Student Art Therapy Organization-SATO

President: Keslie Humburg

The Teddy Bear Clinic is held in the Flint Hills Mall and is an event that helps normalize doctor visits for children. The children bring their favorite teddy bear to get weighed, vitals checked, and a shot. Seeing the teddy bear go through the doctors office helps children realize the doctor isn’t so bad. SATO has a table at the clinic for the children to make worry dolls. These dolls are made out of tongue depressors. The children can pick out outfits and hair to glue on the tongue depressor. This process normalizes the tools that the doctor uses.
