Content specific to meeting the health related needs of groups and the concept of community as client is emphasized.

NU 489. PUBLIC HEALTH NURSING PRACTICUM 2 HRS.

(Prerequisites, NU 429 and concurrent enrollment in NU 486.) In this practicum course, students demonstrate the knowledge, skills, and attitudes necessary to provide nursing care for the public. Theoretical concepts from NU 486 are applied in this course.

NU 492. NURSING LEADERSHIP 3 HRS.

(Prerequisite, NU 431 and concurrent enrollment in NU 493.) Concepts essential to nursing leadership are discussed in this theory course, including the role of the nurse as leader and the leadership challenges of the 21st century.

NU 493. TRANSITION INTO PROFESSIONAL NURSING PRACTICUM 4 HRS.

(Prerequisites, Concurrent enrollment in NU 486, NU 489, NU 492.) Working with preceptors who are registered nurses, students have opportunities in professional nursing practice to synthesize and integrate empirical and theoretical knowledge from previous learning experiences. The focus is on individualized transition to the professional nursing role in a selected clinical setting. Concepts of leadership and management are emphasized. Essential components of professional nursing, including higher order problem solving; professional nursing values; leadership abilities; therapeutic nursing interventions; and the promotion of health, reduction of risk, and the management of illness and disease are demonstrated.

NU 800. THEORIES, LEADERSHIP, ROLE TRANSITION-ADVANCED PRACTICE ROLE 3 HRS.

(Prerequisite, Admission to the graduate nursing major.) This theory course will integrate theories from nursing and related disciplines to provide the foundation for the graduate student to transition to the advanced practice role.

NU 801. HEALTH CARE SYSTEMS-POPULATION HEALTH AND POLICY 3 HRS.

(Prerequisite, Admission to the graduate nursing major.) This theory course will focus on nursing and public health policy formation in relation to the United States health care systems, organization, financing/insurance, health professionals, regulation, quality, ethics, and delivery of services within a global society. A service learning component is emphasized.

NU 802. NURSING LAW, ETHICS, AND QUALITY IMPROVEMENT 3 HRS.

(Prerequisite, Admission to the graduate nursing major.) This theory course will provide various ethical frameworks and an overview of the US legal system, as a basis for analyzing health care issues affecting health care institutions, patients, and health care providers. Common legal-ethical issues addressed by health care nursing administrators, expanded nursing practice, and health care education are reviewed.

NU 803. HEALTH CARE INFORMATICS 2 HRS.

(Prerequisite, Admission to the graduate nursing major.) This theory course NU 803- Health Care Informatics-Examines information systems as they relate to health care. Issues surrounding information systems are examined. Gathering, storing, retrieving, creating, and utilizing data are discussed. Integrates nursing, science and information systems to identify, define, manage, and communicate data, information, and knowledge in decision making. Translating and integrating scholarship into practice is emphasized.

NU 804. TRANSLATION AND INTEGRATION OF SCHOLARSHIP TO PRACTICE-PROJECT 3 HRS.

(Prerequisite, Admission to the graduate nursing major.) This internship course NU 804- Translation and Integration of Scholarship to Practice- Translating and integrating scholarship into practice is emphasized through an applied service project using the theoretical knowledge, skills, and attitudes attained in NU 803 Health Care Informatics.

NU 805. HEALTH CARE BUDGETING, FINANCE, AND ECONOMICS 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course will provide an introduction to basic economic, financial and accounting concepts relating to health care management. Programming, budgeting, and controlling processes in health care organizations will be discussed within the nurse manager's role.

NU 806. HEALTH CARE OPERATIONAL MANAGEMENT 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course will provide an overview of healthcare operations management within a hospital or clinical setting. Students will gain an understanding of how to manage in the healthcare setting through planning, directing, controlling and leadership responsibilities. Students will also learn about the application of financing in achieving healthcare goals. Discussions will include managing hospital staffing, managing financial obligations in the present leadership roles in healthcare, integrating the higher level of patient care based on the current ACA standards, and understanding how older models of management and leadership practices can be blended into contemporary practices within today's healthcare industry. Students will also gain knowledge of the moral and ethical implications impacting operational management decision-making practices.

NU 807. HEALTH CARE STRATEGIC PLANNING AND MARKETING 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course will provide students the opportunity to understand, integrate, develop, and execute the principles of strategic planning and marketing to accomplish organizational strategy.

NU 808. HUMAN RESOURCE MANAGEMENT AND ORGANIZATIONAL BEHAVIOR IN HEALTH CARE 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course will provide students the application of theory to develop the knowledge and skills needed to effectively manage individuals and groups in health care organizations. Topics include human behavior, human resource management, labor relations policies, and organizational behavior.

NU 809. NURSING HEALTH CARE MANAGEMENT INTERNSHIP 6 HRS.
(Prerequisite, Admission to the graduate nursing major.) In this Internship course, you will synthesize all concepts learned in the Masters in Nursing Healthcare Management track. The focus for this guided internship within a health care setting in nursing or health care management is to synthesize all knowledge, skills, and attitudes acquired during the program by direct application in a health care organization.

NU 810. CURRICULUM AND PROGRAM PLANNING 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course NU 810- Curriculum and Program Planning examines curricular and program planning theories, models, processes to create a learner centered environment. Diversity, workforce development, ethical/legal issues in curriculum planning and education are also included.

NU 811. ASSESSMENT AND EVALUATION STRATEGIES 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course NU 811- Assessment and Evaluation Strategies examines assessment and evaluation theories, models, and processes to enhance successful student learning and program outcomes.

NU 812. PHARMACOLOGY PATHOPHYSIOLOGY AND HEALTH ASSESSMENT FOR NURSE EDUCATORS 3 HRS.
(Prerequisite, Admission to the graduate nursing major.) This theory course NU 812- Pharmacology Pathophysiology and Health Assessment for Nurse Educators focuses on the application of comprehensive health assessment techniques, pathophysiological changes and pharmacological needs of clients across the lifespan. Application of evidence-based studies related to safe, client-centered care will be explored. Application of teaching strategies to concepts presented will be discussed.

NU 813. TEACHING AND LEARNING STRATEGIES 3 HRS.
(Prerequisite, Admission to graduate nursing major.) This theory course NU 813- Teaching and Learning Strategies focuses on the development and implementation of teaching-learning strategies that engage students in the classroom, clinical and skills lab. The theoretical foundations of teaching and learning, methods for instructional planning, sequencing and organizing instruction, and utilization of evolving technological strategies are emphasized based on best practices. Evidence-based teaching strategies for educators are examined that promote student engagement to provide safe, client-centered care.

NU 814. NURSE EDUCATOR INTERNSHIP 6 HRS.
(Prerequisite, Admission to graduate nursing major.) This theory course NU 814-Nurse Educator Internship focuses on a guided field internship within an academic or health care setting. Synthesis and application of concepts to facilitate development of the advanced practice nurse educator role as scholar, teacher, and collaborator are emphasized.

NU 815. TOPIC (s) IN GRADUATE NURSING 1-5 HRS.
(Prerequisite, Admission to the graduate nursing major.) This elective course NU 815-Topics in Graduate Nursing will address a specific topic that is currently relevant to the nursing profession at the graduate level. The topic, including associated issues, will be reviewed for its impact on the nursing profession and the roles of the nurse at the graduate level.

ACTIVITY COURSES

PE 100. ACTIVE LIVING 1 HR.
This course is designed to expose students to facts about and experiences in dealing with motor, physical, and physiological aspects of the human being. Specific areas of study include physical fitness, nutrition, stress management, and use of lifetime sports. Students will have several opportunities to assess various aspects of their own fitness.

PE 103. AEROBIC DANCE 1 HR.
The course is designed to provide each student with the opportunity to learn the principles and facts about aerobic fitness and to develop their aerobic fitness.

PE 104. WALKING AND JOGGING 1 HR.
This course is designed to provide each student with the opportunity to learn the principles and facts about aerobic fitness and to develop their aerobic fitness. Walking and jogging activities are the focus of this course.

PE 105. INDIVIDUALIZED PHYSICAL ACTIVITY 2 HRS.
(Prerequisite, permission of instructor.) PE 105 is a course that provides the student with a diversified program of developmental appropriate activities that are individualized to maximize safe and successful participation in physical activity.

PE 110. BASKETBALL 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to basketball.

PE 112. SOCCER 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to soccer.

PE 113. SOFTBALL 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to softball.

PE 117. VOLLEYBALL 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to volleyball.

PE 121. BADMINTON 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to badminton.

PE 122. BAIT, FLY, AND SPIN CASTING 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to fishing.

PE 124. FENCING 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to fencing.

PE 125. GOLF 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to golf.

PE 127. TENNIS 1 HR.

This course is designed to give students an opportunity to develop the basic skills and knowledge related to tennis.

PE 128. RECREATIONAL GAMES 1 HR.

The course is designed to give students an opportunity to explore and develop skills in a variety of social-recreational activities and games of less strenuous variety.

PE 129. ZUMBA 1 HR.

The general purpose of this course is to introduce the student to a fun and simple fitness class that uses high energy Latin/International music and easy to follow dance moves to utilize the principles of aerobic/fitness interval training and resistance training.

PE 130. ELEMENTARY SOCIAL DANCE 1 HR.

The practical study and application of dancing for recreation with partner including North American and Latin styles.

PE 131. ELEMENTARY FOLK AND SQUARE DANCE 1 HR.

The practical study and application of American square dance, international folk and ethnic dance.

PE 132. JAZZ DANCE I 1 HR.

The course is designed to allow the student to gain practical experiences in jazz dance techniques from the traditional form to the more choreographic pop jazz style.

PE 133. ELEMENTARY MODERN DANCE 1 HR.

The study of dance as an art form using the body as a medium of movement in time and space incorporating technical skills to enhance creativity.

PE 134. BALLET I 1 HR.

The general purpose of this course is to study the techniques of ballet and to gain practical experience through barre exercises and center work.

PE 135. YOGA 1 HR.

The general purpose of the course is to introduce the student to hatha yoga, the practice of the physical postures which focus on developing the body's potential and awakening the core energy of the nervous system.

PE 136. KICKBOXING 1 HR.

The general purpose of the course is to introduce the student to kickboxing in a safe and controlled environment.

PE 137. PILATES 1 HR.

The general purpose of this course is to introduce the student to basic principles of Pilates.

PE 138. OUTDOOR ADVENTURE 1 HR.

This course is designed to provide students with the basic skill and knowledge in outdoor adventure, which includes orienteering, mountain biking and canoeing.

PE 139. SPIN CYCLE 1 HR.

The objective of this class is to introduce the student to the basics of the exercise of spin cycle in a safe and controlled environment. Through spin cycle workouts the student will gain cardiovascular endurance through training in and around their aerobic/anaerobic thresholds.

PE 140. ELEMENTARY SWIMMING 1 HR.

A course which includes the knowledge and stroke skills of the beginner and advanced beginner levels of swimming of the American Red Cross.

PE 174. WEIGHT TRAINING 1 HR.

Class for students designed for developing and strengthening the muscular skeletal structure. Techniques and types of strength programs are covered.

PE 175. BICYCLING 1 HR.

Includes techniques of riding, bike safety, history, minor repairs, bike styles and touring information.

PE 179. SELF DEFENSE 1 HR.

Designed to teach basic self defense techniques and skills which enable a person to protect themselves in various environments.

PE 180. RACKETBALL 1 HR.

Designed to acquaint the student with skills, strategies and rules of racketball. Individual and doubles play is emphasized.

PE 181. RIVER CANOEING AND KAYAKING 1 HR.

This course is designed to develop students' skills and attitudes necessary for safe and enjoyable participation in the sport of canoeing and kayaking. Instruction includes classroom, pool, lake and river experience.

PE 182. SPORT PERFORMANCE—FLEXIBILITY AND DYNAMIC MOVEMENT 1 HR.

Students are taken through a step by step flexibility program designed to increase sport performance and prevent injury. Students will be required to design a flexibility program for their sport. Varsity athlete only.

PE 183. SPORT PERFORMANCE—POWER TRAINING FOR THE ELITE PERFORMER 1 HR.

This class will include advanced weightlifting exercises. Students will be instructed on Olympic style lifts and advanced periodization. Classes will focus on power development and functional strength improvement. Varsity athlete only.

PE 184. SPORT PERFORMANCE—SPEED, AGILITY, AND PLYOMETRIC TRAINING 1 HR.

This course is designed to prepare the performer for the stresses of elite competition. This course will offer the latest sports performance equipment available and examine the ways to insure the sport performer peaks at the right time, maximizes physical potential, and builds a stronger, more agile, explosive performer. Varsity athlete only.

PE 205. VARSITY SPORT 1 HR.

This course is designed for those students with above average skill who have a desire to become better acquainted with the fundamentals, strategies, and disciplines of playing intercollegiate sports. Varsity athletes only. Consent of instructor.

PE 210. VARSITY BASKETBALL 1 HR.

Designed for the highly skilled student who is interested in further development of skills and knowledge necessary to compete at the intercollegiate level. Varsity athlete only.

PE 213. VARSITY SOFTBALL 1 HR.

Designed for women undergraduate students possessing above average level of skill and interest in the game of softball. The course serves as the basis for selection of members of the intercollegiate women's softball team for competition. Varsity athlete only.

PE 214. VARSITY BASEBALL 1 HR.

Designed for the highly skilled student who is interested in further development of skills and knowledge necessary to compete at the intercollegiate level. Varsity athlete only.

PE 215. VARSITY FOOTBALL 1 HR.

Designed for those students with above average skill who have a desire to become better acquainted with the fundamentals, strategies, and disciplines of playing intercollegiate football. Varsity athlete only.

PE 216. VARSITY TRACK 1 HR.

Offered for the highly skilled athlete interested in competing and developing an understanding of the technical methods of training, meet preparation, and strategy in track and field. Varsity athlete only.

PE 217. VARSITY VOLLEYBALL 1 HR.

The course is designed to acquaint the student with advanced skills, team play, strategies and rules involved in volleyball; and to give experience in highly skilled intercollegiate competition. Varsity athlete only.

PE 218. VARSITY CROSS COUNTRY 1 HR.

A course for the highly skilled athlete which provides the different methods of training, strategy, and meet preparation of cross country running. Varsity athlete only.

PE 220. VARSITY SPIRIT CORP 1 HR.

This course is designed for those students who wish to train as varsity cheerleaders/yell leaders. Varsity athlete only.

PE 225. VARSITY GOLF 1 HR.

The course is designed for the accelerated golfer. An in-depth study of the rules and the positive approach to playing golf is discussed. Advanced instruction and interschool competition is provided. Varsity athlete only.

PE 227. INTERMEDIATE TENNIS 1 HR.

Designed to refine basic skills and to develop advanced skills (lob, chop, volley) and strategies of singles and doubles play.

PE 228. VARSITY TENNIS 1 HR.

(Prerequisite, consent of instructor.) This course is to provide students further learning experience for the development of skills, techniques and strategy for playing at the intercollegiate level. Varsity athlete only.

PE 229. VARSITY SOCCER 1 HR.

(Prerequisite, consent of instructor.) This course is designed for women undergraduate students to provide learning experiences for the development of skills, techniques, and strategy for playing soccer at the intercollegiate level. Varsity athlete only.

PE 230. INTERMEDIATE SOCIAL DANCE 1 HR.

The study of dance as in the elementary social dance class with an addition of technical skills and knowledge and with an emphasis on Latin styles.

PE 231. INTERMEDIATE FOLK & SQUARE DANCE 1 HR.

The study of dance as in the elementary class with additional dances, technical skills, knowledge and exhibition performance.

PE 233. INTERMEDIATE MODERN DANCE 1 HR.

The study of dance as in the elementary modern dance class with an addition of technical skills, creative ability and exhibition performance.

PE 234. ADVANCED MODERN DANCE 1 HR.

(Prerequisite, PE 233.) The study of modern dance as in the intermediate modern dance class with a higher degree of technical skills, creative ability and the choreography and performance of exhibition performance.

PE 242. INTERMEDIATE SWIMMING AND TECHNIQUES 1 HR.

This course is designed to acquaint the student with the skills in seven basic Red Cross swimming strokes and the techniques to teach these strokes.

PE 243. LIFEGUARD TRAINING 2 HRS.

This course will prepare individuals to assume more effectively the duties and responsibilities of lifeguards at swimming pools and at protected (non-surf) open water beaches. American Red Cross Emergency Water Safety and Lifeguard Training Certifications are issued upon successful completion of their requirements in this course.

PE 245. SYNCHRONIZED SWIMMING 1 HR.

Aquettes is a synchronized swimming group that offers the student the opportunity to develop expertise in advance swimming skills. The group prepares a show for the community.

PE 248. SKIN AND SCUBA DIVING 1 HR.

The study and practice of underwater diving with and without self contained breathing apparatus, including physics, physiology, ecology and safety related to diving.

PE 250. INTERMEDIATE GYMNASTICS 1 HR.

This course is designed to further develop skills, knowledge, fitness in all phases of gymnastics activities. Opportunity will be provided for creating individual routines.

PHYSICAL EDUCATION

PE 101. SEMINAR IN HPER 1 HR.

This course is intended to introduce the students to the HPER Department and its programs; give a glimpse into the professional opportunities afforded to those in the areas of Athletic Training, Health Promotion, Recreation, Health Education and Physical Education; discuss the differences between college and high school with respect to expectations, responsibilities and study skills; discuss personal, professional and social issues and goals relating to various career opportunities with HPER; cover the general expectations for the various degrees in regards to assessment checkpoints and accreditation procedures; explore personal degree plan profession, and provide interactions between those enrolled, upper-class majors and various faculty members.

PE 160. FOUNDATIONS OF PHYSICAL EDUCATION: FITNESS ACTIVITIES 1 HR.

This course is designed to provide the opportunity for HPER majors to learn the fundamentals of teaching fitness activities that exist in the public schools such as tumbling, weight training, aerobics, walking/jogging, etc.

PE 161. FOUNDATIONS OF PHYSICAL EDUCATION: FIELD SPORTS 1 HR.

This course is designed for the professional student in physical education or recreation to develop the basic skills used in a variety of field games (e.g. ultimate Frisbee, lacrosse, Omnikin ball, and soccer). Skills instruction and teaching methods are developed through a series of learning progressions.

PE 162. FOUNDATIONS OF PHYSICAL EDUCATION: INDIVIDUAL SPORTS 1 HR.

This course will cover several individual sport activities. The course is designed to provide physical education and recreation majors with the basic skills and knowledge necessary for walk/jog activities, bowling, golf, self-defense and fencing. Experiences and opportunities in this class are designed to assist students in building a foundation to becoming critical thinkers, creative planners and effective practitioners.

PE 163. FOUNDATIONS OF PHYSICAL EDUCATION: COURT SPORTS 1 HR.

This course is designed for the professional student in physical education or recreation to develop the basic skills in a variety of court sports and games. The activities that will be covered in this class include volleyball, team handball, basketball, tennis, and badminton. Skills instruction and teaching methods are developed through a series of learning progression.

PE 164. FOUNDATIONS OF PHYSICAL EDUCATION: OUTDOOR ACTIVITY 1 HR.

This course will cover outdoor pursuits and activities. This course is designed to provide the physical education and recreation major with the skills and knowledge necessary in several outdoor pursuits and the basic fundamentals of various outdoor activities. Specifically the course will develop the students' skills in orienteering, inline skating, mountain biking, canoeing, hiking and outdoor pursuits appropriate for schools and recreation centers.

PE 165. FOUNDATIONS OF PHYSICAL EDUCATION: DANCE 1 HR.

This course is designed to introduce the methods of presenting basic rhythms and dance forms to K-12 students. Topics include children's creative dance, rhythmic activities, line and social dance, and folk and square dance.

PE 166. FOUNDATIONS OF PHYSICAL EDUCATION: RACQUET SPORTS 1 HR.

This course will expose students to the activities of badminton and tennis and develop skill and teaching techniques for these activities. There will be a comprehensive written test given at the end of the course as well as competency based skill tests.

PE 167. FOUNDATIONS OF PHYSICAL EDUCATION: ACTIVITY TRENDS 2 HRS.

This course is designed for the professional student in physical education to develop the basic knowledge and skills in new activity trends for the physical education area. The activities that will be covered in this class include core training, rollerblading, lunni sticks, omnikin and koob. In addition, activities will change based on the trends in the field. Skills instruction and teaching methods are developed through a series of learning progressions.

PE 262. SPECIAL POPULATIONS IN HPER 2 HRS.

(Concurrent with PE264.) A study of common disabilities found across the lifespan. Discussions are held about the historical and philosophical basis for adapted physical activity, and the impact of state and federal legislation. Analysis of the roles and responsibilities of the educational/recreation professional and the inclusive educational environment also are examined.

PE 264. SPECIAL POPULATIONS LAB IN HPER 1 HR.

(Concurrent with PE262.) This course provides the opportunity to gain practical application with individuals in an adapted physical activity setting. Practical experience involves assessing and implementing individualized educational programs to meet the needs of the disabled population.

PE 266. TECHNOLOGY IN HEALTH, PHYSICAL EDUCATION AND RECREATION 3 HRS.

This course is designed to provide students with knowledge, skills, and tools to effectively implement technology in health, physical education and recreation. This course will cover computer technology as well as exercise and physical fitness assessment technology. Students will have the opportunity for practical applications of technological skills in health, physical education and recreation.

PE 268. INSTRUCTIONAL PRINCIPLES IN PHYSICAL EDUCATION 3 HRS.

This course is designed to provide students with general physical education principles and the application of these principles to movement skills; to introduce students to basic teaching strategies and techniques of movement skills; and to demonstrate how material from other courses can be integrated to enhance the teaching and learning process.

PE 271. INTRODUCTION TO ATHLETIC TRAINING 2 HRS.

(Concurrent w/ PE272) The course is designed to provide introductory information in athletic training aligned with current NATA Athletic Training Education Competencies. Concepts of professional development and responsibilities, risk management, pathology of sports injury, management skills, and general medical conditions will be presented. Students will experience practical application and testing of skills in the concurrent PE 272 Introduction to Athletic Training Lab.

PE 272. INTRODUCTION TO ATHLETIC TRAINING LAB 2 HRS.

(Concurrent w/ PE 271) In this class students will experience practical application of/information from PE 271 Introduction to Athletic Training. The course is designed to provide/information in athletic training aligned with the current NATA Athletic Training Education/Competencies. Basic concepts and skills for prevention, evaluation, first aid, therapeutic/treatment, and rehabilitation will be presented. The lab will provide time for students to/practice skills in class. Additionally, the program requires observation experience in the on campus athletic training clinics.

PE 273. ORGANIZATION AND ADMINISTRATION OF ATHLETIC TRAINING 3 HRS.
(Prerequisite, permission from Program Director.) The course is an introduction to administration and organization of athletic training. The course includes both the theoretical basis of management as well as administrative task, organizational task, and problem solving techniques. The intent of the course is to prepare prospective athletic trainers to effectively develop concepts of healthcare management as well as learn the values in healthcare administration consistent with the Code of Ethics of the National Athletic Trainers' Association and the Standards of Practice for Athletic Trainers.

PE 274. CLINICAL EDUCATION I 1 HR.
(Prerequisite: PE 272, and admission to the Athletic Training Program) Students are assessed for competency on acute care and immediate emergent management, emergency stabilization and transportation, wound care, and basic taping and wrapping techniques. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 150 clinical hours.

PE 275. CLINICAL EDUCATION II 1 HR.
(Prerequisites, PE 272 and PE 274.) Students are assessed for competency on environmental injury/illness, bracing, padding, anthropometric screening, and ambulatory aids. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 150 clinical hours.

PE 300. HISTORY OF PHYSICAL EDUCATION SPORT 1 HR.
This course is designed to explore the history and foundations of sport and physical education from ancient to current time. Philosophical issues as well as the relationship of sport and physical education with societal, political, and economic issues are examined.

PE 305. THEORY OF COACHING 3 HRS.
This course is designed to provide the basic knowledge, acquisition, and application of coaching philosophy, sport psychology, and teaching skills that influence coaching effectiveness in educational and recreational settings. Emphasis is placed on preparing coaches to train athletes to achieve optimal level of performance at various age and ability levels.

PE 320. PRINCIPLES OF STRENGTH AND CONDITIONING 2 HRS.
This course is designed to provide students with the theoretical and practical knowledge of the physiological, biomechanical and administrative aspects of designing and supervising safe and effective strength and conditioning programs for youth through adult populations.

PE 345. PREVENTION AND CARE OF ATHLETIC INJURIES 3 HRS.
Preventive measures, first aid, taping, bandaging, therapeutic care, and evaluation and rehabilitation used in alleviating conditions and injuries incurred in athletic participation.

PE 346. CLINICAL EDUCATION III 1 HR.
(Prerequisites, PE 273, PE 275, and PE 486.) Students will be assessed for competency on protective equipment, evaluation of lower body injuries, and injury record keeping. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 225 clinical hours.

PE 347. CLINICAL EDUCATION IV 1 HR.
(Prerequisites, PE 346, PE 482, and PE 485.) Students will be assessed for competency on fitness and therapeutic program design and instruction, evaluation of upper body injuries and psychosocial intervention. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 225 clinical hours.

PE 350. FUNDAMENTALS & COACHING OF BASEBALL 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skills unique to baseball. Additional emphasis is given to the study of coaching theories and techniques.

PE 351. FUNDAMENTALS & COACHING OF BASKETBALL 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skill unique to basketball. Additional emphasis is given to the study of coaching theories and techniques.

PE 352. FUNDAMENTALS & COACHING OF FOOTBALL 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skill unique to football. Additional emphasis is given to the study of coaching theories and techniques.

PE 354. FUNDAMENTALS & COACHING OF TRACK & FIELD 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skill unique to track and field. Additional emphasis is given to the study of coaching theories and techniques.

PE 355. FUNDAMENTALS & COACHING OF VOLLEYBALL 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skill unique to volleyball. Additional emphasis is given to the study of coaching theories and techniques.

PE 356. FUNDAMENTALS OF COACHING SOFTBALL 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skill unique to softball. Additional emphasis is given to the study of coaching theory and techniques.

PE 357. FUNDAMENTALS AND COACHING OF SOCCER 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skills unique to soccer. Additional emphasis is given to the study of coaching theories and techniques.

PE 358. FUNDAMENTALS AND COACHING OF TENNIS/GOLF 3 HRS.
Course is designed to provide students interested in coaching, experience which will allow them to develop an understanding of and basic fundamental skills unique to tennis/golf. Additional emphasis is given to the study of coaching theories and techniques.

PE 360. PHYSIOLOGY OF EXERCISE 3 HRS.
(Prerequisite, ZO 200.) The purpose of this course is to provide future HPER professionals with opportunities to develop basic knowledge and skills pertaining to adaptations made by the human body during exercise. Specific topics will include physical fitness and basic training principles, muscular and neurological control of movement, cardiorespiratory adaptations, nutrition and environmental influences as well as others. Students will participate in and conduct physical fitness assessments, write an exercise prescription and complete lab assignments related to course topics.

PE 361. MOTOR BEHAVIOR 2 HRS.

A critical examination of some concepts of human skill performance and learning and an application of those concepts to teaching and coaching.

PE 362. KINESIOLOGY 3 HRS.

(Prerequisite, ZO 200.) This course is designed to introduce the student to movement concepts as applied to various sports activities. Laws of motion, principles of force, equilibrium concepts, and laws governing projectiles will be introduced and applied. The student will develop the ability to analyze skill movements in specific sport activities. The anatomy and function of the musculoskeletal system and the concept of levers will be reviewed.

PE 365. GAMES, RHYTHMS, AND ACTIVITIES FOR ELEMENTARY PHYSICAL EDUCATION 2 HRS.

Designed to meet the needs of physical education teachers in the elementary grades. Emphasis is placed on teaching styles, organizational movement activities and program evaluation.

PE 374. WATER SAFETY INSTRUCTOR 2 HRS.

(Permission of instructor.) The Water Safety Instructor course is directly concerned with giving candidates theoretical and practical knowledge, and assistance in the teaching of the American Red Cross Water Safety course. It is possible to receive Red Cross Water Safety Instructor (WSI) certification upon successful completion of course requirements.

PE 375. DANCE COMPOSITION 2 HRS.

A theory and practical study of modern dance as an art form including movement technique, the use of space and rhythm, stimulus for composition, accompaniment and program planning.

PE 378. FIELD EXPERIENCES 1-2 HRS.

Designed to provide opportunities for the student to gain experience in observing and teaching under the supervision of a master teacher or leader.

PE 381. ELEMENTARY SCHOOL HEALTH & PHYSICAL EDUCATION FOR THE CLASSROOM TEACHER 2 HRS.

Methods and materials for directing health and physical education activity programs for the elementary school child. The course is designed for students who are candidates for elementary classroom teaching certification.

PE 400. MEASUREMENT & EVALUATION 3 HRS.

This course is designed to aid students in gaining knowledge about and skills in measurement processes and techniques, particularly as they relate to physical education. Experiences will be provided for learning about and practicing proper test selection, proper test administration, and appropriate use of test results. The course will include also experiences with basic statistics and computers, technology integration with assessments, and an introduction to evaluation and grading.

PE 420. PSYCHOLOGY OF SPORT 2 HRS.

The purpose of this course is to give the beginning coach an overview of how psychology ties into the art of successful coaching. Special attention is given to motivation styles, techniques, and uses.

PE 460. ORGANIZATION AND ADMINISTRATION OF HPER 2 HRS.

Course is designed to identify, observe, study and discuss techniques and functions of program administration in elementary and secondary schools. Includes coordinating, planning, organizing, staffing, scheduling and budgeting as related to health, physical education, recreation and athletic programs.

PE 471. INDEPENDENT STUDY 1-3 HRS.

A supervised survey and review of literature on a problem in the field. Written report with documentation is required.

PE 480. CURRICULUM AND TEACHING METHODS IN ELEMENTARY PHYSICAL EDUCATION 3 HRS.

Designed to present the total curriculum in physical education at the elementary school level with emphasis on special experiences with children at the Preschool-Grade 6 levels in various curricular areas of activity. Experiences in this course will enable students to become more proficient in the knowledge and skills needed to be critical thinkers, creative planners and effective practitioners in the area of elementary physical education.

PE 481. THERAPEUTIC MODALITY USAGE IN ATHLETIC TRAINING 3 HRS.

(Prerequisites, ZO 362.) The purpose of this course is to provide students with knowledge of the theory and skills for application of the therapeutic modalities for physical injuries. Understanding of the appropriate reasons for modality usage, guidelines for proper application, and individualization will be trained and tested through curriculum and application of the NATA Athletic Training Education Competencies.

PE 482. REHABILITATION OF ATHLETIC INJURIES 3 HRS.

(Prerequisites, ZO 362, ZO 363, and permission from Program Director) The purpose of this course is to provide students with knowledge and skills to create, implement, and progress rehabilitation programs for physical injuries. Understanding of the appropriate rehabilitation process, guidelines for progression, and individualization will be trained and tested through curriculum and application of the NATA Athletic Training Education Competencies.

PE 483. CLINICAL EDUCATION V 1 HR.

(Prerequisites, PE 347, PE 481, and PE 486.) Students will be assessed for competency on therapeutic modalities, postural and gait analysis (lower body), and evaluation of lower body injuries. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 225 clinical hours.

PE 484. CLINICAL EDUCATION VI 1 HR.

(Prerequisites, PE 483, PE 485 and PE 517.) Students will be assessed for competency on general medical assessment, postural analysis (upper body), and evaluation of upper body injuries. Each student will be assigned to clinical education rotations under the direct supervision of a Preceptor. Students must complete a minimum of 225 clinical hours.

PE 485. ASSESSMENT OF PHYSICAL INJURIES—UPPER BODY 3 HRS.

(Prerequisites, ZO 362, ZO 363, and Permission from Program Director.) This course provides the student with information and basic skills used to evaluate physical injuries and special problems of the upper body. Students will acquire a basic understanding and skills in palpation methods, neurological and special tests. They will also learn pathological and etiological information for a variety of injuries relating to the upper body. Students will also have an opportunity for out of class experiences with medical professionals and surgical observations.

PE 486. ASSESSMENT OF PHYSICAL INJURIES—LOWER BODY 3 HRS.

(Prerequisites: ZO 362, ZO 363, Permission from Program Director.) This course provides the student with information and basic skills used to evaluate physical injuries and special problems of the lower body. Students will acquire a basic understanding and skills in palpation methods, neurological and special tests. They will also learn pathological and etiological information for a variety of injuries relating to the lower body. Students will also have an opportunity for out of class experiences with medical professionals and surgical observations.

PE 487. ATHLETIC TRAINING CERTIFICATION**PREPARATION****1 HR.**

(Prerequisite: permission of instructor). This course is a supervised review of the athletic training curriculum. This course prepares students in their final year of the Athletic Training Program for the Board of Certification examination. Students will learn how register for the national exam, complete readings, take written practice test-lets and complete computer-based quizzes and exams.

PE 490. SPECIAL TOPICS IN HPER**1-3 HRS.**

The purpose of this course is to allow the department to provide students the opportunity to study various special and current topics that cannot be presented in other formal classes. In addition, it will provide the vehicle for offering and listing new/experimental courses within the Department of HPER.

PE 517. MEDICAL ISSUES IN ATHLETIC TRAINING 3 HRS.

(Prerequisite, admission into the Athletic Training Education Program or permission of Program Director.) This course will cover current and special topics in Sports Medicine as well as recognition, evaluation, management, and prevention of the most common non-orthopedic medical conditions that affect athletic participation.

PE 540. COACHING EDUCATION PRACTICUM 2 HRS.

The coaching education practicum is designed to prepare the coaching education professional by providing an opportunity for the student to obtain a practical experience within a public school setting. The student will work under the supervision of a coach in a middle/high school or college setting.

PE 570. TEACHING METHODS IN MIDDLE/**SECONDARY PHYSICAL EDUCATION****5 HRS.**

(Prerequisites, PE262/264, PE268, PE365, PE400 or permission of instructor.) Study, demonstration and exploration of methods and techniques of presenting sports, games, and dance skills to middle and secondary level students. Curriculum design and development, as well as techniques for organizing groups will be included. Laboratory experiences are included. Not for graduate credit.

PE 700. CURRENT DEVELOPMENTS IN PHYSICAL**EDUCATION****1-4 HRS.**

(Prerequisite, permission of instructor). Designed to provide an opportunity for performance analysis, direct discussion and observation of new trends, methods, and techniques in physical education.

PE 701. SPECIAL WORKSHOPS IN PHYSICAL**EDUCATION****1-2 HRS.**

This course offers the opportunity to students to experience a variety of intensive courses concerned with physical education topics.

PE 707. APPLIED PSYCHOLOGY OF HEALTH,**SPORT AND MOVEMENT****3 HRS.**

This course is designed to study the psychological aspects of exercise behavior and sport/athletic participation. Specifically, the areas of motivation, stress, peak performance, group dynamics, and psychophysiological changes in exercise and sport will be examined.

PE 710. SEMINAR IN ATHLETICS**1-3 HRS.**

A critical analysis and study of selected problems, trends, techniques or issues in athletics. Utilizes individual and group discussions, resource persons and review of literature.

PE 712. SPORT AND PERFORMANCE PSYCHOLOGY 3 HRS.

This course is designed to study sport psychology and will focus on athletes as well as other performance domains under practice and competitive conditions. The emphasis of the course will be developing

mental skills through mental drills on achieving the proper arousal zone, goals, positive self-talk, imagery, and focus. An additional emphasis will be placed on the practical application of mental skills to develop mental plans to promote a flow mindset.

PE 715. HISTORY OF SPORT AND POLITICS 3 HRS.

This course is a study into the aspects in which politics have historically influenced sports. Examination of this political influence as it relates to such topics as race, gender, human rights, economics, media, and the Olympics will occur.

PE 720. ASSESSMENT STRATEGIES FOR K-12**PHYSICAL EDUCATION****3 HRS.**

This course provides practicing physical educators with the tools to develop and utilize assessments strategies for the improvement of student learning.

PE 725. THE ART AND SCIENCE OF COACHING 3 HRS.

This course is designed to enhance coaching effectiveness through an applied approach. Various coaching methods and training techniques will be examined with regards to the NASPE National Standards for Sport Coaches. Attention will be given to developing a periodized training program specific to a sport of interest to the student.

PE 738. ADVANCED TECHNOLOGY IN HPER 3 HRS.

This course is designed to provide students with knowledge, skills, and tools to effectively implement technology in health, sport, and recreation. This course will include computer basics, using general productivity software for physical education tasks, physical education specific software programs, and exercise equipment technology.

PE 740. LEGAL ISSUES IN HPER 3 HRS.

This course is designed to expand, deepen, and enhance one's knowledge and comprehension of the law and its legal and ethical implications on professionals in physical education, wellness, fitness, and leisure. It includes, but is not limited to a review and examination of legal terminology, concepts, negligence and practices as they relate to such issues as programming, personnel, participants, spectators, facilities, equipment, accessibility, culture, environment, and risk management.

PE 745. LEADERSHIP IN HPER 3 HRS.

This course is designed to expand, deepen, and enhance one's knowledge and comprehension of the science and art of leadership principles, theories, characteristics, styles, values, skill application, effectiveness, and assessment. Leadership will be considered and probed as it applies to individuals, groups, and organizations. This course has a strong wellness, physical education, and sport and fitness orientation.

PE 762. ANALYSIS OF TEACHING/COACHING 3 HRS.

This course is designed to provide the students with the knowledge, skills and tools to effectively evaluate the teaching/learning process in physical education and coaching. Specifically, the course will examine the need for and process of systematic observation and analysis of instruction.

PE 768. ADVANCED EXERCISE PHYSIOLOGY 3 HRS.

The purpose of this course is to provide coaches, physical educators, and others who are concerned with the human body's response to exercise with experiences and opportunities to gain advanced knowledge of selected physiological principles.

PE 801. DIRECTED READINGS 3 HRS.

This course is designed to develop basic research and writing skills in order for the student to pursue independent research. Students in this course will develop the proposal and review of literature for their research project or thesis.

PE 803. MOTOR BEHAVIOR 3 HRS.

This course is designed to help students gain knowledge of how humans acquire motor skills. Current theory will be examined and factors that affect the speed and quality of learning including practice and feedback will be considered. Students will explore practical applications in terms of teaching and coaching.

PE 804. BIOMECHANICS 3 HRS.

This course is designed to help students gain knowledge about the physics of human movement in the context of sports skills. Information on how the nervous system controls the musculoskeletal system to create movements will be addressed.

PE 835. TEACHING HEALTH AND PHYSICAL EDUCATION ONLINE 3 HRS.

This course is designed to develop, analyze, and evaluate the technology, methods and approaches to teach health and physical education online. The students will explore best practices related to online instruction generally and, specifically to health and physical education. Emphasis is placed on the development of health and physical education content instructional strategies to teach PreK-12 online.

PE 840. EXERCISE METABOLISM 3 HRS.

This course will provide students with the principles of biochemistry and metabolism as they pertain to the production and utilization of energy in the human. Attention will be given to acute metabolic responses during exercise and chronic adaptations due to exercise training. In addition, the metabolic adaptations of skeletal muscle contractile function due to training will be discussed.

PE 858. ETHICS IN HPER AND SPORT 3 HRS.

This course is designed to develop and promote critical thinking and decision making skills through the examination of moral values and principles, ethical decision-making, diversity awareness, and accepted social behavior related to HPER and sport.

PE 859. ISSUES AND TRENDS IN HEALTH, SPORTS, AND MOVEMENT SCIENCE 3 HRS.

Identification and analysis of current issues and trends as presented in professional publications and research and related to the fields of health, sport, and physical education. Emphasis is placed on problem solving situations, debating issues, and writing and defending topic viewpoints.

PE 860. SEMINAR IN PHYSICAL EDUCATION 2 HRS.

A critical analysis and study of selected problems, trends, or issues in the area of physical education. Utilizes individual and group discussions, resource persons and review of literature.

PE 861. SUPERVISION OF HEALTH AND PHYSICAL EDUCATION 2 HRS.

A study of the techniques and problems of supervision in health, physical education and athletics in elementary and secondary schools, teacher education programs and in various community organizations. Special emphasis is given to in-service education, program evaluation and improvement, equipment and facility needs, co-curriculum working with administrators and public relations.

PE 862. INSTRUCTIONAL INNOVATIONS IN PHYSICAL EDUCATION 3 HRS.

Examination and discussion of physical education curriculum, as well as innovations in teaching methods/strategies for physical education programs.

PE 864. SOCIOLOGY OF SPORT 3 HRS.

This course is designed to study the impact of society on contemporary sport. Specifically, the course identifies issues and controversies associated with sport and challenges critical and practical examination of current sport concerns and trends.

PE 865. STATISTICS IN HPER 3 HRS.

This course is designed to provide a basic understanding of statistics to graduate students in HPER. This includes how to design an experiment and to analyze and interpret the data. This should help HPER professionals be more effective regarding assessment in HPER.

PE 868. RESEARCH IN HPER 3 HRS.

This course is designed to allow the graduate student to pursue a well-defined research interest in an HPER or sport discipline. This course is considered the capstone course of the master's degree program.

PE 869. THESIS 1-5 HRS.

(Prerequisite, PE 801.) For masters degree in HPER. An independent research project designed in consultation with and approved by a graduate faculty advisor. The study to investigate a specific problem culminating in a bound paper and oral presentation, both of which demonstrate the student's ability to conduct creative and productive research.

PHYSICS**PH 100. ORIENTATION TO PHYSICS 3 HRS.**

An exposure to the field of physics, including tools and strategies for the study of physics, e.g., problem solving, scientific method, estimation, graphing, SI units and computer applications. Discussion of the various fields, degree options, and career opportunities in physics. Intended as a first-year experience course.

PH 110. INTRODUCTION TO SPACE SCIENCE † 4 HRS.

(Corequisite, PH111.) A general education course which uses a historical and philosophical perspective when appropriate, and basic principles from the physical sciences to consider the solar system and star-like objects. Emphasis is placed on the nature of science, findings from space exploration, and the evidence for what we know about the universe and Earth's place in the universe. The planetarium and observing sessions with telescopes are integral parts of the course.

PH 111. INTRODUCTION TO SPACE SCIENCE LAB † 1 HR.

(Corequisite, PH110.) A general education laboratory course which accompanies PH110. The two-hour weekly laboratory is closely correlated with the PH110 lecture. The planetarium and observing sessions with telescopes are integral course aids.

PH 140. COLLEGE PHYSICS I † 3 HRS.

(Corequisite, PH141.) General principles of kinematics, Newtonian mechanics and heat, with emphasis on force and energy. H.S. algebra and elementary trigonometry are assumed.

PH 141. COLLEGE PHYSICS I LAB † 1-2 HRS.

(Corequisite, PH140.) Laboratory to accompany PH140.

PH 190. PHYSICS I † 3 HRS.

(Prerequisite, MA161 or concurrent enrollment. Corequisites, PH191 and PH192.) A calculus-based course designed for physics majors, some chemistry majors and engineering students. Topics include kinematics, Newtonian mechanics, energy, thermodynamics, vibrations and waves.

PH 191. PHYSICS I LAB † 1 HR.

(Corequisite, PH190 and PH192.) Laboratory to accompany PH190.

PH 192. PHYSICS I RECITATION † 1 HR.

(Corequisites, PH190 and PH191.) Recitation class to accompany PH190.

PH 310. ENGINEERING MATERIALS 2 HRS.
(Prerequisites (or concurrent enrollment), CH123 and PH393.) Engineering requirements of materials; arrangements of atoms in materials; metallic and ceramic phases and their properties; polymers; multiphase equilibrium and nonequilibrium relationships; modification of properties through changes in microstructure; thermal behavior; corrosion; effect of radiation on materials.

PH 315. STATICS 3 HRS.
(Prerequisite: MA262 (or concurrent enrollment), PH140 or PH190.) Analysis of the forces acting on point masses and rigid bodies in static equilibrium. Primarily for pre-engineering and dual-degree engineering students.

PH 316. DYNAMICS 3 HRS.
(Prerequisite, PH190, PH315, and MA262.) Application of Newton's laws to the motion of objects. Motion in one, two, and three dimensions, energy, and momentum. Primarily for pre engineering and dual-degree engineering students.

PH 343. COLLEGE PHYSICS II † 3 HRS.
(Prerequisite, PH140. Corequisite, PH344.) General principles of vibrations and waves, electricity, magnetism and light.

PH 344. COLLEGE PHYSICS II LAB † 1-2 HRS.
(Corequisite, PH343.) Laboratory to accompany PH343.

PH 393. PHYSICS II † 3 HRS.
(Prerequisites, MA262 (or concurrent enrollment), PH190. Corequisites, PH394 and PH395.) A calculus-based continuation of PH190. Topics include electricity, magnetism and light.

PH 394. PHYSICS II LAB † 1 HR.
(Corequisites, PH393 and PH395.) Laboratory to Accompany PH393.

PH 395. PHYSICS II RECITATION † 1 HR.
(Corequisites, PH393 and PH394.) Recitation class to accompany PH393.

PH 410. ELECTRICAL CIRCUIT ANALYSIS 3 HRS.
(Prerequisites, MA335 (or concurrent enrollment) and PH393.) Analysis of linear circuits containing resistors, capacitors, and inductors. Topics include elementary circuits and circuit theorems, sinusoidal excitations, complex numbers and phasor analysis, energy and power, and polyphase circuits.

PH 411. ELECTRICAL CIRCUIT LABORATORY 1 HR.
(Corequisite, PH410.) Laboratory experiments in circuit analysis, including basic V-I measurements, laboratory instruments, power supplies, operational amplifiers, filters, wave shaping circuits, and oscillators.

PH 430. COMPUTER INTERFACING IN SCIENCE 3 HRS.
A lecture laboratory course in which students interface the microcomputer to several common laboratory instruments for the purpose of acquiring and analyzing data, and for controlling experiments. A basic familiarity with computer programming and a significant background in one of the natural sciences (physics, chemistry, earth science, geology, or biology) is assumed. Permission of instructor is required to enroll.

PH 450. INTERDISCIPLINARY SCIENCES: PHYSICS 3 HRS.
(Prerequisites: GB100, MA110 and PH140 or equivalents.) An interdisciplinary project-based course for majors or those with teaching fields in the biological, mathematical or physical sciences. Introduction to the use of digital-imaging technology for data collection and analysis.

Application of mathematics and physical sciences to investigations of biological phenomena. Course focus is on the design and implementation of a semester-long, student-directed scientific investigation.

PH 490. INDEPENDENT STUDY 1-3 HRS.
Investigative research by undergraduate students under the guidance of a faculty mentor. The investigation and resulting report are primarily the responsibility of the student. Permission of instructor required to enroll.

PH 500. TOPICS IN PHYSICS (*) 1-5 HRS.
Study of specialized topics in physics. *The blank will be filled with an appropriate short description on the student's transcript to indicate the topical area studied. Permission of instructor required to enroll.

PH 510. COMPUTER APPLICATIONS IN PHYSICS 3 HRS.
(Prerequisites, PH343 or PH393.) Computer solutions of physics problems using spreadsheets, computational modeling software and programming languages. A basic familiarity with computer applications and programming is assumed.

PH 520. LIGHT 3 HRS.
(Prerequisites, PH343 or PH393.) An introductory course in geometrical optics, physical optics and photonics. Properties of lenses and simple optical instruments, phenomena of interference, diffraction and polarization, electromagnetic waves and photons.

PH 530. HEAT AND THERMODYNAMICS 3 HRS.
(Prerequisites, PH393 and MA262.) Fundamental ideas of temperature, work, internal energy, heat, reversibility, entropy, and other thermodynamic functions. Application of the laws of thermodynamics to physical systems and engineering problems. An introduction to statistical mechanics.

PH 540. MODERN PHYSICS 3 HRS.
(Prerequisites, PH343 or PH393 and MA161 or MA165.) Theories involved in advances in physics since 1900. Includes: atomic structure, relativity, wave mechanics, radioactivity and nuclear physics.

PH 541. ATOMIC AND NUCLEAR PHYSICS I 3 HRS.
(Prerequisite, PH393.) The development of the concept of the atom is presented followed by a study of electrons and electromagnetic radiation which then leads to the atomic models proposed by Rutherford and Bohr. Special relativity is discussed in preparation for the study of X-rays and further topics in nuclear physics.

PH 547. ANALOG ELECTRONICS 3 HRS.
(Prerequisites, PH343 or PH393. Corequisite, PH548) The basic physics of the P-N junction and its implementation in diodes and transistors is covered. Design work with diodes, transistors, and analog integrated circuits is stressed, along with the use of analog integrated circuits in instruments, power supplies, and computer interfaces.

PH 548. ANALOG ELECTRONICS LABORATORY 2 HRS.
(Corequisite, PH547.) Laboratory to accompany PH547.

PH 550. DIGITAL ELECTRONICS 3 HRS.
(Prerequisite, PH343 or PH393. Corequisite, PH551) After a review of AC and DC circuits, the course covers digital integrated circuits and their use in instrumentation and computer circuits and systems. The TTL and CMOS logic gates are covered in detail. MOS devices such as microprocessors, RAM and ROM memories, FIFO buffers, etc., are introduced. Digital computer circuits, codes, and interfacing are stressed.

PH 551. DIGITAL ELECTRONICS LABORATORY 1-2 HRS.
(Corequisite, PH550.) Laboratory to accompany PH550.

PH 635. INTERMEDIATE PHYSICS 3 HRS.
(Prerequisite, PH343 or PH393.) Topics include mechanics, wave motion, heat and thermodynamics, electricity and magnetism, and light. The course is intended to serve as a review of physics for students who require additional study of basic concepts before continuing into advanced courses.

PH 700. TOPICS IN PHYSICS (*) 1-5 HRS.
Study of specialized topics in physics. *The blank will be filled with an appropriate short description on the student's transcript to indicate the topical area studied. Permission of instructor required to enroll.

PH 730. SEMINAR IN PHYSICS 0-2 HRS.
(Prerequisite, consent of instructor.) Reports by students, staff and visitors are presented on topics of current or historical interest in physics. Graduate students, in particular, have the experience of developing effective presentations.

PH 741. ADVANCED PHYSICS LABORATORY I 3 HRS.
(Prerequisite, PH343 or PH393.) Classical and modern physics experiments on fundamental constants of nature, X-rays, radioactivity, etc.

PH 742. ADVANCED PHYSICS LABORATORY II 3 HRS.
(Prerequisite, MA262 (or concurrent enrollment) and PH741.) An advanced laboratory course emphasizing measurement techniques in areas such as light, microwaves, photonics, and condensed matter.

PH 745. NUCLEAR TECHNIQUES 4 HRS.
(Prerequisites: PH393 or PH343 and CH126.) Nuclear laboratory experiments on detection and measurement of radioactive isotopes using Geiger counters, ionization chambers, and scintillation detectors. Experience with multichannel analyzer instrumentation, shielding, and monitoring equipment.

PH 752. ATOMIC AND NUCLEAR PHYSICS II 3 HRS.
(Prerequisite, PH541 or PH540.) The study of X-rays serves as the starting point for developing the concept of nuclear properties. The masses, sizes and radiations of nuclei are studied and then models of nuclei are considered in light of these properties. Elementary particles are also introduced.

PH 760. MECHANICS I 3 HRS.
(Prerequisites, PH393 and MA262.) The application of Newton's laws to mass points, system of particles, and rigid bodies. Motion in one, two, and three dimensions is included.

PH 761. MECHANICS II 3 HRS.
(Prerequisites, PH760 and MA363.) Newtonian mechanics as formulated by Lagrange is developed, followed by applying elementary tensor theory to the rotation of rigid bodies. The study of small vibrations of systems of particles concludes the course.

PH 762. ELECTRICITY AND MAGNETISM I 3 HRS.
(Prerequisites, MA363 (or concurrent enrollment) and PH393.) A study of electrostatics, electrical properties of matter and potential theory.

PH 763. ELECTRICITY AND MAGNETISM II 3 HRS.
(Prerequisite, PH762.) A study of the magnetic field, electromagnetic induction, magnetic properties of matter, alternating current circuits, and Maxwell's equations.

PH 770. RESEARCH PROBLEM IN PHYSICS 1-3 HRS.
Investigative research by graduate students under the guidance of a faculty mentor. The investigation and any formal reporting are primarily the responsibility of the student. Permission of instructor required to enroll.

PH 775. MICROCOMPUTER SYSTEMS 3 HRS.
(Prerequisite, PH550 or consent of instructor.) This course discusses microcomputers on the systems level. Detailed attention to the electronics which comprise the system will be limited to general familiarization for the student. The criteria for and design of microcomputer systems to accomplish educational, laboratory, or control and monitoring objectives are covered. The emphasis is on the integration of hardware, firmware, and software into a well balanced, easily expandable system which takes advantage of state-of-the-art capabilities of system hardware and software components.

PH 780. INTRODUCTION TO SOLID STATE 3 HRS.
(Prerequisite, MA161, PH540 or PH541 or consent of instructor.) A course designed to introduce students to basic concepts in solid state. Topics to be considered include crystalline state, specific heats and lattice vibrations, dielectric and optical properties, conductivity, ferroelectrics, bond theory of solids, semiconductors, transistors, diamagnetism, paramagnetism, ferromagnetism, and resonance phenomena.

PH 785. NUCLEAR PHYSICS 3 HRS.
(Prerequisite, PH541 or PH540.) Primarily designed for students not planning on physics as a profession, and as a background course for the secondary science teacher, this course deals with modern concepts of the nucleus and the role of nuclear physics today.

PH 790. THEORETICAL PHYSICS 3 HRS.
(Prerequisites, PH760 and MA335.) Various mathematical tools in physics are studied. Infinite series, Fourier series and integrals, partial differential equations, complex functions, and special functions are included. Emphasis is on the application of these ideas in physical theories.

PH 795. INTRODUCTION TO QUANTUM MECHANICS 3 HRS.
(Prerequisites, PH540 or PH541, and MA335.) The fundamental concepts of quantum mechanics are developed and applied to problems. The solution of Schrodinger's equation in one-dimensional scattering and bound-state problems, and in a central potential.

PH 801. TRENDS IN HIGH SCHOOL PHYSICS CONCEPTS 3 HRS.
Designed for in service physical science teachers. A laboratory oriented course stressing an understanding of the philosophies and concepts in new curricula and materials for physics teaching. Permission of instructor required to enroll.

PH 802. MODERN DEVELOPMENTS IN PHYSICS 3 HRS.
Designed for in service physical science teachers. A study of recent advances in physics. Permission of instructor required to enroll.

PH 810. PLASMA PHYSICS 3 HRS.
(Prerequisites, PH763, PH530 and PH761, or consent of instructor.) The properties of very hot ionized gases are described as they apply to nuclear fusion energy, gaseous electronics, and space physics.

PH 820. ASTROPHYSICS 3 HRS.
(Prerequisites, PH761, PH763, and MA335.) Study of the physics of the sun, planets, stars and galaxies. This includes the study of the motion of planets, the stellar atmosphere and interior, the evolution of stars and cosmology.

PH 840. MATHEMATICAL PHYSICS 3 HRS.
(Prerequisite, PH760.) Advanced applications of mathematical techniques in physics are considered for graduate students.

PH 845. TOPICS IN PHYSICS (*) 1-3 HRS.
(Prerequisite, consent of instructor.) Study of specialized topics in physics is done at the graduate level. The topic is chosen by the student and the instructor. *The blank will be filled with an appropriate short description on the student's transcript to indicate the subject area studied.

PH 860. GRADUATE RESEARCH 1-5 HRS.
Investigative research by graduate students under the guidance of a faculty mentor. Primarily intended for graduate students pursuing the research report degree option or needing additional research for the thesis degree option. Permission of instructor required to enroll.

PH 890. THESIS M.S. 1-5 HRS.
Investigative research, and preparation and defense of a thesis by graduate students under the guidance of a faculty mentor. Required for graduate students pursuing the thesis degree option. Permission of instructor required to enroll.

PHILOSOPHY

PI 225. INTRODUCTION TO PHILOSOPHY † 2-3 HRS.
A survey of the general issues, questions, and problems in philosophy.

PI 300. INTRODUCTION TO THE PHILOSOPHY OF SCIENCE 2-3 HRS.
Designed to provide a general introduction to the key issues in the philosophy of science. The course may be sub-titled to reflect a particular area of concentration.

PI 301. ETHICS † 3 HRS.
Why do people do good things? Does ethics depend on religion? We will examine these and similar questions in order to illuminate some of the central approaches to moral problems taken by leading philosophers from around the world. The course will challenge students to develop their ethical reasoning skills so that they may enhance their capabilities for ethical decision making.

PI 302. BASIC LOGIC † 3 HRS.
How do people try to fool us? What structures are hidden in everyday languages? This course will enable students to recognize and apply logical tools in order to distinguish between good and bad arguments. Formal and informal techniques of evaluating arguments will be introduced. Related topics may include mass media, science, and politics.

PI 310. PHILOSOPHY OF ART AND BEAUTY 3 HRS.
People often disagree about what makes a painting good, a person beautiful, or a song moving. To complicate matters further, the artist presents us with odd and confusing objects. How can we understand what makes them artworks in the first place? Can people agree about effective art? Should they? This course will explore classic and contemporary attempts to answer these and related questions.

PI 315. ENVIRONMENTAL ETHICS 3 HRS.
Do human beings have moral obligations to the natural world? This course explores questions concerning the ethical relations of humans to the natural environment. Topics include Western and non-Western conceptions of nature and the application of various ethical theories and concepts to environmental concerns. Students will explore the role of religious, scientific, technological, economic, and political considerations in developing environmental policy, and will examine different social perspectives on the environment.

PI 320. PHILOSOPHY OF HUMAN NATURE 3 HRS.
Who and what are human beings? Why are we the way we are? This course is a survey and examination of the most influential ideas and philosophical theories on human nature. The course covers conceptions of human nature articulated by ancient, modern and contemporary philosophers. Approaches considered will include religious and naturalistic conceptions of human nature as well.

PI 325. SOCIAL AND POLITICAL PHILOSOPHY 3 HRS.
The purpose of the course is to introduce the student to the methods of philosophy through the study of key concepts and positions in social and political philosophy. These methods include close textual reading, critical analysis, imaginative variation, and the construction of arguments and counter-arguments. Both historical and contemporary approaches to social and political philosophy will be emphasized.

PI 335. EASTERN THOUGHT: HINDUISM TO ZEN 3 HRS.
A survey and critical examination of the major religious and philosophical movements of India, China, and Japan, including Hinduism, Daoism, Confucianism, and Buddhism. Topics include the relation between Eastern and Western thought, the nature of ultimate reality and the self, the path to enlightenment, and the right way to live.

PI 369. WORLD RELIGIONS † 3 HRS.
This course introduces the main institutions, central beliefs, and practices of some of the world's major religions. Each tradition is presented in social and historical context, and students will examine the similarities and differences among religions. The course is meant to provide a foundation to further understanding and learning about the world's religions; it will therefore provide a critical yet sympathetic view of a wide range of religious traditions.

PI 370. ANCIENT PHILOSOPHY 3 HRS.
A brief examination of Pre-Socratic philosophy focusing upon the origin of western philosophy and the emergence of the scientific attitude. The major systems of Plato and Aristotle will be examined in greater detail.

PI 373. MODERN PHILOSOPHY 3 HRS.
(Prerequisite, one prior course in philosophy is recommended but not required.) An examination of the development of modern philosophy. Special attention is given to Descartes, Leibniz, Locke, Hume, and Kant.

PI 375. CONTEMPORARY PHILOSOPHY 3 HRS.
(Prerequisite, one course in philosophy or permission of instructor.) This course is organized around some dominant theme which is reflected in its sub-title.

PI 395. WESTERN RELIGIOUS PHILOSOPHY 2-3 HRS.
An examination of the basic ideas associated with the Judeo-Christian religious and philosophical traditions.

PI 400. DEVELOPMENT OF POLITICAL PHILOSOPHY 3 HRS.
A study of political philosophy from ancient times through the eighteenth century with particular attention to those philosophers who were sources of major elements of Western political culture.

PI 412. THEORY OF KNOWLEDGE 3 HRS.
A course designed to introduce the varied attempts philosophers have made to give an account of how man knows what they know, with attention focused upon the theories of Idealism, Realism, Phenomenalism, and Phenomenology.

PI 413. EXISTENTIAL PHILOSOPHY 1-3 HRS.
A depth study in the philosophy of existentialism concerning Kierkegaard, Sartre, Tillich, Camus, and others.

PI 498. INDEPENDENT STUDY IN PHILOSOPHY 1-3 HRS.
(Prerequisites, six hours of philosophy. Does not answer general education requirements.) Special project or readings on a topic initiated by the student and approved by the instructor. Consent of instructor required.

PI 500. TOPICS IN PHILOSOPHY 1-3 HRS.
Note: limit of six hours credit for undergraduates in PI500. Designed to present vital topics in philosophy for the undergraduate and graduate student.

PI 810. RESEARCH PROBLEM IN PHILOSOPHY 1-3 HRS.
(Prerequisites, six hours of philosophy, plus consent of instructor.) Special research problem or readings on a topic initiated by the student and approved by the instructor.

POLITICAL SCIENCE

PO 100. INTRODUCTION TO GOVERNMENT 2-3 HRS.
A study of political institutions, processes and behaviors: their interrelationships and consequences. The focus of this course is on alternative perspectives of politics and the implications of such frameworks and on our understanding of political phenomena, especially government and its relationship to people.

PO 121. AMERICAN GOVERNMENT 3 HRS.
The powers, functions, structures, and policies of American national government, the interaction of governmental and nongovernmental actors, and the different perspectives which can be used to explain these phenomena.

PO 322. STATE AND LOCAL GOVERNMENT 2-3 HRS.
An examination and analysis of contemporary state and local government in the federal system of the United States through study of the theory, processes, institutions of government, and the political social environment. Current programs and problems involving state and local governments are examined.

PO 323. URBAN AND METROPOLITAN POLITICS 3 HRS.
In this class, students discuss the impact local government has on their lives in urban areas through economic competition, zoning, regulation, taxation, and the distribution of government services. Cities, suburbs, and their interrelatedness within metropolitan areas are the topic. The study of local urban government introduces students to some of the most pressing issues in contemporary American politics, including economic growth, the changing American family, race and ethnic relations, education, wealth and poverty, and taxes and spending.

PO 330. INTERNATIONAL RELATIONS 2-3 HRS.
A survey of the field will be undertaken, with special attention paid to foreign policy decision-making and diplomacy, nature of conflict and cooperation, nation-building, transnational activity including trade, monetary policy, and communication, international organizations, and theories of international relations.

PO 333. AMERICAN FOREIGN POLICY 2-3 HRS.
An investigation and evaluation of the formulation, objectives, and limiting factors of the foreign policy of the United States since World War II. Special attention is given to a study of the diplomatic, economic, military, and psychological techniques considered in the development and conduct of foreign policy.

PO 335. INTERNATIONAL LAW AND ORGANIZATION 3 HRS.
The course will study basic historic approaches, structures, and philosophies of international organizations and international law, and trace trends of these to current international actions and problems. The contributions of international organization and law will be assessed.

PO 345. COMPARATIVE POLITICS 3 HRS.
The course is designed to give an introduction to the methods of comparative political analysis as well as to provide some specific acquaintance with a variety of political systems.

PO 350. PUBLIC ADMINISTRATION 3 HRS.
A study of the structures and procedures of governmental organizations. Major emphasis will be upon the administrative process, including policy formulation, personnel management, budgeting, and problems of communication, and coordination with and among governmental organizations.

PO 351. PUBLIC POLICY 3 HRS.
The seminar is designed to tie together government personnel management techniques, data collected in public administration field surveys, and information about employment opportunities. Students examine various methods and outcomes of personnel management, policy making, and interactions between scholars and public administration. Organizational behavioral theories applicable to government management are introduced and applied.

PO 354. POLITICS OF BUDGETING AND FINANCIAL ADMINISTRATION 3 HRS.
(Prerequisite, PO 350.) Presentation of methods, techniques, and theories of financial administration in public organizations with special emphasis on government budgets as means of control, evaluation, and policy making. An investigation into the political and social aspects of the budgetary process in federal, state, and local governments.

PO 400. SEMINAR IN POLITICAL SCIENCE 3 HRS.
Review of current literature and analysis of specific topics will be undertaken in this seminar. Participants will be expected to develop an understanding of the major trends in research pertaining to the problem area under examination by reviewing the scholarly literature, then engaging in creative or exploratory research on that topic. Presentation of research findings will be made to the seminar.

PO 405. DEVELOPMENT OF POLITICAL THOUGHT 3 HRS.
(Prerequisites, PO 100 or PO 121.) A study of political philosophy from ancient times through the eighteenth century with particular attention to those philosophers who were sources of major elements of Western political culture.

PO 406. MODERN POLITICAL THEORY 3 HRS.
Modern political theory surveys the works of European political theorists who wrote between the 1600s and the early 1900s. Through readings and discussions, students will explore the major questions asked by the political thinkers of the Modern Era. The course will cover topics such as rationality and how it applies to politics; how property developed into such a powerful concept in Western political thought; the nature of leadership, and whether citizens should study what they say, what they do, or both. Students will examine the relationship between church and state, between religious faith and politics, and will explore the concept of "a state of nature" and why it matters in political thought.

PO 407. CONTEMPORARY POLITICAL THOUGHT 3 HRS.
(Prerequisites, PO 100 or PO 121.) A study of political philosophy and its applications in the nineteenth and twentieth centuries. Special attention is given to those theories and theorists who have furnished the bases for the major ideological divisions of the time.

PO 408. AMERICAN POLITICAL THOUGHT 3 HRS.
(Prerequisites, PO 100 or PO 121.) Development of American political thought from the colonial period to the present. Background in European thought will be noted.

PO 422. GOVERNMENT AND POLITICS OF WESTERN EUROPE 1-3 HRS.
(Prerequisite, three hours of political science or consent of instructor.) A study of the political systems of Western Europe. Attention is given to methods of comparative inquiry as well as to national and cross national studies.

PO 425. POLITICS OF DEVELOPING AREAS 3 HRS.
A study of political developments in newly established states. Attention is given to theoretical problems of the study of comparative government as well as problems of nationalism, national identity, and political development.

PO 426. EAST ASIAN GOVERNMENTS 3 HRS.
(Prerequisite, three hours of political science or consent of instructor.) A study of politics and government of the People's Republic of China. Attention is given to the historical, geographical, and cultural background of contemporary China. Particular attention is given to the nature of ideology in China and to its uses.

PO 427. GOVERNMENTS OF LATIN AMERICA 3 HRS.
The approach taken in this course fits into the comparative government curriculum on the undergraduate level for the political science department. Initially, a review of pertinent concepts, background, and models is made, with special concentration placed on corporate and dependency models. Other topics include current trends in the study of Latin American politics, Latin American constitutional concepts and procedures, the factor of stability in such systems, and inter-American political relationships and the world.

PO 441. CAMPAIGNS AND ELECTIONS 3 HRS.
The course will appraise the impact that political parties and the changing voter have had on American politics. The changing patterns of partisanship, issue voting, voter information and attitudes, the media, interest groups and party reforms will be examined with an eye toward the theoretical and pragmatic ramifications for contemporary political analysis.

PO 444. CONSTITUTIONAL LAW I: GOVERNMENTAL INSTITUTIONS 3 HRS.
After a firm grounding in the Constitution itself, students will explore Supreme Court interpretations of legislative, judicial, and executive branch powers, the Commerce, Contract, and General Welfare clauses, the Tenth Amendment, the Substantive Due Process controversy, and the Takings Clause.

PO 445. CONSTITUTIONAL LAW II: CIVIL LIBERTIES 3 HRS.
Students of the class will examine such civil liberties issues decided by the Supreme Court as the freedoms of speech, press, and religion, searches and seizures, legal representation and fair trials, cruel and unusual punishment, the right to privacy, equal protection and civil rights, and voting rights.

PO 446. AMERICAN LEGISLATURES 1-3 HRS.
A study of the nature of legislatures, including their structures, decision-making processes, influences upon legislatures both from within and without, and the power relationships between legislatures, executives, and judicial bodies.

PO 447. THE AMERICAN PRESIDENCY 1-3 HRS.
The powers and functions of the president and the presidency, focusing on elections, personality, relations with other branches of government and with American citizens.

PO 448. THE AMERICAN JUDICIARY 1-3 HRS.
A study of judicial bodies, including the nature of law, the structures, the processes and the functions of courts. The power relationships with other branches of government are emphasized. Cases are examined as a means of augmenting analysis of the judicial process.

PO 449. GOVERNMENT AGENCIES 1-3 HRS.
The theory, structure, and functions of the administrative agencies of government, with special attention to those functions performed at the national level.

PO 451. PRACTICUM IN PUBLIC ADMINISTRATION 3-5 HRS.
(Prerequisites, PO 350, PO 351, and consent of instructor.) A manager-trainee course—experience for students completing a period of academic preparation for entry into the general field of administrative practice in activities with a public character. The practicum is arranged with public or quasi-public agencies which most nearly represent the student's area of particular interest.

PO 455. LEGISLATIVE INTERNSHIP 5 HRS.
Enrollment by permission of the Director of the Public Administration Program. The internship provides an opportunity for students to observe firsthand the legislative process and to apply analytical tools in evaluation of our representative system of government. In addition to performing tasks in the legislature, each student will complete reading assignments and present written and oral reports which analyze various aspects of the process.

PO 480. INTRODUCTION TO LAW 1-3 HRS.
(Prerequisite, consent of instructor.) Designed to acquaint graduating seniors who expect to enter a law school the following September with specialized study requirements; reasoning used in the profession; practical writing experience on legal briefs; various types of legal employment; issues and philosophy of law.

PO 498. INDEPENDENT STUDY IN POLITICAL SCIENCE 1-3 HRS.
(Prerequisites, six hours of political science.) Special project or readings on a topic initiated by the student and approved by the instructor. Consent of instructor required.

PO 500. QUANTITATIVE RESEARCH METHODS 3 HRS.
Course introduces the student to the activity of political analysis. Focus is on the practical aspects of formulating inquiry, gathering relevant data, analyzing data, and presenting the findings in research report format. Through this course the student will learn how to conduct their own research and to assess the quality of that of others.

PO 501. QUALITATIVE RESEARCH METHODS 3 HRS.
This course is designed to help the student become more informed about organizing raw data and using different theories to interpret it. The student will be informed how to set up a research project or grant proposal using qualitative methods. In addition, the student will know the difference between quantitative versus qualitative research. Each student will know the format in setting up a research paper and methods that will help them explain their data.

PO 502. POLITICAL SCIENCE CAPSTONE 0 HRS.
The political science capstone course takes place on one Saturday in the spring semester. In the course students are encouraged to reflect on the state of the discipline and their experiences in the political science program at ESU. Students complete a set of readings about political science topics and write an essay; they also complete an assessment exam (post-test) and an exit survey. The course is required for all political science majors.

PO 510. NONPROFIT MANAGEMENT 3 HRS.

In recent decades, contracting with nonprofits has become one of the primary means to deliver government services in the U.S. What are the advantages and disadvantages of this approach? In addition to discussing that question, students in this class will also develop management skills like grant writing, budgeting, and managing people.

PO 520. NATIONAL SECURITY 3 HRS.

This course analyzes the central threats to U.S. and international security in the 21st century, and the possible options to reduce and counter those threats. The course will examine the institutions, interest, and processes for making U.S. national security and intelligence policy, and explore the tensions that recur in American politics between the necessities of security and the requirements of democracy, civil liberty, financial and budgetary constraints. The course also deals with how the U.S. national security establishment (including the intelligence infrastructure) has evolved its structure and management practices over time in order to execute security policy.

PO 521. POLITICS OF WAR AND PEACE 3 HRS.

This course focuses on international security issues that currently face states and regions in the global community. Students will examine theories that explain causes of war and solutions that lead to peace. They will link the theories to regional security issues and foreign policies of states.

PO 540. SPECIAL TOPICS IN POLITICAL SCIENCE 1-3 HRS.

Selected topics in the various political science disciplines—theory, comparative, United States, international, and Public Affairs.

PO 541. CLASHING VIEWS: (SPECIAL TOPIC) 3 HRS.

This course presents students with a wide variety of perspectives on an assortment of contemporary and historical political issues, international as well as national. Readings cover topics from environmental to legal, from national security to American foreign policy. Students engage in discussion and debate about the differing perspectives. Undergraduate students may take the course a maximum of two times for a total of 6 credit hours. Graduate students should consult with an advisor before repeating the course.

PO 701. SEMINAR IN POLITICAL SCIENCE 1-6 HRS.

Selected main events, trends, and interpretations in political science will be examined through readings, reports, and discussion. Designed to introduce the important literature on significant topics in political science.

PO 702. SEMINAR IN POLITICAL THEORY 1-3 HRS.

An intensive examination of selected problems, individuals or particular ideas in the area of political theory.

PO 703. SEMINAR IN POLITICAL PROCESSES 1-3 HRS.

An examination of selected aspects of political behavior and organization. Emphasis may be given to techniques of analysis as well as to the nature of the problems examined.

PO 704. SEMINAR IN COMPARATIVE GOVERNMENT AND POLITICS 1-3 HRS.

An examination of selected aspects of political behavior and organization. Emphasis may be given to techniques of analysis as well as to the nature of the problems examined.

PO 705. SEMINAR IN AMERICAN GOVERNMENT 1-3 HRS.

(Prerequisite, six hours of political science or consent of instructor.) Intensive examination of selected American political problems, practices, or institutions.

PO 726. SEMINAR IN LATIN AMERICAN GOVERNMENTS 3 HRS.

(Prerequisite, PO 121 or permission of instructor.) The approach taken in this course fits into the comparative government curriculum on the graduate level for the political science department. Initially, a review of pertinent concepts and models is made, with special concentration placed on corporate and dependency models. Other topics will include current trends in the study of Latin American politics, Latin American constitutional concepts and procedures, the factor of stability in Latin American political systems, and inter- American political relationships and the world.

PO 730. SEMINAR IN INTERNATIONAL RELATIONS 2-3 HRS.

(Prerequisite, three hours of political science or world history or consent of instructor.) A study of the principal concepts and factors influencing the course of international relations. The object is to provide a firm foundation for analyzing major international problems.

PO 731. INTERNATIONAL RELATIONS RESEARCH 1-3 HRS.

A review of scholarly literature and critical examination of research will be undertaken. Analysis will highlight the descriptive, explanatory, predictive, methodological, and prescriptive implications found in journals, anthologies, and books dealing with topics under consideration. This course will take an in-depth approach to examining questions in a particular area rather than a broad survey of many topics.

PO 733. SEMINAR IN AMERICAN FOREIGN POLICY 2-3 HRS.

(Prerequisite, six hours of political science, or consent of instructor.) A course designed to cover major problems in world affairs confronting the United States as a leading power in the 20th century. Its purpose is to make American foreign policy goals intelligible under recent internal and external shifts in power and policy. The roles of the President, Congress, National Security Council, and other governmental agencies will be examined, as well as the influence of international organizations.

PO 750. PUBLIC ADMINISTRATION 3 HRS.

An intensive study of the structures and procedures utilized in governmental organizations and the administrative processes.

PO 757. SEMINAR IN PUBLIC LAW 3 HRS.

(Prerequisite, graduate standing or permission of instructor.) The study of rule making, contracts, torts, adjudication, and the rights of public employees. Other specific topics will include environmental, consumer and civil rights law.

PO 810. RESEARCH PROBLEM IN POLITICAL SCIENCE 1-3 HRS.

(Prerequisites, six hours of political science, plus consent of instructor.) Special research problem or readings on a topic initiated by the student and approved by the instructor.

PHYSICAL SCIENCE**PS 100. INTRODUCTION TO ENGINEERING 3 HRS.**

Designed for pre- and dual-degree engineering students, an introduction to engineering concepts and design. Graphing, problem solving, metric units, engineering calculations, and computers are included. Problems involving the basic concepts of engineering science are considered.

PS 110. PHYSICS FOR THE CITIZEN 3 HRS.

A general education course providing a brief foundation in physics with a stress on everyday applications. The particular subjects considered are largely determined by the interests of the students in the class. Only very elementary mathematical concepts are used in the class.

PS 115. OUR PHYSICAL WORLD 5 HRS.

A general education course exploring basic physical, chemical and geological concepts by means of student-oriented activities supported by laboratory work. The course is designed for elementary education majors.

PS 120. PHYSICAL SCIENCE AND LABORATORY ONLINE 5 HRS.

Restricted to distance-learning, non-residential (i.e., not on campus) non-degree students, or ESU BIS degree candidates for general education credit. A general education course with laboratory designed for distance-learning students not majoring in a biological or physical science. The online course introduces key concepts of chemistry, earth science, physics and space science. An integrated laboratory experience correlates closely with, and reinforces, the understanding of the course topics.

PS 200. INTRODUCTION TO ENGINEERING GRAPHICS 1-3 HRS.

Designed for pre- and dual-degree engineering students, course includes technical sketching and lettering, the design process, orthographic projection, multiview drawings, pictorials, and reading and interpreting drawings. When the course is offered for 3 credit hours at the discretion of the Department, students would be required to complete an independent design project.

PS 214. PHYSICAL SCIENCE 3 HRS.

(Corequisite, PS215.) A general education course exploring the areas of astronomy, motion, energy, chemistry, and geology by way of student-oriented activities closely correlated with the laboratory work. A minimum of mathematics is used as the student examines the physical world.

PS 215. PHYSICAL SCIENCE LAB 1 HR.

(Corequisite, PS214.) Laboratory to accompany PS214. Weekly laboratory activities closely correlate with the class work.

PS 218. DESCRIPTIVE ASTRONOMY 3 HRS.

A general education course with an historical and philosophical approach to various theories of planet Earth's position in the universe as a basis for man's ever-expanding and current concepts of the solar system, stars, and star arrangements. The Planetarium and observation sessions with the telescopes are integral aspects of the course.

PS 330. EARTH SCIENCE FOR THE ELEMENTARY TEACHER 3 HRS.

A course designed to provide the prospective elementary teacher with the background necessary to teach the earth sciences in the elementary curriculum. Includes a study, with laboratory activity and field experiences, of the classical areas of the earth sciences: astronomy, geology, and meteorology. Recommended as an elective for the science area of concentration after completion of another physical science course, such as PS 115.

PS 341. PHYSICS FOR THE ELEMENTARY TEACHER 3 HRS.

Areas of light, photography, energy, electricity, and motion are studied by way of discovery laboratory activities so that the student gains a maximum of confidence using a minimum of mathematics. Designed for elementary education majors desiring more background in science including those desiring an area of concentration in science. (Recommended for the science area of concentration after PS115.)

PS 386. INTERNSHIP: PHYSICAL SCIENCES 1-6 HRS.

(Prerequisites, consent of instructor.) An academic course to provide students with an opportunity to gain field experience in one of the physical sciences including biochemistry & molecular biology,

chemistry, earth science, physics, pre-pharmacy, pre-engineering, or science education. The academic experience is contracted jointly by the student and the faculty advisor through a mentor outside the Department of Physical Sciences.

PS 430. NATURE OF SCIENCE 2 HRS.

A capstone course required of pre-service physical sciences teachers which considers the major conceptual frameworks of the physical sciences. The characteristics and development of modern scientific inquiry and model building/theory development are central themes of the course. The interactions of science, technology, and society are also considered.

PS 500. TOPICS IN PHYSICAL SCIENCE (*) 1-5 HRS.

(Prerequisite, permission of instructor.) A special course for graduate students who have had a minimal background in physics, chemistry or the earth sciences but who need training in one of these fields. A student may be permitted to enroll in PS500 more than once but will not be allowed to accumulate more than 6 hours credit. See the chair of the department for details. *The blank will be filled in with an appropriate short description on the student's transcript to indicate the subject area studied. Permission of instructor required to enroll.

PS 516. TEACHING PHYSICAL SCIENCES IN MIDDLE/HIGH SCHOOLS 3 HRS.

A course designed for pre-service candidates and in-service teachers seeking physical sciences licensures. Introduction to the modes used to teach contemporary content in chemistry, earth/space science, physics, physical science or general science with emphasis on laboratory instruction and laboratory safety procedures. Teaching strategies, curricula, materials/resources to include instructional technology, evaluation, characteristics of students as they relate to physical science teaching are major topic areas. Students do micro-teaching.

PS 517. PHYSICAL SCIENCES TEACHING TECHNIQUES II 3 HRS.

(Prerequisite, PS516.) For pre-service or in-service teachers of physical science. Mutually selected topics not treated in PS516, determined by the needs of the individual to enhance teaching effectiveness. Individualized instruction, the laboratory, and independent study are utilized.

PS 520. ENERGY IN TRANSITION 2-4 HRS.

(Prerequisite, consent of instructor.) An examination of personal and societal energy requirements, current sources of energy, and the environmental effects of various methods of energy production and usage. Consideration of alternatives for present consumption trends, and options for sources of energy other than fossil fuels. Field trips will be utilized as appropriate.

PS 591. STEM CLASSROOMS AND COMPETITIONS: ASKING QUESTIONS, DEFINING PROBLEM 3 HRS.

The course develops knowledge and skills STEM teachers and school librarians need to collaborate as instructional partners teaching 4-12 grade level students in science classrooms and competitions. The course provides opportunities for identifying questions and problems in life situations that address local, national, and global STEM related issues including sufficient energy; prevention and treatment of illness and disease; maintain clean food and water; and global environmental change.

PS 592. KEY LITERACY CONNECTIONS IN STEM**SUBJECTS: CONDUCTING INVESTIGATIONS, ANALYZING, INTERPRETING DATA 3 HRS.**

Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians collaborate as instructional partners to prepare to teach 4-12 grade level students to systematically plan and carry out STEM-related investigations making key literacy connections. Students learn techniques to make use of efficient and effective strategies for accessing, evaluating, and using information from diverse sources; presenting data in multiple formats; and analyzing and interpreting data through tabulating, graphing, and/or statistical analysis.

PS 593. ADVANCING AND DEFENDING NEW IDEAS: ENGAGING AN ARGUMENT FROM EVIDENCE 3 HRS.

The course explores the process of argument necessary for advancing and defending new ideas or explanations of STEM-related phenomena. STEM teachers and school librarians learn the norms for using evidence to construct and defend viable arguments, and to compare and contrast different sources in the process of creating a coherent understanding of phenomena, concepts, or design solutions. Emphasis is on teaching 4-12 grade level students reading, writing, and speaking grounded in evidence.

PS 594. SKILLS FOR A DEEP TECHNICAL WORKFORCE: OBTAINING, EVALUATING, COMMUNICATING INFORMATION 3 HRS.

This course gives Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians the opportunity to learn strategies to develop 4-12 grade level students' abilities to: access and organize information for practical application; integrate new information; practice ethical information behavior; produce and communicate information and ideas using intellectual skills, cognitive abilities, scientific reasoning, and problem solving skills. The focus is on abilities and skills necessary for intellectual curiosity and for STEM-related 21st century jobs and careers.

PS 700. ADVANCED TOPICS IN PHYSICAL SCIENCES (*) 1-5 HRS.

Study of specialized topics in physical science. *The parentheses will be filled with an appropriate short description on the student's transcript to indicate the topic area studied. May be repeated for credit. Advisor approval is expected.

PS 730. NATURE OF THE SCIENTIFIC ENTERPRISE 2 HRS.

(Prerequisite, graduate standing.) The course content is selected to provide a contextual basis (historical, cultural, social, intellectual, and philosophical) for a greater understanding and appreciation for physical sciences subject matter. The course considers the major conceptual frameworks of the physical sciences. The characteristics and development of modern scientific inquiry and model building/theory development are central themes of the course. The interactions of science, technology, and society are considered. Some case histories are studied to analyze inquiry, model building, theory development, and science, technology, and society interactions.

PS 768. WORKSHOP IN PHYSICAL SCIENCE TEACHING 1-5 HRS.

(Prerequisite, consent of instructor.) Lectures, demonstrations, discussions, and individual projects planned to increase the effectiveness of teaching science at the secondary level. Designed to develop the teacher's ability to better meet the needs of students in the physical sciences.

PS 791. STEM CLASSROOMS AND COMPETITIONS: ASKING QUESTIONS, DEFINING PROBLEMS 3 HRS.

The course develops knowledge and skills STEM teachers and school librarians need to collaborate as instructional partners teaching 4-12 grade level students in science classrooms and competitions. The course

provides opportunities for identifying questions and problems in life situations that address local, national, and global STEM related-issues including sufficient energy; prevention and treatment of illness and disease; maintain clean food and water; and global environmental change.

PS 792. KEY LITERACY CONNECTIONS IN STEM SUBJECTS: CONDUCTING INVESTIGATIONS, ANALYZING, INTERPRETING DATA 3 HRS.

Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians collaborate as instructional partners to prepare to teach 4-12 grade level students to systematically plan and carry out STEM-related investigations making key literacy connections. Students learn techniques to make use of efficient and effective strategies for accessing, evaluating, and using information from diverse sources; presenting data in multiple formats; and analyzing and interpreting data through tabulating, graphing, and/or statistical analysis.

PS 793. ADVANCING AND DEFENDING NEW IDEAS: ENGAGING AN ARGUMENT FROM EVIDENCE 3 HRS.

The course explores the process of argument necessary for advancing and defending new ideas or explanations of STEM-related phenomena. STEM teachers and school librarians learn the norms for using evidence to construct and defend viable arguments, and to compare and contrast different sources in the process of creating a coherent understanding of phenomena, concepts, or design solutions. Emphasis is on teaching 4-12 grade level students reading, writing, and speaking grounded in evidence.

PS 794. SKILLS FOR A DEEP TECHNICAL WORKFORCE: OBTAINING, EVALUATING, COMMUNICATING INFORMATION 3 HRS.

This course gives Science, Technology, Engineering, and Mathematics (STEM) teachers and school librarians the opportunity to learn strategies to develop 4-12 grade level students' abilities to: access and organize information for practical application; integrate new information; practice ethical information behavior; produce and communicate information and ideas using intellectual skills, cognitive abilities, scientific reasoning, and problem solving skills. The focus is on abilities and skills necessary for intellectual curiosity and for STEM-related 21st century jobs and careers.

PS 801. MODERN DEVELOPMENTS IN THE PHYSICAL SCIENCES 3 HRS.

(Prerequisite, consent of instructor.) Recent curriculum and instructional innovations in physical science education at the secondary level, designed as a refresher course for secondary school science teachers.

PS 810. SEMINAR IN PHYSICAL SCIENCE 0-4 HRS.

(Prerequisite, consent of instructor.) Reports and discussion by students, staff and visiting lecturers. May include projects and project reports.

PS 839. GRADUATE RESEARCH 1-5 HRS.

Independent study and research in an approved field in the physical sciences or science education.

PS 875. THESIS, M.S. 1-5 HRS.

(Prerequisite, Graduate standing and consent of instructor.) Independent study and research in an approved field in the Physical Sciences.

PS 886. INTERNSHIP IN PHYSICAL SCIENCES 1-6 HRS.

(Prerequisite: Consent of instructor.) An academic course to provide graduate students with an opportunity to gain field experience in one of the physical sciences including biochemistry & molecular biology, chemistry, earth science, physics, pharmacy, engineering, or science education. The academic experience is contracted jointly by the student and the faculty advisor through a mentor outside the Department of Physical Sciences.

PSYCHOLOGY

PY 100. INTRODUCTORY PSYCHOLOGY † **3 HRS.**
(Prerequisite to all other offerings in psychology.) A course designed to cover the major areas of concern in psychology (learning, perception, personality and behavior disorders) which will give the student a basis for advanced work in understanding human behavior.

PY 101. INTRODUCTORY PSYCHOLOGY LABORATORY **1 HR.**
The purpose of this course is to give beginning students hands-on, practical experience in the science of psychology. Students will participate directly in laboratory exercises ranging from basic learning processes to sleep and dreaming. Concurrent enrollment with PY 100 is recommended, but not required.

PY 102. INTRODUCTION TO PSYCHOLOGY MAJOR **1 HR.**
(Prerequisite Note - It is highly recommended that Psychology majors take PY100, Introductory Psychology, concurrently with PY102, Introduction to Psychology Major, but is not required.) This is an undergraduate class primarily for a first-year student, sophomore, and transfer students who are (or thinking about) declaring psychology as their major. The course will explore the various careers, fields, and opportunities in the psychology field.

PY 203. SPECIAL TOPICS IN APPLIED PSYCHOLOGY **1-3 HRS.**
(Prerequisite, PY 100) This represents an umbrella course where the instructor will select a specific topic related to applied psychology. It is an undergraduate course primarily for first-year students and sophomores. Potential topics include: Applied Psychology, Career Psychology, Multi-cultural Psychology, Psychology of Adjustment, Group Dynamics, Psychology and the Paranormal, and The Psychology of Emotion.

PY 210. DEVELOPMENTAL PSYCHOLOGY FOR THE PSYCHOLOGY MAJOR † **3 HRS.**
(Prerequisite, PY 100, and Psychology majors only.) This course focuses on describing and explaining the physical, social, and cognitive changes that take place from conception to death. Students will learn about major theories and empirical methodology used to explore developmental changes. Learners will think critically about developmental research; that is, to be able to evaluate information on how environment and genetics contribute to development and to behavior. Learners will become effective practitioners by applying what they learn about developmental changes to real life situations. Finally, learners will become creative planners who can facilitate healthy development for future generations.

PY 211. DEVELOPMENTAL PSYCHOLOGY FOR THE EDUCATION MAJOR † **3 HRS.**
(Prerequisite, PY 100, and Education Majors only) This course provides a general overview of human development from infancy to young adulthood. The emphasis is on the application of developmental theories and principles to education contexts. Jean Piaget, Erik Erikson, and Lev Vygotsky are among the theorists reviewed.

PY 212. DEVELOPMENTAL PSYCHOLOGY FOR NURSING AND OTHER MAJORS † **3 HRS.**
(Prerequisite, PY 100.) This course examines the major life span developmental stages, with particular focus on developmental concepts and principles relevant to nurses and others interested in the helping professions. Prenatal, infancy, childhood, adolescence, adulthood, and aging are studied. An understanding of the relationship between developmental trends and human behavior will be an emphasis.

PY 300. DESCRIPTIVE RESEARCH METHODS AND STATISTICS IN PSYCHOLOGY **3 HRS.**
(Prerequisite, PY 100. This course is a prerequisite for Experimental Research and Statistics in Psychology.) This course will introduce you to the scientific methodology used in the diverse yet related areas of psychology. Topics include descriptive research methods, sources of extraneous variation, internal and external validity, and descriptive statistical analyses, including measures of central tendency and variation, correlation, and simple regression. Coursework emphasizes critiquing scientific journal articles and developing individual research proposals. Research designs and methodologies are demonstrated in the laboratory with students performing statistical analysis of the collected data. This course should enable you to better understand and appreciate the necessity and difficulty of systematically studying behavior and mental processes, and prepare you for intelligently scrutinizing explanations of behavior provided by psychologists, friends, the media and others.

PY 301. EXPERIMENTAL RESEARCH METHODS AND INFERENCE STATISTICS **3 HRS.**
(Prerequisites, PY 100 and PY 300.) This course will introduce you to the scientific methodology used in the diverse yet related areas of psychology. Topics include experimental design, sources of extraneous variation, internal and external validity, and statistical analyses. Coursework emphasizes critiquing scientific journal articles and completing an individual research project. Research designs and methodologies are demonstrated in the laboratory with students performing statistical analysis of the collected data. This course should enable you to better understand and appreciate the necessity and difficulty of systematically studying behavior and mental processes, and prepare you for intelligently scrutinizing explanations of behavior provided by psychologists, friends, the media, and others.

PY 303. SPECIAL TOPICS IN UNDERGRADUATE PSYCHOLOGY **1-3 HRS.**
(Prerequisite, PY 100) This represents an umbrella course where the instructor will select a specific topic related to a specialized or current topic in undergraduate Psychology. It is an undergraduate course and potential topics include: Peer Advising, Undergraduate Teaching Assistant, Educational Psychology, Psychology in the Cinema, Death and Dying, Environmental Psychology, Classic and Famous Studies in Psychology, The Psychology of Mental Retardation, and Introduction to Art Therapy.

PY 322. LEARNING AND COGNITION **3 HRS.**
(Prerequisite, PY 100.) Learning and remembering what one has experienced are fundamental processes. Moreover, how we interpret, form, organize, and retrieve memories can influence our performance as learners. This course is a survey of theories, principles, laws, and conclusions from a century of scientific study of these psychological phenomena. This course emphasizes what researchers know about learning and the mind, as well as how individuals can effectively apply knowledge to address human concerns. Students will demonstrate application of these principles to real-world problems, which they have helped define.

PY 333. SOCIAL PSYCHOLOGY **3 HRS.**
(Prerequisite, PY 100.) The basic principles and processes of human social behavior and the social consciousness of the individual and groups are covered. Contemporary interests and tendencies that grow out of community life are stressed. Topics include theories, personality, motives, abilities, attitudes, group processes and contemporary problems.

PY 334. EDUCATIONAL PSYCHOLOGY 2 HRS.

(Co-requisites ED 333 and ED 334) The course is for candidates who have been admitted to teacher education and enrollment concurrent with ED333 and ED334 in the same section is required. This course is part of the first phase of professional education and is designed to teach the relationships between psychological principles and the educative process. Practical experiences are related to classroom organization, management and learning activities. Adolescent development is treated through application of learning theories, research design and behavioral objectives. This professional education course integrates with the other courses in Phase I to provide a theoretical and practical base for teaching.

PY 343. COGNITIVE PSYCHOLOGY 3 HRS.

(Prerequisite, PY 100.) This course is a review of theories, experimental results, and methodologies that comprise the science of mind. The information is presented in a historical context and contrasted with the behavioral approach to psychology.

PY 401. FOUNDATIONS OF PSYCHOLOGY 3 HRS.

(Prerequisite, PY 100 and must have completed 9 credit hours in psychology classes numbered at or above 300.) A course designed to give the student the historical background of modern psychology. Particular emphasis is given to the outstanding leaders in psychology and their contributions.

PY 403. INDEPENDENT STUDY 1-3 HRS.

(Prerequisite, PY 100 and consent of instructor.) A problem of special interest is selected and researched under the immediate supervision of the instructor.

PY 427. ABNORMAL PSYCHOLOGY 3 HRS.

(Prerequisite, PY 100.) All forms of psychological abnormality are considered against the setting in which they develop along with methods of prevention and cure.

PY 432. INTRODUCTION TO INDUSTRIAL/ ORGANIZATIONAL PSYCHOLOGY 3 HRS.

(Prerequisite, PY 100.) A course designed to introduce students to the work of industrial/ organizational psychologists. Topics covered include job analysis, performance appraisal, test validation, training, leadership, work motivation, satisfaction and organizational theory.

PY 440. PSYCHOLOGICAL TESTING 3 HRS.

(Prerequisite, PY 100.) The course is designed to aid in the understanding of basic psychometric concepts and the interpretation of standardized tests used in psychology, education, business, and industry.

PY 490. UNDERGRADUATE INTERNSHIP 1-3 HRS.

(Prerequisite: PY100; must be a psychology student with at least junior standing.) This course provides students with the opportunity to apply their knowledge of psychology in either a work or research setting. Students are placed in a variety of organizations ranging from mental health, educational, correctional, to business. Each placement is supervised through the organization in consultation with assigned faculty advisors who design job-related learning objectives and projects. The course is divided into two sections, PY490A and PY490B, both of which must be completed for the full 4 hours credit.

PY 502. THE PROFESSIONAL PSYCHOLOGIST 1 HR.

(Prerequisite, PY 100.) This course is designed for students to learn and practice the skills for applying for graduate school or a job. Activities include producing a vita, crafting a personal statement of goals and purpose, and developing a personal time line for applying for graduate school or a job.

PY 503. SPECIAL TOPICS IN PSYCHOLOGY 1-3 HRS.

(Prerequisite, PY 100) This represents an umbrella course where the instructor will select a specific topic related to a specialized or current topic in Psychology for both undergraduate and graduate students. Potential topics include: Brain and Behavior, Psychology of Gender, Sports Psychology, Drugs and Behavior, Psychology of Sex, Psychology and Religion, Current Therapies, Positive Psychology, Evolutionary Psychology, Psychology of Love and Attraction, Psychology and the Law, Psychology of American Culture, and The Psychology of Gaming.

PY 506. METHODS FOR TEACHING PSYCHOLOGY 3 HRS.

(Prerequisite, PY 100 and 12 hours completed in teaching field.) Students will be trained to actively involve the learner in the psychology classroom using the data-methodology-principles approach. This course is designed to prepare teachers of psychology at the secondary level.

PY 520. STATISTICS I 3 HRS.

(Prerequisite, PY 100.) This course introduces students to both descriptive and inferential statistics including mean, standard deviation, variance, sum of squares, correlation, linear regression, sampling distributions, hypothesis testing, t test, and analysis of variance.

PY 560. PHYSIOLOGICAL PSYCHOLOGY 3 HRS.

(Prerequisite, PY100.) The course introduces the student to the research methods used in physiological psychology as well as the structure and functions of the nervous system. Selected topics in behavioral neuroscience such as the psychobiology of stress, motivation (e.g., food and water intake, sexual behavior), mental processes (e.g., learning and memory), sensory systems (e.g., vision, olfaction, audition), psychopharmacology, and complex psychological processes (e.g., schizophrenia, bipolar disorder, anxiety disorders) will be covered with special emphasis on the language, basic concepts, principles, methods, research findings, models, and theories of physiological psychology. Course designed for upper level undergraduate and graduate students.

PY 570. SENSATION AND PERCEPTION 3 HRS.

(Prerequisite, PY 100.) This course is designed to cover basic sensory physiology and systematic methods of studying sensory and perceptual phenomena, as well as an introduction to the major concepts, principles and theories of perception.

PY 624. THEORIES OF MOTIVATION 3 HRS.

(Prerequisite, PY 100.) The concepts, principles, and empirical findings concerning basic factors which underlie human motivation are studied. Attention is given to both innate and acquired bases.

PY 626. THEORIES OF PERSONALITY 3 HRS.

(Prerequisite, PY 100.) The course is designed to give the student an understanding of the different approaches to the study of personality. Compact yet comprehensive summaries of the major personality theorists are presented.

PY 700. ADVANCED GENERAL PSYCHOLOGY 3 HRS.

(Prerequisite, PY 100) Through the study of current literature the student is acquainted with new developments in the broad field of psychology.

PY 703. SPECIAL TOPICS IN GRADUATE PSYCHOLOGY 0-3 HRS.

(Prerequisite, PY 100, Junior level standing or better.) This represents a graduate level umbrella course where the instructor will select a specific topic related to a specialized or current topic in Psychology. It is primarily a graduate course but junior and senior undergraduates may also take it. Potential topics include: Forensic Psychology, Psychometrics, University Level Teaching, Psychology of Compensation Administration, Fetal Alcohol Syndrome and Spectral Disorders, Psychology of Globalization, Ergonomics and Human Factors, and The Psychology of Horror/Humor.

PY 707. MEMORY 3 HRS.
(Prerequisite, PY 100.) This course presents an empirical approach to the exploration of memory. Results obtained from experiments are integrated to form the basis for articulating theory that provides an overall explanation for the results. Emphasis is also placed on the methodologies developed to generate the data and the role of theory for spawning hypotheses that drive experimentation and consequently the creation of knowledge.

PY 708. BRAIN FUNCTION AND DYSFUNCTION 3 HRS.
(Prerequisite, PY 100.) This course is designed to familiarize clinicians with brain function and dysfunction and to be able to recognize when a psychiatric client has as yet undetected neurological involvement.

PY 709. INTRODUCTION TO NEUROPSYCHOLOGY 1 HR.
(Prerequisite, PY 100.) This course is designed to acquaint students with the field of neuropsychology. This course covers basic brain functions and how these relate to behavior. Neuropsychological tests are discussed and demonstrated, including the Halstead-Reitan and Luria Nebraska batteries.

PY 714. ASSESSING YOUNG CHILDREN WITH SPECIAL NEEDS 3 HRS.
This course provides an overview of measurement and evaluation concepts, strategies, and techniques that are appropriate for young children with special needs.

PY 722. THEORIES OF LEARNING 3 HRS.
The major theories of learning are analyzed, compared, and evaluated in light of current research.

PY 740. PERSONNEL SELECTION AND TESTING 3 HRS.
This course is a graduate seminar course covering the relevant theory, research, concepts, and applications associated with personnel selection and testing issues. Topics include: job analysis, validity, reliability, interviews, personality measures, assessment centers, fairness, validity generalization, utility analysis, test theory, privacy issues, and cognitive ability measures.

PY 741. MOTIVATION AND TRAINING 3 HRS.
This course is a graduate seminar course covering the relevant theory, research, concepts, and applications associated with work motivation and training. Topics include: needs assessment, learning theories, control systems, organizational culture, principles of reinforcement and transfer, multi-cultural training, re-training, needs hierarchies, value systems, and technological re-training.

PY 742. WORK ATTITUDES 3 HRS.
This course is a graduate seminar course covering the relevant theory, research, concepts, and applications associated with work attitudes. Topics include: job satisfaction, organizational commitment, participatory styles, life satisfaction, facet vs. global measures, turnover, absenteeism, career involvement, burnout, unions, positive and negative affectivity, nature vs. nurture issues, and moderators of satisfaction.

PY 743. LEADERSHIP IN ORGANIZATIONS 3 HRS.
This course is a graduate seminar course covering the relevant theory, research, concepts, and application associated with leadership. Topics include executive selection and development, succession planning, strategic decision making, power and influence, organizational change and culture, women in leadership, and cross-cultural leadership. Well researched leadership theories, such as behavioral, trait, situational, contingent, implicit, and transformational leadership, will be explored, as well as newer theories, such as collective, authentic, and servant leadership.

PY 744. PERFORMANCE APPRAISAL 3 HRS.
This course is a graduate seminar course covering the relevant theory, research, concepts, and applications associated with performance appraisal. Topics include: rating scales and formats, halo, rater accuracy, rating errors, rater training, gender/race/relationship issues, sources of ratings, cognitive issues in performance appraisal, feedback, the PA interview, reactions and responses to feedback, paper people, and legal issues.

PY 745. ORGANIZATIONAL ISSUES AND LEGAL ISSUES 3 HRS.
This course is a graduate seminar course covering the relevant theory, research, concepts, and applications associated with organizational and legal issues. Topics include: organizational change, behavior, development, interventions, theory, joint consultation, court cases, affirmative action, adverse impact, Civil Rights acts of 1964 and 1991, Americans with Disabilities Act, Title VII, business ethics, judicial interpretations of I/O psychology law, and organizational climate.

PY 800. THESIS, M.S. 1-5 HRS.
(Prerequisite, consent of thesis chair.) The student completes an important research study appropriate to their area of specialization.

PY 801. SCHOOL PSYCHOLOGICAL CONSULTATION 3 HRS.
The course is intended as an overview to a process that has received increasing attention from psychologists, counselors, social workers, and other human services workers. It will discuss the various models of consultation and the processes involved in consultation practice. It will provide a balance among theory, research, and practice with the ultimate concern being application. Students are provided with advanced organizers, in text learning exercises and review questions designed to focus their learning and sharpen their insight into the complex processes surrounding consultation.

PY 803. RESEARCH PROBLEM IN PSYCHOLOGY 1-3 HRS.
(Prerequisite, consent of instructor.) A problem of special interest is investigated by the student under the immediate supervision of the instructor.

PY 805. PSYCHOLOGY OF THE ADULT LEARNER 3 HRS.
The course is designed primarily for individuals interested in community college or adult education. Identification of the nature, needs, and objectives of late adolescents and adults is emphasized. Motivation, classroom management, and application of appropriate learning concepts are stressed. Practical activities and research related to adult education are developed.

PY 806. PERSONALITY ASSESSMENT & REPORT WRITING 3 HRS.
This course is an introduction to personality assessment and report writing. The emphasis is on general procedures rather than specific techniques and tests. The course will establish critical thinking about when an assessment is appropriate, what to consider when doing an assessment, and the appropriate reporting of assessment results. Use of the diagnostic manual will be discussed as well as the meaning of normality as it applies to various cultural groups. This course is designed to meet Domain 5 of the National Association of School Psychologists: School psychologists have knowledge of individual differences, abilities, and disabilities and of the potential influence of biological, social, cultural, ethnic, experiential, socioeconomic, gender-related, and linguistic factors in development and learning. School psychologists demonstrate the sensitivity and skills needed to work with individuals of diverse characteristics and to implement strategies selected and/or adapted based on individual characteristics, strengths and needs.

PY 807. PROJECTIVE ASSESSMENT & MMPI 3 HRS.

This course presents the history and use of projective assessment devices and also the development and foundations of the MMPI. Projective assessments covered in the course will include instruments such as the Thematic Apperception Test, Children's Apperception Test, Bender Gestalt, House-Tree Person, and Draw-A-Person. The emphasis of the course will be on the administration and interpretation of the specific projective instruments and the MMPI.

PY 808. RESEARCH IN CLINICAL PSYCHOLOGY 3 HRS.

This course is designed to provide the opportunity to learn about research design and methodological issues as they pertain to the clinical research. This will include basic research concepts such as independent and dependent variables, as well as more advanced topics such as effect size and statistical power, clinical significance vs. statistical significance, single-case experimental designs, etc. Other topics related to sound clinical research will be covered including research ethics and sampling/assessment procedures.

PY 811. SEMINAR IN HUMAN GROWTH AND DEVELOPMENT 3 HRS.

Consideration is given to individual development, adjustment to social patterns, and the significance of development for learning. Special problem areas from conception through adolescence are covered.

PY 812. FOUNDATIONS OF ASSESSMENT IN SPECIAL EDUCATION AND STUDENT SUPPORT 3 HRS.

The course provides familiarity with assessment principles in K-12 school settings, as undertaken to support students in general education as well as to determine needs and eligibility in special education and gifted. It covers various domains including intelligence/aptitude, achievement, language, social/behavioral, adaptive, motor, and general development. Understanding of test scores and their meaning, and selection of valid tools is reviewed. Multicultural and bias issues, and other factors which contribute to error in assessment are key components as well as ethics and legal obligations as relate to the assessment process. Tools such as norm-referenced tests, criterion-referenced tests, functional behavioral assessment, systematic observation, and informal/authentic assessment such as portfolios are included.

PY 820. RESPONSE TO INTERVENTION IN SCHOOL PSYCHOLOGY 3 HRS.

(Prerequisites, majors only and SD700.) The course prepares candidates for the changing role of school psychologists in the problem solving model of early intervention and disability identification, in accordance with contemporary best practices and federal and state requirements and regulations. Topics covered include system-wide program design through specific assessment and interventions for students through Tiers I, II, and III in the problem solving model. The course provides a balance of theory, research, and practice.

PY 827. SEMINAR IN PSYCHOPATHOLOGY 3 HRS.

(Prerequisites, PY 427 and PY 626.) Characteristics of the various forms of mental disorder are studied. Etiological factors, theoretical positions, and current forms of treatment are covered.

PY 830. EARLY CHILDHOOD PRACTICUM: SCHOOL PSYCHOLOGY 3 HRS.

(Prerequisite, consent of instructor.) The practicum provides supervised experience with early childhood special education children for the practicing school psychologist. This is required for KSBE School Psychology certification at the early childhood level.

PY 832. INDUSTRIAL PERSONNEL PSYCHOLOGY 3 HRS.

This course covers such topics as personnel selection, human resource management, performance appraisal, training, ethics, recruitment,

personnel law, criteria, validation, statistical techniques, classification, and other current topics appropriate to applied personnel psychology in business and industry.

PY 833. ORGANIZATIONAL PSYCHOLOGY 3 HRS.

This course is a primary content course covering the relevant theory, research, concepts, and applications associated with Organizational Psychology: organizational culture, workforce diversity issues, motivation, group dynamics, leadership, power and politics, decision making, conflict and negotiation, organizational and individual change, cross-cultural differences in organizational psychology phenomena, and qualitative and quantitative research methods.

PY 835. SEMINAR IN SCHOOL PSYCHOLOGY 3 HRS.

(Prerequisite, consent of instructor.) The course is designed to integrate all previous course work of the student in school psychology. Consultation, additional assessment and intervention strategies, and current professional issues are covered.

PY 836. SCHOOL-BASED PREVENTION AND INTERVENTION 3 HRS.

The course investigates exemplary school-based prevention and intervention programs that promote the mental health and physical well-being of students, as well as school success. Criteria for determining empirically validated programs are discussed. This course also examines the history and development of crisis intervention in the schools. A focus will be developing skills and knowledge required to effectively intervene and assist children, teachers, administrators, and families during periods of crisis. The course will highlight the importance of prevention in decreasing the number and severity of crisis situations.

PY 837. PSYCHOLOGICAL CASE STUDIES 3 HRS.

(Prerequisite, consent of instructor.) Typical cases appropriate to the student's area of specialization are analyzed and discussed. Emphasis is placed on the writing of case histories and the psychological dynamics involved in the pattern presented by diagnostic procedures.

PY 838. SUPERVISED PRACTICE IN SCHOOL PSYCHOLOGY 6 HRS.

(Prerequisite, consent of instructor.) The student completes 600 clock hours of supervised practice under the direct supervision of an approved, experienced, and certified school psychologist in a public school setting. A second enrollment may be in an institutional setting.

PY 839. INTERNSHIP IN PSYCHOLOGY 1-6 HRS.

(Prerequisite, consent of instructor.) Internship is designed as a culminating practical experience for a prescribed course of formal instruction in a professional area of psychology. In some instances, the course may be taken concurrently with professional employment.

PY 841. ASSESSMENT OF INTELLIGENCE 3 HRS.

(Prerequisite, one course in statistics or testing.) This is a basic course in clinical mental testing. The techniques of administering, scoring, and interpreting the Wechsler tests are covered.

PY 843. PSYCHOEDUCATIONAL ASSESSMENT 3 HRS.

(Prerequisite, one course in statistics or testing.) This advanced assessment course is designed for students desiring to become practitioners in school, clinical, and counseling settings. Administering, scoring, and interpreting standardized intelligence tests, achievement tests, adaptive behavior measures are covered. Other topics include intelligence theory, social-emotional development, psychometric theory, assessment battery development, ethical considerations, conceptualization, and reporting information. The course goal is to integrate knowledge and skills in conducting competent psychological services in the area of assessment.

PY 844. SCHOOL PSYCHOLOGY ED.S. PROJECT 3 HRS.

Consent of project advisor chair and academic advisor. The project must be completed prior to school psychology internship. School psychology candidates will complete a non-thesis research project in a topic area appropriate to school psychology.

PY 846. CULTURE, ASSESSMENT, AND TREATMENT IN PSYCHOLOGY 3 HRS.

This course is designed to meet the growing demand for culturally competent mental health services by providing graduate students in clinical psychology with a basic foundation in multicultural counseling. Starting with the self, students are expected to comprehensively understand their own cultural upbringing and belief systems in order to be able to provide services to people from various cultural backgrounds. The class will be both didactic and experiential.

PY 847. TECHNIQUES OF PSYCHOTHERAPY 3 HRS.

This course is an introduction to the basic theories and practice of psychotherapy. Its intention is to give the student a basic overview of therapy techniques which have been used and currently are being used in the treatment of psychological and emotional difficulties. The purpose of the course is to provide candidates with an academic foundation in techniques in psychotherapy treatment prior to their practicum experiences.

PY 848. FAMILY AND GROUP SYSTEMS PSYCHOTHERAPY 3 HRS.

This course is designed to provide the opportunity to learn about family and group dynamics and how to work therapeutically with these systems. This will include clinical applications, review of relevant research, and theoretical/historical perspectives. You are expected to be an active participant rather than a passive observer/listener. Being an 'active participant' means that you are not only prepared for each class (completing reading, assignments, etc. ahead of time) but that you are also thinking about how the ideas in class might be translated into practice, self-improvement and understanding, etc., and are ready to learn by doing!

PY 849. ETHICS AND PROFESSIONAL PRACTICE 3 HRS.

This course is designed to ensure all master's degree psychology graduates are thoroughly knowledgeable about the legal and ethical requirements of all aspects of the profession.

PY 851. SEMINAR IN BEHAVIOR MODIFICATION 3 HRS.

The course concentrates on the history, principles, procedures, and applications of behavior management techniques to settings such as schools, homes, day-care centers, hospitals, businesses, and industry. Additionally, functional behavioral assessment, behavioral intervention plans, outpatient applications, and self-management techniques are included.

PY 858. INTERDISCIPLINARY REFERRAL AND COLLABORATION IN CLINICAL PSYCHOLOGY 3 HRS.

The Clinical Psychology Internship is designed as an experience-based program, which presents students with opportunities to translate theoretical knowledge into functional skills. The first 3 credit hours of the internship (PY858) are designed to orient students who are beginning their internships, and preparing them to continue in and satisfactorily complete the remaining 6 credit hours (PY859) of their internship experience.

PY 859. INTERNSHIP IN CLINICAL PSYCHOLOGY 1-6 HRS.

The Clinical Psychology Internship is an experience-based program which presents students with opportunities to translate the theoretical knowledge into functional skills. The internship must be 750 hours in length and is usually carried out at public agencies in Kansas, such as mental health centers, mental hospitals and state correctional facilities.

PY 860. LEADING PROCESSES TO MEET DIVERSE STUDENT NEEDS 3 HRS.

Principles, practices, and problems related to administering and supervising all areas of special education will be discussed. As virtually all special education principles and practices are integrated into and derived from law and statute, primary consideration is given to federal and state regulations, individual education plan processes, and continuous improvement monitoring (and/or focused monitoring as details of that process become available in Kansas). Will cover practical aspects of contemporary special education (Section 504, IDEA 2004) and related processes established in policy and procedure via KSDE.

PY 900. THESIS, ED.S. 1-6 HRS.

(Prerequisite, consent of thesis chair.) The student completes an empirical research study appropriate to the area of school psychology.

PY 910. INTERNSHIP IN SCHOOL PSYCHOLOGY I 2 HRS.

(Prerequisite, permission of instructor.) The purpose of the supervised, full time internship for one academic year is to allow the intern to further develop their competencies as a practicing school psychologist and to demonstrate appropriate ethical and professional standards as a school psychologist. The internship experience should include all levels of education, early childhood through secondary. The setting should provide a full range of services and education of both exceptional and general education children. A school setting must provide at least 50% of the approved field experience.

PY 920. INTERNSHIP IN SCHOOL PSYCHOLOGY II 2 HRS.

(Prerequisites, permission of instructor, completion of PY 910.) The purpose of the supervised, full-time internship for one academic year is to allow the intern to further develop their competencies as a practicing school psychologist and to demonstrate appropriate ethical and professional standards as a school psychologist. The internship experience should include all levels of education, early childhood through secondary. The setting should provide a full range of services and education of both exceptional and general education children. A school setting must provide at least 50% of the approved field experience.

RECREATION**RC 150. FOUNDATIONS OF RECREATION ACTIVITIES 2 HRS.**

The course is designed to acquaint the student with methods and techniques involved in the development and presentation of primary social recreation activities to varied clientele. Special emphasis is placed on leadership skills and techniques.

RC 201. OUTDOOR RECREATION 2 HRS.

This course is designed to acquaint the student with the breadth of outdoor recreation, recreational use of natural resources, and the background of the camping movement. Field trips--actual cost not to exceed \$40.00.

RC 440. INDEPENDENT STUDY IN RECREATION 1-3 HRS.

(Prerequisites, RC100 or RC150.) A critical analysis and study of selected problems, trends or issues in the area of recreation. Utilizes individual and group discussions resource persons and review of literature.

RC 700. CURRENT DEVELOPMENTS IN RECREATION 1-4 HRS.

Designed to provide an opportunity for performance analysis, direct discussion and observation of new trends, methods and techniques in recreation.

REHABILITATION & DISABILITY STUDIES

RE 290. INTRODUCTION TO REHABILITATION PROGRAMS 3 HRS.

The purpose of this class is to provide students with an introduction to the profession of rehabilitation services. This course will introduce students to areas of rehabilitation service provision that are accessible to baccalaureate (BS rehabilitation services) trained professionals. Students will consider the history, philosophy, organization and services of vocational rehabilitation: the needs and rights of the people with disabilities will be emphasized. A survey approach will use guest speakers, video and electronic media to present services, rehabilitation settings, and the duties and functions of entry level generalist rehabilitation personnel.

RE 291. SURVEY OF DISABLING CONDITIONS 3 HRS.

The course focuses on physical disabilities and covers attitudinal, environmental, medical, and the more common psychosocial problems encountered in working with individuals with a disability. It includes basic medical information and terminology, functional limitations, and special attention will be given to the definition, classification, incidence, etiology, diagnosis and assessment, developmental consequences, and available interventions for each of the disabling conditions.

RE 301. REHABILITATION RESEARCH AND REPORT WRITING 1 HR.

This course focuses on the skills needed for students to access and utilize rehabilitation research. The course will review the basic terminology, concepts, and principles underlying research in rehabilitation and will identify the major sources of rehabilitation research literature. Students will develop skills in conducting computer searches of the literature and using the library, and will compile an annotated bibliography on a special topic in rehabilitation. Writing skills and fundamentals of APA style will be reviewed and practiced by writing reflective analyses of special topics, case notes and log entries, and other forms of scholarly and professional writing.

RE 305. ETHICS IN HUMAN SERVICES 3 HRS.

This course involves weekly three-hour meetings in which the codes of ethics relevant to counseling professions are discussed. Students are required to read the codes from the American Counseling Association (ACA), Council on Rehabilitation Counseling (CRC), American Psychological Association (APA), and The Association for Addiction Professionals as well as selected handouts. Reading will be the basis for subsequent class discussion, exercises and homework assignments. Issues presented in lecture form will include a philosophical framework of counseling ethics, a foundation for ethical decision-making, specific issues addressed in the various codes, and legal issues facing the counseling profession. Class time will also be spent discussing examples of ethical dilemmas which counselors often face.

RE 311. LEADERSHIP IN HUMAN SERVICES 3 HRS.

This course is an orientation to the Leadership in Human Services concentration. Essential components will include: overview of program expectations; principles of adult learning; resources for success including library, campus, online resources and mentoring relationships; personal wellness/stress and time management techniques; study and test-taking skills; and basic computer skills for working in an online environment.

RE 313. PROFESSIONAL COMMUNICATION IN HUMAN SERVICES 3 HRS.

This course will be a study of professional communications within human services settings. Essential components and course content include: listening; verbal and nonverbal communication; writing referrals, reports and emails; appropriate use of social media; and professional presentation methods.

RE 320. SPECIAL TOPICS IN REHABILITATION 1-3 HRS.
(Prerequisite, permission required.) This course is for the study of various special topics and experimental course offerings by the Rehabilitation Services Education Program.

RE 323. ADULT LEARNERS 3 HRS.

This course is designed to familiarize the student with some of the learning theories and their implications for education of adults. Emphasis is on the application of the principles of adult learning; understanding of the characteristics of the learner; difference to be expected between teaching adults versus adolescents; adaption of the teaching techniques to the adult personality; and adaption of subject matter content to the adult.

RE 325. COUNSELING & DISABILITY ISSUES OF RETURNING VETERANS OF WAR 3 HRS.

This course focuses on physical, psychological, cognitive, emotional, and vocational issues of returning veterans of war. The effects of disability on veterans and their families following their assimilation back into society are explored. Focus on the most prevalent disabilities experienced by veterans of war will be discussed, as well as the EEOC and other relevant state and federal mandates pertaining to employment of returning veterans. There is substantial focus on the issues of veterans and military personnel who are women, as well as veterans from culturally and ethnically diverse populations.

RE 330. DATA ANALYSIS & INTERPRETATION 3 HRS.

This course will enable the student to develop an understanding of the application and interpretation of basic data analysis. Essential components and course content will include basic data analysis from a user perspective. Hands-on exercises will enable students to utilize software to solve problems and interpret results.

RE 333. WORKFORCE DEVELOPMENT 3 HRS.

This course is designed to provide an overview of Training and Development in the workforce. The major emphasis is on the steps for creating training and development programs, including how to analyze training needs, create a skills based training, and how to evaluate the training outcomes.

RE 346. PSYCHOPHARMACOLOGY I 3 HRS.

This is an introductory course to psychopharmacology for non-medical, helping professionals. Emphasis is placed on the basic principles of pharmacology, the effects of drugs on the human central and peripheral nervous systems and particularly psychoactive drug effects on human cognitive, behavioral and affective domains. It will provide an overview of pharmacological classification systems and various interventions frequently utilized. Students will become familiar with pharmacological lexicon and the benefits/consequences and side effects of drug use and abuse. The implications for rehabilitation services and counseling will be examined.

RE 392. SURVEY OF MENTAL/PSYCHOLOGICAL DISABILITIES 3 HRS.

This course focuses on the nature and types of mental disabilities commonly encountered by rehabilitation professionals. Specific disabilities to be focused on include: mental retardation, learning disabilities, and selected psychological disorders such as personality disorders, affective disorders, psychotic disorders, and drug abuse.

RE 413. SOCIAL RESPONSIBILITY IN HUMAN SERVICES ORGANIZATIONS 3 HRS.

This course is an examination of contemporary issues that affect human services organizations. Essential topics include environmental stewardship, social responsibility of human services organization, effects and implications of globalization, the status of individual freedom within human services organization, diversity, and the ramifications of technological change.

RE 423. MANAGEMENT IN HUMAN SERVICES 3 HRS.

This course is a study of theories that influence leadership and management with application to public, private, and community rehabilitation and social services. Essential components and coursework content will include: basic social services leadership and behavior styles, negotiation, critical thinking, change, conflict resolution, ethics, and social responsibility and diversity in the workplace. Assessment of personal leadership abilities and personality traits will be included.

RE 500. CAPSTONE – INTERNSHIP 3 HRS.

This course provides the student the opportunity to integrate concepts and theories covered in the core with their area of focus. Students will design and implement a capstone project related to their area of focus culminating in a written and oral presentation. This course must be taken in the student's final enrollment period.

RE 510. APPLIED COUNSELING SKILLS DEVELOPMENT 3 HRS.

This course introduces students to clinical helping skills development. It uses a workshop format and is designed to be a safe place to try out new skills. Emphasis will be placed on understanding the cognitive and affective elements necessary to establish professional helping relationships with clients. Skills, concepts, and methods are provided to help the student develop concrete competencies, and then examine their own helping and counseling skills; including skills in listening, attending, and empathy as used in the helping process. The goal of this course is to provide an opportunity for the student to gain usable and useful skills central to the helping process via role-playing and modeling of basic helping skills. Students will receive feedback and critiques of live and video-recorded sessions from the instructor and peers via small group and classroom discussion.

RE 540. SIGN LANGUAGE I 3 HRS.

This course will provide the student with a lexicon of approximately 600 signs. The student will become familiar with various sign language systems and will be able to recognize their differences. Important issues within the field of deafness will be addressed, including: deaf culture, education of deaf people, assistive listening devices, and professions in the field of deafness. Through the class text, additional readings, class discussions, and deaf consumers, the student will continue to develop signing skills while developing an understanding of how hearing loss affects individual development.

RE 541. SIGN LANGUAGE II 3 HRS.

(Prerequisite, RE 540 Sign Language I.) This is the second course in a two-course sequence for students focusing on learning more advanced communication skills to more effectively work with persons who are deaf or hearing impaired. Students will develop knowledge of and sensitivity for the experiences, concerns, and conditions which affect deaf/hearing impaired children and adults.

RE 542. SIGN LANGUAGE III 2 HRS.

(Prerequisites, RE540 and RE541.) This class is an advanced level class designed for students with no less than two (2) semesters of college- level American Sign Language (ASL) credit, RE540 and RE541. Students will be introduced to additional linguistic features of ASL, idioms and poetry. Through textbook assignments and class activities students will refine their signing skills and come to a better understanding of ASL and those who use it as their primary language.

RE 636. INTRODUCTION TO GROUP PROCEDURES 3 HRS.

This course provides an introduction to group counseling theory, practice, and skill development. It is designed to provide students the opportunity to develop basic skills in identifying need, structuring

various groups, and facilitating group participation. The course is a blend of didactic presentation, class discussion, small group activity, and total class group facilitation. Students will be encouraged to explore personal barriers to facilitation and given the opportunity to realize the potential of providing educational and self-growth experiences for persons who have a disability. An expectation of this course will be for each student to identify, research, prepare, and present a paper on a topic or theory related to group work. The paper/presentation must address the issue of how techniques/theory etc., can be applied to meet the needs of persons having disabilities. In addition, each student will identify a topic they will hold responsibility for facilitating the entire class in a discussion toward greater self-realization.

RE 640. DISABILITY POLICY AND HUMAN SERVICE SYSTEMS 2 HRS.

This course will review the major disability service delivery systems in the United States including the public/not-for-profit sector, private for profit sector, independent living rehabilitation, disability management, social security, and other related human service systems that provide services to individuals with disabilities. This class will look at the definition of disability across all of these service systems. The Americans with Disabilities Act and other major legislation that have influenced the delivery of services and/or the discrimination of persons with disabilities will be covered in depth.

RE 641. CASE MANAGEMENT & COORDINATION 3 HRS.

(Prerequisites, RE290, RE291, and RE392.) Designed to provide the student with an understanding in depth of the principles and techniques involved in casework procedures in social and rehabilitation service agencies. The student will learn the essential content of the client study process and techniques in plan formulation and implementation.

RE 683. FAMILY ISSUES AND ADVOCACY 3 HRS.

This course will examine some of the principles and theories that influence family services, and the roles and factors that significant others play in supporting rehabilitation services to individuals. It will emphasize a holistic view of the family, disability, and rehabilitation services to individuals. Issues that impact personal adjustment and rehabilitation goal attainment will be explored as well as the meaning of "family" in today's society. Legislation and agency policy will be explored to understand the economic implications to families with members who have disabilities.

RE 692. VOCATIONAL INFORMATION AND ASSESSMENT 3 HRS.

An orientation to occupations, occupational information assessment instruments, assessment techniques and information interpretation as utilized in various vocational rehabilitation settings. Consideration will also be given to various theoretical approaches to vocational planning and the impact of theory in practice.

RE 695. EMPLOYMENT ISSUES IN REHABILITATION 3 HRS.

This course explores the factors that influence successful employment of people with disabilities in the current labor market. Emphasis is placed on meeting the needs of both the worker with a disability who is seeking employment and the employer who creates employment opportunities for workers. Students are introduced to business and social forces which shape the labor market and how to use those forces in employment planning with workers with disabilities. Strategies for doing employer development, job development, and job placement in public and proprietary sectors are examined. Students will learn job seeking skills and how to design employment supports for workers with disabilities.

RE 699. INTERNSHIP IN REHABILITATION SERVICES 1-9 HRS.

(Prerequisite, permission required.) The opportunity for supervised application of theory to practice in a rehabilitation setting under direct supervision of qualified persons in the host agency and the university faculty.

RE 700. SEMINAR IN REHABILITATION SERVICES 1 HR.
(Prerequisites, RE699 or concurrent or permission required.) This course will provide the opportunity for undergraduate students to share and learn from the experiences of other students participating in a variety of internship field experiences. Students will meet periodically on campus to review problems encountered and to discuss issues that influence the delivery of rehabilitation services. Students enroll in the seminar during the semester they are completing an internship.

RE 701. FOUNDATIONS OF REHABILITATION COUNSELING 3 HRS.
The purpose of this course is to provide students with the foundations of rehabilitation and the rehabilitation counseling profession. The course will introduce students to relevant aspects of rehabilitation history, philosophy, values and practice, with an emphasis on the operational aspects of the rehabilitation service delivery system. The course will examine current issues, community resources, services, and the vocational rehabilitation process.

RE 725. COUNSELING AND DISABILITY ISSUES OF RETURNING VETERANS OF WAR 3 HRS.
This course focuses on physical, psychological, cognitive, emotional, and vocational issues of returning veterans of war. The effects of disability on veterans and their families following their assimilation back into society are explored. Focus on the most prevalent disabilities experienced by veterans of war will be discussed, as well as the EEOC and other relevant state and federal mandates pertaining to employment of returning veterans. There is substantial focus on the issues of veterans and military personnel who are women, as well as veterans from culturally and ethnically diverse populations.

RE 741. TECHNOLOGY IN REHABILITATION 1 HR.
This special course will explore the use of access and assistive technology in the rehabilitation process. Classroom activities will focus on awareness and decision making in selecting and using technology to assist people with disabilities in the rehabilitation process. Students will explore ways in which people with disabilities use technology, the theory involved in the employment of assistive technology and the role that the rehabilitation counselor plays in the assistive technology process. Students will experiment with the "information highway" and learn how it can be utilized in locating rehabilitation knowledge and information.

RE 742. MANAGEMENT AND LEADERSHIP IN REHABILITATION 2 HRS.
This course focuses on the role of management and leadership in various rehabilitation agencies/programs. The course will emphasize examination of management principles from a global perspective to local application of administrative policies and their relation to external influences. Various domains of responsibility will be explored as they pertain to the modern manager's multiple functions in the agency/facility environment. The importance of politics, long-range planning, personnel policies, limited resources, service delivery attitudes, and personnel qualifications will also be examined.

RE 743. GRANT WRITING IN HUMAN SERVICES 1 HR.
This special seminar/workshop will examine the major components that are usually required in writing and obtaining external grant funding. The essential elements and preparation guidelines that need to be considered in writing a grant application as well as the typical process of grant review or evaluation will be covered. The class will also provide suggestions and handouts that might facilitate success in obtaining external grant funding.

RE 744. CONFLICT RESOLUTION 1 HR.
This course is designed to give human service professionals, counselors, and educators an overview of the principles of conflict resolution as a viable and appropriate clinical intervention. As such, the course focuses upon etiology and nature of conflict, social norms and roles, and conflict resolution. Conflict resolution strategies will also be examined and practiced.

RE 746. PSYCHOPHARMACOLOGY II 3 HRS.
This is a graduate level course addressing the application of psychopharmacologic interventions as a component of comprehensive mental health care. Initial emphasis placed on scientific study of the actions of drugs and their effects on mood, sensation, thinking, and behavior. The course assists the counselor in training understand their role in working with medical professionals in the concurrent treatment of mental health issues using an interdisciplinary approach. Additionally, students will examine the ethical uses of psychopharmacology within the context of consumer care and service planning. Students will examine their role in the process of referring consumers for prescription medications including identifying medical health professionals for referral, providing consumer information to the prescribing professional, and the collaborative relationship between the mental health professional and prescribing professional.

RE 855. SUPERVISED PRACTICUM IN REHABILITATION COUNSELING 3 HRS.
(Prerequisites: CE825 and RE701) Students must have an approved application for admission to the practicum the semester before expected enrollment. Students will complete a total of 100 hours of practicum. This course is designed to provide graduate RC students with the opportunity to apply case management and counseling skills in community settings. RCs-in-Training are closely supervised by a site supervisor and a faculty clinical supervisor. This course transitions students from theoretical and academic applications to practical and real-world applications of job-related assessment, exploration, placement, development, and supports and related counseling strategies and issues. Career counseling, and identification and referral of consumers' medical and psychological issues is emphasized.

RE 899. INTERNSHIP IN REHABILITATION 1-12 HRS.
(Prerequisites, RE855 and permission required.) Opportunities for the application of theory in the practice of rehabilitation counseling and case management in a rehabilitation setting. Provided under the general direction and supervision of the university and the direct supervision of a qualified person within the agency or facility. Review of clients' problems, possible solutions, and rehabilitation planning is emphasized.

SPANISH

SA 100. SPECIAL PROJECTS IN SPANISH 1-3 HRS.
Topics of general interest to non-Spanish majors will be studied and some basic pronunciation characteristics of Spanish will be introduced. Topics may be Spanish for the policeman, fireman, medical personnel, urban worker, tourist, etc.

SA 110. SPANISH LANGUAGE & CULTURE I 5 HRS.
Fundamentals of pronunciation. Vocabulary building. Practice in understanding and speaking simple phrases. Elementary reading, writing and grammar. Some study of the culture of the Spanish-speaking countries. Offered every semester.

SA 130. INTENSIVE SPANISH 2 HRS.
An intensive introduction to the sounds and structures of Spanish. The course will be devoted to conversation and to providing as much input as possible.

SA 210. SPANISH LANGUAGE & CULTURE II ▶ **5 HRS.**
Continuation and expansion of Spanish Language & Culture I with further emphasis on understanding, speaking, reading and writing. Study of the culture of Spanish-speaking countries continued. Offered every semester.

SA 301. SPANISH IMMERSION WORKSHOP **1 HR.**
This course is designed to provide a Spanish-speaking setting for Spanish teachers needing practice in conversational skills. The course will also allow teachers to immerse themselves in culture through music, video, Internet resources, and literary readings.

SA 305. SUMMER STUDY IN LATIN AMERICA **1-4 HRS.**
Two to four-week course offered in Costa Rica, Mexico, or other Latin American countries. Combines daily intensive classroom instruction with organized cultural activities and excursions. Emphasis on strengthening conversational and compositional skills, expanding vocabulary, and deepening cultural awareness.

SA 313. SPANISH LANGUAGE & CULTURE III ▶ **5 HRS.**
Continuation of Spanish Language & Culture II. Expanded understanding and speaking with greater emphasis on reading and writing. Study of the culture of the Spanish-speaking countries continued. Offered every semester.

SA 314. SPANISH HERITAGE LANGUAGE AND CULTURE **5 HRS.**
This intermediate level course offers Heritage learners the opportunity to expand their understanding and speaking in Spanish with added emphasis on writing and reading. This course offers the study of the culture of Spanish speaking countries as well as US Latino culture and language for those who identify as bilingual or Heritage learners. Offered every semester and online.

SA 339. READING AND CONVERSATION **3 HRS.**
This course is designed to promote further development of reading and speaking skills as well as to enhance the student's knowledge of contemporary culture of Spanish-speaking countries. Phonetics and pronunciation will be emphasized as well. Offered every fall.

SA 349. STUDIES IN SPANISH IN THE PROFESSIONS **3 HRS.**
(Prerequisites, SA 339 or instructor permission.) This course focuses on engaging students in real-world scenarios (such as role play, individualized vocabulary and projects, presentations, etc.) and relevant contexts that will be useful for success in careers in all professional fields. Topics include health & wellness, consumerism & marketing, information technology, education & experience, journalism, and others.

SA 359. ADVANCED GRAMMAR AND COMPOSITION **3 HRS.**
(Prerequisite, SA 339 or instructor permission.) This course is intended to further develop the student's abilities in composition. Deeper analysis of Spanish grammar, morphology and other aspects of linguistics will be emphasized. Offered every spring.

SA 365. INTRODUCTION TO HISPANIC LITERATURE **3 HRS.**
(Prerequisite, SA 339 or SA 359 or permission of instructor.) General introduction to the principles and vocabulary of literary study in Spanish. Works of Peninsular and Latin American literature will be read to illustrate these principles. Offered every fall.

SA 379. CIVILIZATION OF SPANISH-SPEAKING COUNTRIES **3 HRS.**
(Prerequisite, SA 339 or SA 359 or permission of instructor.) Culture, history, geography and economy of Spanish-speaking countries. Offered every spring.

SA 389. STUDIES IN THE CULTURE OF SPAIN **3 HRS.**
(Prerequisite, SA 365 or SA 379 or permission of instructor.) An in-depth study of issues in Spanish culture. Content will vary from year to year with possible emphases on history, film, politics, racial and ethnic issues, etc.

SA 399. STUDIES IN THE CULTURE OF LATIN AMERICA **3 HRS.**
(Prerequisite, SA 365 or SA 379 or permission of instructor.) An in-depth study of issues in Latin American culture. Content will vary from year to year with possible emphases on history, film, politics, racial and ethnic issues, etc.

SA 410. PHONETICS AND CONVERSATION **3 HRS.**
Introduces students to problems and issues in Spanish phonetics and provides intensive practice in the pronunciation and conversational use of Spanish. Especially recommended for BSE students and, when possible, students preparing for study abroad programs in Spanish-speaking countries.

SA 415. SURVEY IN HISPANOPHONE LITERATURE AND CULTURE **3 HRS.**
(Prerequisites, SA 379 or instructor permission.) An introduction to prominent issues, themes, and writers in Hispanophone culture from the medieval period through the 21st century.

SA 426. READINGS IN HISPANOPHONE LITERATURE AND CULTURE **3 HRS.**
(Prerequisite, SA 379 or instructor permission) In-depth study of issues, writers, and genres in Hispanophone literature.

SA 435. SURVEY OF PENINSULAR LITERATURE AND CULTURE **3 HRS.**
(Prerequisite, SA 365 or SA 379 or permission of instructor.) An introduction to prominent issues, themes, and writers in Peninsular literature from the medieval period through the 20th century.

SA 446. READINGS IN PENINSULAR LITERATURE AND CULTURE **3 HRS.**
(Prerequisite, SA 365 or SA 379 or permission of instructor.) In-depth study of issues, writers, and genres in Peninsular literature.

SA 455. SURVEY OF LATIN AMERICAN LITERATURE **3 HRS.**
(Prerequisite, SA 365.) Introduction to prominent issues, writers, and themes in Latin American literature from the Conquest through the 20th century.

SA 466. READINGS IN LATIN AMERICAN LITERATURE AND CULTURE **3 HRS.**
(Prerequisite, SA 365 or SA 379 or permission of instructor.) In-depth study of issues, writers, and themes in Latin American literature.

SA 475. INDEPENDENT STUDY **1-4 HRS.**

SA 489. STUDIES IN TRANSATLANTIC LITERATURE AND CULTURE **3 HRS.**
(Prerequisites, SA 379 or instructor permission.) An in-depth study of issues in Transatlantic culture. Content will vary from year to year with possible emphases on history, film, politics, racial and ethnic issues, etc.

SA 495. SPECIAL TOPICS IN SPANISH **2-3 HRS.**
Topics selected from Spanish literature (Peninsular or Latin-American), language or culture.

SA 635. DIRECTED STUDIES IN SPANISH 1-3 HRS.
(Prerequisite, upper-division, undergraduate or graduate.) Topics selected from Spanish literature, language, or culture (Peninsular or Latin American).

SA 695. SPECIAL TOPICS IN SPANISH LANGUAGE AND LITERATURE 3 HRS.
(Prerequisite, 17 hours of college Spanish.) In-depth study of the Spanish language or issues, writers, and genres in Peninsular and/or Latin American literature.

SA 774. PRACTICUM IN SPANISH 1-3 HRS.
(Prerequisite, 17 hours college Spanish or equivalent.) Intensive practice in the oral language.

SA 835. RESEARCH PROBLEMS IN SPANISH 1-4 HRS.
(Prerequisite, 24 hours college Spanish or equivalent.) Studies by graduate students of problems of special interest in Spanish teaching or in Spanish language and literature. Course planned to meet individual needs. Practical help for Spanish teachers.

SA 855. SEMINAR IN SPANISH 1-4 HRS.
(Prerequisite, 24 hours college Spanish or equivalent.) Projects at the graduate level based on individual needs.

SCHOOL COUNSELING

SC 205. ASSERTION TRAINING 1 HR.
(Prerequisite, consent of instructor.) Assertion Training is primarily designed to help each participant to deal more assertively with others by ranking priorities in their life and communicating honestly with others. Assertive skills are practiced and applied within each small group experience.

SC 250. CONSTRUCTING YOUR CAREER 2 HRS.
This course is designed for students who have not determined an academic major and/or need direction regarding major and career pursuits. Designed with career exploration in mind, students may or may not leave this course with a definite career answer. Rather, this course will equip students with skills that help them make positive career decisions throughout their education at ESU and their lifetime.

SC 320. SPECIAL TOPICS IN SCHOOL COUNSELING 1-3 HRS.
This course is for the study of various special topics and experimental course offerings.

SC 420. GUIDANCE SEMINAR FOR RESIDENTIAL AIDES 1 HR.
A developmental process of late adolescence and early adulthood, examination of the problems involved in student adjustment to college life, understanding of the leadership role, and emphasis on practical application of establishing helping relationships.

SC 610. GRIEF, DEATH AND BEREAVEMENT COUNSELING 1 HR.
A seminar course designed to aid the student in looking at their own feelings and experience with death. Students will look at methods of working through their own grief as well as ways of helping and consoling others. Special problems of understanding and communicating with the critically or terminally ill, recognition of symptoms indicating unresolved grief, and the hospice movement are examined.

SC 625. ANGER MANAGEMENT 1 HR.
This course is designed as an elective, one hour course, to enhance the knowledge base of practitioners with regard to anger management techniques and strategies. The course will cover both school age children and adult interventions. Students will gain both knowledge and practical experiences through various activities and supplemental materials. Successful completion of the course should enable the practitioner to assess and develop interventions for clients experiencing anger management issues.

SC 630. COUNSELING BOYS AND MEN 1 HR.
The purpose of this course is to examine various psychosocial aspects of today's educational systems and their effects on the personal development of boys and the men they become. The importance of parents, teachers, and counselors will be emphasized and various methods will be described and practiced to help boys overcome the social and emotional challenges they encounter.

SC 700. ISSUES & BEST PRACTICE IN HIGH SCHOOL COUNSELING 3 HRS.
(Prerequisite, school counseling concentration.) The purpose of this course is to examine the counseling philosophies, principles, and practices of secondary school counseling. Emphasis is placed on the role of the secondary school counselor as well as the growth and development of individuals from age thirteen to twenty-one. The role of the counselor in assessment, academic program planning, consultation, and referral will be discussed. Current issues and practices related to the concerns of adolescents will be reviewed.

SC 701. SCHOOL COUNSELING FIELD EXPERIENCE 1 HR.
This field experience course is designed to fulfill the Kansas State Department of Education (KSDE) requirements for candidates in the Parallel Pathways Degree Program. This field experience will provide candidates with actual real-life exposure to the role of the school counselor at various levels and with a variety of activities performed as a counselor. This course should be taken as a component to (taken concurrently during the semester they are enrolled in) SC700 Introduction to Secondary School Counseling.

SC 705. ISSUES & BEST PRACTICES IN ELEMENTARY/ MIDDLE SCHOOL COUNSELING 3 HRS.
(Prerequisite, school counseling concentration) The purpose of this course is to examine the counseling philosophies, principles, and practices as they relate to the elementary and middle school. Emphasis is placed on the role of the elementary/middle school counselor as well as the growth and development of children from infancy through age thirteen including special populations. The role of the classroom teacher in classroom guidance activities and the counselor's relationship to other specialized personnel is also discussed.

SC 706. SCHOOL COUNSELING FIELD EXPERIENCE 1 HR.
This field experience course is designed to fulfill the Kansas State Department of Education (KSDE) requirements for candidates in the Parallel Pathways Degree Program. This field experience will provide candidates with actual real-life exposure to the role of the school counselor at various levels and with a variety of activities performed as a counselor. This course should be taken as a component to (taken concurrently during the semester they are enrolled in) SC705 Introduction to Elementary/Middle School Counseling.

SC 710. MULTICULTURAL COUNSELING 3 HRS.
This course will focus on the development of the awareness, knowledge and skills necessary for counseling professionals to provide culturally relevant services to people from ethnic and cultural backgrounds which differ from the counselor's own. These skills are intended to "overlay" the counseling understandings the counselor has developed in other course work. This course emphasizes self-knowledge and uses methods of experiential and didactic learning.

SC 711. SCHOOL COUNSELING FIELD EXPERIENCE 1 HR.

This field experience course is designed to fulfill the Kansas State Department of Education (KSDE) requirements for candidates in the Parallel Pathways Degree Program. This field experience will provide candidates with actual real-life exposure to the role of the school counselor at various levels and with a variety of activities performed as a counselor. This course should be taken as a component to (taken concurrently during the semester they are enrolled in) SC710 Multicultural Counseling.

SC 715. COUNSELING CONSULTATION & COLLABORATION 3 HRS.

A course designed to help the student understand adult-child relationships and how to deal more effectively with the misbehaving child in the home and school. Techniques for consulting with parents and conducting parent education will be examined.

SC 716. SCHOOL COUNSELING FIELD EXPERIENCE 1 HR.

This field experience course is designed to fulfill the Kansas State Department of Education (KSDE) requirements for candidates in the Parallel Pathways Degree Program. This field experience will provide candidates with actual real-life exposure to the role of the school counselor at various levels and with a variety of activities performed as a counselor. This course should be taken as a component to (taken concurrently during the semester they are enrolled in) SC715 Parenting and Parent Consultation.

SC 719. CREATING CLASSROOM CLIMATE 1 HR.

This course takes a critical look at common or traditional practices of classroom management and discipline. We will challenge some of the teacher-directed models that require children to conform, and compare these models to models that encourage a classroom community that focus on students learning to problem solve as a group to build a cohesive classroom.

SC 720. SPECIAL STUDIES IN COUNSELING 1-3 HRS.

(Prerequisite, permission required.) The purpose of this course is to provide in-depth studies in the highly specific dimensions of the counseling field. Topics to be covered will vary from semester to semester.

SC 805. PROFESSIONAL AND ETHICAL ISSUES IN COUNSELING 1 HR.

A general survey of professional, ethical, and legal concerns facing the practicing counselor as applicable to school, community, and agency settings. Comparison will be made with similar issues in other helping professions.

SC 807. WORKSHOP IN ELEMENTARY SCHOOL GUIDANCE 1-3 HRS.

The workshop will consist of lectures, small group discussions, films, filmstrips, video tapes, audio tapes, and related activities in the area of guidance and counseling in the elementary school. Designed to provide in-service training for elementary school counselors. Also provides an opportunity to exchange ideas as well as review the most recent literature and materials pertaining to elementary school guidance.

SC 821. SCHOOL COUNSELING FIELD EXPERIENCE 1 HR.

This field experience course is designed to fulfill the Kansas State Department of Education (KSDE) requirements for candidates in the Parallel Pathways Degree Program. This field experience will provide candidates with actual real-life exposure to the role of the school counselor at various levels and with a variety of activities performed as a counselor. This course should be taken as a component to (taken concurrently during the semester they are enrolled in) SC820 Career Counseling and Development.

SC 860. LEADERSHIP AND ADVOCACY 3 HRS.

(Prerequisites, 15 graduate hours of SC courses including SC700 and SC705.) A study of the processes involved in developing, organizing, and managing counseling program services in school and agency settings. The relationships between school counseling programs and various types of agency programs are also explored.

SC 861. SCHOOL COUNSELING FIELD EXPERIENCE 1 HR.

This field experience course is designed to fulfill the Kansas State Department of Education (KSDE) requirements for candidates in the Parallel Pathways Degree Program. This field experience will provide candidates with actual real-life exposure to the role of the school counselor at various levels and with a variety of activities performed as a counselor. This course should be taken as a component to (taken concurrently during the semester they are enrolled in) SC860 Leadership and Advocacy.

SC 871. SUPERVISED PRACTICUM IN SCHOOL COUNSELING 3 HRS.

(Prerequisites - Completion of each of the following with a "B" or better: SC700, SC705, SC710, SC715, SC805, CE810, CE820, CE825, and CE830; and have an approved application for admission to the practicum the semester before expected enrollment; permission required.) This course involves a supervised clinical experience in an approved school-based placement in which the student is able to integrate professional knowledge and judgment, receive intensive practice to increase effectiveness in counseling skills, methods, conceptual thinking, and treatment planning for individual and small group counseling, and gain experience in consulting. The student must document 100 clock hours in clinical related activities including 40 hours of direct individual or small group counseling with students on an approved caseload; participate weekly in two and one-half hours of supervision with the university supervisor (1 hour individual or triadic; 1.5 hour class group). The course includes experiences in preparing clinical formatted case notes, consulting with teachers, other professionals, and parents, critiquing audio/video recordings of counseling sessions, writing case conceptualization reports, and continuing development of one's personal theory of counseling.

SC 881. SCHOOL COUNSELING INTERNSHIP 1-6 HRS.

(Prerequisites: All course work must be completed, have an approved application for admission to the internship the semester before expected enrollment and permission required.) Interns will complete a 600 clock hour experience at a site of sites that offer opportunities for working with students in grades kindergarten through grade twelve. The intern will engage in both individual and group counseling as well as a variety of other activities that a regularly employed staff member in the setting would be expected to perform. In general the successful completion of this experience should enable the prospective school counselor to function as the coordinator of a comprehensive school guidance program, grades K through 12.

SC 890. RESEARCH PROBLEMS IN COUNSELING 1-4 HRS.

(Prerequisite, permission required.) Under individual direction, the student will select and pursue the investigation of special problems not ordinarily covered by regular courses. Admission and approval of projects must come from the Chair of the Department of Counselor Education.

SC 895. THESIS, M.S. 1-5 HRS.

(Prerequisite, permission required.) Designed for graduate students working toward the degree, Master of Science, and specializing in school counseling. Permission to enroll to be granted by the Chair of the Department of Counselor Education.

SPECIAL EDUCATION

SD 303. SPECIAL TOPICS IN SPECIAL EDUCATION 3 HRS.

A sub-title will be assigned for each special topic offered. The course will be taught on demand to provide in-depth consideration of specialized topics and current issues in special education.

SD 550. SURVEY OF EXCEPTIONALITY 3 HRS.

(Prerequisite, PY 100.) This course provides an introduction to each of the following exceptionalities: gifted and talented, learning disabled, mentally retarded, behavior disordered, visually impaired, hearing impaired, communication disordered, physically disabled, and early childhood disabilities. Specific information presented for each exceptionality includes the following: 1) etiology; 2) assessment/identification; 3) characteristics, and 4) basic remediation/intervention techniques.

SD 560. COLLABORATION AND STRATEGIES FOR INCLUSIVE SETTINGS 3 HRS.

(Prerequisite, SD 550.) This course provides the elementary teacher with the attitudes, skills, and strategies to educate children with a diverse range of learning needs in the general education classroom. This would include the gifted and talented, children with learning and behavior disabilities, distractibility and/or hyperactivity, health problems, sensory impairments, children who are at risk, and the culturally diverse. The teacher will also be provided with skills to increase the desire and ability to collaborate with other professionals, paraeducators, and parents in a team effort.

SD 650. INSTRUCTIONAL TECHNIQUES FOR INDIVIDUALS WITH GIFTEDNESS AND LEARNING DISABILITIES 1 HR.

(Prerequisite, SD 550.) The course provides coverage of current legislation and practices regarding identification, characteristics, and instruction regarding the learning disabled/gifted. Learning strategies will be identified that are appropriate for the individual with giftedness and learning disabilities. Specific case studies will be utilized. Appropriate strategies will be explored as they relate to parents and administrators.

SD 700. CHARACTERISTICS OF STUDENTS WITH HIGH INCIDENCE DISABILITIES 3 HRS.

This course provides an introduction to the following exceptionalities: learning disabled, mentally retarded, behavior disordered and other disability categories. Specific information presented for each exceptionality includes the following: 1) etiology; 2) assessment/identification; 3) characteristics; 4) basic remediation/intervention techniques. Legislation pertaining to individuals with disabilities will also be emphasized.

SD 702. STRATEGIES FOR STUDENTS WITH HIGH INCIDENCE DISABILITIES 3 HRS.

This course will provide the candidate with descriptions and applications of methods and strategies for teaching students with mild and moderate disabilities in need of an adapted curriculum. Candidates will participate in a variety of activities to demonstrate knowledge and skills to meet the academic and behavioral needs of learners in primary through secondary levels. Candidates will learn educational programming techniques, implementation, and evaluation of appropriate interventions in a variety of roles including consultation and co-teaching.

SD 703. SPECIAL TOPICS IN SPECIAL EDUCATION 1-3 HRS.

(A sub-title will be assigned for each special topic offered.) The course will be taught on demand to provide in-depth consideration of specialized topics and current issues in Special Education.

SD 708. SUPERVISED PRACTICE, HIGH INCIDENCE ELEMENTARY I 3 HRS.

(Prerequisites, SD 700 and SD 702; permission of instructor.) This course provides initial organized observation and instruction of the student with special needs in various learning situations. Candidates will participate in activities associated with the role of a professional educator.

SD 709. SUPERVISED PRACTICE, HIGH INCIDENCE SECONDARY I 3 HRS.

(Prerequisites, SD 700 and SD 702; permission of instructor.) This course provides initial organized observation and instruction of the student with special needs in various learning situations. Candidates will participate in activities associated with the role of a professional educator.

SD 715. COLLABORATION AND STRATEGIES FOR INCLUSIVE SETTINGS 3 HRS.

(Prerequisite, SD 550 or SD 719.) This course provides the classroom teacher with attitudes, skills, and strategies to educate children with a diverse range of learning needs in the general education classroom. This would include the gifted and talented, children with learning and behavior disabilities, distractibility and/or hyperactivity, health problems, sensory impairments, children who are at risk, and the culturally diverse. The teacher will also be provided with skills to increase the desire and ability to collaborate with other professionals, paraeducators, and parents in a team effort.

SD 720. ASSISTIVE TECHNOLOGY 3 HRS.

The purpose of this course is to explore the use of assistive technology to meet the needs of students with exceptionalities and in the rehabilitation process. The course will address assistive technology assessment procedures, differentiating instruction using assistive technology, using assistive technology for students to compensate for their disabilities, assessing the effectiveness of assistive technology, addressing the need for assistive technology through the I.E.P. process, and applying assistive technology to daily living skills and rehabilitation goals.

SD 760. STRATEGIES FOR STUDENTS WITH AUTISM SPECTRUM DISORDERS 3 HRS.

This course will provide the candidate with descriptions and applications of methods and strategies for teaching students with autistic spectrum disorders. Candidates will participate in a variety of activities to demonstrate knowledge and skills to meet the academic, social, and behavioral needs of learners in primary through secondary levels. Candidates will learn educational programming techniques, implementation, and evaluation of appropriate interventions in a variety of roles including consultation and co-teaching.

SD 761. TRANSITION PLANNING FOR STUDENTS WITH DISABILITIES 3 HRS.

This course provides information on current techniques and approaches for teachers to assist students with disabilities and their families for transition. The course offers topics such as foundation of transition education and services; assessment for transition education and services; instructional strategies for transition education; transition to employment, job placement, training, and supervision; transition to postsecondary education; transition to living in the community; and school-based and community-based resources.

SD 762. SPECIAL EDUCATOR PARAPROFESSIONAL SUPERVISION 3 HRS.

This course provides an overview of legal issues, administrative policies and professional practice related to special educator paraprofessional supervision in elementary and secondary schools. The course focuses on effective paraprofessional training as well as effective scheduling and supervising strategies.

SD 799. CONSULTATION AND COLLABORATION 3 HRS.
Students will refine and practice effective communication skills. Current models of consultation/collaboration will be presented and critical.

SD 801. SEMINAR IN CURRENT ISSUES IN SPECIAL EDUCATION 3 HRS.
This course provides a format for discussing current issues, trends, and research affecting individuals with special educational needs. A pair of candidates select a topic from an array of issues, research, analyze, and summarize the topic and direct a seminar presentation, assisted by the informed discussion and questions from all others enrolled in the class.

SD 802. SEMINAR IN BEHAVIOR MANAGEMENT 3 HRS.
This course provides a practical guide to experienced teachers, teachers-in-training, parents, and paraprofessionals for applying behavior management techniques both in general and special education settings and in the home. The course focuses on the principles of behavior management and their application in the educational programs, as well as in the home. This course will help the student become a critical thinker, creative planner, and effective practitioner.

SD 803. PROMOTING LITERACY FOR STUDENTS WITH HIGH INCIDENCE DISABILITIES 3 HRS.
(Prerequisites: SD 700 and SD 702) The focus of this course is to provide candidates with the background knowledge, current research, and instructional design that make up a literacy program. The course content will cover the critical elements of language and literacy; identifies and uses evidence-based interventions to meet the instructional needs specific to reading, writing, math and other content areas; and includes the principles of universal design for learning and the use of technology to support literacy and to make data-based decisions.

SD 804. INSTRUCTING INDIVIDUALS WITH SIGNIFICANT DIFFICULTIES 3 HRS.
(Prerequisites; SD 700, SD 702 or permission of instructor.) This course addresses the instruction of students with significant learning and adaptive behavior needs. The course provides perspective on delivering the instruction in the least restricted environment through a continuum of placements ranging from inclusion in the general education classroom to pull-out programs in special education.

SD 805. ADVANCED BEHAVIOR INTERVENTIONS 3 HRS.
(Prerequisites; SD 802 or PY 851.) This course provides a practical guide to experienced teachers, teachers-in-training, parents, and paraprofessionals for applying behavior management techniques both in general and special educational settings and in the home. The course focuses on the principles of behavior management and their application in the educational programs, as well as in the home.

SD 806. FAMILY, PROFESSIONAL WORKING WITH EXCEPTIONALITY 3 HRS.
This course focuses on a family systems perspective and emphasizes the importance of parent/family and professional collaboration and a multicultural approach. The course will cover theory, research, and best practices related to the family-professional partnership from both general and special education.

SD 807. SECONDARY SCHOOL PROGRAMMING FOR INDIVIDUALS WITH SPECIAL NEEDS 3 HRS.
This course provides an overview of research validated methods and materials that teachers should use while instructing adolescents with high-incidence disabilities and ways to address learning and behavioral problems that are typical of such adolescents. The content of the course is cross-categorical with emphasis on methods found to be effective with all types of youth with high-incidence disabilities.

SD 808. SUPERVISED PRACTICE, HIGH INCIDENCE ELEMENTARY II 3 HRS.
(Prerequisite, SD 700, SD 702, SD 708 or SD 709, SD 803, SD 820 and permission of instructor.) This course provides organized observation and instruction of the student with special needs in various learning situations. Candidates will participate in activities associated with the role of a professional educator.

SD 809. SUPERVISED PRACTICE HIGH INCIDENCE, SECONDARY II 3 HRS.
(Prerequisite, SD 700, SD 702, SD 708 or SD 709, SD 803, SD 820 and permission of instructor.) This course provides organized observation and instruction of the student with special needs in various learning situations. Candidates will participate in activities associated with the role of a professional educator.

SD 820. ASSESSMENT IN SCHOOLS 3 HRS.
This course is a survey of the broad spectrum of psychological tests used in the assessment of human potential and functioning. The focus is on the nature, use, and interpretations of various methods of evaluation with specific reference to measurement in the areas of aptitude, achievement, interest, personality, and intelligence. Analyzing data and the interpretation of test results is a major emphasis.

SD 850. CHARACTERISTICS OF THE GIFTED 3 HRS.
This course emphasizes definitions of giftedness, characteristics of the gifted, special populations of the gifted and factors involved in the identification of the gifted. Special problem topics are identified and addressed.

SD 851. EDUCATION OF GIFTED LEARNERS 3 HRS.
Development and implementation of gifted programming and differentiated instructional practices for diverse K-12 gifted learners.

SD 852. AFFECTIVE NEEDS OF THE GIFTED 3 HRS.
This seminar provides information on affective aspects of giftedness, emphasizing proactive and preventative approaches.

SD 855. SUPERVISED PRACTICE, ELEMENTARY GIFTS & TALENTS I 3 HRS.
(Prerequisites, SD 850, SD 851 and consent of instructor.) The course provides directed experiences in an educational setting specifically designed for gifted children at the primary and/or elementary level.

SD 856. SUPERVISED PRACTICE, ELEMENTARY GIFTS & TALENTS II 3 HRS.
(Prerequisites, SD 850, SD 851, SD 864, SD 852, and SD 855.) The supervised practicum requires students to draw on knowledge and skills gained in previous gifted education courses to plan and carry out relevant, appropriate projects with gifted elementary students.

SD 857. SUPERVISED PRACTICE, SECONDARY GIFTS & TALENTS I 3 HRS.
(Prerequisites, SD 850, SD 851, and consent of instructor.) The course provides directed experiences in an educational setting specifically designed for gifted children at the junior and/or senior high school level.

SD 858. SUPERVISED PRACTICE, SECONDARY GIFTS & TALENTS II 3 HRS.
(Prerequisites, SD 850, SD 864, SD 852, SD 857 or approval of instructor.) This supervised practicum requires a student to draw on knowledge and skills gained in previous gifted education courses to plan and carry out relevant, appropriate projects with gifted elementary students.

SD 860. ADMINISTRATION AND SUPERVISION 3 HRS.
Principles, practices, and problems related to administering and supervising all areas of special education are dealt with through practical experiences. Special consideration is given to communication with faculty and community, finance, legal questions, state regulations, and research development. Services for all exceptionalities are designed.

SD 861. ISSUES IN SPECIAL EDUCATION AND ADMINISTRATION 3 HRS.
Students will select, research, and propose a solution for current issues affecting the delivery of service in special education.

SD 864. CREATIVE TEACHING AND LEARNING 3 HRS.
The course, appropriate for both special teachers of the gifted and general educators, including teachers, counselors, and administrators, explores the nature of creativity, with the emphasis given to attitudes, motivations, and educational practices which foster the identification, development, and maintenance of creative behaviors.

SD 867. SUPERVISED PRACTICE, SPECIAL EDUCATION SUPERVISOR AND COORDINATOR 1 HR.
(Prerequisite, SD 860.) This practicum provides direct experiences with a supervisor/coordinator in special education, including observation of at least one administrator and participation in an administrative project.

SD 899. MASTER'S CAPSTONE COURSE IN SPECIAL EDUCATION 3 HRS.
The Adaptive Special Education Capstone is the culminating course completed by students seeking the master's degree in the Adaptive Special Education Program. The Capstone will integrate the knowledge gained from previous program courses by having students produce a final project. The course will provide a series of assignments to support students as they develop their final projects. The final project will be an applied one demonstrating the students' mastery of educational theory and pedagogical skills. Additionally, the final project must align knowledge from previous coursework with the students' current or anticipated professional responsibilities as special education teachers or as educational professionals in other roles (e.g., general education teachers) who will be working with students with adaptive disabilities. The final project could take the form of an action research project, a professional in-service, or development of an educational product or process. Students will deliver a public demonstration of the final project at the end of the Capstone semester.

SPORT LEADERSHIP

SL 100. FOUNDATIONS OF SPORT LEADERSHIP & RECREATION 3 HRS.
This course describes and interprets sport leadership and recreation services, including the nature, scope, and significance of sport leadership and recreation as a social and economic force in contemporary society. The course includes the historical and philosophical foundations of sport leadership and recreation; examination of agencies providing services, professional organizations, and career opportunities.

SL 360. FACILITY DESIGN & MANAGEMENT 3 HRS.
(Prerequisites, SL 100) This course is a systems approach to recreation facility management procedures, including facility design and construction, customer service, staffing, policies and procedures, use of resources, facility and programming promotions, routine and preventative maintenance, safety, emergency procedures, and evaluative techniques.

SL 370. SPORT MANAGEMENT 3 HRS.
(Prerequisites, SL 100.) This course will center on helping future leaders in the sport leadership and recreation professions understand the concepts and applications of effective sport and recreational sport programming and administration. The class will especially focus on helping future sport leaders to initiate, maintain, and enhance sport programs.

SL 374. DELIVERY SYSTEMS & ISSUES IN SPORT LEADERSHIP 3 HRS.
(Prerequisites, SL 100) This course is a comprehensive study of commercial, hospitality, military, non-profit agency, outdoor, travel and tourism, and public recreation delivery systems. Students explore and discuss philosophical concepts, resources, program/service elements, professional organizations, relationships, legalities, trends, and career opportunities related to each system.

SL 389. EVENT & PROGRAM DESIGN IN SPORT LEADERSHIP 3 HRS.
(Prerequisite, SL 100.) This course is designed to present theory, research methods, process of program planning, promotion, organizing, implementation, and evaluation as applicable to a variety of programs. Several types of programming and promotion which serve different age groups, interests, and needs will be discussed. The scope of leadership for both professionals and volunteers will be presented in terms of their relationship to programming and promotion. The development of critical thinking toward the implementation of recreation programming and promotion will be introduced.

SL 395. PRACTICUM IN SPORT LEADERSHIP & RECREATION 2 HRS.
(Prerequisite, SL100. Sport Leadership & Recreation majors only) This sport leadership and recreation practicum is designed to familiarize the recreation major with the diverse settings and potential career paths they can pursue for Practicum II (SL470), internship (SL570) and jobs upon entering the work force. This practicum experience offers the student an opportunity to become cognizant of the scope of knowledge, skills and responsibilities often expected of recreation professionals in a variety of work settings and offers a glimpse into what they will be assisting with or performing during their Practicum II experience.

SL 401. AQUATIC MANAGEMENT 3 HRS.
(Prerequisite, RC100) The course is designed to give students the knowledge and skills to manage aquatic facilities. It will examine resources, program/service elements, specific aquatic personnel training, aquatic facilities, professional organizations, legalities, trends, chemical and mechanical needs, and career opportunities related to aquatic facilities. This course will also incorporate lifeguarding training principles and responsibilities from a management perspective.

SL 420. LEADERSHIP IN THE SPORT INDUSTRY & RECREATION 3 HRS.
(Prerequisite, SL 100) This course is designed to give students comprehensive knowledge of the management process, become acquainted with various leadership theories and techniques, as well as group dynamics and problem solving skills, in sport leadership and recreation service agencies. This will offer experiences of organizing leadership practices and financial resources in a variety of sport leadership and recreational settings.

SL 430. REVENUE MANAGEMENT IN SPORT LEADERSHIP & RECREATION 3 HRS.
(Prerequisite, SL100.) This course is designed to give students comprehensive knowledge of the management process, become acquainted with various leadership theories and techniques, as well as group dynamics and problem solving skills, in recreation service agencies. This will offer experiences of organizing leadership practices and financial resources in a variety of recreational settings.

SL 451. PROFESSIONAL DEVELOPMENT IN SPORT LEADERSHIP & RECREATION 1 HR.
(Prerequisites, SL395.) This course serves as a synthesizing force in the student's academic preparation for the internship experience. The focus of the course is on self exploration, internship/career search, identification and development of internship/career goals, professional letters, resume construction, interview techniques, problem solving and decision making, internship site selection, and other professional development processes.

SL 470. PRACTICUM II IN SPORT LEADERSHIP & RECREATION 3 HRS.
(Prerequisites, SL395. Sport Leadership & Recreation majors only.) This sport leadership and recreation practicum is designed to prepare the student with skills and abilities to successfully compete in the quest for an internship and a professional job. This practicum experience offers an opportunity to gain further insight into recreation content, problems, issues and skills previously studied. It offers the student opportunities to apply these during this practicum experience.

SL 570. INTERNSHIP IN SPORT LEADERSHIP & RECREATION 12 HRS.
(Prerequisites, SL 470. Sport Leadership & Recreation majors only.) The internship is designed to provide the student an in-depth experiential education opportunity with an approved agency or business. The student will work under the direct supervision of an approved full time professional and a university supervisor.

SOCIOLOGY

SO 100. FIRST YEAR EXPERIENCE: TRANSITIONS AND CONNECTIONS 1 HR.
(Consent of instructor needed.) The purpose of this course is to provide first-year students majoring in either sociology or crime and delinquency studies with a first-year seminar experience that will help them achieve success at Emporia State University. In addition to providing essential information about university and departmental requirements, the course will assist students in making connections with faculty, fellow students, staff, and the local community, that will not only help them realize their educational and career goals, but to enrich their personal lives as well. Consistent with successful first-year experiences nation-wide, this course will focus on helping students develop relationships with members of the university community that will embed them in a culture of hard work, academic engagement, and service.

SO 101. INTRODUCTION TO SOCIOLOGY 3 HRS.
A study of the factors in the social life of people, such as culture, groups, collective behavior, communities, social institutions, and social change.

SO 125. INTRODUCTION TO CRIMINAL JUSTICE 3 HRS.
This course provides an overview of the criminal justice system, focusing on the American criminal justice system including law enforcement, courts, and corrections.

SO 202. SOCIAL PROBLEMS 3 HRS.
An analysis of contemporary American issues, as well as a review of the traditional perspectives from which social scientists have viewed American problems; an emphasis is placed on a review of the issues, i.e., racism, sexism, welfare, mental illness, alcoholism, drug addiction, as well as a review of the process through which individuals and situations become defined as social problems.

SO 261. INTIMATE RELATIONSHIPS 3 HRS.
Emphasizes the relationships in marriage and family living both theoretically and anecdotally. A study of individual differences, family structures and functions, external forces affecting the family, and changes over the family life cycle will be addressed.

SO 300. TOPICS IN SOCIOLOGY 1-3 HRS.
Investigations into selected areas of sociological thought.

SO 301. SPORT IN SOCIETY 3 HRS.
A sociological analysis of sport in contemporary American Society. Focus is upon sport as a form of social interaction which reflects, reinforces, and helps create basic societal norms, values, attitudes, and beliefs. The impact of sport on the basic social institutions of family, church, school, government, and economics is analyzed from a sociological perspective.

SO 303. SOCIAL DEVIANCE 3 HRS.
A comprehensive treatment of deviant behavior from the sociological perspective. Focus is upon the social processes involved in defining deviance, becoming deviant, and reacting to deviance and deviants. Selected specific areas of deviant behavior in American society will be explored and analyzed.

SO 304. SOCIOLOGY OF THE BODY 3 HRS.
This course will examine societal perspectives of the body. Students will not only use academic sources but explore how society has portrayed the body through various media forms such as film, music and the internet. Students will also refer to current issues and immediate media coverage of the body.

SO 305. SEX, DRUGS AND ROCK & ROLL 3 HRS.
The course will concentrate on the characteristics of social movements in America during the latter half of the 20th century. The social cycles of the past 50 years will be studied from the sociological viewpoint with attention given to the changes in morals, mores, and ideals over time. As part of this study subjects such as the Vietnam War, the draft, political objectives, the Civil Right Movement, Women's Movement, the sexual revolution, and other social revolutions will be examined in depth. Additionally, the effects on society, legal aspects and theories will be a part of the class as well. We will also take a brief look at the current social movements happening in the Mideast today in terms of application of theory and conjecture. A variety of media will be utilized.

SO 306. DEATH AND DYING 3 HRS.
This course will examine societal perspectives of death and dying. Students will not only use academic sources but explore how society has portrayed death and dying through various media forms such as film, music and the internet. Students will also refer to current issues in the area of death and dying and immediate media coverage of death and dying.

SO 307. POP CULTURE 3 HRS.
This course will examine popular culture as an influential institution within our society. Students will take a critical look at popular culture from a sociological perspective. Within this foundation, students will be analyzing society through popular culture.

SO 308. CRIME AND DELINQUENCY PREVENTION 3 HRS.
In this course we will examine various crime and delinquency prevention policies and programs. Topics covered will include basic concepts in crime and delinquency prevention, theories of prevention and research on program effectiveness. The emphasis will be on preventing delinquency as a mechanism to reduce future criminality.

SO 309. LAW AND THE LEGAL SYSTEM 3 HRS.

This course will survey the field of law enforcement as a profession. It will cover the historical development, current and future concepts and trends, and study the roles and functions of law enforcement agents as components of the justice system. An examination of important legal principles and concepts will also be included.

SO 310. LAW ENFORCEMENT 3 HRS.

This course studies the evolution of law enforcement in the United States, law enforcement as a career, police operations, critical issues in law enforcement, and the role of law enforcement within criminal justice system.

SO 315. CRIMINAL INVESTIGATION 3 HRS.

This course studies the purposes and goals of criminal investigations, crime scene and follow up investigations, physical evidence, interview techniques, criminal law and the investigator's role in the judicial process.

SO 320. SOCIAL STRATIFICATION 3 HRS.

Comparative analysis of inequalities of wealth, power and prestige in contemporary societies; class aspects of community structure and social mobility.

SO 325. MEDICAL SOCIOLOGY 3 HRS.

Relationship of sociology to the science of medicine; sociological analysis of the role and status of medical and paramedical personnel in the United States; relationships of medicine to the basic institutions.

SO 330. VICTIMOLOGY 3 HRS.

This course will explore victimization, responses to victimization, offender-victim relationships, violence, crime prevention and crime victim programs. Relationships to the law, sociology, psychology, and criminology will also be examined.

SO 335. CRIMINAL COURT PROCESS 3 HRS.

This course will cover law enforcement, courts, and corrections.

SO 340. COMMUNITY CORRECTIONS 3 HRS.

This course will study the evolution of community corrections in the United States. Diversion and pretrial programs, aspects of probation and parole, economic sanctions and intermediate sanctions, and the future of probation will also be explored.

SO 342. HOMELAND SECURITY 3 HRS.

This course will provide an overview of the history of terrorism in the United States, a brief look at terrorist groups, and a thorough exploration of the Department of Homeland Security.

SO 345. INTRODUCTION TO SOCIAL WORK 3 HRS.

This course will address the mission of social work, career opportunities, basic practices and techniques needed for working with special populations. This course also provides the student an opportunity to explore social work careers within the community, as well as explore one's ethics and values and how they impact your actions and decisions.

SO 347. SOCIAL WORK AND HUMAN BEHAVIOR 3 HRS.

This course will address the mission of social work, career opportunities, basic practices and techniques needed for working with special populations. This course also provides the student an opportunity to explore social work careers within the community, as well as explore one's ethics and values and how they impact your actions and decisions.

SO 350. ADULT DEVELOPMENT AND AGING 3 HRS.

Current social theory and research related to human development during the adult life cycle from young adulthood through old age.

SO 351. INTRODUCTION TO SOCIAL WELFARE 3 HRS.

An introductory course designed to familiarize the student with the field of social welfare, its concepts, methods, and basic processes. Further attention is given to present organization and practices of contemporary agencies and the professional opportunities they offer.

SO 352. SCHOOL AND SOCIETY 3 HRS.

A sociological analysis of education, the school as a social institution, the culture of the school and the interrelationship of society and education.

SO 353. CRIMINOLOGY 3 HRS.

An analysis of the legal system and the legal process through which individuals become defined as criminal; discussion of the possible causes of criminal behavior; analysis of the effectiveness of the present penal system, i.e., methods of rehabilitating and attempts to deter future crimes.

SO 354. INFORMATION, TECHNOLOGY, AND SOCIETY 3 HRS.

This course will provide students with information and preparation needed to understand how human relationships and social institutions are being altered by information technologies. The impact of information technologies on personal relationships, the family, education, medicine, entertainment, religion, politics, warfare, the economy, and criminal justice will be explored.

SO 355. JUVENILE JUSTICE SYSTEMS 3 HRS.

In this course we will explore some of the major issues and problems facing the juvenile justice system(s) in the United States. Specifically, we will examine the ways in which juveniles (status offenders and delinquents) are processed, and the social, political, and individual impact of juvenile justice practices.

SO 356. SOCIAL WELFARE ISSUES 3 HRS.

In-depth exploration of a limited number of timely social issues, examining each in historical, political and social context to fully understand the problems and possible solutions.

SO 360. SOCIAL WORK, FAMILIES AND CHILDREN 3 HRS.

This course will address the field of social work and how social workers make an impact with families that face emotional difficulties, poverty, child abuse, etc. Students will have the opportunity to learn a variety of therapy models and tools. This class will also explore current events and how these events relate to the social work profession.

SO 361. RURAL SOCIETY 3 HRS.

Rural life environments, the characteristics of rural people, their institutions, agencies and activities. Special emphasis placed upon the home, school, church, health, economics, leisure, and other forms of community life.

SO 370. RACE & ETHNIC RELATIONS 3 HRS.

An analysis of relationships among ethnic and racial groups, recent social trends, and the nature and causes of prejudice and discrimination. Emphasis upon intergroup education, methods of research, programs designed to reduce intergroup tension.

SO 375. HOMELESS AND RUNAWAY YOUTHS 3 HRS.

This course will examine historical perspectives, politics, causes, housing, special populations, and solutions among the homeless and runaway youths.

SO 400. THE FAMILY IN SOCIAL CONTEXT 3 HRS.

This course examines the family as one of society's most significant social institutions. The relationship between the family and other institutions such as the economy, education, the political order, religion, medicine and entertainment will be explored in detail. Students will understand the family, its structure and functions and forces that lead to both stability and change.

SO 401. SOCIOLOGY OF RELIGION 3 HRS.

This course looks at religion from a sociological perspective, as one of society's major institutions. It examines how the religion institution operates within the larger social system, in terms of its interconnections with other institutions, and how it affects social behavior. The course will also look at how religion first began in human history, its historical impact on social organization, how it functions as a source of social integration or social conflict, and how it can also lead to major historical change. Regarding the role of religion in the production of social integration, or alternatively, social change, this effect will be explored in reference to the major sociological theories of religion.

SO 402. SOCIOLOGY OF SLAVERY 3 HRS.

To examine the nature of slavery in the ancient world vs. the structure of modern slavery and to examine the material and the cultural aspects of life under slavery in the American continent.

SO 403. SOCIOLOGY OF CORRECTIONS 3 HRS.

Analysis and investigation of origins, processes, organization and contemporary trends of both adult and juvenile corrections in America. Focus will be placed on management, control and treatment of adult and juvenile offenders in both institutions and community based programs.

SO 405. URBAN SOCIETY 3 HRS.

Nature, extent and causes of urbanization; ecology of cities and metropolitan regions; urban types and institutions.

SO 406. POPULATION 3 HRS.

An analysis of the United States and world population trends with special attention to the problems arising from technology and urbanization.

SO 408. CHILD ABUSE AND MALTREATMENT 3 HRS.

The course will address characteristics of physical, sexual, and emotional abuse as well as neglect and inadequate parenting and their effects on child and adolescent victims. Past and current cases will be discussed at length. Social issues will be discussed. Community professionals will share their expertise and experiences.

SO 410. INTIMATE VIOLENCE 3 HRS.

An interdisciplinary examination of domestic violence as a social problem. The course will address characteristics of family violence by examining child abuse and neglect, spousal and partner abuse, sexual assault, and elder abuse.

SO 415. SOCIOLOGY OF CHILDHOOD AND ADOLESCENCE 3 HRS.

An interdisciplinary examination of contemporary childhood and adolescence with emphasis on sociological issues affecting youths.

SO 418. JUVENILE DELINQUENCY 3 HRS.

Covers the causes and extent of delinquency along with identifications, treatment, and prevention. Included are topology and case history concepts.

SO 420. SOCIOLOGY OF DIVORCE 3 HRS.

This course will focus on the effects of divorce on parents and children by defining divorce as a process rather than a singular legal event. Included will be discussion of post-divorce parenting, one-parent household, step family relationships and public policy.

SO 430. SOCIOLOGY OF GENDER 3 HRS.

The course will consist of readings, lecture, perhaps guest speakers, videos, whole class and group discussion, structured observation, individual or group assignments and projects. Gender issues and conflicts.

SO 440. PROFESSIONAL DEVELOPMENT 1 HR.

The course is designed to provide students in sociology and CDS with training in many skills which are vital to their career success, but which are not routinely covered in other sociology courses. These skills include preparing résumés, the job search, job interview questions/issues/tips, student portfolios, job application, presenting research papers, business etiquette, graduate school process, goal setting, and GRE preparation.

SO 450. RESEARCH METHODS 3 HRS.

(Prerequisite, Junior status.) A study of the basic scientific methods in sociological research and to provide selected experience in research design, questionnaire construction, statistics, case analysis, sampling, graphic presentation, and interviewing.

SO 460. SOCIETY AND PERSONALITY 3 HRS.

A study of the concepts, theories and experimental evidence related to the behavior of the person to group factors, including the interaction process, socialization process, social roles and social stresses, and attitude organization and changes.

SO 471. INDEPENDENT STUDY 1-3 HRS.

(Prerequisites, six hours of sociology and consent of instructor.) Special project or readings on a topic initiated by the student and approved by the instructor.

SO 472. SOCIOLOGY PRACTICUM 1-6 HRS.

(Prerequisite, 6 hours of Sociology course work.) The student is placed with a social service agency to gain practical experience in social service activities, planning and leadership.

SO 473. INTERNSHIP IN CRIME AND DELINQUENCY STUDIES 1-6 HRS.

(Prerequisites, 6 hours of criminal justice course work.) The student is placed with a criminal justice agency to gain practical experience in criminal justice activities, planning and leadership.

SO 480. COMMUNITY MENTAL HEALTH 3 HRS.

A comprehensive study of the community mental health model from its inception to present day operation and a look toward the future. Social factors, philosophy of early intervention, local control, and services offered will be reviewed, and career selection will be included.

SO 501. SOCIOLOGICAL THEORY: CLASSICAL 3 HRS.

(Prerequisite, SO 101 or SO 202 and Seniors only.) A survey of the development of sociological thought from the enlightenment period in the 18th Century to the beginning of the 20th Century. Emphasis will be given to the social theorists who have pioneered the principal movements of sociological theory, i.e., August Comte, Karl Marx, Max Weber, and Emile Durkheim.

SO 510. THEORIES OF CRIME AND DELINQUENCY 3 HRS.

(Prerequisite, SO 450 and junior status.) This course is designed to provide the student with an in-depth knowledge of major criminological theories. Topics will include (but not limited to): classical, positivist, functionalist perspectives, etc., and associated theorists. By analyzing a variety of theories, it is also hoped that the student will develop a theoretical view of their own and a critical (i.e., analytical) orientation toward theory in particular and social interaction in general.

SO 520. CRIME AND DELINQUENCY PREVENTION AND INTERVENTION**3 HRS.**

(Prerequisites: SO 450 and Junior Status.) The purpose of this course to examine different strategies and programs for the prevention of crime and delinquency. Special attention will be paid to the empirical and theoretical foundations of prevention and intervention efforts.

SO 540. TOPICS IN SOCIOLOGY**1-3 HRS.**

A course in Sociology offered periodically to cover topics which are important to the discipline but which cannot be taught on a regular basis.

SO 550. RESEARCH METHODS AND STATISTICS IN SOCIOLOGY**3 HRS.**

(Prerequisite, SO450 and Junior status.) This course will provide students with advanced training in Social Research Methodologies. It will focus primarily on survey research techniques, including instrument construction, sampling, coding, and data analysis. Computer and statistical technologies will be utilized. Other methodologies such as observation and the use of existing data sources will also be covered.

SO 553. COMMUNITY ORGANIZATION AND DEVELOPMENT**3 HRS.**

(Prerequisites, junior/senior standing, and/or graduate credit, or permission of instructor.) A multi dimensional, interdisciplinary study of the community--including resources, problems, surveys, and social action models in the development of effective task group organization and leadership.

SO 565. SOCIOLOGICAL THEORY**3 HRS.**

(Prerequisites, SO450 and junior status.) This course builds on the survey of the classical tradition. It examines current (twentieth century) theoretical developments in sociology, including structural functionalism, symbolic interactionism, conflict theory, and phenomenology.

SO 580. SENIOR CAPSTONE**1 HR.**

(Prerequisites: SO 550, SO 565, Senior status.) This one-hour course is designed for upper-level criminal justice/sociology students to give them tools they need to succeed in a criminal justice/sociology organization and beyond. In this course, you will have the invaluable opportunity to learn about criminal justice/sociology organizations, and their various processes and problems of general importance to the field of criminal justice/sociology.

SO 709. SEX EDUCATION**3 HRS.**

A cross disciplinary course which will focus on the physiology of sex, venereal disease, socio psychological aspects of sexuality and the methods applicable to instruction, counseling, and communication in sex education.

SO 750. SEMINAR IN SOCIOLOGY**1-3 HRS.**

(Prerequisites, six hours of sociology and permission of instructor.) In-depth concentration of specialized area in sociology for more advanced students.

SO 752. EDUCATIONAL SOCIOLOGY**3 HRS.**

An interpretation of education from the sociological point of view. Institutionalized education of schooling distinguished from the broader concept of education, which is a continuous process arising out of various institutions and groups, both formal and informal.

SO 810. RESEARCH PROBLEM IN SOCIOLOGY**1-6 HRS.**

(Prerequisites, six hours of sociology, plus consent of instructor.) Special research problem or readings on a topic initiated by the student and approved by the instructor.

COMMUNICATION**SP 022. INTRODUCTION TO DEBATE****3 HRS.**

An introduction to the theory and practice of interscholastic debate for the inexperienced high school student.

SP 072. BASIC ARGUMENTATION**3 HRS.**

Study of the theory and practice of interscholastic debate for the advanced high school student.

SP 100. INTERPERSONAL COMMUNICATION**3 HRS.**

An introduction to the principles and practices of spontaneous, informal interaction between or among human beings. A lecture- laboratory course designed to increase understanding of the process of communicating with another person and develop basic interpersonal skills through structured experiences, group interactions, and readings.

SP 101. PUBLIC SPEAKING**3 HRS.**

An introduction to the principles and practices of preparing and presenting speeches to audiences. A lecture-laboratory course designed to increase understanding of, and develop skills in, the processes of audience analysis, speech preparation, and speech presentation.

SP 142. INTERCOLLEGIATE FORENSICS I**1-3 HRS.**

An introduction to tournament techniques and experience designed for those students actively participating in intercollegiate forensic competition.

SP 222. ARGUMENTATION AND DEBATE**3 HRS.**

This course stresses the theory of argumentation and gives some practical experience in the forms of debate.

SP 242. INTERCOLLEGIATE FORENSICS II**1-3 HRS.**

(Prerequisite, consent of instructor. Not for general education credit.) A continuation of SP 142.

SP 302. DISCUSSION**3 HRS.**

An experiential study of techniques and principles of small group discussion, designed to develop leadership and participation skills. Special focus on group interaction, leader emergence, consensus-making, evaluation of performance, and presenting discussion programs.

SP 303. ORGANIZATIONAL COMMUNICATION**3 HRS.**

Traditional and modern concepts of channels of communication in complex organizations (government, industry, education, etc.). Influence of organizational theory on communicative patterns and organizational goals.

SP 304. ONLINE COMMUNICATION**3 HRS.**

This course examines the role of communication on the Internet. The course identifies the Internet as a means of communication within the context of traditional communications theory.

SP 305. PRINCIPLES OF PUBLIC RELATIONS**3 HRS.**

Modern organizations exist in increasingly competitive environments. The competition for resources as well as for the opportunity to be heard and understood can be fierce. Organizations have to be able to promote and maintain positive images. This course presents students with the opportunity to learn about and fine tune the communication skills needed to facilitate and maintain organizational practices and communications efforts designed to gain favor and commitment from desired publics. This class examines the history of public relations in the U.S., career tracks in both the profit and non-profit sectors, ethical and legal issues, as well as program planning strategies.

SP 306. ADVANCED INTERPERSONAL COMMUNICATION 3 HRS.

(Prerequisite, SP 100.) The course is designed to (1) increase communication skills in interpersonal communication, and (2) increase the student's understanding of theoretical concepts underlying interpersonal communication. Methods of instruction include experiential learning in small groups, lecture and discussion. Student is required to participate in all classes, pass exams and submit a final research paper on a topic of their choice involving some phase of interpersonal communication.

SP 307. ADVANCED PUBLIC SPEAKING 3 HRS.

(Prerequisite, SP 101.) An advanced course in the theory and application of public speaking in a broad range of situations. Students will demonstrate an understanding of how to engage more effectively in listening, critical thinking, audience analysis, suppression of biases, organization, and speech delivery.

SP 312. THEORIES OF COMMUNICATION 3 HRS.

An introduction to classical and contemporary theories of communication. Designed to promote an understanding of (1) the Greek and Roman view of rhetorical theory, (2) contemporary theories of the process of communication, (3) how classical and contemporary standards may be usefully and appropriately adapted to the understanding of speech behavior.

SP 313. INTERVIEWING: PRINCIPLES AND TECHNIQUES 3 HRS.

Theory and practice of methods used in dyadic, face-to-face oral communicative situations traditionally encountered in organizational and professional environments. Practical application of interviewing skills relating to giving and getting information and job-employment situations is provided, through role-playing and real-life interviews in and out of class.

SP 315. SMALL GROUP COMMUNICATION 3 HRS.

An investigation of theories and precepts in small group communication. Emphasis on decision-making, norms, leadership, problem-solving, and skills development. Review of the research literature. Active involvement in research projects.

SP 322. THEORIES OF ARGUMENT 3 HRS.

A study of the traditional and contemporary theories of argumentation. The student gains an understanding of the syllogism, the enthymeme, the structural model of argument, and other formal types of reasoning.

SP 325. NONVERBAL COMMUNICATION 3 HRS.

(Prerequisite, SP 100 or SP 101.) A study of theories and behaviors of nonverbal communication in communication contexts, that are interpersonal, intergroup, and intercultural. Development of nonverbal communication skills.

SP 329. PRINCIPLES OF RADIO/TV BROADCASTING 3 HRS.

(Prerequisite, SP 100 or SP101.) This course examines the origins and historical development of radio and television broadcasting; develops student awareness of legal, ethical, and economic issues in the broadcast media; and acquaints students with the various types of on-the-air announcing.

SP 331. RHETORICAL CRITICISM 3 HRS.

A study of representative critical methods and the theoretical assumptions which lie behind them. Participation in the class involves student writing of frequent critical essays in which the methods are applied to historical and/or contemporary examples of public address.

SP 332. THEORIES OF PERSUASION 3 HRS.

(Prerequisite, SP 100 or SP 101.) A study of the theories of persuasion and their applications, with special emphasis on the rhetorical and psychological principles involved. Consideration of the studies of source credibility, the structure and content of persuasive messages and of attitude change affected by the persuasive discourse. Opportunity for the preparation and criticism of persuasive messages by the students.

SP 342. INTERCOLLEGIATE FORENSICS III 1-3 HRS.

A continuation of SP 242.

SP 350. INTERCULTURAL COMMUNICATION 3 HRS.

This course addresses both culture-general and culture-specific approaches to the study of intercultural communication. From a cultural general perspective, awareness and appreciation of cultural differences and suggestions regarding communication strategies to improve interaction with international and co-cultural persons are emphasized. Culture-specific examples are presented and opportunities to explore specific cultures are arranged.

SP 351. STUDIES IN PUBLIC ADDRESS 3 HRS.

Rhetorical analysis of selected topics in the history and criticism of public address, e.g., a speaker or group, debate or a series of debates, social movement, or a political campaign. May be repeated for up to six hours with permission of the instructor, advisor, and department chair.

SP 353. ENTREPRENEURIAL COMMUNICATION 3 HRS.

Entrepreneurial Communication empowers students to think independently, to deliver innovative solutions, to learn to thrive as employees. Students will visit the intersection of communication and the implementation of design thinking within the organizational setting while engaging in experiential, experimental, and adaptive encounters with local economic development agencies and business owners who will assist in idea formation and product development – developing an idea/service/product in relation to concept, feasibility, marketability, business model, and understanding to competition.

SP 355. PUBLIC RELATIONS WRITING 3 HRS.

Students will receive instruction in specialized advocacy writing for organizations and distribution to the print and broadcast media. The course pays special attention to requirements of writing using the Associated Press Style Manual. Students will apply their knowledge through a series of assignments using different media for distribution.

SP 360. COMMUNICATION AND GENDER 3 HRS.

Study of how gender and other demographic factors influence our communication style and content. Primary emphasis is on one's gender but other factors that interact with gender to influence communication are also studied. Topics include gender filters, language, nonverbal behaviors, intimacy, and gendered communication in the family, schools, the media, and the work place. SP 360 is an elective course which may be taken for the BFA in Communication, the BSE in Speech Communication (Option B), or the Liberal Arts minor in Communication. It may also be taken for the Ethnic and Gender Studies minor.

SP 362. SOCIAL MOVEMENTS 3 HRS.

Students will study and analyze social movement persuasion. The course utilizes a rhetorical perspective to identify and evaluate strategies that movements employ to create identity, recruit members, and promote social change. Students will apply their knowledge through exams and a research project.

SP 365. PUBLIC RELATIONS TECHNIQUES 3 HRS.

This course focuses on using commonly-practiced public relations techniques to achieve organizational goals, with primary emphasis on print, online media and special events. Its primary purpose is for students to take projects from conception through to final production and distribution.

SP 370. SPECIAL PROBLEMS IN SPEECH 1-3 HRS.

Intensive investigation of particular areas in rhetoric and public address. Offered as a class rather than as an individual project.

SP 400. FAMILY COMMUNICATION 3 HRS.

(Prerequisite, SP 100.) A comprehensive study of the communication process within the family unit. Analysis of how communication undergirds family functioning. Particular emphasis upon understanding and performing communication skills that affect growth and cohesion in the family unit.

SP 403. COMMUNICATION TRAINING AND DEVELOPMENT 3 HRS.

Students in this course learn how organizations determine training needs and develop training programs to meet those needs. The primary focus is on developing communication skills training programs. Oral and nonverbal skills pertinent to conducting effective training programs are examined. To promote experiential learning and the skills-building focus, students in the course must develop and present a training seminar. As a result, pertinent oral and nonverbal communication skills are developed, practiced, and refined.

SP 405. PUBLIC RELATIONS CASES AND CAMPAIGNS 3 HRS.

(Prerequisite, SP 305.) This course combines public relations theory and skills development. Public relations cases are analyzed using public relations principles and theory. Students also apply case knowledge in the field by being assigned to a campaign under the direction of a public relations client-mentor.

SP 432. CONSUMERISM & CULTURE: CRITICAL ANALYSIS OF ADVERTISING 3 HRS.

Students will study and analyze advertising as a specialized form of persuasion. The course utilizes a critical perspective to examine the discursive connections between advertising, culture, and identity. Students will primarily apply their knowledge through analytical papers.

SP 441. HEALTH COMMUNICATION 3 HRS.

This course is a survey of the discipline of health communication. Students will learn how decisions regarding health-related behaviors are influenced by messages, how patients negotiate treatments with health care providers, how we can help others cope with medical difficulties, and how to critically evaluate health research, news, and campaigns.

SP 442. INTERCOLLEGIATE FORENSICS IV 1-3 HRS.

A continuation of SP 342.

SP 470. TEACHING OF SPEECH & THEATRE 3 HRS.

A survey of current classroom practices in speech in secondary schools with emphasis on educational philosophy underlying the selection and use of teaching materials and the testing and evaluation of students in speech, drama, debate, and forensics. Students are required to prepare a year's course of study for teaching in the secondary schools. SP 470 must be completed with a grade of "C" or better prior to student teaching.

SP 471. INDEPENDENT STUDY 1-3 HRS.

Directed reading and/or research in an area of speech not included in the regularly listed courses.

SP 472. INDEPENDENT STUDY (P/NC) 1-3 HRS.

Directed study and experience related to special topics in communication. Expectations for this special project will be established and approved by the instructor before the student enrolls. If expectations are met, a final grade of "Pass" is awarded. If expectations are not met, a grade of "No Credit" is awarded.

SP 473. ACADEMIC INTERNSHIP I 1, 2 & 3 HRS.

Course provides instructor-supervised experience in advising and teaching communication skills. Interns work intensively with one instructor and one class learning how to assist others in improving their communication skills.

SP 474. FIELD INTERNSHIP I 1, 2 & 3 HRS.

This course provides university students with opportunities to explore and clarify their interest, aptitudes, beliefs, knowledge and abilities through career-related experience. Students are placed in professional, paid (optional), supervised positions and complete learning objectives. Students will be required to complete appropriate hours of supervised work. This course creates the first in a sequence of two field internships with a letter grade option.

SP 475. FIELD INTERNSHIP I 1, 2 & 3 HRS.

This course provides university students with opportunities to explore and clarify their interest, aptitudes, beliefs, knowledge and abilities through career-related experience. Students are placed in professional, paid (optional), supervised positions and complete learning objectives. Students will be required to complete appropriate hours of supervised work. This course creates the first in a sequence of two field internships with a pass/no credit option.

SP 490. SEMINAR IN RHETORIC AND COMMUNICATION 3 HRS.

Examine historical/critical, experimental, and descriptive research in rhetoric and communication. Analyze resources and strategies for researching interpersonal, small group, and intercultural communication; language and symbol systems; mass communication; organizational communication; and public communication. Develop competencies for research and writing, interpreting communication literature, and understanding the role of speech communication in vocational and social settings.

SP 500. CONFLICT RESOLUTION 3 HRS.

Course examines the ineffective responses individuals make in a conflict situation, responses such as flight behavior, defensiveness, and manipulation. Particular emphasis upon theoretical models and communication techniques that will assist the student in handling conflict constructively. Methods of instruction include structured experiences, group discussion, assigned readings and lecture.

SP 502. GROUP LEADERSHIP 3 HRS.

(Prerequisite, SP 315.) A laboratory approach to group leadership, including the role of the leader in group interaction, the work of the leader as group representative, and consideration of the research literature on the subject. Field work required.

SP 555. CONTEMPORARY ISSUES IN FREE SPEECH 3 HRS.

The First Amendment's promise of free expression and its impact on expressions of opinion on current artistic, social and political issues are examined. Emphasis is on providing students with theoretical frameworks through which they can make responsible decisions regarding current topics, including hate speech, prior restraint, book-banning, campus speech codes, invasion of privacy, obscenity, seditious speech, information access, and defamation.

SP 560. CAPSTONE 0 HRS.

Majors only. Students enroll in SP 560 for the semester in which they are scheduled to make their capstone presentation. Students will receive a grade of "S" or "U", depending on whether they were successful or unsuccessful in completing their capstone requirement.

SP 570. COMMUNICATION INTERNSHIP I 3 HRS.

Course provides first-hand experience and training in the art of group facilitation. Intern works intensively with one instructor and one class learning how to assist others in improving their communication skills.

SP 571. COMMUNICATION INTERNSHIP II 3 HRS.

(Prerequisites, SP 570.) Course provides a second experience for those individuals who wish to further develop their communication skills as group facilitators. Intern must serve in a different course, preferably with a different instructor, than that served during their first intern experience.

SP 572. DIRECTING FORENSIC ACTIVITIES 2-3 HRS.

(Prerequisite, SP 222.) Strongly recommended for majors and minors who will be directing forensics, leading public discussions or forums, coaching debate, and/or organizing forensic tournaments.

SP 573. ACADEMIC INTERNSHIP II 1, 2 & 3 HRS.

(Prerequisite, SP 473.) Course provides a second instructor-supervised experience for those individuals who wish to develop further their advising and communication skills. Interns must serve in a different course, preferably with a different instructor, than that served during their first intern experience. Not for graduate credit.

SP 574. FIELD INTERNSHIP II 1, 2 & 3 HRS.

This course provides university students with further opportunities to explore and clarify their interests, aptitudes, beliefs, knowledge and abilities through career-related experience. Students are placed in professional paid (optional), supervised positions and complete learning objectives. Students will be required to complete appropriate hours of supervised work. This course creates the second of two in a sequence of field experience internships with a letter grade option. Not for graduate credit.

SP 575. FIELD INTERNSHIP II 1, 2 & 3 HRS.

This course provides university students with further opportunities to explore and clarify their interests, aptitudes, beliefs, knowledge and abilities through career-related experience. Students are placed in professional paid (optional), supervised positions and complete learning objectives. Students will be required to complete appropriate hours of supervised work. This course creates the second of two in a sequence of field experience internships with a pass/no credit option. Not for graduate credit.

SP 580. ANALYSIS OF COMMUNICATION STUDIES 3 HRS.

This course refines knowledge of research in the field of communication. Students will have the opportunity to explore a broad-range of communication-based topics, to integrate their knowledge and skills, and to develop a research-based paper and oral presentation.

SP 722. DEBATE QUESTION ANALYSIS 1-3 HRS.

(Offered only in summer.) Critical analysis of the current high school debate question. A class project is required.

SP 730. SEMINAR IN SPEECH 2-5 HRS.

Seminar classes are offered in such areas as organization communication, mass communication, small group communication, health communication, supervisory communication, persuasion, nonverbal communication, and public communication.

SP 742. DEBATE QUESTION ANALYSIS AND CASE CONSTRUCTION 3 HRS.

This course is designed to acquaint students with the current high school debate proposition. Special emphasis is placed on case construction and analysis in a workshop setting.

SP 830. RESEARCH PROBLEMS IN SPEECH 2-5 HRS.

Directed reading and research in a specific field of speech communication.

SOCIAL SCIENCES**SS 300. TOPICS IN SOCIAL SCIENCES 1-3 HRS.**

This is a readings course for students interested in more in-depth studies in the Social Sciences. Topics, readings, assignments, and due dates will vary based on the particular topic being covered in any given semester.

SS 310. INTRODUCTION TO TEACHING SECONDARY SOCIAL STUDIES 3 HRS.

(Prerequisites, completion of at least 65 hours with a cumulative GPA of 2.5; completion of MA 110 College Algebra (or its approved equivalent) with a C or above; cumulative 2.75 GPA and a minimum grade of C in all courses which apply to the Social Science teaching fields (license).) The purpose of this course will be to introduce future social studies teachers to the framework for teaching the various disciplines that make up the social sciences, e.g., history, government (civics and citizenship education), economics, sociology, and anthropology.

SS 460. TEACHING SECONDARY SOCIAL STUDIES 3 HRS.

(Prerequisites, Must have completed at least 80 hrs.; must have completed MA 225 Math as Decision Making Tool (or its approved equivalent) with a C or above; must have a cumulative 2.75 GPA & a minimum grade of C in ALL courses that apply to the Social Science teaching fields; must have a cumulative GPA of 2.50) A substantive methods course designed for prospective secondary social studies teachers. Emphasis upon the identification and application of content from the social science disciplines to the secondary curriculum.

SS 543. SEMINAR IN SOCIAL SCIENCES 1-3 HRS.

A seminar designed to provide an opportunity to examine the relationship of one or more of the social sciences to specific social phenomena or to techniques by which such phenomena can be examined.

SS 740. ADVANCED METHODS FOR TEACHING SECONDARY SOCIAL STUDIES 3 HRS.

This course examines current trends in social studies education and offers students opportunities to apply current research-based theories and pedagogy to the 6-12 social studies classroom.

SS 743. SEMINAR IN SOCIAL SCIENCES 1-3 HRS.

A seminar designed to provide an opportunity to examine the relationship of one or more of the social sciences to specific social phenomena or to techniques by which such phenomena can be examined.

SS 842. PROJECT, M.A.T. 1-3 HRS.

Required for the Master of Arts in Teaching degree in the Social Sciences.

THEATRE**TH 101. INTRODUCTION TO THEATRE 1 HRS.**

An introductory course for incoming Theatre majors that provides an overview of contemporary production practices in theatre and departmental policies. All students will be given one production or performance assignment for the current semester. This course is designed for Theatre majors and BSE students in Theatre and is not for General Education credit.

TH 105. THEATRE APPRECIATION 2 HRS.

Students examine and discuss the philosophies, techniques, and basic natures of the performing arts from the observation of films, live plays, and television performances. Classroom lectures, demonstrations, and discussions are designed to give the student a fuller understanding and background of man's attempts to express himself in the performing arts.

TH 121. ACTING I † **3 HRS.**

This course will focus on the basic acting skills and craft: concentration, imagination, relaxation, listening, action and reaction, voice and body mechanics. Scenes and monologues will be explored, analyzed, rehearsed, and presented.

TH 131. STAGECRAFT † **3 HRS.**

Provides a fundamental knowledge of the planning, construction, painting and rigging of stage scenery and stage properties. In addition to formal class meetings, students are required to assist with the construction of scenery for ESU theatre productions.

TH 132. STAGECRAFT LAB **1 HR.**

(Prerequisite or co-requisite, TH 131; or consent of instructor.) This is a companion course to Stagecraft for theatre students and transfer students. Through the use of construction materials and techniques, Stagecraft Lab provides the practical application of stagecraft to theatre production. Offered every fall.

TH 133. MAKE-UP **2 HRS.**

The principles and practices of theatre make up are examined and applied in the laboratory. Students execute various laboratory assignments designed to develop their skill in make up application. Offered fall semester only.

TH 142. SUMMER THEATRE PRODUCTION I **1-4 HRS.**

A production course, especially designed for students working in summer stock. Offered summer session only.

TH 177. EDUCATIONAL THEATRE COMPANY **1-2 HRS.**

Audition required. Educational Theatre Company is a lab class designed for first and second year students. Through improvisation, the class will develop performance pieces designed to be used in other classes as teaching aids. The class will also develop creative dramatic and improvisation techniques that can be used in elementary and secondary classrooms.

TH 210. MOVEMENT FOR ACTORS **3 HRS.**

This course addresses fundamental movement techniques and concepts that are applicable to the acting craft. Students will identify personal movement preferences and expand their movement potential providing a foundation for a variety of physical choices that relate to supporting character and given circumstances. Offered spring semester only.

TH 212. DANCE FOR THEATRE I **3 HRS.**

A comprehensive introduction to the techniques, styles, and historic contributions of theatre dance including ballet, jazz, and tap. The course culminates in a brief recital. Offered spring semester only.

TH 221. ACTING II † **3 HRS.**

(Prerequisite, TH 121.) This course will build upon basic craft and skills and work with scenes with complex relationships and situations. The actor's process will be explored. Offered fall semester only.

TH 223. VOICE AND DICTION **3 HRS.**

This course deals with theory and technique for improving voice and articulation in both speech and performance. Exercises in pitch, projection, vocal placement, and articulation are used in conjunction with the International Phonetic Alphabet to help students achieve optimum vocal and articulatory competence.

TH 234 STAGE COSTUMING **2 HRS.**

(Prerequisite, TH 101). A course in costuming to develop an understanding of the process of executing a costume for theatrical productions. This course provides a fundamental knowledge of fabrics, construction and patterning for the stage.

TH 242. SUMMER THEATRE PRODUCTION II **1-4 HRS.**

A production course especially designed for students working in summer stock. Offered summer session only.

TH 271. INDEPENDENT STUDY **1-3 HRS.**

Directed readings and/or research in an area of theatre arts not included in regularly listed courses. Outline of project required before enrolling. Students may repeat for a maximum of twelve hours.

TH 272. THEATRE PROJECTS **1-2 HRS.**

Designed for first-year students and sophomores actively participating in University Theatre productions.

TH 305. THEATRE TOUR **1-2 HRS.**

An exploration of the modern, professional theatre as a cultural institution in New York, London, Minneapolis, and other theatre centers. Students must arrange financing to cover costs of transportation, accommodations, and tickets, which will be arranged at a group discount. Overseas travel requires a valid passport.

TH 310. ADVANCED STAGE MOVEMENT **3 HRS.**

(Prerequisite, TH 210.) This course will compliment performance studies by focusing on advanced physical theatre techniques and practices. Topics which may be covered include: tai chi, unarmed and armed stage combat, mask work, and Viewpoints. Creating new work will be explored as well as supporting character and dramatic action from published plays. May be repeated for credit. Offered spring semester, even years.

TH 312. DANCE FOR THEATRE II **3 HRS.**

(Prerequisites, TH 212.) A continuation of studies begun in Dance for Theatre I.

TH 321. ACTING III **3 HRS.**

(Prerequisite, TH 221) A continuation of TH 121 and TH 221. Students will be introduced to acting theories through classroom discussion, exercises, and individual and group assignments.

TH 323. STAGE DIALECTS **3 HRS.**

(Prerequisite, TH 223.) This course provides the student, through in-class workshops and oral presentations, an opportunity to gain proficiency in and an understanding of the specific phoneme, placement, pitch, and rhythmic changes needed to credibly assume select European and regional American dialects. The course will also strengthen any student's command of the International Phonetic Alphabet and build upon vocal techniques explored in Voice and Diction. Offered spring semester, even years.

TH 325. SCRIPT ANALYSIS **3 HRS.**

An introduction to the crucial practice of reading and understanding plays for the purpose of producing them. The course does not simply focus on the plays as literature. Rather, it is a critical analysis of text leading to production as used by directors, actors, designers, and technicians.

TH 331. SCENERY PRACTICUM † **1 HR.**

(Prerequisites, TH 131. May be repeated for credit, with no limits.) This is a practical workshop in the construction and maintenance of scenery, lighting, props and sound for the stage. Students enrolled in this course will regularly assist with the building and care of scenery required for ESU theater productions.

TH 333. ADVANCED STAGE MAKE-UP **3 HRS.**

(Prerequisite, TH 133.) The advanced principles and practices of theatre make-up are applied in the laboratory. Students execute various assignments on prosthesis, wigs, masks, and special problems. Offered spring semester, odd years.

TH 334. COSTUME PRACTICUM ▶ **1 HR.**
(Prerequisites, TH 234. May be repeated for credit, with no limits.) This is a practical workshop in the construction and maintenance of costumes for the stage. Students enrolled in this course will regularly assist with the building and care of costumes required for ESU theater productions.

TH 335. STAGE MANAGEMENT **2 HRS.**
(Prerequisites, TH 121 and TH 131.) Students will study practical techniques and work to organize the many duties and responsibilities required of the stage manager in the contemporary theatre.

TH 336. STAGE LIGHTING **3 HRS.**
(Prerequisite, TH 131.) Basic principles of electricity, circuiting, lighting systems, and stage lighting instruments are examined. Students are also required to design complete light plots and present the projects to the class for discussion. Students must also perform lighting tasks for University Theatre productions.

TH 338. SCENE PAINTING **3 HRS.**
This is a practical, studio course of traditional scene painting for the theatre. Students will explore the various methods of recreating reality and theatre design through painted illusion by exploring materials and techniques of texture. Offered spring semester only.

TH 340. PLAY PRODUCTION **3 HRS.**
A course in the problems of producing plays designed for students who plan to teach or work in theatre. Students will be introduced to performance, technical, and front-of-house aspects of theatre production.

TH 342. SUMMER THEATRE PRODUCTION III **1-4 HRS.**
(Prerequisite, TH 242.) A production course especially designed for students working in summer stock. Offered summer session only.

TH 350. INTRODUCTION TO THEATRICAL DESIGN **3 HRS.**
Students will complete exercises to explore the principles and elements of design as they relate to theatrical production. Projects and drawing exercises will be done in various art media in a studio format.

TH 351. HISTORY OF COSTUME AND DÉCOR **3 HRS.**
This course will explore how a particular culture in a period of history represents itself through the visual artifacts of its clothing, buildings, decorations, and furniture. The class will also discuss politics, social attitudes, and economic conditions as sources for creating a theatrical production in an appropriate historical milieu. This course will introduce and refine skills necessary for identification of period style.

TH 361. CHILDREN'S THEATRE PRODUCTION **3 HRS.**
(Prerequisites, TH 340 or TH 381 and TH 221.) Scripts for children's audiences will be studied, directoral and acting problems will be explored, and students will participate in the staging of a workshop production for a children's audience.

TH 370. SPECIAL PROBLEMS IN THEATRE ARTS **1-3 HRS.**
Intensive investigation of particular areas in dramatic arts. Offered as a class rather than as an individual project.

TH 377. EDUCATIONAL THEATRE COMPANY **1-3 HRS.**
Audition required. Educational Theatre Company is designed for the advanced acting student. Through improvisation, the class will develop performance pieces designed to be used in other classes as teaching aids. The class will also develop creative dramatic and improvisation techniques that can be used in elementary and secondary classrooms.

TH 381. SURVEY OF DRAMATIC LITERATURE **3 HRS.**
A survey of dramatic literature from the Greeks to the Absurdist. Plays representing all the major genres are read and discussed in their historical perspective.

TH 382. MODERN DRAMA **3 HRS.**
A survey of late nineteenth and twentieth century continental, British and American writers such as Ibsen, Strindberg, Chekov, Brecht, Synge, O'Neill, Sartre, and Miller, who have influenced the modern drama. Contemporary playwrights of special significance will also be considered.

TH 383. INTRODUCTION TO SHAKESPEARE **3 HRS.**
A survey of Shakespeare: his life, his theatre and his plays. Students will read a selection of Shakespeare's histories, comedies, and tragedies with an emphasis upon critical analysis, interpretation and history. The course will be supplemented by film and video interpretations of the plays. Offered spring semester, even years.

TH 390. HISTORY OF THE THEATRE I **3 HRS.**
A survey of the history and development of theatre arts from its origin to 1700. Approximately fifteen plays and textual readings are required.

TH 391. HISTORY OF THE THEATRE II **3 HRS.**
A survey of the history and development of theatre arts from 1700 to the present day. Assignments are similar to TH 390.

TH 401. SENIOR CAPSTONE **1 HR.**
(Majors only, or by consent of instructor.) A capstone course for advanced theatre students to prepare them for entry into the professional theatre, or for graduate study. Students will develop resumes, audition materials, design portfolios, and other tools, which they will utilize in the professional theatre/graduate schools.

TH 412. DANCE FOR THEATRE III **3 HRS.**
(Prerequisites, TH 312.) A continuation of Dance for Theatre II.

TH 421. ACTING IN PERIOD STYLES **3 HRS.**
(Prerequisite, TH 321) The analysis and performance of scenes from Greek Drama, Shakespeare, Restoration, and other periods.

TH 426. PLAY DIRECTING **3 HRS.**
(Prerequisites, TH 221 and TH 325.) An introduction to the basic concepts, theories, and methods of text-based stage directing. A series of exercises culminates in the production of a short scene or play.

TH 431. SPECIAL TOPICS IN TECHNICAL PRODUCTION **1-3 HRS.**
(Prerequisite, TH 131.) Intensive study of a special topic in technical production that falls outside the usual technical production courses. Topics will be announced before the course is offered. Student may repeat different sections with consent of advisor.

TH 434. SPECIAL TOPICS IN COSTUMING **1-3 HRS.**
Intensive study of a special topic in technical production that falls outside the usual technical production courses. Topics announced before course offered. Student may repeat different sections with consent.

TH 442. SUMMER THEATRE PRODUCTION IV **1-4 HRS.**
(Prerequisite, TH 342.) A production course especially designed for students working in summer stock. Offered summer session only.

TH 454. COSTUME DESIGN **3 HRS.**
(Prerequisite, TH 350 and TH 351.) A study of theatrical costume design with special emphasis on the design process including the collaboration with the director and other designers and the style of presentation. The student will complete at least one design project. Offered spring semester only.

TH 457. SCENE DESIGN I **3 HRS.**
(Prerequisites, TH 131 and TH 350.) A study of theatrical scene design with emphasis on the design process including collaboration with the director and other designers. Studies will include scenographic techniques and perspective drawing as employed in scene design. Students will complete at least two design projects.

TH 471. INDEPENDENT STUDY **1-3 HRS.**
Consent of instructor. Directed reading and/or research in an area of theatre arts not included in the regularly listed courses. Students may repeat different sections for a maximum of twelve hours credit with consent of advisor.

TH 472. ADVANCED THEATRE PROJECTS **1-2 HRS.**
Designed for juniors and seniors actively participating in University Theatre productions.

TH 497. AMERICAN MUSICAL THEATRE **3 HRS.**
A survey of the genres and history of the American Musical Theatre. Students will study major writers, performers, and productions through reading, sound recording, video, and film. A major term project is required for all students. Offered every spring semester, odd years.

TH 526. ADVANCED PLAY DIRECTING **3 HRS.**
(Prerequisite, TH 426.) Reading and discussion over theories of modern stage direction. Principles and techniques of stage directing are applied to semester-long production assignment.

TH 528. ADVANCED PERFORMANCE TOPICS **1-3 HRS.**
This course will focus on generating new theatre works. The students will explore how to adapt a poem, short story, and/or other sources for theatre performance. Student may repeat different sections for a maximum of twelve hours credit with consent of instructor. Consent of instructor needed to enroll.

TH 554. ADVANCED COSTUME DESIGN **3 HRS.**
(Prerequisite, TH 454.) Advanced principles and practice of costume design with emphasis on designing and rendering costumes from various historical periods. Design exercises could include topics such as design for dance, opera, large-scale drama and musicals.

TH 557. ADVANCED SCENE DESIGN **3 HRS.**
(Prerequisite, TH 457.) This course is an advanced study of theatre design in scenery. It is a continuation of design skills introduced in TH 457. Among the advanced design areas covered in the course will be conceptualization of design projects, designing multiple set shows, portfolio preparation, and advanced color studies.

TH 558. SPECIAL TOPICS IN THEATRICAL DESIGN **1-3 HRS.**
(Prerequisites, TH 336, TH 454, or TH 457.) This course is an advanced study of theatre design in scenery, lighting and/or costumes, where students will have the assignment of creating advanced design projects. This will be a course built on the continuation of design skills introduced in the prerequisite courses. May be repeated with consent of instructor.

TH 570. THEATRE INTERNSHIP I **3 HRS.**
Course provides firsthand experience and training in the teaching of an area in theatre arts.

TH 571. THEATRE INTERNSHIP II **3 HRS.**
(Prerequisites, TH 570.) Course provides a second experience for those individuals who wish to further develop their teaching skills. The student should serve in a different course than the one served in for the first intern experience.

TESOL/ESL

TS 519. LANGUAGE ASSESSMENT AND EVALUATION **3 HRS.**

This course is a part of the ESL teacher endorsement curriculum, but may be taken as well by non-education majors with consent of instructor. This course explores theoretical and practical aspects of language assessment and evaluation, particularly in measuring second language skills of students identified as limited English proficient under U.S. government entry and exit criteria for ESL, bilingual education and mainstream programs. It explores standardized plus locally-developed tests and other assessment instruments. Students develop criteria for evaluating testing instruments, plus techniques for designing their own instruments for assessing the English or other language skills of specified pupil populations.

TS 532. TEACHING ENGLISH AS A SECOND/FOREIGN LANGUAGE **3 HRS.**

This course provides theory and practice of teaching English as a second language (ESL/EFL). It is designed to provide skills and knowledge for teachers who are/will be working with children identified by the federal government as limited English proficient (LEP). According to TESOL Teacher Education standards, this class emphasizes the critical pedagogical aspects of teaching ESL/EFL and the preparation of teaching materials and tests for classroom use. The class provides training in the major ESL methodologies and techniques of teaching listening, speaking, reading, writing, grammar, vocabulary, computer-assisted language learning (CALL) and culture. This class calls for a highly constructive class participation, critical thinking and very responsible out-of-class reading and assignment preparation.

TS 535. PRACTICUM IN TEACHING ENGLISH AS A SECOND/FOREIGN LANGUAGE **3 HRS.**

The Practicum in TESOL is the capstone of the teacher training courses, namely Assessment and Evaluation, Linguistics for Language Teachers, Teaching English as a Second/Foreign Language, and Cultural Awareness. You now can showcase all the knowledge you have accumulated in those classes. This course will provide you with opportunities for observing classroom instruction, practicing your teaching strategies, receiving feedback, engaging in discussions, and being able to reflect on and assess your own teaching. Whether you are a pre-service or an in-service teacher, these activities will help you become a more effective educator as you plan and implement your lessons. Pre-service student teachers will observe other ESL teachers in an ESL or Bilingual Education program at a public elementary, middle, secondary school or approved English language learning program, under the general direction of a certified ESL onsite teacher and university supervisor. You will reflect on their teaching strategies and skills while actively teaching or assisting the onsite teacher in conducting a variety of classroom activities.

TS 600. LINGUISTICS FOR LANGUAGE TEACHERS **3 HRS.**

Course focuses on applied linguistics and how it can directly benefit and improve the teaching of ESL/EFL. This course focuses on the processes of second language acquisition and the nature of first language acquisition. The course provides an overview of linguistic, sociolinguistic and psycholinguistic analyses as they pertain to the language proficiency and academic achievement of ESL students (or LEP students). Beginning with a study of the linguistic components of language, the course provides an opportunity for prospective ESL/EFL teachers to explore the relevance of linguistics to second/foreign language teaching and learning.

TS 700. LINGUISTICS FOR LANGUAGE TEACHERS 3 HRS.

This course focuses on applied linguistics and how it can directly benefit and improve the teaching of ESL/EFL. This graduate level course focuses on the processes of second language acquisition and the nature of first language acquisition. The course provides an overview of linguistic, sociolinguistic and psycholinguistic analysis as they pertain to the language proficiency and academic achievement of ESL students (or LEP students). Beginning with a study of the linguistic components of language, the course provides an opportunity for prospective ESL/EFL teachers to explore the relevance of linguistics to second/foreign language teaching and learning. The course calls for a highly constructive class participation, critical thinking and very responsible out of class reading and assignment preparation.

TS 701. INTRODUCTION TO GRADUATE RESEARCH 3 HRS.

An introduction to graduate level research methods used in applied linguistics. It is a hands-on class in which students will develop a research proposal in an area of their choice. We will discuss issues related to research design, methods, and statistics. The main areas of discussion will be: identifying a topic for research, generating research questions, and writing a research proposal. This will be done by reviewing the relevant literature, selecting the most appropriate data collection techniques, obtaining approval to work with human participants, coding and organizing the data in a database, choosing the appropriate statistical analysis, and writing about the research project in a professional style.

TS 710. SOCIOLINGUISTICS 3 HRS.

(Prerequisite: Completion of core courses required for MA TESOL candidates.) This course is an introduction to the study of language in its social context. The class will examine how social class, ethnic background, gender, and other social variables influence language behavior. The course will also focus on past and present research surrounding such issues as language attitudes, standard and nonstandard usage, Black English, bilingualism, rules of social interaction and language planning.

TS 719. LANGUAGE ASSESSMENT AND EVALUATION 3HRS.

This graduate-level course is a core course in the TESOL teacher licensure and MA TESOL curriculum. TS719 explores theoretical and practical aspects of language assessment and evaluation, particularly in measuring second language skills of English Language Learners. The course explores standardized, locally-developed tests, and other assessment instruments. Students develop criteria for evaluating testing instruments. They also develop techniques for designing their own instruments for assessing various language skills of specified pupil populations. The course calls for a highly constructive class participation, critical thinking and very responsible out of class reading and assignment preparation.

TS 720. SECOND LANGUAGE ACQUISITION 3 HRS.

(Prerequisite, TS 600 Linguistics for Language Teachers) The purpose of this course is to introduce students to theories and research in Second Language Acquisition (SLA). Students will be introduced to the history of SLA and Research Methodologies. Students should also become familiar with various theoretical approaches to language learning including Universal Grammar, Cognitive, Functional/pragmatic, Interactionist, and Sociocultural, Sociolinguistics. Students will also be introduced to and should become familiar with at least one research methodology depending on the questions they prefer to ask. SLA is a theoretical and experimental field of study that examines language development, in this case the acquisition of second languages. The term second includes "foreign" and "third", "fourth", etc.

TS 730. CROSS CULTURAL COMMUNICATION 3 HRS.

(Prerequisite: Completion of core courses required for MA TESOL.) This course investigates cultural behaviors, assumptions, values, and conflicts

surrounding communication across cultures in the context of teaching English as a second or foreign language at all levels. This courses explores issues related to the intercultural communication processes. It will consider the important role of context (social, cultural, and historical) in intercultural interactions. Based on insights from critical theory, the course examines the complex relationship between culture and communication from three conceptual perspectives: the social psychological perspective, the interpretive perspective, and the critical perspective.

TS 732. SPECIAL TOPICS IN TESOL 1-3 HRS.

This umbrella course will offer courses/workshops that will require in-depth critical reflection and build knowledge and skills in special topics in the field of Teaching English as a Second Language (TESOL). The class will meet the needs of mainstream classroom teachers, paraprofessionals, and pre-service teachers. Topics will include, but not be limited to: 1) proven TESOL strategies, techniques, approaches, and resources for ESOL classroom use. 2) presentation in the content areas of math, science, language arts, and social studies for both elementary and secondary classrooms. 3) special education and TESOL 4) assessment strategies, techniques, specially designed for ELL 4) legal issues related to the education of ELLs and TESOL 5) native language and literacy methods 6) parental/administrative/community involvement strategies.

TS 734. TEACHING ENGLISH AS A SECOND/FOREIGN LANGUAGE 3 HRS.

The course is designed to provide skills and knowledge for teachers who are/will be working with children identified by the federal government as limited English proficient (LEP). This graduate-level course provides theory and practice of teaching English as a second language (ESL) and English as a foreign language (EFL) to non-native speakers. According to TESOL teacher education standards, this class emphasizes the critical pedagogical aspects of teaching ESL/EFL and the preparation of teaching materials and tests for classroom use. The class also provides training in the major methodologies and techniques of teaching listening, speaking, reading, writing, grammar, vocabulary, computer-assisted language learning, and culture. The course calls for a highly constructive class participation, critical thinking and very responsible out of class reading and assignment preparation.

TS 735. PRACTICUM IN TEACHING AS A SECOND/FOREIGN LANGUAGE 3 HRS.

(Prerequisite: TS 532 or TS 734, or permission of instructor.) This course will involve seminars, observation, participation and supervised teaching experience in English as a second or foreign language.

TS 760. LITERACY INSTRUCTION FOR SECOND LANGUAGE LEARNERS 3 HRS.

This course provides an introduction to theories and research that contribute to an understanding of the literacy development for culturally and linguistically diverse students. Students will investigate the essential elements of literary development, while examining strategies to move beyond current practice to ensure informed accommodations for all students in the mainstream classroom.

TS 770. INDIVIDUAL DIFFERENCES IN SECOND LANGUAGE ACQUISITION 3 HRS.

The purpose of this course is to gain an understanding of how learners in a classroom differ from one another and the impact these individual differences in language learning have on the process of second language acquisition, the rate of acquisition, and performance in the classroom. Students will: 1) explore the role of cognitive aspects such as aptitude and field independence in SLA 2) explore the role of affective factors such as motivation and risk-taking 3) discuss how language learning strategies influence student performance 4) discuss the pedagogical implications for language teachers.

TS 780. STRUCTURE OF THE ENGLISH LANGUAGE 3 HRS.

This course provides an opportunity for pre-service and in-service ESL/EFL teachers to learn about current insights and strategies in the teaching of grammar from the disciplines of sociolinguistics, composition, and TESOL. The class will examine attitudes and beliefs about grammar in the society at large, as well as investigating trends and research in the teaching of grammar to better serve not only English Language Learners, but all students. TS 780 studies grammar in oral as well as written language discourse, with emphasis on language use.

TS 790. MEDIA ASSISTED LANGUAGE LEARNING 3 HRS.

This course offers students an opportunity to survey various technologies in English language teaching and learning, and explore the challenges and opportunities presented by teaching and learning in digital environments. The focus of this course is on understanding the role technology plays in the teaching and learning of language and learning different types of technologies that can be used for English language teaching and learning.

TS 800. THESIS HOURS 1-6 HRS.

This course is for students who are writing their thesis under the guidance of their thesis advisor and committee members. They will enroll for the number of credits they need to fulfill their degree requirements (1, 2, 3, 4, 5 or 6). They can enroll for as many credits as they need but no more than 3 credit hours will count toward their degree requirements. Students will meet with their advisor as needed. The course will be graded on a pass/no credit scale.

ZOOLOGY**ZO 159. SPECIAL TOPICS IN ZOOLOGY 1-3 HRS.**

(Prerequisite, consent of instructor.) Courses taught on demand to provide an in-depth consideration of specialized topics in various areas of zoology.

ZO 200. INTRODUCTION TO ANATOMY AND PHYSIOLOGY 3 HRS.

(Prerequisite GB 100; PE majors and non-biology majors only.) A lecture course designed to introduce the student to the structure and function of the following body systems: skeletal, muscular, nervous sensory, circulatory, respiratory, digestive, urinary systems. Designed for students who are not biology majors or who are not in the pre-nursing program. Students may not receive credit for both ZO 200 and ZO 362.

ZO 201. INTRODUCTION TO ANATOMY AND PHYSIOLOGY LAB 1 HR.

(Prerequisite, concurrent with ZO 200; PE and non-biology majors only.) Study of anatomy of major organ systems by use of anatomical models and selected preserved animal organs. Use of physiological methods to study muscular, sensory, cardiovascular and respiratory systems.

ZO 214. BIOLOGY OF ANIMALS 3 HRS.

(Prerequisite, GB 140 or equivalent.) Lecture-discussion introduction to zoology, including animal diversity, organization of the animal body and its functional systems, animal-environment relationships, and the evolutionary basis of animal life. Concurrent enrollment is ZO 215, Biology of Animals Lab, is strongly recommended.

ZO 215. BIOLOGY OF ANIMALS LAB 1 HR.

(Prerequisite, GB 140/141 or equivalent.) Laboratory introduction to zoology, including hands-on study of the diversity of animal phyla, and structure/function of the animal body. Concurrent enrollment in ZO 214, Biology of Animals, is strongly recommended.

ZO 259. SPECIAL TOPICS IN ZOOLOGY 1-3 HRS.

(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in various areas of zoology.

ZO 362. HUMAN ANATOMY AND PHYSIOLOGY 3 HRS.

(Prerequisites, GB 140; CH 123 and CH 124 or CH 120 and CH 121; concurrent with ZO 363.) A course designed for pre-nursing students and others preparing for health professions. Complementary structure and function of the following major body systems: skeletal, muscular, nervous, circulatory, respiratory, digestive, urinary, reproductive and endocrine.

ZO 363. HUMAN ANATOMY AND PHYSIOLOGY LABORATORY 2 HRS.

(Prerequisites, GB 140; CH 123 and CH 124 or CH 120 and CH 121, concurrent with ZO 362.) Observations and experiments in anatomy, histology and physiology of the major organ systems. This course must be taken concurrently with ZO 362.

ZO 364. HUMAN PATHOPHYSIOLOGY 3 HRS.

(Prerequisites, ZO362, ZO363.) Biological processes that occur in the presence of dysfunction or disease are presented in this theory course. Content emphasizes the most common alterations in selected body systems. Risk factors, epidemiology, and clinical manifestations across the life span are discussed.

ZO 409. ZOOLOGY PROJECTS 1-3 HRS.

(Prerequisite, consent of instructor.) The student works independently, with the aid and advice of one or more members of the staff, on a project in an area of zoology in which they have some interest and competence.

ZO 440. ENTOMOLOGY 2 HRS.

(Prerequisites, ZO 214/215 and equivalents, and EB 480. ZO 441 must be taken concurrently.) Biological relationships of insects. Insect morphology, physiology, ecology and classification. Metamorphosis and development of insects. Economic aspects of entomology.

ZO 441. ENTOMOLOGY LAB 2 HRS.

(Prerequisite, concurrent with ZO 440.) Morphology, physiology, and behavior studies. Collection and identification of insects.

ZO 459. SPECIAL TOPICS IN ZOOLOGY 1-3 HRS.

(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of zoology.

ZO 472. ICHTHYOLOGY 2 HRS.

(Prerequisites, ZO 214/215 or equivalent. EB 480 or equivalent prerequisite or co-requisite. ZO 473 must be taken concurrently.) Study of the structure, function, diversity, systematics, and ecology of fishes of the world.

ZO 473. ICHTHYOLOGY LAB 2 HRS.

(Prerequisites, ZO 214/215 or equivalent. EB 480 or equivalent prerequisite or co-requisite. ZO 472 must be taken concurrently.) Field and laboratory techniques for collecting and preserving fishes. Identification of fishes in Kansas and representative fishes of the world. Study of the biology and ecology of fishes inhabiting local waters.

ZO 480. ORNITHOLOGY 3 HRS.

(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 481 must be taken concurrently.) Study of the structure, evolution, behavior, ecology and conservation of birds of the world. Lectures, films and slides.

ZO 481. ORNITHOLOGY LAB 1 HR.
(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 480 must be taken concurrently.) Study of birds, with emphasis on field identification of Great Plains birds by song and sight. Laboratory work and field trips.

ZO 490. MAMMALOGY 3 HRS.
(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 491 must be taken concurrently.) Study of the structure, evolution, behavior, ecology and conservation of mammals of the world. Lectures, films and slides.

ZO 491. MAMMALOGY LAB 1 HR.
(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 490 must be taken concurrently.) Study of mammals, with emphasis on field identification of Great Plains species. Laboratory work and field trips.

ZO 515. VERTEBRATE STRUCTURE AND DEVELOPMENT 3 HRS.
(Prerequisite, ZO 215 or ZO 362 or equivalent. ZO 516 must be taken concurrently.) An integrated course in vertebrate embryology and comparative anatomy. Lecture and discussion on germ layer development, organogenesis, fetal-maternal relationships, and adult anatomy of selected vertebrate systems.

ZO 516. VERTEBRATE STRUCTURE AND DEVELOPMENT LABORATORY 2 HRS.
(Corequisite, concurrent with ZO 515.) Laboratory work to accompany ZO 515. Dissection of the adult dogfish shark and a representative mammal. Study of the developing chick embryo.

ZO 520. NEUROBIOLOGY 3 HRS.
(Prerequisite, CH 370/371.) Basic anatomy and physiology of nerve cells and the mammalian nervous system, with attention to processes involved in behavior. Special emphasis on neural pathways and mechanisms underlying sensory perception, motor coordination, and such mental functions as sleep, motivation, emotion, learning, and memory.

ZO 521. NEUROBIOLOGY LAB 2 HRS.
(Prerequisite, ZO 520 must be taken concurrently.) In this course we examine several of the advanced techniques for performing cellular neurophysiology. The techniques examined will include extracellular recording, intracellular recording, voltage clamp, iontophoretic and pressure injections into cells, brain slice recordings, optical recordings of fluorescent ion-sensitive dyes, and immunocytochemistry.

ZO 530. ANIMAL BEHAVIOR 3 HRS.
(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 531 must be taken concurrently.) Study of the evolution, mechanisms, types and results of behavior. Emphasis on vertebrate animals, particularly concerning social organization, communication, and behavioral ecology. Lectures, films and slides.

ZO 531. ANIMAL BEHAVIOR LAB 1 HR.
(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 530 must be taken concurrently.) Field and laboratory experiences which investigate and illustrate the principles of animal behavior.

ZO 546. INVERTEBRATE ZOOLOGY 3 HRS.
(Prerequisites, ZO 214/215 and concurrent with ZO 547.) Lectures and discussions of the possible phylogenetic relationships between invertebrate phyla, comparisons of adaptations for accomplishing the basic life functions of animals.

ZO 547. INVERTEBRATE ZOOLOGY LAB 1 HR.
(Prerequisite, concurrent with ZO 546.) A comparison of the distinguishing morphological and anatomical characteristics of invertebrate phyla and classes. Emphasis on recognition of major taxonomic units, taxonomy and ecology of local invertebrate fauna.

ZO 556. NATURAL HISTORY OF VERTEBRATES 3 HRS.
(Prerequisites, ZO 214, ZO 215, and EB 480, or permission of instructor. Must be taken concurrently with ZO 557.) Lectures, discussions and assigned reading on phylogeny, evolution, classification, distribution, and ecology of vertebrates.

ZO 557. NATURAL HISTORY OF VERTEBRATES LAB 1 HR.
(Prerequisites, ZO 214, ZO 215, and EB 480 or permission of the instructor.) Field and laboratory identification and natural history of local vertebrates and the most common forms elsewhere in the United States. This course must be taken concurrently with ZO556.

ZO 565. HISTOLOGY 2 HRS.
(Prerequisite, CH 370/371. ZO 566 must be taken concurrently.) A consideration of Human Histology including cells, tissues, and organs, with an emphasis on the correlation between structure and function.

ZO 566. HISTOLOGY LAB 2 HRS.
(Prerequisite, concurrent with ZO 565.) A microscopic consideration of mammalian (human, if available) cells, tissues, and organs.

ZO 570. MAMMALIAN PHYSIOLOGY 3 HRS.
(Prerequisite, CH 370/371.) A course designed for biology majors and others preparing for health professions. Lectures are concerned with the functions and mechanisms of the digestive, endocrine, neuromuscular, cardiovascular, respiratory, urinary, and central nervous systems.

ZO 590. PARASITOLOGY 2 HRS.
(Prerequisites, CH 370/371. ZO 591 must be taken concurrently.) Characteristics, distribution, and life histories of protozoans, helminths, and arthropods important in the cause and transmission of diseases, with emphasis upon those affecting humans.

ZO 591. PARASITOLOGY LAB 2 HRS.
(Must be taken concurrently with ZO 590.) Identification of the more important protozoan, helminth, and arthropod parasites. Selected life histories, involving live hosts. Recovery, fixation, staining, and mounting of parasites, with emphasis upon those affecting vertebrates of the area.

ZO 717. COMPARATIVE ANIMAL PHYSIOLOGY 3 HRS.
(Prerequisite, CH 370/371.) An advanced physiology course which focuses on the functions and mechanisms of the endocrine, nervous, digestive, cardiovascular, respiratory, and excretory systems. A comparative approach is used to examine both invertebrate and vertebrate animals.

ZO 760. ENDOCRINOLOGY 3 HRS.
(Prerequisite, CH 370/371.) Structure and function of the major endocrine glands in vertebrates. The chemistry and physiology of the hormones secreted by each gland are discussed, as well as the physiology of target tissues, regulation of hormone secretion, and possible mechanisms of hormone action.

ZO 762. ENVIRONMENTAL PHYSIOLOGY 3 HRS.

(Prerequisites, ZO 214/215 and CH 370/371, or consent of instructor.) The study of the influence of environmental factors on physiological systems, primarily of vertebrates. Photoperiodism, biological rhythms, temperature adaptations, altitude and diving pressure adaptations, reproduction, water regulation and excretion, and control and coordination by nervous and endocrine systems will be discussed. Emphasis will be upon physiological, as well as behavioral, mechanisms which allow animals to survive in the Earth's various habitats.

ZO 809. GRADUATE PROJECT IN ZOOLOGY 1-3 HRS.

(Prerequisite, consent of instructor.) The student works independently, with the aid and advice of one or more members of the staff, on a project in which they have some interest or competence.

ZO 840. ENTOMOLOGY 2 HRS.

(Prerequisites, ZO 214/215 and equivalents, and EB 480. ZO 841 must be taken concurrently.) Biological relationships of insects. Insect morphology, physiology, ecology and classification. Metamorphosis and development of insects. Economic aspects of entomology.

ZO 841. ENTOMOLOGY LAB 2 HRS.

(Prerequisite, concurrent with ZO 840.) Morphology, physiology, and behavior studies. Collection and identification of insects.

ZO 859. SPECIAL TOPICS IN ZOOLOGY 1-4 HRS.

(Prerequisite, consent of instructor.) Courses taught on demand to provide in-depth consideration of specialized topics in the various areas of zoology.

ZO 872. ICHTHYOLOGY 2 HRS.

(Prerequisites, ZO 214/215 or equivalent. EB 480 or equivalent prerequisite or co-requisite. ZO 873 must be taken concurrently.) Study of the structure, function, diversity, systematics, and ecology of fishes of the world.

ZO 873. ICHTHYOLOGY LAB 2 HRS.

(Prerequisites, ZO 214/215 or equivalent. EB 480 or equivalent prerequisite or co-requisite. ZO 872 must be taken concurrently.) Field and laboratory techniques for collecting and preserving fishes. Identification of fishes in Kansas and representative fishes of the world. Study of the biology and ecology of fishes inhabiting local waters.

ZO 880. ORNITHOLOGY 3 HRS.

(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 881 must be taken concurrently.) Study of the structure, evolution, behavior, ecology, and conservation of birds of the world. Lectures, films and slides.

ZO 881. ORNITHOLOGY LAB 1 HR.

(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 880 must be taken concurrently.) Study of birds, with emphasis on field identification of Great Plains birds by song and sight. Laboratory work and field trips.

ZO 885. GRADUATE RESEARCH IN ZOOLOGY 2-3 HRS.

(Prerequisite, graduate standing and at least three hours credit in graduate-level independent study.) Investigation of problems in zoology by students who have demonstrated research ability at the graduate level.

ZO 890. MAMMALOLOGY 3 HRS.

(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 891 must be taken concurrently.) Study of the structure, evolution, behavior, ecology, and conservation of mammals of the world. Lectures, films and slides.

ZO 891. MAMMALOLOGY LAB 1 HR.

(Prerequisites, ZO 214/215 or equivalent; EB 480 or equivalent a co- or prerequisite. ZO 890 must be taken concurrently.) Study of mammals, with emphasis on field identification of Great Plains species. Laboratory work and field trips.

FACULTY

(FULL-TIME)

- ESSAM A. ABOTTEEN, Ph.D., Oklahoma State University, Associate Professor, Mathematics, Computer Science & Economics, 1986.
- LINDA ADAMS-WENDLING, Ph.D., University of Kansas, Chair/Professor, Nursing, 2013.
- CLAUDIA P. AGUIRRE-MENDEZ, M.S., University of Puerto Rico, Assistant Professor, Physical Sciences, 2015.
- ADELAIDE H. AKERS, Ph.D., University of Missouri, Assistant Professor, Mathematics & Economics, 2017.
- NANCY M. ALBRECHT, Ed.D., Kansas State University, Professor, School Leadership/Middle & Secondary Teacher Education, 2001.
- ALIVIA J. ALLISON, Ph.D., University of Missouri-Kansas City, Assistant Professor, Physical Sciences, 2012.
- JASON C. APLEGAGE, B.S., University of Missouri-Kansas City, Instructor, Physical Sciences, 2019.
- CATHERINE A. AYANTOYE, Ph.D., University of Northern Colorado, Assistant Professor, Elementary Education, Early Childhood, & Special Education, 2014.
- MELISSA M. BAILEY, Ph.D., University of Alabama, Professor, Biological Sciences, 2008.
- JORGE L. BALLESTER, Ph.D., University of Texas, Professor, Physical Sciences, 1990.
- JOHN H. BARNETT, Ph.D., University of Arkansas, Associate Professor, Social Sciences, 2006.
- JAMES L. BARTRUFF, M.F.A., University of Montana, Director/Professor, Theatre/Communication & Theatre, 2004.
- R. EDWARD BASHAW, Ph.D., University of Memphis, Dean and Jones Distinguished Professor/Professor, School of Business, 2016.
- KAREN A. BATES, Ph.D., University of Kansas, Associate Professor, Elementary Education, Early Childhood, & Special Education, 2010.
- ANTONINA BAUMAN, Ph.D., University of Surrey, Assistant Professor, Business Administration, 2015.
- MICHAEL BEHRENS, Ph.D., University of Illinois, Assistant Professor, English, Modern Languages, & Journalism, 2015.
- STEVEN R. BELLAVIA, Ph.D., Bowling Green State University, Instructor, Social Sciences, 2019.
- LENDI L. BLAND, Ph.D., Kansas State University, Instructor, Elementary Education, Early Childhood, & Special Education, 2000.
- PAUL D. BLAND, Ph.D., Kansas State University, Professor, School Leadership/Middle & Secondary Teacher Education, 2000.
- ERIN BLOCKER, Ph.D., University of Kansas, Instructor, Health, Physical Education, & Recreation, 2019.
- MARJORIE A. BOCK, Ed.D., University of Kansas, Professor, Elementary Education, Early Childhood, & Special Education, 2008.
- CARRIE A. BOETTCHER, M.S., Emporia State University, Instructor, Counselor Education, 2018.
- JOAN D. BREWER, Ph.D., Kansas State University, Interim Dean/Professor, The Teachers College/Health, Physical Education & Recreation, 2001.
- ROY BRIGGEMAN, M.A., Emporia State University, Director/Instructor, Intensive English, 1982.
- MELISSA M. BRIGGS, Ph.D., Kansas State University, Assistant Professor, Counselor Education, 2014.
- CHARLES S. BROWN, Ph.D., University of Oklahoma, Associate Chair/Professor, Philosophy/Social Sciences, 1987.
- TIM G. BURNETT, Ph.D., University of Kansas, Chair/Associate Professor, Biological Sciences, 2002.
- MICHAEL S. BUTLER, Ph.D., Auburn University, Professor, Health, Physical Education & Recreation, 1995.
- MARI W. CABALLERO, Ph.D., University of Kansas, Assistant Professor, Elementary Education, Early Childhood, & Special Education, 2016.
- EVANDRO D. CAMARA, Ph.D., University of Notre Dame, Professor, Sociology, Anthropology, & Crime & Delinquency Studies, 1993.
- REBECCA M. RODRIGUEZ CAREY, M.A., University of Missouri, Assistant Professor, Sociology, Anthropology, & Crime & Delinquency Studies, 2018.
- HEATHER C. CASWELL, M.S., Kansas State University, Associate Professor, Elementary Education, Early Childhood, & Special Education, 2011.
- ROBERT B. CATLETT, M.A., University of Nebraska, Associate Professor/Director, Mathematics & Economics/Center for Economic Education, 1976.
- STEPHEN E. CATT, Ph.D., Ohio University, Professor, Communication & Theatre, 1977.
- JUAN A. CHAVARRIA, Ph.D., University of Texas-Rio Grande Valley, Assistant Professor, Accounting, Information Systems, & Finance, 2017.
- MOHAMMAD I. CHOWDHURY, Ph.D., University of Missouri-Columbia, Professor, Business Administration, 1997. (Phased Retirement.)
- EDWIN J. CHURCH, Ed.D., Wichita State University, Professor, School Leadership/Middle & Secondary Teacher Education, 2005. (Phased Retirement)
- GERALDINE A. COFFMAN, Ed.D., University of Kansas, Professor, Elementary Education, Early Childhood, & Special Education, 1999.
- JOZENIA T. COLORADO-RESA, Ph.D., University of Kansas, Interim Associate Dean/Associate Professor, The Teachers College/Instructional Design & Technology, 2007.
- DANIEL M. COLSON, Ph.D., University of Illinois, Associate Professor, English, Modern Languages, & Journalism, 2012.
- ALLAN D. COMSTOCK, D.M.A., University of Memphis, Chair/Professor, Music, 1994.
- ERIC L. CONRAD, M.F.A., Rhode Island School of Design, Professor, Art, 2004.
- DAVID P. CORDLE, D.M., Florida State University, Provost & Vice President for Academic Affairs/Professor, Music, 2013.
- DAWN M. COURTNEY, D.M.A., University of Miami, Associate Professor, Music, 2001.
- CATE CROSBY, Ph.D., Ohio State University, Associate Professor, Instructional Design & Technology, 2018.
- SCOTT S. CRUPPER, Ph.D., University of Kansas, Professor, Biological Sciences, 1997.
- MARTIN CUELLAR, D.M.A., University of Texas-Austin, Professor, Music, 2000.
- JOHN DECKER, M.S., Emporia State University, Assistant Professor, Art, 2019.
- KRISTINE DEKAT, M.L.S., Fort Hays State University, Assistant Professor, English, Modern Language, & Journalism, 2016.
- BRITTANY L. DENNIS, Ph.D., Idaho State University, Assistant Professor, Counselor Education, 2017.
- MICHAEL R. DENNIS, Ph.D., Purdue University, Professor, Communication & Theatre, 2008.
- LIZABETH A. DIERS, Ph.D., University of North Dakota, Interim Chair/Assistant Professor, Accounting, Information Systems, & Finance, 2015.
- ELIZABETH S. DOBLER, Ph.D., Kansas State University, Professor, Elementary Education, Early Childhood, & Special Education, 1998.
- MIRAH J. DOW, Ph.D., Emporia State University, Professor, Library & Information Management, 2002.
- M. GEORGE DURLER, Ph.D., Louisiana State University, Professor, Accounting, Information Systems & Finance, 2000.
- JAMES B. EHLERS, M.F.A., University of Florida, Professor, Art, 2007.
- ROBERTA D. EICHENBERG, M.F.A., Ohio State University, Chair/Professor, Art, 2005.

- C. EDWARD EMMER, Ph.D., Stony Brook University, Professor, Social Sciences, 2005.
- NELDA I. EPP, M.S., Emporia State University, Clinical Instructor, Elementary Education, Early Childhood, & Special Education, 2010.
- SONJA E. EZELL, Ph.D., Texas A&M University-Commerce, Associate Professor, Elementary Education, Early Childhood, & Special Education, 2012.
- LARRY R. FALCETTO, M.B.A./C.P.A., Pittsburg State University, Associate Professor, Accounting, Information Systems, & Finance, 1976.
- LIDAN FAN, Ph.D., University of Texas at Dallas, Assistant Professor, Accounting, Information Systems, & Finance, 2017.
- BRENDAN L. FAY, Ph.D., Indiana University, Assistant Professor, Library & Information Management, 2015.
- STEPHEN D. FIELDS, Ph.D., University of Oklahoma, Assistant Professor, Biological Sciences, 2015.
- JAVIER FLORES, Ph.D., University of Texas-Pan American, Assistant Professor, Accounting, Information Systems, & Finance, 2015.
- TRACY FREEZE, D.M.A., University of Oregon, Associate Professor, Music, 2003.
- MARC A. FUSARO, Ph.D., Northwestern University, Associate Dean/Associate Professor, Business Administration, 2016.
- STEWART GARDNER, Ph.D., Brigham Young University, Assistant Professor, Biological Sciences, 2018.
- DIPAK GHOSH, Ph.D., Tulane University, Professor, Business Administration, 1997.
- TYLER GOAD, M.S., Emporia State University, Instructor, Health, Physical Education, & Recreation, 2018.
- DOWNI GRINER, M.A., Brigham Young University, Assistant Professor, Art, 2016.
- CATHY A. GROVER, Ph.D., Texas A&M University, Associate Professor, Psychology, 2001.
- ARTHUR L. GUTIERREZ, M.L.S., Emporia State University, Associate Professor, University Libraries & Archives, 2010.
- KATELYN A. HADDOCK, M.S.N., University of Mississippi Medical Center, Assistant Professor, Nursing, 2016.
- HEIDI E. HAMILTON, Ph.D., University of Iowa, Chair/Professor, Communication & Theatre, 2004.
- DEBORAH G. HANN, Ph.D., Texas State University, Assistant Professor, Social Sciences, 2016.
